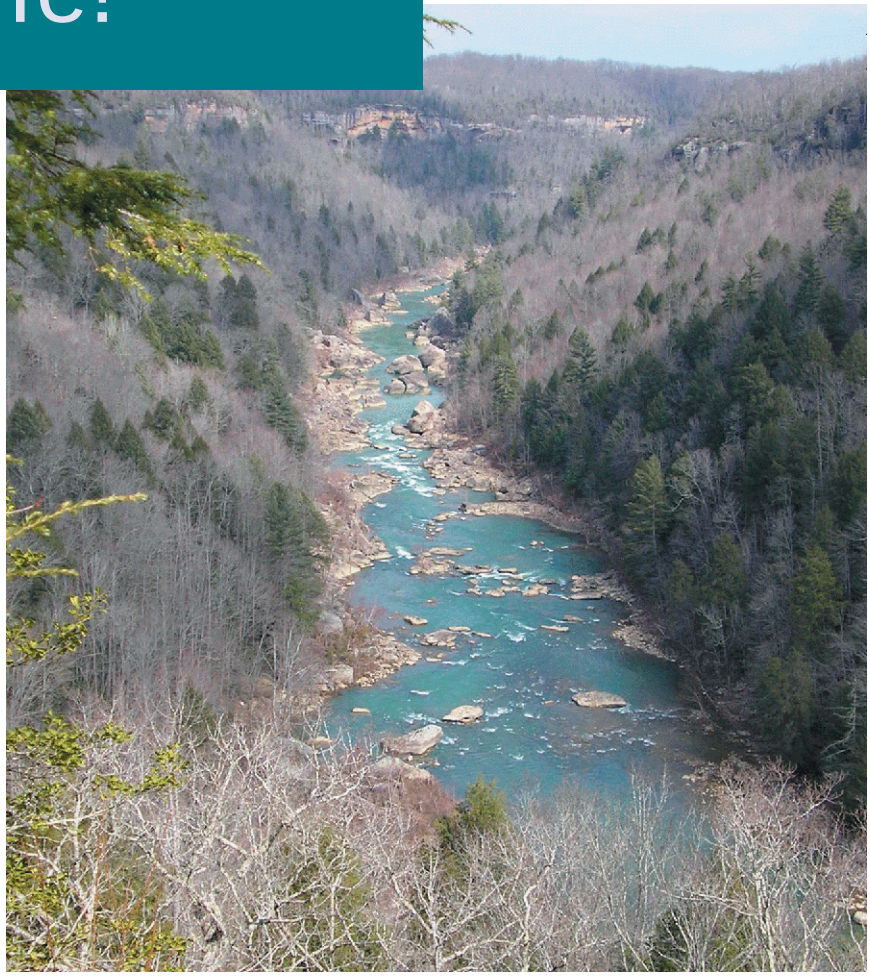
Welcome!



The National Park Service has started preparing the Contaminated Mine Drainage (CMD) Mitigation and Treatment System Environmental Impact Statement (EIS).

The EIS will address issues related to current and future treatment of contaminated mine drainage in the Big South Fork National River and Recreation Area.

Welcome to the public meeting for the Big South Fork National River and Recreation Area Contaminated Mine Drainage Mitigation and Treatment System/ Environmental Impact Statement.

We'd like to hear your input about the project, including its purpose and need, management objectives, and conceptual remediation strategies.
