**Correspondence:** 02/06/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...

SEIS did not adequately consider comments to the DEIS from dog walkers and appears to have dismissed nearly all of them. There is no information in the SEIS about why these comments (e.g., negative impacts on community and human health from off-leash restrictions) were dismissed and not

considered in the development of the preferred alternative. The SEIS lists many, many comments from people opposed to dog walking and very few from people who support dog walking. The SEIS copies, without change, entire sentences and text from the DEIS about studies of dog impacts, especially on wildlife and birds, even though DEIS comment showed that this text was inaccurate, misleading, and misrepresented what the studies actually said. Yet the SEIS copied it word for word. Comments supporting dog walking were not used.

2) SEIS still does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by public comment.

**Correspondence:** 02/06/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because there are thousands and thousands of us who walk our dogs every day to stay healthy & fit, with our dogs safely under control - dogs can & need to run around and walk way way further than humans - they NEED to be able to run around while we walk. Other people get huge amounts of pleasure from my dog, every day - this is a city of dog lovers - don't destroy that - or it will be another reason to leave San Francisco

**Correspondence:** 02/06/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it would fundamentally change the culture of our city. San Francisco is a city where it's residents work hard and play hard. We choose to live in the city for many various reasons but one unifying factor is the ability to equally enjoy the easily accessible natural resources. Off leash dog areas provide much needed recreation, providing both physical and mental stimulation for myself and my dog. A place where we can interact in a way that is unavailable anywhere else. In my personal observation, off leash dog areas and dog owners are much more protective and responsible for caring for these areas. Fort Funston is one of the cleanest beaches I've seen - and you have to package EVERYTHING out and up to the top of the cliff!

**Correspondence:** 02/06/14. As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred a.lter.native described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted com ments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

**Correspondence:** 02/06/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...

I absolutely love living in San Francisco. What's so fantastic about this part of the country is the many places to spend time outdoors year round. There's nothing my husband and I love more than spending time outdoors with our dogs. Unfortunately, in the city of San Francisco, most people (like ourselves) do not have yards, so we head to places like GGNRAs to get exercise. We've always felt a sense of com munity in these parks, meeting others who care just as much about taking care of these amazing areas.

I'm writing to express my strong opposition to the preferred a.lter.native described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent people like myself from recreating with our dogs for my own health and my dog's health the way I have on GGNRA properties for many years.

**Correspondence:** 02/07/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because there is already a limited amount of space in the Bay Area where dogs can be with their owners. As many people today have dogs as 50 years ago, yet dog recreation areas have ALREADY been constricted. And, by and large, there are no new environmental or safety issues that have com e into play because of dogs. Dogs are NOT what is hurting the environment or creating safety issues, etc. Focus on the real environmental and safety issues impacting our com munity.

**Correspondence:** 02/07/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because I believe that a balance between recreation (please see the name of GGNRA) and conservation is critical. Recreation should include opportunities for people, including children and dogs. By taking away a recreation spot we have relied upon for many years, you are materially changing a social contract we have with you. If you will not live up to the recreation end of the bargain we have had, we should not be required to support GGNRA with tax dollars or public land. It's simply not right and it's not fair.

**Correspondence:** Dear Superintendent Dean,

You seem to have lost sight of the "Recreation" charter behind the GGNRA. I sincerely hope that the widespread opposition to your plans will inspire some soul searching.

As a dog owner, it is shocking to me how few options there are in the Bay Area for exercising dogs. And now you want to restrict access further.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Katherine McCormick

**Correspondence:** 02/07/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan. San Franciscans love our dogs, but it's hard for dogs to get enough exercise in a city. Vast off-leash areas are necessary for many dogs, including mine, to get the exercise they (and their human friends) so desperately need! When my sweet sheltie mix does not get sufficient exercise (and multiple on-leash walks per day are not enough, nor are trips to the tiny fenced in dog runs) she becomes a nervous wreck, and she begins annoyance behaviors such as barking.  
I oppose the Preferred Alternative because it is too restrictive and there are no good reasons for these changes. No studies have documented an adverse impact of dogs on the environments in these areas. I

---

support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel uncomfortable. Fences also destroy the wonderful natural beauty

**Correspondence:** 02/07/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for the past 8 years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

**Correspondence:** 02/08/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...it is completely ridiculous and extreme. The proposed preferred alternative plan goes too far. We don't need more fences. Stop boxing us in. Stop "solving problems" that don't exist. GGNRA has a long history of fighting dog owners. There have been numerous lawsuits in the past. It seems that park management could find more effective things to do with our tax dollars than fighting the people that pay them. This needs to stop! The proposed policies have an adverse impact on the disabled and elderly, and on people that might not feel comfortable visiting our beautiful parks without their dogs in tow: for example women trying to exercise by themselves or simply going for a walk alone. I urge you to stop this agency that is clearly out of control, and is still incensed about losing lawsuits about the same topic in the past, from wasting more time and money in an effort to get even with dog owners!

**Correspondence:** 02/08/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan. The GGNRA is an important part of my life. I am at one of the parks three times every week with my dog. It is my primary source for entertainment and relaxation over the weekend. My dog, Otto, and I are there fog, rain, or shine every single weekend. Please do not let NPS take this away from me and my family. It is one of the primary reasons I moved to San Francisco. It is so rare to have open space like this available in a major city. Please please please help us keep the parks the way they have been for decades.

**Correspondence:** 02/08/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it severely limits off-leash dog walking areas in and around San Francisco. This plan was put together with minimal input and feedback from the general public. Only special interest groups who are already skilled at this type of process really got to give input fairly. It stands to restrict 90% o the 1% tat was negotiated by all stakeholders over a two-year period that was upheld by a federal court judge. If NPS felt a need to have it u.pdate.d or changed, the same process needed to be activated. Also, public com ment periods are ineffective and demand too much from the public creating a real lack in access to our government agencies and departments.

**Correspondence:** 02/08/14.

I strongly oppose the Preferred A.lter.native because it is too restrictive. If I wanted to live somewhere

---

where the government controlled my behavior I would move to China. These are public lands and they should be used how the public wants them used. Live free or die.

There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel uncomfortable.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Howard Peters

<b>Correspondence:</b>	02/08/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because because it severely limits my access to the parks and trails I use and love, because my dog is my constant companion. There is no reason why dogs should be restricted to walking on leash only; this is a crazy idea that will impact many people who use the park and various areas under GGNRA control. I walk for health reasons (panic attacks are lessened by walking each day) and as a single woman I rely on the security I have with my dog at my side. Please don't take this away from us. Thank you!

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because the natural habitat of this and any other space occupied by humankind has and, I sincerely hope, always will be shared with our most constant and loyal companions on earth, dogs. They have ALWAYS been present in our habitat and have always been part of our lives to discriminate against them and their caregivers is inhumane! Dogs are being blamed right and left for human deficiencies, if this space is not open to them the impact on their innocent little lives will be far greater than the impact they ever had on the GGNRA every was. Please find it in your heart to allow this important freedom to use this natural space to help the dogs and people of San Francisco healthy and well socialized.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan VEHEMENTLY. Go ahead and restrict access to environmentally fragile areas, require dogs to be under voice control but don't cut off so much access! It will force more dogs in fewer areas. And there are plenty of places for families to go without dogs if they choose, keep some for those of use who have well-behaved dogs that we clean up after. We pay taxes, too, and use few other services like schools. And we vote.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...As a citizen of San Francisco, and of course of the USA, I believe our parks

---

and other open areas should be shared by all family members, including dogs. Dogs are not a problem. The real problem is owners. As usual, the decision to punish all for the misuse of the few hurts us all. My dog needs exercise, not just a walk, and the need to socialize with others of his species. Necessary for health and fitness. Let us keep in mind that the parks have been used by dog owners all these years with a minimum of destruction of habitat. Now due to a small number of bad owners all of us will be punished. Maybe not what you immediately think of, but keep in mind that San Francisco has a reputation of having more dogs than children, so we truly NEED the off leash areas which we have historically made use of. Problem is that the minority of non-pet owners have been much more vocal than the owners. Well, today that changes in hopes of changing your minds about what really is important to citizens.

Vote to keep GGNRA wide open to dogs.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because San Francisco is a dog-friendly city and this is one of the joys of living in the Bay Area. Residents and well behaved 4 legged family members should be able to enjoy recreation throughout the GGNRA and not be restrictive. This is one of the most beautiful cities in the world and as long as there is respect of it and care to keep it clean, then we should be able to have access to it. If you have ever seen the joyful expression on a dog's face as they run freely and play with others at Crissy Field as well as that of the owner's and others enjoying the space, you understand and appreciate what a special gift this is. Dogs teach us so much about how to live life with joy and to live in the moment, and their positive energy permeates the air when they are in their element and absolutely enhances the Bay Area lifestyle. Being able to enjoy nature's beauty with our 4 legged family members is one of the reasons I live here, and I hope you will consider the importance of this access to residents and also how much undue stress this plan will add to city dog parks and neighborhoods.

**Correspondence:** 02/09/14. SEIS admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. However these anecdotal claims have no context - how frequent were they, how serious, etc. - and cannot be used to set policy. An SEIS is supposed to be based on science, not anecdote. The SEIS also says it relies on the "best professional judgment of NPS staff" to determine impacts from dogs and their importance when there are no scientific studies of impacts in other parks available (e.g., p. 396). NPS staff have demonstrated a long-standing, strong bias against dog walking, and the SEIS should not depend largely on their biased judgment and anecdotes for "proof" that impacts from dogs are currently occurring.

**Correspondence:** 02/09/14. I oppose the Preferred A.lter.native because it is too restrictive. There is no justification in the SEIS for major changes. Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

SEIS did not adequately consider com ments to the DEIS from dog walkers and appears to have dismissed nearly all of them. There is no information in the SEIS about why these com ments (e.g., negative impacts on com munity and human health from off-leash restrictions) were dismissed and not considered in the development of the preferred a.lter.native. The SEIS lists many, many com ments from people opposed to dog walking and very few from people who support dog walking. The SEIS copies, without change, entire sentences and text from the DEIS about studies of dog impacts, especially on wildlife and birds, even though DEIS com ment showed that this text was inaccurate, misleading, and misrepresented what the studies actually said. Yet the SEIS copied it word for word.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because the GGNRA land is to be used and enjoyed by all Californians, including those with dogs. As a lifelong, active dog owner, I enjoy the beauty of our hiking trails and oceans, and appreciate being able to do so with my dog. Dogs do not cause harm to the environment or the landscape, and therefore should not be punished from enjoying the great outdoors here.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because. there should be areas for dogs, some places for off leash dogs, and some places for on leash dogs. I find the bay area pet owners to be responsible for both their dog's behavior and for their clean up. I take advantage of GGNRA both with my dogs and without them, have not witnessed any problems with the presence of dogs. Further restriction of where dogs can be will produce a negative effect in such a great place to live!

**Correspondence:** 02/09/14. Oppose the Preferred A.lter.native because it is too restrictive. There is no justification in the SEIS for major changes. Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

Oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

There are already not enough off-leash areas in San Francisco! It is ok for the city to allow homeless peoples to live surrounding multiple blocks around my house, yet responsible dog owners are being restricted even further in their attempt to live a good life. I do not feel safe around my house and now I cannot even give a good life to my dogs. Absolutely absurd and makes me embarrassed for the law makers of this city.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because these lands are part of the city and we need to be able to share them for EVERYBODY, including dogs and their owners. Off-leash dogwalking has a long history in San Francisco and this is what makes the Bay Area great.

The policies that are being set forth are too restrictive and the GGNRA is not listening to the vast majority of people who are responding to this who are against their restrictions. This is recreational land, not Mt. Rushmore or The Grand Canyon.

We can be harmonious with ALL interests in this.

**Correspondence:** 02/09/14. I am NOT OPPOSED to the Golden Gate National Recreation Area Draft Dog Management Plan. It makes sense. In my experience, dog owners allow their dogs to run off leash, and have little consideration for vegetation, wild life, and other people who don't want their dog running into them. There are plenty of places for people to walk dogs, even off leash. And, no one told them to buy a dog.

Please SUPPORT THE GOLDEN GATE NATIONAL RECREATION ARE DRAFT DOG MANAGEMENT PLAN.

Thanks.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...

1) It is too restrictive. There is no justification in the SEIS for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

2) I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel uncomfortable. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

3) Roughly 50% of SF homes have dogs. We pay our taxes and the majority of us clean up after our dogs. Like the dogs of many of my neighbors, my dog is well trained, under voice control and brings smiles to the faces of people we meet along our way.(Including tourists without dogs!) He is a water dog, and needs to swim. This plan will make it nearly impossible for my dog to swim and will make other city dog parks overcrowded. This is unfair and unethical!

Dogs running free add unique character to SF and the Bay Area parks.

There is no justification in the SEIS for major changes. Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. SEIS still describes the visitor experience as focused on people who dont want to be around dogs. This criticism was made of the DEIS too and apparently ignored.  
In our area are already most parks and beaches restricted to walking the dogs on a leash and on certain trails only or dogs do not have access at all. Now with this proposed Dog Management Plan 90% of leash open space, where dogs can be exercised and enjoy to run freely as they need to, will be taken away.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is too restrictive, it further reduces recreational areas where dogs can be taken without good cause. I am a responsible dog owner (and tax payer). I pick up after the dog, I keep my dog on leash when other people are around or it appears prudent (for example if horses or other animals around) and actively watch her if she is off leash to make sure she is not bothering anyone (and I've observed that the vast majority of dog walkers also act responsible for their dogs, we shouldn't be punished for a minority of people who act carelessly with their dogs. Those individuals who act irresponsibly should be ticketed or otherwise reprimanded). I love being outdoors and having my dog with me is part of that. Reducing popular areas where dogs can be in the GGNA (of which already there are not many relative to the areas dog are not allowed -even on leash) actively discriminates against my use of the parks. I recognize that some people do not like dogs around and that there should be com promise so that everyone can enjoy the parks, and so I don't object that there are some areas where dogs cannot be taken. But those who do not want dogs around should be willing to make the same com promise and acknowledge that for many the GGNRA is one of the main recreation areas for dog-lovers. At a MINIMUM I would like to see all the current dog allowed areas of the parks continue to allow dogs even if they were required to be kept on leash. There is no real justification in the SEIS for major changes,

and there was insufficient response and support provided in response to comments and questions from the comment period from dog walkers. Please support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

Thank you!

**Correspondence:** 02/09/14. I actually do not oppose the plan because many dog owners are not responsible when they use parks or public recreation lands with their dogs. It's quite common they let the dogs run free. It's hard to go for a walk without being bothered by unleashed dogs. I have been attacked and bitten by free running dogs before when on Ocean Beach. Professional dog walkers use public lands and often let the dogs run free. Sometimes they meet up there and you have dozen or more dogs running around taking over the beach. There are too many dogs on public lands and although dog owners who are for this are more vocal about the subject, I don't think they are in the majority.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is too restrictive. The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area a huge percentage of which includes dog owners. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas on current lands and on new lands that the GGNRA acquires in the future. I don't understand how officials who I haven't even voted for are allowed to arbitrarily change policy about how people can use public lands, without any oversight or accountability to the people their policy affects. Thank you.

**Correspondence Type:** Web Form  
**Correspondence:** 02/09/14. I am writing to express my strong opposition to the GGNRA's draft dog management plan. I am a 10-year resident in San Francisco and have owned a dog the entire time. As a dog owner who not only regularly uses the GGNRA regularly with my dog, I am a dog owner who based my home purchase on the proximity to Ocean Beach for the use with my dog!

It would be a devastating loss to dog owners to not have these areas for off leash enjoyment. For the past 10-years of regular use, I have noticed that often times the majority of people using these areas have dogs.

By restricting these areas to dogs, you immediately are crippling the use of these areas for the 50% of homes in SF that have dogs. I know from experience that any time I leave the house to enjoy the outdoors, I have my dog. If my dog isn't allowed to enjoy these areas with me, I won't get to enjoy them either. We will be forced to go to small, cramped dog parks that, if this law passes, will be completely overcrowded.

I believe you have to keep in mind the importance of a dog needing space to be a dog, they need to be allowed to do what is ingrained in them. Please consider how this will effect the owners and dogs.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...Essential Points To Make  
1) Oppose the Preferred Alternative because it is too restrictive. There is no justification in the SEIS for major changes. Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.  
  
2) Oppose fences to surround or delineate any off-leash area in the GGNRA. The SEIS Preferred Alternative proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and visitors using them will feel uncomfortable. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?  
  
3) Oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because the best use of this area is for off-leash dogs & their owners & dog lovers with or without dogs of their own--and that includes the elderly, the lonely, kids, the disabled, those hanging by a thread emotionally--all of whom are welcomed & made to feel comfortable in this environment. This is not an area ideal for families & picnics--like so many other places in the Bay Area. This place is unique--there is nothing comparable for dogs & dog enthusiasts--and its best use is its historical, legally-mandated use, i.e., a sprawling, free, off-leash area for dogs and the owners, walkers & hikers who appreciate them.

**Correspondence:** 02/09/14. I support the GGNRA Draft Dog Mgmt Plan although it is still too lenient on careless dog owners and too risky for the environment. Sensitive bird populations and humans need more protections from out of control animals.

Even the most responsible dog owners can't control their animals off leash at all times. Please don't be swayed by a special interest group of rabid dog owners is trying to co-opt the waterfront areas at the expense of conservation and others' safety.

Although beyond the scope of the current consideration, I think a much stronger and more long-lasting benefit to the environment would be declaring the GGNRA part of the Monterey Bay Marine Sanctuary or Fitzgerald Marine Reserve, so that future generations of people and wildlife could equally benefit from our beautiful coastal areas.

**Correspondence:** 02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it will limit the access my well behaved dog and I will have to the out-of-doors in San Francisco. We enjoy Crissy Field and are careful not to infringe on the restricted area. it would be a sad thing for us to lose access to the East Beach as well. Out of door recreation is important to the health and well-being of dogs, and the proposed Dog Management Plan limits access too severely.

areas feel like pens and visitors using them will feel uncomfortable. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

I oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

SEIS did not adequately consider comments to the DEIS from dog walkers and appears to have dismissed nearly all of them, and SEIS never gave results of public comment on the DEIS. This shows the inherent unfairness of the SEIS.

<b>Correspondence:</b>	02/09/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it does not make sense to restrict dogs when there is not factual evidence that the dogs and their owners do anything but use the space for family walks. my dog is my family and she deserves the right to exercise in our park like we have with out incident for three years. Have you been to the GGNRA? This draft plan has received no public input and seriously makes no sense.

<b>Correspondence:</b>	02/09/14. I have learned of the poorly planned GGNRA "Preferred Alternative" and oppose it completely for several reasons. I have been a San Francisco voter since I moved here in 1987. I vote in every election, and I vote for every office and for every measure. I pay attention to which politicians support the programs I approve of, and it makes a difference in how I vote.				

My partner and I walk our dog very responsibly, using especially Crissy Field, Fort Funston (where my partner served in the Coast Guard), and Ocean Beach.

First, as to the PA plan itself, it restricts dog walking far too much. I see no justification for the changes. We have a perfectly good policy established in 1979 which should now be formalized, and extended to the new GGNRA areas in San Mateo County.

Fences around off-leash areas are unnecessary, unsightly and off-putting. Are dogs and their humans a virus we need to quarantine?

The PA would significantly and adversely impact the way we have been using GGNRA areas for both fun and health, for all three of us, for many years.

Second, procedurally, this attempt by the GGNRA to change the leash status is arbitrary, undemocratic, and very poorly researched.

<b>Correspondence:</b>	02/09/14. The Golden Gate National Recreation Area Draft Dog Management Plan is bad for San Francisco, bad for the bay area, and bad policy.				

It is clear the second draft did not take into account any of the comments from the first draft, from dog owners and non-owners alike.

There is no justification for such severe restrictions on dog-friendly areas within the GGNRA; in some cases, up to 80% of the currently usable space will be lost.

The suggestion to fence in off-leash areas simply amounts to punishing dog owners and limiting their enjoyment.

The unilateral decision-making and ill-studied "proposal", not to mention the secrecy with which the SEIS is developing policy (e.g., stating the number of responses but not the content or context, the reliance upon non-peer-reviewed literature, lack of true studies of impacted areas, etc.) is anathema to our city and what it represents.

When Harvey Milk sought to keep the streets and parks of San Francisco cleaner, he did not seek to ban dog areas or create an atmosphere where dog owners feel they are second class citizens. No, he created a law that required dog owners to be responsible. Let us use that spirit to guide us.

**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas and on new lands that the GGNRA acquires in the future.

**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because dogs and their owners should have equal access to the GGNRA as everyone else... dog owners pay the same taxes as non-dog owners, limiting access is wrong. Aside from that, I firmly believe that owning a dog promotes a healthy lifestyle, getting people out of their homes and spending time outdoors. There are already too many areas that forbid dogs, and a lot of those areas go unused. What's the point of public space then?

**Correspondence Type:** Web Form  
**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because the beach at Chrissy Field is the only place my dog can get out and run. He is a timid dog who doesn't like to run and play in the smaller, confined dog parks of the city. At the dog parks, Buster spends most of his time trying to climb behind me on the bench. At the beach however, he runs ahead - then back and splashes in the waves. He's an entirely different dog.

As for safety and environmental concerns, I don't see how dogs on leash are any different for the environment than off - so long as they are kept out of environmentally sensitive spaces, as they are currently. In all my visits to the beach, I have never seen any problem interactions between the dogs, nor threatening/harmful behavior towards other humans. In my experience, dogs are allowed off leash in many other beaches and natural areas throughout the state - why should these be different?

For us living in SF, these are some of the very few areas that we and our pets can do what others do out their back doors - at the beaches, lakes and mountains - all the time. Please do not take away this important resource.

**Correspondence Type:** Web Form  
**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is really important for urban areas to provide off leash dog areas for their citizens. Dogs need to run off leash, and for responsible dog owners an off leash walk is their most vital and frequent access to trails and recreation areas. When I take my dog to Ft. Funston for a hike I see a place that offers shared use to dog owners, non-dog hikers and horses. This area is used actively by all of these constituents, but most daily use is by the dog community in San Francisco. It is a vital part of my and my dog's health and well being to have access to this amazing place. Dog owners are caretakers of this place, cleaning up on the beach and making sure that trash and dog feces are picked up regularly. It would be a tragedy to close access to this wonderful and unique place.

**Correspondence Type:** Web Form  
**Correspondence:** 02/10/14. It is far too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan.

In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area.

These trails and beaches have been set aside for dog walking since the original pet policy in 1979.

That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because I am a responsible dog owner, who does nothing to take away from the environment or any other persons experience. I enjoy taking my dog to all the parks that SF has to offer much like those who have children. When the TN Valley trail stopped allowing dogs it was a huge disappointment. I pay taxes to enjoy these parks with my dog and would be extremely upset if any other parks do this as well. This is one of the huge reasons I can justify paying outrageous SF and CA taxes!

**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...there is already limited space for dogs to roam free and socialize and they and their owners both need this to be happy and healthy. There is a calming and centering that the dogs receive when they have open space to socialize and this makes for a well-adjusted animal. In places like San Francisco, it is especially important due to the lack of open space available and dog owners are very diligent about upkeep and volunteering of off-leash parks.

---

It restricts the current, positive conditions of these areas. Off-leash dogs are well behaved and enjoy being free to run and play. I am writing in support of off-leash activities at Fort Funston, and other GGNRA locations. It is my experience that dog walkers and non-dog walkers share these areas well. In addition, most dog walkers are very responsible concerning the behavior of their pets, and cleaning up after them.

Please continue to allow this multi-use activity in this beautiful location that is our back yard to the Pacific Ocean!

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because:				

1) SEIS did not adequately consider comments to the DEIS from dog walkers and appears to have dismissed nearly all of them.

2) SEIS still lists impacts that "might", "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA.

3) SEIS says that, during the last six years, NPS staff did extensive literature searches to look for reports of impacts from dogs in other parks. In that same time, they could easily have conducted the site-specific studies that might have shown whether or not impacts are occurring in the GGNRA. Yet they chose not to do them.

4) SEIS admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. However these anecdotal claims have no context - how frequent were they, how serious, etc. - and cannot be used to set policy. An SEIS is supposed to be based on science, not anecdote.

Thanks,  
Jason

**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...

SEIS did not adequately consider comments to the DEIS from dog walkers and appears to have dismissed nearly all of them. There is no information in the SEIS about why these comments (e.g., negative impacts on community and human health from off-leash restrictions) were dismissed and not considered in the development of the preferred alternative. The SEIS lists many, many comments from people opposed to dog walking and very few from people who support dog walking. The SEIS copies, without change, entire sentences and text from the DEIS about studies of dog impacts, especially on wildlife and birds, even though DEIS comment showed that this text was inaccurate, misleading, and misrepresented what the studies actually said. Yet the SEIS copied it word for word. Comments supporting dog walking were not used to argue that there should be more off-leash restrictions, while comments opposing dog walking were used to argue for more restrictions.

**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is too restrictive. There is no justification in the SEIS for major changes.

I oppose

fences that surround or delineate any off-leash area in the GGNRA. The SEIS Preferred Alternative proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and visitors using them will feel uncomfortable. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

I oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

**Correspondence:** 02/10/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is overly restrictive and does not reflect the needs of people who use the GGNRA areas.  
The Dog Mgmt Plan put forward by NPS/GGNRA was not formulated with any input by the public except for special interest groups privy to access this agency. It stands to restrict 90% of the 1% that was negotiated by all stakeholders over a two-year period that was upheld by a federal court judge. If NPS felt a need to have it updated or changed, the same process needed to be activated. An autonomous action by the agency was a very insular one at that. Also, public comment periods are ineffective and demand too much from the public creating a real lack in access to our government agencies and departments

**Correspondence:** My comments are related to dogs and specifically dog walkers in GGNRA. I'm a frequent user of the trails near my house, both hiking and biking and have been bitten (I've filed a report with Park police) chased, and lunged at too many times to count. I'm now carrying pepper spray because I

---

fear all the off leash dogs that gather around Alta trail (as many as 40 if not more most days) The dog walkers especially on Alta trail will usually have 7 dogs each, all of leash. There will usually be 5 different groups of dog walkers creating an absolute nightmare scenario. It is impossible to enjoy the trail when out of control dogs are everywhere. I should not have my enjoyment of these trails dismissed because the "dog walkers" have taken over this space. These people are earning a living doing this, not someone who's taking the family dog out for a walk. I'm a dog owner and appreciate being able to take my dog to some of these places, but I'm sick and tired of having my experience ruined by a business using a public resource for their personal gain. I think anyone with more than 3 dogs should be held to a different standard and not allowed to use the public resources like this. Thank you.

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Carly Jefferson-Dow

**Correspondence:** I became a dog owner after recovering from cancer treatment at age 28. The healing that has taken place after just a few months of walking/running/fetching with my beloved dog Sal along crissy feld, fort funston and ocean beach has been absolutely extraordinary. I never realized how important happy dogs are to their owners or how important exercise is to maintain the happiness of the dog. I've never taken these amazing resources for granted, it's why I live in SF. I can't believe access is being threatened, it's outrageous. Please, please maintain the permitted off-leash areas of GGNRA.

With all hope and sincerity,  
Molly C. Mitchell

This Environmental Impact Statement is fatally flawed because it utterly fails to address the single most serious environmental issue of our generation: Carbon Dioxide releases.

In doing so the authors have made a juvenile mistake by failing to consider unintended consequences. Which is surprising, because they are so easy to predict in this case.

The "preferred" plan severely limits off-leash (and on-leash) dog walking access. But no-one is going to stop walking their dogs as a result of this. Also, no new dog walking areas will open up.

So let's examine a family from El Granada who have a couple of dogs (very typical for a Coastside family). Currently that family can walk from their house and walk their dogs in Rancho Corral de Tierra: Net result, no carbon dioxide emissions for transport.

Under the new scheme this same family will have to drive as far as Fort Funston to walk the same dogs off-leash. And I can assure from talking to people that many will make that journey.

That is a sixty mile round trip. Let's say they do that twice a week and get 30 miles to the gallon in their minivan.

That means over 200 gallons of fuel each year. Which means about 3800 pounds of CO2 per year. And let's say we have a thousand family in this situation on the Coastside alone (a low estimate).

That is nearly 4 MILLION POUNDS of CO2 per year from the Coastside alone. All a consequence of this so-called "Preferred" environmental plan!

This plan is an environmental disaster. How the NPS could have proposed this is crazy. At a time when we all are doing everything we can to curb CO2 emissions the NPS is requiring families to release millions of extra pounds a year. Yet the NPS chooses to totally ignore this in the Report.

Which is why I say the only legal thing to do is nothing (Alternative A, no action) until a real environmental impact review is done. Thank you.

**Correspondence:** Off-leash dogs are one of many unique aspects about the Bay Area. It is a lifestyle. Yes, there are problems with off-leash dogs, but a wholesale restriction against the 95% of responsible dog owners is unjust and unproductive. The GGNRA is smarter and more nimble than such an obtuse approach. Respectfully, Jeff Mitchell

**Correspondence:** I am horrified by the GGNRA's plan to drastically reduce the number of places for walking dogs on and off leash within the GGNRA. While I am not a dog owner, this plan is destructive to the quality of life in the Bay Area and its citizens ability to enjoy outdoor recreational opportunities in open space.

Please make it a priority to do everything you can to stop the Golden Gate National Recreation Area from implementing its new plan to cut by 90% the area in which people can walk with dogs in the GGNRA. This will have an immediate huge negative for Bay Area citizens.

Despite the fact that the GGNRA's original plan received an overwhelmingly negative response from citizens, with thousands sending comments against, the GGNRA made no significant changes and unilaterally decided to implement an extremely unpopular, destructive plan despite this overwhelming opposition. The GGNRA's mission after all is as a National Recreation Area after all, not a National Park and there's no tenable reason that citizens should be so radically restricted from the enjoyment of their right to walk their dogs in the vast 80,000 acres of the GGNRA.

Thank you,

Kathleen Dolan Davies

**Correspondence:** Please please please add don't take away space for dogs and their people! Please dedicate as much space as possible to the kajillions of us who consider our pets part of our families!

One of the very things that makes the Bay Area so special is its dog friendliness and outdoorsy culture where many people co-exist beautifully. Dogs need people and people need dogs. For both to be happy, dogs need to run and be free to play! Watching this in my everyday life brings joy to me and my hundreds of dog friends community I've built through the years. No one gets out anymore or knows their neighbors. Having a dog changed all that for me and the countless people I meet who I wouldn't have crossed paths with had I not had a dog in the many many parks we use regularly.

Thank you for listening. Dogs make our world a better place. Period.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

I am a resident of Muir beach and regularly take my dog to Muir beach for both my dog's and my own

---

enjoyment, recreation and relaxation.

I strongly oppose Alternative F- the GGNRA plan restricting off leash dog access.

As you know dogs are already off-limits on over 99% o the GGNRA. There isnt any compelling reason to eliminate or further restrict the remaining 1%.

To claim there are off-leash opportunities at Little Beach is a ridiculous and arbitrary solution. This is not a viable option given the VERY small size of Little beach and it is neither state or federal property. We are curious why this is still in print in the SEIS.

Furthermore the NPS/GGNRA has not conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011, and those comments in 2011 ran 3:1 AGAINST the plan.

Lastly, I just learned this afternoon that the (Kate)Sears Resolution- opposing the GGNRA's Dog Management Plan -was unanimously adopted by the Marin County Board of Supervisors today. These votes demonstrate how united and strong we are on our resistance to accepting this plan.

Sincerely,  
Corinne Valentine

I strongly oppose the new laws that will take away our off-leash areas. I have lived in San Francisco for over 20 years now and enjoy all that the Bay Area has to offer. However, I grew up on a ranch, surrounded by animals and have unfortunately had to let this part of my life go because the big city of SF isn't exactly animal friendly. First the horses were taken out of Golden Gate Park, and now we are in danger of losing the freedom of playing with and exercising our dogs off leash.

Off leash dog sites such as Fort Funston and Chrissy Fields keep BOTH dogs and humans healthy and happy. There has to be a better way.

Taking away these areas or putting in place more restrictive leash laws does not in any way improve our great city, it only detracts.

Please reconsider.

M. Stewart and Sister Sadie Valentine (dog)

**Correspondence:** We love taking our dogs to places all across the GGNRA. Our dogs go everyday to Fort Funston, and it is hard to find many other places for dogs to get outside and run around San Francisco. We frequently also take out dogs to the Marin Headlands, Crissy Field, Presidio, and the southern parts of GGNRA (near Pacifica- -Rancho Corral de Tierra, Milagra Ridge, etc.) and would really be devastated if we couldn't do this anymore.

I think the distinction between National Parks and Recreation Areas is a key issue here. These are lands set aside for recreation, not for environmental protection. Other NRAs include other, non-natural places, such as bodies of water created by damming rivers, etc. Much of the areas in question are in largely urban areas (e.g., Fort Funston, Crissy Field), and are far from being untouched, natural places (e.g., Fort Funston is blemished more by decaying military installations and waste water discharge outlets than by dog walking).

Please, do not do anything to reduce dog walking in GGNRA- -the people of the Bay Area need place like these!

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I moved to my home on Via Recodo in part because the Miwok trail was right nearby and I have 2 dogs. I have no yard and if I knew there was even a possibility that dogs would be banned on the trail in my backyard, I would not have moved here. I take my dogs on Miwok every single day, always on leash. I have no problem with the leash requirement on that trail but to ban dogs altogether?? That's absurd!

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Thank you.  
James

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan.

As a city of many dog owners, one of the major factors that contributes to the health of the individuals who live here is dog ownership. And one of the driving factors behind dog ownership is the ability to easily and enjoyably exercise our canine companions. And the wonderful areas of the GGNRA are prime areas to exercise with our canine companions. Having dogs off leash does not restrict any others from using the park (I often see runners, families with kids, and various other individuals) who do not have dogs using the parks right along with those who do. So restricting the space in which an individual can have their dog off leash helps few, but hurts the many of us who need these open spaces to provide the exercise our canines need.

Sincerely,  
Joel Philpot

**Correspondence:** I am writing to you to keep and maintain off-leash dog areas. I am a tax payer, a voter and a responsible dog owner. I have enjoyed GGNRA with my dog for years and I have witnessed other dog owners doing the same. Dogs, like people, need to feel and experience the beauty and the freedom of nature. There is nothing like a dog running on a beach or the happiness of a dog picking up smells along their walk. I feel as though it makes for a better, balanced and happier dog overall, just as it does for people. I also believe that a happy dog is a less threatening or anxious dog. How would we, as people, like to put on leash all our lives? Dog parks are not a solution but tend to be a bigger problem.

---

I am a tax payer and have chosen not to have children. I have helped fund playgrounds, schools and other activities for children throughout my life because it is a right for those children to have better lives. I feel the same about my friend (my dog). She is my friend, child and companion and I strongly believe that it is her right as well as mine to provide her with the best life possible - which includes enjoying nature and hiking with me without a leash.

I strongly encourage you to maintain the current leash laws and NOT put any more restrictions on the current laws.

Thank you for your time and consideration.

<b>Correspondence:</b>	I oppose Alternative F.				

I favor Alternative A.

I am a dog owner who is sensitive to wildlife issues and very much appreciates access to the GGNRA.

Further restriction my responsible use of the GGNRA will not further your goals which, I would like to point out, should be OUR goals. It appears that your document was drafted by those who think that they their judgement should trump that of those whom they supposedly serve. I sincerely hope that this is not the case and that you will review all comments with open minds.

The issues that you are trying to address have little to do with dogs. This is an expanding urban area and the local park system is going to be used much more heavily than a wilderness park. A long-time resident, I have come to accept this. If you are unable to come to terms with this, you are in for a lifetime of Sisyphean disappointment.

The approach of singling out a minority (dog owners) to find a politically viable way of decreasing park use appears cynical and unfair, and runs counter to the spirit of the original park charter.

Alternative F is wrongheaded. It would make a few people happy and a lot of people upset. Please revise your thinking.

**Correspondence:** Dear Superintendent Dean,

I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from enjoying nature with my dog.

The new plan was not modified in any significant way to reflect the many substantive concerns and

objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Ron deBruin

<b>Correspondence:</b>	We have been coming up to Fort Funston and Crissy Field with our dogs for more than 10 years. We drive up from Redwood City specifically for these places. The views are spectacular. We have been bringing our children and our dog and creating precious family memories. Dogs need space to run and there are very few places on the Peninsula that can accommodate the rambunctiousness of an Australian Sheppard. It would be a shame to see another great place for dogs taken away.

**Correspondence:** I hike with my dog off-leash 3 to 4 times a week. It is necessary to keep me healthy in body and spirit. We are regulars at the Marin Headlands, Fort Funston, Sweeney Ridge, McNee Ranch, and on. This is one of the main reasons my husband and I live here: open space we can freely enjoy with our dog. It is also the reason we have supported the parks with donations. Until the GGNRA dog plans ...

The GGNRA should enhance our park experience, not destroy it. Legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space." The current proposal would end a time-honored tradition. On the trails, the majority of my fellow hikers have dogs with them.

There is no justification for new dog restrictions. The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils. The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impact.

\* I oppose the restrictiveness of the Preferred Alternative. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy plus off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

\* I oppose fences to surround or delineate any off-leash area in the GGNRA.

\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan.

**Correspondence:** Dear Superintendent Dean,

It's shocking and deplorable to me to think that the GGNRA would submit to fear-based thinking in regards to the pet policy in public lands. This repressive approach to conflict has led our country into dark periods in so very many areas, and it's shameful and dismaying to think that the Bay Area of all places - would fall in step with these repressive tendencies.

In a free society, its our individual responsibility to manage ourselves, our pets, our bicycles, our cars, our environment. It's not the role of government to attempt to rectify or assuage individual fears through restricting the movements and actions of others. This is a democracy. We already have systems in place to resolve issues of true violation - the courts. It's time we stop regulating and start trusting those systems to deliver results when justice is warranted.

I'm also alarmed by the lack of compromise and any awareness of the nuanced situation the GGNRA is attempting to mitigate with this proposed policy change. How about requiring a pet permit, or requiring walkers with over 5 animals to register with the GGNRA? Something like this could assist any incident resolution by creating a strategy for followup. Your lack of attention to the actual issues has led to broad brush blame that is unjust and unwise. And if you stop to think for just a moment, you'll realize that you're simply going to push all the dog owners to walk their pets in more public areas, increasing those touch points between pets, pet owners and the very people who are complaining about dogs in the first place. A policy like the one proposed will only further stress situations involving irresponsible owners and their poorly trained pets.

You know it's funny - I actually truly fear bicycle riders more than I fear dogs, even those owned by inattentive owners. I nearly get beamed by people breaking traffic laws on their bicycles on a weekly basis. How about a complete ban on bikes? That sounds hugely reasonable to me, based on your line of thinking. Is it really so different from your attempts to regulate this public land? Hardly.

There's no polite way to address your efforts because you have shown less than no sign of compatibility.

---

The Save Off Leash people have found a way to be more cordial, and I have included that letter below.

- - - - -

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

**Correspondence:** I have 2 dogs rescued from San Francisco shelters (used to have 3), and 2 children ages 3 and 5. We own our home in San Francisco. We walk the dogs at Pine Lake, Fort Funston, Golden Gate Park, Golden Gate Heights park and other areas in San Francisco. We depend on large off-leash areas to exercise our dogs. Between my wife and I, we spend at least 2 hours each day walking our dogs. Dog walking is essential to our quality of life in San Francisco. We both moved to San Francisco in 1992 and have lived here continuously except for 2 years when we lived in Petaluma. The single most important reason for our return to San Francisco from Petaluma was the lack of off-leash dog walking areas in Petaluma and the availability of off-leash dog walking areas in San Francisco. In fact, while we lived in Petaluma, we would drive to San Francisco at least twice a week to walk the dogs at Fort Funston or other off-leash areas in San Francisco because there was no place to do this in Sonoma or Marin. San Francisco is a unique place for walking dogs. We appreciate this and do our best to be good dog owners. But, if extensive off-leash areas are not available to us, we must again consider leaving the city. We are raising a family, owning property, working and paying taxes in San Francisco as well as rescuing dogs from our overcrowded shelters. The Draft Dog Management Plan excessively restricts off-leash areas in San Francisco and would seriously reduce our quality of life in San Francisco.

**Correspondence Type:** Web Form

**Correspondence:** Hello, I have lived in Tinuron for 20 years, and now live in Mill Valley after stints in San Francisco and the East Coast. A significant factor as to why Marin is the wonderful place that it is, the real estate prices are as high as they are, and why the community is such a supportive and open-minded one is because of our access and enjoyment to open space, including the GGNRA. And while it may sound ridiculous, enjoying GGNRA with dogs brings people together and plays a major role in bringing joy to the lives of Marin residents, and tourists (Bay Area and beyond). This includes me and my family.

We enjoy Muir Beach with our dog Walt regularly, and we consider ourselves very respectful dog owners, doing our best to keep Walt from disturbing other human and animals' experience at the beach. We never see dog excrete by other dog owners, and are diligent in our own cleanup efforts.

I am also an avid birder, and take my binoculars and field guide into the park regularly. I understand that some of my fellow birders and conservationists are taking an over-zealous approach to policy advocacy in an already heavily regulated park. As a dog lover and someone with a deep respect for birds and their habitats, I believe the proposal for Alternative F is well beyond the bounds of reasonable policy.

For these reasons, I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to (put your preferred GGNRA trails and beaches here).

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** As a longtime Bay Area resident and dog owner, I strongly oppose the proposed GGNRA Dog Management Plan. As it currently stands, less than 1% of the trails and beaches in the GGNRA are dog-friendly. Thus, anyone wanting a dog-free experience has 99% of the 80,000 acres to use without needing to share with dogs or their owners. In such a densely populated area, it's irresponsible to place further constraints on an already restrictive system.

**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Feb,11,2014 19:35:37**Correspondence Type:** Web Form**Correspondence:** Good afternoon,

I am taking a few moments to voice my concern over the impending Dog Management plan and the subsequent changes that it will bring to our great city. As the owner of a dog who requires extensive amounts of exercise, but yet is well trained and obedient, I find the potentially limiting leash laws to be not only inconvenient, but also concerning for my pet's health. I simply cannot run long or fast enough to properly exercise my dog, and stricter leash laws will lead to frustration for both my canine and myself. We currently enjoy off-leash exercise on a daily basis, and have never had any issues with behavior towards other dogs, children, or adults. So much of our city's culture revolves around "park life," and these new laws will perpetuate the current trend that families are not welcome, and only single, wealthy individuals should live here. I am all for responsible pet ownership (dogs should always be under voice control and be leashed in areas of heavy traffic) and there are surely different steps that can be taken to appease all parties involved in this argument.

Thank you for your time and consideration,

Alison Biggs

**Affiliation:**

**Received:** Feb,11,2014 00:00:00

**Correspondence Type:** Web Form

**Correspondence:** I am opposed to the entire GGNRA Dog Management Policy because I disagree with its premise that dogs in the GGNRA are compromising visitor safety and damaging the resources of the Recreation Area. By their own admission, the GGNRA had no data or studies to support these claims and they are relying upon these claims to initiate a process whereby access for people with dogs will be severely limited or completely banned. Even now, with this SEIS, the GGNRA admits they have no site-specific peer reviewed studies (required by Federal law) to substantiate their claims that dogs are a problem for wildlife, water quality or vegetation in the GGNRA. Instead, they rely upon anecdotal evidence and baseless assumptions to claim dogs have the potential to damage this Recreation Area.

Additionally, in the SEIS the GGNRA asserts they have the right to redefine the term "recreation" as utilized in its enabling legislation and in the promises made to the voters of San Francisco back in 1972 by the GGNRA/NPS/DOI and the GGNRA's first Superintendent, the Honorable William J. Whalen, in order to secure various properties then owned by the City and County of San Francisco. These promises, most importantly, stated that this National Recreation Area would retain historical recreational access (including off-leash recreation) should the citizens vote to include SF park properties in the GGNRA. These promises, along with the conventional definition of the term "recreation", do not comport with GGNRA's current philosophy exemplified by Daphne Hatch, Chief of Natural Resources Management and Science for the GGNRA, who in 2007 was quoted as saying "Ocean Beach without the people is an incredible habitat. But people think of it as a sandbox or their backyard." The GGNRA does not have the legal authority to rewrite history or its enabling legislation to their own design.

Once again, buried deep within the SEIS is the GGNRA's poison pill. Only the name has changed; it is now the Monitoring-based Management Strategy. The GGNRA gets to decide whether we are in compliance, and the measures of compliance are subjective. Under this SEIS the GGNRA may decide to impose short-term or long-term closures of areas. These short or long term closures could be triggered by any number of conditions totally under the purview of the GGNRA, all of which dog guardians have no ability to influence by our actions. The GGNRA could decide they want to make Fort Funston in its entirety a native plant restoration/habitat; and they can do so, based upon this language. More erosion at Ocean Beach or the beach below Fort Funston could be their reason to ban dogs entirely from these beaches. This is unacceptable.

The GGNRA still has the authority, the ability and the moral responsibility to codify the original 1979 Pet Policy as a Section Seven Special Regulation. All properties added subsequent to the 1979 Pet Policy and in the future should have historical off-leash recreational usage allowed. This would accurately reflect the enabling legislation for this National Recreation Area which GGNRA management has held in disregard for quite some time.

If the GGNRA does not want to manage these properties as a Recreation Area, then they should transfer the Recreation Area to another entity better able to manage it, e.g. the Forest Service or Bureau of Land Management. Alternatively, for sites heavily utilized by dogs and their guardians, such as Ocean Beach and Fort Funston, these properties should be reverted back to San Francisco.

**Correspondence:** Superintendent Dean,

My fiancee and I, and many of our friends, walk our dogs daily in the GGNRA, specifically Ocean Beach, Fort Funston, Lands End, Baker Beach. I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is far too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

There is no justification in the dog management plan for major changes. I literally spend at least 12 hours each week in these areas with my dog, and I have never had any complaints or problems, and in fact have only had wonderful experiences and complements. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. I support formalization of the 1979 Pet Policy.

Judging by the preferences expressed in the GGNRA's preferred alternative, the GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

I am a member of the Sierra Club and a homeowner and tax payer near Ocean Beach in San Francisco.

Sincerely,  
David Scheer

**Correspondence:** I've been a National Park Season Pass purchaser for most of my life. I generally support the efforts and ideals of the National Park Service toward congestion reduction, protection of our natural resources, etc. I had heard there was contention regarding allowing dogs on Crissy Field and other GGNRA beaches and areas, but not until I recently heard a radio add supported by UNANIMOUS vote of the San Francisco Supervisors did I know of the plans to BAN dogs from National Recreation Areas.

Crissy Field is HEAVEN for my 2 chihuahua mixes, all dogs, and dog owners, and local families. I have

---

never seen a place where they are so happy, and all the dogs get along whether on or off leash even. I've also never witnessed anyone having a problem with any dogs there.

The US Park Service should NOT attempt to make this and other National Recreation Areas off limits or restrictive to dogs. I can understand leash laws where dogs can represent a hazard to pedestrians, cyclists, or traffic... I can also understand citations for failing to clean up after one's dog... but not outright BANNING of dogs! The concept is outrageous and un-American. Having a dog is part of the American family unit and American dream, and makes me wonder what the Park service might consider next... Shooting offending dogs such as the Russians do in Sochi??

Please do the right thing and allow dogs in the GGNRA, apply leash laws where appropriate, and help keep this AMERICA, THE LAND OF THE FREE.

<b>Correspondence:</b>	Please,				

Do not make these changes. Keep allowing dogs on the beaches and other areas you propose to disallow.

Open space areas such as beaches should be for all, including dog owners and their dogs.

Thanks!

<b>Correspondence:</b>	I am deeply concerned about an impending policy change in the Golden Gate National Recreation Area. The proposed reduced off-leash areas in the GGNRA, located in this heavily urban area is of great concern for me and other dog owners I know. Dogs, especially urban dogs, need these areas for exercise and recreation. These areas are vital to dogs that tend to live in small areas with small or worse, no yards. Pet owners who do not have yards, which is commonplace in cities like San Francisco, rely on these areas to exercise their pets. Without them, we have a serious quality of life issue for the humans and dogs in this equation. I believe that open, off-leash areas such as Golden Gate National Recreation Area allow people to feel that they can give a pet a good life, even in the city, because in spite of not having a yard, they can make it a point to take their dogs to places like the Golden Gate National Recreation Area. To ban these off-leash areas may cause would-be pet owners to feel that they have no place to take their pets for exercise and recreation, and thus make it harder to be a pet owner. Not to extrapolate too much, but our pet adoption rates are so poor as it is.				

Please (please, please) do not let the off-leash areas in the Golden Gate National Recreation Area be closed. It is so critical to dog owners and dogs alike. Our pets need them, badly. And so do we.

**Correspondence:** Please don't change the dog leash laws at Crissy Field. When we had a dog it was the highlight of his time when we would go there. He'd get excited when we were crossing the bridge! She's been gone for a few years now, but we still love to go to Crissy field and watch the dogs play and watch the ocean and water activities. Watching the dogs play enhances the area unbelievably! My daughter lives in San Francisco and one of her favorite things to do is to go by Crissy Field and watch the dogs and play with some of them. The dogs are all having a great time and not causing any problem every time we're there. They're very good for the area and are not a detriment at all. It's much more fun to visit there when there's a good amount of dogs there playing together and chasing sticks or balls - even way out into the water.

**Correspondence:** I've been a National Park Season Pass purchaser for most of my life. I generally support the efforts and ideals of the National Park Service toward congestion reduction, protection of our natural resources, etc. I had heard there was contention regarding allowing dogs on Crissy Field and other GGNRA beaches and areas, but not until I recently heard a radio add supported by UNANIMOUS vote of the San Francisco Supervisors did I know of the plans to BAN dogs from National Recreation Areas.

Crissy Field is HEAVEN for my 2 chihuahua mixes, all dogs, and dog owners, and local families. I have never seen a place where they are so happy, and all the dogs get along whether on or off leash even. I've also never witnessed anyone having a problem with any dogs there.

The US Park Service should NOT attempt to make this and other National Recreation Areas off limits or restrictive to dogs. I can understand leash laws where dogs can represent a hazard to pedestrians, cyclists, or traffic... I can also understand citations for failing to clean up after one's dog... but not outright BANNING of dogs! The concept is outrageous and un-American. Having a dog is part of the American family unit and American dream, and makes me wonder what the Park service might consider next... Shooting offending dogs such as the Russians do in Sochi??

Please do the right thing and allow dogs in the GGNRA, apply leash laws where appropriate, and help keep this AMERICA, THE LAND OF THE FREE.

---

**Correspondence:** I realize you're in a tough spot, but I still don't understand why any off leash dog use is being allowed. I know it will be a fight, but fighting for the right thing is part of a Park Ranger's job.

400 other National Park Service sites don't allow any off leash dogs... what's the point of being part of the NPS if you're going all out on your own? People in this area have so many city, state, and county parks where they can walk their dogs. Other people have no such luck, but people here just take those benefits for granted.

Off leash dog walking does not benefit the park. It might not harm it, but there is no benefit to the park at all. Off leash dog walking rarely benefits visitors other than possibly the dog's owner. It certainly doesn't benefit children or people who are scared of dogs.

Off leash dog walking really only benefits the dog, and no part of NPS regulations list that as a priority. Please place all visitors ahead of a few dogs and allow no off leash dog walking on NPS property.

Thank you and good luck.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.				

I moved to Marin recently and am surprised to find so few options for walking dogs in parks or off leash.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

<b>Correspondence:</b>	Dear Superintendent Dean,				

---

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Natasha Fallahi

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my family and our dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is far too restrictive and will prevent us from enjoying the parks as we have for many years.

I am deeply concerned that the new plan was not modified in any significant way to reflect the substantive concerns and reasonable objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has long provided a unique and diverse recreation area for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Ana A.  
Oakland resident

<b>Correspondence:</b>	San Francisco needs more space for dogs.				

Please, you must continue to allow dogs on Ocean Beach and at Fort Funston.

If you take these areas away from dog owners, so many problems will turn up...the parks will be over-crowded...there will, as a result, be more incidents involving dogs and people...dogs and dogs, etc.

I don't own a dog, but I do not want to have to deal with these new issues of over-crowding.

**Correspondence:** Dear Superintendent Dean,

I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan and to ask you to reconsider this plan. Walking/running/playing with my dog Kona along our beautiful waterfront with my wife is easily the best part of my day. Our dog is part of our family and she is as happy as ever when she is running around and playing at the beach. The draft plan is way too restrictive and will prevent these family walks/runs from occurring, which will have a direct negative impact on my health, my dog's health and these family moments that we cherish so much. I urge you to let us and the other numerous friends and residents we have met over the years that enjoy these same type of moments in our beautiful city. This is the last real off leash area left in SF and it would be a shame to see it go away for no good reason.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. **Correspondence:** Off leash dog walking has become more and more restrictive each year. Owners should be allowed areas to exercise their animals without tethers. Dogs become less aggressive when they are off leash since they do not feel restricted or constrained. The fenced dog run areas are over crowded and too small for multiple animals to fetch effectively with their owners and taking a nun fettered walk is out of the question.  
Please do not eliminate areas where dogs and their owners can walk freely.

**Correspondence:** This proposal is the most heavy handed, misguided, over reactive piece of legislature the GGNRA could have possibly created. As a dog owner (and a dog walker) I grew up in what is now the GGNRA. I watched it unfold and still refer to the lower fire road by Miwok Stables as the Marincello Rd. To restrict dog walking i.e off leash, in such a broad stroke, will only cause more crowding and have a negative effect on the livelihood of commercial dog walkers. Personally, I feel the amount of dogs a dog walker is allowed at one time, should be reduced to no more than 4. I typically do no more than three. As it is now, areas I frequented in the past, are now being used more and more. And Im rarely on MCOSD or park land! It is imperative that this legislation be completely re-evaluated.

Thank you, Ellen Garvie

**Correspondence:** The proposed ban on dogs at Ocean Beach between Stairwell 21 and Sloat Blvd is inappropriate and unjustified. The NPS is proposing a complete ban on dogs without considering enforcing the current on-leash policy. In fact, the impacts analysis section of the document compares the impacts of the current on-leash policy with little-to-no enforcement to the preferred alternative of a dog ban with enforcement. To truly compare the impacts of an on-leash policy at Ocean Beach versus a ban on dogs, the NPS would need to compare both scenarios with similar levels of enforcement.

The primary reasoning for banning dogs at Ocean Beach as described in the Draft Dog Management Plan Supplemental EIS is based on protection of the Western Snowy Plover. There is evidence in the scientific literature that off-leash dogs can have negative impacts on breeding and overwintering Western Snowy Plovers in other locations. However, nowhere in the SEIS is evidence provided that leashed dogs impact the Western Snowy Plover. Throughout the SEIS, the NPS cites a 2001 article by Lafferty to infer that on-leash dogs disturb plovers. The data in this article includes only two events of leashed dogs disturbing shorebirds and there is no evidence that these birds were plovers. This article actually states, "Leashing reduces both the probability that a dog disturbed birds and numbers of birds per disturbance." To use this as evidence that plover disturbance by leashed dogs is a problem is disingenuous.

The SEIS states that banning dogs at Ocean Beach will provide for "consistency with the Recovery Plan

---

for the Western Snowy Plover." In spite of this claim, nowhere in the Recovery Plan does the USFWS suggest banning dogs on beaches that provide overwintering habitat. In fact, the recovery plan recommends leash restrictions to protect plovers, which is exactly what is currently in place at Ocean Beach. The NPS would be consistent with the recovery plan simply by enforcing the leash regulations that are currently in place.

Enforcing current leash laws at Ocean Beach is a solution that would both protect Western Snowy Plovers and provide for recreational uses of the beach by dog owners. It is clear from the evidence provided in this SEIS that increased enforcement leads to increased compliance. Ocean Beach is an urban beach that is heavily used by park neighbors and locals. The impact of losing the ability to walk a leashed dog on the beach or to sit on the beach with a leashed dog is a significant impact to the entire community. There is no justification for banning dogs on Ocean Beach when enforcing current leash regulations would result in the same level of protection for Western Snowy Plovers.

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

**Correspondence:** My partner and I are seniors and have enjoyed hiking on the many trails of Marin County over the years. In 2011, we adopted 2-yr old Maya, a German-wirehaired pointer/black lab mix, at an animal shelter. She has brought much joy to our lives and is so appreciative of all we do for her. I

---

research where we can take Maya along for our hikes and it is very challenging to find trails allowing for dogs. We agree dog owners must be responsible and attentive to their pet while enjoying the natural environment. Bringing along leash, poop bags and water with container for the dog as well as our gear is a must. It is always helpful when we find receptacles along the way to dispose of the poop bags. The greatest joy for the 3 of us is when we are allowed to let Maya off leash to run freely but always under voice control. We are willing to follow guidelines and restrictions that park services mandate in order to have the right and privilege to use the parklands for our recreation.

Subject:2014 SEIS Dog Management Plan

I oppose the SEIS preferred Dog Management Plan because there is no Site Specific Scientific Peer Review that by law is the first thing that must be done!

\*\*\*\*\*

On December 16, 2004, Joshua Bolten, Director of the Executive Office of the President of the Office of Management and Budget (OMB) in Washington, D.C., published and circulated a "Memorandum for Heads of Departments and Agencies" about the issuance of the OMB's "Final Information Quality Bulletin for Peer Review".

This bulletin was subsequently published in the Federal Register (2664 Federal Register / Vol. 70, No. 10 / Friday, January 14, 2005 / Notices; see <http://www.nrc.gov/public-involve/70fr2664.pdf>)

\*\*\*\*\*  
\*\*\*\*\*

<http://www.nps.gov/policy/peerreview.htm> I Oppose the Preferred Alternative because it is too restrictive.

There is no justification in the SEIS for major changes.I Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

\*\*\*\*\*  
\*\*\*\*\*

I Oppose fences to surround or delineate any off-leash area in the GGNRA. The SEIS Preferred Alternative proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

\*\*\*\*\*  
\*\*\*\*\*

I Oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

\*\*\*\*\*  
\*\*\*\*\*

What I am for is the clearing of sand on the Sunset Trail and repair the road and make The Sunset Trail and other roads ABA Compliant for wheel chair access.

\*\*\*\*\*  
\*\*\*\*\*

**Correspondence:**

I oppose GGNRA Draft Dog Management Plan because it is just too restrictive. GGNRA is happily used by people and dogs, daily and in many, many areas. Creating fenced areas will hinder wildlife and create problems in many lovely, half wild areas.

Why didnt SEIS list the many comments from regular citizens who walk there? Why did they use other dog parks to create EV reports?

I walk several places in the GGNRA, and have for years, with my dog & kids, and have never had a negative encounter with any people, with or without dogs. People, dogs and recreation are all peacefully co-existing. It is a beautiful thing and that the SEIS report didnt tell that story is ABSURD!

Years ago, before people walked their dogs regularly at Fort Funston, the area was populated by hoodlums & drug dealers. People were afraid to use that park. Now it is used, as recreation, for thousands of people. That makes life less safe for park service people

You see these areas, you know how impossible this will be to enforce. Dont pass a law you can not enforce and people will hate. You will be seriously, seriously mocked.

**Correspondence:** The proposed Complianced-based Management Policy is completely absurd. Why should 75% cmpliance be the threshold? Why should GGNRA have sole evaluation on compliance? Where re the checks and balances? And why should any change be permanent? Where is reciprocity? Is GGRNA willing to have an equivalent clause that states if compliance is > 75% ten area management would be changed to the next LEAST restrictive level (with levels add to include complete non-restriction)? HOW CAN ANYONE READ THIS AND a) THINK THIS PLAN IS FAIR AND BALANCED? and b) NOT REALIZE THE GGNRA'S CLEAR PERMANENT BIAS AGAINST DOGS AND RECREATION?

"If compliance falls below 75 percent (measured as the Executive Summary xiv Golden Gate National Recreation Area percentage of total dogs / dog walkers observed during the previous 12 months not in compliance with the regulations) the areas management would be changed to the next more restrictive level of dog management. In this case, ROLAs would be changed to on-leash dog walking areas and on-leash dog walking areas would be changed to no dog walking areas. This change would be permanent. Impacts from noncompliance could reach short-term minor to major adverse, but the compliance-based management strategy is designed to return impacts to a level that assumes compliance, as described in the overall impacts analysis, or provide beneficial impacts where dog walking is reduced or eliminated."

**Correspondence:** This is a travesty. Our dogs deserve better. We deserve better than this. Professional dog walkers have been forced to spend thousands taking courses, extra equipment, getting their cars and businesses up to code. We have gotten licensed, permitted, bonded and insured, we pay business taxes, and been following all the stipulations put upon us, yet this is how we are treated???

We give up at least one weekend a month to go clean up your sites, take extra courses on how to improve canine and human behavior, and here is our reward: get out, you're not welcomed here. Take your dogs, leash them up, and leave.

Look, I'd understand if you'd want to levy fines, police more closely, ban the bad apples, but all of us?? and where are we supposed to go now?? We've put all our sweat and tears into this land, we love it as much as you do, there is no where else to go.

**Correspondence:** My wife and I have two dogs, and love to take them on long walks with them off leash. It's great recreation, and freedom, for both us and for our dogs. Over the years we have watched as one place after another becomes restricted to having dogs on leash. Why, we don't know. Is there a large group of people out there that don't like dogs? Or that just want all the recreation area restricted for what they want? There needs to be some balance - some places where people can go and not be bothered by dogs off leash, but also some places where people with dogs can go and let their dogs run free. We have been going to Fort Funston for years. It is the only place left at which we can take our dogs and go for a walk with them off leash. It's freedom. And isn't that what America is about - freedom? If that's the case, then shouldn't our government be working to preserve freedom, rather than take it away? If there were other places people could go to take their dogs for long walks off leash then restricting Fort Funston would perhaps be defensible. But to take away the last place for people in San Francisco to have this freedom lacks balance and just seems mean. Please leave Fort Funston open to dogs being off leash.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach and the loop at Rodeo Beach.

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Sincerely,  
Kathleen Deadder (& Miss Maeve the retriever)

**Correspondence:** By banning dogs from 99% o GGNRA you are depriving dog owners from enjoying nature with their dogs. While I would love to see the Alta trail at the top of our street free of dog walkers -

---

who bring up to 10 dogs at a time off leash - I think penalizing the rest of us is a little harsh.

My husband volunteers at the Humane Society and his concern if these restrictions go into place, is that fewer dogs will be adopted and more dogs will be euthanized. As tax payers we strongly object to the stringent measures proposed. Why not make a limit on the number of dogs one can walk on the trails. I would certainly support that, so our trails are not littered with dog excrement by people who have too many dogs off leash that they are unable monitor them all.

Thank you.

<b>Correspondence:</b>	02/11/14. I strongly oppose the GGNRA draft dog management plan, restricting off leash dog walking in San Francisco, Marin, and San Mateo, CA.				

I am a resident, rescue dog owner, of San Francisco and use these areas, specifically, Fort Funston, Ocean Beach, and Crissy Field every weekend to spend quality time exercising both myself and my dog. Off leash dog play is crucial to my dog's health and socialization and walking freely in these areas allows me to enjoy them for exactly what they are intended for: recreation.

If this plan is accepted and enforced I will no longer use the the GGNRA for personal enjoyment - Restricting these areas would cause me to find new areas of off leash dog play, all of which will not be able to handle the overflow resulting from these restrictions.

In addition to opposing restricting these areas, I think it is confounded to propose fencing these areas - it will ruin the fluidity and beauty of the landscapes. It is also ridiculous that this management plan has been proposed without conducting appropriate studies substantiating the reasoning.

I support the GGNRA's management of the original 1979 dog management plan. San Francisco intended that these areas allow

**Correspondence:** As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Danielle Starelli

**Correspondence:** I'm very disappointed at our local parks and areas being so ignorant and limiting to our dogs. We must acknowledge that MANY households now have dogs and these animals need to be loose and interact with other dogs and run free once in a while. Limiting our parks and restricting the allowed hours to have the dogs loose and without leash will make very unhappy dogs and dog owners. I live in san mateo and in our beautiful park we have a wonderful field that can be used for dogs to run. The times that dogs are allowed to be off leash is from 6-8 am, when people are struggling to get themselves and family ready and out the door! The field sits empty and beautiful most of the time without any usage! PLEASE don't limit dog off leash places (even more than how terrible it is now) for dogsand seriously spend a little more time to accommodate the MANY tax payers that hope for more places to let their dogs loose for better mental and physical health!

MANY THANKS!  
niloo ehsani

**Correspondence:** Overview:  
I am submitting a comment to request reconsideration of the preferred option for dog management on the section of Ocean Beach between Stairwell 21 and Sloat Blvd (i.e., the Snowy Plover Protection Area (SPPA)). The SEIS lists the preferred option as, Alternative F: Preferred Alternative. Dog walking under voice and sight control would be allowed in an approximately 0.71 of a mile-long beach ROLA from Stairwell 21 to the northern end of the beach. Dogs would be prohibited south of Stairwell 21 to the Fort Funston boundary but would be allowed on leash on the approximately 2.84 mile Ocean Beach Trail east of the dunes adjacent to the Great Highway. I suggest an alternative option to allow on-leash dog walking year-round in this section with off-leash access north of Stairwell 21.

I live in the neighborhood and primarily access Ocean Beach at Noriega St. I have a family with small children. I do not own a dog but have fostered a dog. I have a PhD from UC Berkeley in Environmental Science, Policy, and Management and have a career as an environmental scientist. I am also an avid nature lover. Therefore, I am submitting my comments from the combined perspectives of an environmentalist, a local family, and someone who understands the needs of many dog owners in my

community.

I walk or jog on the beach multiple times per week between Stairwell 21 and Sloat Blvd. I also visit the beach regularly with my kids and have walked our foster dog there (on-leash) for the few months she was with us. Over the years that we have lived in the neighborhood, I have been to the beach hundreds of times - sometimes jogging, sometimes bird-watching, sometimes with a friend walking a dog, sometimes picnicking with my family. One thing that has become clear in all my visits is that the stretch of beach between Lincoln Ave. and Sloat Blvd. is an integral part of the Outer Sunset/Parkside community. While some people may want a policy that promotes their own use to the exclusion of others, I think it is critical to develop a policy that allows the mixed uses of those who live in the neighborhood - and this needs to include those who own dogs and need a place to walk them. My primary comment is that a year-round leash requirement in the SPPA with off-leash access north of Stairwell 21 would allow most of the uses of visitors and the community to compatibly occur, while protecting the snowy plover. Those that prefer an off-leash dog experience could walk, jog, or even drive (if needed) to the area north of Stairwell 21 to accommodate that need. Many people walk/jog the length of the beach to exercise themselves and their dogs - this is only possible if dogs are allowed south of Stairwell 21 (see below comment on why the Ocean Beach Trail is not an acceptable alternative). I recognize and respect that many visitors do not prefer to see dogs chasing wildlife nor be approached by unfamiliar dogs. In fact, this is my own preference. The section of the SEIS on Park Operations explains that a no-dog policy would be implemented as follows: Enforcing a no dogs regulation would require law enforcement documentation of violations in sites where dogs would be prohibited. Although visitors with dogs in prohibited areas would be clearly in violation of the regulation, staff would still be required to monitor the site and issue citations to noncompliant visitors. Violators would quickly learn the consequences of their actions and, over the long term, compliance would result in fewer infractions. Following the initial education and enforcement period, impacts to park operations would be long term, negligible to minor, and adverse. If the GGNRA is willing to enforce and educate a no-dog policy, why would it not be able to do the same for a leashed-dog policy? A leashed-dog policy with better compliance would respect the needs of those who do not want interference from dogs but would still allow those with dogs the needed access to the beach.

#### Alternative for Leashed Dog Walking on the Ocean Beach Trail:

The SEIS suggests that the impact on not being able to walk a dog on-leash on the beach is minimal because dog walking could be moved to the Ocean Beach Trail. Having walked a dog (and small children) on the Ocean Beach Trail, I would assert that it is not an acceptable alternative given the incompatible use by bicyclists who ride too quickly to make it safe to walk there with dogs or children. The path is only 8-10 feet wide (and narrower in spots with significant ice plant encroachment) and has no lines. It is common to have bicyclists come whizzing up from behind with no warning. I have myself nearly been hit multiple times while jogging on the path (note that I do not wear headphones). I don't have my children walk on the path and I have seen small dogs get yanked out of the way at the last minute due to speeding bicyclists. A path with only 4-5 feet of room in each direction and bicycles whizzing by is not an acceptable alternative to the option of on-leash walking on the beach. The SEIS mentions the area adjacent to the Ocean Beach Trail as useful to dog-walking. Clearly those who suggest this have never walked on the trail as it is almost exclusively ice plant and almost impossible to walk on. Relocating leashed dog-walking from SPPA to the Ocean Beach Trail is not a safe option, especially given the numbers of dogs that would then collectively be walked on the trail without separation of bicyclists from the dog-walking area.

#### Compliance:

The SEIS compared on-leash impact with non-compliance in the SPPA to no dogs assuming compliance; however, the SEIS did not provide any justification for the assumption that enforcement of a no-dog policy in the SPPA would have any better rate of compliance. The GGNRA would need to compare a no-dog policy with non-compliance to an on-leash dog policy with non-compliance in order to justify any

claim of a beneficial impact. If the GGNRA intends to enforce a no-dog policy in the SPPA then it would need to compare a no-dog policy with enforcement and compliance to an on-leash dog policy with enforcement and compliance.

#### Environmental Consequences for Special Status Species: Impact of Dogs on Snowy Plovers Specifically at Ocean Beach:

One of the primary reasons given in the SEIS for prohibiting dogs from the SPPA is the need to protect snowy plovers, which I support. The SEIS bases its recommendation on the 2007 Recovery Plan for Pacific Coast Population of the Western Snowy Plover which states, "Dogs on beaches can pose a serious threat to snowy plovers during both the breeding and nonbreeding seasons. Unleashed pets, primarily dogs, sometimes chase snowy plovers and destroy nests. Repeated disturbances by dogs can interrupt brooding, incubating, and foraging behavior of adult plovers and cause chicks to become separated from their parents (USFWS 2007a, 63)." The SEIS then uses studies (e.g., Lafferty, 2006 and 2007), which were conducted in Southern California, to assert that dog disturbance negatively impacts snowy plovers and cites a 1997 study at Ocean Beach of high numbers of dogs chasing snowy plovers. Based on these studies that are either not specific to the area in question or >15 years out of date, the SEIS states that off-leash dogs "can" chase plovers and "could" harm them in the SPPA but provides no factual information to support that this actually happens in the SPPA. While this assertion is theoretically true, the on-the-ground information collected by the GGNRA but not described in the SEIS does not support the rationale that dogs in the SPPA in recent years, leashed or not, have a negative impact on the snowy plovers at this particular beach. The information that I collected by reviewing papers and reports from the GGNRA contained the following information:

"According to the 1996 Plover Report, the annual median number of plovers between 1988 and 1996 at Ocean Beach was 28. Previous counts between 1979 and 1985 showed snowy plover counts at Ocean Beach of 2-14. The 2006 Snowy Plover Report shows an increase in snowy plovers in the SPPA after 2001 to a higher stable median number in the mid-thirties as of 2005 (Hatch 2006). The 2007 and 2008 addendums to this report do not report the median number of plovers but give the maximum number of 49 for the 2007 survey year (the average maximum for 2002-2005 was 48). Regardless of the various dog policies in the SPPA the number of snowy plovers has been stable, if not increasing, in recent years.

"The number of dogs, both leashed and unleashed, increased from 2000-2005 in the SPPA and yet the 2006 Snowy Plover Monitoring Brochure (see Figure 1 in the brochure) shows that snowy plover numbers increased during this time. The 2006 seasonal leash requirement decreased the number of off-leash dogs but the over-winter plover numbers did not increase.

"According to the 1996 Plover Report, the number of people on the beach only explained between 11 and 16% of the variability in plover numbers during the two study years. The number of dogs explained even less of the variability in plover numbers: "the number of dogs per hour on the beach explained only 10 and 12% of the variation in plover numbers for 1995-1996, respectively. Factors other than number of people and dogs, possibly beach slope and width, appear to exert greater influence over snowy plover numbers at Ocean Beach." This was found when the level of leash control was only 10%, according to the report.

"Lafferty (2001) found that plovers in southern California were intensely disturbed only slightly more by humans than by off-leash dogs (28% and 31%, respectively, of the plovers who were disturbed flew) while 61% of plovers disturbed by crows flew.

"Researchers like Lafferty have pointed out that plovers are closer to the dunes - this tends to not be where the dogs are. Wintering snowy plovers are less frequently disturbed than most other shorebirds because (1) snowy plovers are relatively hesitant to move or fly from a person or dog and (2) snowy plovers roost in the dry sand away from most foot traffic (Lafferty, 2001a and 2001b).

"The 1996 Plover Report found that most plovers roost near the promenade between Noriega and Rivera. This is not a popular dog area so there is natural separation. The 1996 Plover Report also stated that snowy plovers are not susceptible to the same degree of chasing as sanderlings and other shore birds.

"The SEIS provides older data from the 1997 report that had higher numbers of dogs chasing plovers but

did not present its more recent data from the 2006 Snowy Plover Report that does not show this to still be occurring very much, if at all. For example, dogs chased the plovers on 4 occasions in the 2005 study period. This is over an average survey year of 39 surveys and 59 survey hours (2007 Hatch Plover status report). The addendum to this report for 2007 (Hatch 2008) states that there were 30 surveys during this survey year with only 1 incident of a dog chasing a plover.

Since the GGNRA has information on dog and snowy plover patterns in the SPPA, the SEIS should present and address this information rather than relying on studies that are not as temporally or spatially relevant. Further, it seems there should be information more current than 2008 but this is not in the references nor mentioned in the text. In my opinion as a scientist, the information presented in the SEIS did not represent an objective review of the information that the GGNRA has available to it. My review of the information that is available from the GGNRA suggests that on- and off-leash dogs can and do disturb snowy plovers in other areas but this is generally not occurring in the SPPA at Ocean Beach. This appears to be the case regardless of whether the dogs are on- or off-leash, primarily due to the spatial separation of where dogs walk/run and where the snowy plovers roost. In the SPPA, data indicate that the level of disturbance by off-leash dogs is similar to that of disturbance by humans, suggesting that a dog ban is no more justifiable than a human ban (although a policy on the control of Corvids may be worth studying). The data also suggest that the numbers of snowy plovers that roost in the SPPA is not related to the dogs since the numbers of snowy plovers are unrelated to the changes in dog and leash policies in the SPPA over recent years. In general, GGNRA data for the SPPA part of Ocean Beach show that the snowy plover numbers are stable and unrelated to dogs (leashed or unleashed). Some researchers (e.g., Fahey and Woodhouse, 1995) have found that leashed dogs have less impact than unleashed dogs in other areas so a conservative approach to snowy plover protection could include a leash requirement, although local information does not suggest that this is actually necessary.

#### Environmental Consequences Other than Those for Snow Plovers:

I also reviewed the environmental consequences listed in the SEIS that did not pertain to snowy plovers. Below is an overview of the consequences listed in the SEIS, along with any pertinent comments.

"Vegetation and Soils: The SEIS indicates no impacts except minor for coastal communities under the current policy. This assumes a benefit from compliance from a no dog policy. Using common compliance assumptions for a no-dog policy and a leashed-dog policy would likely result in no difference in benefit between these two options.

"Wildlife (other than special status species): The only impacts listed are in the section on wildlife in coastal communities. The impacts are similar to snowy plover impacts, although no other species are threatened or endangered. Similar to the snowy plover, there was no information provided to indicate harm to birds or more impact than from humans in the SPPA.

"Special-status Species: See above regarding snowy plover.

"Cultural Resources: No cultural resources to consider.

"Visitor Use and Experience Impact: The SEIS determined that there are long-term moderate adverse impact for those who want dogs versus those who don't - either choice results in adverse impacts on the other. However, the SEIS did not consider a leashed-dog policy with better compliance, which could mitigate adverse impacts for those who prefer no dogs while creating minor adverse impacts for those who want and off-leash policy.

#### "Park Operations:

oThe SEIS states, Short-term moderate to major adverse impacts on park operations would be expected at sites where current dog walking would change from allowing on-leash or voice control dog walking to prohibiting dog walking. Enforcing a no dogs regulation would require law enforcement documentation of violations in sites where dogs would be prohibited. Although visitors with dogs in prohibited areas would be clearly in violation of the regulation, staff would still be required to monitor the site and issue citations to noncompliant visitors. Violators would quickly learn the consequences of their actions and, over the long term, compliance would result in fewer infractions. Following the initial education and

enforcement period, impacts to park operations would be long term, negligible to minor, and adverse.  
oThe SEIS claims moderate to major short-term impacts to implement a no-dog policy and then negligible to minor long-term adverse impacts. As stated above, there was no justification given for why resources could be provided to enforce a no-dog policy but not for a leashed-dog policy.

"Human Health and Safety:

oIn the section on Human Health and Safety, the SEIS states that, "Between 2008 and 2011, a total of 969 pet-related incidents were recorded at this site. Pet-related violations included 89 leash law violations, 77 cases of visitors walking dogs in closed areas, 22 hazardous conditions violations (including 21 dog bites/attacks/aggressive behavior), and 2 pet excrement violations (table 36). Violation of the Ocean Beach SPPA resulted in the most violations (729). No unattended pet violations were documented at this site between 2008 and 2011." The impacts are listed as, "Long-term moderate to major adverse impacts," with a rationale of, "Site experiences high use; a large number of violations, including dog bites/attacks and pet rescues have been recorded."

oThis summary in the bullet above of pet-related incidents is perplexing, as are the conclusions regarding impacts for the following reasons:

First of all, the specific cases listed only add up to 190 pet-related incidents - what were the other 779 incidents? Are we to assume they were irrelevant?

With regards to leash law violations, see the earlier points on compliance which would be greatly minimized if the GGNRA conducted an enforcement program similar to what it has listed for implementation of a no-dog policy.

With regards to visitors walking dogs in closed areas, I do not know what closed areas exist in the SPPA. I am guessing this is related to the area that was closed north of Stairwell 21 when sewage washed up, which would be unrelated to dog management issues.

With regards to pet excrement, anyone who walks on a city sidewalk would think that 2 reported incidences over a 3-year period is a low number. I personally find it unconscionable that anyone would leave pet excrement in any public space but I have generally noticed very few incidences of dog excrement in my hundreds of times in the SPPA. Unfortunately, this is not true of the city sidewalks.

With regards to dog aggression/biting, the risk is actually extremely low. The draft report provided statistics of dog aggression but did not provide total numbers of dogs. Over a 3 year period they cite 21 reports of aggressive behavior but out of how many dogs? I looked through various references for dog numbers. The 2006 plover report gives a rough estimate of 10 dogs per hour encountered. Assuming 12 hours of dog walking time per day, this would result in 120 dogs per day or 43,800 dogs per year. Over 3 years (2008-2011; 1095 days) this would be 131,400 dogs. Twenty-one aggressive encounters out of 131,400 dogs is 0.016%. This is a very low number. Even halving the number of dogs and doubling the number of reported incidences of aggression results in a number less than 0.1%. Moving all these dogs to the Ocean Beach Trail or sidewalks, with less room to spread out, would probably create an issue rather than solve one. Unless the SEIS assesses impacts of displaced dogs on trail/sidewalks, the claim that a no-dog policy is beneficial to health and safety cannot be claimed. Further, it should be made clear what the level to trigger moderate to major impacts is since the levels of violations and aggression seem very low or potentially solved by an enforced on-leash policy.

"Sustainability and Long-term Management: The SEIS states that Alternative F (Preferred Alternative) provides balanced visitor use and the protection of natural resources and visitor safety, and would best meet the objectives for the plan/EIS. I do not agree that the preferred plan offers a balanced approach to Ocean Beach.

Summary:

My objective in submitting a comment is to urge a more balanced review and approach to Ocean Beach. I am not trying to poke holes in the SEIS but rather trying to point out areas that the GGNRA did not fully consider or present, which are resulting in an approach to Ocean Beach that does not meet the needs of the majority of the users as well as other options could. I am not necessarily pro-dog but I feel that a dog ban has neither sound basis nor provides a balanced approach. The section of Ocean Beach south of

Stairwell 21 is, for the most part, not a visitor-focused beach, especially between Lincoln Ave. and Sloat Blvd. For example, there is no parking lot nor any trails. It is part of the neighborhood. I am not suggesting that this means that the needs of the neighborhood take precedence but they must be considered, and if there is an option that balances the needs of the community with those of visitors and special species, then this option should be preferred. My suggested option is: Dog walking under voice and sight control would be allowed in an approximately 0.71 of a mile-long beach ROLA from Stairwell 21 to the northern end of the beach. Year-round on-leash dog-walking permitted in SPPA between stairwell 21 and Sloat Blvd. This offers a balanced approach that provides visitors and the community access while protecting the plovers and resulting in minimal adverse impacts.

I love my dog and I vote.

I oppose the GGNRA Draft Dog Management Plan

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

**Correspondence:** I strongly oppose Alternative F, the dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach and Miwok Trail. She is a beautiful and friendly dog, whose waste we pick up immediately.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

Please don't further limit the quality of life of the many responsible dog owners in Marin.

Thank you so much,

Dr. LaMont

**Correspondence:** As a former resident of Marin County, continuing user of GGNRA lands, dog owner, and biologist I feel that the threatened and endangered plants and animals that call these lands home should be given preference over the convenience and whim of dog owners. The fact that the rules regarding leash restriction are not currently followed with regularity shows that dog owners in this area too often show disregard for the well being of species and habitats that the National Park Service was created to protect. Even with the introduced new restrictions to dog access, San Francisco and Marin provide more open space and beach access for dogs and dog owners than any other coastal city in the United States of which I am aware. As dog owners in a region that prides itself on environmental consciousness I would hope that many of us would understand the the "not in my backyard" philosophy will cause irreparable harm and must not be accepted here. I request that the park service implement new regulations restricting dogs from some of these beautiful locations, protecting the plants and animals that require them to survive and thrive.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to (put your preferred GGNRA trails and beaches here).

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I oppose the GGNRA Draft Dog Management Plan  
I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.  
I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.  
The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.  
Parts of the Golden Gate National Recreational Area I visit with my dog: Crissy Field, Baker Beach

**Correspondence:** I live in the E. Bay of the Bay Area. There are no beaches that I can take my dog to on this side of the bay. He enjoys a run in the sand and a dive into the water.  
The congestion of our urban areas makes the public lands a wonderful and suitable place for recreation of my dog and me.  
It's interesting that the government wouldn't care about fracking or otherwise destruction of the area, but yet we can't go out and enjoy it when it is available open space.  
Please reconsider this very poor position on land usage.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, especially in Fort Funston, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own

---

health and my dog's health the way I have on GGNRA properties for many years. There are many areas that are already restricted to dog in the Bay Area, why extend further?

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Virginie

**Correspondence:** Let's think about where we came from- -nature, earth, etc. humans have over-populated so we're condensing our natural environment by constructing houses and buildings.

Of course, we have to grow and be mindful of keeping our sacred beaches and parks from erosion and damage but come on- -animals are precious and deserve to roam in nature. Education for humans to pick up their waste (dog waste, cigarette butts, bottles) and such is a good place to start- - not banning dogs from their natural habitat.

If it makes any difference, I'm a small business owner in SF (paying a lot of taxes), I own a home in SF and I did not have children in an effort to be eco-friendly. I clean up after my dog and sometimes after others.

**Correspondence:** I am not in favor of any restrictions on dogs and their owners for off leash access to parks in SF. This is a city that has always had open space for dogs and their owners, it's what makes SF special! If restrictions are put in place it will ruin a unique aspect of our city. Owning a dog is for people, the dogs and the community. Cities that have strict laws against dogs feel restrictive and unnatural! Please keep SF dog friendly. People sharing the beauty of SF are people sharing life together, it is a true reflection of who we are as San Franciscians !!

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly hikes and mountain bikes with my wife, 2 young boys and our dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my entire family for our health and my dog's health the way I have on GGNRA properties for many years. Please consider that banning dogs effectively bans families since we generally cannot leave our dog home. In today's day-and-age we don't have time to take separate outings to places that allow some members of the family and not others, and then switch.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

99% our family's outdoor activities include hiking with our dog on the dog-friendly GGNA trails. This is a big factor in our lifestyle choice for living in Marin County.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I urge you to not further restrict the few dog-friendly uses of the GGNRA.

\*\*\*\*\* On a more personal note, the lack of space for dogs and citizens like me to enjoy the spaces and be a part of the community is appalling. Dogs and responsible owners are engaged with the outdoors and the local communities on a regular basis in no other way that other groups are - we meet regularly, we know each other, and we take care of our surroundings. Given the problems in our open spaces with homelessness, vandalism, and general neglect - shouldn't we PROMOTE a group that cares and involved in maintaining our open spaces?? \*\*\*\*\*

**Correspondence:** Dogs aren't ment to be cooped up indoors! They need the beach and water to run and play! If the waste is what you are worried about, add more dog waste areas where there are doggie bags and trash cans. If you ban dogs, you have to ban people. They are the ones leaving broken glass, beer cans, cigarette buds ect. At least dog waste is bio degradable!

**Correspondence:** Dear Superintendent Dean,

The GGNRA is a very special resource to the community of San Francisco. I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It imposes restrictions that will essentially eviscerate the kind of open-space resource historically offered by the GGNRA. Our community's health and sense of well-being will be negatively affected by these restrictions, especially as there are no resources that can serve as substitutes for the GGNRA's walking/hiking trails and off-leash areas.

---

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. **Correspondence:** Gentlemen or Ladies,

I am the owner of an Old English Sheep dog that requires a safe space to run and play-herd other dogs. I frequently use GGNRA administered parks, especially Ft. Funston, to enable her to run to her heart's content. It would be a great loss if we were not allowed to use the several GGNRA parks nearby the Bay Area for her runs.

I strongly object to any imposition of "on-leash" rules being imposed on places where free-running dogs is currently allowed.

Please do not restrict the ability of our dogs to run and play freely.

Sincerely,

Rev. Fred Rabidoux

**Correspondence:** I moved to Ocean Beach in 2002. The main reason was the proximity to the beach and Fort Funston and being able to walk my dog by the ocean. As a service-connected (disability rated) Vietnam veteran, I have found that this has improved my quality of life immensely and decreased my PTSD. Not only is the physical exercise beneficial to me and my dog, so is the ability to socialize with other dog owners and frequently other veterans who are dog owners. Please don't take this capability away from us as it will have a major negative effect on our quality of life. Please reconsider your proposed changes.

Regards,

Richard Milner

**Correspondence:** Dogs are members of our families and there are many 10s of 1000s of families with dogs as a member and we have no where to go to truly enjoy being together naturally and freely. Please dont shut down the few places we have left that allow us to interact in a natural and mutually respectful way.

Yes some dog owners are irresponsbile and yes some dogs are unsocial but the laws should be made to be applied to those types and not to all of us who actually have trained, obedient and social dog family

members.

A society that has no place for people who love animals is not a civilisation. Please let us keep some of our dog liberties but make us responsible for living up to standards. That is fair. Shutting us out is not.

**Correspondence:** What fresh, idiotic hell is this?!?!?

The GGNRA is an URBAN park. It is not in the Sierras. It is not in undeveloped outerlands of Marin County. It. Is. In. A. City.

Instead of shrinking areas where people can let their dogs off-leash, you need to staff those areas so people who don't have control of their dogs are ticketed. Yes, ticketed. The revenues from ticketing would more than pay for the additional personnel.

Don't criminalize dog exercise!!!

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Matthew Hogan

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

---

**Correspondence:** Please save off leash areas for the dogs of the urban city of San Francisco!

We need this for healthy dogs and healthy owners. This is a family experience not just for our dogs... My children play with our dog and bond with her. My kids get to learn the importance of meeting new animals and watching the animals run and play.

The experience is giving my children a love of animals! A desire to protect them and be future responsible pet owners. No interaction on the sidewalk with a dog on a leash can give this to them.

Off leash areas are also a decompression time for me. Living in the city is hard! There are lots of intense things to deal with, like traffic, homelessness, litter, high cost of living, large amount of houses/people per sq. mile etc. bBeing able to play with my dog outside in nature and connect with other humans during the process is vital for my survival as a woman, mother, wife, dog owner and citizen of San Francisco!

Please save the off leash areas in Golden Gate National Rec Area!!!

**Correspondence:** Please keep Ft. Funston an off leash, dog friendly environment. I have been a resident of San Francisco for 15 years. I own a home, work and spend most my money within the city. One of the reasons I put up with the high cost of living is access to wonderful public parks which are dog

---

friendly. Taking this away from tax payers seems unfair and eliminates a big part of San Francisco's attraction. Please think of a way that the park can be shared by all.

Thank you,

<b>Correspondence:</b>	Dear NPS rep				

As someone who walks regularly with my dog in the GGNRA in SF, specifically around Ocean Beach near Sloat, Im writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan.

While I would support some restrictions and the creation of dog free and leash only areas, I feel that reducing the available area by 90% is far restrictive. It prevents me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. Since dogs will no longer be allowed in the vast majority of Ocean Beach, specifically near where I live, I will be forced to drive my dog to another recreation area instead of walking to the beach as I now do. Many other people who live along ocean beach and who have dogs will also be forced to drive instead of walking. This will increase traffic and congestion around other neighborhoods and parks and badly impacts older or lower income people who do not own vehicles. I also feel that fenced areas are a terrible idea because they interfere with the natural beauty of the areas.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

**Correspondence:** Fort Funston is an amazing place that my two tiny dogs and I enjoy multiple times a week for play and relaxation. I religiously pick up after my dogs and pay close attention to them while maintaining control of there whereabouts. I do not allow my dogs to run through any of the vegetation at Fort Funston, we stick to the trails and the beach. That being said we have had many incidents with commercial dog walkers. These walkers on a daily basis have 15-22 dogs per person and most times running wild as they please and uncontrollable when an incident arises. My dogs have been injured 3 times in the last few months due to this scenario. I agree with some on-leash/off-leash cooperation. Map 16-A would be great to maintain full off-lease capabilities with limitations in place. For example, number of dogs per person or limiting commercial dog walking times and locations and charging a fee for commercial dog walkers who are making a profit by taking free use of the park. Maps 16-E and 16-F seem to be reasonable. They can satisfy more parties regarding use of the park. If possible to budget for a patrol person in the park, it would help regulate the new policies put in place. Better fencing may also help to keep people out of unwanted areas. I believe a large issue is the commercial dog walking. I hope to see some limits put into place for these parties. I think it has gotten out of control.

**Correspondence:** I am in favor of big change in ggnra. There are more dogs and people who walk dogs. We must address this situation, by adding MORE space for dogs and their people. Restrictions are the wrong approach and will backfire. Specifically all beach areas should allow dogs off leash throughout the ggnra because dogs are the only ones who swim on a regular basis. It's hard to swim on a leash - for the dog and their person. The paths and inland areas near the beach should be for people and dogs so that they can play and exercise together. Also we need new areas for dogs exclusively like we have in the other Bay Area parks. This would allow dogs to run off leash without fear of stumbling onto people pickniking or birds nesting. Some dogs are not well behaved but they and their people still deserve the off leash experience so these designated areas are critical. Of course these new dog play areas (DPAs) would offer conveniences like water dishes, poop bags, trash, signage, parking, and ADA access. Ideally there would be separate areas for big dogs and small dogs, to further prevent any potential for conflict. Now fort funston is already pretty good but could use more signage and water bowls. Crissy field is pretty good too but a roped off dog play area for dogs only would be required. Ocean beach is great but again more signage and a dedicated dog play area would be required.

On a related note, the food service areas like the warming hut and crissy field center could use some improvement. More water bowls, dog parking areas to tie up leashes, and designated seating for people with dogs would be good.

You also need more park ranger training. The rangers don't seem to know very much about dogs or their people. They shouldn't ride their horses where dogs are present. It could cause problems. Also they shouldn't shoot people in the backs with stun guns while walking dogs. But I suppose it's ok to shoot people in the backs when they don't have a dog? Not sure on that one actually. They should be trained how to approach dogs and please ask permission before petting them. And they should carry treats.

I propose that a committee of park users, neighbors, dog walkers, and dog owners be set up to work out the details. This has worked in the other Bay Area parks which have set up dog play areas. The proposals put forth by nps make no sense and should be abandoned because they are a top down approach created without public input. If nps can't manage this dog play area creation process over a 10 year period, then please hand it all over to local rec and park departments who have demonstrated competence in this area.

**Correspondence:** I am very much opposed to the dog management plan for Muir Beach. Our quiet hamlet and our small community seems to be continually trying to be heard over the vast machine of the GGNP. This s a community, vibrant, environmentally aware and active, and loving stewards of this place we call our home. There has got to be a different mechanism for the continual changes you insist on trying to impose without the proper conversations and dialogue necessary to ensure the well being of the

---

very community that lives here.  
Dogs need trails. Horses need the barn and the beach.  
Please do not limit dog access.  
I am very much upset and angered at this continual battle.

Respectfully  
Beth Nelson

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I am not a current dog owner but walk the miwok and coastal trails almost daily. The dog owners are respectful and responsible, and I support sharing the trails with them. And I support both our national and state park foundations.

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** My case in favor of Poop Patrol and the GGNRA off-leash ban:

Finally we have had some substantial rain to wash away the mess from 2013. Miller Ave and beyond, our entire town is littered with dog feces!! In an MV Patch post from way back in June of 2013 entitled Dog Poop Ecology, the author, Obligatory Obloquy, touches on a possible scenario that dog owners have no real intention of dealing with the poop. This bad habit by dog owners of leaving the dog poop behind is suggestive of a mindset that these people's own sh#t doesn't stink. Now I don't believe ALL dog people do this. There are a few inconsiderate dog owners out there that are giving all dogs a bad name.

GGNRA wants to ban dogs from being off leash on selected federal lands. The city of San Francisco opposes the ban because of the fear that the ban will result in overuse of the city parks as dog owners look for alternate places to recreate with their pets. City or federal land, it has really come to a head in that dogs are negatively impacting the environment enough to affect people's experience of these spaces. I love dogs AND I support this ban. It is unfortunate it has come to this. This measure is entirely a result of a handful of dog owners' neglect in dealing with their pet's messes. However, I don't necessarily think the ban will cure the situation entirely. What we really need is poop patrol. Dog owners absolutely need to be accountable for their pets. Those few inconsiderate ones are not just littering garbage, they are littering feces.

Over the course of 2013 I have proudly strolled with my new baby up and down Miller Ave. and through our town. I have become outraged with dog owners and their laziness in cleaning up after their pets. In the June of 2013 article, Obligatory Obloquy suggests dog owners have a pathological disgust for their own dog's excrement, which is the equivalent of disgust for feces in general. I have dealt with my fair share of poop in the last year having a new baby. No exaggeration, I have witnessed my little newborn poop at a great distance of 15 ft. shot over a railing and down a flight of stairs to land on the light switch next to the front door. Granted, gravity aided the great distance. Back to my point, if I left my kid's dirty diapers on the sidewalk, people, dog owners included would be incensed and disgusted. Wrapped in a diaper my babe's feces would be likened to all the little dog poop bags that litter our streets and the great trails of Mill Valley.

What's with people not picking up after their dogs? They even act as if they will in front of witnesses by carrying the little obligatory bag roll on their dogs' leashes. One early morning, I observed a dog owner take a baggy out while the dog was doing his business. My baby in her stroller, me, and another man were the onlookers passing by. Once we passed, the owner and her dog acted as if nothing had happened and left the poo behind. Outrageous!!!! Dog people, you have a civil responsibility!!! Get over yourself!!!

I quizzed a dear friend of mine who recently became owner of a massive Saint Bernard x English Mastiff and whom also lives in a condominium complex. I asked him what he does with the dog's poop when no one is around. Does he just leave it there like it's not his problem? Does he think he doesn't have to pick it up if no one saw the dog drop it? His very civilized response was, "of course I pick it up!!! " Then he quoted the famous basketball coach John Wooden. "The true test of a man's character is what he does when no one is watching."

So who are these people who think it ok to leave their dog's feces on the street only to entangle my unsuspecting baby jogger wheels? Is it only a Miller Avenue problem? Are the apartment dwellers, the one's without backyards, allowing their dogs to crap all over our sidewalks and in our parks? Is it a citywide Mill Valley problem? Are people so elitist around here that they don't think their own dog's s&#t doesn't stink? No, this problem reaches far beyond Miller Ave. as substantiated by the proposed GGNRA off-leash ban.

Every day I see dog owner's breaking rules. ALL dogs are required to be on leash in our public parks of Mill Valley. I've seen people let their dogs run wild in the playground areas with children, even in the sandbox. I don't put my kid in the middle of the dog park for her to play. She doesn't belong there. Dogs are not welcome in the playground. I don't care that "oh, they love babies and that they wouldn't hurt a fly or that my kid could poke the dog in the eye and the dog will take all the ear and tail pulling my kid can dish." I'm not going to allow my child to do that and I would expect a dog owner to recognize that a playground is for kids not animals.

This may seem a bit extreme. Like I said, I do love dogs. I just loathe irresponsible pet owners. Adhering to leash laws would eliminate a lot of problems. Mainly dog poop would be much more trackable. Though this means nothing if a dog owner cannot see past his own aversion to crap. I have to believe it will take a group effort to hold pet owners accountable. I have witnessed some positive group influence at Boyle Park where one dog owner informed another distracted dog owner that his dog had crapped. She courteously dropped a baggy on the steaming pile. He became almost downright indignant as to say, if he didn't see it, it didn't happen, certainly not HIS dog. But with peer pressure, he did pick up the crap.

Believe it or not, another dear friend of mine was recently urinated on by a giant Rottweiler at our very own Boyle Park. Imagine a young mother and her 1 year old son peacefully enjoying a picnic in the grass. All mom could do to protect her baby was hover over him while she took the blow. Old Buddha, the dog, proceeded to lift his leg and pee all over mom's back. Incurable. This wouldn't have happened if Buddha was on leash. End of story. I have heard other reports of off leash dogs snatching food from other picnickers. Another mom park-goer recounted the time a dog ran up and snatched a sandwich from her husband's hands as he was about to take a bite. Situations like this happen all too frequently with dogs running wild in public parks.

Are we supposed to tolerate this behavior? At what point are the dogs taking away our human rights? Believe it or not, there are actually people who are fearful of dogs. An approaching off leash dog is a major threat to a person like that. An off-leash ban is the ultimate and unfortunate result due to a small percentage of selfish dog people. I grow weary of literally watching my every step every time I take my baby for a stroller ride. I know that most are responsible pet owners. I think it their job to assert some major peer pressure. The littering of feces cannot be tolerated!!! Rule breaking pet owners need to be fined. There is a clear need for poop patrol and enforcement of the laws on this issue.

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Shelby

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
William Moss

<b>Correspondence:</b>	Frank Dean, General Superintendent( Golden Gate National Recreation Area, ( Fort Mason, Bldg 201,( San Francisco, CA 94123-0022( Attn: SEIS				

Dear Superintendent,

As a taxpayer and resident of the directly impacted community, I thank you for extending the time to

---

solicit input on this proposed policy. I regularly use these trails and beaches with my dog.

I write in support of Alternative A, the No Action Alternative.

I strongly oppose Alternative F, which would restrict off-leash and dog-friendly access to the GGNRA.

I urge you to maintain and expand dog-friendly trails and Off-Leash, voice-controlled access, rather than attempting to further tighten the already onerous restrictions.

## 1. Dogs are a benefit for society and our community.

It is critical as the stresses of our lives increase, that we expand the land where we can exercise freely with our dogs - for our health as individuals, our well-being as a society, and our duty to our pets. Recent surveys show that I am not alone; nearly 40% of all Californians are dog owners. Yet families with dogs are permitted access to merely 1% of our parks land here in Marin.

The benefits of daily exercise are well-documented; our First Lady Michele Obama has made it her mission. Running, walking, and hiking together in the open air with our dogs boosts the body, the heart and the soul of us both - keeping both dog and human healthy. It is so very important for us, and even more important for our animals! Enclosed urban dog parks and leash-only areas are simply no replacement for open beaches and parklands where owner and pet can run freely.

Time with dogs is proven to reduce depression and add longevity as we age. Service dogs that provide comfort in hospitals enhance patient well-being. It is also proven that these type of service dogs need their recovery time, in order to serve another day. How do dogs recover? By running, playing and being free. That requires open trails, beaches and Off-Leash, controlled areas in nature - a dogs natural habitat.

Furthermore, as dogs age, just like humans, their joints stiffen. And, like humans, the best exercise for an elder dog is swimming! Free and open beaches provide this opportunity; please maintain the few places we have today to run with and swim our dogs.

## 2. Healthy dogs provide tremendous comfort and emotional support in families.

For many years, my husband battled cancer. When he felt well enough, our dog would get him up and out for a walk in nature. As his caregiver, I relied on our dog - a border collie - to maintain my own health and strength, with daily invigorating hikes in the trails, walks on the open paths, and/or runs on the beach. Without her and our walks in the parks, I don't know how I would have made it through those difficult days. Working out in a gym is simply no replacement for running on open trails with one's dog.

When the chemo and disease sapped my husband's energy, she would sit with him and keep watch. One afternoon, he suddenly took a turn for the worse. Our dog immediately knew something was wrong. She came to me, highly agitated, barking incessantly, until I went to check on him. She was right. I called the ambulance service and we got him to the ER.

When we got back home, she would not leave his side. Some days later, sadly, my husband passed on, peacefully at home. Every night thereafter for more than a week, our dog cried herself to sleep, whimpering and whining in a manner I had never heard before. Clearly, dogs are sensitive creatures, in their own way. Like humans, they need open space, Off-Leash, controlled areas and wide open beaches.

Please enable us to maintain the health to these wonderful creatures by maintaining and expanding our Off-Leash, controlled access to the parks and beaches.

3. GGNRA Parklands are here for recreation.

I strongly support the letter submitted by the Marin Humane Society, including the specific recommendations to maintain our current access on trails and beaches in Alternative A. Responsible, off-leash, controlled dogs should be allowed in as many areas of the park as possible.

The Golden Gate National Recreation Area was set up to be a Recreation Area for this densely populated, urban Bay Area. The GGNRA is not a wilderness national park and shouldn't be managed as if it were. (Even Yellowstone allows noisy, polluting snowmobiles!) These trails and beaches have been set aside for dog-walking since the original pet policy in 1979. Please retain this policy.

Marin County provides access to large numbers of urban dog owners from across the Bay Area, particularly San Francisco. As U.S. taxpayers, we Californians contribute more to the federal budget than we receive in return, providing subsidy to those in less vibrant economies. We meet the burden of our own needs through additional taxes paid to our State, Counties and Cities. Any further restrictions would place even greater stress on the few off-leash areas our County can offer, maintain and support.

I have written to this agency before (when such comments ran 3:1 against your plan in 2011) and urge you again today: Please keep and expand our Open Space, Off-Leash Beaches, and Off-Leash and Dog-Friendly areas and trails for dogs and owners to run free together.

Please vote for Alternative A, the No Action Alternative, retaining access in Muir Beach, Homestead, Oakwood Valley and the Marin Headlands.

Yours respectfully,

Wendy Richards  
Sausalito, CA

**Correspondence:** Dear Superintendent Dean,

I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. I travel from Santa Cruz to GGNRA specifically to have the opportunity to exercise and enjoy the outdoors with my dog off leash. The new plan will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan does not take into account concerns and objections of the thousands of people who

submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

<b>Correspondence:</b>	Please do not ban off-leash dog walking. My dog loves running around and playing fetch. She is very well trained and very loving towards other people and dogs. She loves children and even insists that small toddlers throw the ball for her. My dog would not be happy if she had to be on-leash at parks and crissy field.

<b>Received:</b>	Feb,12,2014 12:29:44				
<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Dear Superintendent Dean,				

I'm someone who walks twice daily with my designated service dog in the Rancho Corral de Tierra (Montara) section of GGNRA. When he is exercised, he is calm and can be in therapy mode/perform his service duties. But if he were forced to stay on leash, there is no way he'd get the exercise he needs - - and would therefore not be calm enough to perform the services he is trained for. I moved to Montara 12 years ago for the specific purpose of being able to exercise my therapy dog off leash within walking distance from my house. Now that is being threatened.

Therefore, I'm writing to express my strong opposition to your preferred alternative in the new dog management plan. It is way too restrictive - - no off-leash areas at all - - and it will prevent me from recreating with my dog for my own health and his health.

I have submitted my opposition comments so many times, via email, website and in person - - but never feel heard. I have attended countless forums with the GGNRA and Nat'l Park Service. But the new plan was not modified in any real way to reflect the many substantive concerns and objections of the thousands of people who submitted comments the first time around.

In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

I know you say there is no other National Park with off leash rules like the GGNRA. But GGNRA is not

the same as other parks like Yellowstone. It is a RECREATION AREA in a densely populated urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

<b>Correspondence:</b>	Hello,				

While I strongly oppose Alternative F, and support Alternative A, what I would really like the GGNRA to be focusing on is how to get more people outside, using recreational space designated for that purpose. That would entail finding MORE access for people and their dogs, not less, and not 'no change'. Dogs frolicking in open space is a joy to behold. People go crazy without time outside, away from cars and buildings and urban stresses. Dogs are no different. And recreation for people includes recreation for dogs. Please focus your energy on bringing more joy, not less.

It is a bit distressing that legislating trends toward restricting rather than expanding. Let's create MORE freedom. Let's share the planet.

Thank you.

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. This seems to be a gut reaction in response to those who are not complying with the leash restrictions, but this will impact thousands of folks' ability to enjoy simple recreation with their dog!

---

**Correspondence:** I have a 5 month old baby. Nothing makes him happier than seeing dogs in the dog park and interacting with them. This is what makes our part of the world unique and amazing. We should have more places where more people can interact with more dogs. So please NO MORE RESTRICTIONS ON DOGS.

For people who don't like dogs, there places for them too (like all city streets, buildings, restaurants, most parks, highways, subways, etc.). If you want more places in GGNRA that exclude dogs, then create an equal number and size of nearby spaces that allow dogs. Keep it balanced that way.

Frank Dean needs to understand that parks are for people, and many people have dogs, so therefore parks are for dogs to a large extent. Possibly he things that parks exist for the benefit of park employees and birds, which is not the case according to the congressional mandate that created the GGNRA (although park employees and birds are welcome so long as they don't interfere with other users). It takes a special kind of moron to look at what people want and give them the opposite. We've got a lot of acreage in the GGNRA! Let's give everyone what the want, not restrict or exclude certain park users!

Conflicts with dogs and people are the result of too many restrictions. Dogs need space to run around, and so do dog owners. If you prevent that, dogs and people get angry and frustrated, like I am right now. Grrr....

The Dog Management Plan proposed will dramatically and adversely impact dog owners who already have limited recreation areas for our pets. As urbanites, it is important for our pets have access to open environments, GGNRA's plan diminishes our access!

Recreation areas should be for just that, recreation. Dog owners should have the same ability to enjoy the serenity of our rec areas as anyone else.

Please provide the Bay Area people a balanced and positive urban living & increase the number of dog friendly rec areas and follow the commitment laid forth in the 1979 Pet Policy.

Thank you for your time and review.

Best,

Briana

<b>Correspondence:</b>	Dear Supervisor Dean,
------------------------	-----------------------

I am writing to express displeasure with the proposed restrictions on dog walking and off leash areas within GGNRA. I would like you to consider the vast number of your local "customers" who are dog owners and who would like to responsibly hike the natural lands around this beautiful area. I have heard

that there are more pet dogs than children in San Francisco.

I hike an average of 3 miles a day with my canine friend and I am drawn to backcountry areas and other places where my super friendly dog can run off leash. Such areas are few, and they should be on the increase rather than the other way around.

Please put the burden on owners to self-police and ensure that off leash dog areas are kept safe, clean, and fun for all.

thank you for your consideration,  
-Mike Weihman

<b>Correspondence:</b>	I would charge extra for dogs instead of banning them. also impose heavy fines on those who do not clean up after their pets. This will allow the park service to gain additional funds to clean and maintain the parks better. A state ranger once told me that the park systems are not broken, but just broke. You need funding to hire rangers and maintenance crew, who will monitor and clean up after everyone. Because let's face it - it's not dogs but people with and/or without pets that leave the greatest footprint.

**Correspondence:** Please do not take away off leash capacity for dogs in Rancho Corral de Tierra. I have lived on the coast for 20 years and have always walked my dogs in the areas that are now GGNRA lands. My dogs are well behaved and we enjoy the ability to play and walk for miles of beautiful space. A happy and healthy dog means a happy and healthy human. I think you should focus your energy and efforts on the people riding dirt bikes up and down the hills, ruining the trails, frightening the equine and dog population,

and scarring the hills. Dogs do not create the long lasting damage and havoc that dirt bikers do.

Please keep Rancho Corral de Tierra open to dogs and specifically off leash.

**Correspondence:** My name is Maia Rey. I live in San Anselmo, in Marin County. I often visit most of the GGNRA's off leash areas not only with my dog but with dogs that I walk or dog sit. I also frequent Ocean beach where my son surfs and Crissy field. Not only are these areas essential to my livelihood but also to the health of my pet and the pets that I sit. I pay alot of money to live in Marin and the biggest reason that I have always done that is for the open space areas that my family (including my dog) and I have access to. I don't know what the statistics are for Marin, but there are more dogs than kids in San Francisco, and plenty in Marin. I am also an environmentalist and a wildlife lover. However, I believe that the open space areas within and close to urban areas should be accessible to and serve the needs of, the people that live there first. that includes all people with dogs as members of their families and people that don't care for dogs. Because, people have such a wide range of interests, tolerances and intolerances, being in shared public places requires personal responsibility, and an attitude of inclusiveness. Not all people or organizations have these attitudes and this is when we see these people and organizations trying to regulate their biased and intolerant attitudes on the rest of us. This is what GGNRA was originally designed for to "provide for the maintenance of needed recreational open space" but I fear that it has become misguided.

I am strongly opposed to the Preferred Alternative because it is way too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County where my husband works and we sometimes go and on new lands that the GGNRA acquires in the future.

I oppose fencing to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. It will also destroy the natural beauty of those areas.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions. These are some of the attitudes of intolerance and bias that some of the people with power appear to be trying to imposed on the majority of us that they don't agree with.

The new dog management plan did not adequately consider comments to the earlier version of the plan from those of us who support dog walking and appears to have dismissed nearly all of them. There is no explanation, other than a baised agenda, why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A /supplemental environmental impact statement needs to be based on science, not anecdote. Even if there

was evidence of some impact; people need a place to recreate with and without their dogs. These are not remote areas that we are discussing. These are our back yards.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades. This is an abuse of power and a display of intolerance and a biased agenda.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

Please consider my view point and that of the majority of tax paying residents whose opinions you are in opposition to.

Sincerely,

Maia Rey

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Rodeo Beach and hike the loop as well as let them run on the beach. I also enjoy hiking from my home in Sausalito down to Cavallo and up to the tunnel on the Coastal trail. One of the reasons we purchased a home in Marin was so that we could enjoy the wonderful nature access with our dogs and not to have to get in a car.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I feel there is enough space and trails for those who do not enjoy dogs. I strongly hope that you will consider those of us who do enjoy our pets and allow us to enjoy the GGNRA with them.

Regards,

Heather

**Correspondence:** my dog is happiest running and playing on the beach. A lot of people who live in this area don't have large back yards or private area's for their dogs to run free and just enjoy being a dog. It's not hurting anyone, and I only ever see people with their dogs being respectful and cleaning up after their dogs. It's going to be a huge bummer to all the dog lovers in this area and to the dogs that don't have any other way to run around and be happy.

Please save off leash in the Bay Area!!

**Correspondence:** Dear Superintendent Dean,

I am a dog owner who has lived in San Francisco for over 30 years and has enjoyed getting exercise with my dog in the natural areas within and surrounding the city. I am strongly opposed to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will cut off access to GGNRA properties that my dog(s) and I have enjoyed for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Legislation that prohibits such a healthy and positive activity as enjoying the outdoors with your dog, is absolutely un-American in my book.

Sincerely,  
Patricia Veitch

**Correspondence:** I am a dog owner that has lived in San Francisco for over 20 years. We take our dog to Fort Funston 5 to 6 times a week to run on the trails and beach. Our dog has many human and canine friends that we meet and play with almost every day. I get great exercise and get to connect with people who love dogs and nature. Running off leash at Fort Funston gives both of us great joy and a physical release so that we stay healthy and vibrant. My dog is a rescue from the Peninsula Humane Society and is a recovering stray. Many city parks are too close to traffic and are not appropriate for him because of the loud noise and moving vehicles. He feels safe at Fort Funston. I do not want off leash regulations to be tightened at the GGNRA.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the SEIS for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. The SEIS Preferred Alternative proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Fences secure enough to keep small dogs in will hinder movement of wildlife.

I oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

**Correspondence:**

Dear Superintendent Dean,

OPPOSE THE PREFERRED ALTERNATIVE FOR DOG MANAGEMENT.

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

**Correspondence:** We are writing about your engagement in the development of the Golden Gate National Recreation Area Dog Management Plan because I am from the San Francisco Bay Area and although I understand you are receiving many letters to open up the National Recreation area to dogs, we are against more unnecessary work by our rangers having to discipline dog owners. The dog situation is out of control here in Marin County. Our trails are filling up with dog feces that are left behind by owners that unleash their dogs in "leash only" areas and look the other way. I love dogs and feel that there are many responsible dog owners out there, but the many irresponsible dog owners are allowing their dogs to run up and down the hillsides here tearing up the natural terrain. There is enough to do, and finances are already tight as it is to have to put more responsibility on Rangers to discipline more dog owners.

I have observed dogs in "leashed" protective sanctuary areas chasing deer, owls, birds and other wildlife, sometimes, to the owner's dismay, actually catching this wildlife in their jaws. After the wildlife has been harmed by the unleashed dog, the owner may put their dog temporarily on leash but there is not a mutual respect for the hiking trails, hillsides or wildlife there. Many dog owners here are actually offended when a person asks them to put their dog on leash in a leash only area.

You should know that the bay area is filled with very wealthy individuals who are used to getting their own way. As written in our local paper, "We have essentially written off attempting to work with the people at the National Park Service, and are going over their heads to Department of Interior and Congress," Bill Bechtell of the Montara Dog Group writes into Patch.

This is typical behavior of many individuals in this area who feel that rules should not be put on them. I am sure that the National Park Service is tired of having to discipline dog owners, I see them writing tickets here all the time to owners who have their dogs off leash the next day again in leashed area, educated individuals that cannot understand why their dog must be on leash and I am certain the Park Service is concerned about the welfare of fragile hillsides and indigenous flora and fauna that is being destroyed by off leash dogs.

In the Bay Area there is a spot that has allowed dogs to walk with their owners on leash. This lasted for a very short time. Now if you walk the area without a dog, and dogs are jumping on you, owners will tell you that if you don't want to be jumped on by dogs, then you shouldn't walk in this beautiful path along the bay that is supposed to be for everyone. On mount Tamalpais, rangers have to ticket off leash dogs all the time. Tourists come from far away to see this beautiful mountain and paths often are littered with dog feces and colored dog excrement bags that were left behind. At Stinson Beach where there is actually a designated dog beach area, owners allow their dogs to run down the beach in the "leashed" area running over a family's blanket who is picnicing, chasing birds or leaving excrement even on the "no dog" side of the beach. In asking an owner to please clean up after her dog, I have been told multiple times how difficult it is to see all the dogs going to the bathroom when they all go at the same time. Ironically, this is usually the case in a leashed area.

PLEASE BE PREPARED THAT IF YOU OPEN UP MORE TRAILS for dog owners, be prepared to have more rangers there enforcing the leash law and having to put extra care into maintaining havoc the dogs are reaking in the National Forest areas.

Sandy and Claudine Murray  
Mill Valley, California

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. I have an active, obedient dog that needs regular, off-leash exercise.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Ms. Maloney

<b>Correspondence:</b>	Dear Superintendent Dean,				

As a family who enjoys visiting various GGNRA parks with our dog, I'm writing to oppose the preferred alternative described in the GGNRA's new draft dog management plan. It is far too restrictive and will prevent our family from recreating with our dog on many GGNRA properties.

In particular, to ban dogs in much of Fort Funston is preposterous, as dogs and dog owners make up the vast majority of park users!

Dogs and children do mix well, as my 3 year old and 9 month old can attest to. And any dog trainer as well as the SPCA can tell you that a free (off-leash), well exercised dog is a better socialized dog.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

I also oppose fences to surround or delineate off-leash areas in the GGNRA. Fences will make off-leash areas feel like pens, and visitors using them will feel unwelcome.

**Correspondence:** Whether you have a dog or not, its a joyful experience to be in the bay area with dogs off leash running free or at the parks the a leash. It allows people to feel a sense of community to the have your friends, family and dogs gather together. If you take this access away these areas especially Fort Funston people will not be use/appreciated as much. All the dog owner will then go to other areas and overcrowd those parks with their dogs. Having these area for me and my dog keeps me happy, sane and rejuvenated. If a majority of the dogs in SF had to start using the sidewalks as bathroom and be on leashes walking around the block I don't think this will be an appealing city to live in. It also may create new behaviors in dogs that will have a negative effect. The dog park areas are a main reason I moved I moved to SF. Move the sewage system away from these park areas not the dogs. I think that is a better solution for the environmental impact.

**Correspondence:** One of the best things about SF is the amount of amazing dogs, and the freedom they have to play. It's so important that dogs are allowed off leash, for their mental and physical health. Dog owners in SF are well aware of the responsibilities for socializing their animals. I've had a dog in SF for two years and have had nothing but great experiences taking her around the city to parks. I can't imagine what life would be like if we were not allowed to do that. It has become our regular family outings. Please don't go backward and instate mandatory leash laws. They are cruel and unnecessarily burden SF residents.

**Correspondence:** I urge you to change your position. As a dog owner (for all my life) who splits time between San Francisco and Marin, I take advantage of the open areas for my dogs to run. I have noticed that the dog owners that take their dogs to dog friendly areas are all respectful of the surrounding areas, and I have never seen an overly aggressive or dangerous dog. I believe that is because the dog owners are extremely conscious of which dogs should be out in these areas. In addition, keeping a dog on leash often times does not provide the dog with enough exercise (speaking from experience), they are usually kept in the house during the day are waiting to be allowed out to explore. San Francisco and Marin are known for their dog friendly atmospheres, please allow us dog owners to continue to explore and have our dog off leash in certain places.

**Correspondence:** Dear Superintendent,

I regularly recreate with my dog across all GGNRA lands and restricting access would greatly reduce the value provided by the parks. They were created as a recreation area and San Franciscans love their dogs (more dogs than children in SF). Eliminating off leash would likely reduce the overall usage of the park as pet owners go to the park to walk their dogs. Cant play fetch? Probably not going to the park.

Thank you,  
Jon

**Correspondence:** Dear Superintendent Dean,

It is a great privilege to be able to walk with my dog off leash in the GGNRA. I support keeping areas open that currently allow dogs off-leash, as there are already many parks that ban dogs entirely, and fewer and fewer places where families can go with their dogs for exercise. Recently my family and I visited Stinson Beach with our dog, and even during the winter there were many dogs in the off leash areas, all were under control of their owners, and I never witnessed any issues with people not picking up after their dogs. It was a wonderful experience.

I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is too restrictive and will prevent me from being able to repeat the Stinson Beach experience I just described.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there has not been a peer-review, or a site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future. There is already vast areas of public land where dogs are not permitted, sometimes for specific reasons, but please do not reduce the amount of dog-friendly, off-leash areas already established in the GGNRA.

Sincerely,  
Elyse McIntire

<b>Correspondence:</b>	Dear Superintendent Dean,				

Please restore the 1979 Pet Policy for the GGNRA and do not go forward with this dog management plan. So many people get enjoyment from walking their dogs off leash. Given the fact that the GGNRA owns about half of the parkland in SF, it is very unreasonable to end this activity or to marginalize these park users by placing them in pens. The overwhelming majority of dog owners in SF have proven themselves to be responsible - organizing park clean up days, participating in committees to find common ground with the NPS, and keeping their dogs under control. If there are individuals who do not control their dogs, those individuals should be ticketed. The United States does not use a policy of collective punishment and guilt; it holds individuals accountable for their behavior. This proposed plan punishes a large group of park users on the basis of allegations against a few and unsubstantiated allegations about the effects of off-leash dogs. The area was formed as a recreational one and was supposed to be aimed at ensuring recreational opportunities for those in SF Bay area. This management plan goes against that enabling legislation for the GGNRA.

I do not live in San Francisco, but have visited the GGNRA and enjoyed seeing the dogs at Funston. They were few in number and well behaved on the day I visited. It would sadden me greatly to think that the joy of those people and animals has been denied for the benefit of national interest groups and bureaucracy. It would be a shame. Please restore the 1979 Pet Policy!

Thank you for your consideration.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Mirit Cohen (& Jasmine, my dog)

**Correspondence:** Dear Committee Members,

Thank you for taking the time to solicit input from the citizens of our potentially impacted communities. It is a testament to the thoroughness of the committee and its recognition of the gravity of this debate. I would like to start by requesting the committees acknowledgement that our dog owner community is currently already drastically discriminated against in its access to our Bay Area parks. In Marin County, families with dogs are permitted access to merely 1% o our parks land! This alongside the fact the recent surveys show nearly 40% o all Californians are dog owners.

As frequent users of parks, dog owners are often the most committed volunteers to park maintenance and fund raising. In addition, our parks are funded equally by all tax payers, dog owner or not. This discrimination alone should give any fair analysis pause before considering further reduction of dog friendly public space.

Lastly, I would like to address the economic sense of further restricting parks from dog friendly space. Any tightening of dog restrictions would naturally require additional resources for policing and enforcing said policies. With our park systems already under intense financial pressures (park closings, etc.), could our park dollars not be better spent reopening and maintaining our parks system instead of degrading the experience of some the parks systems biggest advocates and supporters?

In closing, I ask you to please reconsider any changes to our current dog friendly park space. It is unfairly over-limited as it is and to add to this discrimination makes little sense as it relates to economic factors and general equality.

**Correspondence:** I am writing to express my opinion that any new regulations and restrictions to dog walking policy in the GGNRA should reflect fairness to responsible dog owners.

Understanding that there are always outliers in any population who disregard the importance of rules protecting the environment and public safety, I am concerned that the majority of dog owners who take time to train obedient dogs will be unfairly punished.

The transgressions of the few careless or disrespectful dog owners should not necessitate a broad punitive policy mitigating the freedom of considerate dog owners who pick up after their dogs and keep their dogs under control in public when off leash.

I believe enhancing policing and fines for irresponsible dog owners is a better alternative to curbing the rights and freedoms of all dog walkers. When trained to obey, dogs need not be a hazard to the environment nor the individual and such freedom perpetuates a healthy relationship between the public, their dogs and the GGNRA.

Sincerely,

gary hennemuth

<b>Correspondence:</b>	Hello...				

I am writing as a responsible dog owner hoping to retain my ability to allow my dog to thrive, off lease, at Crissy Field. As with most complex issues, compromise seems the logical approach.

At Crissy Field, dogs on leash on the path and East Beach so families and joggers are unmolested by off-leash dogs. On the West Beach, allow dogs off-lease to romp and play and give and experience joy. This is not too much to ask.

In the Presidio, dogs off-lease at and after dusk.

Thank you for your consideration.

**Correspondence:** I'm a 30 year resident of the Bay Area, and for all that time I've had dogs and have enjoyed walking with them on the many trails and beaches that have been open to them - more and more of which are being restricted and no longer welcome to me. As such I strongly oppose the GGNRA's preferred alternative which would severely restrict and further limit areas where we can go. The GGNRA is an urban recreation area, not a National Park, and should not be treated as such. I have walked my dogs, both on and mostly off-leash, in the Rancho Corral de Tierra area and Fort Funston for the last 27 years, and have not once had a problem with hikers, mountain bikers, or horses, or with other dogs. Responsible owners like me leash up whenever necessary, and clean up after our dogs, leaving no adverse environmental impact. There have been no factual studies of dog impacts to the areas in question - and as the area has been open to dogs for decades the habitat is obviously surviving, and thriving, in its current state. Under the proposed plan there would be nowhere in San Mateo County GGNRA lands for off-leash walking. Rancho has been off-leash for decades - that is the status quo, and it should be maintained. The

---

document presented by the GGNRA does not correctly describe the current situation at Rancho, and has not adequately allowed for monitoring existing and future activity. I support the No-Action Alternative - leave things as they are and do not restrict us further!

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I take my dog to Muir Beach and the surrounding trails on a DAILY basis. Loosing access would mean having to DRIVE to an area outside of the GGNRA.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

As a local resident I have not witnessed any issues with having dogs off leash on the beach or on-leash on the trails. I have NEVER witnessed a dog directly interacting with wildlife. I have on many occasions, however, witnessed tourists that are bussed in on NPS buses by the thousands annually, harass wildlife such as seals, otters and birds.

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

`e Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Affiliation:****Received:** Feb,12,2014 16:57:17**Correspondence Type:** Web Form**Correspondence:** Hello there,

I am writing in regards to the new laws surrounding leashes in parks in SF area. I am a volunteer with the SPCA. I bring my dogs into children's hospitals, old folks homes, and mentally disabled clinics. My dogs provide peace and tranquility to people who need it. When they are off leash at parks they also provide this same helpful emotional response to those around them. Allowing for these k9s to be off leash in these areas is what gives our City pride and makes it the the City that it is. I understand federal laws are suppose to be all encompassing for all Cities in the US, but these laws are not appropriate for San Francisco or it's residents. We are a warm and welcoming city. And allowing dogs to be in our parks is part of the reason why. I strongly disagree with these new laws and I truly hope that you as our representatives do the right thing. Thank you for the consideration.

**Correspondence:** I am writing in support of dogs and their owners. I can't imagine Crissy Field where dogs have to be restrained on leash. I have been bringing my dogs to Crissy Field and the beach for the past 16 years. The pure joy that I see in my dogs eyes as they romp on the beach and in and out of the surf truly warms my heart. I am so disgusted that the GGNRA cannot seem to come up with a compromise. There needs to be an area where dogs are allowed off leash. There is that second small stretch of beach where the families do not typically gather, favoring the first beach in front of the parking lot. What is the issue? The plovers? The plovers have the whole coast of California to choose from! And not all dogs chase birds...mine certainly don'tâ€they are happy to fetch sticks in the water, chase their frisbee and play with other dogs. Stinson Beach has it figured outâ€one part of the beach is no dogs and the other part is dogs!

PLEASE do right by the dogs, their owners and other people who just enjoy seeing dogs and people SO HAPPY!

**Correspondence:** I have lived in the Bay Area most of my life and only in the last 7 years have owned a dog. I am an avid walker, jogger, bicyclist, and over all outdoor nature fan. Through the years I have been up and down the northern coast and feel very connected to the national, state and local parks. I'm a fire captain by trade and understand the need for rules and regulations to make access fair.

With this said, I feel immensely that a reduction in off leash area in our beautiful Bay Area is such a non-justifiable proposal. Dogs are such an important part of our family and my 6 year old daughter walks and exercises with the whole family. We get such a tremendous enjoyment and connection with our community and neighboring communities by walking as a family in off leash areas. It creates a tremendous feeling of pride and allows us to not only bond as a family but bond with other walkers who may or may not have dogs. When our small dog runs and interacts with other people and other dogs, his spirit and being contributes to what the Bay Area is truly about. Please do not reduce the space that dogs are currently allowed off leash.

Even before I owned a dog, I never felt that off leash dogs were an issue. I've never had a negative experience with dogs prior to owning my dog and the only bad experience I had while walking my little 10 pound mutt was with another owner who was not being reasonable about his responsibility. This is only one occurs de in well over 7 years in an area that there are more dogs than people. I consider this pretty darn good as I've had a few more run ins with other parents who weren't watching their children at the playground and were being too rough with the kids around them.

Again, I am asking please do not reduce off leash access for dogs. I believe it would severely have a much greater impact (overcrowding the off leash areas) and make the community even more divisive between dog groups and the NPS.

Thank you for your time.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Hi,				

My husband and I begin every morning at 6 A.M. by taking our labradoodle, Charlie, to Crissy Field. We treasure the quiet moments in the morning, walking on the beach, watching the sun rise, feeling the sense of community while we engage with other walkers and dog owners as Charlie runs free on the West beach. Often we return, mid-day, to the beach to throw a ball into the water and delight in Charlie being able to swim. He is well behaved and has never been other than a delight to all who enjoy his exuberance and freedom being off leash.

I am very comfortable with designating one area of the beach, West Beach, to being an off leash area and prohibiting dogs from East Beach. I have voiced this for some time and believe those individuals with

children, people picnicking, people who don't appreciate dogs or those fearful of dogs should have an area where they could go and not have to deal with dogs. It would make most sense to reserve East Beach for this purpose and to designate West Beach to being off-leash. I believe this would be the fairest compromise.

Thank you for your consideration.

**Correspondence:** I am in favor of most of the provisions of the NPS preferred alternative F, however, I do not believe this alternative properly protects the interests of plants, wildlife or visitors in the Marin Headlands, or at Crissy Field.

The Marin Headlands trails have a diverse mix of plant and animal species that should be protected from the presence of dogs. It is uniquely possible at the Headlands to experience complex ecosystem diversity including chance encounters with animals unusually near a major city. The presence and/or recent presence of dogs whether on or off leash seriously limits those opportunities and degrades the visitor experience, to say nothing of the potential harmful influence of the presence of dogs on these plants and animals. I would urge you to consider a no dogs policy on Marin Headlands trails. Under Alternative F dog walkers would be free to let dogs off leash along the beach there, and that seems compromise enough.

Even though Alternative F prohibits dogs in the wildlife protection area it allows dogs, in some cases totally off leash, into areas adjacent to, and used by resident, migrating and vagrant birds. It also allows dogs onto beach areas where the potential for future interaction with marine mammals is high. ROLAs in the airfield area are too close to protected areas, and the airfield has already hosted a number of migrant and rare vagrant bird species that would be impacted by the numbers of dogs and owners drawn to designated ROLAs in that area. I would urge you to consider more restrictions on dogs at Crissy Field including the elimination of ROLAs along the main airfield.

Thank you for considering these comments.

**Correspondence:** Please reconsider your plan to eliminate dogs from the Golden Gate National Recreation Area. Dogs are already banned from 99% of the GGNRA - there is no need to further limit their presence.

As a medical professional, I know how important it is - for both physical and emotional health - that people stay active and enjoy the outdoors. Dogs have been shown to improve physical fitness and provide multiple psychological benefits.\* Dogs encourage people to get outside, be active, and enjoy this area of natural beauty that has been set aside expressly for that purpose.

The GGNRA is set aside for the people of California, the United States and the world, and we desire to enjoy it with our dogs. Do not take away our ability to do so.

\*I encourage you to read the literature: for example, Wohlfarth, et al, "Dogs motivate obese children for physical activity" or Krause-Parello, et al "Human-canine interaction: exploring stress indicator response patterns of salivary cortisol and immunoglobulin A." Krause-Porello writes that "interactions with canines may help to reduce the biological effects of stress that influences human health," while Wohlfarth found that "the presence of a therapy dog has the potential to increase physical activity in obese children."

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Nel Ellwein

**Correspondence:** I oppose your plan to restrict the use of GGNRA by dogs and their owners. I have used the Crissy Field area four days a week for thirty years for walking and jogging and have never encountered a problem with a single dog either on or off leash.

I am particularly concerned that you are proposing to restrict the on-leash areas and am curious how you have come to believe that you have such authority. With regard to maintaining the current off-leash areas, I'm sure there is a win-win solution that could be implemented. For instance, there are features of the so-called Boulder Plan which could be used to hold dog owners accountable and make your task easier without having to do away with most existing off-leash areas.

As a San Francisco resident with a dog of my own, I am very concerned that your restrictive plan will place an undue burden on the City Park system with regard to dog usage.

**Correspondence:** I would be very upset about the drastic reduction in areas where I can let my very benign, obedient and small dog off leash. It is more recreational, less stressful for both, me and the dog, to be able to take a walk with off leash. My dog does not even have a bowel movements as readily when confined by a leash. Imagine how you would feel!

Dogs cannot play when they are on leash. I cannot afford the time and money to drive long distances, to be able to walk my dog.

Please do not restrict current off leash areas !

Thanks, Tatjana

**Correspondence:** To Whom It May Concern,

I am a resident of Muir Beach and a dog owner, and I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to my neighborhood beach, Muir Beach and the surrounding leash-friendly trails in the GGNRA. If the Alternative F plan is implemented it will have a devastating effect on the many residents of Marin County and the surrounding areas who currently use the available dog-friendly GGNRA open spaces in a responsible manner.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area, including the many people who have dogs in the Bay Area. The GGNRA is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Sincerely,  
Ellen Callaway

<b>Correspondence:</b>	As a dog lover and bird lover, I have read and agree with the following statement from the Golden Gate Audobon Society about dog management plans for the GGNRA.				

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

â€¢ We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.  
â€¢ Off-leash areas should be marked off with fencing or natural borders such as bushes.  
â€¢ Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

<b>Correspondence:</b>	To Whom It May Concern:				

I support restricting dog activity wherever possible, including abolishing any off-leash exceptions in the GGNRA and tightening any and all existing rules regarding dog - - and, necessarily, dog owner - - conduct.

As an avid devotee of the GGNRA trails and beaches, I can say without reservation that my dog and dog-owner encounters as a runner, hiker, biker, and beach comber are overwhelmingly negative. From getting rushed by dogs both on and off leash, invariably jumped on, scratched (to the point of bleeding), and having my clothes torn, my picnics absconded with, my little kids growled at and pounced, and my trail shoes more often than not besmirched with dog poop, I am awash in major dog vexation. The trails are sullied, the environs trampled, the wildlife and people barraged with bad behavior - - both canine and human - - and anyone enjoying the GGNRA must constantly remain on the defensive, lest an "Oh, he's really friendly" dog seemingly leap out of nowhere to rattle the quiescence and beauty of the trails.

Dog is NOT my copilot. The natural splendor of the GGNRA is. Please, protect both the landscape - - and the nature lovers endeavoring to bask in it.

Sincerely,

Kris Malone Grossman  
Mill Valley, CA

<b>Correspondence:</b>	Ahoy NPS:				

My old black lab Sasha lived to 16 and a half, and we often visited the various areas of the GGNRA. Sasha was always on a leash. That dog would obey every command I gave her, and would come when called, but I always left her on leash because the wildlife in the GGNRA was more important. In Sasha's later years we avoided Fort Funston; off-leash dogs have spoiled what was once a beautiful dunes habitat. Off-leash dogs are a menace at Crissy Field, Ocean Beach and a dozen other locations - - none of which I have been comfortable bringing my children to. I understand that the GGNRA is a recreation area, but when some say that that word - - recreation - - trumps any interest in wildlife or conservation they are forgetting the basic tenants of good stewardship. The land and the flora and fauna are not our toys. Even in a recreation area, they deserve a great deal more respect than we currently give them. Some idiot dog chasing birds along Ocean Beach is not recreation - - or if it is, then it is the basest form of recreation. Please treat our parks, or lands, our flora and our fauna, and yes please treat our dogs, with respect, and

ban all off-leash dogs in the GGNRA.

Thanks, Thomas McCarthy

**Correspondence:** I would like to submit a comment in support of the implementation of stronger, more effective dog management policies in the Golden Gate National Recreation Area. I treasure the GGNRA not only for the recreational opportunities that it affords, but also (and especially) for the habitat it provides for wildlife. In particular, nesting, migrating, and wintering birds rely on the habitats in the GGNRA to survive. I have witnessed harassment of wildlife by off-leash dogs several times in the GGNRA, and I have been harassed myself by off-leash dogs. In fact, I avoid areas in the GGNRA where dogs are allowed to run by their owners. I strongly urge the NPS to designate more trails and areas (e.g., beaches) as off limits to dogs. Furthermore, I recommend that the areas in which dogs are not allowed be clearly marked, and ideally, fenced off to prevent dogs from crossing into protected areas. I do not feel like we can rely on dog owners to restrict their pets. I strongly urge park officials to enforce regulations concerning dogs in the GGNRA more consistently and forcefully. There are currently over 20 miles of trails, etc. available for dog owners. I realize that dog owners have a powerful voice. I also realize that dog owners love their pets and often extend privileges to them that ultimately infringe on the rights of others (humans and wildlife). I urge the NPS to fulfill its obligations to people who do not own dogs (and do not wish to be harassed by dogs) and to wildlife. I strongly urge you to implement the proposed dog-control plan, with the addition of fencing for off-leash areas.

Thank you very much,  
Andrew Rush

**Correspondence:** I am a concerned citizen regarding the issue of dogs running wild in city parks and Nat'l Parks in San Francisco and elsewhere. I often go birding in golden Gate Park, the Presidio, Ocean Beach, El Polin Springs, and Glen Park Canyon. In all of these places I see dogs running through wildlife habitat chasing birds and trammeling native plants and shrubs and owners willfully letting them. Dog owners and walkers often disregard signage that states they are to be ON LEASH! Some of the owners are respectful and apologize when this is pointed out. Some are hostile.

On Ocean Beach I see dogs chasing the Endangered Snowy Plover!!  
Please find a solution and limit dogs and dog owners and dog walkers from ruining the parks, wildlife habitat and harassing wildlife.

Thank you, David Tomb

**Correspondence:** The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

Off-leash areas should be marked off with fencing or natural borders such as bushes.

Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I believe in all of the above statements, even though I am a dog owner who abides by the rules in parks and on sidewalks, whether at Pt. Isabel or Berkeley's Aquatic Park or my local parks.

I believe in all of the above, even though I am a dog 'savant' who works with all sorts of dogs at Berkeley Animal Control Services, walking them safely around Aquatic Park in Berkeley.

Dog lovers and dog guardians who are real animal lover know that stray dogs can kill or hurt wildlife. In any case, the arguments for unlimited access are almost purely subjective and don't take into account the need to protect wildlife.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Steve Capell

<b>Correspondence:</b>	I'm writing in support of Alternative D: Most Protective of Resources and Visitor Safety.				

I am a frequent hiker and birdwatcher on GGNRA lands both in San Francisco and in Marin County. Additionally, I am a wildlife biologist.

1. We are familiar with the numerous examples of dogs flushing wildlife within GGNRA. There are multiple studies proving that bird stress hormones levels rise even when birds do not run or fly away from the stress-provoking situations. In other words, the impact on wildlife by large concentrations of dogs is likely even greater than we realize.

2. As a wildlife biologist and birdwatcher, being able to observe wildlife is one of the richest experiences our national park lands offer. Over the years, I would estimate that 50% of my wildlife watching in NPS lands open to dog walking are cut short because canines have flushed the wildlife I am trying to observe and enjoy.

3. Listening to dog owners yell at dogs supposedly under voice control is very unpleasant. As a birdwatcher, my ears are constantly working at interpreting bird vocalizations. I recreate on NPS lands to enjoy natural sounds, not to listen to intrusive shouting.

4. I have had an especially difficult time on the Bolinas Ridge trail above Olema in Marin County. If I

---

recall correctly dogs are permitted, but only on leashes. I frequently and cheerfully asked dog owners to keep their dogs on leashes and have twice now been subjected to abuse including not just an angry tone of voice but also multiple unrepeatable expletives. This is my public land,, too!

I respectfully ask that the NPS support Alternative D, although I would prefer that dogs were outlawed completely from GGNRA. Thank you for consideration of my views.

**Correspondence:** The National Park Service, in order to address both the needs of dog owners and of wildlife, needs to adopt effective dog management policies in the Golden Gate National Recreation Area. We all must share the habitat. Birds- a few of them are endangered - should be free of being chased or killed by dogs, dogs need a place to run free, and people, who do not want to interact with dogs should be able to go for a walk.

I respectfully ask that there be clearly marked areas for off-leash dogs with boundaries of some sort and areas that are for wildlife and people with no off-leash dogs. The areas that restrict dogs to leashes need to be patrolled so that the leash restriction is enforced. It is unfair to the birds, wildlife, and some people to have no areas that restrict dogs. This is exactly what occurs if there is lackadaisical enforcement. It is also unfair to push the enforcement responsibility off on the general public who may not be equipped to deal with aggressive people or dogs.

GGNRA's proposed plan is an important step toward having a balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

**Correspondence Type:** Web Form  
**Correspondence:** I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

**Correspondence:** The GGNRA is in a an important position to balance the uses of its parks. While dogs are increasingly popular and need recreation space, supporting our special wildlife is equally important. Over the years I have seen how dogs have severely eroded Fort Funston's grounds and how dog lovers enjoy watching their pets chase foraging birds on the beaches. How will Kildeer and Snowy Plovers lay eggs with romping dogs everywhere? Knowing how hard that is on the wildlife makes me deeply sad. Some species are getting driven out of San Francisco.

Stand up for restricting dogs from the best wildlife areas and draw distinct and clear boundaries and police them. Educate people about the damage to habitats by unaware pet owners and other visitors.

I think there should be some beach are available to dogs in San Mateo County, but protect our wildlife as much as possible. It is our precious natural heritage that cannot be replaced.

I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

**Correspondence:** Dogs are great. Having said that, there's a time and place for everything. Allowing dogs to run off leash in National Parks or any park where wildlife exists, is inappropriate and endangers the health and safety of said wildlife. Two burrowing owls have been killed at Cesar Chavez State park in Berkeley. The irony is that habitat has been provided within the park for the owls to nest... only to have them lose their lives to off lease dogs. The bottom line is that all dogs should be on lease at all times. The only exception for this would be in enclosed areas where wildlife and other people are not prone to disturbances of any kind. I find it maddening and irresponsible that dog owners often ignore the off leash ordinances that do exist and that are clearly posted. There are 2 reasons for this One, many dog owners have a sense of entitlement. Two, there is no enforcement.

In any case, I support any and all limitations that the GGNRA attempts to put in to place that go toward the protection and well being of other species. These limitations will also go a long way in keeping the parks clean.

Good luck!

**Correspondence:** Dogs on lease in special dog areas only. The dogs have the entire city, they don't need to be let loose to terrify birds and other wildlife which must be protected.

Monday I was walking in Crissy Field. There was a great blue heron in the marsh. A dog kept barking at it, scaring the creature. If it was not fenced, the dog would have attacked the bird. The bird is only protected behind the fence and is not free to roam, as dogs are always running around that area.

Manage the dogs, protect the wildlife!

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties since 1997.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Michelle Fallone

**Correspondence:** I support the Park Service in its Draft Dog Management plan. I am a dog owner and I think that pet owners need to acknowledge the fact that we need to protect the natural flora and fauna that call our parks home. It would be different if all pet owners and dog walkers were responsible and there were less of them, but that is not the case Also, not everyone who visits our park appreciates the ever present dogs.

Frank Dean, GGNRA Superintendent  
Building 201, Ft. Mason  
San Francisco, CA 94123

Dear Superintendent Dean,

Hello, my name is Marnie Wright and I have lived in San Francisco since 1977. I have always had a dog or two and spend at least 2 hours a day with them in The Presidio, Crissy Field and the Marin Headlands when I can. I cannot imagine not being able to enjoy these areas with my dogs. I walk, bike, rollerblade in these areas with my dogs as well as have them swim in the bay. Being able to do this with them has added so much to my life and theirs. I have made so many friends, met several boyfriends and a husband because of these experiences.

Please do not limit the areas where we can enjoy this beautiful land and water with our 4-legged friends. The Supplemental Dog Management Plan/SEIS arrangements are not fair and deeply flawed. Since the GGNRA 1972 plans were intended for long term use, it seems that this specific recreational use should continue for years for come. I am all for supporting the GGNRA's 1979 Pet Policy. This is not a National Park with pristine wilderness, but rather a unique national recreational area in an urban environment. It deserves to be managed to different standards to achieve its fullest potential. The proposed restrictions in the current plan seriously restrict dog walking: only 7 of the 22 areas in the SEIS allow off leash dog walking access on GGNRA lands in ALL three counties. Additionally, this SEIS allows even more restrictions in the future, but won't allow for new areas to be opened up to dog walking (either on- or off-leash).

Please take a balanced, fact-based approach to the environmental analysis that will result in the preservation of important dog walking recreation in the GGRNA for generations to come.

Sincerely,

Marnie Wright

**Affiliation:****Received:** Feb,12,2014 18:55:20**Correspondence Type:** Web Form**Correspondence:** Dog owners are an organized and noisy group, but they don't reflect the views of the majority of those of us who love and appreciate the GGNRA. As a dog lover, I still think that:

dogs need to be more carefully regulated in the GGNRA;  
off-leash areas need to be fully enclosed;  
clear and effective enforcement is necessary for success.

The plan rightfully protects fragile species and habitat while still allowing dogs and their guardians to enjoy the GGNRA.

---

**Correspondence ID:** 3356 **Project:** 11759 **Document:** 55416**Address:** El Cerrito, CA 94530  
United States of America**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Feb,12,2014 19:00:42**Correspondence Type:** Web Form**Correspondence:** I think that it is WAY past time to let everyone enjoy the GGNRA, not just people with dogs.

I like dogs (I had one for over 15 years), but I didn't let Tippy jump up on other people; I didn't let Tippy shove his nose into someone; and I didn't let Tippy get into fights with other dogs. I cleaned up after him, and respected others' rights to enjoy the park we were in.

I have young nephews and I routinely avoid taking these boys to areas and parks where dogs are not controlled. These parks and areas have dog poop almost everywhere and make playing or picnicking not very inviting.

I also worry about dogs jumping on the boys or even attacked by unleashed dogs.

I have been attacked by unleashed dogs, bitten by a few, and often with the owner saying "oh he's friendly."

Open spaces are funded for the enjoyment of everyone, not just a few. I am strongly in favor of requiring dogs to be leashed, in greatly limiting where dogs may be off leash, and in citing dog owners who violate those rules.

These simple and responsible actions will allow all of us to enjoy our parks and open areas.

---

**Correspondence ID:** 3357 **Project:** 11759 **Document:** 55416**Address:** El Granada, CA 94018  
United States of America**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Feb,12,2014 19:13:32**Correspondence Type:** Web Form**Correspondence:** Dear Superintendent Dean,

I had the opportunity to meet you personally at three of the GGNRA Dog management meetings. Herewith i am reaffirming that as a long term resident of the coast i have been walking generations of my dog companions in the GGNRA for three decades. It has been a recreational, energizing and healthy time for us, also rewarded by the resulting socialization with neighbors and the community. This has been the character of our region.

As such, again I'm expressing my concern and opposition to the 'preferred alternative' described in the GGNRA's new draft dog management plan. It is frighteningly restrictive and would prevent me and my dog from many years of the healthy recreation, enjoyed over so many years.

It is my appeal for you to hear us, to listen to our request to maintain the GGNRA a RECREATION AREA as opposed to the planed drastic restriction of dog-friendly areas.

Remaining hopeful of your understanding,  
Cordially,  
Mike

<b>Correspondence:</b>	Unless there are dire consequences for allowing dogs to have free range of the GGNRA parks, dog owners should have the freedom to allow their dogs to run freely. It appears that passing legislation would have higher, unnecessary costs than just keeping these areas of recreation at the status quo.				

I understand that there are isolated events where dogs may interrupt the breeding/nesting of endemic birds, but for the most part, dog owners are very responsible in controlling their dogs.

Please understand that having a dog on-leash is NOT the same as having a dog off-leash. Dogs should be able to run around by themselves without the constraint of leashes in these great outdoor areas. Keep in mind that dog owners also enjoy the freedom of watching their dogs roam around happily.

**Correspondence:** My wife and I are avid hikers and birders who extensively use the GGNRA trails and outdoor space from Pt Reyes to the Presidio to Sweeney Ridge. There is seldom a time that we are out for a day of outdoor recreation when we do not come into contact with dog owners who are violating the requirements that their pets be absent or on a leash to protect the wildlife that lives there.

Whether it is on Ocean Beach, Muir Woods, or Pierce Point we have to constantly remind some of our fellow recreationists that they have certain responsibilities to leave their four-footed at home so that we all can enjoy the outdoors that we share. Our entreaties are inevitably met with a sheepish response that they just didn't know that dogs were not allowed in this particular part of paradise.

Whether or not their apparently disingenuous response is an honest one, it has become very clear to both of us that the National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

Specifically, we need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs, and they must be clearly marked as such.

Also, when there are off-leash areas, they should be well delineated by using signage, ropes, fencing or, ideally, clear natural borders such as bushes or streams.

And finally and most importantly, GGNRA officials need to enforce the dog rules more vigorously. Dog owners must be made aware of where their pets are not allowed, and what the penalties are if they do not adhere to those rules.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing where needed for off-leash areas.

**Correspondence:** From my perspective as a board member of the state Audubon program, I can share that there's been substantial research into the frightening decline of dozens of once-common bird species. One of these is the Snowy Plover, but other species also use our beaches and parks.

Each moment of stress wears down any organism, whether it's human, avian, canine. Much of the stress is natural and part of our surviving life. Some is unnatural, such as glass-lined skyscrapers or cereal-based dog food or heavy metals in our seafood.

Wherever possible, we all benefit when we reduce unnecessary stresses on ourselves and those with whom we share this planet. A simple way to do this is to allow threatened species the privilege of winter roosting on our beaches, or the protection from nest predation, or the reduction of building lighting at night when neotropical species migrate through our Western skies.

I ask that the NPS listens to conservation specialists and wildlife supporters as we attempt to speak for those without human voices, asking that measures be taken to minimize the harm done to birds by dogs off leash.

Thanks for this opportunity to comment,

Mark Mushkat

I love dogs and enjoy greeting them when I'm out walking but, there are some places that are just not appropriate for them off-leash and that is within th GGNRA. I have personally witnessed birds being routed out and chased by an off-leash dog while the owner is totally obivious to it or the poop that it is leaving behind. The area being considered for no off-leash is small compared to the amount of areas that are available to them. Please allow the wildlife of the GGNRA to exist without the invasion and trauma of dogs off-leash.

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

Off-leash areas should be marked off with fencing or natural borders such as bushes.

Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. **Correspondence:** I'll keep it very short and simple. I do not hike where dogs are allowed on trails. Dogs reduce the chance of seeing wildlife, they make noise that detracts from the sound of quiet and of nature, they leave feces on the trail, and they require attention to judge if they could cause harm when I meet them on a trail. Domesticated animals, like dogs, put a stress on wild animals and do not belong in non-domesticated places.

Please add my comments to your records.

Thanks,

Kevin Kingma

**Correspondence:** GGNRA is the only US National Park that allows off-leash dogs, one would assume because much of it lies within the borders of San Francisco, a city with an astonishing number of dogs in it, and an astonishing number of dog-owners. Well and good. But certainly any rational person will admit that a National Park is not reserved for the use of off-leash dogs. And yet that is the effect of allowing unrestricted off-leashing dogging. Free-running dogs relentlessly chase birds and other wildlife. They are hard-wired for it. Free-running dogs relieve themselves anywhere, often out of sight of owners would normally pick up their animals' waste. Free-running dogs bother people who are not particularly amused by dogs; they sometimes frighten children and sometimes jump on them; they can create an atmosphere of rambunctiousness and chaos in a place to which many people retreat to enjoy a few hours of peace and natural quiet. Therefore, it seems obvious that dogs should be controlled in this National Park. Their off-leashing should be done in a prescribed fenced-off area. Professional dog-walkers should not be allowed to use a tax-supported park for their businesses. And even leashed dogs should be kept out of certain sensitive areas at certain seasons - for instance the snowy-plover area between Noriega and Taraval Streets. And finally, somehow the GGNRA should be better patrolled. ALL law-abiding people should be

able to enjoy a National Park, and the wildlife in it should protected. I believe this is contained in the National Park Mission Statement. Thank you.

**Correspondence:** I have lived in San Francisco for 60 years and Sausalito for the last 1 1/2 years. I have been a dog owner for the last 6 years and am very familiar with Crissy Field, the Marin Headlands, and Mt Tam. I have always respected the leash requirements in the Presidio (ex., the Ecology Trail, the Bay Ridge Trail, and the route from Julius Kahn to East Beach. No problem. I do have a problem with East and Central Beaches. East Beach should be off leash until 10:00am. Central Beach from the bridge to the snowy plover fence should be off leash all day. The Promenade should be on leash all of the time. I know you can rationalize off leash in the morning, but there are too many walkers, especially older folks. Now here is the solution. Lower the hammer on violations and DOUBLE the fine if the dog is not licensed. You might cut some slack for out of state visitors. Sausalito strictly enforces the bike laws and guess what? The word gets out in the biking community and everyone follows the law.

I am ambivalent about Fort Funston. I refuse to take my dogs there because of all of the dog walkers. This could be solved by limiting the number of dogs. For slubs like me that have 1 or 2 dogs we would have an area to go to that allows us to have a good off leash experience and minimize the damage.

The Marin Headlands is easy. Put an off leash time at Rodeo Beach. There are student groups there during the week. Off leash should be allowed until they would be going down, say 9:00 or 10:00. The only other change would be to allow dogs on leash on the Bobcat Trail so you could go from Fort Cronkite to the Alta trailhead. The number of dogs should be limited to two. This would give responsible dog owners the option of using the Coastal, Miwok, and Bobcat/Alta trails RESPONSIBLY. Once again, put the hammer down on the violators and double the fines for unlicensed dogs.

FYI - When the temperature goes up, I stay away from the beaches. Too many people and children. Don't forget that these are urban areas. Dogs do very little damage. Take a look at Crissy Field after a holiday. People are the problem.

**Correspondence:** Dear National Park Service

While I am generally a supporter of your activities and actions, I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Oakwood Trail and the Rhubarb Trail, which are two relatively contained and limited trails closely bordering roads and homes and subject to intensive use already.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. We all pay taxes for the right to use recreation areas and while it is fine to enforce restrictions in some areas, these areas get a lot of use and are enjoyed by many - - we are using them for the recreational purposes. I am happy to support recreation areas, but some diversity of activities should be supported.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Thank you.

**Correspondence:** I am a native San Franciscan and a dog lover. I am also a member of the Golden Gate chapter of the Audubon Society. I support leash laws at the GGNRA because I feel concerned about the degradation of the quality of habitat for flora and fauna due to the many many unleashed packs of dogs that roam the area, many of them under little supervision. I think a long leash is a fine compromise and really the only reason people are against it is that they feel too lazy to walk their dogs at a good clip to exercise them. Also, the dog walkers walk a dozen dogs at once, to rack up fees, and they probably oppose leashes because they want to make the maximum profit by having multiple dogs with them each walk. I hope that the self-entitlement of the dog lobby gets a little reality check - there are wild things still that need our protection - our city cares about the environment - and we can easily coexist if they will abide by leash laws. It is also a quality of life issue for those of us who enjoy walking in the area - roaming packs of dogs cutting across the dunes detract from the beauty of the landscape and disrupt the ecosystem.

**Correspondence:**  
The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs. Off-leash areas should be marked off with fencing or natural borders such as bushes and Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

**Correspondence:** As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the proposed alternative. These areas have forever been a place where dogs can roam free. I know my dog is happiest when she can run freely through the sand and water at the beach. I have always encountered responsible owners who take responsibility for their dogs.

The new proposal is way too restrictive, and will prevent my dog and me from enjoying the daily walks that I have come to love and cherish.

Please keep these areas leash free!

**Correspondence:** Dear National Park Service:

I am writing to convey my views on dog access to the GGNRA.

I respect the life of all living creatures.

I am a dog lover who urges that dogs be required at the very least to be on leash when visiting the Golden Gate National Recreation Area.

Dogs have many places to roam and enjoy being out of doors. They live in peace in the comfort of our homes, where they are allowed to eat, rest, sleep, and mate, bear and raise their young.

Wild beings do not have those privileges. Indeed, their habitat grows smaller by the minute. They cannot eat, rest, sleep, mate or bear or raise their young in peace. These wild beings need a voice among us to speak on their behalf.

This dog lover wishes dogs were barred from entering the Golden Gate National Recreation Area. We have many doggie-parks and other places for our pets.

Wild creatures- -Snowy Plovers, Great Blue Heron, and other wild beings- -are limited to habitat that is getting smaller and smaller. I very much hope that the coming generations of human beings are able to see these beautiful beings who today still live within viewing distance.

I urge the reasonable course: do what we need to do to allow wild creatures the safety and comfort of their homes in the GGNRA while we and our pets live in peace in our homes and designated parks.

Thank you for considering my perspective. I very much hope you share it.

Respectfully,  
Judith M. Frank

<b>Correspondence:</b>	Superintendent Frank Dean,				

I am writing you to oppose all of the Preferred Alternative F's in your dog management plan. I am asking that you go with Alternative A in every recreation area. It is my opinion as a resident of the Bay Area, not a visitor as you like to call us, that things are perfect the way they are. According to your own statistics, dog incidents account for such a small percentage of the problems. To funnel dogs to smaller and smaller areas is a sure way to cause problems. But I have a sneaking suspicion that that's exactly what you want. Problems with dogs so you can completely ban them from our recreation area. Shame on you. As a woman, I would not feel safe hiking trails without the protection of my dog. And it is down right absurd to think people should to leash dogs while on the beach. That's like taking your kids to an amusement park and not letting them go on the rides. Maybe you'd do that, but I certainly would not. Dogs do not damage the environment, people do including your own Park Service. So I want to make it very clear, do not go through with this insane dog plan. We live here, this is our backyard not some national park. And while I am on the subject, please stop referring to this as a national park because it's a recreation area that backs up and in some cases intertwines with our neighborhoods. It needs to be managed differently as much as you might not like it. We are a stubborn bunch so if you think you can outlast us, think again. We have dog on our side.

Pam Herz

<b>Correspondence:</b>	I am writing to state my strong opposition to the GGNRA's new draft dog management plan eliminating off leash dog areas. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.				

I am a proud and active citizen of the beautiful San Francisco Bay Area. We take our dog to Fort Funston

every day and often also go to Ocean Beach and Crissy Field. Dexter is a young, active dog who loves to run along the beach and among the dunes. He plays well with others, people and dogs alike. We are very responsible and make sure to maintain his shots and clean up after him.

I can't imagine not being to take him to Fort Funston and watch him play in the waves while we enjoy the beautiful sunset. Seeing how happy he is, and indeed all the dogs and dog people at Fort Funston, gives me joy and a clear perspective.

Walking Dexter on a leash would be a completely different experience. He and I would be miserable. We couldn't play, I couldn't stop to admire the scenery. We'd both get a lot less exercise. An essential part of why my family loves this city would be gone.

Please reject this unnecessary and overly-strict plan.

Thank you,

Isabelle, Brendan, Alex, Sam and Dexter the Dog

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet

policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Gavin and Bane

**Correspondence Type:** Web Form  
**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach, Rodeo Beach Trail and Miwok Trail. It is a fantastic time where we can both enjoy the beauty of Marin, exercise and it feels great to spend quality time with an animal. It's what being a pet owner is all about.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** I am 13 years old and I strongly oppose alternative F because I have a dog, and if you prohibit dogs on most trails then there is no way he can get exercise and have fun. I don't think it is fair to ban a whole species from certain areas. They don't even have a say in it. It's not right to ban them. I don't think it harms the environment because if we hadn't domesticated them, dogs would be running free through nature. It's natural for them. Us humans harm the environment way more than dogs. If you think that dogs would harm the birds, they won't, because last time I checked, birds can fly. I have never seen a dog catch a bird, so I don't think that's the problem. What I think the problem is, is that alternative F is making it so dogs can't run free anymore. I strongly like the way things are now, so there is no justifiable reason for making any changes.

**Correspondence:** I am a senior citizen with disabilities. My primary form of exercise and socializing is daily walks with my two dogs. I am very responsible about it. I clean up after my dogs, I keep them under voice control and do not allow them to destroy any natural habitat. Your plan to limit where I can walk my dogs will greatly inhibit my routine with my dogs causing me to have to drive many more miles to get to places I can legally walk my dogs off leash. It will limit the distances I can walk to get much needed exercise as most off leash dog areas are very small and will certainly become much more crowded if large expanses like Ocean Beach and Fort Funston are eliminated. Your excuses for eliminating places like Ocean Beach are spurious at best. Most dogs walk or run at the ocean's edge not in the dunes. In fact, the space is so vast that there is never a problem with over crowding and little to no damage to the environment that I can see. At least, not by dogs. Certainly, people leave behind a lot more trash and do a lot more damage than dogs do. I strongly disagree with the GGNRA Plan to limit or even eliminate off leash dog recreation.

**Correspondence:** I strongly disagree with this petition and hope that it doesn't come close to being passed. This is a ridiculous proposition. I take my dog to Chrissy Field every weekend, and as a boarder collie in a city, he needs someplace to run around. There are already limited areas for dogs to run off leash. The city has done a horrible job of creating dog parks, so where else do you expect them to get exercise after being cooped up for most of the day?

**Correspondence:** To whom it may concern,

I want to voice my opposition to Alternative F-the preferred dog management plan to restrict off-leash and dog-friendly access in the Golden Gate National Park. My understanding is that there hasn't been a

single peer-reviewed, site-specific study, as required by law, that supports this plan. How, then, can such a drastic restriction of dog-friendly areas pass legislation?

I regularly walk my dog on the Miwok in the Golden Gate National Park behind my house. The new restriction would limit that access to my dog and the many dogs in the area, forcing their owners to walk their animals in more densely populated areas where problems between dogs and other recreation users could arise.

My understanding is that restricting this area to dog walkers also conflicts with the Golden Gate National Recreation Area's original charter to safeguard this area for people and pets alike.

For these reasons, I support Alternative A, the no action alternative.

Sincerely,

Molly K. Hartle

<b>Correspondence:</b>	I support the National Park Service's new rules that would better protect wildlife in the GGNRA and provide more opportunities for a peaceful, dog-free nature experience. People in the general Bay area already have many places to take their dogs to run and play. Dogs do more than just scare away wildlife, they kill wildlife, their owners neglect to clean up properly after them which creates a dirty smelly environment, which also can spread disease. Dogs can be aggressive to children as well and may fight with eachother. In general they disturb the peaceful quiet use of the GGNRA and threaten the very wildlife we go there to enjoy. Their effects on the area will worsen over time as well. Additional staff may be needed to clean up after them which also raises costs for the GGNRA unnecessarily. I hope the park service will stay strong and protect wildlife, whose unfettered habitats shrink more and more each day.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I strongly support the draft Dog Management Plan/ Supplemental Environmental Impact Statement for the GGNRA. I have lived in San Francisco for most of my life, and have enjoyed countless visits to the this jewel of the Bay Area. What a wonderful area for hiking, picnicking, strolling along the shore, lying on the beach, and enjoying the sights and sounds of the natural world, just a short way, but so far from the hubbub of the city.				

---

I am grateful to the NPS and to the dedicated volunteers who have worked so hard over the years to secure and maintain the GGNRA. It is vital that we protect this beautiful natural environment, including the vulnerable birds and other creatures who require the park's habitat for their survival.

An important reason why people visit parks is the serenity and beauty there. Many dog owners are respectful of others and many dogs are well-trained. But San Francisco also has its share of irresponsible dog owners, and out-of-control dogs. This can be a threat, not only for our varied wildlife, but also for our citizens, especially children and seniors. Also the presence of too many dogs degrades the natural environment of the park. We all deserve a place where we can relax and enjoy our precious coastline without being disrupted by unruly dogs and their natural instincts to chase after wildlife - or people. Pet owners who can't control their own dogs also endanger other dogs, so leash-only areas are important for them as well.

For the sake of dog owners and non-dog owners, we need better enforcement of the existing rules concerning dogs, and better signage. And we need more designated dog-free areas, perhaps with barriers around dog run areas, so dog owners will be more aware where they can bring their dogs - and where dogs are prohibited or leashes required.

The draft regulation and enforcement would be a great step towards providing better balance between the various uses of the GGNRA. It would help to preserve natural areas and protect wildlife, while allowing designated areas for people to bring their pets.

Thank you for your efforts to consider the needs of everyone who uses the GGNRA. It is not easy, but the draft regulations will improve our beloved parks for San Franciscans and visitors from around the country and the world.

Sincerely,

---

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I have been a GGNRA supporter for many years, and probably visit each of the parks at least once a year. I am also an avid birder. I visited the Sutro Baths last year when the vagrant river otter was there. I was shocked when I saw some visitors let their dog tromp along the waters edge, following the movements of the otter without regard to causing stress upon the terrain or the animal. I live in Oakland near Redwood Regional Park, where we have one of the few off lease trails in the system. The result is a bunch of dog owners who don't clean up after their dogs, bike riders who's dogs run 1/2 mile ahead or behind them, and major erosion of areas adjacent to the off lease areas, by dog owners who ignore the signs.				

My point is that I think with our increased density of recreational multi-use areas, we have to limit dogs, especially off lease. Dogs running wild can knock over the elderly and small children, they trash habitat for birds and small mammals.

From my experience, dog owners don't follow instructions on signs. A better tactic would be to fence off lease areas and let some trails be no-dog trails. I understand you have 21 miles of off lease area. That sounds great, so let's limit now or decrease if you have some trails where there are enough complaints to

justify a change.

I think it is possible for everyone to just get along, but sad to say, this means in different areas sometimes.

Thanks for working on this tough policy!

Elaine Geffen  
Oakland

**Correspondence:** To the National Park Service with regard to the GGNRA Dog Management question:

I am a retired teacher who enjoys the outdoors. I hike and bird throughout the state and enjoy wildflowers, wild animals and all the wonderful things that surround us in natural California.

It is a fact that off-leash dogs and what is left to us of "nature" are NOT compatible.

It is also a fact that too many dog owners (I am sorry to say) are not very responsible and do not pay much attention to signage. Fido's pleasure seems to be their only value.

So many of us would like to be able to enjoy the outdoors in our parks and not be confronted with dogs on the loose, with little bags of abandoned dog waste, and with the disruption of wildlife that are the hallmarks of too many uncontrolled pets in a limited space.

If native plants and wildlife are to have a chance in our parks, areas where off-lease dogs are permitted must be clearly marked and infractions must be noted, cited and fined.

We will be able to do this, as we were able to stop people from spoiling the air with smoking, if the Park Service and its allies mount a broad, serious campaign to bring everyone together to keep what's left of our beautiful state- -beautiful.

Dogs in their place, and the rest of the place for the rest of us!

Thank you,  
Anne Kelley

**Correspondence:** I disagree with limiting any off leash dog walking.

I feel it is silly. I often walk my dog on city streets without a leash which proves she is in control. Making me walk my dog on a leash in a park is just superfluous. The argument of protecting wildlife in a city is plain ridiculous. There is plenty of open space beyond city limits for wildlife to flourish.

I also believe that limiting all the areas dogs into designated areas for off leash walks is not practical.

---

There are far too many dogs to be able to be in such a small area.

Even if it is made illegal to walk my dog without a leash at Land's End, I would willingly disobey.

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,  
Justine

**Correspondence:** Please give wildlife a break! They have so few places that aren't destroyed or over run by humans. This National Park is supposed to provide some precious little habitat for wildlife. Humans do not need another place to let their pets run free. That's what dog parks, backyards, neighborhood parks and other urban greenways are for. Not the ONLY sort of wild space that remains in this urban landscape. Dogs and humans have lots of options, they just want more, at the expense of every last species. Where else do our last struggling wild species have? Where? We have already taken every other place and pushed these last few tenacious wild species to the brink of extinction. Why can't our National Parks be their last refuge? That's exactly what National Parks are supposed to be. We don't have much time left to coexist with, appreciate and help wildlife before unforeseen global events change the playing field in irreversible ways, maybe leaving us alone with our pets. Wildlife has already gotten the short end of the stick at every turn. This is a ridiculous "battle" when the answer is already known, written in law and ethically obvious. Please help wild animals to survive.

**Correspondence:** The GGNRA branch of the NPS is completely ignoring its enabling legislation and renegeing on promises made to San Francisco when we gave city parkland to the GGNRA in 1973.

The GGNRA has (conveniently) forgotten that it was created for the "maintenance of needed recreational open space." A Report issued by the House of Representatives makes it clear that the GGNRA was created to address concerns about a lack of recreational open space in San Francisco. It noted: "In San Francisco.... the opportunities for outdoor recreation in broad open spaces are severely limited." It also said: "This legislation will ... [establish] a new national urban recreational area which will concentrate on serving the outdoor recreational needs of the people of the metropolitan area." And "The objective of H.R. 16444 is to assure the preservation of open space presently prevailing within the proposed recreation area, to provide public access along the waterfront, and to expand to the maximum extent possible the outdoor recreation opportunities available to the region." During the hearings various recreational activities within the proposed GGNRA boundaries were listed and those included off-leash dog walking.

I have been walking with a well-mannered dog on these lands that you were tasked with managing for the benefits of SF citizen since 1972 and at Ft. Funston since 1978. At FF I have not seen the GGNRA make any improvements. The roads, benches, trails are in derelict condition and the construction of restrooms

has been promised for the last 10 years. You've only succeeded in fencing off areas and putting up misleading signage supposedly for "our safety" or to protect the bank swallows - the latter based on faulty science.

Please live up to the original legislation and manage these urban lands as Congress intended. Please put aside your "Big Brother" tactics or at least take them elsewhere.

**Correspondence:**

At Crissy Field I have seen dogs chase rare plovers and catch them and other bird species in the lagoon, chase the blue heron and it is horrific not to protect these areas from harm to wildlife.

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area. We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

Off-leash areas should be marked off with fencing or natural borders such as bushes.

Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas. Thank You!

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach and on the Coastal Trail. As a resident in Muir Beach, I rely on the Coastal Trail and Muir Beach as a means to exercise my black labrador.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. There has not been any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained. If people would prefer a beach with no dogs, there are places like Stinson Beach that can accommodate more visitors than Muir Beach and offer people a no-dog experience. Please leave Muir Beach and the Coastal Trail accessible to our canine companions.

Thank you for your consideration.

At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners. I urge you to implement the proposed plan, with the addition of

fencing for off-leash areas.

I'm shocked that dog owners don't appreciate this exception to standard NPS rules. Parks are for people. If the people want to bring dogs, the NPS needs to protect the resource, other dogs, wildlife and people from irresponsible dog owners. All of us responsible dog owners already keep our dogs on leashes and are very appreciative of the opportunity to do it in the GGNRA.

**Correspondence:** Dear GGNRA,

I am deeply offended by this reduced space for dogs to be walked on or off-lead. As a resident of the City of Alameda where dogs have little to no space in which to really have a good walk/hike, I was appalled to hear we will lose the federal parks too. For many people urban people who do not have cars in which to take their dogs to big parks located several counties away, how can you justify your decision? I find it shocking that you use the wildlife card as your main reason for this decision. We know this is hooley because you shoot any mountain lion that comes within 30 feet of a housing community. I also have a difficult time believing it is people that you are trying to protect. We all witness the numbers of people who use the parks. If anything I would think you would rather limit those people numbers because we

know people cause more damage to the parks and habitats than any one animal. I suspect the truth lies in the cost of disposing dog by-products. Well, sorry that isn't going to cut it either. Suck it up! Dogs are here to stay and continue to be a healthy life-style choice for many humans! Please stop limiting their space based on false, trumped-up facts!

**Correspondence:** Dear Superintendent Dean,

I walk my dog Buster a lot in the GGNRA, particularly in Crissy Field since I live so close to it. I am strongly opposed to the preferred alternative described in the GGNRA new draft dog management plan. I don't understand why it is so restrictive. There are already so few places to walk a dog off leash and this plan is reducing that even more.

I agree with Nancy Pelosi's comments that ""There is a long history of off-leash dog recreation in San Francisco which began before the transfer of land from the city and county of San Francisco to the National Park Service.". Let's keep that tradition.

Please let Buster continue to go off-leash in the same areas at Crissy that he has access to today. He's a rescue dog that I adopted a year ago and I've seen him go from a dog that shook in fear for the first few months to a happy go lucky dog that gets so excited to go off-leash. He's 18 pounds, always under my voice control, and he knows what 'Let's go to the beach' means. Please don't curb his access.

Thank you,  
Lynn

**Correspondence:** Hello,

I am a senior citizen who greatly enjoys walking my dog off-leash at Crissy Field, Ocean Beach, Mori Point and the Marin Headlands but Fort Funston in our favorite dog walking area to which I look forward to visiting every afternoon and have since 1978. Just thinking about not walking with my dog off-leash at Funston saddens me as there is such an extraordinary community at Funston. Yes, it is mainly made up of fellow dog owners who treasure a place where we and our dogs can get good exercise, where we can socialize with other dog owners but also with non-dog people who may come to see the views or the hang gliders, but they are

delighted by the fun array of dogs. Your proposed restrictions which plan to corral us into two dog areas will completely ruin this amazing experience.

It has been scientifically proven that owning a dog increases your lifespan! Numerous studies have shown that dog ownership lowers your blood pressure, encourages exercise, decreases stress and loneliness, lowers your cholesterol and thus enhances your health. Dogs can sniff out some forms of cancer and recognize early signs of seizures, enabling them to warn their human companion to lie down to prevent injury. Additionally dogs can be trained to be a Certified Therapy Dog and and you can partner up with your dog and volunteer your services visiting sick patients in the hospital or troubled children in school. Animal-assisted therapy is designed to improve the physical, social, emotional and/or cognitive functioning of the patient, as well as providing educational and motivational effectiveness for participants. The experience is incredibly rewarding.

For all they give back dogs require very little. They ask for little more than food & water, a head scratch, and a nice run/walk. I walk my dog every day at Fort Funston. He loves his walks. We love being there with him and our "dog friends. Our off-leash walks are an important part of my life. The people we meet there are part of our lives. Please expand, rather than close down, the wonderful outdoor places where we can be with our dogs off-leash. These places and experiences are what make San Francisco so special and our out-of-town visitors so envious.

Thank you.

**Correspondence:** Dear Folks- -

I have walked at Crissy Field for almost 30 years and have always been uneasy about unleashed dogs on the east beach. In warmer weather, and low tides, lots of toddlers enjoy wading in the shallows. Lots of

---

dogs also enjoy dashing around either in search of a ball or just for the hell of it. It is a bad combination. On the west beach, that is not a problem. There may be children enjoying the beach but generally they are up toward the grassy dunes and not in the water, which along that shore is not shallow enough for them to invite play. The Park service plan to allow off-leash dogs on the Crissy west beach makes sense, but not, of course, in the snowy plover's protected breeding area. Off-leash dogs have never made sense to me on the east beach- -a serious dog-toddler encounter waiting to happen, usually due to the dog's admittedly delightful exuberance. The two just don't belong together on that beach. Moreover, once the dogs are given unleashed freedom on the east beach, they are much more likely at low tide to go under the foot bridge over the lagoon's outlet into the Bay and chase the many birds that feed and spend time there. Behavior I have seen a number of times. The calls of the owner are to no avail.

In letters to the Chron, those opposed to the proposed regulations frequently say that dog walkers "should" have their canines under voice control. Bicyclists should not ride on the sidewalk, cell-phone users should not use their devices when they are driving, and so on. We are not talking here about shoulds. We are talking about what in fact happens. In the last decade, on the west Crissy Field beach, I have twice been confronted by hostile dogs, ears back, neck hair bristling, a snarl forming on their lips. Luckily one owner came to get her dogs, without a single word of apology or concern. She had that reputation on the beach, as did her dogs. The other also came to get her dog and apologized, a rarity in my experience, dog owners almost always blaming the frightened person and not their dogs in such unpleasant encounters.

It is a rare dog owner who sees his or her dog as a canine whose bite can injure someone, especially a child. Their dogs are members of the family, almost as prized as a child. Their reactions to the proposed new regulations reflect that distorted, but understandable, view of their canines.

Keep unleashed dogs off East Crissy Field Beach.

**Correspondence:** I am in favor of new rules in GGNRA for increasing protection for wildlife. Though personally dog-friendly, and though I agree that dogs need space to run and enjoy themselves, I absolutely do not believe that they should be allowed off leash in every park or open space.

There must be a reasonable compromise, in which dogs get their space to frolic without chasing or otherwise harassing the increasingly beleaguered wildlife of the Bay Area. This is not even to mention the many human beings who don't particularly like dogs, and don't at all like being sniffed by them or jumped on by them.

Of course, stronger wildlife protection measures will also require serious enforcement. Even the rules currently in effect are rarely enforced, and many dog owners behave as though any restriction on their animals is an unacceptable violation of their personal freedom.

By all means designate areas in which dogs can run off leash; but please also designate and ENFORCE areas where dogs must be either leashed or even prohibited.

Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Deborah Deegan

**Correspondence:** To Whom it May Concern:

I am a dog lover. And I am also a lover of wildlife. There is no reason at all that both cannot be accommodated in National Parks. But there needs to be separation. Dogs can be hazardous to wildlife and vice versa. Please make sure there are separate, fenced places for dogs off leash. Why should it be necessary for dogs to have the full run of the entire Park? Let's find ways that dogs and wildlife can co-habitat the area without harm to either. And please take a balanced approach to accommodating those who love each or both.

Respectfully,

Barbara A. Coe, Ph.D.

**Correspondence:** As longtime residents of Marin County, I and my family have spent a lot of time on GGNRA land. It is a place where we can enjoy the beauty and quiet of nature. We are also avid birders and conservationists. Although we own dogs, we do not take our dogs walking on GGNRA land because we do not want to frighten the birds or other wildlife. Our walks in GGNRA have often been sullied by dogs running around off-leash, dogs approaching us in a way that is overly friendly (I do not want to be jumped on or aggressively sniffed by any dogs, but especially not strange dogs), their owners yelling to them, and the countless piles of dog poop that dog owners don't bother to pick up, or the plastic bags of dog poop that dog owners leave by the side of the trail.

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs. Off-leash areas should be marked off with fencing or natural borders such as bushes.

I am in support of park officials need enforcing the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

Dr. Alexandra Matthews

**Correspondence:** There are no off leash areas in San Mateo county so We really enjoy going to Fort Funston and Crissy Field. We have been going there for years and am very sad that most of the land will be taken away for off leash dog walking. We have 2 very active dogs that require running space. When you limit the areas there will be very close encounters with people and dogs that probably will cause many confrontations and problems. Our exercise will also be limited which doesn't help our well being. We respect the wild life and have not crossed the fences put up at Fort Funston. The majority of people who walk there are dog owners and we wish we could keep the space for our dogs and ourselves so we can all stay mentally and physically healthy.

Thank you for your consideration.

Mr. and Mrs. Sylvia Samuolis

**Correspondence:** I love the GGNRA and I also love dogs. However, I feel that preservation of the GGNRA should be the greater priority over the convenience or preference of dog owners. The GGNRA should be kept in as pristine condition as possible. Dog owners have choices. The flora and fauna do not. The dogs seem pretty happy as long as they are playing outside. The birds and other animal residents are not happy when they are harassed. The native grasses and other plant life do not need more stress in their environment. I also understand that permitting dogs under the current regime was intended to be a test only and not become the status quo. I don't think the opposition to the dog management plan acknowledges the import of that.

I urge you to implement the proposed management plan, with the addition of fencing for off-leash areas.

(Note, my mailing address is different from my residential address.)

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Katie Harbaugh

**Affiliation:****Received:** Feb,13,2014 00:29:13**Correspondence Type:** Web Form**Correspondence:** I am both a devoted bird lover and a dog lover. I belong to the Golden Gate Audubon Society as well as being a long-time dog owner.

My view is that federal officials managing the Golden Gate National Recreation Area should take a balanced approach to various human uses in the park. This certainly means protecting certain critical areas where endangered bird species are known to breed. For example fencing off the beach along Crissy Field where the Snowy Plovers nest to protect these birds from off-leash dogs is good park management. However it would naive to believe that keeping dogs out will allow the Plovers to thrive. Predation from natural predators like raccoons and certain raptors as well as climatic factors may destroy this habitat for Plovers despite our best efforts. It's still the right thing to do.

But what is good for portions of the Crissy Field beach front is not necessarily good for the GGNRA generally. Fencing off areas should always be a last resort. Specific and compelling reasons are required before deciding to close areas to recreation. The beach front, dunes and cliffs within the recreation areas are human habitats treasured by picnickers, bathers, beach combers, surfers, dog walkers, hanger glider enthusiasts, birders etc. It is fundamental to remember that the GGNRA is a place where people go to recreate. It's public space that belongs to all of us. So in all cases err on the side of open space, not fenced in zones. This means continuing to provide dog owners plenty of places where their pets can be off leash. But of course off-leash dogs must always be under voice control of their owners. Dogs that do not obey voice commands to their owners should not be off their leashes anywhere in the the GGNRA or for that matter any place outside their owner's domicile.

I am confident that decisions regarding the uses of the GGNRA will be made to maximize sustainable human enjoyment of this priceless place. Remember it is first and foremost a human habitat.

Historically, Fort Funston has been off-leash for decades; I see it none the worse for wear than lack of basic care by park authorities and people themselves.

Park negligence has let sand pile up on many of the asphalt paths for the past year, and fences fall into disrepair.

Lack of supervision on people by park authorities has led to their being careless with this wonderful park resource.

I've seen children climbing on and hacking away at the sand cliffs, with no parental control.

I've seen people without dogs climbing down the cliffs to the beach, off trail, and becoming stranded in the process.

I visit Fort Funston often with my dog; I have NEVER seen dogs fight one another or bother people.

Better fencing and supervision would keep people and dogs out of sensitive habitat.

---

Though I don't visit other dog off-leash areas south or north of SF, I am against plans to completely ignore decades of off-leash area precedent in those areas.  
These are historically recreation areas adjacent to dense urban centers; they are not wildernesses. They are resources for the populace, and should be maintained and supervised for broad usage, just as urban facilities are.

Thank you.

**Correspondence:** I spend as much time as I possibly can at GGNRA locations Crissy Field, Presidio and the Marin Headlands. I love being able to see a huge variety of birds, and even sometimes wildlife (not as much now as 10 years ago). The GGNRA is their home and it is our responsibility and particularly yours, to be stewards of their home. That requires protecting them from the intrusion of domestic pets, e.g. dogs. I have watched people allow their dogs to chase egrets from the lagoon and when I mention, kindly, that dogs aren't supposed to be there, they just say, "Oh, the birds will be back." Or when someone is running their dog off leash in the plover protected area just south of the Warming Hut, they have no concept or consideration that their dog is threatening the existence of the plovers. They pay No attention to signs. I love dogs. But they need to be kept away from wildlife areas. Period.

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs. Off-leash areas should be marked off with fencing or natural borders such as bushes.

**Correspondence:** I don't currently have a dog in my household - because my landlord won't allow it. But I love dogs and the joy they bring. Personally, I see Fort Funston as one of the happiest places to go in the bay area because of the off-leash dogs frolicking in an open safe space. My cheeks hurt from smiling after a stroll in that area watching all of the pups having a wonder-full time. I'm an avid hiker and love meeting dogs and their companions on trail. The fact that there are so few trails or open/park spaces where dogs are welcomed is a huge issue to me. I believe most dog guardians are extremely conscientious

---

and respectful and that dogs should be allowed almost anywhere humans are. Please do not ban dogs from our treasured public lands and spaces.

**Correspondence:** Because of the frequency with which I see unleashed dogs in the the Golden Gate National Recreation Area, I believe that the National Park Service needs to adopt stronger, more effective dog management policies for this area.

I am a frequent visitor to the GGNRA, both on foot and by kayak. I am vocal in insisting that fellow kayakers avoid disturbing birds and other marine organisms along the shoreline and I expect dog-owners to have the same respect for our natural resources. It pains me to see dogs running off leash after flocks of shorebirds, some of which are in the process of migrating from arctic Canada or Alaska to the southern cone of South America. Being chased by dogs depletes the energy reserves of these birds engaged in one of the most spectacular behaviors we can observe on our planet.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

Off-leash areas should be demarcated with fencing or natural borders such as bushes.

Park officials need the resources to enforce the dog rules more vigorously.

The GGNRA's proposed dog management plan is an important step toward balanced, sustainable use of the park. **Correspondence:**  
Dear Superintendent Dean,

I regularly walk with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is ridiculously restrictive and

---

will prevent me and my dog, Mario, from recreating on GGNRA properties as we have for the past 35 years for our health and wellbeing.

The new plan was definitely not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan.

THIS IS KEY: In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. This simply put looks like a major land grab of the Federal Government from my perspective.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be first recognized and viewed with validity by the GGNRA and then formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

I also oppose the Preferred Alternative because it is also ridiculously restrictive. There is no justification in the dog management plan for major changes. It doesn't appear that the GGNRA has truly done it's homework in regards to it's impact studies. Or the findings are inconclusive and the GGNRA is withholding the true findings to further it's own agenda.

I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. Particularly in San Mateo where it has been revealed that the GGNRA has taken all of the land away from any off leash purposes.

We pay taxes, lots of taxes in the Bay Area and to have this happen is disgusting. I am sure that if you put the taxes that dog owners pay towards open spaces that there would be more than enough money to cover any costs. The GGNRA's actions are mean spirited and biased against dog owners or maybe just dogs. I oppose fences to surround or delineate any off-leash area in the GGNRA. The fences have created a hostile environment for dogs as there is simply not enough room for them. The territorial factor impacts the freedom of movement for dogs that are not territorial. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions. And this last sentence is the most ignorant offensive piece of law enforcement I have seen in ages. The Federal Government is taking most all GGNRA properties and closing it off to tax paying dog owners because it deems not enough people are complying with leash restrictions. That is what is wrong with your agency.

I want to respect you but it appears that you have allowed yourself to become a puppet instead of a law enforcement officer. And at the last meeting with Rep. Jackie Speier, I felt like you really blew us off with lip service as to you doing your homework in regards to off leash land in San Mateo. It appears that you are simply waiting for retirement instead of protecting and serving the public in your current capacity.

Sincerely and Respectfully Submitted,

Joan House

**Correspondence:** I strongly oppose the plan! As a frequent Crissy Field and East Beach user with my beloved furry companion, restricting our use would negatively impact the quality of our life. There are insufficient off-leash areas for dogs in San Francisco. Packs of professional dog walkers already make fenced in areas too crowded. Fenced in areas at a national park will destroy the whole ambiance of a natural park for all to enjoy. Keep the pet policy as is!!!

**Correspondence:** I have lived in San Francisco since 1975. The parts of the GGNRA that are in and around San Francisco are unique in that they are part of an urban landscape. Rules that make complete sense in a wilderness area do not compute in a city. I walk my dog at Ocean Beach and I follow the rules. She is off-leash and under voice control only North of Gate 21. Ocean Beach is very convenient for me. Not so for people who live in the Marina, or North Beach or even the South Western Sunset District. For them Crissy Field or Fort Funston are the convenient places to go. The rules in place there are fine and should be enforced. Further restrictions should not be made. If they are, the impact on the remaining off leash areas will be huge and more than any of them can handle. The off leash areas in the city parks are few and far between and also very small. Dogs need to run. Even the smallest need exercise that is not restricted by a leash. Do not change the status quo!

**Correspondence:** I enjoy the GGNRA as a liocal gem. As a walker and grandoarent, i want to be able to explore the area without concern for loose dogs that can run after me or my small grandkids. I am a long time dog owner and recognize the need to exercise dogs but for the safety of public visitors and nature, dogs need to be exercised in enclosed areas. My dogs if loose would routinely chase any birds or waterfowl on the ground, it is in their wiring. We are losing our local birds as a result of encroaching in their habitats. Loose digs further threaten the survival of indigenous and migrating birds.

I oppose the GGNRA Draft Dog Management Plan

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Parts of the Golden Gate National Recreational Area I visit with my dog: Fort Funston, Crissy Field, Storm Grove, Golden Gate Parks

**Correspondence:** The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.  
We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

**Correspondence:** I oppose the GGNRA Draft Dog Management Plan

I love my dog and I vote.

I oppose the GGNRA Draft Dog Management Plan

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.  
Parts of the Golden Gate National Recreational Area I visit with my dog: Fort Funston, Crissy Field, Marin Headlands

**Correspondence:** Please do not close these wonderful parks to dogs. This will create tremendous over use of the neighborhood parks. If you have never seen dogs playing at any of these venues you need to spend a few minutes doing so. These are the happiest dogs on the planet. Not to mention some pretty happy dog owners watching them at play.

**Correspondence:** The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

---

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs. Off-leash areas should be marked off with fencing or natural borders such as bushes.

Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

THERE ARE FEW PLACES TO STEP LIGHTLY INTO NATURE. OFF-LEASH DOGS DISTURB THIS.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

---

I regularly take my dog to the GGNRA with which my house shares a border. I treasure that I can walk outside of my house with my dog and hike the headlands daily, including the Miwok trail, the coastal trail and oak wood valley. During my time on the trail in the last month I have taken note of the number of people hiking with their dogs and those without. 85% o people encountered were pleasurably walking with their dogs and enjoying the great outdoors with their pets. The GGNRA is a treasure to us all and we implore you not to take away this valuable resource we all so greatly appreciate.

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

---

**Correspondence:** I am a life long dog aficionado and have owned dogs throughout my adult life, but I also love wilderness and wild things, and I therefore support the proposed restrictions on free ranging dogs in the GGNRA. I love to walk with my dog off leash, but I know from personal experience how hard it is to control a dog by voice when it is excited by another dog, or, worse, bird or animal. I have watched my own dog chase birds along the shoreline while I ran after it, calling to no effect. I have watched other dog owners let their dogs chase birds without making any effort at all to stop them. The bay is a tremendous resource for migratory birds and year round residents birds. These birds suffer enough already from threats to their environment and even very existence. Dogs, on the other hand, are doing just fine in the Bay Area, thanks to their human support. Dogs and their humans have ample opportunity in the Bay Area to enjoy leashed and off leashed adventures outside the GGNRA. However, the birds' habitat is increasingly restricted.

Thus, this decision really is a no-brainer: the wilderness and wildlife protection values decisively overwhelm the value of giving dogs more off leash opportunity. Please adopt the proposed off leash dog restrictions for the GGNRA.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Parts of the Golden Gate National Recreational Area I visit with my dog: Fort Funston, Crissy Field,  
Marin Headlands, Muir Beach

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Julia Smith

**Correspondence:** I am a dog owner, but I do not feel that either I or my dog will suffer if off-leash dog areas are restricted. People who own dogs in an urban area should accept that most of the time, their dogs should be leashed. And if we are also trying to accommodate wildlife in this urban area, clearly the "rights" of dogs and their owners should give way to the well-being of wildlife. Dogs do not need a huge area to run in. Ohlone Park in Berkeley is probably about an acre, and there is room for many dogs to romp and play. If dogs owners don't want to keep their dogs leashed most of the time, they should either move to the country or not have a dog. This is the reality if we want to protect wildlife, which I do.

I strongly feel that we need to be more protective of our environment. It is the responsible thing to do. It is what supports us. AND it is no secret at this point in time just how interconnected everything is! Yes, there are many responsible dog owners and there are many who are not. I have walked many trails where dogs are off lease doing what dogs do...run, chase, dig etc.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs. Off-leash areas should be marked off with fencing or natural borders such as bushes. Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

---

Please don't ban off leash dogs from the bay areas most beautiful sites. Letting my puppies frolic at muir beach & Chrissy field brings joy to everyone around. Don't take this away. I'm sure we can find a compromise for the snowy plovers. I also do not see why dogs are banned from many trails and the beach at Tennessee valley. Please open more trails and beaches to on leash dogs and keep the few we have off leash. Thank you.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA-specifically Crissy Field, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from walking with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. Having grown up in San Francisco, I have seen the Presidio, and Crissy Field in particular, transform into what is truly a jewel in the crown for San Francisco. Being able to walk my dog off leas there where he is safe and can run free is my favorite part of the week.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. In addition, when I walk with Riley and his pals, we see many respectful and careful dog owners enjoying the beach and fields, which would otherwise be empty. The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Elizabeth Mills (and Riley)

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Sincerely,  
G. Starck

<b>Correspondence:</b>	Dear Superintendent Dean,				

One of the things I love about living in SF is the freedom I have walking my dogs in appropriate places - - it's one of my hobbies and great pleasures in life. My 2 dogs are well-trained and enjoy their time off-leash as much as I do. Today, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me

from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. Think about if you restricted all dogs to the same places how unhealthy that would be for them - - all caged up together.

The discouraging part of all this is that the "new" plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area - - again one of the things that makes living in SF so desirable. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Winn Ellis

<b>Correspondence:</b>	There are as many dogs as kids in this area. Those dogs bring joy, love, comfort, therapy, community, tolerance, and health benefits to hundreds of thousands of people.				

To take away the spaces they can romp and roam in with their families is bad planning, bad public policy, bad for families, etc.

You will see a HUGE drop in usage in those areas. It is not going to be something where suddenly people will show up because dogs are not around. It will be empty land.

Please please please reconsider and think about all the living beings that use the land. They are families.

Triston

<b>Correspondence:</b>	GGNRA Leadership Team,				

I have lived in the Bay Area for going on 14 years and have always had a dog (or two) as part of my family. I lived in San Francisco from 2000 to 2003 and have lived in Marin ever since. For all of these years, my family and I have regularly enjoyed walking, running and playing in the spectacular GGNRA and Mt. Tamalpais open space. We are happy, healthy residents thanks to our ability to routinely get out

into the fresh air and inspiring natural beauty of our mountains, beaches and parks.

I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent our family from reasonable and critically important healthy recreation with our dogs.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Please act wisely and with compassion,

Beth Gumm

<b>Correspondence:</b>	As a dog owner I regret the need to reduce access to trails and beaches. However, I think that the plan is timely and necessary to protect the natural resources in the area. Too often out-of-control dogs are allowed to chase birds, rabbits and other wildlife in a National Park. While recreating is a part of the park, harassing natural resources is not. Despite vocal opposition to the preferred plan, especially in areas like Ocean Beach there needs to be some compromise to ensure space for threatened and endangered species. Without which, I fear that all dog access for all areas will come from the courts. I really like to take my dog out, but the preferred plan does provide a few areas for dog recreation. I realize it will be unpopular to implement the plan but I urge you move forward with restricting dog access.

**Correspondence:** Please reconsider leaving some public lands open for dogs to be off leash. It's a shame that some owners do not clean up after their dogs, which affects the rest of the responsible dog owners.

Where we walk, there is a garbage can at both ends of the trail and garbage bags to pick up poop. This is near the Mill Valley dog park and the Oak Valley trail near Tennessee Valley. If there could be rules for picking up after our dogs, that would be better than taking all off leash privileges away.

Thank you!

I oppose the idea of severely restricting dog access within the GGNRA. Citizens who own dogs need an off leash area where our pets can run free and get a bit of exercise.

I do support ticketing irresponsible dog owners who allow their dogs to roam into areas of habitat restoration or nesting birds. These few bad apples do not represent the vast majority of dog owners who respect nature and posted restrictions.

Thank you,

daniel Cox

**Correspondence:** Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA, deserves the same grade as its designation- F!. I support Alternative A, the No Action Alternative.

I take my super nice, big, friendly, life-saving dog to Rodeo Beach, Fort Baker, Stinson Beach, and Ocean Beach. And please consider San Mateo beachgoers as well. Plan F would eliminate all off-leash GGNRA space there.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

Where is the evidence that these additional restrictions will provide a public benefit? By benefit, I don't mean more cash from writing tickets to fund dog police.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Thank you,

Peck Comstock

**Correspondence:** I'm tired of not being able to go anywhere in the GGNRA without dogs running everywhere. Enough's enough. Fort Funston in particular has become a de facto dog park with nary a leash in sight.

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs. Off-leash areas should be marked off with fencing or natural borders such as bushes. Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

**Correspondence:** To Whom it May Concern:

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative. If you must regulate dogs on Muir Beach, do so only at high volume times, not the vast majority of the time when the beach is practically empty. If you must require leashed dogs on Homestead Ridge, adjust the trails to include trails completing the loop into the off-leash-allowed Homestead Valley Land Trust trails that begin at Amaranth at the West end and the fork before Waterview Drive in the East.

I am not a dog owner, but a Mill Valley native, and frolicking dogs have always been a part of Muir

Beach. Dogs off leash have always been a part of the Oakwood loop and the Homestead Valley ridge. When I hike, I welcome the chance to greet the dogs I meet on my way. When I walk on the beach, the freedom of dogs running and greeting other dogs is an integral part of the wild and wonderful beach experience. In 50 years of hiking the GGNRA hills, I have never had a bad encounter with an off leash dog. In this time, river otters have returned to Redwood Creek and Rodeo Lagoon even with dogs off leash near by. People, not their dogs, are the pivotal element in preserving habitat through their advocacy and behavior. These people are the ones who fought to preserve this open space. Their good will and commitment to the land is enhanced by their use of it and many of them have or love dogs as an extension of their love of nature. And we believe that dogs must be able to run free.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Please, please do not turn our natural surroundings into a museum with nature behind walls of rules and regulations. Instead, leave it as a living testament to the commitment of this community to conservation and a dynamic relationship between people and nature.

Thank you,  
Marabeth Grahame

<b>Correspondence:</b>	I have lived in SF for 13 years. My husband and I are avid urban hikers. I am not an expert on natural environments and can only speak from personal experience. And, I really I want to emphasize that I am not a dog hater; I love seeing them run and play off leash. The thing is, there are so many dogs in the city; with so many wonderful dog owners bringing their pups out for exercise it seems to me that the natural environment is unable to cope. I drove past Fort Funston for several years before I finally made it there for a hike. I was so saddened by the experience I have never been back. This wonderful sandy ocean-side natural environment was so overused that it smelt strongly of dog urine, and it was a breezy day. How is the possible? I have had this experience in sections of the Presidio as well. And, in regards to the safety of plant and animal (including the hiking human) I believe that many people consider that themselves in control of their dog, but with so many dogs off leash - if every dog is only badly behaved once per visit the impact is be huge. A misguided dog stumbles upon a nesting area, runs up to a fearful walker, or digs up a young plant trying to grow. I live on the Panhandle and I hear dog owners everyday say, "oh, I'm sorry, he usually listens better," as that dog aggressively approaches another dog, or runs at a child, or digs a hole in pursuit of a real or imagined gofer. I desperately want dogs to have a safe place to run free, it is a quality of life issue for the animals of this city. Environmental management is key. As citizens of this planet we must have some foresight and consider the implications of our actions and the impact of our pets, who we must not forget are foreign creatures to the Bay Area natural environment.

**Correspondence:** Good Morning-

I live in San Francisco, work in San Mateo, am a responsible dog owner and registered voter. I take my dog to most of the GGNRA locations for exercise/activity -as do my dog walkers. Please hear my voice.

\*I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

In addition:

\*The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

\* The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on

vegetation and soils.

Kind Regards-Stephanie

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Bill Binenstock

**Correspondence:** My name is Monica, I live in Cow Hollow, and frequent Crissy fields and Ocean beach monthly with my family's black lab. When my family dog is staying with me I bring him to walk off leash at these beaches as I have a tiny backyard and my dog loves playing ball in the water. When it's just me I go for walk on these beaches as I love seeing all the dogs running and playing off leash. I vehemently oppose the Preferred Alternative as it is far too restrictive. There is no justification in the dog management plan for major changes. Furthermore, the plan acknowledges there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375). A supplemental environmental impact statement needs to be based on science, not anecdote made by NPS staff. Fences that will surround the areas will be an eye sore and greatly detract from the natural beauty of these beaches and parks. This is a horrible plan that does not represent our community.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Please adopt Alternative A, the No Action Alternative.

I regularly take my dog to trails in Marin County, especially those in my Homestead Valley neighborhood.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I love my dog and I vote.  
I oppose the GGNRA Draft Dog Management Plan  
I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.  
I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.  
The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.  
Parts of the Golden Gate National Recreational Area I visit with my dog: Marin Headlands

**Correspondence:** Dear Superintendent Dean,

I walk almost 3 times a week with my dog, Bodie, and her pals at either Chrissy Field or Baker Beach. This is an opportunity for both of us to meet and socialize with friends and get some much exercise. This ritual provides a healthy mindset for the rest of the day and week.

I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Susie Lee

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to (put your preferred GGNRA trails and beaches here).

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** As a person who has run and biked on GGNRA lands for decades, I want to support the very sensible GGNRA plan for dog management. Time and time again, I see dogs off leash in places where they are supposed to be on leash. I have learned that "under voice control" is a fictional state. I have seen plastic bags of dog poop scattered along trails. I have encountered dog owners who aggressively insist on their rights to break the rules. A friend of mine broke his hip after an off-leash dog ran in front of his bicycle on the Railroad Grade. The dog owners ran off.

Dog owners are organized and very vocal; they also vote. I hope you will ignore the Marin Supervisors' request to water down your plan- they are listening to the dog owners' organizations and not to the unorganized hikers, runners and bikers who prefer to enjoy nature without being bothered by ill-behaved dogs and their undisciplined owners.

Please stick to your guns, GGNRA, and thousands of us human beings will be grateful- to say nothing of the birds and animals that will live on without being chased and hounded.

**Correspondence:** The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

Off-leash areas should be marked off with fencing or natural borders such as bushes, and Park officials

---

need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

---

**Correspondence:** I endorse the Draft Dog Management Plan/Supplemental Environmental Impact Statement.

The 1979 GGNRA dog policy was an experiment supported by the park's Advisory Commission and allowed by our first superintendent. It had no official status in Washington and was in contravention of NPS policies which requires that dogs be kept on leash in any national parks where they are allowed.

This dog experiment worked from 1979 until the early 1990s. The population of the Bay Area was 4.5 - 5 million people, the coastal park lands formerly under Army jurisdiction were being discovered by the public, and there were far fewer dogs in the Bay Area. But problems grew as the population grew to 7 million, as Army fences came down and trails were made so the park lands became more accessible, and as many more dogs visited the park.

The GGNRA's enabling legislation states that the park administration is charged with preservation of the GGNRA lands for public use and enjoyment, Preservation of the natural, historic, scenic, and recreational values of these lands and their recreational and educational opportunities are each and all important. This park serves several million national and international visitors annually as well as local visitors. The visitors come for many reasons including sightseeing at the Golden Gate, hiking, bird watching, nature study, school classes, quiet contemplation, playing with children, picnicking-- and for many more reasons. Dog owners are only one group of the millions of visitors to the GGNRA lands.

Usually habitat and wildlife of the land to be included in a national park are analyzed before a park is authorized. This did not happen at the GGNRA because its creation was politically urgent. Only after the park became a reality were most species and their habitat identified, and that took several years. Endangered species were located-- 38 of them -- more than in almost any other national park. Habitat requiring protection for these species was identified and where needed was restored. It was the disappearance of rabbits and birds from Fort Funston that caused the public and the park's rangers and administrators to recognize that it would be necessary to further regulate dogs.

It became evident in some parts of the park that dog owners did not respect the rehabilitation that was being done. I saw dog owners at Fort Funston deliberately toss balls for their dogs into newly planted areas marked for protection. On Crissy Field many dog owners did not keep their dogs under voice control and had conflicts with visitors and other dogs. My young grandson did not like dogs jumping on him, and the dog owners were not apologetic about it-- it was the dog's right to do so; what was wrong with us? Crissy Field is one of the sites in the park where there are many visitors from other countries, and many of these visitors do not expect and are afraid of encounters with dogs.

There also have been conflicts of dogs with horses in several places. There also have been many serious incidents annually requiring U.S. Park Police intervention or ranger rescue of dogs and sometimes owners from cliffs and other dangerous places.

The GGNRA is a national park in an urban area and has high visitation. The recreation of dogs and their owners has to be managed and restricted to allow for the enjoyment of all park visitors. All national parks are administered under the same rules, no matter what their title, but an exception has been called for here. The Special Rule that the park has devised for these lands is intended to meet some of the traditional needs of one group of park users. It cannot meet all of their desires. The Special Rule has had extensive public process. The park's administration has worked with the public for 13 years to craft regulations for dog owners that will give them opportunities not granted elsewhere in the National Park System.

The freedom to walk dogs along some trails on leash and to play with them off leash in defined areas of the GGNRA is not an entitlement. It is a special privilege. The dog-loving public needs to collaborate and

cooperate with the National Park Service to make the privileges of this Special Rule work well for all visitors to the GGNRA.

<b>Correspondence:</b>	Dear NPS,				

This is to comment against the proposed further restrictions on walking dogs off leash within the GGNRA. There are already too few areas within the GGNRA in which dogs can be walked off leash. Off leash walking is necessary to the health of the dogs and their human companions who live in the Bay Area. If off leash walking within the GGNRA is further restricted as proposed, it is less likely that dogs will be able to run free. As a result, they may become anxious, stressed and aggressive while on leash. This is not good for the human community. Further, the majority of dog owners are responsible, law abiding, tax paying citizens who should be able to enjoy the public lands which they help to support freely with their beloved pets.

Thank you for your consideration,

Ellie Roman

**Correspondence:** I oppose the GGNRA Draft Dog Management Plan

I love my dog and I vote.

I oppose the GGNRA Draft Dog Management Plan

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it

deems that not enough people are complying with the leash restrictions.

Parts of the Golden Gate National Recreational Area I visit with my dog: Fort Funston, Crissy Field, Marin Headlands

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach, Rodeo Beach Loop and on Alta Trail.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Thank you for your consideration.  
Erika Larson, Sausalito

The test of courage comes when we are in the minority. The test of tolerance comes when we are in the majority.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County, Marin and San Francisco County, and on new lands that the GGNRA acquires in the future.

As a professional dog trainer in San Francisco, I am keenly aware of the behavioral effects on dogs who aren't getting enough off-leash exercise. The preferred alternative will result in significant behavioral impacts on countless dogs in San Francisco who will be confined to dog parks, many of which are already over crowded. This means the preferred alternative will result in SIGNIFICANT ENVIRONMENTAL IMPACTS to SF Bay Area parks, increased noise and congestion, and dramatic negative impacts on the quality of life of dogs, their human guardians, as well as humans who don't own dogs.

There is no sound environmental or other reason for what amounts to an effective ban on off-leash dogs and their humans in GGNRA lands.

Please do not approve the Preferred Alternative.

---

Sincerely,  
Lisa Manolius

**Correspondence:** I am writing to express my opposition to the Golden Gate National Recreation Area draft dog management plan.

I am a person who often visits our national parks, as a holder of an annual pass. I understand the purpose of dog restrictions in many of our wonderful national parks like Yosemite and Yellowstone.

But I strongly oppose such restrictions in the GGNRA. As a Recreation Area, it is an essential place for city dwellers looking to escape the confines of the city. The areas under the GGNRA are easily accessible and fun. They are for people to use. I understand the need to protect the environment, but there are so many places in the Bay Area for that purpose. We need to maintain the areas that allow San Franciscans to relax, have fun, and just be!

I am also concerned that the GGNRA's shifts in policies (and attitude) could curtail other recreational activities that city dwellers need in the future.

San Francisco originally transferred these lands to the GGNRA under the condition "So long as said real property is reserved and used for recreation or park purposes." The GGNRA has a recreation mandate, which includes people's ability to exercise off-leash with their dogs.

The GGNRA is lovely, but let's not lose sight of its purpose - - it is a recreation area for an urban area. These trails and beaches have been designated as "dog friendly" since the original policy in 1979. They should remain this way.

Thank you,

Maggie Biroscak

**Correspondence:** I live in Belvedere, California. I have been visiting GGNRA lands, specifically Crissy Field, Oakwood Valley Fire Road and Trail, Muir Beach, and Stinson Beach, for the past nineteen years. I exercise there with my dog off leash and under voice control both for my own health as well as the health of my pet. I oppose the preferred alternative for these areas because it is too restrictive. There is no justification in the 2013 SEIS for major changes in any of the 22 areas affected. In fact, the SEIS did not adequately consider comments made to the DEIS by responsible dog guardians last time around.

The GGNRA has lost sight of its purpose: it was set up to be a recreation area for a densely populated, urban area, not a national park. The GGNRA was built and designed for dog walking from its inception, to better the quality of life of San Francisco metropolitan residents by making dog walking a well-established priority. In fact, Congressional reports at the time referred to dog walking specifically as one of the uses for the space when the GGNRA was created.

the 2013 SEIS was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the DEIS released in 2011, opposing the proposals in that plan by a margin of 3:1.

The SEIS document admits there are few scientific, peer-reviewed studies that show how these areas are affected by the presence of dogs (e.g., on vegetation and soils, p. 375), and instead cites anecdotal observations made by National Park Service staff. However, such anecdotal claims have no validity and cannot be used to set policy. I would ask the GGNRA to conduct the necessary site-specific peer-reviewed studies (as required by law) before making any changes to the uses of our recreational land.

An independent analysis of the DEIS comments showed that the vast majority (at least 3: 1) supported dog walking. This is not reflected in the SEIS.

I oppose the Preferred Alternative because it is too restrictive- -there is no justification in the SEIS for major changes. I support formalization of the 1979 Pet Policy as well as off-leash access on new lands that the GGNRA acquires in the future. And, I urge the GGNRA to take a balanced, fact-based approach to its environmental analysis that will result in the preservation of dog walking recreation in the GGNRA for generations to come.

**Correspondence:** 02/11/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it appears absurdly restrictive. The manner in which the study was conducted was clearly biased and skewed against dog owners. Dog owners have a right to enjoy GGNR with their pets in a responsible manner. Simply restricting our access is not acceptable for any tax-paying resident of the Bay Area. Our pets need a place to run free off leash--it's imperative for their health. Also, at a time when the country is facing a public health (obesity) crisis, our government entities should not be erecting barriers that make exercise less accessible.

Remember, dog owners are among the most ardent environmentalists I know. They care deeply about GGNRA. Let's find a better solution than simply banning us from the crown jewels of the SF Bay Area--please.

---

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Denise Donald

**Correspondence:** 02/11/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...I have 2 dogs rescued from San Francisco shelters (used to have 3), and 2 children ages 3 and 5. We own our home in San Francisco. We walk the dogs at Pine Lake, Fort Funston, Golden Gate Park, Golden Gate Heights park and other areas in San Francisco. We depend on large off-leash areas to exercise our dogs. Between my wife and I, we spend at least 2 hours each day walking our dogs. Dog walking is essential to our quality of life in San Francisco. We both moved to San Francisco in 1992 and have lived here continuously except for 2 years when we lived in Petaluma. The single most important reason for our return to San Francisco from Petaluma was the lack of off-leash dog walking areas in Petaluma and the availability of off-leash dog walking areas in San Francisco. In fact, while we lived in Petaluma, we would drive to San Francisco at least twice a week to walk the dogs at Fort Funston or other off-leash areas in San Francisco because there was no place to do this in Sonoma or Marin. San

---

Francisco is a unique place for walking dogs. We appreciate this and do our best to be good.

**Correspondence:** 02/12/14. I oppose GGNRA Draft Dog Management Plan because it is just too restrictive. GGNRA is happily used by people and dogs, daily and in many, many areas. The fences will hinder wildlife and create problems in many lovely, half wild areas.

Why didnt SEIS list the many com ments from regular citizens who walk there? I walk several places in the GGNRA, and have for years, with my dog & kids, and have never had a negative encounter with any people, with or without dogs. People, dogs and recreation are all peacefully co-existing. It is a beautiful thing and that the SEIS report didnt tell that story is ABSURD!

From looking the lopsided reporting, why make major changes? Formalize he 1979 Pet Policy PLUS off-leash access in San Mateo County & on new lands that the GGNRA acquires?

Before people walked their dogs regularly at Fort Funston, the area was populated by hoodlums & drug dealers. People were afraid to use that park. Now it is used, as recreation, for thousands of people.

If you lived in this area, YOU would be walking your dog at Crissy Field, Muir Beach or Fort Funston. Dont pass a law you can not enforce and people will hate.

**Correspondence:** 02/12/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is based off no actual damage caused by dogs and at its core, ignores the integrated culture of dogs and dog owners in our com munity. Based on their dismissal of dog owners voice, the SEIS should not be given power to "use its judgement" over fence and leash laws - as we all know where that could lead us, based on their unwillingness to work with dogs, dog owners, and dog walkers.

**Correspondence:** 02/12/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because we are in great need of open space for our dogs and all the dog owners.

This is what makes living in San Francisco so special, the beautiful open space available to explore with our family and friends. Our dog's are part of our family. They deserve fun, time to run, open space to feel free and happy.

Please don't take this away from them Or us as owners. The best part of my days is going to a safe off leash dog ares, breath fresh air, watch my dog have fun, interact with other dog owners.

**Correspondence:** This is a letter to the Marin Independent Journal the editor is planning to publish this week> (Week of February 9) in response to the Marin Board of Supervisors 2/11/14 resolution to GGNRA.

The Board of Supervisors is telling federal park officials the county doesn't care that GGNRA spent a decade working on the proposed Dog Management Plan.

With the Board's last minute action prior to the closing of the comment period, the directors admitted they did not take the time to properly review the proposed rule making. Nor did the Board take note of the dozens of published, peer-reviewed studies showing that domestic dogs can and do indeed impact wildlife and sensitive habitats in numerous ways.

As a special interest group, for quite some time, involved dog owners have been loudly, and in some cases obnoxiously protesting the GGNRA proposal regardless of the science and thought behind them. In developing this resolution, the motivation must be related to growing tired of listening to some of the owners of our estimated 100,000 dogs in this county whine about "their rights" to allow free roaming on federal and county parklands.

How can their resolution be taken seriously when even the title was changed at the last moment? The resolution loses its legitimacy when passed without serious consideration of the facts.

I love dogs just as much as any other owner but the Board must speak for the long-term protection wildlife first and foremost. That was largely lost in the discussion. With so many dogs in the county, we particularly need rules that address the protection of our remaining wildlife corridors.

To the Feds, please give the board resolution the appropriate weight it deserves!

**Correspondence:** 02/12/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...Whether you have a dog or not, its a joyful experience to be in the bay area with dogs off leash running free or at the parks the a leash. It allows people to feel a sense of community to the have your friends, family and dogs gather together. If you take this access away these areas especially Fort funston people will not be use/appreciated as much. All the dog owner will then go to other areas and overcrowd those parks with their dogs. Having these area for me and my dog keeps me happy, sane and rejuvenated. If a majority of the dogs in SF had to start using the sidewalks as bathroom and be on leashes walking around the block I don't think this will be an appealing city to live in. It also may create new behaviors in dogs that will have a negative effect. The dog park areas are a main reason I moved I moved to SF. Move the sewage system away from these park areas not the dogs. I think that is a better solution for the environmental impact.

**Correspondence:** Dear Golden Gate National Recreation Area,  
As a resident of Marin, I enjoy to spend time in our beautiful recreational areas. Its even better when I get to enjoy them with my trusty companion Max the Dog. I regularly take Max to Muir Beach, the Homestead/Four Corners Area, Orchard Fire Road, Pacheco Fire Road, the Rodeo Beach loop. Muir Beach is by far our favorite.

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the Golden Gate National Recreation Area. Instead, I support Alternative A, the No Action Alternative. Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park. Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.  
Thank you for your time. I truly hope you take this comment into consideration.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Lindsey Baldwin

**Correspondence:** I am a senior citizen who very much enjoys visiting all the major national parks. The Golden Gate National Recreation Area is not a national park nor was it ever supposed to be. It is a city park in a very dense population for people and their pets. This needs to be the primary emphasis of any plan for park management of the GGNRA. The proposal, as it is written, shows little evidence that this requirement has been taken seriously. I oppose the plan completely. Start over on something more reasonable!

**Correspondence:** I am in favor of the proposed new rules regarding extending areas restricting dogs to leashes - - other than designated fenced off-leash areas - - in the Golden Gate National Recreation Area.

I frequently have been disturbed to watch off leash dogs chasing birds from feeding in their natural habitats at Tennessee cove or racing after rabbits along various GGNRA trails in Southern Marin.

Moreover, on two occasions in recent years I have been with a young child who has been traumatized by being pounced on by an enthusiastic over rambunctious off-leash dog that did not respond to its owner's verbal commands - - once last summer when a child I was with was almost five and on another occasion with a child who was probably four at the time.

Thank you and best wishes,

Julie Bongers

**Correspondence:** Baker Beach, The Presidio, San Francisco

I suggest that off leash dog walking under voice control continue to be allowed on all parts of Baker Beach. If restrictions are made please consider off leash dog walking on the north or south ends of the beach where there are natural cliff boundaries and less use by humans. Another alternative I suggest would be off leash dog walking allowed weekdays or weekday mornings when there are few beach users other than people accompanied by dogs. I have attended the GGNRA dog walking open house meetings and have discussed my concerns personally with Frank Dean, General Superintendent, and other NPS staff.

I run my Border Collie off leash under voice control three days a week at Baker Beach in the Presidio in San Francisco. We live about twelve blocks away. She likes to run near and in the surf with the other groups of dogs that frequent the beach. We usually visit weekday mornings.

The preferred alternative for Baker Beach does not allow for off leash dog activity. I do not feel there is significant disturbance to flora or fauna near the surf area where the dogs prefer to run and play. NPS staff reports that I have reviewed seem to agree. There is little use of the beach by walkers (other than dog walkers), fishermen, and picnickers on week day mornings, as the weather year round at Baker Beach is usually cool and foggy. Sunny warm and clear days are rare. Typically on weekday mornings there are fifteen to twenty people maximum and often less on the entire beach and about half of the people are people accompanied by dogs.

Currently off leash dog walking under voice control is allowed on all parts of Baker Beach, as it has been for many years. It appears to me that at Baker Beach in the Presidio there is no significant impact by dogs off leash on the flora or fauna or on humans. No NPS staff reports that I have reviewed show otherwise.

**Correspondence:** Sin San Francisco gave so much land, For Funston, to the GGNR Ther should be no restrictions on dogs allowed to run free. If you are worried about damage to the endangered birds perhapl you should get rid of all the crows and ravens that eat there eggs.

Seriousley, Dogs and people can enjoy the same areas without restrictions. Dogs just like shildren and adults need space that is "free" for them to walk, rome, run in/on.

Have some consideration for those of us that do pick up after our dogs and do control them off leash. I have never seen anyone that had a dog off leash that could not control the dog. People that can't control there dogs DO keep them on a leash, as responsible dog walkers

sincerely

Ingo

I oppose the GGNRA Draft Dog Management Plan

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Parts of the Golden Gate National Recreational Area I visit with my dog: Fort Funston, Crissy Field,

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan.

It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

As you know diabetes and a host of other health issues plague our country from lack of activity. What was once a rural county of farmers has shifted to urban desk workers and our health is at stake. Just like libraries were set up to establish low-costs way of educating Americans, parks need to accommodate our health. We all know that pets lower blood pressure and balance stress, but its much more than that. We are in a position to consider the evolution of the urban environment and we need to find balance that supports healthy lifestyles.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Leslie Edelman  
Oscar and Lizzy too!

**Correspondence:** The NPS proposal is deeply flawed and it is a drastic change that will displace many thousands of users who reside in a dense urban area that offers few recreational opportunities for responsible guardians with their dogs.

The current use of these spaces constitutes an evolved best use of the areas - a traditional use that was in place when the lands of the GGNRA were given to the NPS to managed as an urban recreational parks, not pristine wilderness areas. It works; there are few issues; 99%+ isitors use responsibly; even the NPS statistics support that there is less than one dog related issue per 20,000 visitors.

Please do not take away our dogwalking areas - the citizens of SF and their dogs need and love these recreational areas and the rangers can use their time much better than enforcing offleash dog laws (because there will be offleash dogs regardless and us responsible owners may not be there to insure that all owners pick up after their animals or to pick up stray feces and litter). Thanks.

**Correspondence:** It is outrageous to even attempt to restrict dogs from these public lands.

Changes otherwise are to deny the fact that we are a pet centric society and people with dogs want to enjoy them in their natural habitat - which is not their yard or their city streets. Off leash dogs under voice control are a staple of dog and dog owner enjoyment alike.

Proponents of these changes provide no evidence whatsoever that A) these areas need any sort of further protection from dogs, or that B) changing access to dogs will have any environmental impact whatsoever. Dogs are far less invasive and destructive than people, horses and mountain bikers.

This is pure and simple environmental politics playing with our free access to the lands which we as tax payers own and pay to support. The hardcore environmentalists and preservationists do not own these lands and they are the minority on this issue - because they are wrong. They would like to ban everyone except for those who share their same belief system from all public recreation lands. The National Park Service does represent their narrow view .. they represent the majority will.

Teddy Roosevelt himself would be disgusted with this proposal the unwarranted restriction of citizens

---

free use of public lands ... and he would proclaim loudly the same from the back of his horse .... with his dog running off leash at his side!!

**Correspondence:** The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

Off-leash areas should be marked off with fencing or natural borders such as bushes.

Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

Katharine Snyder

**Correspondence:** I strongly oppose Alternative F.

Your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA is punitive. This area is NOT a wilderness area like Yellowstone or Yosemite. The GGNRA was established to provide recreational activities to local residents. That includes the ability to enjoy the tiny 1% st aside for us to enjoy with our dogs. Access for all users - including people and their dogs - was a cornerstone of the original 1979 charter.

You are discriminating against a whole segment of the population here in my area by threatening to shut the dog-friendly portions of the GGNRA. Your new regulation would be very heavy handed when you consider only 1% o the GGNRA is accessible to dog owners in the first place. We rely on having some places to go where we can enjoy our beautiful open space with our dogs.

I support Alternative A, the No Action Alternative. This is our backyard and should be managed for our benefit - 1% fr dogs and all.

Thank you for your consideration.

No balance in the "preferred" plan at all. Pure and simple anti-dog, anti-dog owner. The Park Service might prefer that dogs and their owners did not exist - - but that is not reality! Give use fair access our our public lands!

Strongly Support Alternative A: No action. Things are just fine the way they are.

**Correspondence:**

Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is

way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Carey Johnston

**Correspondence:** One of the AMAZING things about the city of SF is the dozens of well-mannered, beautiful dogs you get to see on the street every day. It's one of the things I noticed when I first moved here, and visitors always comment about how awesome that is. It's a part of our culture to have this, and companies across the Bay Area have embraced this by allowing employees to bring their dogs to work. As someone who is not a dog owner, it's something that brings me pride in where I live. It improves the experience of the city, and makes people more cohesive. People are more open to talking to dog owners and having those small interactions makes everyone's experience better!

Let's keep public spaces available for dogs, because after all, a public space is a place for people to come together and feel a part of their community.

**Correspondence:** January 31, 2014

Golden Gate National Recreation Area:

I am writing to express my concern about the proposed GGNRA Dog Management Plan. I have lived in San Francisco for 20 years and as a dog owner, have enjoyed Ocean Beach, Fort Funston, city parks and other GGNRA areas where I can have my dogs off-leash. Dog walkers I have hired NEED these areas and others (Chrissy Field, etc...) to walk the dogs that 40% of San Franciscans have!!! I am dismayed at the proposed leash-only areas. GGNRA is NOT a wilderness area. It's "recreation" area. And this includes pets! To take away what we have now would be catastrophic.

I fully oppose this new plan. Please consider the impact this will have!!

Thank you for your time.

Beth Allen  
1538 Fulton Street Apt. B

To whom it may concern,

Thank you for the opportunity to provide input regarding the Draft Dog Management Plan Supplementary Environmental Impact Statement (SEIS). Primarily we are writing to support the current and future NPS efforts to create, implement, and enforce stricter management policies regarding both leashed and off-leash dog use in our GGNRA parks. Short of fully banning offleash dogs from GGNRA areas, specifically, we support NPS Preferred Alternative (F) as it pertains to Crissy Field, Oakwood Valley, Marin Headlands Trails, and Tennessee Valley.

For years we have noticed multiple problems with dogs in many areas of the GGNRA (Crissy Field, Oakwood Valley, Tennessee Valley).

On multiple occasions we have witnessed and/or experienced the following at specific GGNRA areas:

" Children under two years of age, including our own children, being knocked down by unsupervised/unleashed running larger dogs at Crissy Field East Beach.

" Leashed/unleashed dogs in areas where dogs are prohibited, particularly Tennessee Valley Trail and Tennessee Beach.

" Bagged and un-bagged, dog waste left on the beaches, trails, sidewalks, and lawns at all of the above areas. One of the worst areas is Oakwood Valley Trail where dog owners seem to mock the rules by consistently abandoning bagged feces along the trails.

" Contrary to some popular arguments regarding the usage of the parks for needed dog recreation, many users merely bring their dogs to the parks for toileting, period. We would estimate that the usage for this purpose alone accounts for approximately 33% or more of the dog visits. Ask yourself this simple question: if this activity is inappropriate for someone's own property or yard, why is it appropriate for a public park with limited shared space?

" Incredulous, unsympathetic, or aggressive responses from dog owners or supervisors when they are politely confronted about the misbehavior of their pet.

These examples strongly indicate that public safety and health are currently at serious risk by the misuse of our parks by dogs, dog owners, and dog walkers. The general condition of our parks and continued beneficial use by people with children also is at risk. In short, the parks are being used as glorified dog

---

runs and toilets at the expense of the general public, and most particularly children.

In summary we have the following suggestions as general policy objectives:

" Segregate dog use, especially off-leash dog use, from other user activities at the parks.

" At minimum, leashes should be required where dog owners, dogs, and others share trails or recreation areas (e.g. beaches).

" Designate and segregate off-leash areas away from heavily used areas of the parks (e.g. East Beach at Crissy Field).

" Implement more aggressive public education programs, enforcement, and penalties for violators of regulations.

For all the ink, time, and money that has been wasted on this issue we have yet to see a reasonable and effective argument for why off-leash dogs should be allowed to romp freely in heavily used GGNRA lands and trails. Most arguments boil down to the assertion that as a "recreation area", pet owners should be able to "recreate" with their dogs. Under this dubious rationale I should be able to set off firecrackers within the park areas because it is one form of recreation. Of course someone's recreational preferences do not make them appropriate or right for public parks.

It is evident that dog supporters are highly organized and motivated to overwhelm the NPS officials with support for their preferred policies regardless of the mission and role of GGNRA parks or the diminished experiences of the neighbors. We hope you are astute enough to recognize this shrewd ploy and understand that democracy is not a mob rules proposition. We hope the facts and reasonable long established Federal rules that prohibit off-leash dogs in our most important parks and trails will prevail.

A role of our National parks is to provide safe, peaceful, and accessible places for human recreation. One would envision these qualities as the primary if not sole purpose of our National parks. However, this legacy is at stake. We hope the GGNRA will make some effort to restore our parks to their proper role.

Sincerely yours,

Lex Campbell

<b>Correspondence:</b>					

Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan/supplemental environmental impact statement. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Stella Virvitch

PO Box 18  
Montara CA 94037  
January 27, 2014  
Mr Frank Dean, General Superintendent  
Golden Gate National Recreation Area  
Fort Mason, Bldg 201  
San Francisco, CA 94123-0022  
Attn: SEIS (Dog Walking)

Dear Mr Dean,

Thank you for circulating the dog-walking SEIS and extending the comment period. I will be focusing my comments on Rancho Corral de Tierra near Montara and Moss Beach, but before I do, in line with the prefatory remarks of the SEIS, I would like to ask about basic assumptions and the contrast between enabling legislation and the purpose of the GGNRA.

In order to preserve for public use and enjoyment certain areas of Marin and San Francisco Counties, California, possessing outstanding natural historic, scenic, and recreational values, and in order to provide for the maintenance of needed recreational open space necessary to urban environment and planning, the Golden Gate National Recreation Area (hereinafter referred to as the "recreation area") is hereby

established. In the management of the recreation area, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall utilize the resources in a manner which will provide for recreation and educational opportunities consistent with sound principles of land use planning and management. In carrying out the provisions of this Act, the Secretary shall preserve the recreation area, as far as possible, in its natural setting, and protect it from development and uses which would destroy the scenic beauty and natural character of the area. -Public Law 92-589, 92 Congress, H.R. 16444, October 27, 1972

#### PURPOSE OF GOLDEN GATE NATIONAL RECREATION AREA

The purpose of GGNRA is to offer national park experiences to a large and diverse urban population while preserving and interpreting its outstanding natural, historic, scenic, and recreational values. - p. i  
How are GGNRA "national park experiences" consistent with enabling legislation that makes no mention of these? If instead the purpose is consistent with enabling legislation, the 1979 Pet Policy and a fair assessment of the no-project Alternative A would be more compelling than any of the action proposals considered in the SEIS, which all seem to denigrate any dog walking that deviates from strict interpretation of 36 CFR 2.15, the dog-walking regulation that applies to the various scenic destination national parks such as Yosemite, which are different from the recreation area.

If non-compliance to regulation is the problem the SEIS makes it out to be at the Rancho, what can rules look like that encourage compliance by permitting what is naturally taking place? Most controversially, what can be done to allow off-leash dog walking while keeping environmental quality? Setting aside just two acres between city streets as proposed in the most expansive Alternatives C or E doesn't seem like enough space, given that at least 30 acres are needed now, and the Rancho consists of over 4,000 acres. Unfortunately even these meager alternatives are not preferred, and are therefore not likely to be adopted.

If it is found to be impossible to normalize most of the present activities in the "Field" north of Montara near Farallone cutoff and Old San Pedro Mountain Rd, Farallone View School and Second St (multi-use, hiking with unrestricted dog walking, bicycle and equestrian access), then reasonable alternatives might be identified in the SEIS as the best way to improve compliance when implemented. One alternative location that was overlooked or rejected is the former "Hayfield" near Park Street adjoining Montara and Moss Beach parallel to Sunshine Valley Rd.

Under private ownership for a considerable period, hiking and dog walking appeared to be unrestricted in the Hayfield, similarly to the Field. POST gated the Hayfield and the connecting San Vicente Ridge Trail in two places and also bermed some of the trails in several places to prevent off-road vehicles from entering. POST also provided the public opportunities to obtain a permit for leashed dog walking into these lands, which I took advantage of.

Most citizens concerned about hiking conditions near the Field and Hayfield were likely not part of initial stages of negotiated rulemaking for the SEIS (p. 12), as the Rancho was under POST or private property at the time. Given the history of the GGNRA and the 1979 Pet Policy, it appears these fields would have been considered for off-leash dog-walking under voice control if these places were part of the GGNRA early on, as the Rancho directly encloses compact suburban neighborhoods under leash law, and as it happened, these two fields were accessible for unrestricted dog walking for decades before the federal government was fortunate enough to purchase the Rancho. Long ago, my entire family walked up to three dogs at a time off leash in both areas, as it was easier and more enjoyable, and possibilities of conflict were rare and manageable. In 2000, I took into care a terrier rescue dog, and off-leash dog walking was inadvisable in view of his protective instinct. Since he is always on leash when out, it isn't practical to take him to the Field, because conflicts easily arise between approaching off-leash dogs and the leashed dog. The Hayfield and San Vicente Trail provided a reasonable alternative, as most dogs are leashed, especially after POST managed the Rancho.

The status of the former main highway through a corner of the Rancho, Old San Pedro Mountain Road, is still significant and not considered in the SEIS. Since it is not abandoned, it is a special trail corridor even now, no matter the outcome of the SEIS. For example, during the federal government shutdown in 2013, Old San Pedro Mountain Road was still "open" as a County Park per check with County Supervisor Supervisor Horsley, despite inaccurate signage to the contrary.

The unincorporated towns of Montara and Moss Beach were mapped at the turn of the 20th century, and the Rancho was then in agricultural use. The agricultural land use started to change as McNee Ranch became a state park and more people visited the lands enclosing the towns, but as recently as 35 years ago, no trespassing was still enforced behind the barbed wire fence north of Old San Pedro Mountain Road on lands under lease to a rod and gun club. In both the Field and the Hayfield, signs of former grazing and agriculture still show. An aerial photograph from 1940 on display at the Montara Post Office in recent years shows the entire Hayfield and lower reaches of San Vicente Ridge as being mowed. Rapid ecological succession is now taking place with eucalyptus, broom and cotoneaster invasives and non-native Monterey Pine and Cypress as newcomers. Chaparral in upper reaches above both the Field and the Hayfield is advancing into trails formerly kept open by off-road vehicles. The Field seems to have recovered as viable coastal terrace prairie habitat, even hosting endangered species mentioned in the SEIS. The Hayfield, however, has not done as well, as it might be drier in summer or in some other way unable to recover natural biologic diversity as quickly as the Field.

Since upland areas of the Rancho are dense chaparral and inaccessible due to poison oak except by trail, the available area beyond the two fields for dog-walking is limited to a few trails including those extending over the Montara Mountains through a variety of lands near the Field and the furthest reaches of the San Vicente Ridge trails above the Hayfield. It seems unreasonable to bar leashed dogs from this handful of trails, as the SEIS identifies no major impacts from dog walking.

In the Field, there have been dog waste collection cans for years. Montara Dog Group volunteers have maintained six such for cans over five years. This decent effort reduces a modest impact at no cost to the public. Dog use at the Hayfield is by comparison insignificant, and considering historic disturbance in the areas suitable for dog walking, any impact from dog waste could be considered to be negligible. Both areas have a full complement of wildlife, including mountain lions and coyotes, which are both a hazard to the neighborhoods they surround. This suggests dog access in the Field and the Hayfield would actually be beneficial to the community by making a peaceful stand against wildlife intrusion penetrating the greenbelt into the streets and properties of vulnerable citizens whose taxes are contributing to financing the greenbelt. Also, the two fields become an attractive nuisance if substantially declared off limits. Vegetation near trails is impacted as much if not more by maintenance than dog incidents. For example, routine mowing along trails, creeks and fence lines may hurt bunch grasses more than all dog incidents. Perspective of impacts of dog walking in comparison to hiking, horseback riding and bicycling impacts seems to be missing in the SEIS, nor is there perspective offered on dog wastes in comparison to the wastes left behind by trail horses or wildlife.

Significant Hayfield areas could be found to be appropriate for off-leash dog walking in tradeoff for closing the Field to this in case of finding environmental sensitivity. Also, the San Vicente Ridge areas have potential to be an important on-leash dog-walking recreational area with magnificent views of Montara and Moss Beach surrounded on three sides by the ocean and many of the various Montara Mountain peaks. The Hayfield is disturbed and has extremely sturdy non-native annual grasses rather than native perennial bunch grasses, and the lower reaches of San Vicente Ridge are being given over to invasive species unless more neighborhood decent support can be found to control them and visitation is welcomed. The Hayfield offers the possibility of an expansive 8-acre off-leash dog walking range that might raise fewer environmental concerns than the Field, and could be a reasonable Alternative C or E tradeoff in a revised final SEIS that elevates these alternatives to "preferred."

Sincerely,

Christopher Church

Dear Superintendent,

For years I have been walking in the GGNRA. I actually attended classes given by Ida Geary on the Presidio before it was the GGNRA. I have always hoped that there would be a Management Plan for dog walking. I am in support of the Dog Management Plan and hope the plan adopted will adhere to the NPS management policies and practices protecting park resources and providing a quality experience for visitors to the GGNRA.

However, I don't feel that it is appropriate to allow commercial dog walking on National Park Lands.

Best Wishes,

Jean Conner

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to Muir Beach.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

<b>Correspondence:</b>	Table 9 "Summary of Visitor use" is a joke! A fabrication with no provided supporting evidence. Most of the "data" in it is based on is subjective and collected by observers with an observational bias. This is the worse, most bias piece of so-called science I have ever seen.				

---

It is pointless even discussing the details because it is all so far off base. I challenge any UNBIASED observer to station themselves at any of these areas and conclude the the dog use is "low" or "low to moderate". NO WAY! Low to Moderate at Rancho Corral de Tierra??? Who are you trying to fool? Practically everyone there has one or two dogs!

Any report based on what is in Table 9 is JUNK. Please go and spend MY tax dollars doing some real science, then I might take your recommendations seriously. Do nothing until then!

Thank-You, A. Taxpayer with A. Dog

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Dear Superintendent Dean,				

I walk regularly with my dog in the GGNRA and I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan/supplemental environmental impact statement. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

I live 4 blocks from Ocean Beach and walk my dog there, on and off leash, almost every day of the year. While I understand the GGNRA's concerns about wildlife, in order to truly protect wildlife in an urban area, you would have to greatly restrict people, in addition to dogs, which none of the alternatives proposes to do. Ocean Beach is very much an urban beach. It is used by all kinds of people for all kinds of reasons. While walking my dog I have seen (and usually picked up and disposed of) the following: used diapers, syringes and other used medical waste, drug paraphernalia, used condoms, tires, furniture, clothes, mattresses, aluminum cans, dead birds, human excrement, and all kinds of leftover food waste.

No one would ever mistake this beach for a pristine wilderness area. Even if dogs were restricted to the extent proposed in alternative F, there is no signage or attempt to restrict people from the beach's dunes which area a critical habitat for wildlife. Most people have no idea what purpose the dunes serve as they are trampling over them and increasing erosion. There is a network of wildcat trails through these dune that GGNRA has never attempted to revegetate and even on the rare 3 days a year that there might be a park ranger out giving citations and yelling at people who have off leash dogs, I have never seen them approach people up in the dunes.

And speaking of enforcement, the GGNRA cannot even enforce the status quo (alternative A) with their current staff. People frequently walk their dogs off leash on Ocean Beach on all parts of the beach and at all times of the year. There is no way that the GGRNA will have the resources to enforce alternative F at Ocean Beach, or anywhere else in the GGNRA, so people will just continue to do whatever they want.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. Making a drastic change to dog policy in the GGNRA based on such scant evidence will leave the GGNRA open to all kinds of expensive lawsuits that will waste

taxpayer dollars.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas throughout the GGNRA's current lands and on new lands that the GGNRA acquires in the future, in addition to enforcement for dogs and people that would actually improve habitat for wildlife.

Sincerely,  
Maeve Clancy

Thank you for notifying me via postcard for the extended comment period to 2-18-14.

I would simply wish that all dogs be on a leash at all times, I have been chased by dogs, in GGP many times. Dogs are on a leash all the time in Central Park in N.Y.C. it is the only reasonable method to control dogs, be they docile or otherwise. I tried having our dogs under voice control, I even took obedience classes, it did not work. People overall think their dogs should be able to run free, if an owner has a fenced in back yard, and the dog can not get out, fine with me, Golden Gate Park is not someone's private back yard, it is everybody's. Thank you for your time.

Sincerely,  
Clark Gardner

RE: GGNRA Dog Management Plan  
Dear Mr. Dean:

I would like to submit a comment about the GGNRA Dog Management Plan. My comment is, it is pointless to make a comment since you clearly are ignoring all past comments of 2011, which I diligently and painstakingly researched. In a letter to me, Nancy Pelosi asked me to trust the process. Unfortunately, after reading your non-response to the comments previously made, I cannot. You don't really care what

we citizens of the Bay Area think or need, do you? So why should we waste our breath and precious ink commenting, when you are going to do what you planned to all along. Bottom line, I reject the entire Dog Management Plan, the concept of a Dog Management Plan, and suggest the only answer is for you to give all the land back to the cities and counties they are in. Give back Alcatraz too, while you're at it. What we really need is a GGNRA Management Plan if the thousands of taxpayer dollars you spent on this fiasco is any indication. You should focus your attention on Yellowstone and Yosemite, true wildernesses where a tazerred errant bear might be more appropriate than a tazerred hiking citizen exercising his beloved canine companions. Trust? I think not,  
Sincerely,  
Susan L. Adams

#### OVERVIEW:

Like most of politics, the challenge here is to make concessions to all parties (wildlife and wildlife-watchers included), educate and inform the public on new rules, and enforce the standards of accountability for those who fail to comply. I believe this begins to address these complicated challenges with creative, effective solutions.

#### THE PROBLEM:

I believe the problem is very simple. There are a few irresponsible, careless dog owners who are ruining the privilege to travel in parks and city streets. These people are taking advantage of the fact it is difficult to enforce trail laws and too easy to be lazy and play dumb. Why? Because there is a lack of motivation to comply.

#### THE SOLUTION:

So what's the best motivation? The consequence of money loss, the pain of public embarrassment and the of free time or freedom. My solution is to create a GGNRA Canine Use fee system for allowing dogs in the GGNRA. This will be an annual admission fee for dog owners to bring their four-legged companions. At the time of purchase, dog owners would be informed of the rules and sign an agreement. These would be purchased at designated GGNRA facilities. (To avoid misinformation, I would avoid online and privatized (pet store) sales.) The date of admission is would always begin on the first day of the year, January 1st and end on Dec. 31st. Fees would not be pro-rated by date of purchase. The fees would help pay for program administration, trail enforcement, signage and public education, complimentary bag kiosks on designated trails, trash pick up and disposal, etc.

#### RULES and CONSEQUENCES:

Dogs would be allowed on-leash in some non-sensitive, wildlife-lacking designated trails. Dogs would be allowed off-leash along some low foot-traffic, non-sensitive trails and part of Muir Beach. Where dogs are allowed, dog owners would be required to carry a waste bag with them at all times or receive \$100 fine. Dog owners would be required to pick up their canine waste. Dog owner failing to retrieve canine waste within 5 minutes of deposit, would face a \$1000 litter citation, mandatory court appearance and 100 hours of trail litter clean up. Upon secondary violations, the community service cleanup time and fine would double. If the court allows, 50 hours of litter clean up time could be

substituted for each \$500 of fine.

**LONG TERM:**

There are many inherent challenges with any process of making rules for the general public. However, the most common failure is to ultimately 'do it right the first time' (or do it over tomorrow). I believe the reason why this tends to happen so often the administrator the majority of public opinions and solutions are motivated by self-interest and pre-tested for long-term effectiveness, functionality, and hack-ability.

The GGNRA Canine Fee, I proposed, I believe is a positive step toward closing the many loop holes of the current public access model through a self-funded program that is effective and fair for all concerned parties, including the wildlife.

Thank you for your consideration!

As a long time San Francisco resident with heavy usage of the GGNRA I strongly favor Alternative D, the "Most Protective of Resources and Visitor Safety".

The park is valuable natural resource whose primary mandate should be to provide protection to natural resources and be available for Park visitors to enjoy without fear of non-leashed and uncontrolled dogs. The GGNRA should be a protected natural resource and not utilized for commercial dog walking activities which disturb the sensitive flora and fauna.

<b>Correspondence:</b>	Dear Superintendent Dean,				

â– I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

â– I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

â– The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Mike Jordan

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Ellen Soulis

**Correspondence:**

I am not a dog owner but I appreciate the importance of dogs in our lives. I have seldom seen a dog that was a problem. Most are appreciated by the people in the dog's vicinity.

Almost without exception California dog owners are very careful to be aware of their surroundings and prevent any negative situations from arising. In my experience dog poop is almost always cleaned up by the owner.

I am at a loss to understand why there is such a movement to ban dogs from beaches and trails.

Sincerely,  
Bruce Smith

**Correspondence:** This is a national park, not a city park. As in so many other cases, the government of San Francisco acts in an irresponsible manner in providing areas within the city for dog owners to exercise and enjoy each other.

GGNRA is a National Park, not a city park and is subject to the rules and regulations of a National Park. I fully support the GGNRA's staff in selecting a proper alternative Dog Management Plan. The citizens of San Francisco should be grateful that we have this beautiful National Park on our door step, and not treat it as a dumping ground for San Francisco's unmet obligations.

I truly do not understand the desire to keep dogs away from recreational areas. Most owners are very conscientious and thoughtful about their pet's interactions with others enjoying the great out doors. I seldom see evidence of dog poop and almost never see irresponsible behavior by dog owners.

I am not a pet owner but I think it is very strange to want to keep pet owners and their pets from enjoying our public lands. I should underline PUBLIC because pet owners pay taxes to support these recreational areas too and should be free to enjoy them with their children and Pets.

Sincerely,  
Bruce Smith

â€ I SUPPORT the National Park Service efforts to regulate recreational dog walking within the Golden Gate National Recreation Area.

â€ I urge the National Park Service to adopt a Dog Management Plan that adheres to all established NPS management policies and practices, protects park resources, and will provide the opportunity of a quality National Park experience for all visitors.

â€ Commercial dog walking is not an appropriate activity for National Park lands. Use of the GGNRA by the commercial dog walking industry constitutes an exploitation of park lands strictly for private financial gain. Commercial dog walking will provide no service or benefit to any park users, will adversely impact park resources and values, and will serve only private enterprise at the expense of the American public.

**Correspondence:** Dear Madams & Sirs,

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Homestead, Muir & Rodeo Beach and some Miwok trails.

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained. These dogs are our family members who join us & protect us on our hikes & runs. I am always responsible for any dropping and always tidy up after her. Please keep the access open for all our loved ones, including the dogs.

Kindly,  
Lisa Haugen

**Correspondence:** The Golden Gate National Recreation Area is a true gem in the Bay Area - I personally value it for walking, bicycling and observing nature, especially birds. Others value it for those pursuits, as well as many more highly varied forms of recreation. While the GGNRA in San Francisco is a valuable resource for human recreation, we also have an important responsibility to protect the wildlife in it, for we are their only voices. The GGNRA is big enough to have room for all of it.

To do that, the current dog management policies in the GGNRA should be strengthened, in order to better balance the needs of wildlife with the desires of dog owners. The current proposed rules are a great start in that direction.

Two points with respect to the proposed rules:

- -- The proposed rules should be modified to require that off-leash areas be marked off with fencing, bushes or other natural borders. Otherwise, it is hard for dog owners to know what is permitted where, and violations are likely.
- -- The dog management rules need to be better enforced. I have seen little enforcement in San Francisco to date. Without enforcement, the rules have much, much less meaning.

These proposed rules, with these modifications, add significant protection for wildlife and persons who just don't want to interact with off-leash dogs. Dogs and their owners are still served by over 21 miles of trails and beaches. The new rules, with these modifications, really would move us toward the GGNRA being available to all, whatever their preferred form of recreation, to balancing the needs of wildlife with those of humans.

Thank you for considering my comments.

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose your plan to make park areas off leash. Not only do I often take my dog, Cody, to Chrissy Field to swim and play at the beach, but I firmly believe that the positive, friendly, welcoming environment of many San Francisco beaches and recreation areas would be ruined if this dog management plan were to pass. Furthermore, dogs outnumber children in San Francisco! Clearly this city is devoted to its puppy population, and this is certainly not the right place for a plan like yours. Thank you for your consideration of my proposal.

Sincerely,  
Kate Gilbert

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dogs to Alta Trail, Miwok Trail, the Coastal Trail and the Oakwood Valley Trail. They come immediately when called and I always pick up after them, they are more interested in playing with balls than investigating or interfering with wild life. There will be nowhere left for dogs and owners to enjoy off leash walking and this is an unjust and prohibitive action.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. **Correspondence:** I would like to argue for maximum protections for wildlife when setting regulations for dogs in the GGNRA. In my opinion, dog parks should accommodate dogs off leash, and in areas such as the GGNRA where wildlife is abundant, dogs should be on leash if there at all. Creating regulations that tolerate off leash dogs in wildlife areas is simply accepting impacts of dog use throughout the area - as all cannot be controlled. The NPS is tasked with preserving this important resource, I hope the Dog Management Plan will do so responsibly. Let's ask our cities and towns to provide adequate, fenced, dog parks, and not attempt to lobby the National Park Service to do so.

**Correspondence:** I hope your organization will take into account the need we have for an open space for our canine friends. My husband and I take trips to Crissy Field for the purpose of socializing our dog, we have done this for our last two dogs and what a difference it makes. Dogs are permitted to interact with people, other dogs, bicycles, skateboards and the joy of playing in the water. There is no other place quite like it. The dogs that are running free are friendly, their owners clean up after them and it is a Disneyland for dogs. Our society has become so over cautious that we ignore the needs of our canine friends. More consideration is given to the treatment of animals in our zoos. The animals in zoos aren't expected to be social animals but we certainly expect our canine friends to be social and friendly. How do we accomplish this when they are constantly on leash when we take them out of their home. Small doggy parks are not helpful, too many dogs in small enclosures. Our rescue dog was extremely fearful of people and because we have been bringing her to Crissy Field she has improved immensely. She can't wait to get out of the car when we get to the park, she manages herself very well and has a great time running and playing with the other dogs. Please keep the park as it is, the park is truly a park for all, we love it.  
Patricia Lima

**Correspondence:** Dear Superintendent Dean,  
I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.  
I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.  
The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

---

Sincerely,  
Allison Greenlee

**Correspondence:**  
Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA and has walked there for over 30 years, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely

Jim Obrien

**Correspondence:** I am not writing about this proposal as a concerned dog owner - I am sure that plenty of opinion will be expressed from that perspective. I am however, writing as a concerned taxpayer. My opinion is that a review has not been properly conducted in a thorough and independent fashion in order to evaluate the economic effects of the proposal.

In short - STOP wasting my tax payments on this silliness unless your proposal includes a clear cost-benefit analysis that takes into consideration the economic effects of staffing, enforcement, and revenue generation. Do you have a plan for monitoring for compliance? How many employees will this include,

and what will their salary be? What percentage of violations do you think will be noted, and what percentage of fines will actually be collected? On what basis do you make your estimates. Etc.

I hope that you take a very close look at the process by which any rule proposal or adoption is put forth. Please keep in mind that YOU WORK FOR ME. You are a public servant. You issue and enforce rules at MY direction, not the other way around. And I don't want my tax money wasted like this when you can't even properly enforce existing leash and poop rules. Please provide a revenue statement showing how much money in leash and litter violations you have historically collected versus the cost of your administration and employees so that I might respectfully consider a change of opinion. In the meantime, please be aware that you have been put on notice legally that your rule adoption process is being called into question. If the process is defective or is shown otherwise to be lacking in substance, validity, or clear economic viability then you cannot reasonably expect folks to comply. And you should expect court action (further contrary to the wishes of taxpayers).

Are we clear now? I certainly hope I do not need to consider hiring new employees.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to Oakwood Valley Trail, Rhubarb Trail, Miwok trails from Tennessee Valley to Muir Beach. We've never had an incident. Never with another dog. and never with any person. In fact, I regularly take my family to these trails, sometimes even without the dog. We've never had any problem with any other dog on the trails. We have found the trails to delightful with the occasional dog present. Other dog owners have been exceptionally responsible and exceptionally kind. Losing access to these trails would be devastating. Frankly, these trails were part of the reason we purchased our home in Marin. Being unable to take our family pet with us on these excursions is ridiculous and disappointing.

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** It's a tough sell to say that this bill will decrease environmental impact, when dog owners are by and large the segment of the population that cares for the environment. This is, of course, my opinion and I don't have hard facts to back it up, but I feel pretty confident that it is true. Moreover, this plan will result in a drastic overcrowding of the remaining off-leash areas, significantly harming them in a way that it is sure to overpower any benefits to the restricted areas.

Trust people to be responsible and care for the areas we love to share with our pets instead of trampling on our freedoms.

<b>Correspondence:</b>	Public Comment On Draft Dog Management Plan/SEIS				

Dear NPS,

A detailed and enforced dog management plan is needed for the benefit of all users of the parks, and to better provide for the protection of the health and safety of children, families, and people using, playing, and enjoying the parks.

1. The plan needs separated park areas completely free of pets, pet urination and dog waste remains, to provide for the safe and healthy enjoyment of the beaches and park areas.
2. The plan should be reasonable to provide for pet-friendly areas for dog owners to walk and let off leash in responsible and controlled manners. Those identified beach and field areas and access routes need to be properly posted for the enjoyment of pet owners and professional dog walkers.
3. The plan and rules must be enforced vigorously to be effective.

You have a primary responsibility to create a plan that provides for a healthy and safe environment for people and to protect areas of importance for nature and habitat preservation.

Please consider and address the following specific items and elements related to the creation of a Dog Management Plan for the parks in general, and Crissy Field specifically.

#### Require Pets On Leash - No Voice Control Option

There is no such thing as complete voice control of animals. Unless you have a clear and verifiable definition of what constitutes complete and 100% oice control of a pet by a dog owner or walker. This is ambiguous and unenforceable. This should not be an acceptable method for walking dogs along the public paths. I regularly see dogs walking well behind or out of visual eye sight of owners who are distracted or focused on other things. These owners are not in control of their pet. This also creates more ambiguity making enforcement difficult since technically they may be within voice range and therefore meeting a vague definition of under voice control. This unreasonable and irresponsible action by dog owners is part of the reason so much dog waste is found on public paths and grass areas and beaches. Dogs must be kept on leash, and leash in hand of the owner, in all areas other than the designated off leash areas so that owners and walkers are truly in control of their dogs and are fully responsible for their actions.

#### Provide Pet Parking

The plan needs to provide a parking area acceptable for dog owners and walkers to park their vehicles which provides reasonable access to pet acceptable areas and prevents uncontrolled animals from running immediately onto people friendly beaches and grass areas that are off limits to pets.

#### Sufficient Signage

The park must provide effective signage to give notice to rules, policies, responsibilities, enforcement and rights. Adequate signage guiding the owners to pet friendly grass areas and beaches is needed to support the policy and rules. This should include a master signage with site map, marked areas, and listing simple rules to follow to make enforcement feasible. Visual signs along path of travel clearly marking permitted areas and off limit areas through symbols and location maps. Clear location markings and allowed pet areas must be provided. Maybe even a large map with vehicle stop area to read before entering parking area. Provide clear directions for vehicles with pets and when walking animals. Make it easy for the pet owners and walkers to comply with the rules. Make it easy for the staff to enforce the rules.

#### Make Waste Disposal Convenient For Pet Owners

Modify the existing placement layout of trash cans so that there are at least three beach side trash cans for easy disposal of waste bags by owners while the pet is still able to be off leash and under owner control. This should aid buy in by the group for properly disposing the waste bags while being able to enjoy the animal walk uninterrupted. This eliminates any excuses for owners or walkers temporarily placing dog waste bags down and leaving them to pollute the environment. This removes further ambiguity of pet owners actions and makes enforcement easier for the staff.

#### Enforce Dog Waste Disposal Rules

Fines and penalties must be large enough to be an effective deterrent to unacceptable actions that are deemed counter to our park environment and the publics safety and health. This is the only way to change peoples poor choices and attitudes.

#### Enforcement Policy

The policies must be vigorously enforced; otherwise this initiative is doomed to fail. Must make it clear how enforced. The only way to effectively enforce issued citations is to have the rules state that by using the park, dog owners accept the rules and responsibilities, and enforcement procedures. Appropriate staff must be provided and tasked to enforce these rules at all times. Either existing staff or new dedicated staff needs to be hired to patrol and enforce these areas. Enforcement fines should be easily enough to cover the associated personnel expenses.

#### Empower Enforcement Staff

Sufficient and appropriate technologies and equipment must be provided to the staff tasked to monitor activity of park users and pets, enforce policies, document violations along with violating pets and persons, and handle any necessary evidence collecting procedures required.

#### Dog Waste Disposal Enforcement Procedures

For effective citation policies and preserving individual legal rights, the park needs to provide an enforceable objection procedure. Some rule and methodology that will only require the collection, documentation and preservation of evidence for those citations where an election to contest is selected at time of issuance. This will protect both the issuing staff members and pet owners. A policy where the citation recipients need to elect at the time of citation issuance to either accept or contest their penalty and fine. This allows the citation issuing member to collect at the time of the violation the appropriate specimens for later testing and pet identification if it is going to be contested. The burden of the cost for contesting this type of citation must be placed on those who attempt to contest their citations and lose. Pet owners must have the right to object, but this objection must be made at the time of issuance to allow reasonable evidence collection and dog identification procedures to take place. This allows the reasonable protection of individual rights while allowing the park to protect itself with the ability to collect evidence and samples to prove their case. The policy needs to provide that if a violator contests their citation, then if the dog they were in control of and responsible for is proven to be the source of the violation, then the fine is increased to a number that covers the fully loaded cost to the park for enforcing the park rules. Fully loaded with administration, legal, handling, testing, etc. costs. So there is a real risk to not paying

the standard citation fine and attempt to unjustly win in court. If an citation recipient is found not guilty, then great, and then the park will need to determine why this citation was not found enforceable.

#### For A Healthy And Safe Future

Thank you for taking action to reduce the risks to children and families playing in the sand of our beaches and on the grassy fields in our parks. Make their health and safety your number one objective, and let it guide your planning process as you consider everyones views. This is a potential liability risk that the public needs to address properly now, for a safe, healthy and enjoyable future for all.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I urge you to implement the proposed new dog rules, with one addition - - requiring fencing or other clear boundaries around off-leash areas.				

Fencing or boundaries such as bushes will make it easier for responsible dog owners to know where it's okay (and not okay) to have their pets off-leash. It will provide those of us without dogs a little security, knowing we won't be unexpectedly bowled over by frolicking canines.

GGNRA is a precious bit of wild nature in the midst of our urban area. It needs to be a welcoming place for all kinds of users - - not just dog owners, but families with small children, seniors, people with disabilities, joggers and bicyclists, and people who want to bird-watch, hike in peace or otherwise enjoy nature without dogs running all around.

We need to protect as much of the remaining wildlife as possible so it is there for our children to view and enjoy.

For all these reasons, I support the new, more balanced dog management policies.

I believe that most responsible dog owners understand that the GGNRA should be shared with other kinds of users. Please don't let the extreme, vocal minority who don't want ANY changes or restrictions outweigh the needs of so many other Bay Area residents.

**Correspondence:** I am a senior citizen and would very much object to have public recreation areas so heavily regulated and restrictive.  
I walk my dog at Fort Funston. I have enjoyed the opportunity to get out and let my dog play off leash with other dogs.  
I have taken my dog to Golden Gate Park dog run and have had some very serious trouble with dogs. I think it is because the dogs are fenced and can not get away from aggressive dogs.  
I never had trouble at Fort Funston. I think the vast majority of people enjoy this place, respect it and want to keep it available to owners and their dogs.

Have you ever considered the fact that if you close off these areas it will throw more pressure on our streets and parks. Making those areas, as well as our neighborhoods more crowded will impact people that are afraid of dogs.

Let us keep our recreation areas open and public.  
thank you  
j stevenson

**Correspondence:** I've been traveling from the East Bay to Ft. Funston for 18 years to have the opportunity to let my Basset Hounds run freely through the soft footing of the sand. Surprisingly, Bassets can run, FAST ! but they have huge pads and finding footing that is comfortable for them to really run and get the exercise that is so critical to keep their weight under control, I've been taking them to the beaches of SF for the off leash freedom to run and exercise. No way could I run fast enough or long enough to give them what they need to stay fit and healthy. Not to mention how well they are socialized from having this opportunity. In all the years I've visited Ft. Funston, never ever have I witnessed poor dog or dog owner behavior. They are far better behaved than most dogs we pass on our daily morning trail walks where every dog is confined to a leash, leaving them feel powerless and often anxious and defensive. Freedom is essential for a dogs health and social skills. Please do not take this beautiful opportunity away. There are plenty of beaches and ocean front cliffs for non-dog loving families to gather for their outings but VERY FEW places we can take our pooches.

**Correspondence:** Although I live in San Diego area, I have always admired how Marin County was one of the last bastions left for outdoor people and their animals. My sister lives in Mill Valley and we have many friends who avail themselves of these trails, with and without their pets. This new regulation is going to substantially change the nature of Marin County and the area that so many animal owners cherish and have for so many years. It is too sweeping a change; unfair to so many people who count on those trails and beaches for their own health and exercise and that of their pets. This new regulation would put many people on the road to the few places left, leaving them overcrowded. It would prevent countless older people from going out for a walk with their pets. It is really an unfair and sweeping regulation that will harm many people in the guise of doing public good. Marin county is a dog haven and part of its allure. Regulate what dogs and what owners must do not just ban them.  
Thank you!

**Correspondence:** I was a resident of and worked in San Francisco for 30 years and now live and work in the East Bay - but still frequent GGNRA parks.

In addition, during 23 of those years I worked in the SF Recreation and Parks Department teaching or administering environmental education programs for children and often had to try to do my work around dogs and their owners - frankly, and sadly, the two activities were not really compatible - even if there

wasn't a dog in sight. Urine and feces are damaging not just to the environment, but children are reluctant to get down on their hands and knees to explore when the area is soiled and smelly. And of course, what little wildlife there is, is scarcer and more skittish in areas where dogs are allowed - even in on-leash areas.

Thankfully, since I first began teaching in our parks dog owners as a whole have become much more responsible. Unfortunately, there are still way too many irresponsible owners who just don't care or understand the impact dogs can have in our parks - and to make matters worse, the dog population has certainly increased over the years and with it, the number of irresponsible owners. The situation is only going to get worse if the rules are not enforced.

As park professionals you know this - I truly hope you do the right thing and stand up to the tremendous amount of pressure the dog community can generate. Many people do not have the time, resources, or stomach to continue to stand up to the dog activist community - sadly, they put up with the situation or just stop using the parks as much.

I URGE the National Park Service to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

- We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.
- Off-leash areas should be marked off with fencing or natural borders such as bushes.
- Park officials need to enforce the dog rules more vigorously.

I am in full support of the GGNRA's proposed plan. It is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

Thank you,

I don't really want to, but I will remain anonymous as I know just how vindictive some people can be.

**Correspondence:** As a veterinarian and dog owner, I keenly appreciate and honor the concerns of non dog owners, those frightened by dogs, or those concerned about environmental degradation resulting from dogs. I would suggest that this is a case of a few bad apples - generally the uneducated or obstreperous dog owners who either have no knowledge of how to train/control their dogs, or those who decline to respect the rights of others. These are the owners whose dogs tend to bite me or cause chaos in my waiting room.

I don't think the many (and there are MANY and increasing numbers of dog owners in the Bay Area) should be punished for the crimes of a very few.

My proposal: Try this pilot for 6 months - cite offenders who accompany "difficult", badly behaved, or destructive dogs. Bail is very high (\$500?) and will be waived if the owner attends obedience school (just like traffic school). There's an excellent well of obedience instructors one can tap locally. Get to the bottom of the problem, rather than just kick the dogs out. It will reduce dog bites, dog fights, and abandoned dogs - on and off public property.

Respectfully submitted,

Wendy Shelton, DVM, MPH

**Correspondence:** Part of the reason we moved to Marin was for the beautiful nature we could share as a family and with our beloved dog. It would be very sad to lose the ability to let our dog run free in the few places we can, sadder still to lose so many trails where we can even take him. Marin attracts many people for the above reasons. Fairfax, in particular, where we live has a dog loving culture with mostly responsible dog owners who pick up after their dogs and watch their dogs closely. The proposal to limit dog owner's use of trails would be devastating to so many wonderful people in Fairfax and throughout Marin.

The effect of taking so many trails away from dog owners would be to greatly reduce the number of not just dogs, but people who can enjoy these trails, as people with dogs will almost never walk without taking the opportunity to take their dog out. For many of us in Marin, having a dog in our lives is a great source of happiness, not just because we love our dogs but because they get us out walking and give us the opportunity to appreciate the amazing trails we have here in Marin. Please keep Marin dog friendly. Please keep trails open for all of us to enjoy.

**Correspondence:** Dear Sir,

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Fort Funston, Crissy Fields, Rodeo Beach and have done so for over 30 years.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I urge you to please reconsider this ill advised plan,

Susan Rowan

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

**Correspondence:** Dear Superintendent Dean,

I strongly oppose the proposed new "dog management plan" for several reasons.

First off, this plan will have a huge negative impact on the city of San Francisco, which we simply can't afford.

For decades large numbers of dogs have exercised at Fort Funston and Crissy Field. If those areas are cutoff to dogs they will start relying on city parks instead. We don't have to imagine the impact on the city parks if that happens since we saw it first hand two years ago during beach closures. For example Stern Grove was over run with dogs. The parking lot was filled as were the streets surrounding the park. If ever there was foreshadowing of a problem this was it.

Second, the proposal to use fences to surround or delineate any off-leash area is ill conceived. The fences will make off-leash areas feel like prison yards and visitors using them will feel as unwelcome as they actually are.

Third, the proposal impermissibly fails to take into account the public comments from the earlier version of the plan. I had hoped the new proposed plan would be significantly different from the original GGNRA dog management plan. It is my understanding thousands of people-the overwhelming majority-submitted substantive comments in opposition to the plan. The GGNRA's failure to make significant changes, thus ignoring the needs of San Franciscans is both disappointing and frustrating.

It is no wonder so many Americans are disillusioned with our government. This is a prime example of a blatant failure to honor the obligation to represent the people.

Quite simply the new dog management plan fails to live up to the GGNRA's promises to preserve and protect recreational access to the GGNRA.

The current proposal is ill conceived. We need to make room for the plants, the animals, the people and the dogs. The GGNRA proposal fails to do that.

Very truly yours,

Shari M  
San Francisco resident

**Correspondence:** I am generally supportive of the SEIS except regarding enforcement. I am a 35-year San Francisco resident and have a small dog who is always on leash and I frequently walk at Crissy Beach. However, I have often had to avoid the Promenade when I see dogs off leash. Many dog owners are unable to control their dogs using "voice control." I am hoping for ENFORCEMENT as well as EDUCATION of all dog walkers. I have seen problems with off-leash dogs & wildlife, and with off-leash dogs & runners, and with off leash dogs and other dogs. While it may be wrong to over-generalize, pit bulls and other dogs bred for aggressive and guarding behavior are a particular concern.

Education, training, and enforcement are all required. Enforcement of "Voice control" and on-leash areas is needed. Protection of picnicens, children, and other dogs from uncontrolled dogs needs an active proactive plan. Good rules are NOT enough. Especially in the highest multi-use areas, the presence of a Park ranger or sanctioned volunteer is needed to enforce rules and to foster the desired outcome.

Crissy Field's middle beach will be especially crowded if enforcement moves dog walkers from East Beach to the permitted off-leash middle beach area. Redistribution to city parks might also occur, and education of dog owners will be even more important in the more crowded off-leash dog areas.

We need a clear enforcement management plan, modeled after the Boulder, CO, Green TAG program. Dog owners are registered and receive education. Enforcement targets problem users, not areas. Program Director in Boulder reports that program there is a success, contrary to DSEIS conclusions.

A Green Tag Program can be developed and implemented with a public private partnership and all three counties' local humane societies including their licensing programs. Such a program can address all impacts of concern, including endangered and threatened species.

Thank you for your consideration.

**Correspondence:** Hello,

I am writing to express my support and gratitude for the new restrictions on dogs proposed for the GGNRA.

As a longtime Marin resident, I have seen that almost every park, trail, and open space has been converted to a de facto dog park by irresponsible and self-righteous dog owners. I am a parent of two young children, and I cannot take my children to any of the local parks or on any of the Marin County trails because they are always full of off-leash dogs that are absolutely NOT under "voice control." The owners of these dogs are so blinded by the affection that they feel for their pets that they cannot seem to comprehend how children and their parents (or anyone other than themselves, for that matter) might see the dogs as a potential nuisance or threat. My children are understandably terrified when one strange dog after another comes bounding wildly toward them on the trails, their owners far behind and nowhere in sight. Furthermore, the grass of all of our local parks and open spaces is so befouled by dog droppings that I can't let my children play there anyway.

I am well aware that dog owners in the Bay Area have been very vocal about resisting the restrictions. But please, do not be swayed, and do not lighten the restrictions. Our parks should be maintained for natural habitat, for the native species that live there, and for human enjoyment; our parks are NOT for people to degrade with their dogs. Having some common sense rules to limit dog use in our parks is long overdue.

Thank you, and feel free to share or forward this comment if appropriate.

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,  
Shana James Chibidakis

**Correspondence:** Walking with my dogs on a beautiful trail like the Oak Trail Loop is my RECREATION!! The dogs are well behaved and under voice control. I walk daily and enjoy several areas that are being threatened, including Crissy and Alta Trail.. It would be a devastating loss to me, but even sadder is the effect on our dogs. I am a dog walker and a certified professional dog trainer and I have seen thousands of dog walking on trails for the past almost 16 years of being in business. Dogs need mental and physical exercise. Going at their own pace, sniffing, is what the dogs do on a hike. I have seen very few fights and so many happy dogs.

It is a quality of life issue for our dogs. Why should dogs have to suffer? They are animals who also deserve a place within GGNRA to just be dogs.

I am also concerned about environmental issues-My undergraduate degree is Environmental Studies.

**Correspondence:** Please do not reduce off-leash access to beaches in the Bay Area. Our densely-settled neighborhoods include a majority of homes with dogs. We and they need access to open spaces and water. Leash walks are not enough to allow dogs to run the way they've been bred to. And those of us who cannot run alongside our dogs should not be prevented from getting them appropriate exercise. There are plenty of state park and other beaches where those who prefer not to share space with dogs can go. Please preserve the precious few choices those of us with active dogs have access to. At this time of national concern about obesity and sedentary lifestyles, we should encourage activities like walking or running with one's dogs on area beaches.

**Correspondence:** I object to the proposed vast limitations on off leash use of the areas of Ocean Beach, Crissy Field, Ft. Funston and the all the San Mateo coast line.

There is no good reason for doing this. These areas have been accessible for off leach exercise of dogs AND their owners for decades at the very least and in some cases since settlement of California.

Cutting off this access in effect cuts off use by many citizens who no longer will be able to make any use of these areas since they use them primarily with their dogs. Both the people and the dogs need exercise and fresh air. Are we now so insignificant that by fiat we get excluded from these areas.

When the Federal Government took over these areas it was with the express understanding that the uses would not be limited from the historic norm.

Now a Procrustean solution is being forced on the population. In order to make these areas fit the "standard" for all other Federal parks an area that bears little in common with places like Yosemite, Yellowstone other great wilderness areas is being contorted without any rational or credible reason.

There may well be some areas that have some birds but there is not any documentation of their great jeopardy from dogs at present.

This may well fall on deaf ears. Certainly that has been the apparent response to all the vocal objections to this point. But you will have betrayed the trust of the people of this area if you proceed with this unreasonable restriction.

**Correspondence:** Dear Superintendent Dean,

I walk our dogs virtually every day in the GGNRA, and see many of the same people each morning with their dogs, while we share our trails with runners, walkers and bikers. I'm writing to express my firm opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is far too restrictive and would prevent me from enjoying the parks with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

I am extremely disappointed that the new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas that have been used for decades by responsible dog-owners like us.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future, continuing access to Fort Funston and broad access to Ocean Beach.

Sincerely,

David Mahoney

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA- -in particular Fort Funston, which is really an amazing place for dogs- -I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a

drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Lindsay

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Pilan

<b>Correspondence Type:</b>	Web Form				

**Correspondence:** I strongly oppose the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from enjoying the recreation area the way I have daily at Crissy Field's Middle Beach, Baker Beach, Ocean Beach, Fort Mason, or Fort Funston for many years. This area was designated by an act of Congress in 1972 to allow for urban recreation and open space in the greater San Francisco Bay metropolitan area - and with the continued development of this major urban area, this need for readily accessible recreation is even more important now than it was in 1972.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Like many current dog parks they will give owners who lack control of their dogs the ability to take them off leash causing much more problems for other dogs under voice command, and for visitors.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan lacks any acknowledgement of it's impact on other areas. The GGNRA plan has not adequately studied how dispersion will affect local communities, neighborhood parks, and their preferred dog recreation areas due to overcrowding. I myself do not frequent my city parks with my dog under voice command because they are too crowded, there's not enough room to exercise, and they're not at all relaxing.

This is a recreation area, not a national park like the Great Smoky Mountains, Glacier or Zion National parks. The GGNRA was built and designed for dog walking from its inception, to better the quality of life of metropolitan residents by making dog walking a well-established priority. Congressional reports referred to dog walking specifically as one of the uses for the space when the GGNRA was created.

The GGNRA has lost sight of its purpose: it was set up to be a Recreation Area for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with current off-leash areas, and on new lands that the GGNRA acquires in the future.

SEIS still describes the visitor experience as focused on people who don't want to be around dogs. This criticism was made of the DEIS too and apparently ignored. As someone who is at Crissy Field daily I can give a first hand account of what I see, and it isn't people who don't want to be around dogs, it's people who do. Countless tourists and park visitors lit up by dogs, and brought together as a community, not separate from the city the GGNRA is a part of.

Sincerely,  
David Levin

**Correspondence:** Restricting so much of the park area to off-leash play concentrates a large population of dogs in a smaller area. The Bay Area has millions of happy, healthy dogs who, like humans and wildlife, need some open space to exercise and get rid of stress. Some dogs interact joyfully, but by concentrating hundreds of dogs into a smaller area, their off-leash playtime becomes more of a "hang with the pack" event, something not all dogs are comfortable with, nor their owners.

As a park user, I know that there are times on weekends when the park gets a lot of use, for the health and welfare of the urban companion pet population. Restricting this to a fraction of the area turns the limited play time we have from a chance to exercise and release the stress from being indoors into a much more tense event for many dogs, and may even damage the parkland with its concentrated use.

**Correspondence:** I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because decreasing available space for dogs to exercise and play together off-leash is a very bad idea. I am fortunate enough to live in the East Bay where I have access to very fine off-leash dog areas. To restrict the residents of San Francisco is not a good idea. Dogs are not only man's best friend but they fulfill a critical need for many people in terms of companionship and support. But dogs need the opportunity to socialize and exercise that can only be met by access to off-leash exercise areas. Thank you for your understanding.

**Correspondence:** Dear Superintendent Dean,

I have been walking my dogs, Lass and Shimmy, and letting them swim in the ocean and bay, for more than a decade and a half. I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. The proposal will unduly restrict our beach and coastal access, and prevent the outdoor exercise that is vital to my dogs', and my own, mental and physical health.

Like so many other users of GGNRA land, I am outraged that the new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. To those of us who have regularly and consistently enjoyed these coastal areas for decades, to have our comments and concerns totally disregarded has been unconscionable!

What is more, the GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

**Correspondence:** 02/12/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...Please keep Ft. Funston an off leash, dog friendly environment. I have been a resident of San Francisco for 15 years. I own a home, work and spend most my money within the city. One of the reasons I put up with the high cost of living is access to wonderful public parks which are dog friendly. Taking this away from tax payers seems unfair and eliminates a big part of San Francisco's attraction. Please think of a way that the park can be shared by all.

**Correspondence:** 02/13/14. I want you to pass The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because. dogs and dog owners in the San Francisco Bay Area feel they have an entitlement beyond what non-dog owners have. They run dogs off leashes, frightening or killing small animals, they soil parks and trails with excrement and block passage with long leashes they often "forget" to pull in when you need to pass. I know this is a minority of dog owners but that minority is growing. I love dogs, but I don't love many of their owners. They pose as environment friendly but they are not. Worst, they often are from upper and middle class backgrounds and have the money and time to lobby politicians. I support limiting their access to established dog runs ONLY. Give me back my walking areas without dogs.

**Correspondence:** 02/13/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because this plan does not further the purported environmental or ecological goals set forth in the plan itself. The burden is on the GGNRA to demonstrate how this plan would protect our environment, and self-serving statements that claim to further these interests are insufficient to overcome that burden. This plan must be narrowly tailored and clearly identify how the goals will be achieved in order for it to pass constitutional muster, and it does not do so. The people of the State of California strongly oppose this plan and it must be rejected.

**Correspondence Type:** Web Form  
**Correspondence:** 02/13/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because the exclusion of dogs in parks doesn't make any sense. There is so much community provided by dogs; allowing everyone to cross borders and relate in authentic way. Effectively sterilizing parks will have a negative effect on both dogs and humans. Dogs are our oldest companions and we should have some compassion for them and their owners who want to keep them healthy and happy.  
thank you.

**Correspondence Type:** Web Form  
**Correspondence:** 02/13/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...

1) Oppose the Preferred A.lter.native because it is too restrictive. There is no justification in the SEIS for major changes. Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

2) Oppose fences to surround or delineate any off-leash area in the GGNRA. The SEIS Preferred A.lter.native proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and visitors using them will feel unwel com e. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

3) Oppose the Monitoring-Based Management Strategy that replaced the DEIS' Com pliance-Based Management Strategy. The MBMS is still based largely on com pliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non- com pliance, it still is primarily focused on mere com pliance with leash laws and the GGNRA can consider changing off-leash status for non- com pliance even if no impacts on resources or other visitors are reported.

**Correspondence:** 02/13/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it was not formulated with any input by the public except for special interest groups privy to access this agency. It stands to restrict 90% of the 1% that was negotiated by all stakeholders over a two-year period that was upheld by a federal court judge. If NPS felt a need to have it updated or changed, the same process needed to be activated. Public comment, overwhelmingly opposed to this plan from what I have seen, was not heeded by the agency.

**Received:** Feb,14,2014 09:54:12  
**Correspondence Type:** Web Form  
**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Lauren

**Correspondence Type:** Web Form  
**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I love bringing my dog on walks throughout the allowed areas in the GGNRA. I can't imagine the restrictions being proposed and why they are necessary? The outdoor enthusiasts of GGNRA seem to be primarily people and dogs. These restrictions will create a ghost land of the GGNRA.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

---

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** I support Alternative A, the No Action Alternative.

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA.

I am a Marin County resident and support the "No Action Alternative" in the SEIS for Muir Beach, Homestead, Oakwood Valley and the Marin Headlands. The SEIS preferred alternatives will force people with their dogs to drive in search of walking trails. This is bad for the environment and bad for Marin County.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. Marin residents rely upon this open space. I have 4 dogs and I take my dogs to Muir Beach 5 days a week.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

Marin residents rely upon this open space. It is not a wilderness area like Yellowstone or Yosemite. It requires a different management strategy than a National Park.

If the goal is to bring back wildlife then realistically you would have to close the beach completely as wildlife and people do not co-exist.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** The plan lacks any acknowledgement of it's impact on other areas. The GGNRA plan has not adequately studied how dispersion will affect local communities, neighborhood parks, and their preferred dog recreation areas due to overcrowding. I myself do not frequent my city parks with my dog under voice command because they are too crowded, there's not enough room to exercise, and they're not at all relaxing.

The GGNRA has lost sight of its purpose: it was set up to be a Recreation Area for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with current off-leash areas, and on new lands that the GGNRA acquires in the future.

**Correspondence:** I would like to voice my opinion in favor of allowing more areas of the GGNRA for use by people with dogs. This would include expanding areas where dogs are allowed both on and off leash. The present state is far too restrictive and results in a large concentration of dogs in a limited area.

After all, the GGNRA is a "Recreation Area". It is part of the Bay Area's wealth and it is to be enjoyed by all of its citizens and not for the exclusive recreation of those without pets.

Many of the negative comments come from people who have had a bad experience with a dog. Though unfortunate, negative situations will occur but are almost always covered by specific regulations that are broken by careless dog owners. To apply a blanket restriction because of a few scofflaws is inappropriate. The vast majority of dog owners are responsible. Don't let the few that are not responsible restrict our rights.

I am a Marin County resident who frequently uses of the GGNRA.

Thank you, Dixon Power

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Amy

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

Please do not create any more fences. They create a hostile environment, redolent of prisons and urban ghettos. Let's keep our open spaces open and inviting to all.

Please do not change the leash status for these areas. One of the reasons I love SF (where I work!) is how dog-friendly it is. Don't make our city less friendly for our residents, workers, and visitors.

Sincerely,

Claire Meyler

**Correspondence:** 2/14/14

dear friends and managers at GGNRA:

I am completely in support of the NPS approach to managing dogs in the GGNRA. I am an avid beach user, dog owner and supporter of wildlife in our urban settings.

While many dog owners are responsible for their pets, the effect on wildlife from unleashed dogs is undeniable. and it does not take many animals to affect the entire population of wildlife. I have observed on numerous occasions at the waterfront, the effect of just a few dogs pursuing shorebirds, forcing them to use valuable energy to escape.

there is adequate space in GGNRA to accommodate both dogs and wildlife, but that use should be defined by experts in wildlife behavior, not the biased dog owners.

I would like to compliment the NPS staff on their fair hearing of this issue, and sensitive management of the issue. I have been especially impressed with their eloquent spokesman, Howard Levitt on this issue.

Please count me in as supporting GGNRA staff on this issue.

thank you

**Correspondence:** There are so few off leash dog areas in the Bay Area. Please don't restrict access further. The vast majority of dogs and owners who use the available spots are thoughtful and responsible. Don't punish us if there are a few who are not. And since there are so many places non dog owners can go now, why is it necessary to give it all to them. Dogs enrich peoples' lives and the Bay Area. Please let us keep access to these great dog recreation areas.

**Correspondence Type:** Web Form  
**Correspondence:** Dear Superintendent Dean,

For years I have walked and ran with my dog, Ichiban on GGNRA lands, including my backyard at the base of Montara mountain, Fort Funston, and sometimes before work on Ocean Beach. I am saddened by the GGNRA's plan to restrict dogs even ban them from areas of the GGNRA. This is not good for me because I suffer from depression. I am veteran of the armed forces and find great comfort running with my dog, indeed my doctor insists that I continue to run and that my companionship with my dog is healthy and should be maintained. Not allowing me to recreate with my dog directly affects my well-being in a negative way.

I'm writing to express my adamant opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is much too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. I also find that it is obvious that the plan is based on the public opinion of the few, like organized opposition from bird watchers, and other groups, which I have supported (and will continue to support except for their mandate to restrict dogs), for years like the Audubon and the Sierra Cub, both who claim dogs negatively disturb wildlife although there has not been a study to date to support this assumption.

The new GGNRA plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. For example insisting to have dogs on leash on the steep slopes of Funston, including the southern sand stairs. This will be extremely dangerous for the feeble, the elderly and any one else who finds traversing such terrain difficult-even without being jerked around by a dog who traverses the stairway with four feet instead of two. Adding a LEASHED dog in such an environment is not only extremely dangerous, it lacks common sense, Falling down stairs as a result of being jerked from a dog on a leash is not only dangerous to the dog owner but to other people on the sand stairs. A stairway that often is overcrowded with families including small children. In addition to the direct impact to my health, the health of dogs, and the health of other people, such as injuries on the stairway, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

**Correspondence:** Thank you for the opportunity to respond to this Draft Management Plan.

I am a dog owner and frequent user and supporter of the National Parks in San Francisco. Primarily the Aquatic Park and Crissy Fields.

I keep my dog on a leash in Aquatic Park as that is the regulation, but he enjoys greatly the freedom to run in Crissy Field.

Over the past 20 years living in this city, I have noticed the increased use of Crissy Field that corresponds to the development of this once Military use area into the beautiful site that it is today. In the course of this progression, dogs numbers have also increased. I am in this area enough to see if the increase has posed a problem. I do not see a problem. Certainly some dog owners need to be reminded of dog etiquette such as cleaning up after a pet, training a pet not to jump on someone (especially children), or simply being mindful of their animal at all times. This can all be done with increased educational signage that helps to remind those few that need reminding.

Since a frequent user such as myself sees no problem - who does and what is the problem?

I would hope that you can approach this issue at a micro versus macro level and keep San Francisco the unique city that it is.

Thank you,  
Deborah Cardenas

**Correspondence:** I believe dogs should be restricted in the Golden Gate National Recreation area, as in your original plan. I hike at Tennessee Valley often and now there are always people walking their dogs on the main trail to the beach, even though it is clearly signed "no pets." I own two dogs myself and consider myself a dog lover, but many owners appear to believe that the rules don't apply to them. There are dogs parks all over Marin and plenty of hiking trails where off leash dogs are allowed so it's not as though they have no place else to take their dogs. We need to protect the GGNRA areas for the wildlife, not the dog owners.

**Correspondence:** Dear Superintendent Dean,

As an unabashed dog owner/enthusiast and San Francisco resident, I am writing to state my support of the least restrictive Dog Policy Alternatives, which, appears to be Alternative E.

My dogs depend on me for their wellbeing and I depend on the Golden Gate National Recreation Area for off-leash dog recreation, without which, I would not adequately exercise my dogs or myself.

Please consider these points:

1. City of San Francisco gave much of the parkland to the GGNRA for everyone to enjoy
2. Dogs outnumber children in San Francisco and should be given similar consideration in park usage
3. The vast majority of people and even greater percentage of dog "owners" are good, law abiding members of society
4. Policy should allow healthful recreation with minimal restriction of the masses so long as public good is not jeopardized
5. Delicate environmental and historic features should be protected from harm of all sorts
6. Altered areas are not necessarily more or less important than "natural" areas, harm from recreation seems inevitable- - just look at sites where humans have settled over the millennia
7. Looking back at the fossil records shows that PEOPLE are invasive non-natives in this area prior to the influx of "Native Americans", thus, I conclude that everything which is not as it was prior to the first explorers' sightings of the area is "altered". Are we to decide that every trace of civilization should be removed? I think that is not a reasonable path. I recommend we continue use of our parklands with respect to preservation (to a point) of both nature and historic features, though not to the degree that enjoyment of recreation is largely impaired.
8. Respect must be paid to the animals and people who wish to avoid interaction with dogs. Largely, people are best advised that there are significant places in the GGNRA where well behaved dogs are given priority for off leash exercise and fragile, native flora and fauna be cordoned off to keep everyone from disturbing them where appropriate.
9. The 1979 GGNRA Pet Policy nearly provided consideration of the above, the 2013 Alternatives A through F nearly, though not appropriately, manage these concerns. It is right to have law which allows misbehaving persons and pets to be corrected, we must not, however, make restrictions such that the way recreation is enjoyed now becomes unlawful and thus, laws ignored by the majority of visitors!

**Correspondence:** Re: Comments on GGNRA Draft Dog Management Plan

(Muir Beach Section Only)

2/14/2014

The mouth of Redwood Creek at Muir Beach is an important wildlife habitat. Not only is the creek and marsh area important for the threatened Coho Salmon and Red-Legged Frog, but many other species use the area as well.

For example, the creek mouth, front lagoon, and adjacent beach area are used as resting and refugia areas for many species of gulls and shorebirds. The refugia during onshore storms are particularly important for these species. However, pressure from off-leash dogs and their owners typically flushes gulls, herons, and other birds first thing in the morning. In addition, a family of River Otters which now resides in the creek system often feeds in the front lagoon and beach area, but not when there is pressure from dogs and people. Raccoons and Mule Deer are also common in the willows near the mouth.

In August 2013, when the beach area access was closed due to construction of the new parking lot and few persons accessed the beach, there were many days when over 200 gulls and terns were present on the beach area adjacent to the lagoon (detailed data available). This almost never occurs normally, since dogs often run into this area off leash and disperse all of the birds into the offshore area. On Stinson Beach, where dogs are not allowed, many species of gulls and shorebirds are commonly found.

For this reason, we feel that the preferred alternative, F, is not restrictive enough for wildlife protection. Personally, we would prefer no dogs allowed in the creek area at all (Alternative D). However, realizing that the dog owner stakeholders continue to insist on open pet access, I suggest that alternative E is the best choice. This alternative allows professional dog walkers and pet owners access to a large ROLA zone south of the beach access ramp, and thus addresses the desire for dog recreational opportunity at the beach. At typical tides, this area would be much larger, for example, than the Mill Valley Dog Park. Of course there is also wildlife at the south end, but I believe the creek mouth is more important overall. Alternative E prohibits all dogs north of the access ramp to the creek (or to the NPS boundary), and the enforcement criteria would be clear. Access by enforcement would be by foot across the bridge (or perhaps by horse via Kaasi Road?).

Alternative E also allows a buffer zone between dog recreation originating from visitors to the beach parking lot from the Marin County-controlled "Little Beach", which is commonly used by Muir Beach residents and their pets. So it is unlikely that this alternative would put more pressure by visitors to the area to use Little Beach for pet recreation. Walking from the parking area to Little Beach with a dog requires a long trek around the fencing, and across a private road owned by Muir Beach which could have additional restrictions placed on commercial dog walking or special signage if Muir Beach so chooses.

If alternative E is still felt to be too restrictive, at least a hybrid between alternatives E and F might work. ROLA for the south main beach, leash control for the north part up to the creek. However, this allows dog walkers easier access to Little Beach during low and moderate tides, which alternative E would not. And of course, leashed dogs flush birds also.

Impacts and benefits from E and F are pretty much the same according to the tables. Both will require a new level of management by NPS which even now does not really exist with regard to trails or access paths to the beach. There is essentially no enforcement now of the leash rules. Vehicle-based enforcement will not be adequate for any of the alternatives.

We vote for E. Give wildlife a chance.

Dave and Bonnie MacKenzie  
Muir Beach

**Correspondence:** I am a veterinarian as well as a dog owner. I strongly oppose the preferred alternative described in the GGNRA's new draft dog management plan.

I live in San Mateo county and walk with my dogs in many GGNRA parks, several times each week. I frequently encounter other folks walking with their dogs and find that responsible dog ownership is the rule. The few exceptions should not impact a Dog Management Plan any more than a few unruly and destructive children should result in a restriction for access of children (or horses or bikes) to the parks.

GGNRA represents URBAN parks with a completely different mission statement and purpose than National Parks such as Yosemite. The purpose of these parks is primarily to provide a source of outdoor recreation to the residents of the cities and counties where they exist. In most cases, this goal is not incompatible with the secondary goals of protection of wildlife and plants. All of these can coexist, with some limits. Dogs are a well-established and important contribution to the quality of life for residents in these urban areas. Most have small personal yards and providing their companion dogs with free running exercise is essential. It is also in keeping with what should be the goal of these parks. The greatly increased restrictions and limited access in the proposed Dog Management Plan would have serious negative consequences to the quality of life of the people and dogs that these parks are supposed to serve.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

**Correspondence:** I have been a dog lover all of my life, but for many years was not able to have one as I was a renter. Now that I am lucky enough to own a dog I want to give him all of the exercise he needs and deserves. I oppose the GGNRA's plan to ban dogs off leash. I have not seen any Valid studies explaining why we must take this fantastic part of enjoying our City away from so many people and dogs. Thank you,

Kathy Sabatino

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
David Hughes

**Correspondence:** I oppose the draft dog management plan because the GGNRA, by its own rules, must conduct site-specific, peer-reviewed studies as the foundation for any policy changes intended to protect the resources of the GGNRA. The GGNRA acknowledges the required studies do not exist. This renders the proposed policy changes arbitrary and capricious, and as such they are unlawful and cannot be implemented. The ORIGINAL 1979 Pet Policy should be reinstated per the 2005 Federal Court decision because all closures since then have not been based upon site specific, peer-reviewed studies as the law requires. For lands added after the drafting of the original 1979 Pet Policy, DOI policy requires historical

---

usage be maintained. Any changes would have to be justified by the requisite site-specific, peer-reviewed studies followed by a formal rulemaking process.

Sincerely,  
Jane Shepard

**Correspondence:** I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

We all deserve a healthy community in the Bay Area and that includes open space for our dogs to run and play with humans. Fenced in areas in secluded areas just create anxious, angry owners and dogs. Enjoying the open spaces in the Bay Area with our dog is one of the things we love about being here.

We pay a lot of taxes to support services for children that we don't get any use from since we don't have human children. We expect to be treated with the same respect and have rights for our dependants and that includes the freedom to enjoy the outdoors with our dog.

**Correspondence:** Dear National Park Service,

please allow dogs to continue enjoying trails and nature areas. They are cherished family members who need air and exercise. And think about health expenses reduction for all those for whom dogs provide companionship and ability to be in better mood/be less depressed. Being with dogs is therapeutic. In the end, we all benefit from having happier, healthier folks around, and from fewer psychosomatic visits to primary care doctors.

Thank you,

Natalya Golovanov

**Correspondence:** I live in San Francisco with my great dane, Hammie. I regularly take Hammie to  
Fort Funston, Ocean Beach, and Crissy Field, where she enjoys romping off leash with other dogs. By  
getting her exercise in these off-leash environments, Hammie is a management and safe pet in more urban  
environments.

I am opposed to the Preferred Alternative because it is not justified and it is too restrictive. I think adding  
fences would make the open space feel closed and would make it less attractive to dog owners. I don't  
think GGNRA should change the leash status of an area just because people are not complying with  
existing leash restrictions. Changing rules is not s solution to non-compliance.

**Correspondence:** It would seem that the plan needs to include facilitated discussions with dog owners around their compulsion to let their dogs off-leash specifically in sensitive areas that are well-signed.

These are acts of aggression that I believe can be dramatically reduced.

Case in point: I watched a woman let her 2 dogs run directly over Snowy Plover habitat at San Francisco's Ocean beach while the birds were there. When she ran back up to the board walk, I courteously asked if she was aware of the sign and the leash requirement, and how the birds were startled by the dogs. Without stopping, No, she said, didn't see the sign, and ran off.

**Correspondence:** I oppose the GGNRA's Dog Management for a number of reason:

1. I believe that it is too restrictive and that having limited off leash areas will create more problems in the designated areas and surrounding areas too- no research has been done to find out the impacts this will

---

have on other areas

2. 50% of SF households have a dog and restricting us to such a small area will not allow me to exercise and play with my dog for his health, and mine, in a way that is enjoyable for us
3. The GGNRA lands are beautiful and picturesque, but it is becoming exceedingly difficult to use and enjoy the space due to this plan, along with little public transportation, limited (pay only) and construction
4. there is not enough evidence that dogs are impacting the area in a negative way

Please reconsider your plan to accommodate the thousands of dog owners in the city who have enjoyed recreating with their pets on GGNRA land for years.

Thank you,  
Elizabeth Tausend

<b>Correspondence:</b>	Dear Superintendent Dean,				

As a longtime resident of San Francisco, tax payer, and a born-and-raised North Bay resident, I am extremely frustrated by the direction the GGNRA is taking with respect to dog policies in what are essentially public lands set aside for public recreation. Dog walking here in SF is already a challenge, with few parks and suitable areas for open play and off leash activities. Further restrictions will serve no clear public policy purpose and will only further alienate the GGNRA lands from the public they were set aside to benefit. GGNRA lands are not purely natural preserves - and I recommend the GGNRA management check the term "Recreation" in the title of the lands. They are, in part, made available to the people for their use. I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan and hope you will advocate on my behalf.

Many have joined me in holding the views I have shared with you above, and, collectively, I think we've grown to believe that our voices have not been heard. In addition, we have seen no good evidence to support the current proposed policy changes with respect to dogs on GGNRA beaches. Evidence-based policy making should be central to the stewardship goals of GGNRA and in that regard I feel the administration is failing the public. Nothing I have seen to date justifies the radical policy change that is about to take place.

I oppose the Preferred Alternative and hope you will recognize the views of the many thousands of responsible dog owners in the city and county of San Francisco.

Thank you,

John Karr

**Correspondence:** Dear National Park Service:

Please do not restrict access for dogs and their owners as outlined in Alternative F. The GGNRA is not like other national parks. It's close proximity to 7 million Bay Area residents provides much-needed opportunities for recreation for citizens in the local communities. That's why "Recreation" is in the name of the GGNRA. People only have so much time, and those of us with dogs (at least 100,000 in Marin) very much need to exercise with our dogs. We accept that our dogs are unable to access over 99% of GGNRA lands, but we strongly oppose you further restricting that access even further. That would simply put too much pressure on the few remaining lands where we can go with our dogs, including nearby county and state-held lands.

I have been hiking every week for 7 years with a group of women (and our dogs) on the Miwok trail above Tennessee Valley. In all of those years, our dogs have never injured wildlife or frightened a horse on the trail. It is a fire road, with plenty of room for all. We share it with joggers, mountain bikers and hikers quite happily. Yet we will lose access to this trail if Alternative F is adopted. Our quality of life - every week - will be adversely affected.

I have been to Yellowstone Park in the winter time, when the gate keepers had to wear gas masks because of all the hundreds of snowmobiles coming into the Park each day. I understand some of those users chase elk and other wildlife.

Yet you allow that usage in Yellowstone Park, a national treasure. Dogs have far fewer impacts in the GGNRA. Yet dog owners are an unacceptable user group?

As a woman, I am far more comfortable hiking with my dog. He makes me feel safe. And he also needs off-leash areas in which to run. Have you ever tried to play fetch with a dog on leash? It doesn't work. Having my son be able to throw a stick for our dog is as American a past-time as going to a baseball game. Please do not force us all into our cars to drive to the one area permitted in Marin under Alternative F - Rodeo Beach - in order to be able to enjoy this experience.

Public lands belong to all of us. You hold this land in trust for us and future generations. Please do not effectively deny us access by disallowing our canine companions. Please adopt instead Alternative A.

Thank you.

Anne C. Harper

**Correspondence:** As a hiker and mountain biker, I use the trails in and around Pacifica up to five times a week. Since 1999, I have had many encounters with unleashed dogs not under their owners control.

On the Old San Pedro road trail while riding uphill, I came upon three large German Shepard's - off leash and out of sight of their owners who had sat down for a break around a corner. One bit me on the hand, and one got behind me. The other was barking aggressively. I was so freaked out that I cancelled the rest of my ride and turned around. The teller at the BofA was the one who noticed I was bleeding.

On the Baquiano trail, just above the Fassler trailhead, I was attacked by two Pit Bulls - Off Leash and out of control of their handler who was holding a baby in her hands. This lady was not even from Pacifica but had heard it was a great place to let the dogs run wild off-leash. And they were her daughters dogs, which explained why this lady had absolutely No Verbal Control while the snapped and barked at me.

Baquiano trail near Sweeny Ridge - Off Leash dog and owner jogging by my girlfriend and I. He kept running by, but the dog stopped to bark and snarl. I put Sandra behind me and yelled. The Dog owner came back, grabbed his dog by the collar, then berated US! Like we wanted to get attacked!

Mori Ridge heading up towards the Nike site - two Off Leash dogs running ahead of their owners, barking and snarling aggressively at me. I have to dismount and put the bike between us.

Old San Pedro Road heading up near the three phone poles. A lady's off leash dog barks and acts aggressively. When I comment on the fact that she doesn't even have a leash with her, she responds that I don't have a helmet. I respond with helmet don't bite.

Baquinao trail halfway between Fassler and Sweeny Ridge - Girlfriend and I surrounded and menaced by

---

two large dogs Off Leash and not under verbal command.

I don't have anything against dogs per say, I object to Off Leash dogs who are aggressively and dangerously out of control.

**Correspondence:** In 12 years of running our hound at Muir Beach I have never witnessed any dog there doing any harm to the environment or wildlife.

There are so few places where our canine companions can run off leash to their heart's content, and surely Muir Beach is among the most wild and beautiful.

I urge you not to place these restrictions on dogs at Muir Beach.

I can't imagine what complaints- - if any- -have led you to devise such a proposal, but I suspect that the complaintants have not spend any time at Muir Beach.

Richard Schaper

**Correspondence:** I visit Fort Funston with my partner, our daughter and our 5 year old dog every weekend. We consider ourselves to be responsible pet owners; we keep a close eye on our dog and ensure that her activities do not have a negative impact on other users nor the environment. Her off-leash experiences at Ft. Funston have been crucial to her socialization and training. Our family have developed strong friendships with other Ft. Funston patrons and their dogs.

I am disappointed with the revised draft plan as it proposed extremely draconian restrictions on dog owners. I appreciate the plan's intent to reduce user conflicts and promote the preservation and protection of natural resources. I also agree with proposed limitations on commercial dog walkers. Nevertheless, I believe the plan overly restricts and completely eliminates off-leash access in many locations and thereby fails to support a key part of GGNRA's mission: to preserve the natural and cultural resources, and scenic and recreational values, of the park. My weekend visits to Ft. Funston are fundamental to my recreation.

The DEIS includes many unsubstantiated generalizations about the negative impact dogs have on GGNRA's natural resources. I believe there needs to be more fact-based arguments to support this hypothesis. I witness more impact from human users of Ft. Funston: small children chasing birds and littering or "boot camp" participants destroying native vegetation as they run through the park. However I realize that leashing restrictions on children and joggers are not the answer but rather improved communication and enforcement of GGNRA rules. This same reasoning should apply to owners of off-leash dogs.

I have never witnessed the types of conflicts at Ft. Funston described in the DEIS, neither dog vs. dog nor dog vs. human. This could be attributable to the time of day I visit Ft. Funston but I believe Ft. Funston's location and topography make it uniquely suitable for off-leash dogs. It is not adjacent to a major neighborhood like Crissy Field in the Marina. Also, Ft. Funston does not have Crissy Field's diverse user-base (e.g. roller-bladers, cyclists and beach-goers). Therefore, I don't believe the same draconian restrictions that have been proposed for Ocean Beach and Crissy Field should apply to Ft. Funston.

I enjoy the natural beauty of Ft. Funston but mostly appreciate the ability to walk my dog there off-leash. If the proposed leash restrictions are imposed, I would no longer visit Ft. Funston.

**Correspondence:** 99% o state and federal parks are not dog friendly and if you can bring a dog it usually can't go on trails and rules are just stay in the campsite area for canines. Taking away, downsizing and restricting the off-leash dog areas at Ocean Beach, Crissy Field, Muir Beach, Fort Funston and in Montara is a HUGE mistake. I've heard the excuses that it hurts the wildlife and that people complain about the dog's poop and behavior but WE HUMANS have done more to hurt the environment than any other animal in this world. WE created the dog and should at least give them a chance to run freely w/o fear of losing it's ground(no pun intended) with our current and past off leash dog parks/beaches.

At Fort Funston, most people who go there are dog owners and lovers. If you were to take away the rights of dog owners that are there today you'd really hurt a lot of families and dog owners. I'm sure that Fort Funston would become a desolate place with lots of shady people there and no sense of community or involvement. The mast majority of the visitors that hike down to the beach are accompanied by their dogs. I don't see hardly anyone without a dog.

Ocean Beach os a place I go to regularly with my dog and couldn't imagine not being able to go there again off leash with my dog. I've rarely seen any dog poop at all. I see more trash from others not including dog owners.

Crissy Field has been a part of San Francisco with off leash benefits for dogs for a long time. REAL San Franciscans respect that it's off leash dog friendly whether that own a dog or not. It's what makes San Francisco special and real. Don't change our culture more than it already has.

Muir Beach has been an off leash dog beach for the residents of Marin County for years. Long time residents have been all about conserving the land, environment and financially supportive of parks and recreation. Why take a simple off leash dog beach away from them after all the support in the past??

Please reconsider and do the right thing and that's leave the dogs in peace.

**Correspondence:** Folks,

I am a Tamalpais Valley homeowner and dog-lover whose property abuts the GGNRA just below the

---

Lattie Lane trailhead to Homestead Hill/Four Corners. My dog and I frequent the trail and share it with numerous dog-walkers, as well as local runners and walkers.

I support Alternative A, the "No Action Alternative", in the SEIS for each area: Muir Beach, Homestead, Oakwood Valley and the Marin Headlands. Please retain the longstanding 1979 Pet Policy.

The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011, and that comments in 2011 ran 3:1 AGAINST the plan.

The SEIS contains no peer-reviewed, site-specific studies or vital monitoring as required by law to initiate such a dramatic change to the public's use of their public lands. Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%.

The GOLDEN GATE NATIONAL RECREATION AREA was established to give outdoor RECREATIONAL opportunities to people in a densely populated urban area. It requires a different management approach than wilderness areas like Yellowstone or Yosemite.

The SEIS preferred alternatives force people in to their cars, in search of places to walk their dogs. This is bad for the environment and bad for Marin County.

Thank you for this opportunity. May sane minds prevail.

Love,  
- B

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan/supplemental environmental impact statement. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

**Correspondence:** I am saddened and frustrated to hear that the National Parks Service and San Francisco are trying to ban off-leash dog area throughout the city. We have lived in San Francisco for over 9 years and have a 5 year old dog. She was raised in the city and every day, for over 2-3 hours, is outside, socializing with the other neighborhood dogs, playing, running and burning off energy that wouldn't be possible if they weren't allowed off leash. All the dogs we socialize with are extremely well adapted and socialized. City dogs have this advantage to dogs in the suburbs because most owners don't have the option to throw them in the back yard. Because of this, city dogs are much more social and adapted to interacting with people and dogs of all types. We also go to the beach at Chrisy Field weekly. The majority of people who are at the beach are dog owners. Here dogs are able to run, swim and enjoy what not many others do, apart from the 5 nice days a year the beach is actually warm enough to warrant use by families and non-dog owners.

It will be a shame and very frustrating for San Francisco dog owners if off leash was taken away. We realize there are always the exception to the rule, and non-San Franciscan's who bring dogs into the city, but 99% of the dog owners I know are extremely respectful of the parks and beaches. We pick up after our

---

dogs, obey the rules and really just want a place for our dogs to exercise and run to burn energy that is needed to make a dog happy and healthy.

<b>Correspondence:</b>	As a former employee of the Environmental Science Center at Fort Funston and now as SFUSD teacher who brings my classes to programs at the Environmental Science Center, I strongly support plans C (1st choice), D (2nd choice), and E (last choice).
------------------------	--

I have first hand experience with rude and disrespectful dog owners and dog walkers who care more for their animals being off lease and free to go where ever they want than the young children who use/share the Fort Funston area. Although there are some dog owners who understand that not everyone loves dogs or is comfortable around them- -and they try hard to share the space, many of them could care less about sharing the area.

Also, it is usually the dog walkers who are the most rude and disrespectful of the idea of sharing the area. Many have little control over the large number of dogs that they walk, and they really don't care if the children are uneasy or scared. They are at Fort Funston to do a job and have no respect for the children or the Environmental Science Center program. And many don't even pick up after the dogs, or leave the plastic bags full of feces on the trails- -so rude and unsanitary!

Unfortunately many dog owners feel they should have free run of any part of the city, and can't or won't even try to understand that not everyone agrees with them.

I grew up with dogs and was taught by my parents to respect people who are not comfortable around dogs and to be a good ambassador on how to be around people with my dogs. It is a shame that others don't care to work together and share the more than abundant area of Fort Funston.

I hope the NPS doesn't bow to these selfish folks who want to hog everything for themselves and blame

others as dog haters. I love dogs but want my students to feel safe when they go for an overnight program at the Environmental Science Center at Fort Funston.

**Correspondence:** Superintendent Dean,

I'm writing to voice my extreme displeasure with the proposed changes to the GGNRA under the Draft Dog Management Plan. I'm a lifelong environmentalist and dog lover, nineteen year resident of San Francisco, and responsible dog owner for the last four years. I take my dog to Fort Funston once a week, and visit Crissy Field and Lands End a couple times per month. There are very few off leash areas available in San Francisco, so the threat of losing what we have makes this a very big deal. Fort Funston in particular is a very special place to city-dwellers, close enough to be accessible yet peaceful and remote-feeling. It's a place where I can jog on the beach alongside my dog without having to trip over her leash or worry that she's going to dart out into traffic. If any of the proposals "B" through "F" is enacted, dog owners will be left with but a few city parks with typically small, fenced-in dog runs - - certainly nothing like the vast stretches of beach we currently enjoy.

The history of this issue seems like a solution in search of a problem and serves as a perfect example of bureaucratic overreach. The use of a 1500 page, English-only document only underscores the NPS disconnect with the community and with reality. I've browsed the document, and the gist seems to be that GGNRA needs to have the same dog policy as other areas under NPS management. The issues cited in the "Need for Action" are cherry-picked to support the clear bias of this document. Hazardous and offensive dog waste from a handful of irresponsible dog owners? Possibly, but never mind the beach littered with horse waste and human trash, several homeless encampments, and storm water outflows that are covered top to bottom in graffiti. Dogs destroying vegetation? From all appearances the non-native eucalyptus and ice plant are doing just fine. Sound pollution from barking dogs? Maybe, if you can hear over the crashing waves, the steady stream of planes departing SFO, and the constant gunfire from The Pacific Rod and Gun Club at Lake Merced. Dogs destroying historical sights? Like the austere concrete bunkers designed to withstand an enemy attack? Dogs causing erosion? Surely, natural processes share most of the blame for the sand hillsides falling into the ocean. If my responses seem absurd, it's because the accusations made against dogs are equally ridiculous.

Our parks showcase both their natural environment and reflect the communities they serve. I wouldn't expect to find hang-gliders launching off the Washington Monument, yet at Fort Funston it's allowed (and

admired!). We accept that there are different rules for different parks, and off-leash dog walking is no different. The reality is that San Francisco has more than 800,000 people and 120,000 dogs and is in dire need of off-leash areas like those found in the GGNRA. When I visit Fort Funston, I see lots of happy dogs and their owners. I've had numerous positive encounters with dog-free families on the beach and atop the cliffs, with parents and their children often asking for permission to pet my dog. I'm sure conflicts do arise, but I've never witnessed anything serious during my visits. I urge you to use common sense and adopt option "A".

Thank You,  
Bjorn Foster

**Correspondence:** Disallowing dogs off leash would be criminal. I have been going to East Beach at Crissy Field for 3 years without a single incident or complaint (we go roughly 3 times a week). My dog is well behaved, super friendly and loves the outdoors. It is an activity that my entire family can enjoy together. Taking this away from us would take away from not just our dog but our entire family.

In addition:

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

<b>Correspondence:</b>	To Whom It May Concern,				

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative, which also happens to be supported unanimously by Marin County Supervisors, all San Francisco City Supervisors and San Francisco Mayor Ed Lee. The No Action Alternative is also supported by public opinion (as borne out in the previous comment period where people who commented opposing the plan outnumbered the others by 3 to 1).

I regularly take my dog to Tennessee Valley, Stinson Beach, Muir Beach, Rodeo Beach, Mount Tam, Fort Funston and Crissy Field.

Each and every time we visit, I clean up after my dog and other dogs. I also clean up after the countless humans who leave behind endless streams of garbage. We are often one of few people in these areas and regularly report any issues we see to the rangers or institutions like the Marin Mammal Center, something that many other dog owners also do.

There is an active campaign to paint dog advocates and owners as anti-conservation by the zealous, bullying environmental groups that you, the GGNRA and NPS partner with, and evidence to the contrary

---

demonstrates nothing could be further from the truth.

In spite of the blustering lies disseminated by people like Michael Lynes in an often shocking misinformation campaign, management of the GGNRA is NOT tilted sharply toward use by dogs and their owners. Dogs are currently banned on over 99% othe Golden Gate National Recreation Area, even though over 40% othe population owns a dog. And yet, we have been happy with 1% a have taken quite good care of it. You are more likely to be violently assaulted by another human being in the GGNRA than you are have a bad interaction with a dog.

Furthermore, there is ZERO (nil, zilch, nada) consensus in the scientific community that dogs are directly (or at all) responsible for the destruction of habitats, flora or fauna in the GGNRA. And there isn't a single independent, peer-reviewed, site-specific scientific study in existence to support the groundless claims laid out as so-called evidence for the desired regulations. BY LAW, you are required to have the above before you can enact any change. Yet, you don't and you are attempting to force through change (illegally) anyway.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park. To that point, the insidious nature of your subversive campaign to get people to refer to the national recreation area as a national park (along with the Golden Gate Audobon Society, The Golden Gate National Parks Conservancy et al) is grounds for a cease and desist, if not a lawsuit. You cannot change the status of the national recreation area by simply referring to it as something else. We are very aware of the semantic battle you're attempting to fight above and beyond the dog issue, and we're prepared to go head to head on that next if need be.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

The fact of the matter is that what you are attempting to do is underhanded, has no scientific basis, requires a legal due process (you are not following), ignores the potential impact on surrounding areas and parks, willfully ignores any and all currently available statistics that refute the weak claims peddled in the plan, ignores the feedback of the community and its representatives and serves no purpose other than to appease the few conservation ideologues who are anti-dog, plain and simple.

It's an abomination.

Soon to be a former NPS donor,  
Jessica Teas

**Affiliation:****Received:** Feb,14,2014 16:51:18**Correspondence Type:** Web Form**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan/supplemental environmental impact statement. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Adam Thomason

There is no way I can get my hound enough exercise if I have to keep him on a leash.

When he runs freely, as he can at Muir Beach, he runs so fast and long, I could never keep up!

It is essential for his health and well-being (not to mention mine ;-)

In the 14 years we have lived in Marin, and taken our dogs to Muir Beach for exercise, I have never seen any dog create problems for wildlife, nor have they run off trail as they were voice controlled by their owners. It is one place where we dog owners can take our canine companions for good, thorough exercise.

**Correspondence:** I have lived in Marin since 1974. I was 17 when I moved to this idyllic county. I have raised 7 dogs and 2 kids in my 40 years here.

I had big dogs in the 70's and smaller dogs in the 80's and 90's.

I enjoyed Muir beach and the hiking trails with all of my dogs.

However I NEVER took them out off lease ever! No matter how well they were behaved. I also cleaned up after them always.

Unfortunately the dog owners and dog walkers now In Marin show little respect for others space and desire to hike and enjoy the county free of a dog jumping up , running at speed toward you, and steeping in their poop.

I have come to not like dogs in this county, probably because of the owners.

I feel there is no way to keep allowing dogs to have access to the parks and beaches because of the level of disrespect for the rules and common manners in the past 2 decades by the owners.

There should be no dogs allowed at any of the GGNRA's.

And the law needs to be enforced.

I hike in Headlands above Marin city now. It is covered in dog poop. dogs are all off leash, running and jumping on hikers. the owners think it is cute when they flush baby quail out of the brush or chase after wildlife.

Please provide the strictest ban possible on the dog owners to save this county

Thank you

Gail

Re: Comments on Supplemental Draft GGNRA Dog Management Plan/EIS (SDEIS)

Date: February 14, 2013

These comments on the SDEIS are submitted by an interested citizen who has been involved in the dog management process for several years and has worked on management plans and environmental impact statements on public lands for nearly 40 years.

As a regular out-of-town visitor to and user of GGNRA and a long-time member of several environmental organizations, including Sierra Club and Audubon Society, my basic comment is that the Interior Department, National Park Service, and Golden Gate National Recreation Area can and should produce a

better plan than has been proposed to date.

## OVERALL COMMENT

I support revising Alternative A or Alternative F to provide more access to GGNRA by people with their dogs. The current draft plan is not balanced and is too restrictive on dog walking - it does not protect and preserve the fundamental values for which GGNRA was established: natural, historic, scenic and recreational values.

The current supplemental draft EIS, while an improvement from the earlier draft, continues to show serious bias and lack of objective analysis, as discussed below and in other comments. Most important, the supplemental draft plan/EIS (SDEIS) needs more work on alternatives including mitigation measures.

The draft regulation should also have been disclosed in the SDEIS, as it is an integral part of the "proposed action." The public should have an opportunity to evaluate alternative rules and their impacts, and have the opportunity to comment on them.

The following more specific comments will address only a few of the points in any detail, given the many comments likely to be submitted on the supplemental draft plan/EIS.

## INADEQUATE SCOPE AND FUNDAMENTAL BIAS IN SDEIS AND ALTERNATIVES

Under the NPS planning process and NEPA, the purpose and need, which is expressed by GGNRA's "Objectives" (page 2) drive the development and choice of alternatives, including monitoring and mitigation measures. Urban recreation should be one of those objectives.

Surprisingly, while mentioned in the Purpose of GGNRA, the word "recreation" does not appear at all in the plan's Objectives (nor, also revealing, in the index of the SDEIS). The bias in the current draft could not be more stark than the omission of "recreation" as a keystone objective for the Golden Gate "National Recreation" Area. This omission stands in contrast to scoping - which is supposed to identify the scope of the plan and EIS - and where urban recreation needs were clearly identified (page 14).

The phrase "park resources and values" is frequently mentioned, but does not refer to recreation as one of those resources and values. Likewise, the analysis of what is "environmentally-preferred" omits recreation as an environmental value. This omission also reflects the document's bias, despite decades of national environmental policy and Interior Department recognition of "recreation" as central to the meaning of "environmental quality."

GGNRA itself was expressly established to provide and maintain recreation as a needed and essential part of the urban environment. The SDEIS contains many pages of purpose and need, objectives, regulatory history, and impacts at the outset of the draft document, but it is not until 43 pages later that the SDIES acknowledges the central role of recreation, when it finally quotes GGNRA's organic act:

"GGNRA was established by Congress in 1972 (PL 92-589). The language of the enabling legislation states the park's purpose as follows: 'In order to preserve for public use and enjoyment certain areas of Marin and San Francisco counties, California, possessing outstanding natural, historic, scenic, and recreational values and in order to provide for the maintenance of needed recreational open space necessary to urban environment and planning, the Golden Gate National Recreation Area is hereby established.' "

This should be the starting point for the development of the plan and the comparative evaluation of

alternatives, not treated as a historical footnote on page 43.

Conservation of recreation is an essential GGNRA value that should not be impaired (see SDEIS inadequate discussion of impairment on pages 42-43). Certainly conservation of GGNRA's ecological integrity is a paramount mandate under the NPS organic act, but omitting urban recreation as an objective and as a park value that should be maintained improperly biases the planning and alternatives evaluation process.

Instead, the SDEIS treats GGNRA as a victim of lack of recreational space in the Bay Area (pages 21-22). As noted, the need for urban recreation area is one of the main reasons GGNRA was established in the first place (see GGNRA organic act quoted above and on page 43 of the SDEIS). This need for urban recreation is not an impact on GGNRA - it is one of GGNRA's fundamental purposes. This basic error permeates the SDEIS.

Until recreation is considered an objective per the GGNRA organic act and legislative history, and an environmental value - - not simply an impact - - the supplemental draft EIS is biased both scientifically and politically. This bias results in a proposed plan that is far too restrictive in maintaining urban recreation for people and dogs in this unique national recreation area.

## URBAN QUALITY AND DESIGN OF THE BUILT ENVIRONMENT

GGNRA was established "and in order to provide for the maintenance of needed recreational open space necessary to urban environment" (GGNRA organic act above; page 43 of SDEIS). GGNRA is located within one of the major urban environments of the United States and is by definition an urban environment (urban environments can also be natural in character). GGNRA is central to the quality of life of a major urban area - in short, to the "urban quality" of residents of San Francisco and its environs. If this weren't the case, there would not have been 4,700 comments submitted on the draft EIS.

The term "built environment" is commonly understood, as Wikipedia notes, as "encompassing places and spaces created or modified by people, including buildings, parks, and transportation systems." The NEPA Rules' definition of human environment and effects likewise includes the "natural and physical environment and the relationship of people to that environment."

GGNRA has numerous features that have been designed and built by humans, from trails, to signage, to parking lots and buildings and other facilities, to habitat restoration projects. It includes many constructed environments, including former military installations and city parks. GGNRA is not a wilderness. GGNRA is in many respects a designed landscape. Even efforts to restore its natural values involve urban design components, such as vegetated berm separation and other design features to preserve its resources and values.

It is hard to imagine how the SDEIS could dismiss "urban quality" as not relevant (page 24):

"Consideration of this topic is required by 40 CFR 1502.16. The quality of urban areas is not a significant factor in determining a dog management policy for GGNRA. No new building construction or rehabilitation of existing structures is proposed under the alternatives presented in this draft plan/SEIS; therefore, this topic has been dismissed from further analysis." (emp. added)

This statement in the SDEIS misinterprets CEQ rules and results in basic noncompliance with NEPA. GGNRA is in an urban area; it was established to improve urban quality of life; the design of this urban parkland could not be more relevant. The design of urban parks is a recognized discipline. Good design is central to the ability to preserve park resources and values, including recreation, ecology, and cultural

values.

This one paragraph from the SDEIS, quoted above, dismissing urban quality and design of the urban environment, highlights the absence of rigorous expiration of alternatives, as required by NEPA, CEQ, DOI and NPA NEPA rules, procedures and guidance. It also demonstrates the document's bias in treating GGNRA like a traditional national park and not as an urban unit of the national park system. NPS/GGNRA seems out of its comfort zone here, but this doesn't excuse the omission.

One of the reasons NEPA requires a "systematic interdisciplinary approach" with an "integrated use" the "environmental design arts" as well as sciences is that the design disciplines can help solve environmental problems. NEPA Section 102(2)(A) and corresponding Interior and NPS requirements.

This has essentially not occurred with the planning process or SDEIS to date. There are many examples where design can avoid or otherwise mitigate potential user conflicts or impairment of resources. Many of the conflicts noted in SDEIS, whether real or perceived, could be addressed with good urban design, such as access to specific areas, separation of areas where people and dogs, people only, or no one is allowed, how a user "understands" where people and dogs or other users are allowed, and so on.

The fact that the proposed plan does not propose new buildings is not relevant to the NEPA requirement to evaluate urban quality and design. If these alternatives and mitigation measures are not rigorously explored, both the planning and EIS process are inadequate. Good urban design is at the heart of a balanced plan - yet NPS has "dismissed this from further analysis." (page 24). This work needs to be done.

San Francisco and the Bay Area are known for their attention to urban design and to sustainability principles and have many talented design professionals. NPS and GGNRA will not have difficulty bringing the required resources to bear on this plan and EIS.

An adequate plan and EIS needs to recognize that this plan is about the quality and design of the urban environment, and not dismiss it as irrelevant and remove it from the scope of the analysis.

## LACK OF OBJECTIVE AND SCIENTIFIC ANALYSIS

The failure to distinguish between impacts on GGNRA resources by people, by dogs, or by other causes is perhaps the most basic scientific and policy flaw in the current document. The SDEIS's basic reasoning is that because dogs are capable of causing certain impacts to the natural environment, they will cause those impacts and thereby impair the ecological integrity of GGNRA. (See, for example, pages 15-20 of the SDEIS and much of the chapters on alternatives, environmental consequences, and affected environment.) Site specific, empirical data is lacking on this point.

Equally important, while the current draft identifies impacts from humans and dogs - site specific observations like "high foot traffic (both people and dogs)" - there is little or no analysis of: (1) whether off leash areas differ from other areas of high traffic; and (2) whether humans need to be prohibited from these areas to protect natural values.

For example, the impacts of the many special events in GGNRA, such as Crissy Field, relative to impacts from people and their dogs is not seriously analyzed. Any management plan that does not deal with the causes of the perceived, alleged or documented impacts does not meet the basic objectives of preserving GGNRA's values - because the impacts will still happen after the adopting of an overly restrictive dog management plan.

Making dogs the scapegoats is not objective analysis. And if the document does not tell the public that

people, too, will be restricted from popular areas of GGNRA, it fails NEPA's requirement for a "full disclosure" of impacts (in this case, impacts on recreation).

The survey of other areas ranges from sloppy to inaccurate. For example, on page 32, the SDEIS states:

"Seattle, Washington. Dogs are allowed to roam off leash at 11 of the 400 parks and recreation areas in the Seattle metro area. Although dogs are allowed on leash in most other park areas, they are not allowed on beaches, play areas, or organized athletic fields. Owners are responsible for waste removal. Fines are implemented for leash and waste-removal violations (Seattle Parks and Recreation 2009, 1, 3)."

This statement is incorrect. In fact, Seattle does allow dogs on beaches (Magnuson Park), as does the City of Vancouver (there is a dog beach on False Creek/English Bay next to the Burrard Bridge). In fact, this information is readily available on both the City of Seattle's and City of Vancouver's websites. Vancouver parks' website starts with the statement: "Dogs are welcome in all of Vancouver's parks and must be on leash unless they are in a designated dog off-leash area" and shows photos where dogs can be off-leash at various beaches and waterbodies.

Although these areas are smaller than San Francisco's extensive saltwater beaches, if such easily obtained information is incorrect in the SDEIS, it raises serious questions of the accuracy - or more likely - bias and lack of objectivity in its preparation.

As another example, the SDEIS gives short shrift to long-standing planning and NEPA documents that have helped guide GGNRA management to date. For example, the Crissy Field Plan Environmental Assessment is briefly identified (on page 44 of the SDEIS), but little or no scientific or other information is provided in rest of the documents hundreds of pages to provide a basis for the proposed radical departure from the existing uses allowed and recognized in the Crissy Field EA.

The East Beach and other readily-available beach access should be restored in the final plan, with appropriate design and mitigation measures to avoid or reduce potential conflicts with other uses, and vice versa. Crissy Field, in the heart of the city, is an example of a unit where many recreational uses have and can continue to co-exist.

The SDEIS is more than 1400 pages, not including appendices. As President Carter said when the current NEPA Rules were initiated: "We do not want impact statements that are measured by the inch or weighed by the pound." It is the quality of the analysis, not its quantity, that counts.

#### RECOMMENDATIONS FOR EXPLORING, DEVELOPING AND EVALUATING ADEQUATE ALTERNATIVES (INCLUDING MITIGATION MEASURES)

The comments above include recommendations for exploring, developing, and evaluating adequate alternatives including mitigation measures, from the role of urban recreation, urban design, plan revisions to specific units such as Crissy Field, and providing unbiased, objective analysis.

To improve on the plan, GGNRA should return to the first two goals stated from its Scoping conclusions (page 39 of the SDEIS):

"Work toward community acceptance of the process and the solution" and

"Allow the community to participate, maximizing creative thinking."

To date, other than the reg neg process, NPS has mainly involved the community by providing

opportunities to comment on formal plan/NEPA documents. Upon receiving comments, GGNRA has not allowed the community to participate in the planning process until the agency issued its next formal document, many months later. This does not meet the spirit or letter of the above objectives.

For example, NPS has held no design workshops or design charrettes on any potential solutions in any GGNRA unit, a standard method San Francisco and many federal agencies and municipalities use to develop solutions to sensitive or controversial areas or areas with user conflicts.

These techniques were not used in the reg neg process, in the scoping process for the EIS, or in the comment periods on the DEIS or SDEIS. NPS is again requested to recognize both the relevance of urban design and initiate design workshops on focused issues that can help produce a good plan.

The Monitoring Program (summarized on page 63 of the SDEIS) is an important part of the plan. Thank you for working on improvements to the former version of this element. While improved, it needs more work. For example, it does not address identifying or distinguishing impacts from dogs and from other causes, such as human (e.g., disturbance) or natural impacts (e.g., climate change). This is fundamental to a scientifically valid monitoring and management program. For example, if there is more than one cause - such as people and dogs in a seasonally-restricted wildlife area - any proposed management action should deal with the relevant causes, rather than basing management actions on one cause that may not address the problem. The public should be able to comment on the appropriate response.

An objective monitoring program - based on maintaining long-standing urban recreational uses per GGNRA's organic act - should respond to the data and should allow restoring and increasing dog walking areas, not simply restricting them.

## CONCLUDING COMMENT

The Interior Department, National Parks Service, and, in particular, GGNRA have an opportunity to realize the mission and objectives so clearly stated in the landmark Golden Gate National Recreation Area Organic Act (emphasis added):

"In order to preserve for public use and enjoyment certain areas of Marin and San Francisco counties, California, possessing outstanding natural, historic, scenic, and recreational values and in order to provide for the maintenance of needed recreational open space necessary to urban environment and planning, the Golden Gate National Recreation Area is hereby established."

GGNRA is unique. There is no other urban national parkland like it. No unit of the National Park System - from Santa Monica to New York harbor - has the identical mandate. The Superintendent has the administrative discretion to adopt rules that will further conservation of all of the values for which this national recreation area was established.

GGNRA is San Francisco's and the Bay Area's backyard. GGNRA serves an extraordinary population with a similarly unique culture. Its residents love nature and the outdoors, love their dogs, and love their communities, urban neighborhoods and shorelines perhaps as no other region in the U.S. These are complementary - - not conflicting - values to the vast majority of GGNRA users.

San Francisco and the Bay Area residents have a distinct culture that places high value on both community and individual choice, on both freedom and responsibility. Out-of-town visitors, like many of us, expect and appreciate this culture as well. The Dog Management Plan can and should support, not diminish these values. It does not yet do that.

The SDEIS makes some strides to propose a plan that protects natural, historic, scenic and recreational values - despite the EIS's remarkable reluctance in its text and analysis officially to recognize "recreation" as a protected value in GGNRA. But the alternatives proposed still fall far short of a rigorous, cooperative effort to find solutions.

It is as if park management has decided, due to all the controversy, that efforts at legal defensibility or appear "green" are more important than finding solutions that meet the GGNRA Organic Act's mandate. Please return to your roots as you prepare a final proposed plan and EIS:

1. GGNRA VALUES AS DRIVER. Make the mission, mandate and objectives articulated in GGNRA's organic act the driver for developing plan alternatives and evaluating preferred alternatives. That act is not inconsistent with NPS's own organic laws. NPS and NEPA statutes and regulations make clear that natural, historic, scenic and recreational values are ALL components of environmental quality. Each may also have impacts on the other, but that should not relegate recreation to lower status, as the current preferred plan and draft EIS do.

2. MANAGEMENT ACTIONS TO PRESERVE GGNRA VALUES. GGNRA was intended to be used by people as well as dogs, horses, etc. (it's in the bill reports for PL 92-589). User conflicts are common in national park system units; it's part of the management of these areas. The proposed plan needs to give a harder, objective look at (a) whether and how significantly the impacts cause an impairment of the four fundamental values of GGNRA; (b) whether alleged impacts are caused only by dogs or a combination of factors; (c) what management actions can avoid impairment or important impacts to all four values - or put positively, what management actions can most preserve and maintain all four values for current and future generations. Targeted management actions such as better education, signage, and design can be very effective in parklands and need to get more serious development. This comprehensive and long term analysis is essential for a sustainable plan and an adequate EIS - and most important, it's vital for GGNRA to meet its mission.

3. ENGAGE WITH THE COMMUNITY TO FIND BETTER SOLUTIONS. NPS should be commended for its outreach and efforts in the formal elements of the planning and NEPA process, such as scoping and comment periods on the draft EIS and issuance of a supplemental draft EIS, and some additional public engagement. However, both NPA planning guidelines and NEPA rules, procedures and guidance encourage on-going, active consultation with the community as alternatives are developed and EISs are prepared. Instead, the agency has largely refused to engage in between issuance of formal plan/EIS documents.

Yes, this is a controversial subject. No, the plan and EIS won't please everyone. Just because there are avid advocates for more "all or nothing" positions does not mean NPS should decline to engage between the issuance of formal documents, with constructive participants, such as Eco-Dog, SF SPCA, and Crissy Field Dog Group (whom I have represented) for example, and others who have been trying to work with NPS to find reasonable approaches in specific units.

If NPS pursues these three fundamentals as it moves toward final decisions, a good plan can come out of this process.

Please do not hesitate to contact me if you have any questions or would like additional information on any of these comments.

Respectfully submitted,

Ken Weiner

**Correspondence:** Alternative F is the best option although still does not limit dog access in many critical areas of concern for our native plants, migrating and resident birds and wildlife. Marin Headlands and Crissy Field shd not allow dogs on or off leash on trails and beaches in these areas to protect plants, wildlife and people; allowing them the freedom of some protected space. With protecting these areas you have welcomed the return of many wild visitors that shd not be disrupted from their feeding on migration by frolicking dogs and their owners. Dogs roam everywhere these days lets save some space where we are free from the effects of there presence. thank you for your consideration and efforts in preserving our natural places.

**Correspondence:** Dear Superintendent Dean:

I have had four different dogs for most of the 14 plus years that I have lived San Francisco, and have spent a lot of time with my dogs in our National Parks, particularly Fort Funston and Crissy Field. I am

writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan.

The new plan either eliminates or dramatically reduces existing dog walking access. It does not take into consideration the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there has not been a single peer-reviewed, site-specific study (as required by law) that supports such a severe restriction of dog-friendly areas.

It is a simple fact that there are many dog owners in the Bay Area. It is also a fact that dogs need exercise and socialization. Many dog owners are not able to run with their dogs, and rely on the GGNRA for their dog's exercise needs. The GGNRA provides an opportunity for dogs to run and play.

The GGNRA was designed to be an urban recreation area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. Without such designated areas, many dogs are going to be foreclosed from exercise, resulting in stressed and unhealthy dogs, unhappy owners, and overcrowded animal shelters. As a long-time volunteer at the SF/SPCA, I know how painful it is for people to be forced to surrender their pets due to their circumstances. I am very concerned about the impact that this plan will have on animal abandonment, which the SF/SPCA is working so hard to end.

The pet policy needs to be formalized and supported with off-leash areas in San Mateo County as well as on new lands that the GGNRA acquires in the future. There are certainly less drastic means of protecting our national parks while honoring the original intent of the GGNRA. I urge you to work towards modifying this plan to protect all types of recreation in our GGNRA.

Sincerely,

Robyn A. Leonard

**Correspondence:** Please protect the biological resources of the GGNRA by requiring dogs to remain on leash in most areas. Off-leash recreation is valuable but protection of the indigenous flora and fauna must come first in these last pieces of our Bay Area coast. I was a commercial dog walker for ten years in San Francisco and foster for a local dog rescue group. I've also completed two studies on dog walking in an off-leash area for the SF Recreation and Parks Department.

The density of off-leash dogs in the Bay Area is so very high that restrictions must be in place to protect natural resources. Dogs are very much an extension of our ecological footprints. We have to take responsibility for their impacts on the land. I thoroughly enjoy off-leash recreation when the density of dogs is manageable. With proper introductions, off-leash recreation is wonderful. That said, I know that the recreation needs of my foster dogs can be met without off-leash recreation. We can enjoy our wonderful parks on leash.

Where the choice is between harming habitat and off-leash recreation, we need to choose habitat conservation. And I do. I hope the GGNRA will do the same.

Thank You.

Rachel Kesel

**Correspondence:** This plan is a terrible idea for all residents, not only dog owners. I run on these trails nearly daily, and all - and I do mean all - canines I encounter are well-behaved, orderly and non-destructive. I've yet to see an example of an out of control dog wreaking havoc on either me or the surroundings. Professional dog walkers rely on these trails and paths for their livelihoods, while owners deserve a nice environment in which to exercise their animals.

i urge you to reconsider this ill-advised plan and allow the county to set the standards for pet owners.

**Correspondence:** There are very few places in the San Francisco area that are dog free. I do not object to people owning dogs but I do object to the fact that there are just too few (if any) places that I can enjoy nature without dogs being present and usually off leash. A National Park should put people and nature first. I don't spend much of my time at GGNRA as it seems to be one big dog park and has been this way for far too long.

**Correspondence:** Hello,

While I live in Seattle, I regularly frequent San Francisco, am a dog lover and regularly enjoy the GGNRA (often with my friends and their dogs). The GGNRA is a place where people have taken their dogs for decades, mostly without major problems. I feel that the draft plan being proposed is far too restrictive - it eliminates too many leash and especially off leash areas, which is bad for people and dogs. The Park Service needs to do a better plan and EIS and seriously work with the community to find solutions, not just provide comment periods on draft plans/EISs.

Thank you for your consideration,

Reid

**Correspondence:** Please keep option A.

I am dismayed at how our liberties are getting more and more limited. Governments at every level are trying to get us to live straight-jacketed lives. I don't own a dog. But watching dogs run freely nurtures me; they have so much joy it is contagious.

Humans need some places that are not inundated with restrictive laws. Everyone is so stressed. They need an outlet. Taking a walk or run with your dog on undeveloped land is a total stress release.

Governments want to shut everyone up in a box to keep them, endangered species, and the people themselves "safe". And I am myself an environmentalist. But this is how we end up with school yard massacres and mailbox bombs. People are just so stressed. Their natural outlets for stress, to regain inner calm, are already widely restricted.

Please keep option A.

**Received:** Feb,14,2014 18:05:02  
**Correspondence Type:** Web Form  
**Correspondence:** I support the implementation of GGNRA's proposed plan on dog management. I believe enforcement of regulations is critical - at present the regulations that do exist are ignored  
o We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.  
o Off-leash areas should be marked off with fencing or natural borders such as bushes.  
o Park officials need to enforce the dog rules more vigorously.  
o Visitors to the park should be limited to a maximum of two dogs per person. The park should not serve commercial dog-walkers, who are a disturbance to those trying to enjoy nature in the parks.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas. The small, very vocal group of dog owners who demand additional off-leash areas should not be allowed to spoil the park experience for the majority. This is the ONLY NP that permits off-leash use at all, and although I

accept the compromise of the GGNRA plan, it really seems wrong to permit unleashed dogs on the seashore at all, with habitat for migratory birds becoming more and more rare.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan.

It will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. I feel that it will cause me to move away from the city.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Marian Christine Brodigan

**Correspondence:** To National PArk Service,

I have two dogs that I have been walking on the Marin trails and beaches for almost 10 years. It is a major factor in our fabulous quality of life here in the Bay area, and it sets us apart from unfortunate, overly developed places like Southern California. We are already limited to a small number of trails, small sections of Mt Tam and the Headlands. There are enough "No Dog" trails to satisfy hikers or equestrians. Do dogs really disrupt other wildlife to a significant degree? We, the tax payers, are paying to preserve this land and would like to use it in a reasonable way.

Please, leave the current restrictions in place - do not further restrict the dogs!

Thank you,

Julia Evans

**Correspondence:** Our family grew up with dogs and I'm very fond of them. However, I am not fond of them running off-leash and harassing other animals. My sister owns four dogs, and routinely lets them romp in park areas where she is supposed to keep them on-leash. She bristles when anyone calls her on it, and claims that her dogs do no harm. (This despite the fact that, being Jack Russell terriers, they are constantly running after, harassing, and sometimes killing, other animals.) Her attitude reflects the entitlement felt by many dog owners, who feel that their dogs should be able to do whatever they want, wherever they want, especially in parks. They have no sensitivity to other species such as small mammals, birds, deer, etc who might be harmed by their illegal activities.

It's time to pay attention to the park's constituents who don't have aggressive, vocal human boosters. It's time to speak up for birds and other animals who deserve respect, space, habitat, peace, and quiet. Please do not let rabid dog owners blind you to the needs of other species. Do what's right. There are plenty of other places where dogs can run free.

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

â€ We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

â€ Off-leash areas should be marked off with fencing or natural borders such as bushes.

â€ Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

---

**Correspondence:** My family and I are writing in support of "Alternative A: No Action" of the GGNRA 2013 "Draft Dog Management Plan / Supplemental Environmental Impact Statement", now open for public comment. Our specific reasons include:

- It fails to offer reasonable alternatives to support the off-leash needs of dog-owning GGNRA users.

- The wholesale elimination of off-leash dog access from many GGNRA sites, including Muir Beach, attempts to impose standards appropriate to traditional National Parks, where protection of the natural environment is paramount. But the GGNRA is a RECREATIONAL area in an urban setting, not a park,

---

and must be managed as such.

- The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011, which opposed the plan by an overwhelming margin. Was the NPS listening to those comments? It doesn't seem so.

- Restricting off-leash access to only a few beaches (is Rodeo Beach the only one?) will cause Rodeo Beach to be overwhelmed with dog owners seeking off-leash beach access for their dogs. It will inevitably result in significant increases not only in the numbers of dogs there, but also conflicts among dogs, dog waste, and other undesirable effects of so many dogs in a small area. In effect, it would turn Rodeo Beach into a "dog concentration camp". Contrary to one of the stated purposes of the Plan, it is likely to INCREASE USER CONFLICTS at Rodeo Beach. This can benefit no one.

- The SEIS contains no peer-reviewed, site-specific studies or vital monitoring, as required by law to initiate such a dramatic change to the public's use of their public lands.

- The long-standing 1979 Pet Policy has the support of the vast majority of the users of the GGNRA and should be retained.

Besides Alternative A, none of the proposed alternatives provides any reasonable off-leash dog access. Clearly the NPS is not interested in devising a policy that supports dog owners, those who provided comments to the 2011 and 2013 plans, GGNRA users, or the general population of the Bay Area. The process should be re-started with not only public input, but with specific public decision-making rights on a new plan. Such a decision-making body should have voting members from all stakeholders, including affected local governments and the general population, as well as the NPS. Without this shared authority, the NPS cannot be trusted to represent the will of the people.

Hopefully,

Alan Mullendore, Carolyn Lie, Kaja Mullendore, Cassie Mullendore, Zoe Mullendore, "Bogie" (the Bernese Mountain Dog) and "Darcy" (the Black Lab)

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. The use of some of the areas will be diminished as most of the people I see during the week are with canines.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

QWilliam Mills

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I think there should a couple of specified off leash areas for dogs and their owners, but I think for the most part I'd like to see dogs on leashes, and some sensitive area with no dogs at all. And if they're really sensitive, no people at all, since that's the best way to keep dogs out.				

In San Mateo County I'd like to see dogs allowed off-leash at at least one beach.  
Montara Beach would be perfect. Then no dogs at all on other beaches.

Please please enforce the leash laws once you declare them.

Dog owners are vocal and have a sense of entitlement. The parks are for people, not just dogs and dog owners.  
And the parks are habitat, not just for dogs and dog owners.

That said, GGNRA is a RECREATION AREA and walking with dogs off and on leash is recreation, so do please find a few spots for the dog owners.

Thanks.

**Affiliation:****Received:** Feb,14,2014 19:06:04**Correspondence Type:** Web Form**Correspondence:** Dear Superintendent Dean,

The proposed rule are too restrictive. All those dogs have to go somewhere so the few areas where they are allowed will be used excessively. Also, the areas you chose to make off leash in Fort Funston and Ocean beach are the easy access places where people who whst to enjoy paying on the beach go. They are the closest areas to parking and so families with small children will go to the closest beach which will now be concentrated with many more dogs. It is a recipe for trouble. Please reconsider.

Thank you.

Olivia

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Tara Manning

**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Feb,14,2014 19:49:23**Correspondence Type:** Web Form**Correspondence:** I moved to San Francisco just over two years ago. Since then, my dog and I have both thoroughly enjoyed the off-leash areas especially Fort Funston, Crissy Field, and Ocean Beach. The dog-friendliness here is one of our favorite things about San Francisco.

Since moving here and having access to these resources, my dog has been much healthier and better behaved, as are the other dogs that we come into contact with. I strongly oppose the Preferred Alternative because it is too restrictive, and I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

My additional criticisms regarding the new dog management plan:

- it did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them.
- it does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011.
- it claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.
- it admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.
- it misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the

GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

Sincerely,  
Kristen Aramthanapon

**Correspondence:** Attn: SEIS Superintendent  
Golden Gate National Recreation Area,  
Fort Mason, Building 201, San Francisco, CA 94123

Part one: General info from Jake Sigg Newsletter:

â€ I support the National Park Service efforts to regulate recreational dog walking within the Golden Gate National Recreation Area.

â€ I urge the National Park Service to adopt a Dog Management Plan that adheres to all established NPS management policies and practices, protects park resources, and will provide the opportunity of a quality National Park experience for all visitors.

Additionally, please include the following comments regarding Commercial Dog Walkers using the

GGNRA for commercial business:

â€ Commercial dog walking is not an appropriate activity for National Park lands. Use of the GGNRA by the commercial dog walking industry constitutes an exploitation of park lands strictly for private financial gain.

â€ Commercial dog walking will provide no service or benefit to any park users, will adversely impact park resources and values, and will serve only private enterprise at the expense of the American public.

Part 2: Below are my personal comments:

Please help to regulate this fast growing industry. As a resident of San Francisco, I'ts not fair that we can't enjoy the parks with this many dogs running around unsupervised. I want to be able to enjoy myself when I go out in nature and not have so many dogs at once. There are too many dogs per person and they are off the leash.

There are a lot of people who don't have dogs and they deserve to enjoy the park too. The wild animals in the Natl. Rec area are getting a raw deal too. I was upset to see the photo of an unrestrained dog aggressively pursuing a great grey heron. This is unacceptable! The Dog Management Plan is exactly what we need.

Why should their business get free land to operate while others have to pay and get licences, etc? Who suffers because of this? The wildlife and other parkgoers who want to have a peaceful day in nature.

Thanks for your support,

Karen Arnold

**Correspondence:** as a brand new dog owner of a rescued puppy from the shelter, I was shocked to see that this is even an issue. I assumed that there would be plenty of places to bring my dog, responsibly to wander and be off leash. The idea that it is potentially going to be eliminated is so sad to me. I love birds. I own a bird. I love nature and from what I can observe, the pet owners are taking good care of the parks and the beaches and should be allowed to walk their dogs and exercise their animals as they have been. Please reconsider banning dogs from all of these places. Dogs would then be banished to small dangerous dog parks where ironically people are not so careful with their dogs, though it is in an enclosed area. It is safer and healthier for the city to maintain broad areas for off leash. If you make having a dog difficult, people will not rescue and adopt dogs in shelters and there will be an even bigger problem  
thank you.

sincerely,

Lisa Neimeth

**Correspondence Type:** Web Form

**Correspondence:** The suggested plan to impose restrictions on off-leash dog walking at Golden Gate National Recreation Area locations will negatively impact my life, the lives of others, and the local environment in the following ways:

1) Dog walkers who currently use GGNRA locations to perform their duties will be largely displaced to San Francisco city parks, such as Bernal Heights and McLaren. Increased use of these parks by dozens or hundreds of dog walkers and their groups will lead to excessive erosion and the virtual destruction of those parks. I grew up half a block away from Bernal Heights Park and to see it turn into a pile of rubble due to overuse is a tragic thing to consider.

2) Having lived my entire life in San Francisco as part of a "dog family," I've been going to Fort Funston & Ocean Beach with my dogs literally since I was in diapers. To lose that privilege would be heartbreaking.

3) The population of dogs in San Francisco is largely made up of adopted, or "rescued" dogs, generally meaning dogs who would have been euthanized had they not been adopted. If GGNRA lands are no longer available for dog owners and dog services to use off-leash, then it will have a massive impact on the number of people who are interested in or willing to adopt a rescue dog. This will cause rescue shelters to overfill, lose funding, and eventually be unable to save hundreds or even thousands of dogs from death each year.

4) In 2013 I started my professional dog walking business, and I've invested over \$20,000 in order to get properly educated & equipped. If this plan passes, there is no way I can afford to continue my business as the only remaining park space in the region will be overflowed with other walkers to the point that it is unsafe for the dogs I service and the environment. I have not had enough time to make this business profitable enough to make back any money on that investment, and therefore this plan will literally cost me \$20,000 should it pass.

**Correspondence:** We love Crissy Field. Sam our yellow lab is at his best when he is there. We went today on Valentines day and got to walk, throw the ball and connect with nature. It is so important to have nature available to all, including dogs, in the heart of the city. It erased the boringness of a long work week. I go back feeling like I have had a trip to the mountains or been. My connection to nature is what keeps me healthy and also Sam our yellow lab. As a retired couple Sam is our constant companion and to be able to go to Crissy Field is the best. I go home feeling like I have been to th mountaina on a long vacation. Please do not close it off. The bikes cause more troubles then the dogs. Please do not take away our wonderful closeness to nature, our ability to find pleasure without a long drive. If you are reading this inside, go out and look around anad when you go back inside see if you don't feel better, Or pet a dog and you will feel better.

Thanks Elaine Anderson

I welcome the effort by the NPS to tighten up restrictions on off-leash dog use of the GGNRA. As a biologist, I feel that a less-restrictive dog use policy in areas like the National Parks is a dangerous precedent. These areas are meant to be wildlife havens as well as accessible by human visitors, so it stands to reason that allowing the presence of dogs should only be allowed in limited cases. While human use can be a problem as well, dogs that are off-leash can frighten and injure wildlife much more effectively, as a result of their hunting instinct, than most human visitors can or are likely to do.

I tire of seeing off-leash dogs in areas where they are prohibited such as Snowy Plover nesting beaches - not to mention the habit of certain dog owners to leave their full dog waste bags on trail sides.

It's time for an ever-growing human population and their non-native animal pets to stop assuming the right to go everywhere they please. It is also time for pet owners to recognize and take responsibility for the damage that their pets can do to native wildlife.

**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Feb,14,2014 22:46:59**Correspondence Type:** Web Form**Correspondence:** The GGNRA i support the "No Action Alternative" in the SEIS for each area: Muir Beach, Homestead, Oakwood Valley and the Marin Headlands.

The GGNRA was established to give outdoor recreational opportunities to people in densely populated urban areas.

I consider my four-legged friend to be an intricate part of my family and is considered more than a dog.

It is a shame to hear how the GGNRA is considering to strip us of our rights to freely visit OUR recreational parks just because they have no care for our pets. Take a good look around and you will always see a large population of pet lovers at these parks. Our pets are not meant to walk city streets. They are meant to freely enjoy the beaches, parks, and trails as I enjoy.

Please listen to the comments and that the changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011, and that comments in 2011 ran 3:1 AGAINST the plan.

Keep Muir Beach Dog Friendly. Keep Marin Headlands and all of the GGNRA available to people with pets.

**Correspondence:** I have been taking my dogs to Fort Funston for over 25 years. In those 25 years I have encountered very few aggressive dogs. I truly believe that dogs are less aggressive when they are off the leash. I have two high energy dogs. They need to run. My Lab loves the ocean. My Dutch Shepherd loves to have his ball thrown. You will take away the best fun & healthy lifestyle my dogs love so dearly, just like other animals our dogs deserve certain rights as well.

Thanks for your consideration. If you own a dog you will understand.

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from responsibly recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

**Correspondence:** In an ideal park experience, a park visitor wouldn't need to hear, see, or interact with dogs at all. Dogs have ruined my experience so much that I stopped visiting San Francisco city parks. Now the dog bullies want to complete their exclusion of the rest of us from the GGNRA. They've already succeeded to a large extent. So short of banning dogs altogether, I would request that the NPS do the following:

Include more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

The reality is that there should be no off leash areas at all, but if there must be, please mark them off with fencing or natural borders such as bushes.

Vigorously enforce dog rules. Currently, the dog owners and dog walkers are the only ones who are represented at all. Wildlife and nature-respecting humans belong in parks; dogs do not. If they must be tolerated, it should be with the understanding that their owners keep them away from wildlife and other people, and only in designated area.

**Correspondence:** I worked for the City and County of San Francisco from 1968 until 2002 in the parks and open space provision divisions of the Recreation and Parks and Public Works Departments. Dogs, dog owners, children, and a variety of

---

compatible and incompatible activities were prevalent daily. I grew up with a dog, my constant best friend for 13 years, have two dogs in our family household now, and raised two children interacting with domestic pets throughout youth, including dogs.

There are some dog owners, guardians, companions, trainers, walkers, or howsoever they be rightfully identified, who are arrogant, indifferent, troublesome, and establish the need for control over where dogs should be allowed, on or off leash. All the arguments about protection of wildlife, birds, mammals, etc. included, are profound and must be a first consideration before space is relinquished to domestic dog presence. A second argument referencing the needs for children (under 18 years of age), and elderly (60 years of age and older), or disadvantaged in any way whatsoever, should be foremost when weighing preferences or "needs" of those responsible for dogs in public spaces. Those who have a genuine established need for a dog companion should be a third category of priorities when evaluating legal use of shared public spaces. Dogs on leash should be mandatory except where there is protection separation from children, elderly, disadvantaged, special needs, or hazards to free roaming people or animals; "dog closures" should be available wherever feasible, without eliminating other incompatible use, activity, or simple presence. Some adults and children are frightened of animals, especially dogs which run freely among people in public spaces. Leash restrictions, and dog defecation clean-up guidelines should be consistently and effectively enforced at all times; fines should be substantial to deter even wealthy owners, with options to "work off" fines (with unpaid public service); a special "animal issues" court should be established and prevail, primarily to enforce, and to monitor enforcement of laws with penalties.

Dogs off leash should be allowed in dedicated spaces that do not diminish the use and enjoyment of the public space or resource otherwise available to those who have no responsibility for domestic pet ownership. It is not the assumed responsibility of everyone in a society to adjust behavior to please pets, or pet owners. The choice to own or control a pet should solely remain with those who are required to legally care for a pet, dog or any animal. A fund created through licensing of dogs should be principal source of funding for public space provided strictly, or devoted only to, dogs and their mandated adult companions. Clean up, hygiene maintenance, noise and nuisance controls, and all other matters pertaining to dog spaces, should be mandated upon an appointed group representing pet ownership or responsibility, if use of space provision is chosen.

If there are not adequate or appropriate spaces available in public domains sought for dog use, separate exercise

areas should be sought by dog representatives and regional public space providers. Collaboration between public agencies and residents of any given community should be inclusive, democratically directed, and without favor to special interests. Priorities established for youth, elderly, disadvantaged, and otherwise deprived populations should be clear, and enforced - from proposal to use stages. Dogs should be treated with respect, acknowledged regarding needs, and recognized relative to social and psychological functions for members of society. But to prioritize dogs running free, in ways that are not compatible with other uses and potential use, is ludicrous, without merit, and disrespectful to the general populace, and the posterity - which would likely be prohibited from any future retrieval for public activities not compatible with dogs running loose and socializing with one another. Dog socialization is underrated by even a large proportion of those who own dogs, but IT IS NOT THE RESPONSIBILITY OF THE WHOLE SOCIETY TO PROVIDE REAL ESTATE FOR ANYONE'S CHOICE TO OWN A DOG. INCOMPATIBILITY SHOULD BE TAKEN SERIOUSLY BY ALL INVOLVED IN DECISION MAKING FOR THE COMMON GOOD, THE COMMONWEALTH.

Problems posed by irresponsibility of a few, similar to other realms of social intercourse, are often the very reasons we must create laws, controls, and limitations for everyone. And laws should be effectively enforced - or rescinded. Little has a more negative impact on a democratic republic than failures to maintain respect for understood, and communicated mutual expectations. Allowing dogs to have a negative impact on public resources, space shared, is clearly unacceptable and casts a shadow on socially-respectful dog owners. We who maintain responsibilities for our pets do so because we respect other members of our society. We do not expect those who do not enjoy dogs to adjust to our choices to own pets. Unfortunately, rules and enforcement are needed to minimize unpleasant experiences in public spaces provided for general uses. It is not complicated what must be done. Please, do it!

<b>Correspondence:</b>	As a long-time volunteer in the GGNRA lands, I feel we need stronger regulations for off-leash dogs to ensure the enjoyment of all and the preservation of natural resources. To this end I believe:				

---

off-leash areas need to be fenced off, or otherwise clearly marked, so EVERYONE is clear on where dogs can run freely

more areas need to be designated as on-leash only or off limits entirely to dogs

professional dog walkers should be charged like any concessionaire conducting business on park lands

finest imposed for dog rescues carried out on the cliffs of Fort Funston (or elsewhere) should reflect the cost of that operation. This should include fines for the rescue of any dog owner who gets into trouble while trying to retrieve an off-leash dog

NPS needs to commit to vigorously enforcing any regulations put into place.

I support Alternative F except for Fort Funston and Fort Mason, where I support Alternative B.

**Correspondence:** I am so sorry that this is even an issue. Of course I understand that we need to preserve our wildlife areas however with the growing amount of dogs cooped up in the city and all over the Bay area it seems that there must be a compromise so that dogs will always be able to run off leash even if it's a designated part of the beach (or area).

My husband was the assistant project manager on Crissy Field. During that time he assured hundreds of dog owners that their dogs would always have an area to run off leash because that is what he was told. When the whole issue raised it's ugly head years ago he was not only disappointed but felt like he had mislead the general public due to their changed party line. We had always thought that even though it was National Park it would be excluded because of it's long tradition of people being able to exercise their dogs. It is not only a joy to watch the dogs romp and play but there is an additional social component for people to come together which in this day and age is most important.

It is my hope that we can find a COMMON SENSE SOLUTION for this issue where dogs stop losing the ground that is so important for their well being.

Thank you,  
Randy Turpie

**Correspondence:** The suggested plan to severely limit the amount of off-leash dog parks is not in the people's best interest, and I strongly oppose it. In my neighborhood, there is already very little space I can take my dog. The percentage of dog owners, and those that make use of this open space, is already well out of proportion to the amount of space available. And the Preferred Alternative measure would drastically shrink this area further.

Please consider all the people who use these spaces when considering this measure. With nearly 50% of the population as dog owners, this measure is entirely too restrictive.

Jeremy Murphy

**Correspondence Type:** Web Form

**Correspondence:** My group, the Chihuahua Meet-up members, who meet the first Sunday of each month at San Francisco's Sigmund Stern Grove's doggy park - - about 75 - 150 active members, including a vet tech and some doggy rescue group representatives, would be devastated if any of the proposed areas forced us to limit them being off-leash!!! (Our group is not limited to only Chihuahuas, but all SMALL dogs are welcome.) The socialization, camaraderie, and communication among dog owners is invaluable. This is true of many MEET-UP doggy groups. Nowadays, it's a happy escape from the unpleasantness with which many of us have to deal on a daily basis.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Please let Nancy Pelosi know that i strongly oppose the GGNRA dog plan!!! Thank you!

**Correspondence:** Dog owners love their animals. They love them so much they will let them do terrible harm to the environment and to wildlife and believe they are in the right to do so.

Many dog owners simply don't realize how much damage their individual pet can do. And en masse the hordes of dogs completely disrupt an already troubled ecosystem.

Some dog owners will keep their dogs on leash in wild and semi-wild habitats, but most will not, even when they know it's against the law. They think it's natural for their animal to romp with other dogs, as well as pursue wild birds and animals. And it \*is\* natural for their dogs to do these things, but it's also incredibly destructive.

Even after warnings of bans, dog owners as a group have continued to essentially refuse to control their animals.

We are privileged to live in city with so much natural beauty and so many wild creatures at our doorsteps. In order to survive in a world of ever encroaching human domination, these things need our help to survive - YOUR help to survive.

Dog owners are a vocal and active political group, but they're wrong in this.

Please act on the science and facts of this situation. Do not bend to the tyranny of the louder voice.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to Miwok Trail, Coastal Trail, Wolf Ridge, Rhubarb Trail, Oakwood Valley trail

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Caspar Willems  
San Mateo, CA

These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

It is also worth noting that parks that allow off-leash recreating make those parks safer for everyone. People with dogs visit these parks rain-or-shine, day-or-night, because dogs always need to be exercised.

That means there's always someone in the parks and solo people out for walks or jogs are safer for it, because they aren't alone.

Sincerely,  
Kristy Brady and 6yo goldendoodle Seamus Brady

**Correspondence:** Do not restrict dog access any more! I do not own a dog, but feel they are a wonderful family-oriented addition to our National Parks. I vote for keeping the current policy (Plan A I believe) and even considering opening up more dog access. I am shocked that the Park Service would even consider such drastic dog restrictions in the parks (Plan F and such). I want you to count my vote in full favor of as much dog access as possible in our national parks. DOGS ARE OUR FAVORED PETS AND NEED TO GET OUT AND ENJOY NATURE ACCESS TOO! Thank you.

**Correspondence:** Please do not allow unleashed dogs on Muir Beach. I went there less and less over the years as it became so widely known as a dog park, until I stopped going altogether. But recently I (a San Rafael native) have been making tentatively forays back to that area, enjoying immensely such things as the newly redone Dias Ridge Trail, the "secret garden" at the Zen Center and taking the Middle Green Gulch Trail from there, and the stunning Muir Woods and Muir Beach Overlook, and also, I went to Muir Beach itself while it was closed for restoration work and learned again why it's a such a gem. There is no reason that it should only be enjoyed by people who like unknown wet dogs bounding up to them and their tots (not to mention the effects of dogs on the habitat/wildlife). I know other people like myself who have stopped going there because it is overrun with dogs. I would be happy to see a coyote there, but no domestic dogs that bound up to you or on you, may bite you, and are unnatural animals running loose in a stunning natural place. (I have had bad experiences with dogs, including once a Doberman ran down the street to me and put its paws up on my shoulders, and meanwhile the owner was calling out "don't worry, he's friendly!"). Please, please, please, I am begging you, no unleashed dogs at Muir Beach. It's gorgeous, and I have a right to go there without fear of loose dogs. I don't want to have to pass it by for another 10-15 years or more. Thank you.

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Linda Lalley

**Correspondence:** I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because it is excessive and extremely imposing on the residents and pets of the San Francisco Bay Area. In this area you find a large and generous population of people willing to open their hearts and their homes to rescue animals and save them from shelters. Part of the reason they are able to do that in a highly populated city is due to these large off leash areas. Dogs are not meant to be stuck in an apartment all day, but the active lifestyle of these residents plus these off leash areas where dogs and owners are able to play fetch and run freely make that all possible. Additionally, these off leash areas allow dogs to run through all their excess energy making them content to sit at home for hours at a time. Without these off leash areas dogs will have excessive energy stuck in an apartment and will probably bark and tear the house apart. These changes will have major impacts that we may not even be able to foresee. Ones that I can think of include dogs stuck in apartments barking all day causing neighbors to get frustrated and potentially cause major arguments and less enjoyable living conditions. Dogs that are not able to get all their energy out and play in a productive manner can become aggressive and we may see more aggressive dogs on leash due to these restrictions.  
For me, the moments I enjoy living in San Francisco the most are those moments when I am at the beach with my dog playing with the Frisbee or playing fetch with a tennis ball. Those are the moments I capture

---

on my camera and post to my facebook bragging to friends on the east coast of how I live in such a wonderful, beautiful place. Those are the moments I love living in San Francisco the most. If you take that away, I don't see myself living here much longer. My dog is a huge part of my life and the time we enjoy together is very valuable to me. This is a major part of me enjoying living here and taking that away makes me consider living elsewhere. The convenience and enjoyment of taking my dog to the beach and other off leash areas is the highlight of my weekend. If we have to get in a car and drive for miles to find an off leash area that every other dog from San Francisco (and there are a lot), not only will that have a negative impact on the environment (all that not previously unnecessary driving) but also dogs in overcrowded areas will get into each other's way and potentially become aggressive. This is something very important and valuable to the residents of San Francisco. Even before I got a dog of my own I enjoyed watching the dogs on the beach play and seeing how they all managed to get along so well. Please don't take our parks away from us.

As a San Francisco native and mother to a very young child, I am writing to strongly oppose the Preferred Alternative because it is far too restrictive and will ultimately harm our city's unique sense of community. As an ardent voter who believes in the preservation of open land, I am appalled to see the GGNRA overstep their role of conservatory.

I oppose fences surrounding or delineating any off-leash area in the GGNRA. Fences make off-leash areas feel like pens and visitors using them feel minimized within the community.

My family walks our dogs daily at Crissy Field and I am always impressed by how responsible and attentive dog owners and dog care providers are on the property. The land is a gem that we protect and off leash areas are a key part of a happy, healthy community.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas merely because it deems that not enough people are complying with the leash restrictions. The GGNRA off-leash areas are a big reason why we choose to raise our young family in the city and not in the suburbs.

Best regards,  
Patricia

**Correspondence:** Please reconsider the severe reduction in off leash dog rules for GGNRA. The beach at Fort Funston, for example, is so valuable for the exercise of our pets. Should the real issue be the use of GGNRA by dog walkers with numerous animals not properly controlled, please institute restrictions targeted to multi-dog walkers who do not regulate their animals.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan/supplemental environmental impact statement. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet

policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Kelly Spencer

**Correspondence:** To live up to its name (Golden Gate National Recreation Area) your agency's mandate should include enabling taxpayers - - who, after all, own the land you manage on their behalf - - to have the most enjoyment possible from the area without destroying it. I recognize that there is a balancing act, here, since use always carries with it some small measure of destruction. The only way to keep the GGNRA pristine is to ban all use which, of course, runs against your mandate.

Some of the most fervent users of the people's land are dog owners. Here in Marin County, dog owners are an unusually responsible group of people. They value the nature that they and their dogs get to enjoy. Destroying the land would destroy their own pleasure in it. They therefore strike the perfect balance - - recreating on the land while respecting it.

With these considerations in mind, I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

In stating this preference, I am keeping in mind the fact that the GGNRA has already placed 99% o the recreation area out of reach of people like me who enjoy taking their dogs responsibly into nature areas. For this reason, there is no compelling reason to deny them full or partial access to the remaining 1%. The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

In sum, the GGNRA functions as the people's steward for the land. It does a splendid job, incidentally, and one that I and my dogs very much appreciate. Maintaining 1% o the land for full dog access will not interfere with the GGNRA's work, but it will ensure that the people (and their dogs) get to enjoy their own American bounty.

**Correspondence:** As an Environmental Educator, Bird Watcher, nature lover, and consistent user of GGRNA I am particularly distressed by the pressure to include both leashed and unleashed dogs into the area. A great percentage of "leashed" dogs actually run free and are followed by owners with the leashes draped around their necks. Dogs startle and harass wildlife and and can disturb humans.

A UC Berkeley study in the Eastshore State Park found that dogs consistently startle and chase migratory birds away from their foraging and resting, as well as harass and disturb nesting birds away from their crucial activities.

---

I enjoy quiet hikes to listen to birds and other natural sounds, to contemplate, to find some peace of mind. The intruding sounds of dogs barking or fighting, the harassment of strange dogs running up and jumping on me are distressing. Owning a dog is discretionary. Wildlife have no choice.

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

â€¢ We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

â€¢ Off-leash areas should be marked off with fencing or natural borders such as bushes.

â€¢ Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

**Correspondence:** To Whom It May Concern:

I am writing to oppose the alternative to the new draft dog management plan by GGNRA. As residents of San Francisco, my family, including our dog, frequents the Crissy Field recreation area on a daily basis - we also visit other open parks on occasion including Baker Beach, Fort Funston, and Ocean Beach. These recreation areas with their open trails and spaces for families and dogs to run are why we love living in San Francisco. The new GGNRA draft dog management plan would eliminate our ability to enjoy these parks.

With respect to the new draft plan, I believe that the proposal for closing off the park's dog-friendly openness with fencing is not supported by any legitimate evidence calling for this drastic change. It does not cite site-specific impacts or has it adequately taken into account the impact it would have on our community.

In particular, I oppose fences to surround or delineate any off-leash area in the GGNRA. I believe that the fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Like many current dog parks they will give owners who lack control of their dogs the ability to take them off leash causing much more problems for other dogs under voice command, and for visitors.

I am an engaged citizen, a tax payer, a voter, and a responsible dog owner. There has always been a mutual respect for everyone who uses our off-leash parks in San Francisco. As this city continues to grow and open spaces continues to be at a minimum, I urge you make the right and responsible decision to reject this new draft plan and maintain the tradition of allowing for dogs to be off-leash in these public recreation areas.

Thank you.

<b>Correspondence:</b>	Dear Superintendent Dean,				

I am a Mill Valley native and dog lover who frequently enjoys walking my 7 yr. old Labrador at Muir Beach, Rodeo Beach & trail as well as on many of the fire trails throughout Marin. There are not enough places left to walk dogs off-leash in Marin County and I want you to know I strongly oppose the GGNRA proposed ban on off-leash dogs at Muir Beach, Homestead, Rodeo Beach loop & all the Fire Roads as well as the complete ban on many of the Fire trails. This is outrageous & completely opposite of what the people of Marin want and stand for. Dog owners are the very people who care for these beautiful beaches and trails - more so than people without dogs. Please do not allow this unfair loss of roaming space for the people and dogs of Marin. I invite you to call me at any time to discuss further. I thank you in advance for your consideration & hope from the bottom of my heart you will support the opposition to the GGNRA plan.

Sincerely,  
Leigh Bakhtiari

<b>Correspondence ID:</b>	4115	<b>Project:</b>	11759	<b>Document:</b>	55416
<b>Address:</b>	San Francisco, CA 94109 United States of America				
<b>Outside Organization:</b>	Unaffiliated Individual				
<b>Affiliation:</b>					
<b>Received:</b>	Feb,15,2014 13:08:15				
<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Hello,				

As someone who work full time during the week, I look forward to my nightly and weekend walks in with my dog the GGNRA. Having the chance to spend quality time with my dog and exercising on a daily basis with him is important to my health, both physically and mentally, but also my dog's health.

I'm writing as I strongly oppose the preferred alternative described in the GGNRA's new draft dog management plan. It's restrictiveness will prevent me from exercising and playing with my dog as I have daily at Crissy Field's Middle Beach, Baker Beach, Ocean Beach, Fort Mason, or Fort Funston for many years.

I understand that the new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. I think these comments are so important to consider, as they reflect not just my opposition but the many

others in our communities. I also understand that there hasn't been a peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. I know the impact that this will have on my life, and my dog's life, and I know I'm not the only one with concerns.

I oppose the need for fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Fences don't help with dogs who are out of control, rather it will give owners who lack control of their dogs the ability to take them off leash causing problems for other dogs under voice command, and for visitors.

The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils. It only lists impacts that "might," "can," or "could" happen, but doesn't provide site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA.

Further, the plan lacks acknowledgement of its impact on other areas. Surely the GGNRA plan will affect local communities, neighborhood parks, and their preferred dog recreation areas. I don't frequent my city parks with my dog under voice command because they are too crowded, there's not enough room to exercise, and they're not at all relaxing. My time with my dog outside is a time for both of us to exercise, relax and feel free.

The GGNRA was originally set up to be a Recreation Area for a densely populated, urban area. The trails and beaches were set aside for dog walking per the original pet policy in 1979. That policy needs to be formalized and supported with current off-leash areas, and on new lands that the GGNRA acquires in the future.

Thank you for hearing my feedback. And I appreciate your consideration of these comments before moving forward with this plan.

Best regards,  
Monika

**Correspondence:** The discussion regarding multiuse access to parks is long overdue. As a birder, I have given up birding many of the parks here in the East Bay- -Wildcat, Albany Bulb, Bay Trail around Pt. Isabel, because of offleash dogs. I really don't want to be tripping over dogs or having noses in places I would rather not experience when I am focussing on birds, in addition to being growled at on several occasions.

In my experience, what is missing is oversight and fining of those few owners who do not obey the rules.

If there is to be any resolution, the Park District needs to do a survey of endangered species, either plant, bird or animal, identify those that need the greatest protection, like Snowy Plovers, establish rules, stick to them and then have a strong enforcement program. It's a waste of time having all these meetings where dog owners rule or environmentalists rule because the real rules needs to be set by the governing agency and enforced.

Thank you.  
Sheila Dickie

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Hello,				

I am submitting these comments in response to the GGNRA Draft Dog Management Plan/ Supplemental Environmental Impact Statement. I am a frequent visitor to the GGNRA, including areas from Stinson Beach south to Fort Baker. I visit both the beach areas and the inland trails and fire roads network. I appreciate the incredible amount of time and energy that the NPS and others have dedicated to this issue over the last decade, and would say its time for the NEPA process to come to a reasonable end, an alternative be selected, and as importantly, it be enforced. I support the implementation of Alternatives B or D, as clearly the most consistent with balancing the objectives identified in the SEIS. I will address only the most pressing consideration in my comments, in support of these Alternatives, and attempt to relate these to the objectives of the Dog Management Plan.

Provide a clear, enforceable dog management policy

First, all of the alternatives' definitions' and much of the impacts analysis, are undermined by the use of a vague and undefined term of "voice control", as though this were some verifiable standard, as easily observed as a physical leash. It is not. Anyone who has interacted with dogs in public knows that "voice control" means after repeated yelling by the dog owner, the dog may or may not obey, before or after it finished doing whatever activity (jumping on child, chasing wildlife, defecating on a public walkway, chasing another owner's dog, etc..) its pursuing. "Voice control" implies that the owner speaks, and the dog responds to do as the owner desires, which simply is not the reality outside of re-runs of The Dog Whisperer and The Adventures of Lassie. Because the specific impacts of the dog use are so closely tied to the nature of effective controls and limitations on the dog's activity, this criteria is absolutely critical. The GGNRA's reliance on this vague, subjective criteria as a basis for defining alternatives is a significant defect in the SEIS, and if retained, is likely to lead to future disputes on its interpretation. Any new policy should rely on clearly observable conditions and standards that support consistent enforcement and expectations by the public, meaning either dogs are on leash and under physical control, or they are

"uncontrolled", with the same expectations of any wild animal not physically constrained. Despite the appeal of a "voice control" expectation that balances the dog owner's desire for unfettered freedom of their pet with the GGNRA's focus on compromise between user groups, it's a meaningless standard at present, and is being applied throughout the SEIS as if it were as clear as day. The conditions of dog use should be simple and clear; on leash and under physical control, or uncontrolled. That is the reality of the current situation, once the convenient but misleading term of "voice control" is recognized for its meaningless practical impact.

Second, without effective enforcement, none of the Alternatives will be successful. The SEIS is silent on the current level of ineffective enforcement, and on any plans for increased and truly effective enforcement of current dog use regulations. This is a critical flaw of the SEIS, because like the issue of "voice control", the Alternatives are purely theoretical in intended outcome if not backed up by effective enforcement. I urge the NPS to not be silent on this practical disconnect. The best Alternatives will be greatly diminished in their intended outcome without effective enforcement. To advance an Alternative under NEPA, but not have practical supporting actions by the responsible federal agency to make the intended outcomes reasonably achievable, is flawed policy making at best.

#### Preserve and protect natural and cultural resources and natural processes

Unleashed, uncontrolled dog activity is known to lead to habitat destruction and harassment and destroying of native and endangered species. If ESA regulations were being meaningfully enforced in the GGNRA, these actions would not be tolerated, and dog use that resulted in taking/destroying/disturbing listed species would be treated in a far more serious manner. There are times when mutually exclusive goals have to be recognized, and uncontrolled dogs will result in taking/disturbing of ESA listed species, under the willful negligence of the dog's owner.

#### Provide a variety of visitor experiences

The GGNRA provides a huge variety of visitor experiences, and well-regulated dog use should be one of them. Right now, the overwhelming presence of dogs on some beaches is effectively excluding any other use, creating a significant imbalance in user experiences. The marginal benefits of uncontrolled dog use, versus on leash, for the dog users is far less than the major degradation of benefits to the non-dog users, caused by the wide-ranging impacts of the uncontrolled dogs.

#### Improve visitor and employee safety, and Reduce user conflicts

These two goals are closely related, and heavily impacted by the current dog use practices. We have witnesses numerous incidents of close calls where children and adults were put in harms way by reckless, out of control dogs that were clearly in sight of their owners, who chose to do nothing. We have been accosted by dogs while trying to sit and enjoy a snack on the beach, twice in just the last few weeks, once at Stinson and again at Muir, both under relatively uncrowded conditions, due to the obvious negligence of the dog owners. Maybe they had "voice control", and chose not to exert it, or maybe they really did not have control. Their owners were oblivious, taking no action, as is observed to be the case the majority of the time. A month ago, we witnessed a man carrying a baby being nearly knocked over by a dog running full speed back and forth across the bridge at Rodeo Beach, again to no reaction by the apparently oblivious owner of the dog. The lack of enforcement of rules and current practices are putting all users and the NPS at elevated risk of injury and conflict, and putting the NPS at greater risk of liability for fostering user conditions that have clear and preventable hazards like out of control dogs.

**Correspondence:** Although our family has grown recently with a new baby, we choose to live in our same small apartment with our labrador retriever for a very good reason. The close proximity to parks and the beach where we can let her run. My wife even moved us to this apartment so we could get a dog, that enriches our lives, as many different pets do.

The saying goes, "a tired dog is a happy dog", but how can that happen if the parks, beach or other areas make regulations or policies that prevent our dogs or other pets from getting the exercise they need? Not everyone is physically capable of running their dogs to the extent they need, which is why these parks, beaches and areas are important in a city such as San Francisco or in the surrounding suburbs. The most popular game of "fetch", which is done by all breeds of dog, not just our beloved retrievers, is absolutely impossible if your dog has to be on leash everywhere you go. The amount of exercise certain breeds need is too much for a person to "walk" it. Also we, and I am sure many others cannot afford to have their dog walked a couple times a day, everyday to meet the needs of the dog.

As a resident who lives near Fort Mason area, I often see on a nice weekend oodles of young people who are trashing the park, leaving behind waste, trash, bottles, broken ones on their way out of the park, and I think to myself, "how is it that dogs do more damage to these beautiful parks than humans are doing?" Sometimes I come across more homeless feces, throw up, and needles, in the local park than any dog waste. Basically I see more damage done by humans than by any amount of dogs. If dogs dig a massive hole in the sand at Crissy Beach, the tide rises and it is covered and flat in less than 24 hours. Most owners that I know are competent, and pick up after their animals and police others who don't. That is what is needed, if the concern is about waste, then everyone is responsible, even pick up dog waste you see that was left behind.

It is already difficult to live in the city of San Francisco as a family, when we cannot afford the homes or more spacious apartments that many dot com earners can afford. If these regulations and restrictions come to pass I feel it will just drives in another nail in the coffin for me,.....to finally come to the conclusion that I and my family have to leave the bay area to enjoy a "normal life" where we have more freedoms, space and less of the tickytack regulations and restrictions.

Please keep these off leash areas open for the benefit of so many good owners out there, and their companions who they love and want to be happy.

---

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach and Rodeo Beach and trails at Tennessee Valley.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Cecily Ward

<b>Correspondence:</b>	I have been walking my dogs at Crissy Field and Fort Funston for 15 years and the experience has enriched not only the lives of the dogs in my life, but also my life and the lives of the friends that I have met there over the years. Restricting off-leash dog walking in the GGNRA will negatively impact not only the quality of life of the many dogs living in and near San Francisco, but also				

---

the people in their lives.

The vast majority of dog owners are responsible people, and in my opinion are more aware of the good of the environment and respectful interaction with others than those who are simply absorbed in their own self interest or their precious, vulnerable kids. In 15 years the most traumatic negative interaction between off-leash dogs and the general public that I witnessed was the theft of a chunk of cheese from a picnic. Dogs are not the menace they are made out to be by a vocal minority of the population. As with any aspect of life, irresponsible dog supervision should be punished and we already have laws as well as social mores that more than adequately address such problems.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

**Correspondence:** I support the proposed maps identifying on-leash areas within GGNRA. I do not support off-leash areas except where well contained and isolated from other types of uses, such as walking, parking to enjoy views for those who cannot walk trails, picnicking, bird watching and other low-impact wildlife viewing. I find "voice control" to be an invitation to have a bunch of dogs running loose (potentially disturbing wildlife, people and other dogs) while their owners scream, yell, scold their dogs, often without controlling effect. These park areas were set aside to maintain a wild setting for people to enjoy, not for pets. I would prefer these areas labeled voice control to be limited, and generally prefer leashed dogs in parks.

**Correspondence ID:** 4137 **Project:** 11759 **Document:** 55416**Address:** San Francisco, CA 94114  
United States of America**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Feb,15,2014 14:38:06**Correspondence Type:** Web Form**Correspondence:** The Draft Dog Management Plan is ill-conceived. It would mean the closure of most of the off leash areas San Franciscans use to exercise their dogs. It would deprive dog owners the opportunity to properly socialize their dogs with other dogs and people. If this plan were to go into effect, many of the city's dogs would become more territorial, fearful, and untrusting, which in my opinion, would increase not decrease, the likelihood of dog aggression.

---

**Correspondence ID:** 4138 **Project:** 11759 **Document:** 55416**Address:** San Francisco, CA 94116  
United States of America**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Feb,15,2014 14:40:35**Correspondence Type:** Web Form**Correspondence:** Dear Superintendent Dean,

I love Crissy Field and Fort Funston and visit these places regularly. My family and I live three blocks from Ocean Beach. I used to walk my two Irish Setters on Crissy Field and the adjacent beach every day

for 15 years. Their off-leash recreation contributed to their long lives and quality of life, as well as my own. Never once during that period did I encounter one negative impact to the environment from any dogs in the area. In fact, I saw countless snowy plovers and other birds along the shore in harmony with the dogs and humans nearby. I always cleaned up after my dogs, who were very well trained and socialized and always promptly responded to voice control. Like the vast majority of off-leash dog walkers, I was a responsible dog owner.

The "Preferred Alternative" plans to restrict off-leash dog space are way too restrictive. As someone who visits Crissy Field and Fort Funston every week and Ocean Beach daily, I would like to point out some of the problems with these plans.

Crissy Field: "Alternative F" limits way too much space for off-leash recreation on the Crissy Airfield and Promenade. At the very least, all of the field east of the path between Mason St and the former Coast Guard Station needs to be off-leash. Dogs need to run for their health and well-being. Currently, the airfield is home to gigantic, industrial art sculptures and is often used for large events. There is no reason that the airfield should be restricted for off-leash use. Furthermore, I used to walk my dogs along the inlet between the Central & East Beaches and see no reason why dogs and humans cannot enjoy the inlet off-leash. "Alternative A" should remain in effect for this location.

Ocean Beach: Ocean Beach serves as the backyard for the citizens of the Outer Sunset. You cannot possibly to ban off-leash dog walking from Golden Gate Park to south of Sloat Blvd. "Alternative F" is completely unrealistic in scope. We live 3 blocks from Ocean Beach by Vicente St., and Alternative F would force us to get in a car and drive somewhere else to provide proper recreation for our canine companions.

Fort Funston: Why does the "Alternative F" proposal restrict off-leash dog walking along the Battery Davis and Sunset trails and their surrounding areas? This former military area is crucial for the thousands of dogs who depend on this area. There is no reason to restrict any of this land for off-leash use.

Based on the examination of the San Francisco areas in question listed above that the GGNRA's plans to restrict off-leash use in Marin and San Mateo Counties are most likely equally near-sighted, myopic, and draconian.

The GGNRA already has an extremely small amount of space set aside for off-leash dog walking as it is, and the proposed "Preferred Alternative" plan to limit the available space is draconian, pointless, absurd, unfair, and unrealistic. This plan would destroy the quality of life for thousands of people and dogs who deserve their continued enjoyment of and recreation in our open spaces. The limitations presented in the "Preferred Alternative" are way too radical in scope. This plan was obviously crafted by a very narrow minded small group biased against dogs, with little to no scientific evidence to justify their malicious intentions. The real impact to the environment of the GGNRA is from humans who do not pick up their trash. I have personally picked up huge amounts of food wrappers, plastic beach toys, cigarette butts, and other human trash.

The GGNRA needs to realize that these open spaces have always been used by the people of San Francisco and the Bay Area for recreation that includes off-leash dog walking, and to limit these spaces in such a myopic and draconian manner amounts to nothing more than environmental extremism. I am certain that a much more fair and balanced compromise can be reached than this ridiculous and misnamed "Preferred Alternative."

It is obvious that the GGNRA is not listening to the overwhelming needs of the people to maintain more space for off-leash recreation. I consider myself to be a staunch environmentalist, but the new plans new presented out by the GGNRA, including the "preferred" Alternative F versions, are blatant examples of

"environmental extremism" run amok. These San Francisco lands were transferred to the NPS under the "Golden Gate National RECREATION Association" with the express legal understanding that these areas would retain their previous recreation status including off-leash dog walking. As I walk Ocean beach every day, I pass by large, thriving throngs of Snowy Plovers, Sanderlings and other shore birds living alongside humans and off-leash dogs as they have done so for generations. The restrictive plans to hinder off-leash dog recreation is simply misguided, cruel, and unjust to the thousands of dogs and their responsible guardians who depend on our public lands to sustain and enrich their lives.

In short, I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy along with off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Jonathan Maguire  
2646 45th Ave.

<b>Correspondence:</b>	I urge the decision-makers to keep the status quo, meaning no new restrictions or requirements for the present off-leash/voice control areas.				

Keep the off-leash/under voice control areas as they are today (February 15, 2014), free and open for dogs' exercise off-leash. Dogs are sentient beings and need freedom to be dogs. Lack of proper off-leash/voice control exercise for pets leads to their frustration and possibly aggression which these further restrictions would bring to fruition through cause and effect.

Many years ago when the Army had possession of the Presidio & Crissy Field area a petition was signed by myself and other dog owners who wished the area to be off-leash/voice control, and the petition was granted and dogs off-leash were allowed.

This policy should be a grandfathered in provision (as I believe it has been since the GGNRA took possession).

Ocean Beach should remain off-leash/under voice control as well as Fort Funston and other GGNRA areas presently enjoyed by pet owners, pet-owner families, and their pets.

There are fewer and fewer areas for off-leash since the City & County of SF instituted its then new dog policy a few years ago which basically relegates dogs to small fenced-in areas around the city with wood chips placed on the surface (splinters).

I view this covering with wood chips - - and perhaps the SF Health Department should also - - as a health hazard as it concentrates urine and feces and opportunity for diseases to spread.

The dogs, their owners, and children are basically playing in a cesspool. Playing fetch just brings the filth into the dogs mouths with possibility of transmission to humans.

In addition these areas become dust bowls in the summer and mud bowls in the winter due to the concentrated use.

I have witnessed Corona Heights park near my home succumb to the concentration issue where prior to fencing the off-leash area vegetation flourished, and the now fenced-in off-leash area is a wasteland of feces- and urine-ridden wood chips covering the surface area.

PLEASE, NO MORE RESTRICTIONS. KEEP THESE GGNRA AREAS AND OTHER AREAS OPEN TO OFF-LEASH/VOICE CONTROL.

THANK YOU.

<b>Correspondence:</b>	Dear Park Staff,				

Here we go again. Another move to limit my access to trails in Marin. Because I have a dog. I have heard the arguments and understand the problems of too many dogs running in the wrong places. I do however object to your management plan which punishes me for the bad actions of a few dog owners who 'do not get it', with their careless use of the land letting the dogs run and poop with abandon. I am 66 and a lifelong resident of this area. I voted for the original National Park over the alternative which appeared as massive development. It's not the 60's anymore and the urban park that grew massive attracts lots of people. They are a problem. Your mandate to protect and preserve is for us the people and that is your job. It is not to protect the land from us, the people but allow us access to the land we own as people for us to enjoy which for me is to walk my dog.

Currently my favorite walk is a off leash Oakwood fire road and trail. Now I will be banned from walking the trail and must walk up and back on the road leashed. Just like your bike use plan you can not go anywhere easily and make connections. Just in and out.

Instead of this plan which man power must enforce thus wasting time giving nice thoughtful dog owners a ticket. Enforce current laws about poop and dogs running. Give hefty citations to those offenders who are really abusive. Educate others, be helpful and stop acting like the police and everyone is criminal. If your budget is short and can't fund the manpower to control bad dog owners and park visitors, re-prioritize. Stop the fancy infrastructure developments and increase workforce to effectively protect the park and good visitors from those doing their bad deeds.

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I accept Alternative A, the No Action Alternative, since I will never have access like I did before all you other people arrived on the scene.

John Shuey

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Todd Roehrman

**Correspondence:** I strongly oppose the plan to change the dog rules especially at Oakwood Valley and Alta Rd areas. What you are doing is limiting the enjoyment of this RECREATION AREA by PEOPLE! I've been using these areas almost daily since 1996, when I moved to Marin City. I did a survey, and more than 75% o the persons met on these trails have dogs, most off leash except for the dog-walkers who generally have their flock on leash. In fact, persons-with-dogs are so prevalent on these trails that my dog expects to see another dog, for socializing, whenever we encounter a person. If you ban dogs, you are banning tax-paying people.

What might be your purpose? Are there a few complainers who believe dogs affect their 'wilderness experience'? If so, send them to PRNS Wilderness Areas just a short drive away. Is it that you are protecting wildlife? In the period I've been using this area with my dog, I've encountered mountain lions of 3 occasions, bobcats on dozens, and coyotes even more.

I've spent way more than 200 hours pulling scotch and french broom from these trails over the past 10 years, and only once have I ever met a 'ranger' (who questioned my ability to distinguish broom from other plants! your restoration people, in fact, have lent me a weed wrench). So, on what basis have you made this proposal? I'm pretty sure that it is not based on personal experience.

Please spend your time and energy on parkland restoration and not on banning dogs and their owners.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to (put your preferred GGNRA trails and beaches here).

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin

residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** To Whom It may concern,

I have a pet care business and take the dogs out for walks to a area where off leash is allowed. It is so important to let dogs run around to get all that energy out.

We are very responsible with cleaning up after our dogs as well as keeping them under good control.

Their may be people that don't like dogs and would like to have them confined to a leash as well as people who love to see there dog walk and or run along with them. I think it would be fair to put up a sign up for people who don't want to be around dogs that are off leash which alerts people that this is an off leash area and tomenter at their own discretion.

Let's play fair with this issue.

Thank you,

Sincerley,

Teresa M. Steele,

Primo Pet Care,

**Correspondence:** I am at Rancho Corral De Tierra frequently as we have a horse in that vicinity. In the last 5 years I have seen many responsible dog owners with a handful of really poor owners. I would say it has only been about 5-10 percent of the people walk their dogs off leash. But that 5-10 percent has not only caused turmoil and spatial disrespect for others on trail along with local habitat disruption. I feel there should remain a leash law in conjunction with strict enforcement . I have not only seen off leash dogs attack dogs on leash but dog walkers with 6 dogs off leash and out of control. 1-2 dogs off leash is somewhat maintainable but when there are 6 the the pack instinct comes into place. The dogs run as a pack and is disruptive to other park members who are trying to enjoy the wildlife and elements that do not want to be disturbed by a pack of dogs. These few that I have run into on trail tend to be disrespectful of other peoples space and have no concept of control for their animals they get very vocal and some have been quite nasty and refuse to leash their dogs. If we let our children run wild like that in school they would get sent home .... What's so different about the parks system and their dogs? I ride my horse responsibly through this park nearly everyday and people would certainly be offended if I let her run upon their dogs and stick her nose where it doesn't belong.... Why is it so different for these dogs and their owners? There should be strict enforcement to allow for dogs and non dog owners or even responsible dog owners to coexist here.

**Correspondence:** When Crissy Field was created, one of the purposes stated was to create more space for off leash recreation because of the anticipated growth in the number of visitors with dogs. This proposed reduction in off leash recreation area at Crissy Field is a reversal of course without a basis especially where the impact on all park visitors will be increased concentration of dogs in smaller areas. This makes no sense and is setting the dog management plan up for failure.

Having lived with my family - including our dogs - in the Marina for 34 years, making the proposed changes to off-leash recreation for my dogs will definitely impact the quality of my life and theirs.  
PLEASE DON'T UNLEASH THIS PLAN!!!

San Francisco already has a reputation for being a difficult place to afford to live, let's not add more reasons for people to seek their homes and jobs elsewhere!!

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach, the Oakwood Trail in Tennessee Valley, and countless other locations in Marin County. I have been doing so since 1980, with totally friendly Golden Retrievers who need a place to experience free and open space.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

THOSE OF US WHO HAVE LIVED IN MARIN FOR DECADES AND HAVE - UNTIL NOW - RESPECTED THE GGNRA AND THEIR EFFORTS IN PRESERVING THE AREA ARE TOTALLY INCENSED BY THIS THREAT TO USE OF THE GGNRA BY LOCAL RESIDENTS AND THEIR DOGS. THERE IS EVERY REASON TO LISTEN TO, AND POSITIVELY RESPOND TO, INVOLVED COMMUNITY MEMBERS WHO WANT TO CONTINUE TO RESPECT THE GGNRA BECAUSE THE GGNRA LISTENS AND RESPONDS TO THE OVERWHELMING NEED FOR ALLOWING CONTINUED DOG USE.

THE APPROACH TO TAKE IS TO ALLOW US TO CONTINUE EXISTING USE BY DOGS!!!  
WHY ALIENATE A SUPPORTIVE CONSTITUENCY??? ... REALLY!

Thanks,  
Frank Z. Leidman

**Correspondence Type:** Web Form  
**Correspondence:** I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because a large part of the pleasure of visiting recreation areas is seeing an area where people and animals can intermingle in a relatively unrestricted way. There are already plenty of places in which people who dislike animals can go to find recreation, but the number of places for humans and animals to find positive interaction is becoming our greatest scarcity. Dogs should be free in recreation areas to roam under the supervision of their owners and intermingle with each other.

From an environmental impact standpoint, dogs are FAR less damaging to the environment than people. If there is a particularly sensitive habitat that exists in these recreation areas, they should be closed to public use entirely and redesigned as wildlife preserves. A dog in the company of a responsible owner will stay on walking paths, refrain from disturbing wildlife, and make the overall park experience more enjoyable for everyone who might potentially enjoy the connection with nature that an outdoor recreation area is supposed to foster. Conversely, humans leave behind garbage (particularly cigarette butts,) trample pants, and, at times, create a tremendous intrusion into the lives of wild animals. The ecological impact of humans is far more detrimental than the impact of dogs. Thus, if an area to sensitive to intrusion, it should not be open to any foreign intrusion.

Please retain the rules and regulations adopted in 1979. I adamantly support not only the continuance of the current off-leash areas, but an expansion of outdoor areas in which dogs are permitted to accompany responsible owners without physical restriction (i.e. leaches, harnesses, etc.)

**Correspondence:** My wife and I used to live in Palo Alto and we still visit the area regularly. We frequent these beautiful parks and we almost always bring our dog, a 10 pound Norwich terrier, Layla. We derive a great deal of pleasure from these visits, and if some of the proposed changes were to go into effect, we would be adversely impacted.

I want to be clear that I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

Additionally, I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will

make off-leash areas feel like pens and visitors using them will feel unwelcome. Fences would mar the landscape and become an eyesore.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

I would support a more strict enforcement of the current rules. I believe that there area very small number of dog owners who do not have proper voice control over their dogs when walking them off-leash. These owners should be fined. But, that small number of bad apples should not become justification to change the rules for everyone.

Thank you for considering my comments. I trust that you will make the right decision.

Jesse Flowers

<b>Correspondence:</b>	Please do not limit or decrease the on or off leash dog access to the trails and beaches in the Marin County area. We love to enjoy the orders with our best friend, Cali Oso, and the dog friendly trails and beaches are already extremely limited. I understand that there can be some negative effects of the dogs in the wildlife but our animals are part of our family and they need to get out and enjoy these areas. 99% o the trails are already dog prohibitive.				

---

Thank you for your consideration

Ben

**Received:** Feb,15,2014 00:00:00  
**Correspondence Type:** Web Form  
**Correspondence:** Dear Superintendent Dean,

As a veterinarian and someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. In addition I am concerned about the proposed restriction and the affect it will have on the dog population at large. Exercise is such a HUGE part of health for both people and animals. I fear this will have detrimental behavioral affects on dogs leading to more aggression and people will be become more sedentary as well.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

**Correspondence:** 02/13/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...This plan mostly ignores the overwhelming popular dissatisfaction with the previous plan and reduces dog recreation areas throughout the GGNRA with reductions of 80% i some parts. 50 % o homes have dogs. We need area to run and play with our dogs. This is not a good plan.SEIS admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. However these anecdotal claims have no context - how frequent were they, how serious, etc. - and cannot be used to set policy. An SEIS is supposed to be based on science, not anecdote. The SEIS also says it relies on the best professional judgment of NPS staff to determine impacts from dogs and their importance when there are no scientific studies of impacts in other parks available (e.g., p. 396). NPS staff have demonstrated a long-standing, strong bias against dog walking, and the SEIS should not depend largely on their biased judgment and anecdotes for proof that impacts from dogs are currently occurring.

**Correspondence:** My husband and I walk lived in Palo Alto until recently and return frequently to the Bay Area. On our visits, we make sure to walk with our dog in Fort Funsten and Chrissy Field. This was one of our favorite activities while we were in living in the Bay Area. We derive great deal of pleasure from these visits, and if some of the proposed changes were to go into effect, we would be adversely impacted.

We oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

Additionally, we oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Fences would also mar the landscape and become an eyesore. In addition they may prevent dogs from getting as much exercise.

We oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

We would be in support of a more strict enforcement of the current rules. We believe that there are very small number of dog owners who do not have proper voice control over their dogs when walking them off-leash. These owners should be fined. But, that small number of bad apples should not become justification to change the rules for everyone.

California contains a large community of dog owners who enjoy the wonderful off-leash dog parks. It would be a travesty for this right to be taken away from them. Thank you for considering my comments. We trust that you will make the right decision.

Shari Flowers

**Correspondence:** 02/14/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...it is too restrictive and will drive dog owners to the already overcrowded city parks of San Francisco.

My partner and I recently moved to San Francisco from Washington, DC with our 5 year old collie mix Max. Every weekend, we take him to either Crissy Field, Ft Funston or Baker Beach to run freely on the beach, swim in the water and socialize with other dogs. We are responsible dog-owners who pick up after our dog and leave any area we visit untouched.

---

We live in a small condo with no yard, so if it weren't for the GGNRA parks, we would be limited to taking him to small city parks that are already filled with homeless people and their waste. If the GGNRAs became restricted from dog access, it would create major over-crowding in the other city-run parks in the city and cause a ripple effect impacting all of the people visiting these parks for recreation, picnics et al.

Please DON'T do this...

**Correspondence:** 02/14/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because decreasing available space for dogs to exercise and play together off-leash is a very bad idea. I am fortunate enough to live in the East Bay where I have access to very fine off-leash dog areas. To restrict the residents of San Francisco is not a good idea. Dogs are not only man's best friend but they fulfill a critical need for many people in terms of companionship and support. But dogs need the opportunity to socialize and exercise that can only be met by access to off-leash exercise areas. Thank you for your understanding.

**Correspondence:** 02/14/14. I urge you to preserve some off-leash areas within the Presidio and elsewhere in the GGNRA. We have so few off-leash areas in and around San Francisco. We need to promote pet ownership for our mental and physical health, especially those of us living in cities. Dogs, in particular, promote our physical health by taking us for frequent walks. But a dog really cannot get enough exercise to be healthy if it is at the end of a tether.

**Correspondence:** 02/14/14. I oppose the GGNRA Draft DMP because....WHERE'S THE BEEF?! - site-specific, peer review studies, required by law? that support their conjecture and presumptions to support these drastic changes to a 35-year policy (1979 Pet Policy, still legal and in effect ) that used 2 years of real science, studies, and public input from all stakeholders (and actually listened to them). The GGNRA admits they don't have any. They d.elete.d/omitted the scientific studies that prove the out com e is very different from what they say. The statistics on their own web site contradict their claims.

As a mother, dog owner, bird lover, nature lover, plant lover and environmentalist, I don't want ANY of our resources harmed. I taught my children and now teach my grandchildren to be good stewards of the earth. If there were any peer reviewed, scientific studies that actually show the dogs are causing harm, I would support changes that would actually help the environment, unlike NPS's fencing off acres to the public which not only did NOT protect the bank swallows, it gave birds of prey posts on which to sit and pick off the birds. The birds that were not eaten, left.

To make such dramatic changes without sound science and evaluating the impact of those changes, specifically what it will do to our City parks, is unconscionable.

Stop wasting massive amounts of taxpayer money on these exhausting exercises in frustration - ANPR, NR, DEIS, SEIS - when they haven't listen to the thousands of com ments submitted, and the SEIS does not address concerns raised in the DEIS. Please tell the park service to simply enforce the current laws on the books which protect this valuable urban recreational resource. Ticket the people who don't pick up the poop; whose dogs chase birds, or are not under voice control, etc.

Keep the current law of the land- the 1979 Pet Policy - with a Section Seven Special Regulation and an addendum to include preserving historical recreations of newly acquired lands.

Sincerely,  
Jane Shepard

**Correspondence Type:** Web Form  
**Correspondence:** 02/14/14. I oppose the GGNRA Draft Dog Management plan and think you should be aware of the following:

As recently as Ms. Pelosi's Forum in Stern Grove, Frank Dean and Howard Levitt keep telling the public "but there are so many more dogs and people now, we have to do something". This is an excuse and totally unjustifiable.

Increased usage over time was anticipated when this National Recreation Area was created. The House Report No 92-1391 made clear that the GGNRA would be confronted with problems in San Francisco that would require careful planning because of the high volume year-round visitation:

"As a national urban recreation area, this new component of the national park system will be confronted with problems which do not frequently occur at other national park and recreation areas. Great numbers of people can be expected to use the area-particularly those portions located in San Francisco County." (pg. 11)

. In October, 1977, Rolf Diamont, GGNRA "Environmental Coordinator" prepared a memo proposing a "Draft Dog Policy for San Francisco Unit." His memo enumerated the following guidelines:

1. "No regulation, verbal or written, should be attempted that cannot be reasonably and consistently administered."
2. "Dog regulations should be different for different areas of the park reflecting public needs and attitudes as well as urban geography and our capabilities."
3. "When we discourage or restrict dogs in any area, whenever possible, an alternative site where dogs are allowed should be suggested."

We don't want excuses; we want site specific peer reviewed studies that prove the damage they are claiming. There are none in the SEIS. NPS has not done their job. Until then, the 1979 Pet Policy remains the law of the land.

**Correspondence:** 02/14/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because the only times I enjoy the beautiful parks of GGNRA is when I am taking my dog to run, exercise and play. If he cannot be off-leash under my supervision in the GGNRA, then I will not be benefiting from the use of the parks either. I strongly support off-leash park use for responsible dogs and dog owners. Thank you.

**Correspondence:** 02/14/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because...my little rescue dog Nami loves it there. It's her favorite place in the world to run and play with other dogs and get fresh air and exercise. We and countless others who walk their dogs at places like Fort Funston really realize how lucky we are to have places like this and do our best not to let our pooches run amok and clean up after them. Please don't put restrictions on off-leash dog walking.

**Correspondence Type:** Web Form  
**Correspondence:** 02/14/14. I oppose The Golden Gate National Recreation Area (GGNRA) Draft Dog Management Plan because 1) the Preferred A.lter.native is too restrictive. There is no justification in the SEIS for major changes. Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

2) I Oppose fences to surround or delineate any off-leash area in the GGNRA. The SEIS Preferred A.lter.native proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and visitors using them will feel unwell. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

3) I oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

Sincerely,

Philip Sweet

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Irene Dick-Endrizzi

<b>Correspondence:</b>	Dear GGNRA Officers,				

please reconsider the plan to drastically reduce allowed off-leash play areas for dogs. As a responsible dog owner, I believe that responsible dog ownership needs to be exercised in order to be widespread. Ghettoizing dogs-trained or not-into small fenced areas gives their owner an excuse to never properly train and socialize their pet. I am all in favor of instituting harsher penalties for owners who don't clean up after their pets, cannot control their pooches either verbally or with an electric collar, and cause disturbances to the ecosystem, the local wildlife, and other GGNRA patrons. That said, I believe we can all coexist in a peaceful and respectful way-hopefully one that allows me and my dog to play fetch on the Pacific shores for many years to come.

Respectfully,

Giacomo Fiore, Ph.D.

**Correspondence:** I read the section of the report that discusses the impact of dogs on vegetation, which is offered as part of the explanation for reducing the number of areas where dogs would be allowed off leash. The section on page 15 of the introduction to the report relies on a number of old studies (dating to 1935), which state that breaking branches and bending limbs can be harmful to vegetation. I understand that off-leash dogs might cause such damage to vegetation, but the same would be true for deer, coyotes, and other large mammals. I know of other research that actually cites the beneficial effects of such interactions between large mammals and the surrounding vegetation.

To me, the most disappointing aspect of this section is that it makes no mention of the fact that the overwhelming majority of off-leash dog use in the GGNRA is on grown lawns and on beaches, where none of the cited problems can occur. The evidence offered does not in any way prove that a change in policy will reduce the number of broken branches in the GGNRA. By citing these studies in the way this report cites them, the NPS seems to be reaching far outside of any known impact of dogs in the GGNRA in order to make a case for very broad restrictions. I would prefer that the NPS rely on arguments that make a connection between the actual effects of dogs in the GGNRA and the policy recommendations.

Frankly, isn't it obvious to the NPS that changes to regulations regarding off-leash dog activities in locations where there are no branches won't have any impact on the incidence of broken branches?

I appreciate that the NPS would prefer to change the policy for off-leash dog-walking in the GGNRA. However, I hope that the NPS appreciates that this section about the impact of dogs on vegetation does not prove in any way that the new policies will have any beneficial impact at all.

**Correspondence:** I have been walking my golden retrievers off leash at Fort Funston for more than twenty years. In the many hundreds of times I have been there I have never seen a single serious problem with any of the thousands of off leash dogs I have encountered over the decades. GGNRA is a recreation area, not a nature preserve. Fort Funston has more than enough recently fenced off and restricted areas for native plants and birds. Let people and their dogs enjoy it the way they have for decades. My dog needs the exercise and so do I. A retriever can't retrieve on a leash.

**Correspondence:** I am so sick of unleashed dogs and their irresponsible owners. I go for a daily walk either in the Bayview's shoreline parks or in San Francisco's Golden Gate Park; there isn't a day when I don't encounter an unleashed dog in areas where signs are posted stating that dogs must be on leash. On a few occasions I've pointed out the signs to dog owners and have been subjected to verbal abuse or threatened with physical violence. I would love to see just one dog owner cited and fined for ignoring the leash laws. I've seen unleashed dogs digging, chasing wildlife, and leaving their mess behind...yes, I have recently stepped in dog poop on a trail with signs requesting dog owners to clean up after their dogs. I disagree with Tom Stienstra (S.F. Chronical, January 20, 2014) who admonished park rangers for "imposing their will on people they do not know..." and he cited the case of the ranger in Half Moon Hay who stun-gunned a man walking his two small dogs who did not stop as he was asked to. I say it's about time that dog owners who scoff at leash laws are made to suffer the consequences.

Please, good people, give us non-dog lovers (and our wildlife) some outdoor space free of unleashed dogs.

Respectfully submitted,

Joyce Gubelman

**Correspondence:** There is no good reason to eliminate the last remaining trails for our dogs. This open land is owned by the government.

Government is run by citizens, for citizens. We have already established that much of what government does anymore is in the best interest of itself and not it citizens. Now, if that is not enough, you want to stretch your authority over dogs too.

We are lucky to have so much open land in Marin. The land is to be enjoyed by those who live in the bay area. And, many of those people own dogs. We should be allowed to enjoy nature with our dogs.

There are so many good things you guys good be doing, seeking to expel dogs is not one of them. Let go of this or next we will work on getting you and your leaders replaced.

Marty Allen

**Correspondence:** I support Alternative A to the Dog Management Plan. Off-leash dogs should not be permitted in GGNRA just as they are not permitted in any of our National Parks. I have never understood why the park service has allowed dogs to run off-leash in these special areas in San Francisco, Marin, and San Mateo. Every dog owner believes that his or her dog(s) is well-behaved and should be allowed to run loose in any open space regardless of the damage the dogs do, the wildlife they terrify, the land they foul with their excrement and urine, or how unpleasant they make these spaces for people who are not comfortable with dogs.

I greatly resent being painted as the bad guy in this debate because I believe that the prohibition against unleashed dogs anywhere in a national park should be enforced. Unleashed and leashed dogs have no place on the trails in these parks, the open lawn spaces, or other areas, whether the park is in an urban area or outside of it. Dog owners are myopic when it comes to the damage done by their animals. While some do clean up the stinking piles of excrement produced by their dogs, I have yet to see a dog owner manage to clean and make fit any place where their animal has used a grassy area or open space as a toilet. We don't tolerate people pissing and shitting at will in our prized park areas. Why on earth should dogs be permitted to do so?

Several years ago at Ft Funston, I found myself surrounded by more than 15 unleashed dogs, their walkers nowhere in sight. Due to bad experiences with dogs, I'm uncomfortable around dogs that are not under the direct control of their handlers and I was absolutely terrified. The irresponsible morons who allowed this situation to happen just shrugged it off and told me the dogs were all "friendly." I have never returned to Ft Funston, deterred by the packs of dogs that have free run of a national park - - a National Park!!! - - while the dog walkers feed at the public trough, ruining this jewel for their personal gain. Private, unregulated commercial activities in the parks are not allowed so why turn a blind eye to the damage inflicted by these paid walkers.

Friendly or ferocious, dogs are dogs. National parks are national parks and the National Park Service owes it to all of us to enforce the same laws and regulations in San Francisco, Marin and San Mateo that apply to dogs in these special areas that have been preserved for the enjoyment of all citizens. Not all DOGS, all citizens. The fact that so many dog owners can't distinguish between the two is no excuse for allowing this disgraceful situation to continue. Their sense of entitlement is breathtaking - - just watch those yahoos allow their animals to run loose at Ocean Beach at all times, including when signs clearly indicate that the dogs need to be leashed to protect wildlife such as snowy plovers, particularly during breeding seasons. They have no concern whatever for anything beyond the comfort enjoyment of their pets. The fact that their dogs foul the beaches, trails, and grassy areas of the park, while making them so much less inviting to many small children and adults, pales in comparison with their perceived "right" to allow their dogs to run wild and shit and piss at will.

I realize this is a very difficult situation due to the loud, organized dog owners who insist on asserting their non-existent "right" to inflict damage on our beloved national parks. They think they should be allowed to exercise their animals in these special places and use them as toilets. They argue that because this obnoxious behavior has been tolerated in the past, it should now receive official blessing from the park service. I shudder to think how the dog owners will push against the next set of regulations when they feel fully entitled to ignore the existing ones.

Please do the right thing. Enforce the same regulations in our beautiful GGNRA that apply to every National Park. Don't give in to the organized and entitled dog owners, no matter how much noise they make. Do your job to protect these special places for generations to come.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** The National Park Service needs to stand firm and meet its obligations to manage both recreation and the natural resources in the Golden Gate National Recreation Area (GGNRA). Adopting even stronger dog management policies will provide this balance. For the moment, this proposal is the most sustainable proposal to date and should be adopted.

Despite current practice and what you are being told, the GGNRA does not belong mainly to dog owners. Many of us strongly desire to have areas off-limit to dogs, especially if wildlife is at risk. And those off-limit areas need to be separated with signs, fencing, and enforcement.

Also, off-leash areas need to be similarly separated with signs, fencing, and enforcement. Especially fencing.

When we are in the GGNRA, we need areas where we do not need to have to worry about dogs bounding up to us and threatening us. Nor should we have to worry about their feces. Do the rest of us need that?

Dogs under "voice control" is a bad joke. Almost no dog will respond if a bird is within reach of a bird or can chase other wildlife. Yet few dog owners acknowledge this danger.

The current proposal offers a certain real balance among people without dogs, dog owners, and wildlife. Please note how very much dog owners receive under this plan and do not irresponsibly give in to political pressure.

Please adopt and implement the proposed plan (and add fencing to separate the off-leash areas).

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Ellice Sperber

**Correspondence:** As a wildlife researcher at San Jose State, I have been disappointed to see how this SEIS has promoted skepticism for Federal Management of wildlife resources. I pointed out in the first round of comments that many of the conclusions of the SEIS with regard to negative impacts of dogs did not follow from the contradictory scientific literature cited in the analysis. Perhaps the GGNRA feels that the public will not read or cannot follow this information. Summaries of this literature, particularly in the section on Dogs and Natural Resources, are not balanced or objective. Little effort has been made to investigate any of these issues for the sites under consideration, although clearly there would have been public support for data collection. For example from page 34, "It has been documented that recreational activities can affect vegetation and soils, resulting in damage to plant communities (Cole 1978, 281; Douglass et al. 1999, 9.2)." All species in their normal behavior affect vegetation and soils. Where are the specifics? This document lacks the balance and attention to measured impacts that we expect in a formal SEIS.

The need for action related to litigation referred to on page 1 on the SEIS is largely a result of the GGNRA's own decision not to follow appropriate procedures. The conclusion that "The conflicts will likely escalate if not addressed .." also on page 1 is not supported by experience or data.

---

The statement on page 5 " ... for more than 20 years, the park erroneously implemented the 1979 Pet Policy in contravention of Service-wide regulations." sets the stage for the apparently predetermined outcome of this SEIS. Also this appears to apply to the conclusion on page 24 "The quality of urban areas is not a significant factor in determining a dog management policy for GGNRA..." given that urban quality of life has been a persistent issue in the debate.

On page 6 the SEIS reads that "... the park continued to receive an increasing number of complaints by park visitors, including minorities, seniors, and families with small children, alleging that off-leash dogs had prevented them from visiting the park for fear of being knocked over or attacked by dogs or verbally abused by dog owners," The actual number of complaints starts from a small base and the change may be correlated with the population increase. This conclusion is clearly overstated based on my 20 years of personal experience of walking these areas.

The statement on page 18 "Even though western snowy plovers do not nest at GGNRA" is going to make the public wonder why the snowy plover figures so prominently in the analysis given that over a long period of time only "... multiple instances where dogs flushed or chased shorebirds or snowy plovers at Ocean Beach and Crissy Field..."

I regularly walk my dogs at Fort Funston, as do many other active environmentalists. With regard to the evaluation of Fort Funston the analysis concludes: "Visitors who enjoy having dogs at the park would experience ... long-term, minor, adverse impacts under alternatives E and the preferred alternative F." This conclusion is contradicted by the many conversations I have had with the visitors to the park and my own experience in bringing my dogs to Fort Funston for 20 years. You are telling the people something about themselves that they don't believe. How does the GGNRA expect to "Build community support for the plan ... ", a goal on page 2. Public skepticism for federal management is only exacerbated by this approach.

The statement on page 19 that "... Dog walkers and visitors without dogs often come into conflict." is simply not true. It is an embarrassment to see this information included in a formal SEIS, again degrading public trust. From page 21 "... a total of 95 dog bites/attacks at GGNRA sites from 2008 through 2011." How does this level of hazard compare to any other recreational area with such large traffic? From page 22 "Visitors with children who play along the water's edge or in the sand and are approached by dogs, either aggressively or not, may feel that their child's safety may be at an elevated risk for dog bites or other injuries." It is well known that many visitors, including families with children, come to see the dogs.

The report suggests on page 14 that "... An increase in nutrients from dog excrement in concentrated areas could result in some areas becoming overfertilized and lead to changes in plant species and distribution as well as changes in soil organisms." Also, on page 20 "the overwhelming smell of urine in park areas with heavy dog use (e.g., Fort Funston) may also affect visitor experience at the park." The common consensus is that dog excrement at Fort Funston is in general effectively managed with significant public participation. Perhaps the reported smell is coming from the poorly maintained human toilet facilities managed by GGNRA. From page 22 "A health concern associated with dog waste is pathogens that can infect humans if ingested." No data provided to support this as an issue. Literature is cited without any investigation of the actual conditions at the sites. Again, the issue of public trust when the efforts of so many volunteers helping to clean the park are ignored.

Also from the Fort Funston analysis "Impacts to health and safety would be long-term, moderate to major, and adverse for the noaction alternative, long-term, minor to moderate, adverse for alternatives C, D, E,

and the preferred alternative F, and long-term, minor, and adverse for alternative B." It is common knowledge that Fort Funston was a hang-out for drug use and sales prior to it becoming popular for dog walkers. As anyone knows who has significant experience at Fort Funston, this is an overstatement and is not supported by the analysis.

On page 9 we read that "... one percent of all survey respondents using a commercial dog walker." With a sample size of only 400, a percentage so close to zero loses many of the standard normal statistical properties. Even if only one percent of the city uses a professional dog walker, that still represents a sizable number. Given the amount of money and time allocated to this SEIS, using a sample size of 400 to draw their conclusions seems ingenuous. I have personally conducted samples of three times that size in my own research.

The SEIS inappropriately dismisses the socioeconomics on page 25 "If commercial dog walking is not permitted in the park, commercial dog walkers may incur higher costs if they have to transport their dogs farther to find areas to walk their dogs, or if they have to reduce the number of dogs they walk at one time because of restrictive regulations in city dog parks or other public lands." A common theme in the discussion has been that there few and declining alternatives. The conclusion on page 26 ignores the obvious that any small business segment will be a small part of regional GNP. "Estimated total spending by all local visitors to GGNRA accounts for 0.0008 percent of the total gross domestic product for the San Francisco metropolitan statistical area in 2005." Again, an embarrassment to have this kind of analysis in a formal SEIS.

On page 31 the SEIS cites the use of "Point Isabel Regional Shoreline, which is a state park area managed by East Bay Regional Park District and one of the most heavily used dog parks in the country." but fails to examine any of the successes that are so characteristic of this park, a potential framework for GGNRA dog management.

<b>Correspondence:</b>	Dear GGNRA,				

I am a responsible, law-abiding dog owner and I am very upset that some of the most important

---

traditionally dog-friendly places in the city may no longer be available to me and my dog. There are already laws in place to manage dogs in public places, which can be enforced, and it is unnecessary to close the parks to off-leash dogs. For example, Fort Funston is a park for dogs, that's its main purpose, and to close it to dogs or make it on-leash is ridiculous. There are more dog-owners than there are parents in SF, and plenty of places already where dogs are not allowed off-leash where children and adults can play. That's the beauty of the Bay Area. In addition, plenty of spaces to run make for healthy, happy dogs, who co-exist with people peacefully.

Please reconsider this unreasonable policy.

Thank you.

**Correspondence:** Dear Superintendent Dean,

I regularly enjoy running with my dog and this would be nearly impossible on a leash, so I take him to Fort Funston, where we've been 3 miles each weekend for years.

Sadly, the new Dog Management Plan strips me of this privilege. Yes, I do recognize it is a privilege, but it seems like such a healthy way to enjoy all the beauty that's out there.

If you move ahead with this plan, I'm afraid you'll be robbing me of recreation.

I truly hope you decide not to proceed with this plan as most recently written. I have learned that there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of Fort Funston, so i hope this at least stalls the process.

Thank you for reading my comments,

Mike Dahlin

<b>Correspondence:</b>	Sirs,				

New information has recently come to my attention regarding the draft proposal for the reduction of off leash dog areas at Crissy Field. Recent data (2013) released by the GGNRA shows that , despite thousands of visits by people with dogs, there have been only a handful of dog related incidents of any kind. The reported incidents involving people are substantially higher. This data clearly negates the theory by Mr Dean, who claims that dogs are creating so much havoc at Crissy Field that the expenditure of \$2,000,000 is required to hire more rangers to police the area. This simply is not true and is proven by this

recent data. No more "could be a problem" but just the facts borne out by this data. Additionally, when Crissy Field was created, one of its stated purposes was to create more area for off leash recreation, in anticipation of the increased growth in popularity of dog ownership. Proposing the reduction of such areas at Crissy Field is an unjustifiable reverse of course. It will lead to the opposite situation where cramming an evergrowing number of off leash recreation into a sharply decreased area will have a negative effect on both dog owners and the environment. I find it ironic, as someone who has visited Crissy Field at least 3 times a week, with my dog, for the past 11 years, to hear the GGNRA continue to press for the reduction of offleash use areas. I can tell you that 90% of the time when I visit the area, there are very few users beyond dogs and their owners, who comprise such a small number that I recognize the same faces day after day, year after year. The only time I see much use is on holidays and an occasional hot afternoon. To say dogs are encroaching on the ability of the public to enjoy Crissy Field is just plain wrong. In addition, virtually every dog owner I know goes beyond the call of duty when it comes to being a concerned guardian of the wildlife and natural environment of Crissy Field. When we see any kind of problem, such as an injured animal or bird, we are the first to contact the appropriate authority and will stand guard over the injured until rescue comes. Yes, there is the occasional bad dog owner, just like there are bad parents of children, but based on last year's data, that number is extremely small and does not justify such a radical reduction of off leash area. Shove too many dogs and owners into a too small area and you will create the exact situation that the GGNRA claims to want to prevent.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to some GGNRA trails

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Regards

Patricia Goodberg

**Correspondence:** As a home owner and 16 year tax-paying resident of San Francisco I request that there are NO FURTHER RESTRICTIONS for off-leash OR on-leash dog walking in San Francisco parks. I bought a house in a neighborhood that borders Ocean Beach and Golden Gate Park SPECIFICALLY because it offered on-leash and off-leash recreation areas for me and my dog. If that right is taken away I am being denied my rights as a resident and tax payer. I am particularly concerned about the limits proposed on Ocean Beach and Fort Funston. These are the places that we go with our dogs EVERY DAY to relax and exercise. These restrictions mean that our dogs will have to stay on leash on pavement which is cruel and will not allow them to get proper exercise. It also means that if I want to enjoy Ocean Beach or Fort Funston I would have to go there without my dog, which I would never do...so then I am paying taxes for a park that I never use?! It's absurd. And another denial of my rights. Let responsible dog owners who have well-behaved dogs and who always clean up after their dogs keep the choice to walk their dogs and let them run off leash WITHOUT RESTRICTIONS.

**Correspondence:** I was born and raised in San Francisco and am now retired . I have always had dogs, and for the past 30 years I have taken my various dogs to Fort Funston. I know the importance of exercise

for dogs so they remain "well behaved ". They can't do this on leash! And it's not just about the dogs, it would also diminish my life. The walks are essential to my well being so I can maintain a happy and healthy life style. Walking with my dogs at Fort Funston five days a week does this for me. To close the Fort Funston or limit the access for "off lease dogs" would definitely be a mistake. Think of the impact it will have on neighborhood parks. Also the impact on thousands of responsible and loving dog owners who will be denied the opportunity to socialize their dogs, exercise their dogs and contribute to the city by having "well behaved dogs"

I understand that not everyone is a dog lover, or needs to be. But there are thousands of parks available to people where dogs are not allowed, even on leash. There are so few areas left for us dog owners. Please do not allow the GGNRA to change the rules on "off leash dog areas"....that would be a crime.

<b>Correspondence:</b>	Dear Superintendent Dean,				

As recently as Ms. Pelosi's Forum in Stern Grove, you and Howard Levitt have been telling the public "there are so many more dogs and people now, we have to do something". This is an excuse and totally unjustifiable.

Increased usage over time was anticipated when this National Recreation Area was created. The House Report No 92-1391 made clear that the GGNRA would be confronted with problems in San Francisco that would require careful planning because of the high volume year-round visitation:

"As a national urban recreation area, this new component of the national park system will be confronted with problems which do not frequently occur at other national park and recreation areas. Great numbers of people can be expected to use the area-particularly those portions located in San Francisco County." (pg. 11)

. In October, 1977, Rolf Diamont, GGNRA "Environmental Coordinator" prepared a memo proposing a "Draft Dog Policy for San Francisco Unit." His memo enumerated the following guidelines:

1. "No regulation, verbal or written, should be attempted that cannot be reasonably and consistently administered."
2. "Dog regulations should be different for different areas of the park reflecting public needs and attitudes as well as urban geography and our capabilities."
3. "When we discourage or restrict dogs in any area, whenever possible, an alternative site where dogs are allowed should be suggested."

- The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan.
- There hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

- The GGNRA incident reports show that it isn't the dogs causing the problems.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

<b>Correspondence:</b>	Dear Superintendent Dean,				

I previously owned a dog and regularly walked it off-leash in the GGNRA. It was good for my dog, for other dogs we encountered, and for the dog owners. It caused no harm to people, property, or wildlife. I do not currently have a dog but hope to get another one in the near future and hope to be able to walk it off-leash in the GGNRA in the same manner as I did with my last dog.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

---

**Correspondence:** I have a strong interest in the vegetation that occurs in the Presidio part of the GGNRA, and am particularly interested in the overwhelming presence of the Eucalyptus trees that seem to be growing out of control. I ran across the plan for the GGNRA and particularly the section which indicates that pets can be a source of "exotic plant seeds". I noticed that this section suggests that reducing or eliminating dogs from the GGNRA could reduce the appearance of non-native plant species. Unfortunately, this section makes this claim without showing any evidence that any such species have ever arisen from dog feces anywhere in the national parks. Isn't it well-known that Birds are most common means of transportation for seeds? The report provides no direct evidence at all that elimination of dogs from trails in the GGNRA would impact this issue.

I was surprised to see these sections, which claim to be presenting a scientific case for a change in policy, but which are only making unsupported claims about the impact of dogs on the parks. If the NPS regards the introduction of non-native species as a high priority, I would prefer to see proposals for policy changes in the GGNRA that could have an impact on this problem. I am disappointed to see the NPS misusing the problem of non-native species as an "scientific" argument for a change in dog-walking policy.

**Correspondence:** I oppose the GGNRA SEIS for Dog Management. Congress created the GGNRA to allow for urban open space and recreation. Unlike a National Park, the emphasis here was on recreation to

---

enhance the quality of life for Bay Area residents. And Congress specifically referred to off leash dog walking as one of these recreational uses.

Contrary to Congressional intention, the current GGNRA plan restricts off leash dog walking without factual basis, relying instead on outdated data and undocumented assumptions. It does not demonstrate that problems within the GGNRA are actually attributable to dogs and not to other factors such as crowds for special events, wildlife, and even nature herself. And these restrictions will negatively impact the few remaining areas allowing off leash walking.

I suggest you establish a community forum of GGNRA users, including dog walkers, to assure a balanced, fact based review of management decisions going forward.

**Correspondence:** Dear Superintendent Dean,

As longtime resident and one who loves the wild beauty of San Francisco, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog, and my family for our own health and my dog's health the way I have on GGNRA properties for many years. It wasn't until I became a dog owner myself did I truly appreciate what the city has to offer particularly on the lands of GGNRA and thus exponentially enjoy the exercise and recreational opportunities provided to us the residents and our visitors.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Jennifer Mendes

**Correspondence:** The National Park Service wants to restrict off-leash dog walking. One possible reason for a change in policy is that off-leash dog walking may increase the incidence of dog-bites. The report cites evidence for 95 dog bites and attacks throughout the 2008-2011 time period as evidence in support of a change in policy.

For all of the GGNRA, this data amounts to a total of 2 dog bites each month, or only about 25 each year. Elsewhere, the report states that there are 4.5 million dog bites throughout the US each year (more than one dog bite for every 100 citizens). For comparison, the GGNRA is immersed in San Francisco, with a population of almost 1 million, represents 1 in 300 of the of the average US population. If the average incidence of dog bites in San Francisco was an appropriate fraction of the 4.5M bites in the US every

year, we would be suffering more than 15,000 dog bites per year in San Francisco. If only 25 of the 15,000 dog bites suffered in and around San Francisco were taking place within the GGNRA, the data suggests that these environments are actually much safer for people than other places in the city and in the US.

In this report, the occurrence of 95 dog bites in 4 years is cited many times as evidence of a need for a change in policy. I actually think this data indicates that **THE PRESENT POLICY IS EXTREMELY EFFECTIVE** at minimizing dog bites. I see no evidence suggesting that a change is needed.

Furthermore, this lengthy report provides no data comparing parks with comparable numbers of visitors and different dog-walking policies to prove that the proposed policies will have the desired impact on the incidence of dog-related attacks. Instead of using evidence, the report makes an argument, based solely on the report of 96 dog bites in 4 years that a change in policy is needed. Then, the GGNRA proposes a specific set of policy changes that, according to their own data, seems likely to increase the number of attacks and bites.

A more logical conclusion from the data provided by the NPS is that off-leash walking actually promotes better behavior by dogs and among dogs (something frequently observed and commented upon in locations with high densities of unleashed dogs, such as Ft. Funston).

<b>Correspondence:</b>	Dear Superintendent Dean,				

I walk regularly with my dog in the Fort Funston part of the GGNRA. I'm writing to express my vehement opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. It will also discourage use of Fort Funston, which will only increase existing problems with vandalism and drug use by reducing the numbers of law-abiding and considerate citizens there. This ill-advised new policy will almost certainly increase the costs of maintaining Fort Funston at a time of severe budget challenges for the Park Service.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Should this unfortunate plan go forward I will contact Congresswoman Speer and Senators Boxer and Feinstein as well as other elected officials to express my dismay as ask them to intervene to reverse the new policy.

Sincerely,

Kevin Shannon, MD

It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

With so few options for taking dogs off lease, the preferred alternative would not represent the wishes of the vast numbers of people who have dogs. In fact in San Francisco dogs outnumber children. There are an estimated 120,000 dogs in San Francisco, according to the city's Animal Care and Control department. There are anywhere from 108,000 to 113,000 children, according to U.S. census figures from 2000 and 2005.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. Frank Dean, General Superintendent  
Golden Gate National Recreation Area  
Fort Mason, Building 201  
San Francisco, CA 94123-0022

Dear Superintendent Dean,

As national park supporters we have a keen interest in the preservation of park resources and values. We have reviewed the Draft Dog Management Plan / Supplemental Environmental Impact Statement (SEIS) and have the following comments to offer:

1) The SEIS fails to demonstrate that commercial dog walking meets the NPS criteria for Special Use Permitting as set forth in the Organic Act, the GGNRA enabling legislation, and NPS Director's Order #53. In order to meet the NPS criteria as an appropriate park use, any considered activity should; support the mission of the National Park Service, accommodate park visitors, add to the public understanding and enjoyment of the park, promote a sense of ownership and stewardship for the park and its resources, enhance the protection of park resources and values, and provide for an increased level of visitor safety. Furthermore, the considered park use must not; be contrary to the purpose for which the park was established, create impacts on park resources and values, disrupt the atmosphere of peace and tranquility, create an unsafe environment for other visitors, or result in conflict with other existing uses.

The SEIS fails to enumerate or to apply these criteria to an evaluation of the appropriateness of commercial dog walking in the GGNRA, and fails to express sufficient conclusions that justify the inclusion of commercial dog walking as a component of the Preferred Alternative. As a decision document, the SEIS fails to articulate a rational connection between the presented material and the final decision. As such, we urge the Park Service to eliminate the commercial dog walking component from the Preferred Alternative.

2) The Preferred Alternative is discriminatory in that it establishes two different standards for the allowed number of dogs per walker. All dog walkers within the GGNRA should be equally limited to a number of dogs that can be reasonably managed in a manner which is consistent with all applicable laws, regulations, executive orders, and management policies. Establishing a policy under which some park visitors are permitted to walk more dogs than other park visitors is clearly discriminatory. Establishing two separate standards, will only lead to public confusion and misperception of the rules, and a higher degree of non-compliance. We urge the Park Service to hold all dog walkers to the same standards.

3) The SEIS fails to provide evidence that voice control is an effective off-leash dog management option. While the SEIS does loosely describe and discuss the concept of voice control, it does not evaluate voice control for its degree of effectiveness, nor does it demonstrate the abilities of the general dog walking public to employ such a method. Unless it is clearly demonstrated to be as effective as the use of a leash, voice control should not be considered as an option for use in any area of the GGNRA that is open to multiple visitor uses.

4) The Preferred Alternative fails to specify how visitor safety and resource protection will be achieved in the vicinity of the ROLA's. The Preferred Alternative does not describe how park visitors will be adequately informed of the ROLA boundaries, nor does it clearly ensure that off-leash dogs will be contained within the ROLA's. These shortcomings are potentials for excessive conflict.

#### Closing Statement

We believe that the National Park Service should not be in the off-leash dog play business. It is neither the mission nor the responsibility of the National Park Service to provide federal, national park lands to accommodate a local, urban need at the expense of visitor safety, park resources and national park values. Off-leash dog walking is a proven source of conflict within the GGNRA which generates additional management and enforcement expense. We also believe that requiring all dogs to be on-leash is the best method to ensure visitor safety, protect resources, preserve national park values, and keep management and enforcement costs at a minimum while still providing for recreational dog walking in the GGNRA.

Municipalities adjacent to GGNRA lands have ample resources to provide and maintain dedicated off-leash dog play areas, as these are among the wealthiest counties in the nation. It is not difficult to imagine that if presented with an elimination of off-leash privileges within the GGNRA, local municipalities will

realize their own resourcefulness and capability to meet the demands of their citizenry.

Providing recreational on-leash dog walking opportunities on multi-use trails throughout the GGNRA is a more than generous exception to the standard national park dog policy and we support a management plan that would provide for those opportunities. We urge the Park Service to eliminate off-leash dog walking from the Preferred Alternative.

Respectfully submitted by,

Matthew & JoAnn Zlatunich  
749 8th Avenue  
San Francisco, CA 94118

**Correspondence:** Last weekend my family, consisting of my spouse and my 19-year-old son, Sam, traveled to Muir Beach to see the recently completed restoration work on Redwood Creek. Sam loves beaches (as do his mother and I) and so a much anticipated secondary purpose of our trip was to take a walk along Muir Beach. However, our trip did not include a beach walk. Why, you may ask, did my family's visit to Muir Beach not include an activity that members of my family greatly enjoy? Let me explain.

Sam is afflicted with an autism spectrum disorder (ASD). Like many ASD kids and adults, he has certain sensory sensitivities, aka phobias. One of these sensitivities is triggered by off-leash (but not on-leash) dogs. This sensitivity may stem from a childhood experience in which he was threatened by a dog that he encountered. The point is that this sensitivity exists. At the current time, as GGNRA officials well know, Muir Beach is open to off-leash dog use. On the day of our visit the beach was crowded with off-leash dogs, with little effort that was apparent to us on the part of the owners of these dogs to exert control over or limit in any way the movements of the dogs. (Some public park managers, the EBRPD being the principal case in point, indulge in the fiction that dog owners can successfully be instructed to keep their off-leash dogs "under control.") So the universal presence of off-leash dogs at Muir Beach precluded us from visiting the beach, something we otherwise would most certainly have done. The access exclusion that we experienced constituted a clear and indisputable violation of the GGNRA's obligations under the Americans' With Disabilities Act (ADA) not to discriminate against persons with disabilities in managing the park areas under its jurisdiction.

I understand that the revised dog management plan that the GGNRA currently has under consideration will alleviate at least some of the conditions noted above at Muir Beach and elsewhere. If so I strongly urge its adoption.

**Correspondence Type:** Web Form  
**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Melaine DiLuzio

Frank Dean  
General Superintendent, GGNRA  
Fort Mason, Building 201  
San Francisco, CA 94123

Dear Superintendent Dean,

Three years ago at the tender age of 67 I wrote you in disagreement with the Draft Dog Management Plan. At that time I attributed my good health and spirits, and those of my 11-year old rescue dog, in large part to the time we spend at Fort Funston, exercising (both of us off leash!)and enjoying its beauty.

We're both back again, now aged 70 and 14, and even more convinced that our well-being has been enhanced by the physical and social benefits of off-leash walks. What I said previously is still true:

"My dog is mellow, well-trained and well-behaved - he brings smiles

---

to the faces of the children and families we meet. We are respectful of the land and vegetation and give thanks for every minute we're able to spend at 'The Fort.'

I've been concerned about the environment all my life and am a regular contributor to The Nature Conservancy, Marine Mammal Center, California League of Conservation Voters and The World Wildlife Fund, among others. I am committed to preserving and protecting our natural areas."

The current Draft Plan comes across as restrictive and arbitrary as there is no sound evidence that off-leash dog-walking is detrimental to GGNRA lands. The 1979 Pet Policy was a fundamental part of the agreement by which the GGNRA acquired this land. It has been working well for 35 years and I hope you will respect both its intent and track record as we trusted you to do. I believe that something better than this extremely harsh policy must be worked out.

Thank you for your consideration.

Sincerely,  
Nancy Prowitt

<b>Correspondence Type:</b>	Web Form				

**Correspondence:** I am a resident of San Francisco, a senior citizen and walk with my dog under voice control at Fort Funston and Ocean Beach 3 to 4 times per week. I have been doing this for the past 30 years. I do not support your dog management plan as it is too restrictive and does not provide a balance between responsible dog walking and other activities. I support formalization of the 1979 Pet Policy plus off-leash/voice control access in San Mateo County and in lands that the GGNRA may acquire in the future.

My specific objections to the Dog Management Plan are as follows:

â€ In the revised plan, it is fairly obvious that you did not take proper account of public opinion. Although you did not share specific results of the original plan with the public, independent reviews show that the comments to the original plan were at least 3 to 1 in favor of dog walking.

â€ The plan proposes using fences to delineate dog play areas at Fort Funston and other areas. The fences will feel like pens and will make visitors feel unwelcome. Fences secure enough to keep small dogs in will hinder the movement of wildlife. A person and his dog will not be able to exercise in such an enclosed area.

---

â€ I oppose the Monitoring-Based Strategy that replaced the Compliance-Based Strategy because the GGNRA can change the rules even if there are no environment impacts.

â€ The SEIS still lists impacts that "might", "can", or "could" happen while providing no evidence that any of these impacts are or have occurred. The point was raised previously and should have been addressed but was not. Without site-specific studies there is no proof that impacts are occurring. The GGNRA even admits to the lack of studies on page 373.

â€ Impacts on nearby parks of the Preferred Alternative still have not been adequately analyzed despite the fact that the analysis was requested by public comment on the original plan and by the San Francisco Board of Supervisors in 2011. The revised plan merely says that the GGNRA believes people will continue to walk their dogs in the GGNRA even though the space for doing so has been reduced. No evidence is given to support this statement.

â€ The most recent data released by the GGNRA (2013) does not support the statement in the plan that says dogs cause major safety problems. In fact, during 2013 there were only 6 reported dog bites, 5 dog fights, 2 cliff rescues, 1 wildlife killing, 1 horse bite and 2 complaints where people were scared. This data does not support the need for more restrictions on dogs and certainly doesn't justify an additional \$2 million per year for rangers.

â€ The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space" (Enabling legislation, first paragraph). The plan notes that "In many parts of the San Francisco Bay Area, residents have come to expect that GGNRA lands will be available for dog walking and other recreational activities." (p. 19). Yet that is exactly what Congress intended when it created the GGNRA in 1972 - "The objective of [the creation of the GGNRA] is to ... expand to the maximum extent possible the outdoor recreational opportunities available to the region." (H.R. Rep. No. 1391, 92nd Congress, 2nd Session, 1972)

â€ The plan still describes the visitor experience as focused on people who don't want to be around dogs. It ignores the fact that right now these people can easily go to areas where dogs are not allowed. The plan neglects to discuss a visitor experience in which people want to be around dogs.

â€ When Crissy Field was created, one of its stated purposes was to create more space for off leash recreation because of the anticipated growth in the number of visitors. The proposed reduction in off leash space is a change of course without a basis. In fact, all visitors will be impacted negatively if dogs are crowded into smaller areas.

In summary, this dog management plan appears to be very biased, not only against people who want to walk with their well-behaved dogs but against recreational uses in general. The San Francisco Board of Supervisors, the Marin County Board of Supervisors and Congresswoman Jackie Spier are opposed to this plan. Congresswoman Nancy Pelosi has written a letter expressing her concerns. It seems to me, at this point, the GGNRA should engage the community to discuss a way to provide true balance.

Superintendent

Golden Gate National Recreation Area

Fort Mason, Building 201

San Francisco, CA 94123

Attn: SEIS

I am a resident of the Parkside neighborhood and the owner of a 22 lb bichon/mixed breed dog. She loves to run, especially in open outdoor settings. We go very rarely to Crissy Field and Ocean Beach but very frequently to Fort Funston, practically every weekend. She walks almost every other day at Stern Grove and around Pine Lake. We adopted our dog from a local rescue shelter over a year ago. Since her adoption in our family, I walk approximately 45 minutes a day more than I otherwise would, and I have come to appreciate the natural beauty of the city's parks and beaches in a way I never could have before. My dog has made going outside and enjoying natural beauty a central activity of our family's life. I would also like to add that we always clean up after our dog. Even at dusk or nighttime, I bring a flashlight and make sure that there is no trace left in public areas. I often pick up trash and litter whenever I see it in the parks. I also always carry extra biodegradable waste bags and give them to other people if they've run out. My dog is under complete voice command and we obey all leash laws and signage.

I am writing to disagree with several aspects of the dog management plan that has been proposed by the GGNRA.

The current proposal (Preferred Alternative) is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash

access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. My dog is smaller sized and becomes nervous being in a pen with other dogs because she does not have a means to escape from larger dogs and also cannot easily run. My observation is that dogs and people feel less free in pens and fights are much more common. This is not a way anyone can enjoy the public parks. I would not visit these areas if they were like this.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions. This is not a direct or effective way to address a compliance issue.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative. Vigorous dog walking and jogging produces fitness and mental health benefits for a large number of city residents. It reduces the level of overall stress among people and animals in the city leading to less conflicts and incidents due to anxious, under-exercised dogs. Finally, it produces an atmosphere of stewardship about natural resources among the people who come to care for these open areas.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption. It is very clear to those who use these open areas that the proposed restrictions will dramatically change the character and enjoyment of these areas. The usage of these areas will decrease. It is unclear why the GGNRA wants to reduce the use of these areas, as their charge should be to increase the recreational value of these areas for the public.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils. Therefore these are speculative claims.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdotes. The areas where dogs and their owners frequent benefit from the stewardship that results. Dog walkers tend to care about these areas and notice and report small changes that could endanger the areas. Educational efforts and involvement of dog owners in maintaining these areas would be more effective than simply shutting them out.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space." GGNRA proposes to mummify the parks to make them showcase or display areas as opposed to living, useful, open physical spaces for public enjoyment and recreation.

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it has been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra. Again, this is a major decision against a current practice, implemented without supporting evidence.

Respectfully,  
Kim Dang  
San Francisco

<b>Correspondence:</b>	The GGNRA needs to provide equal areas for hikers, cyclists, families with children, and families with dogs. The current GGNRA plan proposed to completely ban dogs from 6 major trails and only allow dogs off-leash at Rodeo Beach is a very short-sighted and selfish plan. It's no secret dogs are man's best friend. It seems to be ok to use/work dogs to search through earthquake/hurricane debris to save lives, to sniff out explosives to avoid mayhem in our cities, to work with border patrols, to act as guide/service dogs, and to visit sick and elderly people to enhance their quality of life. Shouldn't ample recreation areas also be provided for such important members of our society? When will the GGNRA come to its senses?

**Received:** Feb,15,2014 20:29:55

**Correspondence Type:** Web Form

**Correspondence:** I have a dog; as a single man and self-employed professional, I gladly pay more than my fair share of taxes; and I vote in every election.

My dog Jimmi is like a child to me, and while I don't expect anyone else to share in the unspeakable joy I feel seeing my dog run and play in the surf at Ocean Beach and Fort Funston, others should not expect that I share in their joy or their interests in use of these beaches. We all should, however, be able to accommodate each other.

Granted, some dogs are troublesome and some dog owners are irresponsible, but so are some people. I doubt it's possible or useful to tally and compare the burden or cost of troublesome people and dogs, but let me just say that no one will ever have to pay taxes to educate Jimmi, he will never drive drunk and cause injury, and he will never hold up the corner store. So when others say that Jimmi should be kept leash because on some other person's dogs troublesome, or because (God forbid) he serves as an unpleasant reminder of how some other dogs have behaved, it falls on my deaf ears.

Please don't misunderstand me: I love children (and most children love Jimmi). I also believe in the idea that it takes a village, as Hillary says, and I gladly participate in the village. I just want the same accommodation from others.

Keeping dogs on leash is not a compromise or accommodation, anymore than would be a requirement to keep children on a leash. Jimmi is a 40 lb. Retriever mix, he is active and curious, he likes to run and chase sticks into the surf, and neither he nor I would find any joy in use of the beach and would not do so if I had to keep him on the leash.

I highly suspect that the movement to curtail use of the beach by dogs and dog owners stems from a few people have had a bad experience with a dog, and very many rangers and bureaucrats who are tired of having to manage the disputes concerning use. To the rangers and bureaucrats I say it's your job to make the beach pleasant and safe for my use, as well as for tourists and non-dog owners. In my memory there was a time when Ocean Beach was a haven for gangs and drug use, but no one suggested that the beaches be closed, or that suspected users or gang age teenagers be prohibited from using it.

Most often when I vote, I do so on the basis of national issues. This is a local matter that is so very important to me, personally, that a prohibition against dogs off leash it would turn me into a single-issue voter and activist. Look at the numbers of dog owners who visit the beaches and the bumper stickers in the beach parking lots ("I have a dog, and I vote") and you'll know I'm not alone.

**Correspondence:** I am writing to you to comment on the GGNRA Dog Management Plan currently under consideration by the NPS.

I am a long-time resident of San Francisco and a dog owner. I am concerned that access to Fort Funston, Crissy Field, and Ocean Beach be preserved for use by people with dogs, off-leash under voice control.

---

The GGNRA parks in San Francisco are more than just federal park lands. They are urban parks that serve the needs of a dense population that includes dogs. According to the City and County of San Francisco Department of Animal Care and Control, there are approximately 120,000 registered dogs in The City (<http://www.sfgov2.org/index.aspx?page=1047>). Those dogs and their people require space to run, space to play, and a safe place to be outdoors without a leash. In the 25 years I've lived in San Francisco, I have seen the above-mentioned parks be exactly that kind of place.

Even after reading the Management Plan in all its great detail, I cannot see a defensible argument for closing those parks to access for off-leash dogs under voice and sight control. Certainly, it makes sense to close sensitive habitat for nesting birds. Certainly, it makes sense to require that dogs be under control and not represent a threat or a nuisance to other visitors. Those sensible rules can be posted and are easily enforceable by Park staff. Contrary to the argument in the Plan, requiring all dogs to be on-leash in the parks would breed open noncompliance with the law, and there is no way such draconian rules could be enforced. Having such ridiculous rules in place would breed the very conflicts that the rules are supposedly intended to reduce.

As a San Francisco resident, I urge you to take what action you can to preserve open-space access in the GGNRA parks for people with their dogs, off-leash and under voice and sight control. Please do not allow the National Park Service to create a serious problem where none exists. Imagine the thousands of dogs who now play and exercise off-leash in the open spaces of the GGNRA suddenly crowded into the limited number of dog-friendly parks run by Recreation and Parks. The new rules will breed conflict and defiance of the law. They will not protect the parks nor anyone in them.

Hello,

I appreciate you taking comments from the public. From when I was a teenager (44yrs ago), to the present, I have frequented Stinson Beach. I love to walk the beach with my dog, Angel. She is my companion since my husband died of ALS. We go to the dogs allowed, north side of the beach. Anyhow I just want to express my love of going to the Beach with my dog, and dogs of the past. Many, many wonderful memories, and hopefully future walks with my dog and friends.

Hope you have a great day! Sincerely, Kathleen

<b>Correspondence:</b>	I am writing to support the new policy to restrict off-leash dog walking. The behavior of dogs at GGNRA beaches is not only disruptive to the enjoyment of the area but is also				

---

threatening and potentially hazardous to people, especially children.

I have visited GGNRA beaches regularly for the past thirty-two years. Since the birth of my children, I have been particularly aware of the problems dogs pose to other beach users. When my children were infants, they were routinely bothered, terrorized, or knocked down by dogs chasing a ball thrown by its master or by a pack of out-of-control, "happy" dogs playing. If, after such incidents, I had a dollar for every time an oblivious dog owner said that their dog was friendly and loved children, I would be a very rich man. I grew tired of having to console my crying daughter after she was chased and/or knocked over by a dog at the beach. This was especially problematic at Crissy Field, so much so that we had to stop using the park entirely. This is not a live and let live situation - there are victims here.

I think that dogs should be banned from the GGNRA beach areas or be required to be on a leash. There are hundreds of acres in the nearby parklands for dogs to run free. Unrestricted off-leash dog access to the beaches is unacceptable due to the disruption and hazard it poses to individual users (especially children) of these natural areas.

<b>Correspondence:</b>	I'm a California native, born and raised in San Francisco. I grew up visiting so many of the parklands which are very dear to me. I have been fortunate enough to continue to live in the city. I am opposed to the Preferred Alternative because the plan lists impacts that "might", "can", or "could" happen while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits that the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.				

I have a rescued dog from the SPCA, our first dog ever, who is a huge part of my family at home and work. She is well behaved. We are good dog owners who pick up after our dog. We have trained her. Please understand how many people this really affects. I believe there are better solutions than taking away a huge part of our lives.

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status just because it deems that not enough people are complying with the leash restrictions.

Please listen to what the people want!

Sincerely,  
L. Kucukdogerli

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan/supplemental environmental impact statement. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Kelly Meech

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to Muir Beach.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public

lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** Dear National Park Service~:)

To ban.. dogs from hiking trails, parks.. beaches, would be UnAmerican... we are the land of the "free".

For many people, dogs are healers, family members, companions and crucially important for dogs and their owners to not receive prejudicial treatment, just because their beloved family member has four legs rather than two.

I frequent many hiking trails, beaches and parks with my puppy, a 21 week old Great Pyrenees...to see her pure joy while running freely is ...worth more then.. anything to me and brings so much joy to all who see and know her.

I have watched passers by.. who appear some what sad.. spirits lift.. with an immediate smile and request to pet "happy"my huge puppy..."Faith".

I have observed.. dog owners.. to always act responsibly in Marin, they pick up waste, immediately..keep dogs, on leash who are not under voice control..and muzzle dogs.. who hv difficulty controlling aggression.

We need to open more trails.. beaches.. to our fur leggeds... our pets.. and also our native wild horses and burros...whom used to live here..and when they did.. wild fires were greatly reduced and seeds were carried and land was fertilized and thriving with good health.

When we close our hearts, land.. and water use to our pets and wild ones and can no longer see our own souls and wellness connected and reflected within theirs, all is lost.

Proper stewardship of our parks must involve compassion...too for the four legged's.

Thank you so much, Jetara SÃ©hart

**Correspondence Type:** Web Form

**Correspondence:** Dear Superintendent Dean,

Although the revised Dog Management Plan is an improvement, it still ignores the recreational needs of thousands of current GGNRA visitors who visit the many units of the GGNRA on a regular basis.

The NPS claims that there are people who "won't" visit Fort Funston in particular "because of off-leash dogs." Fort Funston is at capacity many days. The parking lot fills and people wait for a spot. Why are the people who aren't visiting more important than those who are? The popularity of this special place indicates the need for more off-leash open space, not less!

The NPS claims that there are (or could be) impacts because visitor use has increased. Wouldn't it make sense to increase the space available, thus dispersing visitor use. Concentrating use (again, particularly at Fort Funston) is contrary to common sense.

The NPS claims to be a champion of "seniors and disabled" (yet hasn't had a sand removal from the asphalt trails at Fort Funston for a very long time). Those who have difficulty walking on uneven ground, wheelchair users, and moms with strollers have effectively been banned. As a senior (I will be 70 on my next birthday), walking with my dogs is my primary form of exercise, recreation, and socialization. We walk from the parking lot out to the "last bench" or down the sand ladder and north on the beach to the beach trail.. Standing in the iceplant where the NPS has designated an off-leash area? That is not recreation, exercise, or socialization for me! My husband will turn 75 this year. He is no longer comfortable walking on uneven ground, so apparently he is no longer welcome at Fort Funston with the dogs. So much for the NPS being supportive of seniors or the disabled!

I live in San Mateo County and served as an alternate on the negotiated rule making committee representing Pacifica. (San Bruno was left out of the negotiations as well as the residents of the coastside communities of Montara and Moss Beach south of Pacifica who have been severely impacted by the Dog Management Plan.) The units in San Mateo County were never actually discussed-each time Jeri Flinn attempted to bring them up, she was told "not now". Cattle Hill (which the NPS had actually proposed as an off-leash appropriate area) couldn't be discussed because it wasn't actually part of the GGNRA yet! Same was true of Pedro Point and Rancho Corral de Tierra (4000 acres where there has to be space for off-leash recreation). In the "Plan", areas that have been open to on-leash walking are now off limits to dogs (and therefore their people).

We went into the Negotiated Rule Making in order (as the NPS said) to make a long time use of areas in the GGNRA legitimate (though a federal judge had indeed found that the 1979 Pet Policy was a

legitimate policy). Instead, the NPS used the process to severely restrict a recreational use that thousands of Bay Area residents enjoy on a daily or weekly basis.

I think that the entire Dog Management Plan should be scrapped. It appears to have been written by people who have little familiarity with the land, little respect for the reason the Golden Gate National Recreation Area was established, and no understanding of the importance of off-leash recreation and on-leash walking in the lives of the visitors to the GGNRA. Let's update the 1979 Pet Policy to include areas that have been added to the GGNRA (often funded by dog walkers to ensure that areas that they were enjoying with their dogs remained as open space!).

Sincerely,  
Anne Farrow

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. San Francisco and Marin are urban areas that have enjoyed off leash dogs for years with no problems to habitat, just because the GGNRA wants to make all National parks dog free or fences in, you cannot compare an urban area like SF and Marin to National Parks like Yosemite and Point Reyes. I used to love to hike Point Reyes and now since I have a dog i have not had the pleasure of hiking my favorite trails for many year, but I have had the pleasure of hiking the Marin trails and the beaches with my dog, dont take that away from us.

Sincerely,  
Cynthia Prosterman

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Dear Superintendent Dean,				

For over 20 years I have been walking my dogs at Fort Funston. Every time I walk there with my dogs I

feel absolutely blessed that I can appreciate the beauty of nature and our city so close to my own house. With the sound and smell of the ocean, I can watch my dogs run and interact with other dogs. I don't know who takes more pleasure in our walks, myself or my dogs. This is our daily form of exercise. We would be too restricted by the preferred alternative described in the GGNRA's new draft dog management plan. My dogs are very active and enjoy running much faster than I walk but they are always within response to my verbal command .

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

The main reason I continue to live in San Francisco is to be able to wake up and get excited to spend time with my dogs as they enjoy being dogs running leash free at Fort Funston. Please support this position for those of us who do not want to lose ultimate privilege.

Sincerely,

Julie Lesnewich

<b>Correspondence:</b>	Dear Parking Planning Committee,				

Dear Park Planners,

As an almost daily walker on Oakwood Trail in Mill Valley, I am writing to strongly encourage you to adopt Alternative F, or the strongest possible, Dog Management Plan as an important solution to protect the environment of this beautiful accessible trail and as a protection to the hikers on the trail. I have been a teacher at Tamalpais High School for the last 15 years and often walk the Marin trails after my school day.

First, the amount of dog shit on the trail, especially in the last 2 years, is disgusting, and it is because people let their dogs, large and small, off leash to poop in the bordering forest. If you walk off trail, you will find large amounts of dog shit, and sometimes, people allow their dogs to shit directly on the trail. I have seen and spoken to numerous oblivious people allowing their dogs to shit wherever in a totally irresponsible way. Plastic bags of dog shit that are not retrieved line the path. This kind of environmental insensitivity has grown to epidemic proportions.

Secondly, I have had large off leash dogs jump up on me and nearly knock me over while their owner laughs heartily in the distance. I have had dog walkers with 5 dogs, 4 off leash, watch as their growling dog cornered me near the stream on a hillside. When the dog walker called for the dog, he did not come, and I had to scream and pick up a stick, and the dog walker had to physically remove the dog. The trails are becoming dangerous to walk on when owners do not keep their dogs on leash.

Finally, there is little way to enforce rules on open trails, but by adopting a leash law, people will be more

apt to act responsibly. I can understand that people don't want to carry around a bag of dog shit but that, in my opinion, is simply part of being a dog owner who respects the environment and other people.

I could go on with stories about this. But my concern is that dog walkers will bombard you with comments when anyone who walks Oakwood Trail can see that there is a problem that needs some kind of solution. And a dog on a leash is a very low impact reasonable solution to this problem.

Thank you for your time and careful consideration. Sometimes it's more important to do the responsible thing for our battered environment than to be popular with the huge amount of dog walkers out there. Courage- and please vote in favor of a beautiful and healthy Marin County.

Sincerely,

(Nancy) Claire Blotter

<b>Correspondence:</b>	I am a San Francisco dog owner. but even before i had a dog i loved seeing the dogs have open spaces where they could run and play. It seems most all the reasons for prohibiting off-leash areas have more to do with tourists than with tax-paying residents. Where the reasons are environmental, I feel we have sufficient areas near the city where flora and fauna can flourish. The benefit of having the off-leash areas for our dog friends out weighs any argument against them.

<b>Correspondence:</b>	Dear Superintendent Dean,
------------------------	---------------------------

I would like to hopefully persuade you to reconsider the GGNRA alternative new draft dog management plan. The new plan will prevent my dog Nemo and family from enjoying the parks especially Fort Funston. The plan is too limiting and will prevent us from the exercise with fresh air and free room to explore the area with our dog. I have been going to GGNRA properties for over 10 years and always respect the area.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Stephen Liu

**Correspondence Type:** Web Form  
**Correspondence:** Dear Mr. Dean,

I am writing to you with concern and opposition to the Golden Gate National Recreation Areas preferred alternatives in San Mateo County. Our family walks our dog almost daily in GGNRA Pacifica lands of Sweeney Ridge, Mori Point, Rancho Corral Tierra and occasionally in the San Pedro Highlands. These areas have been open to dog walking for many years and have been a great area for recreation and source of joy for our family. We have been lucky to enjoy the environmental and historical beauty of these lands while exercising with our dog. I understand the need to protect fragile areas and balance public recreation needs but it feels we are being excluded from use of this public recreation resource with years of use and very little environmental impact. I would hope better signage and enforcement could accomplish your goal without restricting the areas we are currently able to bring our dog. 51% of The City of Pacifica is owned by GGNRA. It would be unfortunate to lose our recreation and the associated tax base that dog walkers bring with them.

Sweeney Ridge

I prefer option 19A with the addition of all of the Baquiano trail from the trailhead at Fassler Ave. in Pacifica to its conclusion at the Portola Discovery site.

I do not support the current preferred alternative 19-F due to:

"Lack of interconnect-ability of all of the Sweeney Ridge Trail System

"Over stating of damage caused by on leash dog walking given the historical use of area (once an active military site, 4x4 vehicle trails, gas/water/electricity rights of ways, mountain biking, horse riding).

"Degradation of area with existing non-native vegetation.

"No attempt to protect proposed areas with signage or symbolic fencing.

"Consideration for ADA accessibility. 19-F would exclude the least steep only switch backed trail into the Sweeney Ridge Trail System.

"Impact on other local parks (the San Mateo County Parks Department has a no pet policy) making the GGNRA the only legal place to walk our dog in a rural park setting.

"Sweeney Ridge is surrounded by urban areas with direct access from many neighborhoods making the wilderness back country experience unattainable.

"Is enforcement realistic? I would rather have consistent on leash enforcement rather than unregulated off leash due to difficulty of enforcement.

"Failure of EIS to show specific scientific damage resulting from on leash dog walking

"Many rare and endangered species and plants have thrived and not adversely been effected by on leash dog walking.

Mori Point

I Prefer 17A

I do not support the preferred alternative of 17F due to:

"Lack of interconnect-ability of trails

"Over stating of damage caused by on leash dogs given the historical use of area (4x4 vehicle trails, motorcycle trails, mountain biking, horse riding).

"Degradation of area with existing non native vegetation.

"Consideration for ADA accessibility

"Impact on other local parks (the San Mateo County Parks Department has a no pet policy) making the GGNRA the only legal place to walk out dog in a rural park setting.

"Area is in a densely populated area with proximity to neighborhoods not a wilderness back country experience.

"Is enforcement realistic? I would rather have consistent on leash enforcement rather than unregulated off leash due to difficulty of enforcement.

"Failure of EIS to show specific scientific damage resulting from on leash dog walking.

"Many rare and endangered species and plants have thrived and not adversely been effected by on leash dog walking.

"Symbolic fencing and signs have been effective in keeping people as well as people with dogs out of sensitive areas.

San Pedro Highlands

I prefer 20E

I do not support with the preferred alternative of 20F

"Lack of interconnect-ability of trails

"Over stating of damage caused by on leash dogs given the historical use of area (Motorcycle club/ motorcycle trails, mountain biking, horse riding.)

"Degradation of area with existing non native vegetation.

"Consideration for ADA accessibility

"Impact on other local parks (the San Mateo County Parks Department has a no pet policy) making the GGNRA the only legal place to walk our dog in a park setting.

"Area an urban park with proximity to neighborhoods not a wilderness back country experience.

"Is enforcement realistic? I would rather have consistent on leash enforcement rather than unregulated off leash due to difficulty of enforcement.

"Failure of EIS to show specific scientific damage resulting from on leash dog walking.

"Many rare and endangered species and plants have thrived and not adversely been effected by on leash dog walking.

Rancho Corral Tierra

I prefer 21A

"I do not support the the preferred alternative of 21F due to

"Lack of interconnect-ability of trails

"Over stating of damage caused by on or off leash dogs given the historical use of area (Motorcycle trails, mountain biking, horse riding.)

"Consideration for ADA accessibility

"Impact on other local parks (the San Mateo County Parks Department has a no pet policy) making the GGNRA the only legal place to walk out dog in a park setting.

"Area an urban park with proximity to neighborhoods not a wilderness back country experience.

"Failure of EIS to show specific scientific damage resulting from on leash or off dog walking.

"Many rare and endangered species and plants have thrived and not adversely been effected by dog walking.

"Has been unregulated for 30 years

"More research needed due to only being a park for less than two years

As you know the GGNRA is a unique special place that was created to accommodate the recreational needs of an urban area, essentially creating an urban park. Any attempt to mirror dog restrictions used in national parks with a wilderness experience would be misguided and would go against the intended mission of the GGNRA when it was created. Please continue to allow us to recreate with our dog in the GGNRA and consider my concerns.

Sincerely,  
Aaron Read

<b>Correspondence:</b>	Dear Superintendent Dean,				

As a long-time supporter of GGNRA, I believe the newly planned dog management plan is way too restrictive. I haven't had a dog for 1.5 years and I still love all the off-leash areas that allow dogs. As someone who walks regularly in the GGNRA, I love all the dogs and people I meet, it makes it a lovely time. When I get another dog I want both of us to enjoy the outdoor space and not be fenced in or limited.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Sandy Weil, SF Native

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog

management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. I am from San Mateo County, lived for years in San Francisco, and still visit often, with my dogs.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions. If there are people not complying with leash restrictions, then the leash rules should be enforced, not a wholesale ban on dogs put in place.

Sincerely,  
Yoncha Kundupoglu

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

<b>Correspondence:</b>	Dear Superintendent Dean,				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status just because it deems that not enough people are complying with the leash restrictions.

Sincerely,  
hope tondelli

<b>Correspondence:</b>	I was so in two minds as to whether I should bother to comment after massive disappointment in seeing the outpouring (3 to 1 I think it was) against further off-leash restrictions completely.				

You seems to have just reprinted the original one, you did not validate any of the sloppy science, you did not validate anecdotal claims, you did not acknowledge the vast majority of commentators.

However I am dismayed at the DEIS and much opposed to the changes proposed for both generic and specific reasons which I will try to address.

" I have a very active dog, a Border Collie rescue Mix, and being active it requires DAILY running. This running is done by myself and/or our Dog Walker. She is insured and Bonded and, and I am sure of her professionalism. Everyone who knows dogs knows that a tired dog is a relaxed dog, and a relaxed dog is a well behaved dog. Off Leash exercise is so much more than on leash exercise. On leash exercise limits the dog to my level of fitness, and that means that by forcing on leash requirements you are binding the exercise of many dogs to that of handicapped, and elderly owners. My dog forces me to go out every day and take a walk, and although that can be in my local neighborhood it is nothing like our walks in the Marin Headlands, or Lands End paths, or along Crissy Field. Off leash walking is my time with my dog. He is always under voice control because my time at the park is my time with him - we work together. These moments when my dog runs back and forth with a stick in his mouth are the reason I get in my car and go the GGNRA controlled lands. I always carry two rolls of poop bags on my leash and I will clean up other dogs poop if I find it when cleaning up after mine. I also participate in dog owners park cleanups, be it in the City or out at Funston.

" The DEIS does not seem to consider demographics: Answer a question - is dog ownership in San Mateo/San Francisco County/Marin increasing or decreasing? All the studies I have seen it is increasing. Therefore, as caretakers for lands given your trust for recreational purposes by those counties should you not take that in consideration and offer an alternative where you INCREASE off leash areas? Off leash areas, at the time of the 1979 Pet Policy was limited to only 1% o all the lands you administer. Since then new land has been added but you have DECREASED the percentage of those lands to below 1%. hy is there no alternative where you reflect demographics and the desires of the citizens of those counties who gave you the land and offer another alternative where you increase these lands? Alternatively, since you only have 1% o lands open to dogs, why not, if you take certain areas away can you not have an alternative where you give back other lands now currently closed? I would have loved to have seen

somewhere in the DEIS something along the lines of We are proposing removing XXXX from off-leash areas, but are opening up YYYY to off-leash use. You have the space. Why not use it?

" Your purposes, for the GGNRA is for RECREATIONAL purposes. These lands are NOT National Parks - they are ex army installations and they were given in trust for you to administer in keeping with the original deed. You appear to treat Recreation as having an inverse impact on the areas under consideration, ignoring that Recreation WAS and IS one of the four outstanding values mentioned in the 1972 enabling legislation I quote : maintenance of needed recreational open space. When Daphne Hatch your chief of natural resources management and science at the GGNRA says Quote: "Ocean Beach without the people is an incredible habitat, But people think of it as a sandbox or their backyard." I truly wonder if the NPS knows the difference between Yosemite and Fort Funston or Ocean Beach. When I attended one of you open houses I was told that I was told that NPS is mandated by Congress to manage uniformly all its areas she forgot also to tell me that Congress added The authorization of activities shall be construed and the protection, management, and administration of these areas & shall not be exercised in derogation of the values and purposes for which these various areas have been established. So there is no mandate to match the GGNRAs policies with National Park Service requirements that dogs not be allowed off-leash in a national park.

" Snowy Plovers: Your own research - Forrest Cassidy St Clair and Warren all demonstrate that dogs do not actually impact the diversity, abundance and feeding behavior of the birds. The Hatch report observed 5692 dogs and only 19 chased plovers. Your own studies prove that parents with toddlers, surfers and other park users disturbed the plovers far more than dogs, yet I do not see anything in the DEIS that is further restricting their access. Why are dogs being singled out? Your environmental impacts are a whole bunch of could occur may occur but I do not see a single study that backs this up. You mention Bank swallows, and their nests, but they burrow in the cliffs, areas that dogs simply do not go to. . Ultimately your environmental studies do not seem to support your conclusions and you can be taken to task on this. I have tried to read the DEIS but I have failed to come across any actual solid scientific data that supports your premises. I see a lot of coulds and mayes but no actual evidence and no baselines - None. In fact, the one study I did read in full - the one above - demonstrated exactly the contrary to the results you would have preferred. You had all the time to back up your claims with hard data. The fact is you have not been willing to do so - discrediting the scientific basis of this DEIS, or, worse still, the data contradicted your preferred solutions, and you have chosen to ignore it. I could not find an comparative analysis of the No Action option. The impacts appear based on non-compliance to existing voice control and existing regulations. At some sites, the DEIS prohibits dogs from beach areas to protect shorebirds and stranded marine mammals, yet there is no documentation in the DEIS of current shorebird or marine mammal impacts caused by dogs.

" So if you have no sound scientific data to support the environmental reason to restrict areas to dogs lets look at the safety issue. Well in this case your data is overwhelming in pointing to what are the causes of serious safety incidents - 98% DO NOT INVOLVE DOGS. The problem is people, not dogs. Only 2% involve dogs. This alone should really force you to re-think the whole reason for the DEIS.

" The DEIS is concentrated on dogs, and ignores impacts caused by people and their children, mountain bikers, fleet week, walk-a-thons, feral cats, coyotes, horses, surfers, etc etc. In other words. The DEIS appears to be a targeted exercise. Not a 360 degree look at the panorama affecting the GGNRA

" Why is the current system not working for you? Are you able to enforce the current No-off leash zones? They are 99% of the lands you administer. If you can do it now why the need to change? If you cannot do it now, what additional funding will you require to ensure the new areas will be enforced?

" You TOTALLY ignore the impacts that these policies will have on the surrounding areas. If you squeeze dogs out of GGNRA lands where will they go? To overloaded City Parks ? Have you involved the City in this plan? You also have totally ignored the beneficial and human impacts of off leash interaction with ones pet. As I mentioned above, My mother cannot run so why are you wanting to limit the dogs exercise level to hers? She currently can play with our border collie and use a chuck-it with minimum effort for her and maximum effort for the dog. When I go to the park I see people playing with the dogs of all ages, races and, presumably, financial background. I do not see anything in your study except a rather

curious reference to minorities not coming to the parks because of dogs - The DEIS cites a 2007 SF State study that claims all Latinos and Asians surveyed said that dogs were a problem but if you actually read the study you discover some things: a) the study was not, as the DEIS implies an ethnic minority visitor use experience at the GGNRA but was actually a study born to help connect minorities to the parks. But more damning the study was hardly a scientific one - they interviewed fewer than 100 people and they were not randomly selected. It is this kind of selective scientific use that will have the words Drakes Estero popping up in peoples minds.

In conclusion it appears that this is a misguided solution in search of a problem. Your data simply does not support the existence of the problem, and your attempts to squeeze a NPS agenda on local parks is misguided and contrary to the spirit with which these lands were entrusted to you.

The more I look at the lack of data, the more I fear that, what the Dept. of Interior report said about Drakes Estero can be applied to this DEIS and that it exhibits sloppiness, from a protective approach to data, from a lack of vision, and from an insensitivity to the growing controversy, but not from any obvious intent to deceive, defraud or mislead." I really hope you are not trying to mislead but the lack of any evidence to your premises, causes great reason to wonder if the NPS does have an anti-dog which will be forced upon these Recreational Lands regardless of their negative impacts.

For all the reasons stated above, but in particular for:

- 1) The existence of a Poison Pill compliance override on all the alternatives
- 2) The lack of scientific data supporting your premises - there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

I support Alternative A - the No Action Alternative and would also include New Lands area in that  
Respectfully

**Correspondence:** Thank you for the opportunity to comment on the GGNRA Dog Management Plan as it relates to the Rancho Corral de Tierra property in Montara.

I strongly oppose the plan - it is unreasonable and unjust and will have a significant negative impact on my family's quality of life.

We have been using Rancho Corral to walk our dogs for many years and the land has been used as it is now for decades upon decades.

Use of the open space is critical to the health and well being of my dogs and my family - small backyards which are common in CA are prohibitive to exercise and walking on the street doesn't provide the same amount of exercise, pleasure or safety measures for the dogs or the people walking the dogs. Rancho Corral provides the perfect opportunity for dogs and their owners to get the exercise they need in a safe environment. It also allows for social interaction for owners and their dogs which is critical to the mental well being of both. We have met such wonderful people and neighbors through walking our dogs at Rancho which has enhanced our day to day living and allowed us to feel safe and secure in our community. All of this is truly invaluable.

GGNRA absolutely needs to be respectful of the residents in an around Montara that have used this land for 50 plus years with respect for the land and each other and with little or no incident. My family specifically moved to Montara for access to this green space so removing my right to enjoy it as I do now is unreasonable and prejudiced. Additionally, although before my time, I know that the community historically fought to preserve the land and defeat planned developments and freeways in order to allow the enjoyment that people and dogs have there today. If it were not for the community's passion, efforts and success it might be that there would not be a Rancho Corral today. I pay significant land taxes and expect that in doing so I should have the right to enjoy the community I live in - the GGNRA's ineffective proposed dog management would prevent me from doing so.

**Correspondence:** I walk my three dogs daily for an hour or more in Montara, Moss Beach or El Granada. I carry a bag with water, balls and plastic pick-up bags.

During our walk, I've designated an open area in each of the walks that I call our "playground". I throw a ball for each dog and they fetch and run for about 10 minutes. They love it and so do I.

We've been walking these trails (that are now GGNRA lands) for 7 years and the dogs have gotten to know the other dogs that are there regularly and socialize by sniffing and playing. The dogs that are off-leash are the better behaved and talking with the owners about that, we all seem to agree. People who know their dogs are more aggressive always have them on a leash and tell the passing walkers that is the case so when I see a dog on leash, I leash up my dogs as a precaution.

I've been making a list of how many people and dogs I meet on these walks and there are usually more dogs than people.

I meet local walkers with their dogs every day and am not concerned that if "off-leash" is part of the park plan that it will be over-run with people from outside the coast area. It has been an off-leash area for decades with no problems.

Walking with my dogs is a highlight of my day. Having them off-leash so they can stop and sniff at will (without tugging and pulling) and then run along beside me is pure joy. It takes the stress out of many stressful days at work.

One of the best reasons to live on the coast is the availability of trails for dog walking in Rancho Corral do Tierra. My physical and mental health has improved over the years because of this.

All the dog walkers I meet, no matter what the weather, smile and agree that we love doing exactly what we're doing at the moment; being out in nature with our dogs.

**Correspondence Type:** Web Form  
**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. After recently visiting other cities with far fewer off leash dog options, I noted far more unsocialized dog behavior. I believe the opportunity that GGNRA lands give for dogs to socialize off leash is an important part in maintaining dog health both physical as well as emotional and is a primary reason that allows San Francisco to be a dog friendly and coveted city for dog owners.

I frequently walk my dog in many of the areas in question and note frequently that these areas would be significantly underused if not for dogs and dog owners. On the rare day of exceptional weather (75 degrees or more), perhaps consider temporary "dog areas" and "people areas" or just simply enforce existing laws.

The new plan was not modified in any significant way to reflect the many concerns and objections of the people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

It seems the GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

I hope you will strongly consider the impact of any change to the 1979 law and perhaps even question the use of laws that can be so easily ignored or overturned. Are we just to believe laws to be temporary and up for review every 35 years or so as a new generation steps in?

Melody Jones

<b>Correspondence:</b>	From Philip Gerrie 4341 26th st SF CA 94131 Feb 6th 2014				

To the Superintendent, GGNRA, Fort Mason  
Building 201, SF CA 94123

I am a former Commissioner of the Animal Control and Welfare Commission of SF for six years. By which I am very familiar with the issues of off leash dogs on City and Federal property, being on the agenda at many meetings. I am well aware of the efforts of the dog people to overwhelm the NPS with their emails and letters. This, as you know, has been going on for many years. As a Commissioner, I met with several of you at your headquarters a couple of years ago when the first DEIS came out. I was encouraged that you had the understanding to not be swayed by the dog people's protests.

In an effort to see the situation for myself in the City's parks regarding off leash areas, fellow Commissioner Pam Hemphill and myself visited all the designated parks and witnessed plenty of room for dogs to run off leash. The problem was more with poorly defined areas and lack of maintenance rather than lack of space.

In 2008 I had the unique opportunity to visit Fort Funston in order to acquire signatures for CA Prop 2. I needed to list the people that signed by County. It was a great place to gather signatures rather than in front of Trader Joe's. Only a third of the people with dogs were from SF. Many were from San Mateo Co. Dogs are not allowed off leash in San Mateo so they would drive there. The SF Supervisors position against the DEIS is politically driven and without merit. Only one out of three dog visitors were from SF.

The dog people's arguments that their dogs need exercise only provided by running off leash in the GGNRA to be false. They have no right to use federal land to the exclusion of other uses by visitors. Many people in SF have small dogs and have no means to drive to GGNRA lands, simply walking their dogs in local parks or on the streets. I owned a dachshund for many years and it never occurred to me to let it run in a park or take her to the GGNRA.

In short I support the NPS efforts to regulate dog walking in the GGNRA and to adopt a Dog

Management plan that adheres more closely to established NPS policies to provide a National Park experience for all.

I was involved with the licensing of Commercial Dog Walkers in City Parks. They do not need a license to walk/run their dogs in the GGNRA. Some may use the GGNRA to avoid being licensed. They provide no benefit nor service to other park users and should not be allowed to use Federal property for private financial gain.

Thank you, Philip Gerrie

<b>Correspondence:</b>	I have been going to Fort Funston for many years. It has been a great place for my family and our dog to take walks. It is like no other place. We get physical activity and so does our dog. Our children get to play and run at the beach, our dog gets to run, and we get to walk. Making Fort Funston on-leash only or restricting the areas where dogs are allowed would make it terrible for all of us. If we could not take our dog there, it would mean more visits to an enclosed dog run, which means we would get no exercise since the only running is done by dogs in the enclosed dog runs. We are very responsible and always clean up after our dog and make sure he stays nearby. It is important for our health and our dog's that we still have this space for all of us to get some exercise.

**Correspondence:** Dear Superintendent Dean,

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

And in my own words, really guys? Are you really going to take one of the most dog friendly urban areas in the world and just shut that down?

Sincerely,

Jason Green

<b>Correspondence:</b>	I think that dog owners are an important constituency and dogs have been shown to keep/help make our parks safe. Furthermore, dog owners are invested in and vital supporters of open space and ensure that open space and parks are well respected and cared for. Unquestionably, we need a diversity of park space, some with no dogs, where it is critical to protect the environment, some with dogs on leash only, and some with off leash areas. This only requires creativity, sensitivity and common sense! Dogs make our communities livable for many of us and need extensive space to run. As someone with health challenges myself, my dog walking enables me to maintain my health ( a value not only for me but for my community)We need more off-leash space, not less and we need dog owners as an important voice for the value of parks and open space- not an antagonized rejected group. i know hundreds of dog owners who feel this same way. The idea that, despite a lot of community interest in maintaining and expanding open space, a national decision would ignore community interest, need, and voice is shocking and disappointing. Please! Please! Do not allow that to happen.

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to muir beach, Stinson beach and many other trails throughout Marin.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

From: Thomas Roop

SEIS Dog Management Plan

Proposed Comment #2

I am opposed to the entire GGNRA Dog Management Policy because I disagree with its premise that dogs in the GGNRA are compromising visitor safety and damaging the resources of the Recreation Area. By their own admission, the GGNRA had no data or studies to support these claims and they are relying upon these claims to initiate a process whereby access for people with dogs will be severely limited or completely banned. Even now, with this SEIS, the GGNRA admits they have no site-specific peer reviewed studies (required by Federal law) to substantiate their claims that dogs are a problem for wildlife, water quality or vegetation in the GGNRA. Instead, they rely upon anecdotal evidence and baseless assumptions to claim dogs have the potential to damage this Recreation Area.

Additionally, in the SEIS the GGNRA asserts they have the right to redefine the term "recreation" as utilized in its enabling legislation and in the promises made to the voters of San Francisco back in 1972 by the GGNRA/NPS/DOI and the GGNRA's first Superintendent, the Honorable William J. Whalen, in order to secure various properties then owned by the City and County of San Francisco. These promises, most importantly, stated that this National Recreation Area would retain historical recreational access (including off-leash recreation) should the citizens vote to include SF park properties in the GGNRA. These promises, along with the conventional definition of the term "recreation", do not comport with GGNRA's current philosophy exemplified by Daphne Hatch, Chief of Natural Resources Management and Science for the GGNRA, who in 2007 was quoted as saying "Ocean Beach without the people is an

incredible habitat. But people think of it as a sandbox or their backyard." The GGNRA does not have the legal authority to rewrite history or its enabling legislation to their own design.

Once again, buried deep within the SEIS is the GGNRA's poison pill. Only the name has changed; it is now the Monitoring-based Management Strategy. The GGNRA gets to decide whether we are in compliance, and the measures of compliance are subjective. Under this SEIS the GGNRA may decide to impose short-term or long-term closures of areas. These short or long term closures could be triggered by any number of conditions totally under the purview of the GGNRA, all of which dog guardians have no ability to influence by our actions. The GGNRA could decide they want to make Fort Funston in its entirety a native plant restoration/habitat; and they can do so, based upon this language. More erosion at Ocean Beach or the beach below Fort Funston could be their reason to ban dogs entirely from these beaches. This is unacceptable.

The GGNRA still has the authority, the ability and the moral responsibility to codify the original 1979 Pet Policy as a Section Seven Special Regulation. All properties added subsequent to the 1979 Pet Policy and in the future should have historical off-leash recreational usage allowed. This would accurately reflect the enabling legislation for this National Recreation Area which GGNRA management has held in disregard for quite some time.

If the GGNRA does not want to manage these properties as a Recreation Area, then they should transfer the Recreation Area to another entity better able to manage it, e.g. the Forest Service or Bureau of Land Management. Alternatively, for sites heavily utilized by dogs and their guardians, such as Ocean Beach and Fort Funston, these properties should be reverted back to San Francisco.

Mr. Dean where is the Site Specific Scientific Peer Review required by law?

Thomas Roop

Daly City CA

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely

populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

---

**Correspondence:** To Whom it May Concern,

As a taxpayer in this state and in the city of San Francisco I am deeply disturbed by the proposal to prohibit dogs (on and off leash) from Golden Gate National Recreational Areas. In San Francisco there is precious little green space for which humans have to enjoy let alone the four legged members of our family. I rely on these area's to take my dog to to let her stretch her legs and run. She is well behaved and under voice command. In all the time I have been using the area's in SF I have never seen a dog misbehave. Does it happen occasionally? Probably, but that doesn't mean we should ban everyone from utilizing the area's we as taxpayers pay for. These areas are meant to be urban recreation area's - to be used by people. These area's have been used extensively for decades and environmental damage is already done. If dogs are banned, people will bring them and themselves to other natural areas and disturb the ecosystems there.

**Correspondence:** Taking away the off leash ares proposed by the GGNRA will be devastating not only to local area residents, but also to any parks around them. The GGNRA believes that dogs are destroying the natural habitat of (specifically) Fort Funston, but in reality dogs are a major part of the natural habitat. Aren't our parks to be used by all Bay Area citizens - that includes dogs/ animals? The proposed parks threatened to be taken as off leash would be a disaster to our entire county and beyond. And then who would use them? As it stands, when my family goes to GGNRA lands we encounter other dogs, families with or without kids, old people, young people, etc... Everyone gets along. Why do you want to force all dogs and people into small city parks where there is no way people/dogs will get along in those crowded environments?

**Correspondence:** To whom it may concern,

As a dog owner who frequents GGNRA parks I am writing to voice my opposition to any plan that reduces the number of off leash allowed parks in the bay area. Due to the high cost of living in the bay area we don't have our own personal property large enough for our dog to run around at all in. This forces us like most others living in such a densely populated area to rely on public parks and lands to spend time

---

with our pets in a healthy fashion. Without these parks our dogs are restricted to the small square footage homes and the busy, polluted city sidewalks under leash. The GGNRA parks have brought lots of joy and healthy recreation to us and our dog and we would hope that we will be allowed to continue to enjoy it in the future. Please do not restrict the areas we can walk with our dog off leash and formalize the original 1979 pet policy.

Sincerely,

Karthik Yogeeswaran

**Correspondence:** I know that people have good intentions and often feel that their dogs are well trained but too often the damage is done before an owner can get the most well trained dog under control. I have seen Fort Funston go from one of the most beautiful areas in the City to a place that is totally overrun with dogs and where regular citizens cannot walk w/o being disturbed by a dog to say nothing of where one can step w/o encountering dog poop. Please don't let this happen to other areas of San Francisco

The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

â€ We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs.

â€ Off-leash areas should be marked off with fencing or natural borders such as bushes.

â€ Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

**Correspondence:** I am planning to relocate to Marin in the next few months.

After reading this proposal I am reconsidering my move.

One of Marin's appeal is the acces to dog friendly beaches and parks.

Having my little dog be able to enjoy nature with me is a high priority in my relocation decision.

Restricting animals in a natural environment has an element of cruelty to me.

All living creatures should be allowed acces to nature.

To restrict dogs from Muir beach, where local residence exercise and enjoy bringing their pets daily is unfair and short sighted.

I urge you to continue to allow dogs to use this area.

You could consider offering a yearly dog permit fee allowing access to these nature ares that would help offset costs of maintenanc, if that is an issue.

Many dog owners would be open to pay to allow their dogs the freedom to enjoy dog friendly beaches and parks.

**Correspondence:** I am a resident of San Francisco. One of the best parts about our fine city is the immediate access to beautiful outdoor environments. I am also a dog-lover. A brief walk around San Francisco would show any observer that dogs are part of the fabric of this city!

From what I understand, the current draft plan is far too restrictive. Off leash areas are critical in our progressive city, and I think it is ridiculous that the plan does not include an off-leash area in Crissy Field, among other places. These areas are special and unique to San Francisco, and the use plan should be more inclusive to our community. We are lucky that there is enough acreage available for many uses, and we should embrace this.

I would encourage the public to reconsider the proposal in favor of a use plan that is more reflective of San Francisco's progressive culture.

Thank you,  
Josh Weiner

**Correspondence:** We STRONGLY OPPOSE Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

We regularly take our dog to the beautiful dog-friendly areas of the GGNRA, like muir beach, coyote ridge, miwok trail, and more. Taking our dog to these places is a huge part of our lives and it would be devastating to lose access to these trails.

Dogs are already off-limits on over 99% o the Golden Gate National Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** To whom it may Concern,

My name is Tom Dallman and I am a neighbor of the Sutro Heights/Lands End portion of the GGNRA and strongly object to the proposed restrictions of off-leash dog areas in the GGNRA. I earned a Botany Ph.D. in 1988 and have been a science teacher at an SFUSD high school since 2004. My students volunteer with groups performing habitat restoration in local parks, including the GGNRA, as part of my curriculum.

I also have a Service Dog that accompanies me to work and performs her duties above and beyond the call of duty. A primary reward for her service is off-leash time, often in the voice-command off-leash areas in the GGNRA adjacent to my Neighborhood (Fort Funston, Lands End, Presidio) along with SF Rec. and Parks off-leash dog areas.

I recognize that a small minority of dogs and people act improperly as with the following behaviors:

⌘ Leaving behind waste

⌘ Unmanageable pack sizes for dog walkers

⌘ Digging (ie for gophers)

⌘ Flushing Birds (mostly at the beach)

A majority of dog owners disapprove of these behaviors, pick up the waste of others dogs and approve of strict enforcement and enhancement of rules against destructive dogs and their owners.

I strongly believe that current heavy handed and unnecessary plans by the NPS to radically reduce off-leash dog areas in the GGNRA grossly overestimate the effect dogs have on park habitat and will be seen as a historic black-eye for NPS policy and management. City and County of San Francisco acreage transferred to GGNRA was intended to remain Recreation Areas to be enjoyed by people and animals

alike. National Parks within an urban setting are different than wilderness areas, like Yosemite, and require sensitive management models that balance the needs of both human and wild populations.

I passionately support habitat restoration but don't see current off-leash dog policy as a problem that negatively impacts this goal to the nearly the degree of other management issues. I have seen beautiful widespread pruning of Cypress trees, impressive to tourists and locals alike, negatively impact bat and song bird populations by allowing raccoons up into the high canopy and significantly reducing insect habitats. I love seeing coyotes catch a rodent meal yet this can cause a proportion of the digging damage blamed on dogs. I have also seen impacts of overnight camping negatively impact habitats to a lesser degree. I believe non-politicized and non-biased scientific studies would bear out these observations.

Dog walkers/owners are natural allies and supporters of parks and environmental groups. The NPS plan to curtail off-leash dog areas throughout the GGNRA will create long lasting animosity and conflict, legal and otherwise, that will unnecessarily divert vital resources from worthy projects that enhance restoration efforts, like the day-lighting of Tennessee Hollow that benefits everyone and acts as a proof of concept for Urban National Parks.

Sincerely and with appreciation of the hard work of everyone with the shared goal of a beautiful and diverse GGNRA,

Tom Dallman

**Correspondence Type:** Web Form  
**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Laura Sweet

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years. I must state with the firmest voice that this is NOT a "preferred" plan by anyone I know in San Francisco.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. This plan essentially tells thousands of people who use this park everyday that they are no longer welcome in a place that their tax dollars support.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future. If you insist on going forward with this ill-conceived plan, then at least refrain from billing me through taxes to pay for the GGNRA parks or any of the Federal Parks system, as you will have effectively barred my use of same.

Sincerely,

Notty Bumbo, Kate Donohue, and Yeats

**Correspondence:** My Husband and I live in the Richmond District and although we are not dog owners, we feel that curtailing the areas for dog walking is bad for the character and the freedom of the area. We often go to these areas just to interact and watch the dogs play and exercise. Shrinking these historically open spaces is not beneficial to a uniquely urban national park. The areas where the dogs can run even now only represent less than 5% othe total acreage of the GGNRA. I would bet that these areas are the most utilized by the local citizens. To confine them to an even smaller space will only create larger problems. When we gave you these lands to manage it was with a crystal clear understanding that specific sections were to remain off leash and open for dogs and their owners to exercise. I see absolutely no reason to change and shrink the already well-used and well-loved 5 percent of the park that is dog-friendly. With over 95% It for wildlife. Angering the large population by shrinking their areas will lead to larger problems of enforcement. I suggest that you keep these historically dog friendly areas open and continue with your excellent management of our beloved GGNRA, which is an excellent balance for these lands.

Abby Draper

**Correspondence:** Off leash open space is incredibly important for dog owners and dogs. Dog parks are dangerous with overcrowding and the inability for a dog to avoid or move away from aggressive dogs. On leash walks are great and important but does not truly provide the dog the exercise and enrichment it needs. Off lease walks with my dog are how we both get exercise and 'me' time. We are responsible and well trained. Please keep these places open to us. They are very important and needed.

**Correspondence:** I regularly walk with my dog on the Oakwood and Camino Alto ridge trails. We would like to enjoy the multitude of other beautiful trails available as well, but they are off limits to dogs. These are some of the only trails left that allow my dog. I don't really understand the limiting of dogs on trails. I think dogs are more gentle on trails than humans. Dogs don't build illegal trails to zoom along on their bikes. Dogs don't start forest fires by throwing out lit cigarettes or not putting out their campfires. They also don't leave trash and other garbage behind. The only thing they do leave behind (if their human doesn't pick it up) is completely biodegradable. A few dogs are misbehaved but most are well behaved and under voice or leash control. Dogs are just happy to be outside and they get their humans outside too which is healthy for everyone.

**Correspondence Type:** Web Form  
**Correspondence:** Comments to the Dog Management Plan

I urge the NPS to regulate dog walking in the GGNRA and agree with the "Preferred Alternative F Plan" concerning Fort Funston (FOFU). The most important issue is the reduction of the number of dogs a person is allowed to walk. Walking through FOFU is like walking through herds of sheep running out of control causing degradation of plant and animal life.

The parking lot and the old hangar site will provide a large ROLA site for running but it is difficult to define a trail in FOFU because it is crisscrossed by trails and new ones that appear all the time.

From the "Special Species Status": Common Raven is nest predator of Bank Swallows. However, ravens are also attracted to FOFU because visitors feed them. Flock of ravens often perch near the entrance and/or hang around cars waiting for handouts. For instance: a driver feeds the ravens; a dog walker comes with dogs that chase the birds; and, the driver and the walker think that it is hilarious.

From "Alternative A and B": Habitat Protection Area to protect native plant communities. There are few native plants growing at this site. About ten years ago, when the site was fenced in, dog walkers protested. FOFU nursery volunteers were told not to enter the site when lead deposits were found from its former use as a rifle range. Instead of the Habitat Protection Area, protect the original Bank Swallow Site, which has been kept weed free by volunteers for the last seventeen years. Rotting fence posts, falling cables and blowing sand are an invitation for new trails. After a blow out a population of Beach Pea (*Latyrus littoralis* rare in San Francisco) appeared, but new social trails could put them in peril.

Page 1052 of the "GGNRA Dog Management - SEIS" states that off leash play areas are important to walk to the site: During the last fifteen years I have seen only one person walking into FOFU with a dog.

Please adopt the ruling which helps nature and most of the visitors.

<b>Correspondence:</b>	I am writing only in response to the Fort Funston portion of the plan. We use the park with our dog frequently (1-2x per week). I am also a long-time resident (more than 50 years).				

While the newer version of the plan is an improvement on the original, more off leash areas should be utilized to continue to make the park attractive to dog owners/walkers. The dog people, when behaving well, have benefited the park. The resource attracts families, keeps the park busy, and gets dogs needed exercise. Before the Fort became popular for dogs, it was not a great place and did not attract the wide range of users it does now. It instead attracted a crowd not conducive to families or family activities.

A better balance of off-leash activity and species protection should be relatively straightforward. Restrictions that only discourage dog owners from using the park will have an overall detrimental effect on park users and the park.

**Correspondence:** Please do not restrict access to dogs and owners but rather craft laws that inform dog owners of any areas where sensitive species exist and damage that could be done by their dog. Dog owners who do not keep their dogs on the trail should be ticketed but the residents who wish to enjoy the outdoors with their canine companion responsibly should be welcomed and encouraged. I personally would be happy to pay for an annual license to walk with my dog in all Marin's open spaces (National Parks, State Parks, Water district etc). The license would have a test to show my dog would stay on trails, I could be educated on areas of concern and I would be allowed on trails on weekdays when use is lowest.

**Correspondence:** We are a family in San Francisco with a 1 yr. old pup, Juno. We have always valued the amenities in SF for being a dog loving city.  
Places that we often frequent with our pup includes Fort Funston, Ocean beach, and Golden Gate Park. Being able to take Juno to off leash areas are greatly important for the health of our high energy dog. At the same time, she socializes with other friendly dogs visiting. We always pick up after ourselves and stay by a leave no trace habit. We implore the city to help maintain these benefits that have made what we love about this place that we call home.  
Thanks,  
M

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, especially Fort Fumston, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a

drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,  
Barry Cynamon

**Correspondence:** The proposed limit on dogs off lease is just stupid! The only way to "completely" protect these "vital" areas is shut down the planet! That's right just kill all the humans and it will solve all of your supposed problems. On a lighter note, what you should be doing is opening up some of these places in the Urban Areas so people won't have to go to ever more sensitive spots... That's right open places like Fort Funston, Ocean Beach and others in urban areas to protect these areas that actually need it. THE URBAN AREAS SHOULD BE OPEN PERIOD, THE SHIP SAILED ON THIS ISSUE MANY, MANY MOONS AGO, SO GET ANOTHER (PERSONAL/PROFESSIONAL), AGENDA UNLESS YOU ARE READY TO EXTERMINATE THE HUMAN RACE.

**Correspondence:** I am a daily Fort Funston user and I request the GGNRA maintain current off leash dog privileges at this site. Like so many of us at Funston, I am older.

My life line is walking my dog around the top of Fort Funston each day. This is where I meet people, get exercise and serve the community - by picking up extra poop.

One change I would like to see at Funston is a change in management. The rangers there are surly and distant, there is no active volunteer program - all signs point to an abuse of power and no strength within the organization to develop and maintain operating systems.

I wonder if any of you have ever spent time at this site.

The GGNRA clearly does not want to manage sites that include off leash dog privileges. I am sorry you are in this position.

**Correspondence:** The report includes a section that makes some statements about how the policy change is needed in order to reduce the incidence of unleashed dogs attacking guide dogs. This section does not include any data or evidence that there are an unusual number of unleashed dogs interfering with or attacking guide dogs. In the absence of any data or evidence, there is no basis for imposing a change in policy.

I understand that the purpose of this process is for the NPS to present its reasons for imposing a substantial policy change within the GGNRA. Quite frankly, I do not understand why this section was included in this report, as it does not provide any evidence that the proposed change would have any

effect on the problem being discussed.

In general, if the NPS is unable to provide evidence that the proposed policy change will have the intended effect, they should be prevented from imposing the policy change.

**Correspondence:** This is a city where there are more dogs than children. We're not asking for much. We're not taking any parks or open areas away from children or adults. We need areas where we can exercise our dogs. The proposed Preferred Alternative is too restrictive and there is no justification in the dog management plan for major changes.

I support the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash area feel like pens and visitors using them will feel unwelcome.

The GGNRA should not be allowed to change the leash law status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

\*\*\*\*\*If you drive by Fort Funston or Crissy Field, for example, on any day of the year and in any type of weather, rain, fog, heavy drizzle, windy- -there is always somebody using the park with their dog.

**Correspondence:** Dear GGNRA,

I ask you to please, please keep the open field of Rancho an area where dogs can run free! It is essential to the health, well-being and socialization of dogs to be able to run and play off-leash. I have been walking/running dogs off leash in this area for close to 30 years. I am on my third dog. I know there have been many letters that have addressed the specific issues in the Dog Management Plan, from lawyers to concerned citizens, that have more than adequately argued for less restrictions on dogs. I am writing as a daily walker of Rancho.

At an open house on this issue in Pacifica a ranger told me that to keep running my dog off-leash I should go to Fort Funston. I do not see how driving round trip to the City every day to exercise my dog is better than walking to an open field that is a block from my house? This is nonsensical and hardly makes for a good environmental choice.

Please be reasonable. Do not ban off-leash access to Rancho. This will be detrimental to a way of life that has existed in this area, my home, for decades.

Sincerely,

Trish McGrath  
Montara Resident

**Correspondence:** First, some background for my comment. I am an Engineering Professor at Stanford University, and I spend a great deal of my time reading, writing and reviewing research reports. I also live in the City, and own two dogs and make regular use of the Presidio open spaces. Just this morning I was at Crissy Field, where I observed a large number of people and dogs all having a wonderful experience.

I've just finished reading the section of the report on "Dogs and the Visitor Experience" and I found the presentation of evidence and the logical arguments presented to be very weak. In particular, the report cites results from a number of surveys of visitors related to their experiences with dogs in the GGNRA. The report avoids presenting a complete record of the comments or even the quantitative survey data - instead, the report selects a few specific comments and a few specific results that support the decision that the NPS prefers. This is not a scientific analysis in search of the best outcome - it is cherry-picking to find facts in support of a pre-selected conclusion. I was very sad to see the NPS representing its process in this way.

For example, the report states that "...In this report, 71 percent of public comments favored allowing off-leash dog walking in selected GGNRA sites (option B) and 28 percent of public comments favored the enforcement of existing leash laws in the GGNRA (option A) (NAU 2002a, 5). More than 500 respondents affirmed their belief that it is their right to walk dogs off leash at park sites. ..."

Unfortunately, the first result, that 71% favored off-leash walking is unhelpful, as it does not state the question that was asked, what the other options were, and what the probability of all the other answers being given. The second result, that 28% favored enforcement of leash laws, is similarly flawed, as it also does not indicate what alternatives were offered, or what the other 72% of answers were. Finally, citing that there were 500 people who believe it to be their right to walk dogs off leash is unhelpful, as the percentage of respondents with this response is not given, nor are the other possible answers to this question and the distribution of answers provided. Throughout this analysis, the presentation of incomplete excerpts is not consistent with the use of such data to identify a best course of action, but rather with the use of data to support a pre-existing conclusion.

Another example, "...Almost one-third of visitors from each of four counties surveyed who had seen off-leash dogs while visiting GGNRA sites viewed that experience positively, but the largest proportion of visitors from each county stated that off-leash dogs had neither a positive nor negative effect on their experience at GGNRA (NAU 2002b, 20)...." Based just on this statement, that 1/3 favored off-leash walking, and that the largest group were ambivalent, it is clear that the fraction that opposed off-leash walking has to be much less than 1/3. The report selects a fraction of this particular result, describes it in an unbalanced way, omitting the part of the result that is inconsistent with the pre-existing conclusion. This is a textbook example of biased reporting.

Another example of misleading reporting : "Of the dog walkers that responded to the survey ... 30 percent of individuals were not satisfied or slightly satisfied with off-leash dog walking opportunities their most frequently visited sites at the park (NPS 2012a, 11, 16)" By omission, does this mean that 70% of dog walkers were "highly satisfied" with the off-leash dog walking opportunities? As with the earlier examples, the GGNRA report selects a portion of the factual record, and describes it in a biased way.

Overall, my experience in reading the report was similar to the experience I have when I watch Sean Hannity on Fox News - His entire segment always consists of a carefully-screened selection of facts that support his prior conclusions, presented in a way that distorts the information, incorporates his pre-existing bias, and excludes all contradictory evidence. I understand that the NPS would like to change the policy for the users of the GGNRA. I am upset that the NPS is behaving like a fox news "reporter" in this process, presenting bits of data and information out of context to justify a policy change.

From my perspective, the data presented does not justify a change in policy. The present rules and arrangements in the GGNRA are not perfect, and can probably use some tuning, as well as some added limitations in a few especially sensitive areas. However, this report does not show that the proposed policy changes will have the intended effect. For the information on this section on the "Experience", it seems clear to me that the present policy has very many desirable effects, and that the proposed changes will mostly have negative impacts on this experience.

**Correspondence:** I have carefully read the document provided in support of the proposed policy changes for dog walking in the GGNRA. I was astonished to find a section of the report on "Environmental Justice", and read this section carefully to try and understand the argument being made.

This section presents data suggesting that minorities are especially concerned about the problems associated with off-leash dog walking : "...Research found that these minority groups mentioned dogs, especially dog waste, as a barrier to park visitation, and overall, Latinos were the most concerned with dog owners' lack of concern or control of their dogs (Roberts 2007, iii)."

However, even throughout this section, the data presented frequently contradicts the conclusion offered by the report. For example, "...in the telephone survey conducted by Arizona University's Social Research Laboratory, 39.4 percent of respondents of Hispanic origin supported (strongly and somewhat) off-leash dog walking and 39.9 percent of respondents of non-Hispanic origin supported (strongly and somewhat) off-leash dog walking (NAU 2002b, 93)." Here, there is no detectable difference between the opinions of different groups. Basically, this "evidence" does not support any particular conclusion or policy. Why is this presented? A careful reading of this entire section of the report does not produce any evidence to support the GGNRA presumption that the current policies are "unjust".

Even worse, I find this entire section offensive because of the way it presents stereotypes and racially-biased comments throughout the analysis. Furthermore, I am upset that the NPS would go to this trouble in attempting to manufacture a racial justice argument to support their objective. Is the goal of the NPS to divide and conquer? Is it so important to restrict off-leash dog walking that the NPS would try to divide us along racial lines in order to do so?

Even more so, I was greatly surprised to see that the authors of this report are so intensely focused on presenting evidence to support their chosen conclusion that they would include such an offensive section in the report - ESPECIALLY because the information presented in this section does not even give any direct support for the proposed policy change. The only thing that could possibly be accomplished here is to generate a division along racial lines which could be exploited to justify a policy change. I just find this whole tactic offensive.

Why even bother to include this section, as it is offensive and otherwise meaningless?

For me, this section has had one other sad effect - It has degraded my previously-positive impression of the National Park Service.

**Correspondence:** Please please please do not take away off leash rights in San Francisco! This is an integral part of life for dogs and their human companions. It helps us all have fun, exercise, socialize, and be happier people and animals. Taking away this right is a waste of time, energy, and resources that could be better spent on a million other projects. Also, perhaps you have not thought of all of the after effects to something like this that will ripple through San Francisco, including, less adoptions for the homeless dogs in shelters, more damage to homes/apartments because dogs have less outlets for play which could in turn increase rents, drive good people out, etc. and also, unhappier people!!!! Don't you want your city to be a happy, healthy, compassionate city? Dogs, exercise and fresh air make everyone happy! If I didn't have my dog to go out and enjoy parks, hike, explore and play with, I know I wouldn't get enough exercise. Please please please think twice! This affects all of us.

<b>Correspondence:</b>	The 2013 Environmental Impact Statement appears to be biased against dogs. Studies which have found minimal impact from dogs have been suppressed.				

---

For example, in the GGNRA's own Draft Dog Management Plan/EIS of January 2011, it cites a study by Bekoff, M., and C.A. Meaney, saying "off-leash dogs generally travelled less than 6 to 15 feet off trail, for less than 1 to 2 minutes. They further noted that dogs traveling farther off trail were often lured there by the people responsible for them (throwing sticks, balls, or Frisbees, or going off trail and calling their dogs to follow)." The same study found that "off leash dogs generally did not travel far off-trail and rarely were observed to chase other dogs, disturb people, chase wildlife, destroy vegetation or enter bodies of water."

This study by Bekoff and Meaney is nowhere to be found in the 2013 DGMP/Supplemental EIS.

My particular concern is the Baquiano Trail on Sweeney Ridge, because that is closest to my home. Considering slope and trail width, allowing dogs on the western, coastal part of the trail and disallowing dogs on the eastern part is exactly backwards.

**Correspondence:** Dear GGNRA members,

My name is Judie Doherty. I live in Pacific Heights, San Francisco and I often walk, and play with my dog at Crissy Field.

I am deeply concerned about the GGNRA Dog Management Plan in several areas and I am hopeful and confident you will find my concerns and those of other dog owners substantive and deserving of your consideration. And encourage you to provide an open a dialog with dog owners and all residents in our city of San Francisco and the 3 counties.

Here are just a few of my concerns:

In 1972 the GGNRA was created by an act of Congress to allow for urban recreation and open space in the Bay Area and continued development of this major urban area. The GGNRA was built and created for dog walking to better the quality of life of the residents and their dogs and making this a priority.

Regrettably, the plan has forgotten this priority, and now not only wants to remove and limit off leash walking, it prevents future off leash in new areas.

The plan includes many unsubstantiated assumptions and implications that must be substantiated.

The SEIS has failed to respond to all comments submitted by the US EPA. How can you justify this?

The process to date has been very one sided. Respectfully, the GGNRA should set up a forum of pet owners, dog-walkers, and GGNRA members. One sided decisions never work and always require tremendous follow up energy and money, and generally build of of ill-will on all sides. Please I encourage you to consider this and make it happen.

Relative to the comments about visitors, I strong disagree, while there there may be a few exceptions, the visitors I have experienced love to see the dogs, I have seen their joy and taken more pictures of them with my dog then I can begin to count . The welcoming dogs make a statement on behave of our City, they say we are friendly, and love animals. The visitors like that and it is good for the city too !

Most pet owners are responsible if, there are any irresponsible pet owners I say hold only those accountable please don't make all of us and our dogs suffer for a few. Revoke their privilege and or fine them.

Lastly, Little if anything has been done to make the public aware of this plan, when so many will be negatively effected.

If it were not for the email I received from friends with pets that are aware of the GGNRAs actions and intents. I have seen ZERO information regarding this plan. So how many other pet owners do not even know to respond or comment.

Please consider this when you are counting the responses you receive..

While I believe the GGNRA intentions are well meaning there appears to be the loss of insight of the original purpose of GGNRA and I am hopeful and encouraged that you will listen and respond positively to the original intent of this organization and the thousands of people and their pets in the 3 counties, effective by your decisions.

Respectfully,

Judie Doherty

**Correspondence:** It is sad and unsettling to encounter the too common bad dog owner whose off leash animals fight other dogs, bother/scare people and randomly attack and harass wildlife. I frequently see dogs not even in visual range of their owners, let alone under voice command. Sadly, this knucklehead minority of bad dog owners necessitate more rigorous protections be put into place, and most importantly that implementation and enforcement of rules be a priority for law enforcement. Periods where citation can be expected by bad dog owners, with serious enhancements for repeat offenders, will get the word out and alter behaviors with a minimal investment by NPS. I think the recommendations of the Audubon Society are a reasonable minimum that should be adopted to preserve the wildlife and enjoyment of the area for the vast majority of people.

**Correspondence:** I frequent Fort Funston regularly as a place to safely allow my dog to be off-leash.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely

---

populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Suzanne Epstein

**Correspondence:** Sirs/Madams,

My name is Alexander Dozier and I live in San Francisco California. I visit Chrissy Fields Fort Funston along with other off leash areas around the city of San Francisco. I strongly oppose the Preferred Alternative because it is too restrictive. Open areas for dogs to run off leash in urban areas are necessary for their health and general well being. I feel some of the possible out comes of this plan do not provide adequate attention to that fact. By taking away a large portion of the off leash areas we run the risk of not giving dogs the stimulation they need. I also object to the proposal to fence the areas where dogs are allowed as if dog owners should be separated from the general population. I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Sincerely,

Alexander Dozier

**Correspondence:** I have lived in the outer Richmond near Golden Gate Park and Sutro Park most of my life. As a current resident I see the benefits to dog and man of access to open space. I enjoy the privilege of walking my dog on and off leash. I want to continue to have the option to allow my dog freedom, I also want visitors without dogs to enjoy the space as well.

Rather than imposing restrictive policies consider creating dog friendly spaces which will encourage dog owners to congregate is a space better suited for dog play, out of the way of main paths or attractions.

Positive reinforcement of the behaviors you want increases the behaviors likelihood, its basic dog and human training.

<b>Correspondence:</b>	Dear Superintendent Dean:				

I am disheartened that we have to fight this SAME fight so many times. Every few years, we come up against this same problem and it's so tiring. The people have spoken and we dog owners make up a huge percentage of the population.

We are a dedicated group of dog owners and walkers who need to have the open space to run our pets. I have personally picked up garbage and of course my dogs' mess every single time I am there. There are monthly cleanups to keep the area in good shape. The people who use Fort Funston regularly are very conscientious about keeping the area clean, respecting other wildlife that is there & not leaving any garbage behind.

People who own dogs have them for all kinds of reasons, and many of those are emotional, physical, etc. People need to have a place where their dogs get adequate, off-leash exercise. It makes dogs better behaved and quieter.

PLEASE keep the area open to us and our pets!!!

Thank you,  
Dee-Dee Sberlo

**Correspondence:** Dear Superintendent Dean,

Please consider the needs of the region's many dog owners as you deliberate the new plan. it seems to me that, given the importance of the National Recreation Area to its users, your decisions should include careful compromise. Most of us dog owners are responsible citizens and taxpayers with well-behaved dogs. Our dogs are part of our families. The current plan is much too restrictive!

Thank you.  
Sincerely,  
Carolyn Willard

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

Walking my dog near my home is one of the highlights of my day, and my dog's as well. Watching her run off leash brings Joy and happiness to our entire family. I can't think of a more wholesome and healthy family activity. We live in Marin to be able to enjoy the beautiful national parks that surround us. As a tax payer I hope to be able to continue to be able to use and enjoy these areas with my dog.

Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I oppose the GGNRA Draft Dog Management Plan  
I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.  
I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.  
The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.  
Parts of the Golden Gate National Recreational Area I visit with my dog:

**Correspondence:** Dear Superintendent Dean,

Although the revised Dog Management Plan is a slight improvement, it still ignores the recreational needs of thousands of current GGNRA visitors who visit the many units of the GGNRA on a regular basis.

As you well know, close to 90% of the people visiting Ft. Funston are with dogs. They come to walk their dogs off-leash so that they and their dogs can benefit from true exercise and fresh air. And most of the other folks come to see the array of dogs and the hang gliders. Ft. Funston is the area where I've walked my series of dogs almost every afternoon since 1978. Yes, that makes me now a senior writing to you to comment about a specific lack of balance that you keep stressing is your goal.

The NPS claims to be a champion of seniors and disabled. Your plans to make the asphalt trails, which BTW have not had the sand removed for a very long time, on leash only means that the many seniors who might be a bit unsteady, or use canes, a walker, a wheelchair - not to mention the families with strollers - will be unable to walk with their dogs at FF.

As with other seniors, walking with my dogs is my primary form of exercise, recreation, and socialization. We walk from the parking lot out to the last bench or down the sand ladder and north on the beach to the beach trail. Standing on a sand dune or in a patch of ice plant where the NPS has designated an off-leash area is not recreation, exercise, or socialization for us. [And BTW no maintenance of the few benches has been done in 20 years - most have only one single board for sitting or have been buried]. Therefore, with your current plans, many of us will no longer be welcome at FF with dogs. So much for the NPS being supportive of seniors, the disabled and even families! Where is your balance?

**Correspondence:** I have a dog trained to voice command who is always with me, including at work. I know that some people have dogs that are almost completely untrained, who sometimes even don't know their own names. These irresponsible dog owners probably do damage the environment. I want to be fair in saying this.

But if the law is going to take the trouble to enforce banning dogs or enforcing leash laws in a way that

---

harms everyone, why not simply create and enforce laws that protect the environment and allow people with well trained dogs to have access to the parks? At Muir beach ticket people who allow their dogs to hurt the new project, which is the point. No one believes dogs are harming the sand.

If there are going to be police out there issuing citations, why not have them issue citations for the harmful activity? Making the whole beach leash only punishes the innocent majority. Moreover the people who let their dogs roam on the newly planted area are unlikely to respect the leash law anyway. Ticket people for the harmful activity and it will be discouraged as much as ticketing everyone with a dog off leash,

I want to point out that the purpose of parks are for people to enjoy, not to sit as an example of a pristine environment. There are miles of coast land and acres of wilderness in the park where no one ever goes and thousands of square miles that are not park in which the environment is untouched by man. The job of the park service is to provide land that is cared for by the park service for people to enjoy and use, which includes dogs.

I understand that in this political climate it is hard to get funding, but I hope these dog laws are not to raise money from tickets.

Recall what the purpose of parks are, a place for people, and their dogs, to see nature. There may be a political agenda that the parks are the "natural environment" but they are not, they are parks. The natural environment is found outside parks.

<b>Correspondence:</b>	I support the proposed Dog Management Plan. In addition, please add that off leash areas be clearly marked, with boundaries and with enforcement so that park visitors, leashed dogs and wildlife are safe in the rest of the park.				
	My toddler was knocked down by a large unleashed dog at Crissy field and developed a fear of dogs that lasted years.				

There are too many places in the park where a family cannot sit down with young children or food and be safe from invading dogs. The alarming sight of uncontrolled dogs running down shorebirds and horses must stop.

As a former dog owner, I believe that the proposed dog management plan has ample off leash dog play areas. Having dogs held on leash is the only way that miles of trails can be enjoyed equally by dog walkers and everyone else.

<b>Correspondence:</b>	Dear Superintendent Dean,				

As someone who walks regularly with my dogs and family in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me, my husband, and daughter from recreating with our dogs for my own health and my dogs' health the way I have on GGNRA properties, most specifically Fort Funston, Crissy Field, and Ocean Beach for 20 years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Francisco, Marin and San Mateo County and on new lands that the GGNRA acquires in the future.

Sincerely,

Anne Stanton Malone  
80 Cragmont Avenue  
San Francisco, CA 94116

RE: GGNRA Dog Management Plan

Dear Mr. Dean:

I am an 86 year old resident and home owner in San Francisco, as well as a life-long Democrat who believes in a strong federal government. However, you are one federal agency totally out of control when it comes to your Dog Management Plan and the money you have wasted pushing it on us. This plan does not meet the needs of the 180,000 dogs and their owners that reside in San Francisco. You have absolutely no regard for the impact your plan would have on city parks. You are trying to turn Fort Funston and Crissy Field into another Yosemite, which they are not. I reject your entire Dog Management Plan and want the rules established in the 1979 Pet Policy to be enforced.

Sincerely,

Lile Adams

**Correspondence:** January 21, 2014

Dear Superintendent Dean,

My name is Carol Schlesinger, am 64 years old, and I live in San Francisco. I am writing to oppose the

GGNRA's draft dog management plan. I have walked my dogs at Fort Funston since 1996.

I am able to walk up and down the cliffs and pass folks half my age because of the exercise I get at the beach with my dog. Fort Funston has been my sanctuary. I worked for almost 15 years at Hospice By the Bay as their Bereavement Coordinator until the middle of last year. The three days I walked per week helped me stay present for others in their grief process. I now walk almost every morning with my new dog. The sense of community is very strong, as well as the sense of taking care of the land. It is a place where women can walk alone and feel safe. It is a sacred space for many people and their dogs.

The GGNRA can accommodate both recreation and conservation. It was designed as an urban recreation area, not a pristine wilderness areas like Yosemite. In fact, the courts have repeatedly upheld the existing 1979 pet policy. They have said that it was consistent in both fact and intent with the original mandate for recreation upon which the GGNRA was founded.

This plan disregards the health and well-being of people, dogs, and the community. It arbitrarily excludes the Bay Area residents who exercise regularly with their canine companions. This plan discriminates against all people with dogs, including tourists, seniors, families, the disabled, minorities, and others.

The GGNRA draft management plan does not provide evidence to justify such drastic changes to 40 years of healthy dog and human recreation. The Park Service should revise the dog management plan to:

• Honor the original 1979 Pet Policy. Respect dog-walking as legitimate recreation.

• Provide for extensive off and on-leash dog walking on all trails and other lands acquired by the GGNRA since 1979, especially in San Mateo County.

• Exclude speculative, exaggerated, biased, or misleading statements and studies.

• Provide reasonable ways to address any significant adverse impacts from recreational activities. Use objective standards applicable to other recreational activities (e.g., equestrians, boaters, fishermen, surfers, bicyclists, beach-goers, joggers, walkers, etc.).

• Eliminate "compliance-based management," which will allow additional restrictions to be implemented without any public input.

Sincerely,

Carol Schlesinger

**Correspondence:** As a Marin County native and resident, I strongly encourage you to adopt Marin County Supervisor Sears' alternative to the plan that restricts dog access in the GGNRA. Not only is the current proposal draconian and discriminatory towards dog owners who deeply respect and enjoy their parklands, but would discourage people from accessing and investing energy into protecting their natural environment. Restricting opportunities for visitors and residents to learn experientially about our natural treasures will lead to disengagement, disinvestment, and eventually, disregard.

If you want to protect our parklands, you should be supporting RESPONSIBLE and REGULAR access to them, canine companions included.

**Correspondence:** We live in the East Bay but have just bought a condo in San Francisco for our retirement. One of the main reasons for this is that we love walking our dog at Crissy Field, Rodeo Beach and Marin Headlands and occasionally Fort Funston. Our dog is a very smart Border Collie/Greyhound mix who was a physical and emotional wreck when we adopted her at 1 year of age. She is now 7 years old but still very active and athletic. Most of her progress we attribute to patient training and LOTS of off leash walking, running and swimming. We are not very active ourselves because of various health problems relating to joint problems and find the off leash areas a great way for Flit to exercise and us to keep up with her to the extent we can while being able to see her. Off course we have trained her to return from large distances instantaneously either by whistle or hand signal. i worked with Border Collies herding when I was younger in Scotland and am absolutely sure that dogs with this degree of activity level really need large open spaces and extreme exercising to be calm and well behaved. if you restrict the current off leash areas more it will greatly reduce the quality of life for many dogs and their people. Why not take a walk over to the beaches at Crissy field and see how well behaved almost all of the dogs are? if the United Nations ran this well there would be peace in the world. Or maybe we should just put politicians on leashes and see what that does for their mood?

Please don't harm dogs and those among us who are not able to run with their dogs on a leash because of physical disabilities and encroaching senility.

The Tai family, Ernie, Donna, Trent, Blythe, Emma, Griffith, and Flit the dog

**Correspondence:** Dear NPS,

Before he passed away earlier this year, my husband and I used to take our beloved white lab, Bucko, to Muir Beach almost every weekend. Bucko visited Muir Beach frequently his entire life, and I am certain that in last years of his life the salt, sea and other dogs were vital his health and happiness. Some of our best memories with Bucko are at Muir Beach, and we treasure our photos of that beautiful time we had with him.

We still go to Muir Beach, and although now it's just the two of us, we find comfort in visiting Bucko's favorite beach with all the beautiful dogs playing freely in the sand and swimming in the Pacific.

Muir Beach is such historical, love-filled gem filled with families and their well behaved dogs enjoying nature and each other side-by-side. It would be a shame to deprive Marin residents of the beach that is not only special us and our dogs, but to so many people around the bay area.

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative. Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park. Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Sincerely,  
Dylan & Rachel Carney

**Correspondence:** The National Park Service needs to adopt stronger, more effective dog management policies in the Golden Gate National Recreation Area.

We need more trails and areas within the San Francisco part of the GGNRA that are off limits to dogs. Off-leash areas should be marked off with fencing or natural borders such as bushes. Park officials need to enforce the dog rules more vigorously.

The GGNRA's proposed plan is an important step toward balanced, sustainable use of the park. It will protect wildlife and meet the needs of the many people who want to enjoy the park's natural beauty without constant interaction with dogs. At the same time, it will still provide over 21 miles of trails and beaches for dogs and their owners.

I urge you to implement the proposed plan, with the addition of fencing for off-leash areas.

**Correspondence:** Lydia Floyd  
20th January, 2014

Dear Sir,

I am an 84 year old military widow and I have lived close to the Presidio since 1969. I no longer drive but I have for years walked my dogs on Crissy Field.

After the Army left, an anti-dog policy developed, despite the fact that the Haas Foundation had stipulated x acres for off leash dogs. This has been totally ignored.

Crissy has become not a neighborhood park for the enjoyment of the people who live here but an arena for events, cyclists descend in the Tour de France mode, marachous as far as the eye can see, making it difficult to cross Marina Blvd. In other words Crissy has become a Mecca, this is all acceptable except when it comes down to dogs!

I belong to the Cgirsy Dog Group we do everything to keep the beach clean. We provide the pooper bags, but unfortunately are all too often people who do not live here have little regard for our neighborhood.

On the other hand we no longer can walk safely in the Presidio due to the coyotes who are multiplying rapidly in great numbers. People living by the Presidio wall live in fear for their pets are afraid to return home late at night.

Coyotes are wild animals don't belong in a city. A few have even been sighted on Scott Street and in this general area.

I no longer feel it is safe to leave my deck door open if I am not at home.

---

I have not noticed any protest about this situation or any comments from the GGNRA as to remedy this growing problem.

Only dogs are a constant subject of complaint. On a regular basis we are forced to fight for every inch of the beach which is shrinking as I write.

I doubt very much that what is happening is what the Haas family intended when they created the Foundation.

Yours Sincerely

Lydia Floyd

Dear Superintendent:

Living in Novato, I enjoy going to GGNRA land and thoroughly enjoy off-leash dog walking. A lot of support that public lands have received over many years has come from off-leash dog walkers.

The Preferred Alternative is too restrictive.

Fences are not answer. That's not being in the open. It's a totally different experience.

Another poor idea is the Monitoring-Based Management Strategy. The GGNRA should not be allowed to change the leash status in particular areas because it decides that there is not enough compliance.

I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I remember the days when we all automatically considered that rangers are our friends, and public lands are public lands, GGNRA belongs to us, we're all in it together, and we all automatically supported more GGNRA land, and more funding for our public land. Please don't turn the tide! We're all in this together, so let's not create restrictive and overbearing rules and regulations that turn it into an us/them outlook.

We respect your concern for our land. We respect it and are concerned for it too. And, please don't automatically assume that you know better than the people who use our public lands and pay for them with our tax dollars. We are all the owners of the GGNRA lands. Let's keep our lands available for the wonderful resources we share and support.

Sincerely,

Sharon Searles

**Correspondence:** Dear Superintendent Dean,

As someone who walks regularly with my dog in the GGNRA, I'm writing to express my strong opposition to the preferred alternative described in the GGNRA's new draft dog management plan. It is way too restrictive and will prevent me from recreating with my dog for my own health and my dog's health the way I have on GGNRA properties for many years.

The new plan was not modified in any significant way to reflect the many substantive concerns and objections of the thousands of people who submitted comments in response to the first plan. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

If you are going to discriminate against any group of tax payers/residents/visitors, please be egalitarian about it...disabled people in motorized vehicles can damage natural areas, as well as people using canes who stick them into plants or environments that can be damaged. And what about young children who energetically run after each other and trample on plants, or big brother pushing little sister in the stroller all over the natural environment while the mother looks on and laughs....or talks/texts on her phone? There seem to be quite a few groups of people who should be constrained in their use of tax funded GGNRA areas, so we would appreciate you discriminating equally and not just picking on dog walkers. We happen to be very respectful of the natural environment and our dog does less damage than cayotes digging up gophers, or raccoons or any other natural creatures that traverse the Earth.

Sincerely,  
Nanci and Andrew Scoular

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I would like to see more off leash trails and beaches for dogs. I am a dog trainer and know that off leash time in nature is very important for the physical and mental health of most dogs and has a very positive effect on their temperament and behavior. It is also so very important for dogs and their humans to be able to share off leash play time in nature.

Subject: Dog Rules at Crissy

Dear Sir,

I am writing to express my support for the current dog policy at Crissy and the bay coast to Fort Point. It seems people of all kinds, with dogs of many breeds all get along with each other. While this seems to be at odds with the policies imposed at other national parks, maybe San Francisco can lead the way. We no longer visit Yosemite or Mt. Diablo state park because of its restrictive dog rules. Please do not make Crissy another dog unfriendly park.

Sincerely,

Carl Caven

RE: SEIS DOG MANAGEMENT PLAN

Dear Superintendent Dean:

With regard the SEIS Dog Management in GGNRA, I would like to offer the following comments.:

I support your preferred alternative in the interest of striking a proper balance for all GGNRA park users, and one that is very protective of wildlife, natural and cultural resources.

Many lands now under the jurisdiction of GGNRA have been assembled from other management entities over time. Some of the acquired properties allowed dogs on those properties. That was then. We have now moved to the present where, in San Francisco alone, there are reportedly more dogs than children with dogs numbering anywhere from 100-200 thousand. The figure is unknown due to widespread lack of adherence to the City regulation that all dogs must be licensed.

There have been hundreds of reports in recent years of damages caused by out of control dogs to park resources, to people and animals, to wildlife, and to other dogs. While dogs are wonderful pets, in my opinion, they have absolutely no place in any national park including, and especially in, GGNRA, where the mission and goals are to protect, unimpaired, all of the historic, natural and cultural assets for the enjoyment of the generations to come.

Today, we all have had at least one personal experience in a conflict resulting from the proliferation of dogs in our national park. I have personally seen dogs on trails clearly marked "No Dogs"; have been attacked by a dog in a wildlife zone whose owner reveled in his dog's behavior; have seen dogs encouraged to chase wildlife and, unfortunately, witnessed too many instances where an unconscious or uncaring owner or walker, did not pick up the dog's waste or even prevent the off-leash dog from going into clearly marked off-limit areas.

These are the reasons I support your preferred alternative in the interest of striking a proper and protective balance for all GGNRA park users and assets, to adhering to the principles of asset management covered in the National Park Service's Mission, Goals and Regulations, and to maintaining a pleasant visitor experience for all users, not just individuals who have elected to own a dog.

With that support in mind, I would also like to offer the following suggestions;

• By making Rodeo Beach completely off leash, you have changed the nature of the beach from general use to a special use zone. I do not support this and recommend you reduce the amount of off leash space to enable a wide variety of park users to continue to use the beach as they have in the past without having to accommodate dogs first.

• Provide fencing for all off leash areas to ensure boundaries are clear for all park users.

• If the fencing essentially makes the entire area a de facto off leash area such as in the case of Rodeo Beach, then rework the off leash zone to accommodate all users.

• Provide funds to enable full and complete enforcement of all regulations including, as needed, trained volunteers, in all affected parks.

• Provide the public with contact information to report and document off leash abuses in all areas of the park. Consider using an adaptation of the newly refined "SF31 1" iPhone/Android app of the City/County of San Francisco to instantly document and photograph abuses witnessed in the park.

• Regularly review compliance with any new off leash boundaries and adapt boundaries as needed to maintain their protectiveness of nearby assets and diverse park users.

Lastly, I do not support the use of the park for money making private enterprises such as Commercial Dog Walkers.

• Commercial dog walking is not an appropriate activity for National Park lands. Use of the GGNRA by the commercial dog walking industry constitutes an exploitation of park lands strictly for private financial gain.

• Commercial dog walking will provide no service or benefit to any park users, will adversely impact park resources and values, and will serve only private enterprise at the expense of the American public.

Sincerely yours,

Jan Blum

**Correspondence:** Today I went to fort Funston and decided to leave because the parking lot was full and there were many cars cruising looking for a place? This happens on any nice day on the weekends and holidays. Why? because it's a wonderful place to run your dog off leash. For 35 years I enjoyed this place.,made friends, and got exercise. I've never seen a dog bite a person or harm any wildlife. Children get bit by dogs in their own homes because owners don't take their dogs for exercise. Dogs need to run ,fetch, exercise and socialize. The only damage I've seen at Funston is due to your bulldozing the sand around. I never see rangers up there. Old people, young people and children have a great time there. If you push us all together in a small area I believe problems will start. It's happy because it's BIG! The only wildlife up there are birds and gophers. Any other animals wind up dead on Skyline Blvd. Today I went to Stern Grove instead and so will many other people when you restrict Fort Funston and Crissy field.
