**Correspondence:** Are you really going to close so many dog friendly beaches and off-leash areas The San Francisco, San Mateo and Marin counties after many many years? Loyal residents that obviously love and use these beaches and parks daily and clean-up after themselves. Please do not change the SF BAY AREA's GGNRA areas into a closed-quarters area for humans only.

**Correspondence:** I am writing with regard to the elimination of virtually all off leash dog walking areas in the draft plan. As a long time resident and dog owner who regularly visits Ocean Beach, Lands End, Fort Funston, and other GGNRA areas I find it outrageous that the plan makes the claims that this will increase usage of these areas. At least half the year these areas are blanketed with fog and literally the only people there are walking their dogs (aside from the occasional fisherman). Eliminating areas where dogs (under voice control) are able to run freely with make those few parks in San Francisco with off leash areas more crowded than they already are. It will negatively impact the health and welfare of dogs and their owners. It will increase pollution by forcing people to drive further to reach an off leash area.

If there are problems with out of control dogs (I have seen very few the past five years, and none that resulted in any injury or damage) then step up enforcement of existing regulations. It's frequently reported that there are more dogs than children in San Francisco. Removing the ability for these animals to get adequate exercise in a city of renters and apartments is absurd when we have huge amounts of open space all around us. I believe the existing regulations allow off leash dogs in less than 1% o GGNRA lands - taking it down to almost zero is not going to improve community relations, safety, or the environment.

---

Drop this nonsense now.

**Correspondence:** I would like to start off by saying that everyone needs to compromise a little: there are some who want no dogs at all; and there are those who want unfettered access for their dogs. If either side gets their way entirely then we will create resentment and conflict in our community. Fortunately the park is big enough to accommodate both desires, as long as we are willing to compromise.

I would like to voice my support for Crissy Field maps 10f and 10c. These two maps achieve two important objectives: 1. It leaves a large area where dogs can run around off leash (ROLA) on both the field AND a long stretch of beach. Dog walkers should be able to enjoy sizable areas of the beach and field as ROLA. 2. It preserves East Beach for a place for young children and families free of dogs. East Beach is the most used area of Crissy field. My own daughter was run over and left with a bloody nose by a dog chasing a ball. Her twin sister had stepped in dog feces that same trip. The fact is that part of the beach is too heavily impacted as it is. Removing the dogs and creating a safe stretch of beach free of dogs is a fair thing to do for families.

Maps 10f and 10c reach a nice compromise between no dogs, dogs on leash, and ROLA on both the beach and the field. Compromise!

For Upper Fort Mason I support map 9c. It's also a great compromise balancing different interest.

Remember, compromise!

**Correspondence:** I have quickly reviewed your draft proposal for a "Dog Management Plan". It seems like a policy designed to cover up your own mismanagement and perhaps incompetence. That's because you already don't enforce the CURRENT plan that you already have. At Ocean Beach, where I live, huge numbers of dogs run off leash in the on leash areas on a daily basis. Today (Friday) is a sunny day at the beach, and I can guarantee you that there will be DOZENS of dogs down there - - and their owners - - who will be violating the CURRENT regulations. The dogs crap all over the beach (and owners don't scoop), chase birds (including threatened species), jump up on people that want nothing to do with them (and have destroyed my headset for my iphone on one occasion when a dog jumped up and clawed my chest), and generally create havoc. Many dog owners are responsible with their pets, but many are not. When I have (courteously) informed some dog owners that their dog was off leash in an on leash area, I have been physically threatened, verbally abused and harassed.

All of this is going on RIGHT NOW, with rules being violated according to the CURRENT PLAN. When I have told your officers as well as supervisors about these violations, they have been ignored. On one occasion, two of your officers were sitting in their vehicle in the parking lot of Ocean Beach, and I informed them that there were five dogs just over the sand dunes that were off leash in an on leash area. They basically ignored me, and when I asked them if they were going to do their job, one of your officers threatened me with being cited for some bogus violation.

In a conversation I had with one of your supervisors, I was told that "it's a resource problem, we don't have the officers to patrol the beach for dog violations." Yet you have tons of officers to harass local people who are having fires at night, enjoying the beach and minding their own business. Your priorities are off, in my view.

In this draft proposal for a new "dog management plan", I don't see any provision for adding "more resources" i.e. more officers to enforce your regulations. Did I miss it somewhere? Without that, how will you be able to enforce a new plan any better than you been able to enforce the current plan?

Frankly, at this point you guys at the GGNRA have very little credibility. It looks to me like you are "shifting the deck chairs," nothing more. You are creating the perception of "action" to mask your current inaction. There is nothing about the CURRENT plan that couldn't be made to work if you guys were to actually prioritize your resources in a better way, and have some officers down there to enforce your current regulations.

Sincerely,  
Steven Hill

**Correspondence:** First, Thank you for maintaining and controlling the beach space in our neighborhood. San Francisco gave the national park service this land with the understanding that the park service would consider the rights of the population. With the knowledge that, in reality, if anyone has the right to use the land for recreation it would be San Franciscans. This is our backyard.

I am writing in reference to the new proposed dog walking mandates for the area from stairwell 21 to Sloat blvd. I understand the need to protect the snowy plover, but I implore your team to consider the

families that live in the area. You must understand that people move to this area of one of the most densely populated cities in the world because of the ability to enjoy the ocean with our whole family, including our pets. How many meetings, functions, rallies do I have to go to before the message is received? Why is it every year the mandates are put on hold because of community disapproval, and then the following year stricter mandates are proposed.

Please understand that the limitations you are looking to impose are on the edge of an immense city, not a rural area. Leaching dogs in this area is understandable and acceptable. A total ban on the family enjoyment of this land is completely unacceptable.

Currently there is a leash requirement, yet there are off leash dogs running free in that area all of the time. If your team isn't able to enforce the leash laws, how do you expect to enforce the ban - especially with hundreds of angry protesters showing up with their dogs just to show you we won't let you take our beach from us. This is San Francisco you are dealing with, and we don't sit back quietly and let our rights be taken away!

Alternative E, where you would set up the off leash area and allow families to enjoy the areas south of Stairwell 21 with their pets on a leash is the only acceptable option here.

I am willing to go to jail for this, are you willing to arrest me for the first time in my life because I want to walk my dog in front of my house? I will never, EVER pay any fine for doing it, and I will continue to do it no matter what mandates you pass. When you take a moment to consider that I am one of hundreds of dog owners that feels this way, perhaps you will do the right thing and allow us the use of our beaches.

As an aside, I've lived in this neighborhood 14 years, and I've never seen a dog catch a Snowy Plover - not even come close.

Regards,

Tom Jagger

<b>Correspondence:</b>	My comment is on dog use plans for Mori Point.				

Your current preferred draft plan (E/F) is unrealistic and potentially impedes use and comfort of visitors with limited mobility who do not have dogs. Here is why:

Mori Point has only one path that is accessible to human pedestrians with limited mobility and has any area defined for human comfort (i.e. benches to sit on). That is Old Mori trail and the pedestrian boardwalk by the ponds and protected habitat. The "limited mobility" group would include the elderly, parents of infants and toddlers transported in strollers, and anyone with a physical disability affecting their ability to walk up hills. It might also include many cyclists, as the hiking trails at Mori point are not suitable for cycling.

Some park users with limited mobility have dogs, but many do not. The only way for a dog walker to bypass Old Mori trail and/or the pedestrian boardwalk (where human users might rest to enjoy the natural scenery) is via Lishumasha trail and Upper Mori trail. The only plan that depicts that trail as being open to leashed dogs is Map 17-A (current usage) - - therefore, of the plans you have presented, that is the only one that will protect the interests of all current users.

If all dog owners were walking docile pets, then perhaps this would not be important. However, some dogs are excitable and may behave in ways that are upsetting or frightening to human users, particularly cyclists or those with small children. Most dog owners will self-police, and choose the higher-ground bypass trails if they know their dogs tend to bark at children or lunge at other dogs or cyclists.

There are other possibilities that could further protect and preserve use for everyone. For example, there is no need for dogs to be allowed on Bootleggers Steps (dogs don't need stairs) - - but you don't have any proposed maps that appear to differentiate between areas designed for the comfort of humans and areas likely to be popular among dog walkers.

<b>Correspondence:</b>	The preferred alternative is far too restrictive. There are already lots of places that don't allow dogs, there should be plenty of places that DO allow dogs as well, so there is a GOOD choices for everyone. More unnecessary laws also require unnecessary enforcement and the potential for more conflict.

<b>Correspondence:</b>	Off leash dogs dominate areas where they're permitted. They disturb and chase runners, hikers and brds alike. Muir beach is no longer used by residents without dogs because of the dogs roaming, sniffing, digging and pooping and their irresponsible owners inconsiderate behavior. Public properties that are allowed to become off leash areas become only suitable for dogs.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	1) The revised plan still does not seem to recognize that dogs are biologically engineered to retrieve balls and sticks, preferably from the water. No dog can retrieve a stick while on a leash, is that so hard to understand? This "plan" is nothing more than a veiled invitation to euthanize our				

---

dogs, and it is therefore despicable.

2) In addition to being utterly morally bankrupt as per 1) above, the plan is also a stunning waste of taxpayer dollars. This plan is designed to be litigated from here to forever, and, before this is all over, many millions of our hard earned cash will have been vaporized. Children still go to bed hungry in this country every day, but apparently it's ok for the Park Service to flush money down the toilet?

**Correspondence Type:** Web Form  
**Correspondence:** I am completely against any of the options for Fort Funston except Alternative A. This is the only area we can run free and not impact any other users. The area is used by a wide cross section of beach goers, hang gliders, model airplane pilots, joggers, dog lovers, sight seeers, equestrians, and history buffs among others.

The proposed leash only or ROLA areas would ruin this unique site and relegate the area to no more than a common "dog park" like we have on 3rd ave in San Mateo. We drive to Fort Funston regularly and stop for lunch and/or diner in the surrounding area on a regular basis due to the unique nature of Fort Funston.

The draconian "alternatives" you have laid out are simply unacceptable, unwarranted, unwanted, and wasteful. Enforceent would be futile and expensive leading to misgivings between the patrons and the Park service. This semi remote area is unique and precious the way it is - don't attempt to ruin it and cause un-necessary stress on the Park service and the population it is supposed to serve.

Thank you very much  
Bart Beeman

<b>Correspondence:</b>	I applaud the continued reasonable restrictions place on dog walking etc in our national parks/recreation areas. As a resident of San Francisco, I see daily problems with dog owners at Ocean Beach allowing their ( illegally) off leash dogs to chase sea birds for hundreds of yards and to urinate all over areas where other users ( children, surfers, etc) then lie on the sand. These area are national parks NOT DOG parks and someone needs to speak for the wildlife and other users aside from dog owners. Thank you

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	As a 32 year resident of the Sunset District of SF and a dog owner who has used Fort Funston as a uniquely wonderful site to walk my dog for years, I must register my extreme disappointment at the proposals put forth by the NPS.				

---

Walking a dog off leash is one of the pinnacles of the dog ownership experience. It allows the dog to "be a dog". It allows the owner to get outdoors and walk in a pleasant environment with the companionship of their pet and to experience the pleasure of seeing their pet happy, free, socializing with other dogs, and getting real, unfettered exercise. Walking a dog on a leash is a mere shadow of the experience of walking a dog off leash and leashed walking should in no way be seen as an equivalent to off leash walking.

Fort Funston evolved into a uniquely wonderful resource for dog owners by historical accident. It is one of the only areas I know of immediately adjacent to a major urban center where a large plot of land in a beautiful setting has allowed near unrestricted off leash dog walking. It is obvious by the heavy usage of

---

the facility that MANY residents see it as an invaluable resource for them and their pets and the primary reason that it has been as popular as it has been is because of the off leash option. It isn't too hyperbolic to refer to Fort Funston as the "Sistine Chapel" of off leash dog walking sites.

It should be clear to the NPS that people are voting with their feet (and paws). They want Fort Funston to remain as is. Restricting off leash areas to small parts of the facility would radically degrade the value of the site as a place to walk a dog. I would stop going there. I imagine many others would as well. And the unfortunate reality is that I won't have anywhere else to take my dog for a similar experience. Lose-lose.

Every option in the proposal other than A (status quo) is unacceptable to me.

I understand that the NPS is uncomfortable dealing with sites that aren't operated according to their standard policies. Fort Funston doesn't fit into the NPS portfolio very well. It is too messy. Too anarchic. Too many exceptions to standard NPS land use policies. I get it. You want to bring order to chaos and provide a better "multi-user" experience. But the fact of the matter is that 95% of the "users" of Fort Funston are people who want to walk their dog off leash and almost all of them want the NPS to allow the status quo to continue.

If the NPS is incapable of accepting Fort Funston as is, with all of its warts and bumps, and is unwilling or unable to leave it alone to thrive as it has for many years, I would suggest that the NPS consider transferring ownership of the land to another public entity that is willing to do so.

To summarize: Option A or give/sell the land to the City/County of SF or some other local public entity that will manage the land in a manner better suited to local needs and less constrained by bureaucratic consistency. Anything else will break my heart and will represent a triumph of mindless bureaucracy over pragmatism.

<b>Correspondence:</b>	Thank you for continuing to work with all the community input you've received. In the face of recent news coverage of the dog owner's groups & spokespeople, I felt compelled to comment. We only use the parks sparingly, but have contributed to their improvements out of love for the area and your overall mission.:				

This hugely successful and beautiful system was not developed for the selfish gain of a few outspoken dog lovers whose idea of a gently & loving "fido" does not extend beyond their close group of friends & fellow dog lovers. Not everyone is excited by the site of an unleashed dog or an over friendly one either. Nobody wants to sit where dogs have had their run of things, and small children are especially at risk to all the vulnerabilities that unrestricted access brings. Anything can happen at any time; not everyone enjoys the uninvited canine experience that these groups are asking for.

Please maintain the controls that you are proposing. They are more than adequate and frankly more than these groups should reasonably expect. National parks are not open/unrestricted dog runs. Thank you again for your continued efforts to serve the whole community and outside visitors.

**Correspondence:** I am a dog owner and I am furious with this recommendation. We have been walking our dogs (who are well behaved and under voice control) for nearly 20 years (2 sets of dogs) on the East end of Crissy Field - off leash. There is a precedent here and that needs to be taken into consideration. Plus, the East End of the beach will disturb wildlife LESS than the middle section. . .it's next to a parking lot, for heaven's sake. This park is not a wilderness, nor should it ever be. It is an urban park and as such needs to serve the needs of all taxpaying residents, not just a few. There are more dogs now in San Francisco than kids, but we don't see you disallowing children on the beach - and they do alot more to disturb wildlife than the dogs do. If you don't change this policy, we will disobey it and take you to court. Dogs have rights, too - they just don't have a vote. We will support the dogs.

Ultimately, you need to have off leash areas all over Crissy Field, Ocean Beach, Fort Funston and Fort Mason. Dogs need their exercise and we all are getting along - it's the federal government that is the problem.

**Correspondence Type:** Web Form

**Correspondence:** I'm wondering how GGNRA will enforce the voice command requirements. Lots of dog owners think that if a dog saunters over after they holler it's name 8 times, they think that counts as voice control. I support leashed dog walking areas, but, many dog owners have their pets on very long leashes that block the trails and still allow the dogs to jump on passing walkers. Perhaps there should be some guidance on how to use the leash or how to control the dog? It should be prohibited to allow a dog to jump on a stranger, whether the dog is on or off a leash. It should be prohibited for a dog to harass wildlife or go off trail, whether it's on or off a leash.

Please do aggressively enforce any rules. I live in an area where no one enforces the dog leash laws, and it just seems over run with unruly dog owners and their well-meaning but untrained pets.

Thanks for pay attention to this important matter.

**Correspondence:** Overall, I support the new preferred alternative. However, the areas open to dogs is unreasonably large. But I think this is better than the way things are now. Also the length of leashes allowed are too long.

I do support the limit of dogs off leash to maximum of 3 dogs (commercial or personal). I hope that dog owners will be better able to control their dogs with a limit on the number. I do believe there should be

heavy fines for exceeding this number for any reason. I also support the requirement of dogs to have the dog owner's name and number on the dog in any off leash area. I feel that this will help avoid conflicts between dogs owners and other park visitors. Currently dog owners feel that can be rude and mean to other visitors and that there will be no consequences as they are relatively anonymous. I hope there will be an easy way for people to report those dog walkers who do not obey the rules.

**Correspondence:** In referenced to unleashed areas in federal parks- Any area that allows dogs to be unleashed should not be patrolled by mounted park police officers. It is an accident waiting to happen to allow horses in parks designated for unleashed dogs AND dogs to be under voice control. For everyones safety,including dogs,people,mounted officers & horses,KEEP horses OUT of the parks where you allow off leashed dogs.  
What happened to David Gizzarelli & his dog ,Charlie is still an injustice. His case was treated differently than other similar cases in the same park. (Crissy Field) Another case,a therapy dog bit a mounted park horse. The owner was given a small fine & requested the dog be kept on a leash in public. Also a owner 'sicked' his dog on a park officer & owner recv'd the same small fine & on leash request.

At first David Gizzarelli was given Charlie back, with a request to keep Charlie leashed. David was told Charlie is a good dog,just scared.Ten days later, that same officer,deemed Charlie vicious & dangerous & impounded Charlie,committing him to death.

Something is suspicious about the way SFACC and the park police handled this case. Charlie & David G were in someones cross hairs. The slander & hatefilled FB page created to trash David G is proof of that.

If the park had clear rules to keep horses out of areas designated for dogs,these accidents would have not happened.

I suggest you place natural boundries, fences hidden by hedges,plants & barriers,to keep dogs in a safe area. Keep park horses out of dog areas. Thank you for your time.

**Correspondence:** I use the GGNRA regularly with my dog. It is one very important to me to be able to continue using it. I primarily use the area in Marin County. I urge you to adopt the following alternatives for dog use in Marin County GGNRA:

Muir Beach - Map 5-A  
Rodeo Beach - Map 6-A  
Marin Headlands - Map 7-A  
Fort Baker - Map 8-A

There are plenty of places in San Francisco that people can enjoy dog free. We need to keep the spaces that are now available for people with dogs. It is well established that having dogs, and being able to exercise them, is vital for the health of many people, particularly older adults, for whom dog walking is one of the most effective and safe forms of exercise.

<b>Correspondence:</b>	RE: Dog park near Farallone Elementary School. PLEASE NO.				

Please see below my letter to the Farallone View Elementary and San Mateo County Sheriff. It will only make the current issues of crime on campus worse. Use the precautionary principle and leave the off-leash dog group to find an area far away from children.

I have lived on the mid-coast 51 of my 54 years. Thank you, Brenda  
Donald.....

dardenellej@cabrillo.k12.ca.us

lgibbons@smcgov.org

Joy Dardenelle  
Principal, Farallone View Elementary School

Dear Joy Dardenelle:

Subject: Dogs on Campus - Signage, Incident Prevention and Stewardship

I am emailing to express concern about the pervasive problem of large hunting and/or fighting breed dogs off leash on Farallone View Campus during off-hours and to request additional, more visible No Dogs on Campus signage.

I currently have a first grader in Annie Blair's class. We visit the playground during off-hours with many other families.

After the recent attack on two young teens originating at FVE I have become less accepting of the lack of citizenship shown to this campus and students by after-hours and weekend adult visitors.

With dog access regulations pending at GGNRA I am concerned that dog walkers may use the campus as an alternative dog park.

I called the sheriff's office to find out what could be done about an adult visitor to the campus bringing large pit bull near the western jungle gym. A male officer whose name I did not jot down indicated this was a district issue, and any future signage for picking up after dogs or leashing dogs may imply consent to bring dogs on campus.

Aside from the liability for the District, feces left on the field, the urine on play equipment, the unpredictable behavior of dogs with unfamiliar kids, the adult with the hunting dog who exercises it by chasing killdeer on the field, the adult owner of a St. Bernard who closes the gate to the K-playground to toss a ball to his dog undisturbed by kids; all this behavior is a terrible example of adults putting their wants above the agreed upon rules of the School District and the County in front of the students. This example is at odds with the citizenship and stewardship education FVE and the parent volunteers have worked so hard and spent so much to provide.

The late great Superintendant of the GGNRA, Brian O'Neil once told me "Brenda, I just can't win with the dog thing". The FVE situation is not a slippery slope but a clear policy. That stated I am requesting the district put up additional NO Dogs on Campus signs visible from the playgrounds and playfields that a parent can point to if necessary. Locking the new gate at the NE corner of the campus might be advisable as well.

If you need funding for the signage, please let me know.

Thank you,

Brenda Donald

**Correspondence:** I am a San Francisco resident and have had many bad experiences with dogs and dog walkers. Dogs are often out of control in San Francisco and on "voice control," dogs run up to me and disturb my park experience. I have witnessed dogs destroying plants and scaring wildlife as well as scaring children. For this reason (safety and environmental concerns), I support decreasing the amount of area that is open to dogs.

Overall, I support alternative F. However, I would like to the additional changes. For the off leash are on crispy field, I would like to see this area marked off with fence. Ideally, one would have a permit to enter this area. With this permit would come either a key to enter, an access code or a badge that would allow entrance.

I strongly support leash only on baker beach as this is an area where I have noticed a number of conflict between dogs and wildlife or dog owners and other park visitors. I believe if this area were enforced as leash only this would significantly decrease the tension between dog walkers and other park visitors.

I also support making lands ends leash only. Because this area is overrun with off leash dogs, I have not been able to go to this area for over 10 years. It will be nice to be able to share this area with on leash dogs and dog walkers.

I am not happy about the area suggested to be off leash at ocean beach. There should not be only off leash area here. If there will be an off leash area then again it would be important to create some type of physical boundary to make it clear which area is on leash, off leash and no dogs allowed.

I have never been to fort funston since it is overrun with dogs so I don't have enough knowledge of the area to comment on this area. I would only say that if there were some areas that became on leash or no dogs, I would be very excited to visit.

I hope that with these changes, dog owners will start to be respectful of others and learn to share our beautiful city and park lands.

<b>Correspondence:</b>	Dear Sir or Madam:				

I am writing to comment on the Supplemental Environmental Impact Statement for Dog Management for the GGNRA and to voice my support for this document. The restrictions that are proposed on dog owners seem reasonable and appropriate to me. As a national park, you have a mandate to protect wildlife and natural resources. While you are placing some restrictions on dog access in areas that have previously not had any, this make sense given the increasing population of California and increasing use of the parks by humans.

I'm sure that this must be a challenging process and appreciate your work on it.

Mark Friedman

**Correspondence:** It is my opinion that the NPS Preferred Alternative F is the best alternative for the Draft Dog Management Plan. I would like to know that the natural, cultural, and wildlife aspects of all of the areas described are protected for future generations. I believe visitors to these areas have the right to be safe from unruly dogs and/or their owners. I know that most dog owners are responsible and considerate of their dogs, as well as other people. I feel that dogs and their owners could benefit greatly from visiting all the areas discussed in this management plan, but there must be clear rules about when and where it is appropriate for dogs to be on- or off-leash. Of greatest concern to me are the needs of the wildlife that depend on beach areas for nesting, feeding, mating, and etc. As long as Alternative F is effective in providing such protection, I would accept it as the best alternative. Thank you for the opportunity to comment on this Dog Management Plan.

**Correspondence:** I have reviewed the various proposals, A through F, with particular attention to the Marin County maps as I live and hike mostly in Marin County. I prefer to see plan A implemented. It has a reasonable balance of voice and leash control areas, respects the wishes of hikers and dog owners. I also note, I often notice dog owners picking up residual trash ( as well as their dogs' waste) on Rodeo Beach. On busy days, the sand is full of cigarette butts, straws, plastics, candy & food wrappers - -thank you all for picking it up.

**Correspondence:** Dear National Park Service,

I commented on the previous Draft Dog Management Plan/ Supplemental Environmental Impact Statement (comment ID: 457979-38106/85) and as requested will focus on the changes made between then and the current draft.

My chief concern with the previous draft was the provision that allowed the NPS to degrade off-leash 'ROLA' areas to on-leash or banning dogs entirely without further public consultation. The latest draft has removed this language, but the new 'Monitoring-Based Management Strategy' doesn't strike me as a material improvement.

The compliance section of this strategy begins with focused enforcement of regulations and education. It should stop there. Instead it goes on to mention buffer zones, time and use restrictions, and SUP restrictions and then goes on to short-term closures that are typically one-year or less.

While the previous draft was worse, the prospect of losing access to the limited off-leash areas that will remain after the implementation of this plan for a year or possibly more isn't a material improvement.

I live in San Francisco and frequently visit the GGNRA with my family, which includes a toddler and well behaved dog. I completely support a reasonable allocation of the available space between visitors who want to bring their dog and visitors who would prefer a dog-free experience.

Given the tone of the plan and the history of the NPS seeking to ban off-leash dog access altogether I cannot help but fear that any provision in the plan to curtail dog access will end up being used.

Please remove the language around further regulating, restricting, permitting and closing the ROLA areas. Focus on enforcement and use your limited resources to handle the minority of irresponsible dog owners rather than closing down access for everyone.

Sincerely,

Robert Ellison

P.S. The sand ladder at fort funston is an unstable and dangerous trail. Introducing leashes would increase the risk of injury to people and dogs alike.

<b>Correspondence:</b>	I like that dogs will be required to be on leash. It is frightening to young children and small adults for dogs to come running up to them as they often do because they are friendly and enthusiastic. Dog parks are where dogs can run freely. And, by the way, I don't have a dog now but I did and I appreciated when other dogs were on a leash.				

Thank you

**Correspondence:** When me and my 5 year old daughter are walking, and an off-leash dog comes running towards us, we have no way to determine what its intentions are.

Will it stop, will it bite . . . or what will it do?

And if it only ends up jumping on my daughter to try to lick her, the dog usually knocks her down in the process.

In any event, we are both fearful in this scenario.

While some dogs are responsive to verbal commands, most seem to be undependable to control their natural inclinations unless on a leash.

What not use a long leash and reel your dog in when approaching other people?

The public then has the option of coming over to pet your dog, or let it jump on them if they so desire.

**Correspondence:** When I first saw the maps, I thought it was pretty good news! All that pink area all over the place seemed even better than it does now in some places. But then I started looking at Alternatives that weren't just Alternative A. NOT good. To prevent dogs from ever even going on most of Ocean Beach, for instance, is a joke and a travesty. Are you kidding? Are we turning into LA County here?

One of the reasons we live in San Francisco is because it's so dog friendly. One of the reasons we live near Ocean Beach is because dogs were allowed leash free when we moved here. Now we deal with the leash law most of the year, and while not as good for our dog, it's tolerable, because we still have Ft. Funston down the road. But if you ban dogs from there and severely restrict them from being allowed at Ocean Beach and GGNRA properties, you're going to see SF city parks overrun by dogs, many more cases of dog aggression, lots of unhappy dogs, and owners who might head to the hills.

There is no reason for dogs to be banned from Ocean Beach. We're not talkin' the French Riviera here, or even Malibu. We're talking a beach that has very little traffic in a very large area. It's foggy and cool the majority of days. It's not going to be a regular bikini magnet until global warming takes hold in a big way, and that's not happening in near future.

If you ban dogs from Ocean Beach and some of these other areas, all you're going to do is decrease traffic significantly, and have far less voter support for GGNRA/National Parks. It could become a real downward spiral for funding and lead to really unfortunate consequences for the parks' futures. Dogs on leash don't chase plovers. Most dogs off leash don't, either. But all the homeless encampments up there don't do a whole lot of good. And those sandmovers aren't helping them.

Thank you,  
Maria

Please

**Correspondence:** Crissy Field should remain as Map 10-A. The only acceptable compromise would be a hybrid of 10-A and 10-C. By this I mean the Central and East Beaches north of the Promenade should be ROLA and so should Crissy Airfield.

I am especially concerned that the East Beach north of the Promenade is OFF-LIMITS or LEASH REQUIRED on all of the maps except 10-A. Is this really your goal? This is a horrible betrayal of generations of native San Franciscans who have played fetch the ball with their dogs on these beaches since before all of us were born (you included).

It is difficult enough for senior citizens to walk the sand, let alone with a leashed dog which thinks it's going to run and chase balls.

If you must reduce dog traffic along the Crissy beaches why don't you extend the concept of ROLA to include all dogs? You could then limit access to dogs that are truly under voice control with a simple obedience test. People who only think their dogs are under voice control because they (sometimes) come when called would have to go elsewhere. People (with their dogs) who cause problems including dog waste would lose their permits.

Incidentally, why is the tidal inlet to the Tidal Marsh off-limits to dogs on all of the maps except 10-A? Is it going to be off-limits to people too?

**Correspondence:** I support the proposed dog plan, especially restricting dogs from being off-leash at East Beach. There are many children and toddlers who use that beach because of the easy access to parking - - a necessity with kids that age - - and running dogs (and what they leave behind) and small children don't mix well. I myself have had to defend my children from dogs running wild in that area, and my children were terrified.

Dogs can run on the airfield - - toddlers and babies cannot.

**Correspondence:** I am responding to the policy to close the Oakwood Valley Trail to dogs under voice control and to require them to be on-leash. I am a steward of Oakwood Valley and I have walked my dog on the trail for the 37 years I have lived in Tam Valley. Problems have been extremely rare with dogs under voice control. There is no habitat damage when owners keep their dogs on the trails. Fragile habitat areas, such as that of the mission blue butterfly, are not on the valley floor where the fire road and trail are. Where habitat restoration and fragile areas do exist, fence and signage should take care of the problem.

The same principles can be applied to voice-control of dogs at Muir Beach. Keeping dogs away from the stream and lagoon is a good idea - keeping them out of the ocean and off the shore is ridiculous.

Teaching people to use our trails and beaches properly is much more effective than prohibition. It's also a less expensive proposition.

Respectfully yours,  
Laurie Cohen

I can't make sense of the documents, so I will respond to a claim that I have heard, in that GGNRA is proposing to ban dogs from all or part of Ocean Beach. I am a rabid environmentalist and liberal, but I absolutely oppose this, and if it becomes law, I will lobby with every ounce of my strength to defund GGNRA and remove its authority on my city parks. You people are out of control.

Dogs present no more threat to the Snowy Plover than do children, adults, and all the pollution that is allowed to be spilled on that beach. I spent two days last week at Ocean Beach, watching kids and joggers run through the crowds of snowy plovers, scattering them and making them fly- - far more than the dogs

do. If the purported aim is to stop harrassing the birds, then you should start with banning children!

Moreover, everyone knows that the beach is black from oil waste dumped at sea by ships before they enter the Bay and have to submit to Bay Area dumping regulations. The pollution threatens the snowy plovers every time they stick their beaks into the sand, far more than dogs chasing them!

Dogs outnumber people in this ridiculously expensive town, and they need space to run and play. I don't have a dog, or kids, but watching the dogs play offleash gives me sheer joy. Why are you non-natives trying to kill our last sources of freedom and joy?

It is time for the national parks to stop threatening our use of the parks, and for environmentalists to stop trying to turn all of the state and nation's parks into no-touch crystal palaces. Stick your beak somewhere else!

<b>Correspondence:</b>	I am concerned about the resource degradation associated with the dogs in Chrissy field, especially on East Beach and Central Beach.				

Why is our national park just a dog walking area, when there are so many other animals, like shorebirds, migrating birds, and other birds, as well as humans, that should benefit from this resource? If you walk on the Central beach during the week, there are often 40 dogs at one time walking the beach with dog walkers. It is a travesty that the dogs are allowed to overrun the beach, destroying the atmosphere for the people there.

My husband dislikes the experience of going to this beach because of all the dogs, and so he will no longer accompany me to the beach.

Thank you for the opportunity to make a comment.

<b>Correspondence:</b>	I for one am tired of all the dog feces on strewn on Ocean Beach. By and large most owners are responsible, but you can't get all the waste, and frankly who wants that job? It's unsightly, and detracts from the enjoyment of walking on a clean beach. Yesterday my wife and I watched as a pit bull chased a flock of small white shorebirds back and forth, harassing the endangered species. The owner did nothing and ignored us when we mentioned that he needs to control his animal. I have never seen any rangers or enforcement ever present in all the years I've lived here and enjoyed the beach. Rangers ignore the stretch near Daly City south if funston. I love dogs but the place is overrun now, and it shows.

**Correspondence:** While people line up to complain about policies that they feel will undermine their dogs' happiness and livability in the city, where is the outrage about policies, or a lack of policies, that make the city livable for women and families? With housing unaffordable for most, childcare unavailable and prohibitively expensive, schools un navigable, and public transit unreliable and inefficient, it seems that arguments about the availability of dogs' open space is perhaps a bit out of place. I do realize and respect that some people choose to have pets over children; however, it seems misguided to create and maintain a city that is more livable for dogs than it is for families. Especially when there are so many irresponsible dog owners who refuse to abide by leash laws in any case. I've limited my walking on Land's End, in Golden Gate park, in Sutro park, and in other places because there are so many people who refuse to leash their dogs, even though there are signs that clearly say dogs must be on leashes. And don't even get me started on how many oblivious dog owners now feel it's OK to bring their dogs into grocery stores and other shops.

**Correspondence:** I listened to the thoughtful discussion of the Dog Management Plan this morning, September 10th, 2013 on the public radio station KQED.

---

As a dog owner and nature lover I am hugely disappointed by the efforts to further limit access to land for me, my dog and my family.

Please, at leave things as they were rather than locking us out.

thanks,

Brett

**Correspondence:** GGNRA Parks are truly special and access to them to be protected for everyone, including dogs. There are so many places in the Bay Area where dog access is restricted or outright banned. Please, please, leave these rare sites, where dogs can run free, for us to continue enjoying.

I frequently walk my dog off-leash at Fort Funston, Ocean Beach, and Crissy Field. It is such a valuable asset to have places where my dog can run free, chase balls, swim in the ocean, and play with other dogs as she is unable to in her day-to-day environment. Dogs simply cannot get the same amount of exercise and movement when restricted to a leash and a weekend trip to these places tires her out more and makes her happier than anything else can. Yes, dog walking is inherently ripe for conflict, both with other dogs and people, but that is exactly why it is absolutely necessary to have wide, unrestricted, off-leash park areas. Overcrowding and restriction of dogs via leash actually increases their territoriality and increases conflict. The GGNRA sites are one of the very few places where space is abundant and the rate of conflict is probably relatively low compared to standard, fenced-in dog parks. As use of the parks goes up, increasing restrictions will only increase conflict and the necessity for park staff to enforce rules and intervene in conflicts.

Furthermore, given by what I've witnessed at these parks, negative environmental impact to birds and the surrounding dunes at Fort Funston is caused just as much by kids sliding down the hills and general park visitors hiking and hanging out off-trail, as is by dogs. I fail to see evidence that dogs are the sole cause of environmental impact. If there are areas that need to be protected, restrict access to everyone, but please, don't take away off-leash walking privileges; leave the beach free for everyone, including dogs, to enjoy.

**Correspondence:** I support the preferred alternative: F.

I hope that the all off leash areas in this alternative will be fenced off.

I would also suggest permits (\$1000 a year per dog) to be able to use the off leash areas. Many dog owners who prefer off leash areas see their dogs as children and \$1000 a year is reasonable as it is a lot

---

less expensive than pre-school or day care or after school activities. They should pay this minimal fee to essentially enjoy exclusive use of those designated off leash areas. Right now they are getting it for free while the rest of don't get to enjoy those areas.

**Correspondence:** I am writing to urge you not to ban dogs on Ocean Beach in San Francisco, on any portion including the portion between Sloat and the Beach Chalet.

I am a homeowner, living in sight and smell of the beach here. Our beach-park is unlike most in the state in that it is not warm, and it is nearly always windy. Consequently, the value in our beach is rarely to lie in the sun and be still. Our beach is a walking beach. Our best and usual enjoyment of this great natural resource is to walk by the water. It's several mile length also make it unusual, in that we can walk for long distances without climbing over mountains or walking on rocks, yet we are on the shoreline. Thousands of residents in the outer-Sunset, such as myself and my husband, bought our property here specifically because of its access to the beach, and it's dog friendly policy. Of the neighbors who I see every day walk by my window in the evenings after work, most who are headed to the beach are with dogs (unless they are carrying surfboards, that is). The Sunset is a much bigger residential neighborhood than the Richmond (which is north of the Beach Chalet). To allow dog walking only north of the Beach Chalet would unfairly burden the Sunset residents, as we would have to drive our dogs in order to walk them on the beach, despite our own homes being right next to the beach.

If you ban dogs on the beach in the Sunset, you will, in short: (1) cause a parking problem by forcing the Sunset residents to park by the beach or in the Richmond neighborhood in order to walk dogs, (2) cause a dog congestion problem due to the large number of dogs who are usually spread out over almost 3 miles of beach being confined to only about 1 mile of beach, and greatly diminish the property values of homes in the Outer Sunset (39th Ave to the Great Highway, Lincoln to Sloat), because the value of our (tiny) houses here is most significantly our location to our great beach.

In closing, please note, we don't even own a dog. We have dogs stay with us frequently when our friends go out of town, and we like dogs, but we are non-dog owners and we feel strongly in favor of needing dog-access here.

Sincerely,  
Cindy Brightly

**Correspondence:** (With apologizes, this is a re-submission, edited for clarity.)

I am writing to urge you not to ban dogs on Ocean Beach in San Francisco, on any portion including the portion between Sloat and the Beach Chalet.

I am a homeowner, living in sight and smell of the beach here. Our beach-park is unlike most in the state in that it is not warm, and it is nearly always windy. Consequently, the value in our beach is rarely to lie in the sun and be still. Our beach is a walking beach. Our best and usual enjoyment of this great natural resource is to walk by the water. Its several-mile length also makes it unusual, in that we can walk for long distances without climbing over mountains or walking on rocks, yet we are on the shoreline. Thousands of residents in the outer-Sunset, such as myself and my husband, bought our property here specifically because of its access to the beach, and its dog friendly policy. Of the neighbors who I see every day walk by my window in the evenings after work, most are heading to the beach with their dogs. The dog walkers outnumber the surfers. Also, the Sunset is a much bigger residential neighborhood than the Richmond (which is north of the Beach Chalet, where dogs will still be allowed). To allow dog walking only north of the Beach Chalet would unfairly burden the Sunset residents, as we would have to drive our dogs in order to walk them on the beach, despite our own homes being right next to the beach.

If you ban dogs on the beach in the Sunset, you will, in short:

- (1) cause a parking problem by forcing the Sunset residents to park by the beach or in the Richmond neighborhood in order to walk dogs,
- (2) cause a dog congestion problem due to the large number of dogs who are usually spread out over almost 3 miles of beach being confined to only about 1 mile of beach, and
- (3) greatly diminish the property values of homes in the Outer Sunset (39th Ave to the Great Highway, Lincoln to Sloat), because the value of our (tiny) houses here is based primarily to our proximity to our great beach.

In closing, please note, we don't even own a dog. We have dogs stay with us frequently when our friends go out of town, and we like dogs, but we are non-dog owners and we feel strongly in favor of needing dog-access here.

Sincerely,

<b>Correspondence:</b>	Dear NPS,				

Thank you for the latest draft maps "F" detailing the areas that should be Leashed-Required. I believe these latest drafts, especially for Baker Beach and Chrissy Field will preserve the land and is more than a generous compromise for many dog owners and dog walkers. I live walking distance to Baker Beach and frequent it often with my young children. There's never a visit where I do not see dog feces on the beach. When I started visiting Chrissy Field Beach East with my young children, there were dog incidents in the last 4 of 5 visits I had at that beach. I am very hesitant to return to chrissy Field Beach again with my

children until leash laws are implemented. Unfortunately, my children love Chrissy Field beach because the waves are often not as rough as Baker Beach.

The statistics on dog incidents are grossly underrepresented. I have not formally reported these incidents - but just in the last 2 months, there were 4 dog related incidents at Chrissy Field Beach East involving my children and strongly, negatively impacting our experience and deterring us from future visits.

The first incident involved a woman whose dog defecated 3 feet from my children building sandcastles and another parent's child. When we asked her to pick up her dog feces and that doggy bags were available in the parking lot - the dog owner just shrugged it off and just covered the feces over with sand. The second incident involved a large dog running over my 4 year old son while chasing a ball thrown from a ball launcher. My son was terrified and traumatized - and the dog owner was too busy chatting with others to notice. The 3rd incident involved a dog walker with at least 6 large dogs that surrounded our picnic blanket and my children. My son was already scared and when I tried to protect them and shoo the dogs away, one of the large dogs growled at me and was about to bite me. The dog walker did not proceed to control his dogs. When I told them his dogs should be leashed as there were too many out of control, he angrily said "this is a dog park" and took no responsibility for his dogs' behaviors. His dogs were running everywhere. The 4th incident on another visit involved a large dog that jumped on my son and scratched his legs while he was on our beach blanket. I tried to console my crying son and hold the dog back. The owner apologized after I asked him to "please control your dog."

Map F of the designated lands for leash dog regulation is fair and safe for all visitors. Even your representative survey research shows that an overwhelming majority would prefer dogs to be leashed; even dog owners. When I frequent beaches in France - they do not allow any dogs whatsoever, because dog feces would be everywhere and they have such a problem enforcing dog laws. I think this latest draft is more than generous to dog owners who want to have their dogs unleashed. I was a former dog owner - and though I love dogs; it just is not safe for young children. A large dog can run 15-40 mph chasing after a ball launcher. That's a large impact on a child, scratching them, running over them and hurting them. My children are now afraid of dogs; and they shouldnt be. The sanitation is also a large issue. When you have many dogs, how in the world will you be able to keep track of all the dog feces if your 6-8 dogs are running in every direction.

These beautiful park and beach lands belong to everyone. And everyone should be allowed to experience these lands in a way that creates a positive experience for everyone. America is unique that we treat dogs like people - because we are wealthy and can afford to do so. But lesser income groups - and in many different countries, dogs are dogs, not people. The majority of park and beach lands should not be reserved specifically for their unwarranted and unregulated use.

Thank you for your thorough report. I read a lot of it. I'm a market researcher myself - so surveys and statistics are my profession. Policy has to be made for the benefits of the majority, not the minority.

---

I enjoy walking with my well-behaved, under voice control dog. The exercise at our own paces and the mental freedom of both of us walking without being tethered to each other gives both of us great joy. I am happy that at least in San Francisco, that activity is allowed somewhat. I find the plan for GGNRA lands in San Mateo County despicable. There is so much open space there and all you can find is one tiny square near the back of Montara for off-leash dogs! This is shameful. There is plenty of space for walkers, horseback riders, bikers, flora and fauna and NO SPACE for off-leash dog hiking. I do not go anywhere where I cannot walk with my off leash dog. I think there are many of us who feel that way. If you are trying to keep people out of the parks that is a good way to do it. I rarely see people walking without an off leash dog. You will have some barren parks. Please reconsider this for San Mateo County.

**Correspondence:** People are attracted to walk their dogs here from all parts of the bay area that in turn help boost the city's economy. They don't need to be punished for doing so and it detracts from the city's appeal. Our supervisor's can't think of enough ways to make the city more appealing so why would the park department try and pull a stunt like this? The entire city should be up-in-arms about such a imposition.

The Crissy Field dog group is a well-meaning and reasonably behaved group, however you may not hear from the "not-so-nice" crowd until restrictions are in place and you are scrambling to find resources to control the backlash. No one is going to take any restrictions lightly.

**Correspondence:** Three years ago I would have been totally against tightening the leash laws but now seeing how there are so many dogs on the trails I am in total agreement with the NPS I think owners are overly confident on their voice control abilities or plain do not care that requiring leashes in some of crowded areas is the way to go. It is a good compromise in Marin that Oakwood Trail will require leashes and Oakwood Fire Road will be voice control/leash option. Thank you NPS for getting it right. And I am a three dog guardian.

**Correspondence:** I visit East Beach at Crissy Field everyday with my dog, Luca. He's a 2 year old Rhodesian Ridgeback, who loves to run on the beach and play with his friends. We've been coming since he was 8 weeks old. It was the perfect place to socialize him and keep him safe before he was fully vaccinated because the majority of the dogs are very well behaved & good natured and the owners/dog walkers are responsible and aware of good dog play and social interactions. The dogs that visit Crissy Field and East Beach are well socialized and behave well around other dogs, adults and children.

He needs a lot of exercise both because of his breed and young age, and East Beach is the perfect place for him. There are always fun dogs to play with and plenty of space to run. I especially love it because of the beautiful setting and proximity to my apartment... we live 5 minutes away. One of my favorite parts of the day is to take Luca to East Beach, and both of us are happier and healthier after our daily visit.

---

I appreciate that the new plans will still provide an off-leash section for dogs, but I worry that it won't be large enough for the amount of dogs that visit the beach at any given time and will cause more problems than it solves. There are many dog walkers and owners both during the week and on the weekends, and a fenced in area wouldn't be sufficient to hold everyone. While we do have off leash areas all over the city, we need them because very few apartments have yards for dogs. And even if we did, dogs who live in cities have a greater need to be socialized so that they interact well with all kinds of people and dogs while they're walking down the street.

I also respect that we need to share the beach with picnicking families and visiting tourists. But during my daily visits over the past two years, I've seen very few bad interactions between those people and dogs. Dog owners and walkers are at East Beach every day, no matter if it's raining, foggy, windy, or on the rare day, sunny. Rarely are there families or tourists on those poorer weather days. We visit and enjoy the beach no matter what the climate.

In terms of keeping the beach clean, I find that dog owners are as responsible as the other visitors. I've found food remains, trash, dirty diapers, and other unmentionable items at the beach left by picnickers and tourists. So I think everyone could be more responsible about cleaning up after themselves and their dogs.

With regard to protecting the wildlife around East Beach, I've seen very few dogs interfere with the birds in the protected areas. But even those interferences could be prevented with better fencing and signage around the protected parts.

Luca and I would be devastated if these plans go through. We really hope that a compromise can be reached that will more fairly consider dog owners and dogs who frequent East Beach.

Thank you!  
Menden

**Correspondence:** To Whom It May Concern;

I am writing in regards to the GGNRA Draft Dog Management Plan, in particular Maps 4-A, 4-B, 4-C, 4-D, 4-E, and 4-F, which all concern the Oakwood Valley / Alta Trail.

I have been walking these trails every day with my golden retriever for the last twelve years. I know the trails well, and the people who walk there, some with dogs, some without.

In twelve years, I have NEVER encountered a problem with a dog, off-leash or on. These include single dogs with owners as well as dog-walking groups, all of whom are well-mannered and respectful of others.

I have encountered numerous problems with cross-country bicyclists; on one occasion being knocked down by a cyclist coming around a blind corner too fast, and on another occasion watching helplessly as a bicycle ran over an aquatic garter snake that my dog had calmly stepped around only moments before. In both cases, I was on a trail that was supposedly off-limits to any sort of bicycles.

Therefore, it surprises me that not one of the possible Dog Plan options is for keeping these trails entirely "Voice Control." It is even more dismal that several of the plans might make certain trails off-limits to dogs altogether. I can only conclude that the writers of these options have not walked these trails as I have, and do not understand that the off-leash dogs on them are not a problem.

In brief, I request that the Alta Trail, the Oakwood Valley Fire Road, and the Oakwood Valley Trail remain "Voice Control" trails, and that the park do more to enforce bicycle rules.

Thanks you very much, Laurel Bunce-Polarek

**Correspondence:** I have been walking my dog, Archer, for 10 years in the San Francisco Bay Area. We take 2-4 walks a day and our walk routine includes Lands End trail, Golden Gate Park, Ocean Beach, Ft. Funston, and other common dog areas.

In the last 10 years, I have not witnessed any of the issues related to dogs offending people listed in your report.

Further, your report lists 2,775 dog-related incidents over a 4 year period. This is about 2 incidents per day across the tens of thousands of visitors per day. How does this compare to other incidents for other

---

reasons? How many people fall down or otherwise hurt themselves each day and require park personnel assistance?

There will be people who complain about everything. Taking individual complaints as a representative sample of all the visitors seems more like the staff is looking for a reason to ban/significantly restrict dogs from the GGNRA.

Also, how many quotes do you have from people who have met Archer? We meet dozens of tourists each week on our Lands End and Ocean Beach walks and Archer serves as an ambassador of San Francisco values of friendliness and acceptance. He's always got a tail wag for a new person and this leads to excellent conversations between me and tourists, thus enhancing the overall GGNRA experience.

The discussion of the value of dog socialization is scant in the report. There are assertions that a ROLA rules would allow dog socialization. This is not correct. A key aspect of dog socialization is exposing puppies (dogs not yet under voice control) to a large group of well socialized and well behaved dogs (dogs that respond to voice control). By denying puppies exposure to large and varied groups of well behaved dogs (this happens at Ft. Funston, on Crissy Field, and periodically on Ocean Beach, for example on Saturday morning at 10:30 when there is an organized "small dog" walk), the population of dogs that qualify for ROLA will be reduced and the puppy owners will seek other places to socialize their dogs, and the ultimate result would be a radical reduction of the number of dogs in the GGNRA.

The report and response to comments seems very skewed towards a policy of deprecating dogs in the GGNRA. As a dog owner, I think this is a terrible policy. As a San Francisco resident and parent of elementary school students, I think this is sad as dogs, big and small, are a part of the San Francisco landscape just as "purse dogs" are associated with Paris. Excluding/deprecating dogs from the GGNRA will not serve any valuable social goals, but will remove some of the unique character from the GGNRA and homogenize the GGNRA experience... making it more like Disneyland or Mall of America, than a unique piece of America.

<b>Correspondence:</b>					

I read that..."The purpose of GGNRA is to offer national park experiences to a large and diverse urban population while preserving and interpreting its outstanding natural, historic, scenic, and recreational values."

Effective enforcement of the GGNRA's proposed changes will dramatically reduce utilization of the resources by the urban population.

San Francisco has 340K households and between 110K and 160K dogs. So one-third to one-half of the households have a dog. Many more than have a child. And if members of those households take the trouble to visit one of the locations GGNRA administers, they would prefer to bring their dog. Dogs need exercise every day. The locations regulated by GGNRA represent the primary destinations for recreation in the city. People who have a dog and a normally busy life probably only get one chance a day to experience these locations, often coinciding with the time in the day when they would logically walk their dog. So if they are truly deterred by rangers preventing them from walking their dogs, or restricted to tiny

areas, or to lease only access on paved paths, then they will simply walk their dogs somewhere else and not come to GGNRA lands. There will be more pressure on local parks much less well suited to the purpose.

You are proposing to exclude a significant portion of the urban population you purport to serve from using the resources that make San Francisco an attractive place to live.

Retain large voice-control areas in several of the parks. Most prominently, I recommend keeping Fort Funston the way it is. No one goes there except to walk their dogs. The de facto designation of that space as dog heaven functions as an effective way to handle the demand for a place to let a dog and their owner get what both need.

<b>Correspondence:</b>	Want to encourage GGNRA to limit canine access. Dogs don't belong in national parks, even when said parks are in urban areas. I support the areas currently proposed for off-leash and on-leash use. Please don't let the shouting deter you. Keep up the good work of preserving un-built land for hikers, with a little for bikers and bow-wow people, our local version of off-road motorized minorities whose choice of recreational options can so efficiently ruin the park experience for the vast majority of users.

<b>Correspondence:</b>	I support the preferred alternative. I strongly believe that to protect our native species, we need to have only very limited areas where dogs can be off leash. I have witnessed dogs harassing wildlife in GGNRA areas while owners either futilely call after them, or sometimes encourage them, to chase birds and other animals.				

There are more off leash dog parks in San Francisco than several other major cities combined. There are many options for people who want to have their dogs off leash, but there are not many options for the endangered species which we must protect and preserve for future generations.

**Correspondence:** I am commenting on the dog management plan for Rancho Corral de Tierra, which is in the neighborhood where I live. I strongly support Alternative F and I am thrilled to see that it is NPS's preferred alternative in this park. It allows dog walking on leash but also provides area where hikers can enjoy the property without fear of running into aggressive dogs. Well done!

I very strongly oppose Alternative C. Frankly, I am shocked to see that an "off-leash" dog park is being proposed for the area between Tamarind and Le Conte streets. As noted in the plan, this area is right across the street from an elementary school!!! It would be quite dangerous for small school children to encounter off-leash dogs just across the street from their play ground! As voice control is ineffective for most dogs, there would be a high risk of injury to children. In addition, there are homes along Tamarind Street that would now have an "off-leash" dog park, literally in their front yard!! Again, this seems untenable in terms of potential dog attacks to the people who live on this street. (I live on this street!). Also, it seems highly likely that off-leash dogs would easily run into and damage the yards of these homes and the grounds of the Farallone View Elementary School. Is the NPS going to be responsible for the property damage that will inevitably occur to these homeowners' yards? I support an area in Rancho for off-leash dogs, but certainly NOT across the street from an elementary school and residential homes.

**Correspondence:** The proposed changes to open areas for local dogs to run, socialize and play is TERRIBLE! The GGNRA was given the land at ocean beach many years ago with the intent to keep it as a use area for the inhabitants of this great city. Restricting the area to dogs is in no way allowing us residents to enjoy the beach. I live across from ocean beach and take my dog to walk and run daily. I pay taxes. I am a SF firefighter, so have pledged myself to protecting the life and property of residents of San Francisco. With the proposed changes you are telling me I can not walk my dog in my neighborhood after a long 24 hour shift at work. This open space at the edge of a major city is not comparable to a remote park in the mountains....it must be kept open to the residents of SF to enjoy and use....and that includes our dogs. Last I checked there were more dogs then children in this city! Do not allow these changes to take place.

Thank You. Heather Buren

**Correspondence:** I strongly support the preferred alternative. We desperately need to decrease the areas for off leash dog walking for a number of reasons. Firstly, we must preserve our national parks. Off leash dogs create damage to the area and ruin our parks for everyone else.

Certain dog owners are irrational and need to start taking personal responsibility for their dogs instead of expecting that the rest of the world should provide the ideal and off leash experience for their dog.

Many other dog owners do get it and understand the importance of the changes to dog walking in the GGNRA. Many other dog walkers also support the preferred alternative. I see this as a fair compromise and again fully support the new preferred alternative.

Thanks for helping to ensure that many generations to come can enjoy the wonders of the GGNRA.

**Correspondence:** We would prefer a complete ban. However, barring that, the preferred park solution (21F) would be our second choice. We feel that the organized off leash dog groups have enjoyed a louder voice due to their organized numbers, drowning out individual comments like ours. Our personal safety has been put at risk by off leash dogs on more than a few occasions and the owners quickly flee, leaving us no way to put on record such incidents. This leaves the off leash support groups the freedom to claim that there are few, if any, such incidents. We are seniors and as we age, feel less able to fend off, and thus fear these aggressive dogs and their belligerent owners.

**Correspondence:** A review of the proposed plan seems vet anti-dog, blaming canines for everything from soil erosion and bringing in invasive non native species of plants to criminal activity within the GGNRA. This is not correct. I read no evaluation of the damage mountain bike riders do to paths and surrounding areas when they ride off trail. Try walking some on those trails in winter when bike tire ruts

make them almost impassible due to the mud pits they create.

Your own crime statistics show that crimes or offenses committed by dog owners are not the major problem within GGNRA, yet dogs seem to be the main target of Ranger scrutiny. I walk Mori Point trails daily and vandalism to signs and paths is a big problem. So is the consumption of alcohol and the broken bottles that are left by the drinkers.

As for invasive plants, I believe birds and other wildlife are far more likely to be the source of these problems, feeding on plants from surrounding residential gardens.

As for dogs chasing birds and wildlife, I see more children chasing birds on the beach, or poking bugs and snakes with sticks, than dogs chasing wildlife, yet there would never be a plan to ban or restrain children within the GGNRA.

The preferred plan for Mori Point is very unfair to dog owners. Taking away the trails that go to the top of the Point reduces the area available to walk and prevents people walking their dogs from hiking through the GGNRA area to Rockaway Beach area. I walk Bootlegger's Steps daily with my dog and the cardio benefit for both of us is important. I believe Plan A is the best for Mori Point, leaving all areas open to dogs on leash. Plan A is also the most cost efficient and your stated projected cost for the preferred plan should disqualify that plan in an age of budget cuts and sequestration.

**Correspondence:** The county should start a program where dogs can pass a special test for voice control, socialization, and manners. For a fee, which would go to the parks, these owners could then get a special license and tag which would allow the dogs to be off leash. Revenue could be generated for the park.

Regarding the maps, I prefer Rancho Coral Plan A, Pedro Point Plan E, Sweeney Ridge Plan A, Milagra Ridge Plan E.

Please don't limit dogs any further

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Dear GGNRA,				

Thank you very much for your continued openness to receiving public comments regarding the Draft Dog Management Plan/Supplemental Environmental Impact Statement. I am writing to you in my dual capacities as both a dog guardian and as a resident of the Pedro Point neighborhood in Pacifica whose property is adjacent to the Pedro Point Headlands open space.

I currently walk our dog in the Pedro Point Headlands an average of three to four times per week for 20 to 45 minutes per walk, accessing the Headlands on foot. I therefore strongly support proposed Alternative E for the Pedro Point Headlands. If any other alternative is adopted, I would have to get in my car and drive our dog to another open space area or park in which to walk our dog.

My wife and I also occasionally take our dog to Milagra Ridge and to Sweeney Ridge. We have benefitted greatly from the current on-leash policies at those sites and I therefore support proposed Option A, the status quo, for those two sites. The other proposed alternatives impose restrictions that, given the size and temperament of our dog, would render those locations unsuitable for walking our dog. We would instead have to take her for walks elsewhere, most likely at Pacifica State Beach or Montara State Beach.

Our dog is a 55 LB mixed breed rescue from the shelter who does not get along well with other dogs or people. We have found that we need multiple trail options in order to be able to move our dog to an alternative trail when another dog approaches on the main trail we are using. We have watched other dog walkers with troubled dogs perform this same maneuver, most especially at Milagra Ridge, which, with its expansive vistas and clearly visible trails, supplies an ideal environment for watchful and responsible dog guardians to ensure that their dogs do not get close enough to other dogs or humans to start a fracas. I cannot impress upon you more urgently the need for open space areas with multiple, interconnected trails that permit on-leash dog walking. The number of troubled dogs we have observed being walked in such areas is considerable. These dogs can be walked safely and in ways that do not disrupt the environment, as long as there are multiple, connected trails available, as is the case currently at Milagra Ridge and in the Pedro Point Headlands. My wife has observed that the vast majority of dog walkers at Milagra Ridge have been very careful to keep their dogs on the trails and off the clearly marked protected habitat zones.

I therefore urge you to retain Alternative A for Sweeney and Milagra Ridges and urge you with equally

high enthusiasm to adopt Alternative E for the Pedro Point Headlands.

Thank you again for your consideration of our comments.

Sincerely,

Tor Neilands

<b>Correspondence:</b>	I do not own a dog, but I do believe in freedom and individual responsibility.				

Therefore I support rules that do not restrict off-leash dogs, but rather hold \*individual dog owners\* accountable for damage or harm caused by their dogs as a result of owner negligence.

There should be no general ban on dogs, off-leash or otherwise, from any significant portion of the Golden Gate National Recreation Area. As the name implies, this is primarily a \*recreation area\*, not a wilderness area. It is in proximity to a large city. It is not realistic to try to maintain this area in some sort of pristine state of nature.

Putting certain small, limited areas off-bounds should be limited to the protection of specific endangered individual plants, or replanting/reforesting/dune restoration type projects of limited duration. Such sensitive environmental areas should have friendly signage designating them as such, along with aesthetically pleasing fencing or other barriers physically marking them off limits for dogs.

GGNRA rules should also provide penalties for overzealous enforcement by park rangers or other government employees who may be tempted to engage in petty power trips when dealing with members of the public. These penalties should be \*heavier\* than any imposed on dog owners for violations of the rules, since government employees are entrusted by the public with special authorities and responsibilities and therefore must be held to higher standards.

When someone files a complaint regarding a particular employee, there should be an investigation into the behavior described in the complaint, and the person who filed the complaint should be informed as to how that investigation was conducted, what penalties were imposed or corrective actions taken if any, and how to further appeal the issue if desired.

Too many individuals in positions of authority think that wearing a uniform or having a shiny badge gives them carte blanche to order people around, take on an arrogant attitude, or refuse to answer legitimate questions. Public servants should act like public \*servants\*, and if they are unable to do their jobs with an appropriately humble and service-oriented attitude, then they should be sent to remedial sensitivity training or removed from their positions.

Complaint procedures should also be clear, simple, and transparent to media and members of the public. Complaint forms should be available on-site, and should also be public. No one should have to rely on

simply taking the word of a government employee when asking questions such as what opinions have been voiced by members of the public with regard to a specific policy <redacted> they should be given free access to view, copy, listen to, etc., the original documents, emails, voicemail messages, etc.

I hereby authorize and request this letter including my contact information to be made available to members of the press and members of the public. In general, government operations, including communications with government agencies and officials, should be subject to transparency and sunshine.

Sincerely,

Starchild  
Outreach Director, Libertarian Party of San Francisco

**Correspondence:** I support the suggested more restrictive dog rules in park areas in San Francisco. Many areas, for example Crissy Field, are currently dominated by free-roaming dogs, some of which cannot be voice controlled. As someone who is scared of dogs, I find myself avoiding these areas and feel limited in my access to open space. In addition to the problem of off-leash dogs, I am also concerned about the remnants of dog feces, even after owners picking them up. It is impossible to completely clean up after a dog, particularly urine, which leaves off-leash grassland unusable for people (although some people don't seem to mind). The plan seems to reduce these impacts, as well as impacts on wildlife. One remaining concern will be the enforcement of the new rules. Even now with many more off-leash areas available, many dog owners ignore on-leash rules where they exist and I have never observed any enforcement. The plan should include policies and measures to ensure enforcement in restricted areas.

**Correspondence:** I am writing to urge you to do everything you can to stop the Golden Gate National Recreation Area from implementing its new dog management plan. This plan will cut where people can walk off- and on-leash by 90% compared with where people can walk with dogs now. It is going to create a huge impact on the Bay Area, which we simply cant afford.

I had hoped that this new plan would be significantly different from the original GGNRA dog management plan, because thousands of people-the overwhelming majority-submitted substantive comments in opposition to the plan. But the GGNRA did not make significant changes. They ignored what people want, and are moving forward with an extremely unpopular plan no matter what we say.

The GGNRA was created in 1972 for the maintenance of needed recreational open space, and to expand to the maximum extent possible the outdoor recreational opportunities available to the region. That's why

it's designated as a National Recreation Area, not a National Park. With the new dog management plan, the GGNRA is renegeing on its promises to preserve and protect recreational access to the GGNRA.

There is no credible reason why people with dogs are not allowed to have adequate and reasonable space to walk their dogs in the vast 80,000 acres that comprise the GGNRA. Please take action to stop the GGNRA from imposing this radical plan on the San Francisco Bay Area.

Thank you,

Bill Cole

<b>Correspondence:</b>	I am in favor of the proposed new dog management plan.				

If I had my way, Dogs would be prohibited in the entire GGNRA, just like all other National Parks.

The Dog people constantly mention a one percent area they have access to, that is the same one percent that all other user groups use too. The rest of the GGNRA is mostly not accessible.

The dog people and dog groups have failed miserably to self police themselves, and know the GGNRA needs to do it for them, just like any other rule or law that was implemented for the common good of society.

I want to see enforcement of the existing rules/law and enforcement of the New Dog management plan. The Dog owners are irrational and threaten people when called out for there Dogs bad behavior, They let there dogs pee, poop, bite, kill wildlife, dig up native vegetation, steal food from pick nicks, damage personal property, etc.

So much unpicked up poop that some areas are health hazards.

**Correspondence:** Ocean Beach is a CITY Park, not an environmental protection zone.

City residents need places for recreation, so to, do their dogs. Many of us have taken on the responsibility of owning, and often rescuing dogs knowing that we have access to open spaces at Ocean Beach and Ft. Funsten for these dogs to run and exercise both on and off leash. Simply removing this access with a stroke of a pen, through your over bearing plan is both unfair to those of us who have taken on the responsibility of these animals, but also unfair to the animals too.

I fail to understand and comprehend any valid justification for your plan which is severely restrictive to dogs and to their owners. There simply is no good reason other than an overall strategy of the Park Service to implement programs which effectively eliminate the enjoyment of parks by the masses, and restrict parks to the use of the environmental elite.

This program is a massive waste of money, with little or no benefit to your main constituents, HUMAN BEINGS.

Please stop this madness.

Dump the plan, focus on removing the graffiti from the sea walls.

Tom Lloyd-Butler

First I want to oppose any changes to the rules for dogs in the GGNRA, so my choice is description A of the proposed dog management plan. leave everything else the same.

The only thing I would entertain, is the addition of a fee based permit system to off set the costs of Park Maintenance at the different parks that allow dogs to walk off leash.

I would now like to talk about Ft. Funston and Our Experience:

Fort Funston over the years has become a dog walkers paradise. With this in mind if there was not a place like Ft Funston where dogs are under voice control can burn off energy and be a Dog. There is no other area with acres of open land close to San Francisco -San Mateo borders.

Fort Funston has been a dog park, a park for hang gliders and horses and other visitors, This experience for dogs has evolved over the years and these dogs cannot be brought to large parks like San Bruno Mt, or Muir Woods , Angel Island. This is because the experience at these other parks has been defined to leave dogs restricted, to the point, there will be a class with no place to let there dogs run free. The bottom line dogs also need Open Space and deserve a place like Ft Funston since the population density has taken away open space with building growth.

It is a proven fact that dogs that either not given this freedom to run free in an open space become unruly and tear things up in there home out of frustration and eventually owners cannot deal with them and they end up in the Animal Shelters

These Shelters end up killing 90% o the Pets, dogs and cats because they cannot be placed, to new homes. We rescued our dog 2 1/2 years ago.

Our dog Goldie waits every evening for her time at Ft Funston and she has become a more peaceful and serene dog through the daily socialization, she gets by interacting with other dogs, along with the Daily Bonus of an hour or more of fresh air and a brisk walk that my Family Doctor encourages me to do because of my heart condition,

If we had not taken Goldie in when we did, her plight as a Stafford Shire Terrier/American Pit bull at 7 years old estimated by our vet was in question. She would have become another dog being put down because of having no home. and it was then we found the perfect place for Goldie and me to get our daily exercise at Fort Funston.

Thousands of others have their own stories, weather it be from a professional Dog Walker or a private citizens who's love of a park with open space for dogs to run free under voice command.

Their was also concerns over one specie of plant and a cliff dwelling bird in Ft. Funston first the dogs don't go on the cliffs and the park service needs to identify and locate these plants and put a fence to stop dogs from going to the cliffs edge.

In closing I noticed graphs in section G in the New Dog Management Plan and for Fort Funston in 2011 there was a total of 139 incidents where a Park Ranger responded and out of that, there was only 25 percent or 35 dog incidents in the whole year at Fort Funston. This is a really low number of incidents considering there are thousands of dogs that visit this park every day. This is only because most dog walkers police themselves and their Dog.

My last thought is that the GGNRA could issue fee based permits for dogs who visit Ft Funston and other parks that allow dogs.

Thank you, for your attention to this matter that effects so many dogs and their families along with all dog walkers.

Thomas Roop

**Correspondence:** The 2013 dog management plan is terrible. Please don't implement it! You basically ignored public comment on the 2011 version. Shame on you. That's how government works - IN EGYPT. This is America and our government is supposed to listen to the people. And here in San Francisco, many people want more off leash dog areas, not less. To summarize, here are the changes you should make:

- MORE off leash dog play areas, because after all there are MORE dogs now than ever and we need a lot more space for them.

- BETTER dog play areas, because as you mention there are conflicts with birds and people so we need better signage, more trash bins for the poop, more bags and bag exchange areas, and a roped-in areas would be nice too (to 'rope out' people who do not want to be bothered by dogs). You definitely want to keep your horses away too - they shouldn't be allowed anywhere near the dog areas! Dogs were hear first of course....

- PROTECT the environment and those poor defenseless endangered birds, by banning the Blue Angels, the Americas Cup, massive construction on Doyle Drive, low flying coast guard helicopters, and all new construction in this 'park' area. Once you have done all of that, the birds will be much better off and you won't have to blame the dogs for all the world's problems.

- HAND OVER the GGNRA to local officials (the board of supervisors, mayor, rec and park) who

---

actually listen to and care about local people. I think it's time for Washington bureaucrats to just leave. You've strayed far from your mandate which was ordained by congress, to promote recreation, not conservation or whatever it is you think you mandate should be. This isn't Yosemite.

- start saving up for the litigation phase of this plan. You will no doubt get sued, class action style, for a variety of reasons by a variety of groups. It's going to be a very long and expensive process for us all. Remember that many dog owners are lawyers who have lots of time to work on pro bono "pet projects" like this.

**Correspondence:** Please don't let a vocal special interest group determine the future of this lovely and sensitive national treasure. I don't enjoy visiting this park's open space very much - - and don't do so - - as I feel like I am going to a dog park, not a 'people' park. From dealing with dog feces and urine all over the field (ugh - who would want to sit down there?) to being approached by off-leash animals or almost sliced in half by folks' so-called long 'leashes,' neither I nor my children come here any more.

Sadly, asking folks to keep their dog on a leash, even when told by frequent signage that it is to protect wildlife or the watershed appears to have NO impact, whether it is here, at Ocean Beach, in Golden Gate Park, or at any of the Marin Municipal Watershed areas. So I'd like to see one or two areas that are clearly 'dog parks,' since clearly we won't be able to NOT provide that, and have most of the rest of the areas be DOG-free and people/children-friendly. This park is a treasure not just for SF area residents, but also for our human visitors and animal denizens.

I'd also like to see ALOT more ticketing and enforcement of dog-related violations at ALL of our parks.

**Correspondence:** I wish there were more restrictions for dogs, but please at least implement this. It infuriates me how dog owners, even if it's only a few, are irresponsible and continue to allow their dogs to run all over without having any control. Every time I go to crissy field, there is at least one dog who's owner has decided that it's cute to allow his dog to run and splash and then run over our blanket. This is a dense part of the city and shouldn't be controlled by a few vocal dog owners.

**Correspondence:** I support the National Park Service in restricting several new spots in Golden Gate Park to dog use. Our precious common parks are not home to just wealthy dog walkers, but to quiet citizens who do not wish to be bothered by annoying and potentially dangerous dogs (or their owners); not to mention the many other living organisms that make up that ecosystem and without which no one would want to visit GGP in the first place. Domesticated invasive animals pose a threat to the natural atmosphere, and the flora and fauna that have been manicured and have naturally sprung up out of Golden Gate Park since its inception. It is a common area, that should be reserved for many activities, but not all activities everywhere. Such indiscriminate use would foul the park and degrade its experience for users, let alone the land. I urge the National Park Service to go ahead with restricting dogs from being off-leash in designated areas, and to disallow dogs altogether in ecologically sensitive territories.

Thank you,

Hale

**Correspondence:** First, I have to children who have lived in the city since they were born. I have at least 20 times had run ins with dog owners who think their little dog that is yapping/snarling at my kids, and is off leach is just precious. If my toddler would just calm down all would be alright. Luckily, I have not hit any of them, but it has been close. If my kid gets bit, someone will get sued.

I also run in the Presidio, and am constantly tangling with dogs. Off leash they are a menace, and on leash they obstruct the trails.

Given these perspective, and wanting to be able to use a national park as it is intended (not as an open bathroom for people's domestic animals):

(1) I object to all maps in 9 series except 9A and 9B, these are the only open free range spaces for children to play in the area, covering them with dog shit, is not a good idea. The areas, if opened to off leash dogs will become unusable by others.

(2) I find it hard to believe that the park service would even consider allowing free ranging dogs off lease on the Promenade and bike path in map 10A do you want to get sued? Have you considered the liability? Free ranging dogs will be attracted like flies to shit to the bikers and runners on both. Both will become unsafe for anyone other than dogs. These are major paths, that Dogs would be allowed on them, or near then is beyond crazy. Someone will get killed, there will be a major lawsuit, and the park service will pay dearly if dogs are let anywhere near either of these heavily used paths.

(3) similarly, there is no way with 10C-F that the dogs will not invade the promenade and bike path. They will be unusable for people who are not dog fanatics. If there is one area that dogs should not be allowed at all, its the maps in the ten series.

(4) map 12A and 12E are crazy. Is the goal to cover the beach with dog shit? No way dogs stay off the beach.

(5) I run regularly on 13A, letting this area be off leash will allow kids, hikers, and runner to be injured. Want to be sued? The trail is very narrow, and all but 13D allow dogs on much used, heavily impacted and fragile trails used by runners. And that is too much. Dogs should actually be kept off the entire lands end trail other than from the parking lot to the stairs, where the trail is wider.

(6) 15A, C-F are you really going to let dogs crap all over Ocean beach?

(7) 16A, E,F you are being very very bad stewards of the land to let dogs destroy Fort Funston.

I have no idea why this much dog use is being proposed, but not my objection to even as much use as these maps suggest in highly impacted areas.

<b>Correspondence:</b>	I believe the with the exception of option A, the options for Fort Funston are far too restrictive. Fort Funston is a very unique place, which, because of its relative isolation from other parts of the city, allows dog owners a destination which is both safe for dogs, and less traveled by other park				

---

users.

It's an incredibly unique place which, as a dog owner I appreciate (as there is no place like it anywhere else in the Bay Area) and that I have heard from non-dog owners that they appreciate for the same reason. I strongly support option A, which preserves the gem that is Fort Funston.

**Correspondence:** After having an off-leash dog, chasing a frisbee, crash into me on the Crissy field beach, knocking me down and leaving my leg bloodied (and permanently scarred four years later) from impact with its teeth, with never even an apology from the frisbee-throwing owner, I strongly believe that off-leash dogs need to be severely limited on, or better yet completely barred from, the beaches in the GGNRA.

Separately, after having a roving, out of control, off-leash dog urinate on a sand castle my young child was building at the Crissy Field beach while she was building it, I also feel it very important to what are often obviously poorly trained or untrained dogs on-leash on the beach and well away from children; that is, if dogs are allowed at all.

The appropriate solution is to have permitted off-leash dog runs somewhere in the GGNRA well separated from other visitors and especially from small children.

I am withholding my name and address (Union Street near Broderick in San Francisco) due to privacy concerns. Thanks very much.

---

**Correspondence:** If you read the public comments to the 2011 plan, you will see that the majority of comments were opposed to any further restrictions on dogs. The new draft under consideration now in 2013 must incorporate that earlier public input. That's how the process works, you know, democracy, due process, responsive government. The lip service of just taking comments is not sufficient; you have to actually incorporate the comments into the subsequent revision. Otherwise, the dog-owning lawyers will come forward armed with the claim that public input was not appropriately considered. They are already taking notes, planning strategy, and drafting letters. The entire 2013 draft and any subsequent rules will be thrown out in court, and we will have to start this entire process over all together. Actually, I think that already played out once before about 5 years ago when the park rangers started suddenly giving out tickets for off-leash dogs without taking any public comment. A federal judge threw out the tickets and the entire new policy due to lack of public input, and that is what started the whole process of creating these draft plans. It seems that we are going to repeat that all over again.

So the best option today is to retract the 2013 draft, then review the comments to the 2011 plan, and come up with a new and better draft which fully incorporates public comments. Based on the 2011 public comments, it seems that dogs will need to have the same if not more space allowed off-leash, and other people who do not want to be around dogs deserve to have signs to tell them where those areas already exist which ban dogs (the vast majority of the GGNRA and the Bay Area).

In the mean time, the park service can take other actions to improve safety and environmental conservation in the GGNRA, like enforcing existing rules against fireworks and bon fires, litter, people in the protected sand dunes, removing rangers' motorcycles and horses which are incompatible with the environment, and slowing down the commercialization with all the new museums, cafes, restaurants, and roads being build now in the GGNRA - how to the little birds feel about all that?

Really at this point I should point out that the Park Service has failed to effectively administer a public comment process. It's not that complicated. But it has taken them many years to get this far, only to get thrown back to square one. Probably they are just doing all of this to keep busy and protect their budget, in this era of federal budget cuts. Either way, it is just a great example of government waste.

<b>Correspondence:</b>	Dear friends at the NPS, Many years ago, I used to go regularly to Rodeo Beach. It was my favorite place of relaxation and recreation.				

At a certain point the number of dogs present increased dramatically. On one occasion, I arrived in the area near the cliffs on the southern end of the main section of beach, to find that the entire beach smelled like dog feces, something I had never noticed prior to this. I lay down where I usually did to relax in the sun. About 10 minutes later a large brown dog came running at high speed directly into me. One of the dogs sharp nails went into my leg, causing a wound which bled for minutes. The owner of the dog was a young man nearby who saw what happened and was very apologetic. In retrospect it made no difference whether the owner was nice or not - the over enthusiasm of a dog of this sort cannot be controlled. The bad smell and injury caused me to leave. I went to the ranger's office and spoke with a ranger, complaining that dogs were ruining the beach and that I had been injured. He said large numbers of dog owners brought their dogs there because it was one of the few beaches where they were allowed to do so,

and he suggested I send a comment to the managers.

I have never returned to Rodeo Beach, and as long as dogs are allowed there with their attendant dangers and stink, I will not return. I have recommended to others that they not go there - the place smells polluted with feces and the dogs are dangerous. THE ELEPHANT IN THE ROOM in these negotiations is that EVERYBODY, including dog owners, knows there is no way to have an arrangement of any type which is safe and sanitary for human visitors, as long as dogs and humans are allowed to be in the same place at the same time.

**Correspondence:** Studies have shown that owning a dog can add 5-7 years to human lifespan. In our sedentary and obese society dog ownership must be strongly encouraged and enabled. Faithful companions to humans dogs have animal rights. Confining them to short walks on tight leashes, in crowded dog parks or crammed backyards is un-natural, stressful, dangerous and cruel.

Every beach, every trail, every campground are increasingly shut down to us and our best friends. A dad with two children trying to walk their black lab outside a no-dogs campground in the middle of a forest were forced onto a busy country road and almost run over by trucks passing them by. Wanting to take a walk in the sunset with my dog who had just had been diagnosed with a tumor just yesterday I drove pass miles after miles of empty beaches where not a soul could be found but the two of us were not allowed.

We demand open space to exist and run. Wilderness and nature belong to all humans and animals. Dog-fearing park officials are not suitable for their job and should be removed.

**Correspondence:** I did not bother reading the document. I have been following the issue in the newspapers for years.

Since I have lived in the 94121 zip code since 1987, I have spent enough time at all the high traffic areas along the waterfronts where the public with dogs and the public without dogs interact.

I have seen good dog owners and bad dog owners. By and large what I have seen is that most owners do not keep their dogs on a leash. When no one else is around that is not a big deal. However, dog owners do not keep vigilant and when the numbers of people start to go up, they do not call their dog to them and leash them up.

I have seen senior citizens who have had dogs intimidate them and jump on them. It is not the dogs fault. What I have to ask, and you should as well, if what happens if a elderly citizen is knocked down by a dog? A broken hip on an 75 year old can be a death sentence to that individual. Is a shortened life an

acceptable exchange for allowing dog owners to continue with their behavior of not keeping a dog on a fixed leash?

I would like to see more areas allowed for people to walk their dogs, not doubt more areas than what you have proposed. But, only with a very strong enforcement to go along with it. I suspect that the shrinking areas you are proposing has to do with the real world costs and problems of enforcement.

In the end, if you do not have the person power to properly enforce whatever you do, then shrink the areas to match the person power you have to vigorously enforce your rules.

JD.

<b>Correspondence Type:</b>	Web Form				

**Correspondence:** I am writing to express strong support for your proposed rules, particularly those within the city of San Francisco. These public spaces are for the enjoyment and use by all citizens and not just those who own dogs. I want to iterate that I strongly believe that off leash areas need to be provided at all locations and as a resident of SF, I notice that large areas will be dedicated at Fort Funston, Ocean Beach, and Crissy Field for this use. Most of my dog owning friends seem to think that this is a very reasonable compromise and good balance of these shared resources.

A few key facts to keep in mind as there seems to be a lot of misinformation coming from certain dog lobbies.

1. Off leash dogs would NOT be banned from Crissy Field, Ocean Beach, or Fort Funston. In all locations, large areas are being dedicated to off leash dogs. The rules address the current situation where off leash dogs are everywhere and enforcement has been hampered by a court injunction.
2. There is a claim that only 1% o the current GGNRA is available for off leash dog walking. Please keep in mind that the vast majority of the area in the GGNRA is off trail in the Marin Headlands and not available to anyone. In almost 100% o the areas available to people in the SF portion of the GGNRA, there are currently off leash dogs.
3. If you read through the comments of the previous EIR, you will notice a lot of different viewpoints. Though the dog lobby often yells the loudest, there are others that want to use and enjoy these resources as well. They have made very logical and compelling arguments for some sort of balance between different users.
4. People who support these rules are not dog haters. I often enjoy the company and energy of dogs but not all the time. Dedicating locations for off leash, on leash, and dog free zones gives us the opportunity to experience the park on our terms and not the terms of just one group of people. Again, I reiterate, you need to provide off leash areas for these folks.

I hope that this long sordid story is coming to a close, the 1979 Pet Policy was conceived at a very different time where the intensity of use by these spaces was a lot less. Times changes and we all now

share these spaces. In particular, the East Beach of Crissy Field is social gathering space for many of us. If there were one or two dogs on the beach like 1979, then maybe these rules wouldn't be necessary but there are often 40-50 dogs on that beach making the use of that beach by non-dog owners marginal at best. Even when there are no dogs, the smell of urine is simply overwhelming. Asking dog owners to walk 2 minutes from the parking lot to the proposed off leash area to the west of the lagoon outlet hardly seems onerous to me.

Thank you for all your hard work on this very sensitive subject.

<b>Correspondence:</b>	I am writing in favor of stronger rules requiring that dogs be kept on leash and stricter enforcement of those rules.				

The draft rules have a concept called "voice control" which, in my experience, is a wishful fantasy.

At Ocean Beach, I have been bitten by a dog running off leash. It approached me aggressively while I was jogging. I asked the owner, who was nearby, to get it under control, at which point it leapt at me and bit my arm. I still have a scar. The owner expressed zero regret and took zero responsibility.

At Muir Beach, when I go there seeking peace and quiet, on a blanket off to one side, a steady parade of off-leash dogs bounds up, with no respect for the boundary of a blanket, sticking its snout in my face and/or food. Owners sometimes say "no" and the dogs sometimes respond, but there's another dog behaving like this every 5-10 minutes on weekends, making peaceful enjoyment of the beach impossible.

An owner calling a dog off after the fact does not constitute voice control, any more than saying "sorry" after a car accident constitutes safe driving. Voice control, as presently practiced by too many dog owners in SF, is a sham.

I want dogs to be required to be kept on leash throughout the GGNRA.

Thank you.

know most comments will favor less rules and less

**Correspondence:** My wife and I have been walking and hiking in the GGNRA for many years and now walk fearfully each time. It's such a shame and really outrageous that we have to be on constant guard for uncontrolled dogs and their defiant and disrespectful owners. We now make sure to have heavy sticks to protect ourselves (in one case we had to protect ourselves from both the dog AND the owner!). We support the plan insofar as it designates specific areas for dogs (fenced areas would be best), a strong leash rule, that dogs must be "under control" and that there actually will be enforcement.

Thank you.

<b>Correspondence:</b>	To Whom it May Concern,				

I am writing to urge you maintain the off-leash dog status in areas of GGNRA where dogs are currently allowed. I understand and agree that balance is important in these public areas- for people and for wildlife. I am myself a wildlife biologist and believe that the protection of sensitive habitat and wildlife should be primary. That said, there should be areas where people and their pets can recreate as well. Most public places are off limits to dogs, so these few places in the GGNRA are super special to us.

I am sure you understand that for many people, their pets are their family, and for us, that is certainly the case. Enjoying our beautiful Bay Area, outdoors with our dog, is our favorite thing to do. Crissy Field, and Baker Beach are our absolute favorite places to be, and we make the trip over the bridge early in the morning to enjoy the beauty and freedom that being there provides. It is truly our favorite thing about living here.

Please consider us when you make a decision on the future of GGNRA dog regulations.

Sincerely,  
Sarah Flaherty

**Correspondence:** PLEASE DO NOT RESTRICT OFF LEASH AREAS!!!!!! i walk my dog everyday and have rarely seen any issues with off leash dogs. In fact, the only issues I have seen are with leashed dogs trying to go after each other! When dogs are under voice control, they all get along! Having people walk or run with their dogs off leash in the parks is a great thing for San Francisco. It keeps our parks safe because there are people there and less crime. One of the best things about San Francisco is being able to have dogs and owners enjoying the same parks and having dogs off leash does not infringe on anyones right to enjoy the parks!!!

**Correspondence:** I am totally AGAINST restricting off leash areas in the Parks!!! The tradition in San Francisco having off leash dogs is a long and valued tradition! For years owners and dogs have been enjoying the parks together- please dont change that!! I do not even have a dog but I enjoy being in the parks with many owners and seeing the dogs have fun. If you restrict off leash, those dog owners will just walk on the street and the parks will be deserted!

**Correspondence:** I've been through the San Francisco proposals and generally I'm most interested in restricting off leash dog walking at Chrissy Field and Ocean Beach. Whatever the current regulations are, dogs are off leash ALL over these areas currently, even where they are clear signs. Many owners either do not control their dogs to keep them away from people who don't want dogs jumping on them, dumping sand on them or grabbing their beach toys or are simply not paying attention. I'm in favor of very clear areas that are limited in such a way that people wanting to enjoy the coast without unleashed dogs have an easier time of it.

The other place I would wish to visit more is Fort Funston but unless off leash walking is limited there, I will avoid it. Its overrun by professional walkers caring for groups of dogs. The natural landscape is a mess and its intimating to go for my family.

---

**Correspondence:** For the sake of birds, other wildlife, vegetation, and all those people who enjoy the beauty of the park in as natural a condition as possible, my family strongly supports the most dog-restrictive of the proposed alternatives. The San Francisco dog epidemic has already greatly diminished the presence of the shorebirds we have loved over the decades at Baker Beach, along Crissy Field, and in other parts of the park. Please strengthen protections within the park from the unnatural and entirely unwelcome disturbances of dogs, particularly those off-leash.

**Correspondence:** Walking through the trees by Lobos Creek you will find an enormous amount of used dog waste bags left behind, on the ground in the runoff areas for Lobos Creek. 80% of the water that the residents of the Presidio Park comes from Lobos Creek. Many of these residents have small children. Even if these people's rent didn't fund a lot of the maintenance on the park, it is unethical and violates clean water laws to contaminate drinking water with dog feces. Many dog walkers - walking several dogs at a time - walk through the park and near Lobos Creek runoff areas. All medications and flea control that these animals receive are leaching into the water when people let the dogs use the area as a personal toilet. If people can't be respectful and behave ethically, then they should receive a fine and injunction, barring them from the park. Due to the difficulty of having park rangers be in all places at all times, the ultimate solution is to ban dogs from the park all together.

**Correspondence:** I fully support the measures outlined in this document.

The heavy use of the GGNRA means that even a small proportion of dog walkers behaving irresponsibly (or simply having unavoidable accidents) will result in harm to the environment - no matter how responsible the majority of dog walkers are (or claim to be).

We all come at this issue as animal lovers. However, domestic animals have the advantages of readily available food and shelter that wild animals do not. If we respect all animals, we need to protect wild animals even if it is inconvenient to dog owners. This is NOT a civil liberties issue - no-one has a right to destroy ecosystems whether using a bulldozer or walking their dog. This is NOT an issue that can be resolved by increased personal responsibility. A system based on personal responsibility has resulted in the state of affairs we see currently - endangered animals harassed, fragile ecosystems endangered. Personal responsibility is not enough to protect our wild resources.

There is simply no way we can protect wild animals and ecosystems without requiring dog owners to be fully responsible for their animals. I support the GGNRA plan, and I FULLY SUPPORT INCREASED ENFORCEMENT OF ON-LEASH LAWS. I wish this plan went further and I wish you success in implementing it.

**Correspondence:** I do not support the plan to allow dogs off leash in any public area. The idea of dogs being under "voice control" is an illusion. Dogs cannot always be controlled by their owners at all times. Any dog that is seemingly under control can easily get out of control when another dog is near. Small children are also at risk from unleashed dogs. Even birds and squirrels tend to excite the unleashed dog.

I know that most pet owners believe that their dog is different, and that their dog would never get out of control. But reasonable people know that is not true. Voice control is not an acceptable alternative to leashing dogs in public areas. In my opinion, it is simply too dangerous to let dogs run free where young children are playing.

**Correspondence:** Dear NPS,

I am very saddened to hear that you are considering restricting dog access within the Golden Gate National Recreation Area. I am a responsible dog owner that enjoys spending my weekends enjoying the beautiful parks and beaches that are dog-friendly in Marin County. I moved here from Seattle, WA, with one of the big factors in my decision being how dog-friendly the San Francisco Area would be for me and my Golden Retriever.

I respectfully request that you consider NOT restricting the current dog usage policies in the Bay Area/GGNRA. It will have a serious impact on my life of me and my dog.

Thank you,  
Elizabeth Loy  
Mill Valley, CA

**Correspondence:** As a former dog owner (RIP Rafter) I support the creation of a dedicated off-leash dog area at Crissy Field. The current situation with dogs at Crissy Field East Beach is a little too much of a good thing. Only the proverbial one in a hundred dogs/dog-owners is a problem, but we see more than a

---

hundred dogs every day.

The incidents have been rare, but over the years I've experienced off-leash dogs acting aggressively towards me, seen one snarl and chase a jogger into a bench, and observed another dog owner have to fend off unwanted attention towards his leashed dog. Creating some separation is a sensible, well thought out move. It will also be nice to enjoy the beach without having to scan for poo-bombs.

PS. I have not observed any problems with the professional dog walkers. In my experience the problems are caused by individual owners or non-alpha (from the dog's point of view) family members who do not understand that taking one's dog off-leash can make the dog more assertive, thinking that it is now in an alpha role.

<b>Correspondence:</b>	As an individual, & per our tenant membership @Marina Cove Apts, we agree, accept & support the Dog Management Plan, with huge thanks for Everyone's efforts.				

Our 240-unit apt bldg. no longer allows pets, but we do different things to get our "pet fix." Several of us dog sit; a few do volunteer work at SPCA & shelters, etc.

However, we have close proximity to Moscone Park, Ft. Mason, Marina Green, Crissy Field & beyond, so we observe a lot. We know that dog owners don't do what they claim. Your Plan is very inclusive, but we haven't commented before:

1. Dog owners don't ways pick up their dogs' poop, or they do if someone is watching, then toss the baggie somewhere. Is there any way to gauge how many gallons of urine is left in our parks? And am I sitting in it?
2. Dogs considered to be on "voice command" are not. They are not "obedience trained;" the dog responds if it feels like it.
3. Dog owners think that everyone likes/loves their pets sniffing, yapping, barking, drooling, etc, etc, but we don't. It's true that we shouldn't approach dogs with the assumption that they like strangers, but owners shouldn't encourage this. I've been almost knocked over & I've seen little kids on their backs before owner did anything.
4. Dog owners have an organized lobby & clubs, which the rest of us do not. We resent dog owners feeling of entitlement. When I was growing up, you kept your dog in your fenced yard. I commiserate with owners not having backyards in San Francisco, but it doesn't mean that all other open space is their domain.
5. As neighbors of the Crissy Field area & lagoon, we have watched what has been accomplished. As a "city girl," I've seen birds & fauna I've never seen before!
6. It was astounding to me to hear that there are more dogs than children in SF. Pets are wonderful companions & all that. But when there are SO many, they must be contained, especially aggressive breeds.

I appreciate your consideration of our comments & we hope that you don't back down on any of your provisions. Flora, fauna & people need to come before dogs!

Very, very truly yours, Jan Bulechek for 1550 Bay St. Tenant's Assn.

**Correspondence:** This plan allows for too many areas for dogs. Dogs should be banned from the GGNRA. Dogs are destructive. There are too many dogs in the city which is a place that is not suitable for dogs. In part dogs are kept in tiny apartments because dog owners use the open space in the GGNRA as an excuse to this. They rationalize to themselves that walking their dog for 1 hour a day and the rest of the time keeping the dog in a tiny apartment is fair and healthy for their dog. It is not. Dogs are not meant to be in cities especially big dogs. By allowing dogs in the GGNRA you are supporting cruelty to animals.

**Correspondence:** The GGNRA is unique in that it is an urban park, therefore it is subject to somewhat different use and demands than most other federally governed parks. This reality is reinforced by the fact that this land was donated by the city and people of San Francisco. I advocate for the more permissive dog rules that allow space for our city's dogs to run freely in most areas. I agree that all dogs should be under voice control. San Francisco is a dog friendly city and our parks system needs to reflect that reality. I am legally disabled and have a service dog that only gets limited exercise due to my disability. In the interest of humanity and kindness to animals, I need places, like Fort Funston, where I can let my dog run a bit. If the GGNRA insists on rigidly adhering to the regulations of rural federal parks, I suggest that these lands be re-gifted back to the city to which they and belong.

**Correspondence:** I am strongly in favor of immediately and permanently banning all dogs. The reasons are exactly the same as banning all baby strollers so you can just substitute "dog" wherever you see "baby stroller" below:

- sometimes baby strollers charge at me and I'm not sure if they are going to attack. Oh sure their owners SAY theirs is a "friendly" stroller and it won't hurt me, but I don't know that! I'm scared!

- there are "conflicts" between visitors and baby strollers.

- the environment is degraded by baby strollers. Anything to protect the environment! Shame on the baby strollers. They're so selfish.

- studies have shown that baby strollers scare away birds. I don't have any of those studies. You just have to trust me. You can't argue with the studies if you don't have the studies yourself. And since nobody has the studies, case closed.

- once a police horse got spooked by a baby stroller. It must have been the stroller's fault, since horses are never skittish or unpredictable.

- there are enough other places where baby strollers are allowed. Do they have to be everywhere?

- my child is fearful of baby strollers. He's a woos but that's not the point.

- once I was injured by a baby stroller and now I am scared of ALL of them. I'm a woos too so the federal government should protect me. I pay taxes so the government should do anything for me me me! It's all about me, the tax payer.

- people with baby strollers think they own the place. Um, actually they do since it's taxpayer funded. But my point is they just ACT funny and I don't like that. The federal government should change the way they act, by banning baby strollers.

- while many people with baby strollers are responsible, some are not and they leave dirty diapers all over the place. It's so gross. Feces. See, isn't that gross? Feces. Ooo. Feces feces feces. If we just use the word "feces" enough it will get people to act. Feces.

- there are more visitors and baby strollers every year. So obviously the only way to manage this is to ban baby strollers. There's not other possible solution so let's not even consider alternatives.

- this is a recreation area (the "R" in GGNRA). But since it is managed by the National Park Service let's just gradually start to call it a "park" when nobody is paying attention. Then it makes perfect sense to ban baby strollers. Because after all, that's the only way to run a park. Do you see how logic and word games work?

- we've had plenty of draft policies and public comment on this issue. It doesn't matter what the comments are, just that there were comments of some sort. See? We followed a process! Now it's ok to implement the original plan without any changes.

- people have been using baby strollers in the GGNRA since 1979 or even earlier than that. There were votes and all that complicated democracy stuff back then. But nowadays the federal government just decides what is right. It's much faster. They do it in China and Egypt that way and things move much faster there. It's more efficient.

Please understand that I am not against all baby strollers, and certainly I'm not against babies. Most of them are very responsible. It's only the bad strollers which we must restrict, and since we don't know who is bad, or who might BECOME bad, let's just ban them all to be safe. At the very least we should limit the places and times when they are allowed, and they should all be leashed to their owners so that don't get away and scare someone. They should be licensed and pay fees. And wear arm bands with symbols that we can see from a distance to be sure they are following the rules. It's only fair.

And just forget about professional baby strollers - there's just no room for commercial activity in the GGNRA. Unless we're talking about cafes, restaurants, museums, office complexes, yacht races, blue angels, road construction, fitness centers, or bowling lanes. Then it's ok.

Actually I have a baby stroller myself. So it's all ok. You see, I'm not an anti-strollite. I only use my stroller on busy city streets where it is safer. It understands. And whenever I use it, it is chained to my wrist and the brakes are on so that nobody will get hurt or scared or offended. We are all better off this way. Especially the stroller.

**Correspondence:** Our family is so disappointed with your plan. We have trusted you with our land and you responded by taking away much of its primary use - for families with dogs. Putting dogs together in enclosed spaces often triggers fighting that one never sees in off leash areas such as fort funston. With so many challenges for families living in the bay area from cost to poor public schools why on earth would you take away one of the attractions of living here. Surely you can protect breeding areas and such by making those off limit. Instead you are proposing that we don't enjoy nature hikes with our dogs a total loss for our family and a reason to consider leaving this city. So disappointing that you so ignored the biggest voice of response. I suppose we can look forward to beig tazored on the trails when we walk there anyway.

**Correspondence:** It occurs to me that this proposal is one-sided.

Currently there are areas designated where dogs may run off-leash, which are encroached upon by persons who are anti-dog.

Out of the thousands of miles of coastal areas available, "visitors" seem to need to use the very few areas where dog-owners can exercise their companions, then complain about it.

Perhaps it would help to put up signage to indicate an area is open to off-leash dogs so folks would at least know what to expect: dogs, running, jumping, playing, wet, and muddy who will shake-off water when they come out of the ocean and you might get splashed with some drops. Not unlike little children who play out on the beach and throw water and sand.

It is shameful to punish average citizens who want to enjoy even a small part of seashore for the benefit of persons who have miles and miles of areas to enjoy.

**Correspondence:** To Whom It May Concern:

I would like to voice my frustration at the proposed new restrictions. I believe the NPS is simply going through the motions of soliciting public comment on dog policy. It is quite apparent that you intend nothing short of radically changing the areas where dogs are allowed off leash.

My personal concern is Ocean Beach, where I've been walking my dog off leash since 1980. People have been letting their dogs run on this beach since the Gold Rush. Let's examine the things you have ignored in trying to implement a more restrictive policy:

- Your own studies indicate an inverse relationship between off-leash dogs and protection of the snowy plover (the lowest populations were when dogs were completely banned, the highest when dogs were completely off leash)
- Initial public comment ran 3 to 1 in favor of leaving the policy alone
- Policing new policies will cost \$2.5 million dollars a year, a sum that seems a bit stupid given the budget issues and the fact that this would seem to run counter to general public wishes.

Your handling of this manner is frankly unsettling. One questions the democratic process if public input, scientific studies and fiscal responsibility are all ignored.

I would suggest that the zoning remain completely unchanged from current standards. None of the options presented seem to take a minimalist approach to new regulation.

But I think that's what you have in mind anyway, public comment be damned.

Sincerely,

John C. Weaver

<b>Correspondence:</b>	I have been to GGNRA many times, and dogs are always a problem. I go to walk and observe nature, but my experience is to try to get owners to get their dogs under control and away				

---

from me, so I can watch other dogs chase wildlife and/or destroy habitat.

- 1) Off-leash dogs are almost never controlled. Even if they are truly under voice control, I have no way to compel an owner to actually control their dogs.
- 2) I fear being knocked over by out-of-control dogs.
- 3) Off-leash dogs defecate "out of sight" of their handlers, and pollute the environment.
- 4) Dogs should not be allowed at all in most areas, such as Marin Headlands and Crissy Field. These should be the same as any National Park. People and nature, not dogs.
- 5) All parks in San Francisco are already de facto off-leash dog parks. If you must have more off-leash areas in SF, they must be fenced in order to be enforceable. Anything else is not effective.

Thank you for your concern.

**Correspondence:** I am an avid walker and naturalist, and believe that for the protection of wildlife, dogs and wildlife should be separated. I would like to see enclosed areas for dogs; otherwise, dogs strictly on leash, and no dogs at all in sensitive areas where there are ground-nesting birds. Personally, I find dogs intrusive in my appreciation of flowers, birds, and insects, so would like to have dog-free areas.

**Correspondence:** I don't believe that the ggnra is responsible for having off leash dog areas. If the city is interested in off leash dogs then they need to provide these areas (not the federal government). Many dog fanatics have argued that the new ggnra dog walking proposed rules would have an impact on the city lands however this was far from true.  
During the government shutdown with park lands being not or less accessible, there were increases in problems in the SF city parks. There were still a lot of dogs but not there really was no appreciable change. I think the government shut down proved that the new ggnra rules (which would provide more dog areas than during the government shut down) would not adversely affect the city lands.

**Correspondence:** I am a dog owner in San Francisco for the last several years (have lived in San Francisco for over 15 years).

I strongly believe that Fort Funston and the Presidio must be kept open for dogs - including significant

---

access to off leash areas. There are many areas along the coast - in Marin, along the peninsula, and in the city - where dog access is restricted. I see no reason why a couple of key areas can't remain open to unleashed dog use.

Fenced in dog runs are not sufficient for the number of dogs in San Francisco and they are not sufficient for providing the exercise that dogs need. The same is true for keeping dogs leashed - that does not provide sufficient exercise for dogs to remain healthy.

This I strongly believe.

Additionally, I think it is sad that such strong limits are placed on dogs across the national park system. I am a strong advocate for the National Park System and a supporter of Wilderness areas as well as other natural resource designations. But sadly because of the strong restrictions on dogs I am unable to consider them as vacation options. We end up spending more time in national forest land or BLM lands where the restrictions are less stringent. I wish there were a more balanced approach to accessibility for dogs - and I feel that The Presidio and Fort Funston are examples where we can achieve that balance - continue to restrict dog access in other areas in Marin, in San Francisco and along the peninsula and balance that with a couple of locations where dogs are less restricted.

<b>Correspondence:</b>	As a dog owner in San Francisco, i'm very concerned about the proposals to restrict so much of the Golden Gate National Recreational Area, prohibiting dogs altogether or dogs off-leash. In addition to the fact that my ability to take my dog to Fort Funston, Ocean Beach and Crissy Field is one of the few reasons i stay in San Francisco and put up with the high-cost of living, saturation and overcrowding, i am particularly concerned with not giving our dogs a space to run, exercise and socialize. In a city where dogs are everywhere, having under-exercised dogs poses a threat to everyone. Though leash walking is great and appropriate, so is giving dogs a chance to run free, play with each other and with their owners.
------------------------	---

Plus, if you want people to enjoy the "recreational" areas you are trying to protect with these restrictions, you will have a significant drop in users if you impose your over-reaching restrictions. I for one will not use any of these parks if i can't take my dog or have to leash her. In fact, before i got my pup, i never went to any of these locations. Getting to know the beautiful coast line in and around SF is one of the biggest gifts my dog has brought to my life. I don't want to live in an area where enjoying these areas is no longer feasible for me because my dog is prevented from joining me or because i have to restrict our mutual enjoyment. I already walk her on leash in plenty of other places, like Golden Gate Park or other parks.

Not having these beautiful places for off-leash play feels punitive and not consistent with encouraging people to enjoy our beautiful coastal areas. I understand preservation is critical, but you haven't struck a balance with your plan. you've prioritized,significantly and unfairly, one type of use of these "recreational areas" over others, leaving the thousands of dogs in this city, and their guardians, without a place to participate in what the city has to offer.

**Correspondence:** Hello,

I recently read about a new plan to limit off-leash exercise for dogs in the Golden Gate National Recreation Area and am very saddened by the news. My husband and I adopted a terrier mix from the SF SPCA last year and we have enjoyed many walks off leash with our dog all over the GGNRA. Our favorite place to take him is Fort Funston. He is a very energetic dog and without his daily walks off leash, he would not get the proper exercise he needs to be a well behaved dog member of society. There are many studies done that show that off-leash exercise is vital to canine health and I am saddened by the proposed plan to limit this kind of exercise. I understand that there needs to be a healthy human to canine to nature balance within the GGNRA, but with closing these areas off, the other areas of San Francisco and Marin counties that do allow off-leash dogs will become very overcrowded and could possibly be a threat to our dog community.

I urge you to listen to the community that uses these parks and please reconsider.

Thank you for your time.

**Correspondence Type:** Web Form  
**Correspondence:** Please discard this plan. This is unreasonable and fails to serve the needs of any constituency.

This is simple.

1) San Francisco is one of the (maybe the) most dog-friendly cities in the country (by individual dog

guardianship).

2) The ENTIRE waterfront, and all dog play areas (notably ALL DOG BEACHES) are controlled by the GGNRA, not the City and County of San Francisco

3) The GGNRA would be closing ALL BEACHES/WATER ACCESS plus ALL LARGE DOG RUN AREAS without any regard to the jurisdiction in which it operates.

The only obvious conclusion is to ensure that ALL GGNRA areas are open to off-leash dog play. Reasonable policies and patrols can be enforced to ensure that people who are not dog-friendly can also share these areas without scaring or threatening the dogs (or their guardians).

In other words, please be reasonable and not reactionary.

Any closure at all of any GGNRA area explicitly denies federal services and access to all dog guardians and therefore to the majority of the constituency that the GGNRA serves.

There is no "other side" of this debate. All GGNRA areas are and will always be open to dogs off-leash, or the GGNRA has failed to serve its mission.

<b>Correspondence:</b>	PLEASE, PLEASE, PLEASE do not further restrict off-leash exercise for our dogs! We take our dogs to Rodeo Beach regularly, and to Crissy Field, Baker Beach and other GGNRA locations intermittently. Our dogs need lots of exercise; one of them is not good in enclosed spaces with other dogs. It is vital to their well-being that they get some time to be out running around. Our dogs are both completely under voice control and well-behaved in open spaces. We always obey all rules to keep them away from wild life and we always clean up after them. There are SO few places in the Bay Area that they can run free. PLEASE don't take the little space they have away from them. Dog owners are citizens, too. Our voices should count.

**Correspondence:** I wholeheartedly oppose this plan which would further restrict dog access in GGNRA parks. Should this new plan be approved, I will join the fight in returning the land of Fort Funston, Ocean Beach and Crissy Field to the city of San Francisco thereby reversing the 1973 vote on Proposition F which originally transferred the land to the GGNRA "to hold only for so long as said real property is reserved and used for recreation and park purposes."

I have only been a dog owner since 2011, but have lived in San Francisco and utilized city and federal parks in the area for the last decade. In the years before I was a dog owner, I rarely if ever saw parks being disrespected in a way that would warrant such aggressive restrictions. Now that I am a dog owner, I take pride in respecting our parks, cleaning up after my pets, ensuring they behave in an acceptable manner. I see most if not all other dog owners and dog walkers doing the same. We love and respect our parks. This proposal seems to be a punishment.

**Correspondence:** San Francisco's off leash areas make my life with my dog possible. She is a typical high energy dog who keeps me active, healthy and happy. However, as a normal San Franciscan with a full and busy work life these off leash areas provide my dog with the necessary exercise to keep her likewise healthy on the days I don't have the ability to take her on full walks.

I would also like the parks department to take into account the sheer numbers. San Francisco is a place where people are forced to forgo having kids in order to afford living in their favorite city. It is because of this that dogs outnumber children. PLEASE don't take away one of our few opportunities to take in the city with our surrogate kids. I know it sounds like the words of a crazy pet lady, but this is the reality of SF.

If the parks decide to make the error of taking away off leash dog access in existing areas I strongly believe they should create a nearby alternative in the presidio. There is plenty of unused and unnatural space in the Presidio that would be perfect for a dog run or penned in play space. This low cost alternative may be much less desirable but could be equally functional.

**Correspondence:** I am overwhelmed by the size and technicality of the SEIS, and the best I can do is to give comments based on what I understand as a lay person, and on my experiences visiting the SF units of GGNRA frequently over the years.

I fully support the park's efforts to control and limit dogs in GGRA. As a birdwatcher and lover of wildlife, I am dismayed at the lack of space and protection the management now gives to birds and wildlife, and to the lack of commitment to preserve these creatures and their habitat for future generations. Chrissy Field is the worst. It is in effect an off-leash dog park. I no longer go there to birdwatch. But Ocean Beach, Sutro Heights and Lands End are also significant critical areas for wild creatures and plants, and dogs should not be in these areas on or off-leash (except in a fenced-in area).

People have a right to enjoy an urban park separate from dogs. SF has many parks, but even when dogs are required to be on-leash or are not allowed, the rules are not enforced and dogs are present off-leash. GGRA should not consider this problem separately. In reality, it offers the only opportunity for people to enjoy parks without dogs in SF.

Enforcement of dog restrictions should be consistent and robust. "Under voice control" doesn't work. I don't speak to dog owners anymore because some of them are rude and aggressive and I am afraid.

Please be bold and protect the defenseless- -the birds, wildlife, and the less vocal people who want to enjoy nature without dogs.

Thank you.

**Correspondence:** Nothing makes my dog happier than running along the water at Ocean Beach, and for a disabled person like myself this is beneficial in more than one way. I cannot walk my dog on a leash because of a back problem I developed this summer. The ability to let him off the leash so he can sprint back and forth between Balboa and Lincoln allows him to get plenty of exercise without hurting my back. I get so much joy out of watching him and other dogs chase tennis balls or run in circles, and he gets good social skills and a chance to stretch his legs. He knows the second we hit the PCH where we are heading and his jowls turn upwards into a huge grin, his tail wags furiously, and he inhales the ocean air, which has been proven to be beneficial to mammals. Every time I take him out there, I meet new and interesting

---

people, most of whom I discuss our love of the beach and dogs with. The more time I spend at OB or Fort Funston, the more i get involved with community services like Surfrider or other beach activities. The idea of restricting him onto a leash while at the beach makes my heart sing as it would take the wind out of his sails and not allow me to bring him there anymore.

Please think of all of the wonderful interactions that the people and dogs of Ocean Beach have daily when considering the leash law. Many dogs are aggressive on leash, dogs that are normally passive and playful. After working in shelters and privately training dogs for years, I can tell you that dogs need a lot of exercise and socializing, and they are not able to do it well while restricted on a leash.

Thank you,  
Sarah Gherini

**Correspondence:** NPS staffers and others: thank you for taking the time to read my comments. I know you guys are doing your best with limited resources, so I will try to be clear and concise. Rationalizations below: I support maintaining Alternative A (no action), as this most closely reflects the 1979 SF Pet Policy, as established as law.

I own a dog walking business in San Francisco. In order to efficiently and safely exercise my clients' dogs, I usually take them to land managed by GGNRA. We see your staff and volunteers every day: the horse-mounted NPS LE (I leash the dogs and usually give a wave); the grounds maintenance folks mowing the airfield at Crissy Field (including the inmate crew you have working there, who, it should be noted, do a GREAT job); the facilities people keeping our heavily used, much loved public land free of trash, etc.; the LE Officers patrolling Old Mason St. and taking care of those infernal "Go-Cars."

Although there are certainly some conflicts, and the occasional missed dog poop, the overwhelming majority of the time one would have no idea that there may be over one thousand dogs running on the beach at Crissy Field on a daily basis. Add to this the growing number of regular dog owners who bring their pets to the beach, and I suspect that the number might double, to over two thousand dogs, per day, at Crissy Field alone. I am not exaggerating.

Some reasons this number is important:

As it is well known, there are many dogs in and near San Francisco. One estimate I have heard is ~175,000 dogs in SF County alone. Further restricting where dog owners and commercial dog walking operations can (legally) take their dogs will promote further conflict in the few remaining off leash areas (your plan calls them ROLAs).

There can be conflicts between dog owners, commercial dog walkers, the dogs, and the general public. This is obvious if not inevitable when public land is in such close proximity to a large urban area. I have been assaulted (by a human) at Crissy Field, for example, and was frustrated that I could not find an NPS LE Officer to report the assault. And, to be honest, when one of the dogs in my care grabbed a picnicker's sandwich, I bought the person a new sandwich. I understand and accept the responsibility of having dogs in a public area, maintain an up to date insurance policy, pick up every dog poop I find, behave as responsibly as I can, and avoid conflict at all costs. But the solution to the potential for conflict is not to remove or further restrict this one user group.

With regard to commercial dog walking operations (and the like), there are over 400 such businesses in San Francisco. Yelp.com currently lists 414. By simple extrapolation, that's a lot of dogs, and a good number of robust businesses that rely on public land, open space, and off leash areas in order to operate. Further restricting use of GGNRA managed lands will have a negative effect on local business. I fear that with further land use restriction and permit bureaucracy I may have to close my own business, because increasing rates unsustainably and limiting my group size to 6 will push me out of business.

It should be noted that most of the GGNRA continues to allow a variety of activities that might qualify as "special exceptions" to the the NPS's common rules and regulations. Bicycle access, hang-glider access, and other activities are but a few examples. It is my firm belief that the DOI and NPS do the public a disservice by isolating user groups from one another, restricting the behavior of some while allowing that of others. GGNRA is in a special place, blending between natural areas and a large urban metropolis, and in order to serve the public good must reflect the public's historical use of the land in question. This includes off-leash dog access. Ironically, in 1983 GGNRA's Superintendent requested a special exemption to allow for continued off-leash dog access to the areas in question; there was never a federal response.

Thus, for these reasons and other unstated, I am compelled to support Alternative A (no action), as this most closely reflects the 1979 Pet Policy, established in court as the law of the land.

Regards,  
Seth Green

<b>Correspondence:</b>	The elimination of major portions of National Park services for off leash dogs, particularly Crissy Field and Fort Funston, severely hampers my ability to keep fit as a senior citizen. Recreation is not about watching my dog run in a small enclosed area. I am 69 years old and walk vigorously at fort funston and crissy field along with my 22 lb schnauzer sally off leash. I can not put her on leash as it throws me off balance. I throw the ball for my dog and she retrieves it. i always pick up dog litter.
------------------------	---

Your new proposal virtually eliminates my ability to recreate and will make me go to local san francisco parks to get my workout. This is unfair to san francisco as we gave the land to you for fort funston and against my health interests as a senior citizen.

I support your attempt to regulate dog walkers and think that 4 and no more than 6 dogs is reasonable. ANd they should not drag their leashes. This is why the park is getting degraded, not by me and the other individual citizens who walk dogs.

Focus on the real problem and allow me to continue to improve my health by using the federal recreation facilities with my dog off leash.

**Correspondence:** We favor maximum restrictions on where dogs are allowed. There should be NO off leash areas. We visit SF and GGNRA, and find the presence of dogs, on- and off-leash and their waste a real drag on the experience. Their effect on wildlife and flora can't be positive.

Also, the ADA is being grossly abused by dog owners who claim their dog is a 'service dog' and get away with avoiding restrictions everyone else follows for the general good. NPS should clamp down on this abuse.

**Correspondence:** I am very disappointed with the proposed plan to greatly restrict dogs within GGNRA. When your last proposal came out, I and many others wrote expressing our concerns about it. Unfortunately it appears that public input was largely ignored. This lengthy proposal seems to be based on a dislike of dogs, rather than facts. Please revise it keeping these considerations in mind:

1. As the name implies, this is a recreation area, not a wilderness.
2. Dog owners make up a significant percentage of the population in this dense urban area, and deserve access to a significant percentage of parkland.
3. It is not possible for most breeds of dog to get enough exercise on leash.
4. People get a lot of emotional and physical benefits to dog ownership and it would be humane to nurture this relationship.
5. Most dog owners take the time to train their dogs and clean up after them; they should not be punished for the behaviors of the minority. Irresponsible dog owners could be ticketed or banned from the GGNRA. This should certainly include owners who allow their dogs to chase or otherwise harass wildlife.
6. Single hikers, especially woman, are safer when they have a dog with them. You are limiting access to the outdoors if you further restrict their ability to walk with a dog.

I urge you to honor prior commitments and historical use of what is now GGNRA managed land and allow off-leash access to at least as many areas as are in current use.

**Correspondence:** I am a long time San Franciscan resident. I examined all of the San Francisco maps. Three considerations should be addressed:

---

1. Protection and preservation of wildlife.
2. The ability to enjoy the resources of the GGNRA without the impact of unleashed dogs (environmental degradation, safety issues, harassment).
3. The desire of dog owners to have an area for unleashed dogs.

The protection and preservation of wildlife must take the highest priority. This is in line with the GGNRA mission: to "preserve and enhance the natural, historic and scenic resources". This is what makes the GGNRA different from a City park.

With careful consideration, some areas may be open to unleashed dogs as long as it does not compromise the GGNRA mission. In addition, any area that is suitable for unleashed dogs must also leave space for those who prefer not to be around unleashed dogs.

The following maps seem to balance out the aforementioned 3 considerations:

Upper Fort Mason - Map D and F

Crissy Field - Map C, D and F (However, if Central Beach or West Bluff Picnic Area is determined to be important for wildlife protection, that would eliminate C and F).

Fort Point - Only trails not in sensitive habitat should be open to leashed dogs.

Baker Beach - Maps D,E or F

Land's End - Map D

Sutro Park - Maps B,C,E or F

Ocean Beach - Maps C or F

Fort Funston - Maps C or D

As it stands now, the requirement to leash dogs in SF City Parks is not enforced. Hopefully, the GGNRA will decide on a plan which is in line with its mission so as to provide a natural space for everyone.

**Correspondence:** In view of the September fatal case of a boy killed by dogs in San Bernadino, I am extremely concerned about the safety of humans attacked by pets. I can understand pet owners love their dogs, and almost all human want safety.

Dog attacks can be considered as assault with a deadly weapon and the owner is ultimately responsible. Pets running around in public places including our National Parks posed a threat to human safety and to the fragile flora and fauna. Their waste invit flies which can spread diseases. Dogs on leash is the least dog owners can do and yet they are left roaming around freely.

36CFR2.15(a)(2) prohibits off leash dogs in National Parks and Lands End including but not limited to trails should not be an exception. In addition, SF Health and Safety Code bans off leash dogs in public. The Code should be strictly enforced.

PLEASE WITHHOLD MY PERSONAL INFO. FROM PUBLIC REVIEW. THANK YOU.

**Correspondence:** Dear Sir or Madam,

I am against this plan. Please reject the proposed Draft Dog Management Plan  
This plan is bad! Do not further restrict off leash dog walking in the GGNRA. There are already so many places that dog owners are restricted to go; this further restriction of dog owners is unfair and will limit the ability of dog owners to enjoy the GGNRA which belongs to all of us. Further restrictions at Fort Funston just seem mean-spirited and intended to punish dog owners, I can see see that part of Chrissy Field east beach could be made as on-leash only, but every other aspect of this plan seems punitive toward dog owners. The restriction of dogs from Muir Beach is completely unacceptable. There are plenty of other wonderful beaches that do not allow dogs access all up & down the CA coast, and losing

dog access to Muir Beach would be a tragic loss of one the few places that dog owners have in Marin to access the beach.

Sincerely,

Michael Willingham

Please reject the current proposal.

**Correspondence:** Thank you for creating a plan to control dogs in GGNRA. I was walking through the Presidio a year and a half ago, with my son who was 4 at the time. A dog, which was about 50 pounds, bounded up to him from 100 feet away. I had to kick the dog away as it was about 3 feet from my son. The woman took offense to me stopping her dog, with the usual 'he's a nice dog' refrain. Some day a small child will not be so lucky, if people aren't taught that they must control their dogs and laws are in place to prevent incidents like this.

**Correspondence:** I have been following the print and television coverage of your policy, I want to lend my support to limit the dogs in the park and at the beaches. Fort Funston and Crissy Field has been off limits to our family for some time. Not everyone loves dogs, in particular, my daughter is deathly afraid. We have only been to Fort Funston once, but were soon surrounded by unleashed dogs and had difficulty even trying to leave. We faired no better at Crissy Field. We had to leave since dogs were barking, peeing and pooping as the kids tried to play. My daughter was so frightened and had to retreat to her chair as dogs ran around her. We haven't been back to the beach since. It is also unsanitary to have kids playing in the sand and water at the same time dogs are peeing and pooping in it. We had the same experience at Ocean Beach and Baker Beach so we don't go to these places. It's unfortunate and limits should be put in place and enforced so everyone can enjoy the parks.

We are hopeful that the situation will change and we can visit these the beaches again peacefully.

---

Thank you for your efforts.

The Anastas Family

**Correspondence:** I would like GGNRA to implement plan 12A for Baker Beach.

I have been walking there for ten years and my neighbors for far longer, some 40 years. Every day I pick up so much trash and so do my other dog owner friends. They took the trash cans away so we clean up first thing in the morning around 7 am. There are no snowy plovers. There are crows, seagulls and sandpipers.

The dog owners all police themselves, and the dogs are under voice control as a rule. We are disturbed that dogs are being singled out as a problem when I see cigarette butts, illegal fires, naked men, piles of beer cans and wine bottles. Humans seem to impose more on the beach than the dogs. It is sand...how can the dogs disturb sand? I even bring extra bags to put on the post at the bottom of the stairs at Baker at the 25th Ave entrance.

Please do not have restrictive dog policies for the GGNRA areas where humans and dogs happily RECREATE.

Our dog walking privileges should be grandfathered in with the NPS laws.

Thank you,  
Deborah Hatch

**Correspondence:** I would like to see plan 12A adopted. I am frequent visitor to Baker Beach. In my experience the dog owners are easily the most responsible visitors to the park. I have seen them picking up trash and keeping the beach neat. I have never seen dogs in the fenced off dune area, or chasing birds on the beach. I do not think restrictive leash laws are necessary to protect wild life or the comfort of others using the beach. There are hundreds of miles of wild coastal land in California. These areas in an urban setting, with a tradition of multiple use, should be open to all who use them responsibly

**Correspondence:** I was in the GGRNA for a walk of about 1.5 miles along Oakwood Valley Trail recently and saw no less than 10 piles, or bags of dog feces along the way back to Tennessee Valley Road. I do not think it is a good idea to allow dogs on trails, but fire roads could be limited to lease only access. I live within a mile of many of the GGRNA trails and find dog feces littering the streets in my neighborhood and on the trails. Irresponsible dog walkers frequently trespass on private and public land without regard to what the dog is doing. If dogs are allowed the same level of access to GGNRA land, it will continue to be a dumping ground where dogs are allowed to damage habitat and harm wildlife. Dog owners aren't taking responsibility to clean up after their animals in my neighborhood, what do expect them to do on park land where there is no enforcement of proposed rules?

**Correspondence:** To Whom It May Concern:

I understand that the dog management plan raises hackles for Bay area residents and canines on both sides of the issue. I've read (most) of the revised report and I have a couple thoughts I'd like to share.

1. I understand that the GGNRA area is separate from the city of San Francisco, Marin County etc. However, when talking about impact on residents you can't isolate the experience to just what happens on GGNRA land. Since I live in San Francisco I'll restrict my comments to just my experience in the city. As a qualifier I have lived here for six months. My dog and I moved from Chicago. The cities of San Francisco and Chicago are quite different in how the neighborhoods are set up. In Chicago there's grass between the sidewalk and the street that is public property. My dog didn't relieve himself on cement or anyone's yard. In San Francisco there's only cement (in most places). Chicago's districts each have gated dog parks and there are sectioned dog beaches where dogs are allowed to run freely. San Francisco only has these areas on GGNRA land. Restricting GGNRA access to dogs on leash only would completely

reduce if not highly eliminate where dog owners can exercise their pets. There's not an easy answer but any GGNRA proposal needs to be partnered with city official input.

2. I have a two year old rescue dog. He's a Jack Russell and Miniature Greyhound mix. He has a lot of energy and his favorite thing (besides chicken) is running. I run an 8 min mile and I've run him up to 10 miles on leash however it doesn't compare to the exercise he gets when he's allowed to run off leash. On leash, I can only go fast enough that he trots. Off leash, he runs like a greyhound complete with the greyhound smile. Eliminating areas where he can exercise properly will negatively affect his health no matter how much I exercise him on leash.

3. My dog has never been aggressive to another animal (human or canine). I believe this is because of how he is trained and because he is well exercised. Reducing the amount of healthy exercise dogs can get in the city will not help any aggression issue. (This is the dog whisperers biggest thing right?)

4. I think it'd be extremely helpful and necessary for you to include with the number of incidents reported how many canine and human visitors you have to the park throughout the study period. While I can understand that even one incident is one too many this must be analyzed on a percentage basis. 75 incidents out of say 100,000 visitors is not significant and just reporting 75 is misleading and fraudulent.

5. Please consider as an alternative looking at how other cities handle this issue. For example in Chicago dogs must be on leash except in the gated dog parks and beaches. GGNRA could fence off large swatches of land to accommodate the dogs in the city. As it stands by just reducing the land area that dogs are allowed to run free on won't solve any issues with non dog owners being scared or dogs reacting negatively to horses unless that is area that they are then restricted from as well.

Thank you for taking the time to read my comments. Having a larger space to let my dog run free has been the biggest positive change in my life from the move.

<b>Correspondence:</b>	I walk my 2 welsh terriers on leashes and don't like it when I encounter dogs off leash, but I do understand owners' preference to allow dogs freedom to run/play off leash. Thus I recommend a middle ground: 1) GGNRA should create a fenced off-leash area - there are more than enough acres to allow this, or alternatively 2) GGNRA should lease a small part of the many many acres in Rancho de la Tierra park to a local dog owners association (assn could be incorporated for the purpose of doing this) who would be responsible for creating & maintaining this area - thus removing any liability & staffing issues from GGNRA and providing an area for owners to let their dogs run freely & safely without interfering with other on-leash dog walkers or no-dog walkers.

**Correspondence:** I greatly value that San Francisco has many official off leash areas for dogs. Dogs are an important part of our society, they provide companionship, stress relief and an easy icebreaker for people in a community to start interacting. Dogs need exercise to be well behaved, happy members of the community. My dog loves to run in the offleash areas, and would not be able to get adequate exercise if he were only allowed on leash. We monitor him closely to make sure he does not disturb other people enjoying the area.

Please reconsider the proposed restrictions on offleash areas. The current rules have worked well since the 70s, please do not reduce our access to allow our dog and their owners (us!) healthy and happy lives.

**Correspondence:** I live right below the trail head at the top of Donahue St. When my wife and I first moved here we were excited about using the trail for walking our dog. 2/3 of the time we have tried taking him up there he has been charged and attacked by off leash dogs that are not even slightly under voice control. One time the owner of the dog was a least 1/8 of a mile behind the dog when he attacked ours and she had no idea that anything had happened until we passed and asked if that was her dog. The thought that the dogs up there are under voice control is a joke and I can prove that any time simply by taking my dog up there. The amount of dog walkers that flow through there on a daily basis that unload 6-8 off leash dogs from the back of the trucks is quite surprising. The entire parking pad up there has an overwhelming smell of dog urine because of the amount of people that unload cars full of off leash dogs and let them do what they will. I live close enough to the trail head that I hear people yelling for their dogs that have run off a couple times a week. There is an extremely small portion of people that use the trail that have dogs that are under voice control. The fact that I cant take my dog up there without being attacked is frustrating. We live in an area littered with off leash dog parks, but we also live in a area full of entitled people that believe they can commandeer any public park and turn it into there personal dog park regardless of how well or poor there dog behaves.

**Correspondence Type:** Web Form  
**Correspondence:** Hello, the following are my comments on the latest proposed off and on leash dog restrictions in the GGNRA.

I understand the need to balance on leash, off leash, and no dog areas in the GGNRA. However, I feel strongly that some of the proposed restrictions are completely unbalanced and unnecessary, and will result in further problems with dogs and people in the parks.

In general, there are a lot of people with dogs in San Francisco, and the dogs are a huge part of our ability

to enjoy recreation areas with our families and friends. Historically, everyone has gotten along and people with dogs have been able to enjoy the areas alongside people without dogs for so many years. Until the federal government came in and took over these areas, we were doing just fine. It is not really fair to just shut things down just because it makes it easier for you.

In particular, closing altogether the East Beach at Crissy Field, and especially the largest part of Baker Beach to dogs altogether, is completely unacceptable. By doing this, you will:

1. Crowd a large amount of dogs into much smaller, adjacent areas, creating overcrowding and potentially dangerous situations.
2. Disallow families and the elderly, people who cannot carry all of their things or walk far in order to play with their dogs, to enjoy these beaches.

I do understand that East Beach can be very crowded and is heavily used. However, closing Baker Beach to dogs is an extreme measure that is completely unnecessary. (Much of the time, it is practically deserted, EXCEPT for people with dogs!!) If you do that, there will be one tiny area for dog play on the entire north end of the park west of the Golden Gate Bridge! At the very least you should allow dogs ON leash on all areas of Baker Beach, with off leash in the currently proposed area. This is a huge beach, which by and large, does not get crowded at all because of the weather. Closing this beach to dogs would create a real hardship for people who cannot, for one reason or another (elderly, small children, disabled) exercise their dogs by running or walking long distances on trails.

Please modify the play areas to allow at least on leash dogs at Baker Beach, all areas of Ocean Beach, and East Beach at Crissy Field.

Thank you,

Dianne Younger Rosse

**Correspondence:**

The GGNRA a Public Recreation Area is in a densely populated urban area of San Francisco , San Mateo, Marin Counties who's residents with dogs use the open space in its jurisdiction. Fort Funston is one of these recreational spaces that has had Off Leash with Voice Command & control with Dog Walking for over 50 years and should remain that way. These areas have evolved over decades as Dog Friendly Recreation Areas that have been the first and best place for residents of these counties to bring their Dogs. This is because of the health benefits that both the Dogs and thier Guardians receive from an outing to these Recreation Area's.

When the San Francisco Parks and Recreation thru the approval of Prop F in the 1970's gave these open space area's to the GGNRA it was understood that these area's would remain open to the popular recreation of off leash voice command dog walking.

The following Paragraphs contain information that refutes the GGNRA claims being used to drastically reduce or eliminate off leash dog walking in Fort Funston, Ocean Beach ,Fort Baker and Crissy Field. I emplore you to read them along with my concluding comment at the end of this letter.

Thank you,

Thomas Roop

Where As:The GGNRA's Dog Management Plan/DEIS/SEIS asserts that the change in Dog Management Policy is essential to protect the resources of the GGNRA. The DMP/DEIS/SEIS is unlawful and must be set aside (thrown out) because:

Â” Where As:The enabling legislation and Memorandum of Understanding with SF require the GGNRA to exercise "sound principles of land use, planning and management."

Â” Where As: GGNRA management is in persistent violation of the enabling legislation, the Memorandum of Understanding with SF for this park property, and NPS Rules, Regulations and Policy because they have failed to perform "vital monitoring" which NPS considers an essential element of sound principles of land use, planning and management.

Â” Where As:GGNRA management can provide no monitoring report to substantiate visitor use patterns or conflicts, no documentation of degradation of the Recreation Area resources due to the presence of dogs nor their guardians, as well as no documentation as to whether resource degradation is inevitable or under the control of management prior to proposing these management changes.

Â” Where As: Federal law requires site-specific, peer reviewed studies to justify and guide changes in management of National Park System resources.

Â” Where As: The SEIS acknowledges the GGNRA has no such site-specific, peer reviewed studies for the impact of dogs and their guardians on water quality, vegetation, soils and wildlife in the GGNRA.

Â” Where As: There are no plant species which are endangered or threatened on Federal or State registers that have designated "critical habitat" in the GGNRA. Displacing recreation to enhance the growth of any of these listed plants is not required by the ESA and violates the enabling legislation for the GGNRA. However, we see that GGNRA management has displaced recreational access to plant these plants with regularity, the most egregious location being Fort Funston.

Â” Where As: The Monitoring Based Management Strategy is again a poison pill. This proposed compliance strategy has a measure of compliance that is totally subjective, with the GGNRA making all the decisions. Further, short or long term (permanent) closures could be triggered by any number of conditions totally under the purview of the GGNRA. It appears the language is designed to allow the GGNRA to make most or all of Fort Funston a native plant restoration/habitat, despite the fact that this is inconsistent with the enabling legislation and MOU with SF.

Â” Where As: Federal Law prohibits agency actions which are arbitrary, capricious and an abuse of discretion. Accordingly, this agency action, findings and conclusions should be set aside as prescribed by the Administrative Procedure Act, 5 U.S.C. 706 (2)A.

A brief post WWII history of Fort Funston (aka Doggie Disneyland)

Where As: Post WWII, Fort Funston (FF) was pretty much abandoned. In the 50's and early 60's, FF was a fabulous habitat - but not for wildlife. Rather, FF became a favorite hangout for seedy S.F. and Daly City gangs, drug dealers and users, sexual predators, off road recreation vehicle enthusiasts and a few off-leash dog walkers. Parents in nearby neighborhoods forbade their children from playing at FF due to its reputation for being unsafe. Tired of being harassed/harangued at other city parks, the dog community soon recognized the value in FF. It was clear that FF provided them an opportunity to recreate with their dogs off-leash in a beautiful seascape without any of the hassles presented at the other parks. No longer would they have to be inundated by the claims that they were infringing on the enjoyment of the city parks by adults and children who were afraid of dogs and complaints about dog waste.

Where As: Soon the word got out in the dog community and in the mid-late 60's FF realized a huge spike in the number of dogs and their human companions. It was these people who became the true custodians of FF. They were the ones who turned it into a real park. They took pride in their park. They kept it clean and safe. In fact, because of the significant presence of dogs and their humans, the criminal element soon left FF in search of a new refuge where they had control and would remain unchallenged. Many went to Golden Gate Park. Truth be told, the criminals were afraid of the dogs. And the dogs, being the good judge of people that they are, didn't like the criminals. Yes, it was because of the dogs, and only because of the dogs, that FF was now a VERY desirable park. This did not go unnoticed by the National Park Service.

Where As: When SF deeded FF in 1972 to the NPS/GGNRA, they inherited a spectacular park that was safe and well taken care of by its true custodians - the dog community. In return, the GGNRA promised via its enabling legislation to respect the historical usage of FF which included off-leash dog walking. This promise was codified in the GGNRA 1979 Pet Policy which officially designated FF as an off-leash dog park. In the early 1990's a new management philosophy permeated the GGNRA where conservation would now trump everything else in this national recreation area. Most notably, it would trump recreation. In 2000, after several illegal closures at FF, Fort Funston Dog Walkers sued the GGNRA and won. In 2001 the GGNRA arbitrarily and capriciously wiped out 30 years of promises and promulgations and voided the 1979 Pet Policy (see Fort Funston Forum for details). This action was reversed in 2004 in Federal Court and then again in 2005 in Federal Appellate Court. The 1979 Pet Policy was reinstated as the law of the land and remains that way today (also see GGNRA Pet Policy History). Presently, we are embroiled in a process, i.e., the 2013 GGNRA Pet Management Policy SEIS, which assures us that the GGNRA will once again remove off-leash dog walking from all of its recreation/park spaces.

#### The GGNRA'S Proposed 2013 Dog Management Plan

Where As: It was at the conclusion of the latest legal battle wherein Federal Judge William Alsup reinstated the 1979 Pet Policy, over the objections of the GGNRA/NPS/DOI, that a statement was made by the Judge that became the impetus for initiation of the planned changes in Dog Management in 2006. The June 2005 decision by Judge Alsup cited in this SEIS noted that the court's action "in no way restricts the authority of the Superintendent to 'protect the resource,' including the protection of endangered and threatened species."

Where As: The GGNRA/NPS/DOI asserts that the change in Dog Management Policy (DMP) in this SEIS is intended to protect the resources of the GGNRA. A Freedom of Information Request was made for the data, documents, and/or Staff Report which substantiated the GGNRA's claim that there was controversy over the dog policy, compromised visitor and employee safety and resource degradation which warranted the change in Dog Management Policy (DMP) and DEIS. The GGNRA's response merely stated: "The Staff Report and other documents you seek do not exist at this time". [emphasis added]

Where As: There is no mention in the DEIS or SEIS of the judge's additional admonition that "Congress has committed the proper balance of resource protections and recreation to the park professionals. Their judgments should be respected by the courts absent a violation of the law." [emphasis added]

Where As: The GGNRA has violated the law by ignoring the fundamental legal underpinnings provided by the enabling legislation, NPS Laws, Rules, Regulations and Policy. The GGNRA has demonstrably violated the enabling legislation and the Memorandum of Understanding with the City by failing to meet their requirement to utilize sound principles of land management.

Where As: The enabling legislation states specifically: "In the management of the recreation area, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall utilize the resources in a manner which will provide for recreation and educational opportunities consistent with sound principles of land use planning and management."

Where As: The MOU with the City states: "The 1975 agreement for the lands transfer from the City of San Francisco to the NPS states that "The National Park Service, acting through the General Superintendent, agrees to utilize the resources of GGNRA in a manner that will provide for recreational and educational opportunities consistent with sound principals of land use, planning and management.."

Where As: The National Parks Omnibus Management Act of 1998 established the sound principles for land use, planning and management. This Act provided the framework for fully integrating natural resource monitoring and other science activities into the management processes of the National Park System. The Act charges the Secretary of the Interior to "continually improve the ability of the National Park Service to provide state-of-the-art management, protection, and interpretation of and research on the resources of the National Park System", and to "assure the full and proper utilization of the results of scientific studies for park management decisions." Section 5934 of the Act requires the Secretary of the Interior to develop a program of "inventory and monitoring of National Park System resources to establish baseline information and to provide information on the long-term trends in the condition of National Park System resources."

Where As: NPS policy specifically states: "Natural resource monitoring provides site specific information needed to understand and identify change in complex, variable, and imperfectly understood natural systems and to determine whether observed changes are within natural levels of variability or may be indicators of unwanted human influences."

Where As: In short, site-specific, peer reviewed studies are required to justify and guide changes in management of National Park System resources. Clearly, the failure of GGNRA management to conduct

any consistent monitoring or study of the resources in the GGNRA is a violation of Federal law. This SEIS highlights the fact that GGNRA management is in persistent violation of the enabling legislation for this park property. GGNRA management can provide no monitoring report to substantiate visitor use patterns or conflicts, no documentation of degradation of the Recreation Area resources, as well as no documentation as to whether resource degradation is inevitable or under the control of management prior to proposing these management changes.

Where As: In fact, the DEIS asserted dogs negatively affect water quality in the GGNRA. Those assertions have been omitted in the SEIS with the following explanation on page 28:

Where As: "Although water quality monitoring currently occurs at GGNRA, no site-specific, peer-reviewed studies have been conducted at the GGNRA sites to document impacts to water quality specifically from dogs. It is also difficult to discern what is causing an impact to water quality, especially in a large metropolitan area where water quality may already be degraded. The literature review found very few investigations or peer-reviewed, scientific studies that document the isolated effects dogs have on water quality in recreational settings. Water quality has therefore been dismissed as a resource topic in this document due to lack of literature."

Further, the SEIS on pages 373 and 376, admits the following:

Where As: "Site-specific, peer-reviewed studies have not been conducted at the GGNRA sites for the sole purpose of documenting impacts to vegetation or soils from dogs.... Very few site-specific, peer-reviewed studies have been conducted at GGNRA for the purpose of documenting impacts to wildlife as a result of dogs."

Where As: Without the site-specific, peer reviewed studies, the GGNRA is left to argue that potential damage will be done should they fail to change the DMP. This is not sufficient to justify a change in the DMP by the standards set by the NPS itself.

Where As: The GGNRA has also embarked on a mission to create native plant habitats where no habitat previously existed. GGNRA management alleges this is a part of their obligation to "preserve" the park for future enjoyment, however, this is NOT what they are doing. When you read the overview for Fort Funston (in our full Comment text), it is abundantly clear that they are creating these native plant habitats, and in doing so they are destroying parts of the park that existed long before the GGNRA took control. This process is not preserving anything. Additionally, this is in violation of their authorizing directive, as they insist establishment of native plant areas requires the exclusion of humans from the site, eliminating all recreational activity in the area. Essentially the GGNRA is creating habitats adjacent to heavily used recreational areas, and then subsequently utilizing the habitat as a means to eliminate the recreational

area.

Where As: If you read the Affected Environment section carefully, you will learn that there are no plant species which are endangered or threatened on Federal or State registers that have designated "critical habitat" in the GGNRA. Based upon the ESA and the enabling legislation for the GGNRA, it is a violation of the law to displace recreation to enhance the growth of any of these listed plants in the GGNRA. However, we see that GGNRA management has displaced recreational access to plant these plants with regularity, the most egregious location being Fort Funston.

Suzanne Valente

\*\*\*\*\*

Conclusion:

In light of the fact that there is no substantial evidence that there are any endangered birds or plants at Fort Funston. I demand that the People's Public Land in the jurisdiction of the City and County of San Francisco and being Maintained by the NPS thru the Golden Gate National Recreation Area forever stay open and free range for Voice Command Off Leash Dog Walking. Therefore the current one foot thick DEIS-SEIS Plan is to be withdrawn. The NPS should make a permanent policy of the 1979-1980 Dog Management Policy Plan with full access to Off Leash Dog Walking under voice Command as it is now. This would also include a more progressive attitude in the maintenance of Fort Funston, IE repair or replace boxes for bags for litter pick-up, trash cans at all entrances and the north Sunset trail. All of this can be accomplished by ratifying PLAN A and making this plan permanent and enforce existing rules.

Thomas Roop (13)

**Correspondence:** I travel the 13 miles to Ft. Funston once a week so that my 9-year-old dog can enjoy running and socializing with other dogs without the restrictions of a leash. Ft. Funston is unique among off-leash dog parks because the humans walking the trail provide structure to the experience. In a traditional dog park, my dog would just sit by my side instead of interacting with the other dogs. Please minimize the leash-required areas so that we can continue to enjoy this unique urban park.

**Correspondence:** DEAR SUPERINTENDANT,

I am a longtime SF homeowner, SF resident. I live here and use the park area/beach year round. I have lived in SF as well as other major cities within the USA. The beach area in SF is clearly the most well utilized and self compliant dog/human/wildlife/nature interaction I have seen. The weather is too cold for sunbathing most of the year and even it were, there is easily enough beach for those who choose to be " dog free ". What I have seen when the weather does get " warm " , is a natural split of "no dogs" to the most Eastern point, which is better for people and less for dogs. The dogs tend to move more West. I am not sure who is pushing for this, but I would be interested to know. Please advise. The beach area under plan "A" effects no wildlife as it is only Sand. I will initiate a bonofide study at my expense utilizing a Federally recognized assessment team of your approval that is not who you have already used. please advise.

There could be a few areas tightened up in this plan if need be, however, it is working from the standpoint of the RESIDENT/TAXPAYER user.

Plan F is "almost ok" , however the "tide inlet " is quite vague.

SO IF A-F IS ALL YOU CAN PROVIDE AT THIS TIME, "A" IS CLEARLY MY CHOICE.  
I ALSO BELIEVE THERE IS A MORE RESTRICTIVE "A " THAT IS EASILY ACHIEVABLE, AS WELL AS LESS RESTRICTIVE "F".

I ALSO BELIEVE THAT IF YOU ELIMINATED " PROFESSIONAL DOG WALKING SERVICES " THE IMPACT WOULD LESSEN BY 50%. UTOMATICALLY. IMMEDIATEY!! THESE BUSINESS ACTUALLY MAKE MONEY OFF OF THIS PROPERTY, WE, THE TAXPAYERS PAY FOR IT.

THIS IS A FREEDOM I AM NOT GOING TO GIVE UP AT ANY COST. I AM NOT A

PROFESSIONAL DOG WALKER, BUT A VERY HIGH TAX PAYER WITHIN A GROUP OF PACIFIC HEIGHTS RESIDENTS WHO ALSO FEEL THAT THIS IS A PRICE WE PAY TO LIVE HERE.

I WILL LEAD MY GROUP OF WEALTHY, HIGH TAX PAYING, SF RESIDENT, DOG OWNERS TO ENSURE PLAN "A " IS ENFORCED.

THIS FREEDOM WILL NOT BE FORGONE FOR THE " DOG WALKING " SERVICES. THEY WALK 10 DOGS AT A TIME. THE TAXPAYERS AVERAGE IS 1.

I WOULD LIKE TO COME MEET WITH YOU IN PERSON TO SEE IF A LEGAL TEAM IS REQUIRED.

IN ADDITION, TODAY IS 10/25. THE SIGN WAS FIRST PUT UP FOR PUBLIC NOTICE WITHIN THE PAST 5 DAYS.

I AM LOOKING FORWARD TO OUR MEETING.  
PLEASE ADVISE DAY, TIME, PLACE, ATTENDEES.  
MOST SINCERELY, MICHAEL THALER  
2841 OCTAVIA STREET, SF, CA, 94123.

THANKS.

<b>Correspondence:</b>	I am a resident of the Homestead Valley area of Mill Valley for over 17 years. I leave next to the Homestead Fire Rd as drawn on MAP 3.				

I use the fire road on a weekly basis and STRONGLY BELIEVE THE DOGS NEED TO BE ON LEASH OR BANNED ALTOGETHER FOR THE FOLLOWING REASONS:

1. I have been bitten by a dog. The dog was not on a leash or under voice control.
2. Dog walkers routinely walk 4 dogs who are rarely on leash. I see these dogs run wild disturbing hikers, families, bike riders, local wildlife (Rabbits,birds, etc.), digging/crush native vegetation, and defecating on the trail.
3. I routinely see "plastic poop bags" on the trail unclaimed - unsightly and unsanitary.
4. I have seen dog on dog clashes. I get concerned the dogs may then turn on a human - adult or child.

**Correspondence:** Our family support owners keeping thier dogs on leashes on Ocean Beach, with more resources provided for consistent enforcement However, since many dog owners consistently flaunt this requirement, unfortunately, there may need to be an outright ban on dogs in this area. I have seen unleashed dogs on ocean beach repeatedly attack pelicans and other seabirds, to the point of thier deaths, so this is not just a theoretical concern.

On mixed use, unleashed doges which do not respond to voice commands are a real risk to small children visiting the beach, as parents cannot ascertain if each of these uncontrolled dogs are an immediate risk to thier children or not.

Similarly, older people like myself risk falls when uncontrolled dogs jump up on us or trip us. This is a serious risk, and a fall can cause a broken bone, which can be life threatening at my age. And my young nephew who is frightened of uncontrolled dogs cannot visit our beach at all.

Our family lives 400 yards from the dunes, and often walk on the beach, typically on a daily basis. While some dog owners are responsible, others see the wildlife on the beach as something to entertain their dogs. I've regularly seen dogs encouraged by thier owners to chase flocks of shore birds attempting o feed and rest by the shore. They have a particularly unfortunate habit of separating a small shore bird from a flock, and chasing it to exhaustion. While dog owners in a city would prefer to have thier pets run unfettered in this area, the interests of the shore birds should also be taken into consideration, especially for the snowy plovers.

Some dog owners go as far a video taping this wildlife harassing and attacking activity of thier dogs, apparently to add to the entertainment factor. Interestingly, owners will have thier doges leased on the street, but then purposely take them off leash on the beach.

Yours truly,  
Kathleen McCowin

**Correspondence:** Dogs that are big enough, especially certain breeds like Pit bulls, must be on leash in all times. It would be a reasonable thing to restrict access to dogs on our pristine beaches. I often could see dogs defecation on Ocean beach which create health hazard to our children who like to enjoy playing on the sand. Dogs also disturb the birds that dwell on the beaches. All said what the point if I hardly or ever see a Ranger on the beach or in the Presidio for that matter. We should first and most have funds to get more Rangers to enforce dog leash policies. Rangers are the essence of our National Parks and their presence gives comfort and good feeling. My great memories are when hiking the Presidio I could hear the clip clop of a Ranger's horse before the sight. Then a polite exchange and a great feeling. Gone with the wind that time, and I wonder for what greed? How much does it take for a "rich" nation to have some Rangers on horsebacks?

**Correspondence:** I am a San Francisco native, a frequent user of Crissy Field East Beach, and also a Sports Basement customer. I appreciate Sports Basement as a locally owned retail establishment, but not at the expense of public use of public lands. the Environmental Assessment [http://www.presidio.gov/about/Administrative Documents/PLN-344-SportsBasementEA\\_20131004.pdf](http://www.presidio.gov/about/Administrative Documents/PLN-344-SportsBasementEA_20131004.pdf) points on pages 27-28 to the possibility of "spillover demand" for parking into the "currently unmanaged parking at East Beach," and refers to prior recommendations to "implement parking regulations, time-limits and/or parking fees in potentially affected parking areas under its administration (notably, Crissy Field)."

Time limits at the East Beach parking would have a MAJOR adverse effect on many users of East Beach parking, especially board sailors, kayakers, walkers and picnickers. I agree with the comments by the NPS on pages 102-103 that paid parking for Sports Basement would likely result in the need for the NPS to charge for and/or limit parking at East Beach. We should not sacrifice access to public lands to allow for a for-profit retail operation. I am all for Sports Basement, but the traffic and parking impacts should be borne by the developer, not by the public users of East Beach and Crissy Field.

**Correspondence:** The proposal to restrict dogs on Ocean Beach is absurd. If the concern is habitat destruction for the Snowy Plover, how can you justify allowing humans to be in these areas? Kite surfing does far more to disrupt the avian habitat. Why not shut the beach entirely for certain days? Having a beach where dogs can run free is one of the best features of San Francisco. I will not let that be taken away, and I know that many others (only some of whom own dogs) feel the same way. There are much better areas to spend the park service's time and money.

This is not being run as a democratic process - - the input you received clearly shows that the public is not on the side of these increased restrictions. If you have any doubt about this I suggest the issue be put to a public vote.

**Correspondence:** Banning dogs from Ocean Beach is outrageous and unfair! Dogs are major parts of peoples' lives and it is extremely unfair to not allow them to go to land that should belong to EVERYONE, including them. There are already restrictions on the beach that protect the wildlife and dogs causing issues with people/tourists is very rare... This is far to extreme.....

**Correspondence:** This is completely inappropriate for an urban setting like San Mateo. GGNRA is basically withdrawing ALL opportunities for dogs to be off leash ANYWHERE in San Mateo. Where is the fairness in that? This isnt what the original plan envisaged and we have as much right to enjoy SOME of these areas off leash as anyone.

All this will do is crowd out the city off leash areas. This CANNOT be allowed to stand!

**Correspondence:** Alternative F:

The document states:

"Alternative F provides balanced visitor use (no dogs, on-leash dog walking, and dog walking under voice and sight control in ROLAs) as well as protection of natural resources and visitor safety."

This is not true for Ocean Beach SPPA, zero dogs on the beach is not balanced, the alternative for the trail at Ocean Beach is sub-optimal This trail is heavily used by bikes and pedestrians. Banishing dogs to only this area is would be more disruptive to the bikes and pedestrians. In addition, dog walkers on this trail can't even see the ocean. How is that balanced? I can go close enough to the beach to hear it and smell it, but I can't even look at it. That's absurd

I having been living in the area for six months and walking my dog every day, I have encountered hundreds of dogs, both on and off leash and have yet to see one single dog go after a Snowy Plover, most of the dogs don't even notice the birds are there. Are you trying to protect against a perceived threat or a real one? I noticed the document sites the following statement: "Even if the chase instinct is not triggered, dog presence in and of itself may be an agent of disturbance or stress to wildlife" (Sime 1999, 8.3; Lenth et al. 2008, 218).

The key word in this statement is may. Well, that means it may not as well. Shouldn't these policies be based on something more concrete? If this statement is true then are you going to ban humans from the beach too? What about the raccoons and other critters and wild coyotes are you going to try and ban them too?

The document also states:

"At GGNRA, there have been multiple instances where dogs flushed or chased shorebirds or snowy plovers at Ocean Beach and Crissy Field as documented in NPS monitoring reports by the Natural Resources Division (NPS 2008a; Hatch et al. 2007a, 12; Hatch et al. 2007b, 4-6; Hatch et al. 2008, 2-4)."

I have been on SPPA every morning (and most evenings) for the last six months. If this were happening at a dangerously high level, wouldn't I have witnessed at least one of these instances?

Alternatives B,C,D,F

In several places the document refers to the visitor experience. In the section of Ocean Beach I use, I would venture to say almost all of the visitors are locals that live nearby and half of them (if not more) are walking a dog. Forbidding dogs on this beach is certainly not enhancing the visitor experience; it is detrimental. I live just a few blocks from this beach. My dog and I love walking on the beach; it has given me great incentive to get out and get some exercise and has greatly enhanced my wellbeing. Some of these proposals would now shut me out from enjoying my local beach.

Ocean Beach SPPA

The document states:

"...However, impacts to the wildlife in the Ocean Beach SPPA would be long-term, moderate to major, and adverse to shorebirds under the no-action alternative, and long-term, minor, and adverse under alternative E."

I am not sure I understand how alternative E can be both minor and adverse? If the dog is on a leash, how is that adverse? In addition, the alternative A represents what has been in place for many years, this impact statement implies that to be a danger to the Snowy Plover. Is that really true? I see hundreds of those birds over the course of a week, and never any dogs interested in them.

Other Options:

How about issuing permits for locals to walk their leashed-dogs in areas such as SPPA? This would limit the number of dogs in the area and truly provide some of the balance you claim to be seeking. A "No-dog" policy does not offer any balance.

#### General Comments:

The idea that some of these alternatives provide "multiple visitor experiences" is simply not true. If I am a dog owner visitor, I cannot experience the beach, I have to walk on a paved path with bicyclists (and you know the bike coalition is just going to love that!) and pedestrians and have no view of the beach. Even though I live at the ocean, I have to walk my dog around the city streets, take her home, then go back out to the ocean if I want to enjoy it. That is simply ludicrous.

Many parts of the document make reference to the effect dogs may have on the energy level and fat reserves of these delicate birds. That seems a bit ridiculous. I have seen the Snowy Plovers run up and down the beach non-stop all day long. How is an occasional dog chase going to wear them out? They run constantly anyway!

The comment period runs from September to January, how come the announcement poster was posted only for one day? Are you afraid to let people know what is going on?

**Correspondence:** Thank you for preparing this document and serving our community. This proposal is very near to my heart for many reasons. I love nature, community and dogs:)My undergraduate degree is in Recreation Administration. I know the current situation is complex. I believe most stakeholders do share my love for nature and community. I understand we can not all have the same affinity for dogs, children, horses, birds and hikers. However,each child, dog, horse, and hiker belongs to our community and our individual families. Each has a special contribution to offer for our greater well being, as do the birds and the plants. I understand as time has changed, our San Francisco beaches have been managed by policies established specifically for our city's parks. I know this makes our situation somewhat different than others. I know beaches are especially popular places and also important to our ecosystem. I believe the snow plover guidelines at Ocean Beach are a model for coexistence. I believe the no dog rule at China Beach is another form of accommodating the needs of some who want to keep children and dogs separate. While I have little desire to go to the beach without my dog...who NEEDS to go to the beach..to exercise and socialize, I respect that some people do want to spend time on the beach without dogs or horses. I imagine a child or horse might trample a plant or two too. I hope we are all trying to be respectful; but I know we all are prone to mishaps. Fort Funston is a haven for dogs and dog lovers and horses and their riders...also hang gliders. One thing I love about Fort Funston is the lack of trash. Yes, horses and dogs poop and pee in this place, but being a frequent hiker at Fort Funston, I can confidently say that I have never smelled urine. I do want to comment about the commercial dog walkers and the owners of multiple dogs that walk at Fort Funston. I feel that the commercial dog walkers do include experts but this group also includes some individuals with much less training. I believe ALL walkers (commercial / private citizens) should be required to complete pack management training and dog training certifications before being permitted to walk more than TWO dogs off leash or on. I would be thrilled to see a permit of this nature that required the walkers to carry a photo id badge whenever walking dogs

---

anywhere in the city. Dog trainers with pack management training are very capable of walking six dogs off leash in an open space like Fort Funston. Fort Funston is ideal for dog hikes as its layout is quite safe for them. It is important to keep in mind that dogs, especially larger dogs do need quite a bit of space to actually run and hike. This was a point I had some concerns about when reading over the space limitations for off leash areas at Baker Beach, Ocean Beach, and Crissy Field. Also, the commercial dog walkers are really important to the health maintenance of our San Francisco dog population. Dogs NEED exercise off leash AND they need to socialize with other dogs off leash in order to remain friendly and healthy. During the week, dogs are utilize the beaches during off peak hours. They could be given much more room during the week to accommodate multiple dog walking groups as it is also important not to "pack in" too many groups. Dog behavior and perspective requires some space for each. Dog walkers / dog owners are very aware of this fact. I hope that your final plans to manage our San Francisco beaches will be one that reflects the needs of all our city's citizens..including dogs, horses, children and hikers. I hope the decision will reflect the need for all our citizens to mingle together in multiple use places and perhaps some expert use places / time spaces. Honestly, the weekdays at the beach are a very different dynamic than the weekends. Commercial dog walkers tend to walk the dogs mostly weekdays between 9am and 3pm. There are not that many San Franciscans free to visit our beaches during those hours; Work requires many of us to depend on professional dog walkers to keep our dogs life in balance with exercise and socialization. As a side note, I do believe most dogs tend to stay on trails and then have a good run on the sand:) Its great for them. Basic commands like "off" "not ours""come" are given frequently to guide a dog back to the appropriate walking space...much like you would guide a child or a horse..dogs are also capable of following voice commands. I think the key points to work out are how to make peace with the fact that San Francisco beaches are now managed by National Park Services but are a part of our city's daily lifestyle. Our citizen need this space to keep life balance for ourselves and our pets. The use of the beaches and parks is part of our way to commune with each other and nature. The pet policy was written for our city not for our nation. San Francisco locals see the beaches as part of our city recreation space. We pay city taxes happily to enjoy the surroundings and facilities of our great city. We all count the beaches as part of that desired surrounding. Perhaps the fiscal considerations of managing the beaches need to be reviewed. Maybe volunteer groups or subcontractors need to be part of the management strategy for our beaches and hiking trails. Certainly, I believe an upgrade of commercial dog walking guidelines needs to be considered. Dog trainers with pack management training are the best qualified to walk 6 dogs off leash. Those without this training would definitely be less able to guide dogs..though I am sure there are some that have a natural gift, I would prefer they all be formally trained. Those without formal training could perhaps apprentice with those more qualified. Thank you for taking the multitude of hours and patience required to review all of the comments related to this proposal and important situation.

**Correspondence:** Please choose to implement all of the alternatives that leave the most area available to off leash dogs under voice control. I am a heavy visitor to both Crissy Field and Ocean beach with my off leash dog (who is a Canine Good Citizen certified dog). The dogs that visit these locations are overwhelmingly well behaved and the owners (tax paying citizens) deserve a public space to exercise their animals off leash. Fenced dog parks are a terrible alternative as they are dirty, smelly and have no access to water for natural swimming dogs.

Do the right thing NPS. Keep dogs off leash in the SF beaches.

Catherine

**Correspondence:** The document states: Physically restraining dogs on leash in the SPPA would reduce chasing, but even leashed dogs could bark and/or lunge at feeding and roosting western snowy plovers, causing disturbance and/or harassment in a relatively small area.....

Well so could children playing with a ball, or many other "natural " occurrences are we going to ban that too?

I noticed the document sites many sources that use terms like "may disturb", "may have an impact"- -- well I "may" win the lottery, but I am not counting on it- -- let's stop being stupid and heavy-handed with regulations.

We care more about protecting wildlife and less about the well being of our people and our dogs (which, by the way are animals too!) Isn't nature all about different species interacting with each other?

**Correspondence:** As a dog owner in San Francisco, nothing makes us happier than taking our dogs to the various parks around the city. If half of those parks (the best ones, in our opinion) stopped allowing dogs, that would ruin the experience at all the parks.

Without being able to take our dogs for exercise at Fort Funston, Crissy Field, or other GGNRA dog friendly areas, we'd be in enormously overcrowded city parks. This doesn't suit anyone - - not the dog owners, non-dog owners, dogs, or city at large. It also doesn't suit the GGNRA, who to this point are beloved by the city which we share.

We all support the effort to preserve biodiversity and limit the environmental impact that dogs and people cause, but surely there must be a better way than simply banning dogs throughout much of the area.

**Correspondence:** Your statistics are flawed as you state an 11% incident rate for dogs. But more than half of the incidents are tickets for off leash. These should not be counted as if there was no off leash law these tickets would not have been given and the rate would be insignificant in some places and average around 4-5%

---

Recreating for a senior citizen is walking with my dog not on leash. On leash is too hard for me and throws off my posture.

I really am opposed to making any chnge to off leash at any of the parks, particularly Chrissy field and fort funston.

I DO agree with your recommendations for limiting the number of dogs per person. Please also include that they must not drag leashes.

The dog problem is really a "dog walker" problem and i hate to see you punish all of us for this money making career.

I think you will just ignore the citizens and do what you want anyway.

<b>Correspondence:</b>	It is with great sadness that I read the of the GGNRA dog plan. Option "F" is a TERRIBLE plan that does not provide balance. Dog owners & walkers need to have the same rights as other users of the park system resources.				

Currently, there are too few options available to dog owners & walkers within the GGNRA. Any user of the park who does not want to interact with dogs has many options for trails, beaches, etc that are closed to dogs. On the other hand, dog owners have few opportunities. THE REAL QUESTION THAT WE SHOULD BE ASKING IS WHAT ADDITIONAL TRAILS & BEACHES SHOULD BE NEWLY OPENED TO DOGS (BOTH ON AND OFF LEASH)!

The "A" versions of the maps are not acceptable in that they limit dogs in GGNRA land too much. We need to look additional options for opening additional trails. I recently went down to Rodeo beach near my home with friends and realized that although I live very close I had not been there in years (even though I am hiking, running & biking in Oak Valley & other areas almost daily)...why is that? I have a dog who I would like to bring with me when I hike, bike or run and that rules Rodeo Beach as well as too many other parts of the park.

Don't take away further from my use & enjoyment of the GGNRA. The park should be open and available to all...not just non-dog owners & non-dog walkers.

**Correspondence:** Hearing about this plan and how it is actually coming close to passing is troublesome to me. First off, I would like to ask the question to you, "How many house holds in the San Francisco / San Mateo County area own a dog?" Do you realize how many people you will be affecting? Do you not realize that the dog community is huge and all dog owners bond together quickly if they have something to fight for. The GGNRA will not hear the end of this even if this passes. Also, they will definitely not prevent people from bringing their dogs to these restricted places on or off leash.

I will put my money on the fact that most people on the board of GGNRA do not own a dog and if they do, I bet they are not good care takers. Anyone who owns a dog would not vote to pass this new plan. Why not address the real issue. Take pro-active steps in solving the reason that this plan came to petition, not simply try to pass a law for the sake of it.

If the reason for your plan is to preserve the land and make sure it is not being trashed, why don't you take a look at all of the pedestrians who do not have dogs. They account for a majority of the trash and waste that is left at parks or beaches. Dog owners in general are good at picking up their own and their dog's mess. If this is such a problem, why does the GGNRA not hire 1 or even 2 park rangers? All of the times I have been to the park, I have not seen one. They should enforce the rules to both dog owners and non-dog owners.

If this plan passes, this will not be the end and you should be prepared for a constant battle. I can guarantee that all dog owners will not bow down gently. Our dog is our child and if you were to do this to your child, I'm sure you would fight back just as much. I'm not asking for you to forget your ideas all together. There are different and better alternatives that can satisfy both parties.

**Correspondence:** I fully support the restrictions on dogs in the Presidio. I feel like I can't even take my kids to Crissy Field without a dog jumping on them or threatening them. Every dog owner thinks their dog doesn't act badly. Kids and dogs don't mix.

Dog owners just don't respect any rules or restrictions on dogs. It would be nice to be able to take my kids to one place in this City where dog restrictions would be enforced. Because they are not enforced in city parks and dog owners don't respect the rules in city parks.

**Correspondence:** Dear NPS:

I am a dog lover, a Certified Wildlife Biologist, and a frequent user of the open spaces in Marin County. I have over 30 years of professional experience as a consulting biologist for a local firm assessing the effects of human recreation on the natural values of our open space lands.

While the Dog Management Plan is a step in the right direction to better controlling the use of dogs in trails, it does not go far enough in my professional opinion. The areas that are proposed to be "leash only" should be changed to "no dogs" due to the difficulties in enforcing the leash only provision.

There are already many areas with leash only requirements that are regularly ignored and by some dog owners even flaunted. In fact, many dog owners, including people from the Marin Humane Society, are on public record not only in opposition to leash laws but have stated that they will not obey them.

Simply stating a trail is leash only does not make it so. It must be enforced. The NPS does not have the enforcement capacity now to enforce that rule. And the future strongly suggests that NPS capacity will be cut rather than enhanced. As a consequence, stating a leash only rule has the effect of allowing unleashed dogs on trails in many instances.

I have collected data on the incidence of trail usage, dogs on and off leash, and have made incidental observations of wildlife usage as well. My findings are that off-leash dogs tend to drive out other recreational use of trails making them single-use trails. In particular, older people and young people with pre-school aged children are driven off of trails with heavy off-leash dog usage.

I am all in favor of compatible use and sharing our trails. Unfortunately, use of leash-only signs does not work in Marin County and tends to make trails single-constituency trails.

In addition to the recreational issue is the issue of wildlife compatibility. While I have statistics on human use, my findings on wildlife use are more incidental based on observations of sign (e.g., scat and tracks) and direct observations of wild animals. In areas that have heavy use of unleashed dogs, it appears that the use of these areas by small and medium mammals and especially carnivores such as weasels, skunks, raccoons, foxes, and even coyotes is vastly diminished.

The mission of the NPS is to protect and preserve the natural values of the land it administers. To do that best, dogs should not be allowed on trails.

Thank you for considering these comments.

Roger D. Harris  
Certified Wildlife Biologist

<b>Correspondence:</b>	Fort Funston:				

I walk my dog off leash at Fort Funston almost every day. This is a great place both for dogs and for their owners. GGNRA is a recreation area, not a national park. Please don't let environmental extremists who seem to be in charge at GGNRA ban off leash dog walking at Fort Funston. Put dogs and people first, not extremists who would ban everyone and every dog if they could. GGNRA belongs to us. Don't let the extremists steal it.

I am elderly and retired. This is the only place where I can go to walk my dog off leash. Please don't take this away from me.

**Correspondence:** Your proposed policies are in contradiction to the conclusions you draw in the study. To wit, you conclude that dogs have minimal impact on compacted trails. On the south loop of the Oakwood Valley Trail, where the GGNRA plans to mitigate dogs off-leash, the park service built a compacted trail (built by the Conservation Corps.) Also on the Oakwood Valley Trail, your policy indicates that you want to protect the Mission Blue Butterfly habitat. No lupine grows on either the north or south side of the loop.

I have been heavily involved in the restoration of Oakwood Valley and am well aware of the habitat. I know the valley trails intimately and have walked each of my dogs there for 35 years. This is one of the only areas to walk dogs off-leash. Your proposals are out of sync with the needs of the population. My experience is that about 85% of the people on the trails are walking with their own dogs, about 15% without dogs. The only aggressive dog incident I know about was the falsely reported one submitted by a ranger the last time the GGNRA tried to shut down the trail.

Here are several alternative solutions to closing trails and beaches. They are less expensive solutions for land management and people management:

1. Require and enforce people to CARRY leashes for their dogs. Monitor for voice control.
2. Require and enforce people to clean up after their dogs.
3. Limit professional dog walkers to three or four dogs per outing in all areas.
4. Add a fee onto dog licensure to pay for these services.
5. Use ticketing fees to deter irresponsible behavior. Put fees towards management.
6. Establish a complaint line.

Respectfully yours, Laurie Cohen

**Correspondence:** As a frequent Ocean Beach visitor, my recommendation is to base the dog and off-leash restrictions on visitor density.

For example, I tend to access the beach on Taraval. Unless it is a warm day (over 70), the beach has at most 10 people between Taraval and Noriega. North of Lincoln, however, the beach is always packed with tourists, surfers and locals.

I'm suggesting a modification to Map-E. The tourist heavy area from Cliff House to Lincoln should be leash required at all times. The area south of Lincoln should have seasonal off leash (Nov - May).

**Correspondence:** I do not agree with what has been proposed in the current Dog Management Plan - it is far too limiting for dogs and their owners, with no just cause - it's far too extreme. San Francisco and other parts of the Bay Area already has very limited space for dogs to be dogs without being confined to pavement and a leash - taking away areas that are working is going to prove detrimental to dogs and dog owners and many others in the Bay Area population. Such an idea needs to be discussed openly, realistic ideas and options need to be come up with and then voted upon by a wide group that goes beyond the GGNRA most certainly - -- -- because we all live here and use GGNRA area. Thank you.

**Correspondence:** Preserving off-leash areas in the GGNRA is very important to me as a San Francisco resident. Being in a city does not provide adequate space and places to exercise my dogs. GGNRA spaces are some of the only large open areas still available to dog owners. It is very difficult for dog owner, especially seniors and the disabled, to exercise their dogs on-leash. We need large open off-leash spaces to adequately exercise our pets. SF city parks are not adequate and are limited, we need GGNRA open spaces preserved for off-leash use. For many of us our dogs are the only "family" we have and are an important part of our overall health and well-being. Please maintain as a much open off-leash space as possible in the GGNRA.

Thank-you

**Correspondence:** I would like to make a comment regarding the GGNRA Draft Dog Management Plan. I have been a resident of San Francisco since 1998 and a dog owner for the last eight years. I have taken my dog to nearly every park in the city, and I appreciate the green space provided as natural oases from the hustle and bustle of the city. However, the experience of "on-leash" vs. "off-leash" is quite different, both for dogs and their owners. Just as humans and children need space to run around and play and be free, so do dogs. As we know, dogs that get adequate exercise - including time to run off-leash - are happier and healthier dogs, with less behavioral issues. Some of the spaces you propose to change from off-leash to on-leash are marvelous places for dogs and their owners to get exercise and play. I have never had a problem in any of these areas, and the majority of the people I see are dog owners with their very well-behaved dogs. Exceptions to this are few in my experience. I respectfully ask, as a taxpayer, voter, and dog owner, for you to avoid any restriction of the limited off-leash spaces in San Francisco.

Taking away our dogs' space to play would negatively impact what many consider to be a very dog-friendly city, and would certainly negatively impact the city's dogs and their owners.

**Correspondence:** Please do not limit the dog-friendly areas in San Francisco. As a responsible dog owner who always cleans up after my pet, I appreciate the areas at Fort Funston, Crissy Field and other dog parks in the city more than words can say. Dogs are a huge part of San Francisco's character and there are already many limits on where they can run free. Please reconsider this plan to limit dog-friendly off-leash areas.

**Correspondence:** PLEASE PLEASE PLEASE do not further restrict the off-leash dog areas! Dog owners pay taxes just like everyone else. Limiting off-leash dog areas will only serve to increase the number of under-exercised dogs in the city- insufficient exercise can lead to behavior problems. You want well-behaved dogs in your park? Let them exercise off-leash!

I have dogs and I vote

Thank you

**Correspondence:** I disapprove of the restrictions you intend to implement on the current off-leash areas of the GGNPS. I am elderly with a knee replacement. I am unable to physically exercise my dog properly on a leash. He gets better quality of exercise, a more natural form of exercise and socialization in these off-leash areas. Dog owners are responsible people that now only watch after their own animals but are considerate of others'. I see more destructive behavior from children than from dogs. Please let our dogs have a large off-leash area so they can exercise and be better citizens.

**Correspondence:** I believe it is important to keep the current areas open to dogs and people. Off-leash activity is a valuable exercise option for dogs and their owners, and should not be restricted. Rather than limiting the areas and singling out dogs and their owners, the public as a whole would be better served by removing those who act irresponsibly, be it dog owners, litter bugs, people harassing wildlife or disturbing sensitive habitats.

**Correspondence:** I have been a resident of Daly City for over 27 years. For the past 18 years I have been enjoying the opportunity to walk my dogs off-leash in the GGNRA areas, in particular, at Fort Funston. Prior to getting a dog, I had never visited the GGNRA areas. Since I became a dog owner, walking my dog in the GGNRA areas that allow off-leash dogs has become a daily activity for me. The opportunity for walking my dog in these areas has become central to maintaining my quality of life and is our main form of recreation, exercise, and socialization. I am writing to you as it is very important to me and many of my friends and family to continue to have access to walk with our dogs off-leash in areas like Ft. Funston and Crissy Field within the GGNRA.

I strongly object to the GGNRA's attempts to restrict or eliminate off-leash dog walking in many areas of the GGNRA. It is not based on solid scientific evidence or objective monitoring and observation of the dog walking areas. I have a degree in Biology and I have had 18 years of closely monitoring these areas as I spend time there. I don't agree with the assumption that it is dogs and their owners that must be removed or restricted from the areas we have access to in order to meet the GGNRA's objectives to:

• Preserve and protect natural and cultural resources and natural processes

• Provide a variety of visitor experiences

• Improve visitor and employee safety

• Reduce user conflicts

• Maintain park resources and values for future generations

I am a responsible dog owner who has taken every effort to make sure that when I am with my dog at Fort Funston, I have voice-control over my dog, I clean up after her, we obey the access restrictions to certain fragile habitat areas, and I am aware of other people who are walking through the area who may not be comfortable with a dog coming up to them. In my experience, it is very rare to encounter anyone who has a problem with dogs using these off-leash spaces. In fact the opposite is true, there have been a number of times when I have met someone without a dog at Fort Funston who is delighted to be in the midst of dogs having fun, running, and playing. There have been people that ask me for an opportunity to pet my dog as they can't have a dog themselves but still love the opportunity to interact with well behaved dogs. It brings a smile to their face, and I have the opportunity to positively impact their experience with dogs in these beautiful spaces.

I would like to see the GGNRA employ options other than restricting access to the GGNRA resources to dogs in order to meet their objectives. Over the years of my nearly daily visits to Ft. Funston, I have seen dog owners take more effort than many other visitors to the area to preserve and protect the areas we visit. Dog owners know we are fortunate to have access to these beautiful spaces near a large city like San Francisco and we work together to make sure that these spaces will be available in the future for others like us who love to spend time with nature, family, and our dogs. There is a strong community of dog owners that use these spaces and these groups would welcome the opportunity to work with the GGNRA to preserve our precious spaces. I'm a member of the Ft. Funston Dog Walkers, SFDOG, and Crissy Field Dog Group. As a member of these groups, I receive news alert emails and reminders to be aware of swallows and other wildlife or native plants when walking. I work together with other members to do monthly clean-ups at Ft. Funston. We value these areas, respect the environment and want to do all we can to preserve this space for future generations. I have seen little in the way of cooperative work between the GGNRA and the dog-owner groups and feel this is a missed opportunity for the GGNRA. These groups are loyal supporters of the areas they visit and want to protect and preserve them.

Change of the public's behavior starts with education. Signs posted along the walking paths could increase awareness of the public to the wildlife and vegetation that needs protection in certain areas. This would allow the public to continue to enjoy these areas and dog owners to become more aware and take steps to control their dogs as needed to protect those sensitive environments. Most of my fellow dog walkers and I heed the few signs that are placed in these areas because we value the environment and feel it is our responsibility as visitors to these wonderful areas to do our part to preserve them. Of course, there will always be a small minority of people who feel the signs and rules don't apply to them. Should the majority of dog owners be denied access to these valuable resources in our SF area because of the behavior of a few irresponsible people? With increased public awareness and education, those who are ignorant of the rules may be encouraged to act in a more responsible manner. Please consider taking steps to educate instead of eliminate people from using these areas. What you do will have an enormous impact on the quality of life for me and other Bay Area residents who love to walk our GGNRA spaces with our dogs. PLEASE KEEP OUR OFF-LEASH SPACES!

**Correspondence:** PLEASE PLEASE PLEASE save Fort Funston as an off-leash dog area for responsible dog-owners and their trained dogs! My active, athletic shepherd-type dog and I hike there at least weekly, usually in the early morning: on the beach, in the woods, along the dunes. We enjoy the solitude, the views, the wide-open spaces, and the opportunity to enjoy a real piece of wilderness inside SF city boundaries. My dog loves to chase her tennis ball in the waves and dig in the sand; we live in a tiny house with a tiny garden where she can't dig- - this is important!!!! She digs a hole in the sand to bury her ball and no one minds. The hole disappears when the tide comes in. People who want to avoid off-leash dogs (and I understand why they do - - I get annoyed with owners who can't stop their dogs from barking or won't train them to come when called. And I have an 86-year old mother who has nearly been knocked over by out-of-control dogs running wild) can choose a different beach to walk on. There are many nearby beaches where dogs are NOT allowed off-leash. Funston is SPECIAL and works amazingly well as a multi-use area. If its regulations change, San Francisco will probably lose another tax-paying, voting, responsible resident (who happens to be a public school teacher). I literally can't live here with my dog if we can't have our fix of Funston at least once a week! (Sometimes during my summer vacation, we are there every day!)

Thanks.

**Correspondence:** I oppose the new rules.

The GGNRA must listen to the majority of people who care for and support NPS operations with volunteer efforts and tax dollars. This new plan caters to a minority of people who think protecting the Eco system at Crissy Field requires drastic changes. To support this radical view they complain about dogs, people, and groups who oppose them.

On any given day most dog owners are responsible people who enjoy the parks. You will NOT find the anti Dog people using the most used section of the park because they complain about everything including not enough parking, poor management, dogs, and it's NOT a gated community with exclusive entry. This is what most of the radicals truly want: a gated entry system so they can pursue federal grant money to study the Eco system at GGNRA expense without interference from dogs and people. The stupidity and pack of lies from the so called Eco radicals must end. The scam that these groups have been using to obtain grant money to further their lies and agenda ends now with budget cuts, and sequester imposed cuts. If the GGNRA does not stand up to this group 20 years from now the Tea party and republicans will sell the parks to private parties for a management fee. Then it's good by GGNRA. You failed in you core mission to protect the parks so we can ALL use them.

**Correspondence:** I am very concerned about the negative impacts of these sweeping dog park closures. For many urban dog guardians, especially seniors who find it difficult exercise their pets while on-leash, the GGNRA represents the only place where they can allow their dogs to play, romp around and release a lot of energy. Take away this haven for exercise, and guardians may be unable to meet the physical needs of their pets. Daily exercise, like food and water, is essential to a dog's proper health and well-being.

In addition, the GGNRA closures will nearly certainly result in serious overcrowding of dog parks within the City of San Francisco. As dog guardians and dog walkers can attest, the City's dog parks are already quite limited, with off-leash areas being particularly scarce.

The Dog Management Plan should benefit people, dogs and the environment. Striking the balance between dog recreation and natural resource degradation is, of course, important. We all need to help make sure that sensitive habitats and species are not harmed. At the same time, we need to preserve access to these federal lands for diverse constituents, including responsible dog guardians and their pets, so that everyone can enjoy them.

**Correspondence:** These comments refer specifically to Upper and Lower Fort Mason.

Alternative A, no action, appears to be working. Where before unleashed dogs were running free, now, after some ticketing and oversight by the police, things have quieted down. The Great Meadow especially has improved.

One should note that the monitoring of the Great Meadow has diminished somewhat, and with it, more dogs are seen unleashed. But a little action by the nps has made a big difference in usability of this particular area.

Dog walkers have never seemed a problem in this area.

- - - - -

Finally, one has to add, the elephant in the room is the complete collapse of the nps in supervising bike traffic in the area just discussed. The dozens of bikes coming over the hill and speeding at commuter hours going east is a self parody of dangerous and lazy mismanagement.

The nps did fine with dog management, with police scrutiny and ticketing. Now just complete the paradigm with bikes. What are you afraid of?

- - - - -

One note about your question below about preference in hearing about NPS docs in the future. Public posting in the area in question has been very effective - which is what I mean by checking "other".

**Correspondence:** Your preferred option for Muir Beach is terrible and poorly thought out. Your plan is unenforceable and will only create confusion and problems. Muir Beach is a dog walking destination and people come with the intent to let their dogs run off leash. Enforcing an on-leash rule will never happen and if NPS rangers actually show up at the beach to write tickets they'd be far better off writing tickets on Muir Woods road for parking.

---

Honestly, it seem the NPS is intent on being a terrible neighbor these days.

**Correspondence:** Dear National Park Steward,

My name is Fred Andrews and I am a retired science curriculum developer for PBS's NOVA series and a consultant for MCET (Massachusetts Corporation for Educational Communication) as well as an author of many environmental and biological books including, "Backyard Biology", "Tracking Dinosaurs", "Zoo Sleuth" and "Plato's Pond", I find your lengthy document (The environmental impact statement downloaded from this website, that among other policies, bans dogs from the majority of Ocean beach in San Francisco) to be short of any scientific basis and long on opinion and politics. This is not be said that in an urban environment such as Ocean Beach in the GGNRA that politics and opinion should not have a significant role in land management. Indeed they should! I just want to state the obvious that dogs and their owners have contributed no more or less to the destruction of a pristine habitat that is to be expected in an urban environment.

In a nut shell dogs and there owners have become the scapegoat for your policy and decision making and that banning them from Ocean Beach will have little to no beneficial impact to the snowy plover or other wildlife in this habitat. It saddens me that in order to appease general opinion of the few and the misguided, I am speaking of the fact-less recommendations of institutions that I am shamefully a member of-namely the Sierra Club and Audubon Society, that dogs are incorrectly perceived as a threat to the well-being of the snowy plover. Indeed there has never been a study done to see if there is a direct impact between dogs the behavior of the snowy plover.

It should be noted that as people making decisions, common sense should be used when creating laws that affect habitat. It is obvious that dogs, ranger trucks, human children, surfers, as well as little old ladies with large pocket books who hate dogs, all contribute to the stress of the snowy plover. They do not however prevent the snowy plover from inhabiting the dunes and upper beach areas of Ocean Beach. Indeed there has been little research in finding out why snowy plovers would choose to use urban areas as habitat when the majority shoreline in their range is much more pristine!

I wish your environmental impact statement would address the real issues, which are how the public perceives dogs in parks, the political support of environmental groups and institutions and actual unbiassed "third party" studies. Once this is achieved then we can have a real debate based on the needs of maintaining a park in an urban setting and meeting the needs of all its biological inhabitants be it ranger, kite flyer, or dog.

Sincerely,  
Fred Andrews

**Correspondence:** I have been a San Francisco resident since 1976 and a Golden Retriever owner since 1982. All three of my dogs have loved Ocean Beach, Crissy Field and Fort Funston. I have many memorable experiences there and these areas are part of what makes living in San Francisco so special. Golden Retrievers love the ocean and these places are the only places that I can take them and let them run off-leash to get the proper exercise they need.

As a dog owner I am more than just a dog lover. I am a dues-paying member of the National Parks and an environmentalist with membership in the Sierra Club, Audubon, the Marine Mammal Center and Greepeace, to name just a few. I take protecting nature quite seriously. I always clean my dog's mess and I always bring an extra bag to remove the beer bottles, fishing lines, plastic and even cigarette butts from the beach. I respect wild life and keep my dog far from mischief.

The Dog Management Plan should benefit people, dogs and the environment. Striking the balance between dog recreation and natural resource degradation is, of course, important. We all need to help make sure that sensitive habitats or species are not harmed. At the same time, we need to preserve access to these federal lands for diverse constituents, including responsible dog guardians and their pets, so that everyone can enjoy them.

I credit my time with my dogs out in the great outdoors that has made me the environmental activist that I am today. To walk along the beach with my dogs and watch the pelicans fly by in formation and the seals, sea lions and porpoises in the bay is a spiritual thing for me. To see from a distance the white egrets and blue herons hunt by the edge of the preserve along Crissy Field takes my worries away.

As a person who has lived with HIV for thirty-five years and who has hearing loss - my dogs have been as vital a necessity for my well being as these special places are. They go hand in hand. I can't imagine one without the other. Please don't take away this experience. Life would be a lot more difficult for me and my dogs without access to these places.

**Affiliation:****Received:** Nov,02,2013 18:30:58**Correspondence Type:** Web Form**Correspondence:** Sirs:

We have read through the latest draft Dog Management Plan with a particular focus on Crissy Field. We have been and remain frequent users of Crissy Field for the eleven years we have lived as near neighbors. We are strong supporters of the GGNP Conservancy via membership in the William Kent Society. We took our labrador to Crissy Field for exercise off-leash for most of the years, and while he has passed we still interact with and observe many of the other dog owners. We strongly believe that Alternative A "No Action: Continue Existing Dog Management Policy" is the best alternative for giving the dogs much need running room off leash while not interfering with other users and meeting environmental needs. If there are irresponsible dog owners who pose issues with unruly dogs off leash or failure to pick up waste, these few irresponsible owners and dog walkers can be policed. Restricting dogs to leash-only at Crissy Field is unfair to the very large number of dog owners who use the park responsibly. As an aside, we have experienced more issues with irresponsible non-pet owners at Crissy Field (e.g., noisy, throwing footballs or frisbees that hit people etc. ) than we have with any dog owners.

Park Management should not feel that a change to policy is needed to somehow meet the balanced interest of all parties. All parties can co-habitate and safely use Crissy Field with minor changes to bad behavior of a few offenders. Do not penalize all of the responsible dog owners and their four-legged family members by imposing such a restrictive leash-only policy along most of the waterfront. Please reconsider and go back to Alternative A rather than choosing Alternative F or another restrictive dog-use alternative.

Respectively Yours,  
Michael & Miriam Burnside

United States of America**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Nov,02,2013 18:49:27**Correspondence Type:** Web Form**Correspondence:** Ft Funston and Chrissy Field,

The new plan does not go far enough to allow dogs off leash at either location.

I am old enough to remember when this area was added to the GGNRA and I only voted for it under the conditions stated, that there would be no change of use.

I do not own a dog, I have never owned one. But I can remember when these areas were unsafe for women, Ft Funston at any time. It was the dog walkers who came and took back this park area from the bums and drug dealers, not the GGNRA police or park rangers. It has been the dog walkers who have kept this a safe place for me to walk. There is so much space in the GGNRA - I ask that you do the right thing and give the off leash dog walkers more land. There are more dogs than children in San Francisco. For many people these dogs are their family who keep them active and therefore mentally and physically healthy. Ideally, all GGNRA would be dog friendly. If you can allow guns and ATVs in Federal parks, dogs should be able to walk off leash.

This document to date is extremely disappointing.

Bye the way, why you would ask someone from the other side of the country to weigh in on a local issue . . . well . . I am going to remember this for the future.

**Correspondence:** I am in favor of Alternative A but with permits for commercial dog walkers.

Mostly, I think dogs should be allowed off leash if under voice control. Dogs need to run and they should have some space on trails, so that hikers can have dogs with them. There are already few trails which allow dogs at all and even fewer allow off leash.

Keep at least those trails that are open to dogs open to off leash.

Need some trails, including loops, that allow for off leash.

**Correspondence:** GGNRA: Please stop ignoring the people of San Francisco, who want to use the park lands to walk their dogs. This is all of our land. We all pay taxes, many of us have lived here for many decades, and we want to live our lives freely and enjoy the beautiful way of life San Francisco has to offer. And we want to do that with our dogs! Most people love dogs, and don't mind them walking on beach lands. Please don't trample the rights of so many good people with your rigid codes, and devastate the way of life of so many dog walkers.

Thank you,  
Dina Wilson

**Correspondence:** You will best serve the community by continuing to allow off leash dog recreation at all presently available areas at Fort Funston. Fort Funston is, and has been the pre eminent dog exercise area in the Bay Area. The dominant plant species there is Iceplant, and the dominant soil there is sand. The wildlife is birds, and none of these three is damaged or disturbed by off leash dog activities. There are closed sections already in place which are in the main observed by all dog owners. People and dogs need a place where dogs run free. Close every other park to off leash dogs, but leave Fort Funston as it is. Regarding professional dog walkers, limit them to five dogs, and perhaps license them with an appropriate fee to maintain adherence.

**Correspondence:** I urge you to adopt Alternative A for Fort Funston. Off leash recreation for dogs is essential for San Franciscan's city living. The alternatives are not reasonable, as dogs are not allowed in state beaches, and most other city parks are very small, so Fort Funston is one of the last voice control recreational areas left. It is also not a pristine natural park and should not be treated by the same rules as other national parks. Thank you.

**Correspondence:** I've reviewed all the proposed mapping for Marin, San Francisco and San Mateo Counties. I think a better idea for larger areas that have been historically off-leash would be: Instead of completely shutting down off-leash for places like Fort Funston, Land's End and Ocean Beach there be off-leash hours. For example mornings and evenings. I understand the concern at Land's End during high tourist hours (10-5) but not during low tourist hours (5am-10am & 5pm-8pm/closing) Also I think the

dogs in the early morning help to ward off the coyotes in some of these larger areas. It would be a shame if one of our tourists were mauled by one. I have nearly been and if my dog had not been off-leash I would have been. There is a balance to dogs and people and a need for some restrictions in some areas but the changes need a little more flexibility for the larger existing off leash zones. I think it would serve our community better if hours of off-leash dog use were imposed rather than a complete ban of off-leash use.

**Correspondence:** Hello,  
Good Day to You!

I love NPS! I love enjoying our beautiful country! I am writing to oppose the Dog Management plan proposed for Ocean Beach, Fort Funston, Crissy Field, etc. I bring my dog to the beach often and he had never caused any problems. He has never caught a bird, or dug up any bird eggs. He is very well behaved. Please allow us to continue to bring our dog to the beach and other areas.

Thank You,  
Zach

**Correspondence:** I have not reviewed all of the draft plan but I do not believe that dogs should be allowed in national and state parks. I think wildlife needs to be protected since humans have encroached on so much of their habitat already. I hike to see wildlife and to feel good knowing that the animals are protected in their environment. I do not enjoy seeing dogs when I hike. Dogs are domesticated animals who still have predator instincts and frighten away wildlife. The national and state parks have tried to compromise by only having certain areas open to dogs or dogs on leash but so many dog owners do not obey the rules. I hike a lot in areas where dogs are not allowed at all and I often see dogs off leash. I hike in areas where dogs are allowed but need to be leashed and most dogs are off leash. Perhaps the park service needs to spend more time educating people why lots of dogs are not good for wildlife. Thank you.

**Correspondence:** My wife and I have lived in San Francisco since 1984. We own a small dog and our greatest enjoyment is to visit our local parks. The parks we visit most frequently are: Fort Funston, Ocean Beach, Crissy Field and Park Presidio. We are avid walkers and what makes visiting these parks such a

---

wonderful experience is that we can let our dog off leash in many areas. We believe that a healthy dog needs to run free at times. Running on the beach, fetching the ball and meeting the occasional other dog is great fun for both us and our pet.

We have seen great improvements in our parks since we moved here 30 years ago. In all those years we have never experienced a single incident where free roaming dogs interfered with wild life or harmed another visitor.

The vast majority of dog owners are very respectful to our wonderful parkland. In fact - very often the only people we see on walks on Ocean Beach are dog owners.

After studying the maps and reading about the proposed changes to off and on-leash dog access to our parks in the news, we are dismayed that the Park Service is planning to remove so many places that have been open to the enjoyment of dogs and their owners for so many years. I think these changes are unnecessary. They will not benefit wild life or improve the park experience. Instead they will make the park inaccessible to many of its greatest supporters and most frequent visitors.

**Correspondence:** I live on Lincoln, 5 blocks from the ocean. I would be very sad if I could no longer walk my dog on leash on the beach until stairway 20. I completely agree that they should be on leash in that place, but not having that option leaves my traditional Sunday walks with my husband and dog to be VERY short. Why can't they just be on leash? Alternative E for Ocean beach is perfect!

I don't use Baker Beach as often, but again, I believe it should be open to on-leash all through the beach such as alternative C.

Finally, the Crissy Field alternative where you divide the field into ROLA and on-leash is going to be VERY hard to control. Will there be a fence to delineate the area? I completely agree that East Beach should now be on-leash since so many families with kids come there in nice weather, but the field should not be split in half. I believe that alternative E is fair for everyone.

How about giving trusted citizens a 'license' to patrol the areas. Make it a test or something and give them the power to cite people (not ticket, but register a citation) who do not clean up after or keep their dogs on leash in designated areas? Most of us dog owners would be happy to make sure others do their duty to keep things more free for all of us. I carry extra bags at all times to give to people when they don't clean up after their dogs. The extra policing could make a huge difference.

**Correspondence:** The new policy drastically changes long standing dog policy, severely limiting off leash access. If you visit these parks, you will understand how popular they are with the public.

These are urban parks, enjoyed by the current public.

Your repeated attempts to change these popular parks is creating thousands of enemies of the park service. Dog people tend to like their park rangers, and I wonder if you realize the damage you are doing to public support of parks.

I challenge you to place this on a ballot. Let the people decide.

**Correspondence:** This past month my boyfriends father was diagnosed with metastatic cancer. He is currently residing and receiving treatment up in San Francisco. This past weekend we had the opportunity to drive from LA and spend time with him.

While we were there we visited, Fort Funston and Crissy fields with our dogs. I cannot tell you what an impact that made for us in this time of emotional distress. I cannot imagine not being able to allow our dogs that freedom to enjoy theses open spaces, off leash as we did. Truly without these options we could not have spent the weekend up in your great city as we would not have had the facilities to allow our dogs to run and get the exercise they needed.

I strongly urge you to reconsider the restrictions you plan on placing for off leash dogs in these national park areas as this is a draw for tourist that do travel with their dogs.

Sincerely,  
Natalie R. Remacle RN, MSN, CCRN

**Correspondence:** Your plan for Oakwood Valley is completely wrong. I have walked my dogs there 3 times a week or more for 10 years. It is one of the very few areas where dogs can run off leash. The sensitive wildlife areas are in the hills and the trail is in the valley. How is this going to be enforced? Are you going to waste the valuable time of our few park rangers by having them skulk on the trail, looking for offenders? I do support requiring all dog owners to carry leashes and poop bags.

**Correspondence:** I am all FOR restricting dogs at both Muir Beach and the Oak Valley Trail!!! I like dogs, but they aren't being adequately supervised by their owners. I often walk the Oak Valley trail and owners with their dogs on a leash are usually courteous and bring their dogs to heel as we pass. Dog owners with their dogs off leash are a different story. They let their dogs run around out of their view and are not aware of what their dogs do. Even when in their view, these dogs run around in the creeks and chase animals through the under brush and accost others on the trails, often jumping up on people. I was at Muir Beach and watched while dog after dog ran through the protected creek habitat restoral area in full view of their owners! When I pointed out the signs, one owner haughtily pointed to a park ranger who was standing near by. When I told her, she was so intimidated by the hostility of the owners that she didn't dare do her duty and speak to them! When one of us has brought these issues to the attention of an owner (when one could be found) they are hostile and confrontative, almost leading to a fight! It spoils the enjoyment of the area. This problem has gotten so bad that we, who live here in the area, have had to give up on trying to walk these trails. One of the biggest problems is the lack of care by the owners when it comes to picking up after their dogs. I see dog shit all over the place and plenty of baggies of poop that the owners don't feel like taking out wind up all along the trail and often are thrown into the creek. We have to constantly watch our step, not the scenery. Dog owners think that the poop is biodegradable, but forget that their animals carry diseases and parasites, and that any medications their pets are taking end up in the creek where they are toxic to the fish and other aquatic dwellers. It isn't the fault of the dogs, but the owners are behaving badly and it takes all the pleasure out of using the areas by those of us who don't want to have to deal with their dogs and their problems. The fact that dogs are so restricted in other areas (guess why?) means that areas which do allow dogs off leash are getting a concentration of dogs from SF and other places. When the rangers are too intimidated to even speak up, then changing the rules to protect the habitats and enjoyment these precious beautiful resources by everybody, is the only thing left to do. I can't wait to be able to go out on the Oak Valley trail and not see endless piles of dog shit and baggies everywhere! It will be a relief not have to cringe every time I hear a dog coming, not knowing if it will be a pleasant or unpleasant encounter. Thanks for taking on this issue! Dog owners have become organized around their "babies" and are holding the rest of us hostage so they can monopolize these public places. Nature simply can't stand up to this onslaught! Say "NO!" to these bullies!

**Correspondence:** I am stunned that the park service is trying to shut this area down for dogs. This is one of the few safe places to walk a dog off leash and I have been doing so for 10 years and have NEVER witnessed or heard of a problem with any dogs on the trail. I cant imagine not having this as a place to bring my family AND exercise my dog...this trail is used more by people walking their dogs than any other trail I know. I read another comments, which I have included below and I firmly agree with her sentiments.

Here's what I wrote:

Your proposed policies are in contradiction to the conclusions you draw in the study. To whit, you conclude that dogs have minimal impact on compacted trails. On the south loop of the Oakwood Valley Trail, where the GGNRA plans to mitigate dogs off-leash, the park service built a compacted trail (built by the Conservation Corps.) Also on the Oakwood Valley Trail, your policy indicates that you want to protect the Mission Blue Butterfly habitat. No lupine grows on either the north or south side of the loop.

I have been heavily involved in the restoration of Oakwood Valley and am well aware of the habitat. I

know the valley trails intimately and have walked each of my dogs there for 35 years. This is one of the only areas to walk dogs off-leash. Your proposals are out of sync with the needs of the population. My experience is that about 85% of the people on the trails are walking with their own dogs, about 15% are without dogs. The only aggressive dog incident I know about was the falsely reported one submitted by a ranger the last time the GGNRA tried to shut down the trail.

Here are several alternative solutions to closing trails and beaches. They are less expensive solutions for land management and people management:

1. Require and enforce people to CARRY leashes for their dogs. Monitor for voice control.
2. Require and enforce people to clean up after their dogs.
3. Limit professional dog walkers to three or four dogs per outing in all areas.
4. Add a fee onto dog licensure to pay for these services.
5. Use ticketing fees to deter irresponsible behavior. Put fees towards management.
6. Establish a complaint line.

**Correspondence:** I am a dog owner, and previously worked as a trainer of guide dogs for the blind. I am also a home owner in SF, a tax payer, and a frequent user of GGNRA spaces where I walk with my two obedience-trained dogs, for my own exercise and enjoyment as well as theirs.

I am particularly interested in the changes proposed for Sutro Park and Ocean Beach, as these are my neighborhood spaces.

I suggest that Sutro Park and Ocean Beach be entirely open to dog owners walking their own dogs, but restricted to on-leash only, everywhere and all year long. This would include the stretch of Ocean Beach currently protected for snowy plovers, since leashed dogs can be controlled at all times. This would also include the current off-leash areas of Ocean Beach, where I suggest this be changed to on-leash only with the following exception:

In the non-protected areas of Ocean Beach, and in Sutro Park, I suggest that dogs should be allowed off-leash IF (and only if) their owner can show physical evidence (ie the test certificate) of that dog having passed the AKC Canine Good Citizen Test, when asked by any park police officer. Here is a link describing this well-established test: [http://www.akc.org/events/cgc/training\\_testing.cfm](http://www.akc.org/events/cgc/training_testing.cfm)

The AKC Canine Good Citizen Test is readily available to SF dog owners through the SFSPCA training programs as well as through private AKC certified dog trainers. This is the test used to certify Therapy Dogs (one of my dogs serves in the VA hospital). Passing the AKC Canine Good Citizen Test requires significant effort by the dog owner, and demonstrates good temperment, as well as obedience training, of their dog. Here is a link to the SFSPCA test page: <http://www.sfspca.org/programs-services/dog-training/classes/canine-good-citizen>

I am strongly against allowing all dogs to go off-leash on Ocean Beach, or Sutro Park, as I have had several bad encounters with aggressive, uncontrolled dogs in those areas. But I also feel that responsible dog owners who have spent significant time and effort to train their pets, resulting in their dog passing the AKC Canine Good Citizen Test, should not be penalized because of irresponsible owners with unruly, untrained dogs.

The Canine Good Citizen certificate should be a requirement for ALL off-leash dogs, everywhere - - and would be just as easy to verify as checking to see if that dog has a current dog license; just ask the owner to show a current test certificate - - we responsible owners would be happy to do this, and to help inform the public about this change.

I am also not in favor of off-leash dog walking anywhere in the GGNRA for professional dog walkers with the current limit of 8 dogs; I strongly believe that no one can control that many dogs at a time. And I don't think dog owners, walking their own 1 or 2 pets, should be penalized for the excessive use of GGNRA spaces by professional dog walkers.

**Correspondence:** I support the preferred alternative in the supplemental EIS. I would prefer more restrictions on dog access to Chrissy Field. It is a sensitive area and already over impacted by human beings. I feel that the dog owner community is uncompromising and unreasonable and many don't use the existing areas in city parks that are designated for dogs. Dogs should not be allowed in GGNRA - they are not allowed in other national parks. That said, I support the preferred alternative because I believe that the NPS has acted in good faith, bent over backwards to accommodate the dog community and I'd like to see this issue come to closure.

While you request comments regarding "changes" from the earlier plan, my comment is short, simple and likely one that is shared by the thousands who commented previously. In fact, the reason it became necessary to revise your ridiculous plan was due to the avalanche of negative comments you received and adverse opinion of it. I predict that the revised plan will fail for the following reasons: You don't have the enforcement ability to gain compliance, the majority (albeit a narrow one) both opposes the plan, most important and IT'S OUR PARK TOO, so we will overcome a tyrannical effort by a top heavy, bureaucratic, inefficient agency such as yours to impose a minority view to ban dogs from GGNRA

A few years back, I received a citation from one of your rangers for having my dog off leash on the Oak Valley Trail in southern Marin county. I received a notice to pay a \$50 fine, which I did. A few months later, I was walking my dog one very late afternoon in winter (again off leash) on the same trail. A ranger was hiding behind a tree and confronted me over the infraction of walking my dog in near darkness at a time when no one else was on the trail and gave me another citation.

I never received an opportunity to merely pay a fine for this but was noticed that an appearance in federal court in SF was REQUIRED. I appeared at the appointed time to find 9 others waiting to be admitted to the courtroom. It turns out that all 9 were there for the same offense. I assumed that a second offense required an appearance but after I was informed that all defendants were obligated to meet with a federal public defender before speaking with a magistrate, I began to get nervous. When my turn came to talk to the lawyer ostensibly there to defend me, I asked what the penalty is for a second offense for walking my dog, off leash in the GGNRA? He replied that he didn't think there was a "graduated" level of penalty.. he thought it was a \$50 fine and that was it. After reviewing the CFR (Code of Federal Regulations) a hardback tome of some 10000 pages, he determined that in fact, it is a straight \$50 for any number of multiple offenses. I said, so, in essence, if I want to walk my dog anywhere in any national park/rec area, it costs \$50, an amount less than what it costs to park my car in SF for the day. He suggested that I not mention that attitude to the judge.

Well, here in Southern Marin, we understand that there is a price to be paid for some things. I don't know how many of my fellow dog lovers/walkers know the penalty provisions for walking/running a dog off leash in GGNRA, but I intend to work diligently to educate them. It is my guess that many of them will feel as I do that \$50 is a small price to pay (on the occasions of being caught) for continuing a 25 year practice. And if I am really successful, I expect that I might just overrun your enforcement capacity, overload the court and ultimately overturn this ridiculous example of bureaucracy gone wild, with the sheer volume of like minded people who abhor idiocy and tyranny!

<b>Correspondence:</b>	Please do not restrict the few places left to walk dogs off leash.				

Your proposed policies are in contradiction to the conclusions you draw in the study. To whit, you conclude that dogs have minimal impact on compacted trails. On the south loop of the Oakwood Valley Trail, where the GGNRA plans to mitigate dogs off-leash, the park service built a compacted trail (built by the Conservation Corps.) Also on the Oakwood Valley Trail, your policy indicates that you want to protect the Mission Blue Butterfly habitat. No lupine grows on either the north or south side of the loop.

This is one of the only areas to walk dogs off-leash. Your proposals are out of sync with the needs of the population. My experience is that about 85% o the people on the trails are walking with their own dogs, about 15% ae without dogs.

Here are several alternative solutions to closing trails and beaches. They are less expensive solutions for land management and people management:

1. Require and enforce people to CARRY leashes for their dogs. Monitor for voice control.
2. Require and enforce people to clean up after their dogs.
3. Limit professional dog walkers to three or four dogs per outing in all areas.
4. Add a fee onto dog licensure to pay for these services.
5. Use ticketing fees to deter irresponsible behavior. Put fees towards management.
6. Establish a complaint line.

Thank you.

**Correspondence:** I understand the need for safety and environmental health. I also know that the more people who can connect with a space, the more people will support it. We love that we can take our dogs off leash to Fort Funston. I greatly hope that that will continue. We also love hiking Sweeny Ridge from Sneath Road with our dogs, even though they need to be on leash. We wish that they were allowed off leash, since there is no danger of them disappearing away from the trail, (as it is bordered sharply.) We really rely on that hike as a way to replenish ourselves mentally and physically, with our dogs. I would be so upset if dogs were no longer allowed on that trail, leash or no leash. There are just not many places where one can hike in the San Francisco area without cars.

Thank you,

Kate

**Correspondence:** I'm a responsible dog owner. I pick up after my dog, keep her on leash when not in an off leash play area. I also own a home and pay A LOT in property taxes. I pay fees towards teachers associations and don't even have children. NOW YOU WANT TO TAKE AWAY WHERE I CAN WALK MY DOG?

I am writing to urge you to do everything you can to stop the Golden Gate National Recreation Area from implementing its new dog management plan. This plan will cut where people can walk off- and on-leash by 90% compared with where people can walk with dogs now. It is going to create a huge impact on the Bay Area, which we simply cant afford.

I had hoped that this new plan would be significantly different from the original GGNRA dog management plan, because thousands of people-the overwhelming majority-submitted substantive comments in opposition to the plan. But the GGNRA did not make significant changes. They ignored what people want, and are moving forward with an extremely unpopular plan no matter what we say.

The GGNRA was created in 1972 for the maintenance of needed recreational open space, and to expand to the maximum extent possible the outdoor recreational opportunities available to the region. Thats why its designated as a National Recreation Area, not a National Park. With the new dog management plan, the GGNRA is renegeing on its promises to preserve and protect recreational access to the GGNRA.

Don't even get me started about the amount of horse poop that's left along the running trails. I get police

---

officers on horses help protect us but there are many other non-police horses that roam our trails and they don't appear to be under any mandate that they clean up after themselves. And the trash that people leave ALL OVER THE CITY and PARKS is a real issue, hazard to our health and unsightly mess.

There is no credible reason why people with dogs are not allowed to have adequate and reasonable space to walk their dogs in the vast 80,000 acres that comprise the GGNRA. Please take action to stop the GGNRA from imposing this radical plan on the San Francisco Bay Area.

Thank you,  
Rachel Frederick

**Correspondence:** Hello there!

I love dogs so much!!!

But, I do feel that there needs to be some sort of 'accountability' for dog walkers who walk dogs off-leash.

For instance, I work as the teacher on special assignment with the SFUSD Environmental Science Center at Fort Funston.

Our site at Fort Funston is beloved, and has served SFUSD for ~40 years. The site works well to provide SFUSD's underserved population a no-cost overnight to experience the joys of nature.

During my first year as TSA for this site, it has been interesting to see the massive dog walking population at the site. When I am not with the students, I often go up to chat, and pet the dogs, and truly appreciate that there is a majestic space where dogs can get their mental and physical stimulation in 'play dates' with other dogs.

yet, I do believe that these spaces are shared space, and there needs to be a heightened sense of responsibility with some of the dog walkers. the students we work with often see countless plastic dog poop bags littering the trails, and dogs trampling through the native restored areas, which is one of the primary areas we work with our students.

while I do value off leash areas, I do see that these areas are not taken care of and respected, and dog owners need to be accountable to clean up after themselves. I don't know what the solution is to this, but

just wanted to provide commentary on this.

Thank you for the open forum.

**Correspondence:** I walk my dog on Oak Valley Trail a few times a week. In my experience 80% of the people on the trail are walking dogs. I have only once seen a dog that I felt was not under voice control and well behaved.  
Most people pick up after their dogs and ensure they are well behaved.  
I walk early in the morning and late in the evening. I would not feel safe doing that without my dog.

I also enjoy weekends on Muir Beach.

Please don't disenfranchise all of us. We love our walks and dogs. Won't walk without my dog

Karen

**Correspondence:** It is important to allow dogs on as many trails as possible. I understand that occasionally there is a need for dogs to be on leash on some trails and that is alright as dogs can still get their exercise while the owners are enjoying their parks. Sweeney Ridge is one of those trails we especially enjoy using with our dogs. We meet many people on the trail with their dogs who all love enjoying the trail with their dogs. If our dogs can't be on the trail, it means a large number of us will not be using the trails.

There also needs to be some trails that dogs can be off-leash. It is important for dogs to learn to walk with their owners under voice command.

---

Please continue to allow dogs on Sweeney Ridge and as a general policy ensure some trails are available where dogs can be off-leash.

Many thanks for your consideration,

David Kiachko

**Correspondence:** Part of the reason I moved to Mill Valley and Marin was to be closer to the beauty and trails, and those that allowed me to hike and run with my dog for both of our exercise. I run trails for hours and hours weekly and although appreciate the safe surroundings of Marin, also depend on my dog being an added security measure should something happen to me while out on the trails alone. (remember story of woman in east bay assaulted and raped my a man on the trails while she was running.) I do acknowledge that it is the responsibility of all dog owners to keep their pets under control as well as only allow those that do not risk interference for others but that is just the same as any dog walking on leash or at a dog park. The majority of dog owners are responsible and those dogs under voice control. Please do not ruin our enjoyment due to a few dog owners and look for alternatives to monitor and control them, not the majority.

**Correspondence:** I continue to horrified by the draconian laws enacted against pet owners. I cannot enjoy ANY national park with my golden retriever nationwide. That is incredibly unfair, and disproportionately burdensome for taxpayers. We should get a tax credit for our inability to enjoy national resources which we fund.

But more importantly, simply cannot enjoy our "America's Best Idea" when I travel. There's no chance I will leave my family me in a kennel, or locked in the car.

Until I have the same access as others, I will not be voting for park funding.

**Correspondence:** I see that there has been one violation of the existing dog rules in Oakwood Valley and it looks like that violation happened on a paved road in Tennessee Valley, so I'm guessing that might

---

have been the road to Tennessee Beach, not near the Oakwood Trail.

The preferred option would put dogs on leash on the Oakwood fire road / trail. I walk this loop daily with my dog, at different times of the day. What I observe is that most of the people who use this trail, especially during the week, are people with off-leash dogs. The dogs stay on the road with their owners, with few exceptions. It is one of the few places where people can walk freely with their dogs and it is greatly appreciated. It has become a community. A community of people who love the valley and love their dogs.

I see that the two environmental reasons for restricting dogs are protecting the mission blue butterfly and the spotted owl.

I have often seen mission blue butterflies in my back yard in Tam Valley - a back yard that has a dog. They seem to like the elfin thyme growing in the yard.

Please let us continue walking freely with our dogs on this short loop of land on the edge of GGNRA.

Best regards,  
Barbara Robertson

<b>Correspondence:</b>	While I understand that there are many more dog owners than ever in the history of the park (as there are more children, park users, people etc) please do not restrict or eliminate off leash dog areas as much as this plan includes. It is possible to encourage responsible stewardship of our dogs- on & off leash- and eliminating off leash areas will only lead to more "incidents" as those off-leash dog-owners are marginalized into smaller & smaller areas.				

The park is huge and if you gave over even a small area of the park to the percentage of population dog-owners as an off leash area, it would be amazing.

I am not asking for THAT much, but a lot more than you are offering.

Thank you for your consideration.

<b>Correspondence:</b>	As far as I can see reading the proposed documentation for the NPS Dog Plan, the NPS has ignored the majority opinion in resisting the curtailment of people walking their dogs and enjoying a healthy activity. The NPS can't have failed to grasp, after the last round of scoping, that the majority of people want to be able to walk their dogs off leash in more areas than the NPS currently				

---

propose. Further this latest round of recommended legislation is even more restrictive than the NPS's initial scope. Why?

NPS evidence is at best unsound and uses unproven statistics and the NPS is guilty of collusion with a very privileged few organizations.

What is the point of spending the government's money to seek opinion if that opinion is to be utterly ignored? What is the point of seeking our opinion a second and third time to only ignore the majority will?

The NPS actively encourages the introduction of more and more people into fragile areas of the ecosystem the result of which is far more destructive than the much fewer people who want to walk their dogs and enjoy an hour of recreation.

Muir Beach and Stinson Beach is a disaster of debris and garbage after every weekend: bottles, cans, used diapers, detritus of fires never adequately extinguished, overflowing trash receptacles even when people bother to use them, trashing of provided bathrooms, on and on ad infinitum. I live here and I see it every weekend and holiday.

I have lost all faith in this process of "scoping and public comment". It's a cynical exercise in PR and a panacea to those of us who believed we might have a voice. It seems that the NPS made up their mind at the beginning as to how this plan was to take shape and have moved through the motions so that they can say they did. ... You're not listening to us and you never intended to. The notion of Park Conservancy is a joke.

**Correspondence:** Please read this. I don't only have comments but I also have a suggestion that might work for everybody.

I feel like the park service is spending a lot of money to promote more people going to places like Muir Beach and Tennessee Valley beach by creating toilets, picnic areas and extended parking. We live in a world with an ever extending population putting more and more pressure on each other's needs. We cannot just alleviate this problem by excluding one group from certain areas.

Dogs don't create problems. People who don't take responsibility for the environment they live in do and it doesn't matter if those people are mothers with children, people in cars, runners or mountain bikers. I don't feel you can restrict just one group of people.

I know there are people out there that don't train their dogs and there are people like me that are working very hard to train their dog and I'm very proud of my well behaved friend.

I have a suggestion. I think it might be an interesting idea to have people after 1 year of owning a dog, go to the humane society to have their dog evaluated. If it is well trained it will receive an -A- badge, If not a -B- or a -C-. Dogs with an -A- badge will have more freedom than dogs with a C badge. An -A- badge might mean off leash while -C- badge means on-leash and B off leash in restricted areas. The dog can be re-evaluated on a yearly basis and upgrade their badge if training is successful. If a dog creates problems the badge can also be downgraded.

I think this would be a very fair way of dealing with dog issues.

Another note I would like to make is that if you ban dogs in certain areas you will end up with a

---

concentration of dogs in other areas and I can only foresee problems with that.

I do see the problem of the pressure our environment is under but I don't see how you can argue that this problem is created by dogs. I think this problem is being created by people.

I hope you really read our comments but I have to say that my feeling is that the NPS has already made up their minds and that this is just an exercise of false democracy.

**Correspondence:** I love walking my dogs on the beach in Muir Woods. We try to be clean and respectful and enjoy such a wonderful place. Often, in winter and on week days ,we are there with only 2 or 3 other dog owners. There just are not enough off leash areas to take you dogs, (and with Rodeo Beach having such fierce undertows, I am terrified when walking there). The beach use during summer's 3 busy months keep me away at prime time (hot days and week ends) without regulations or limitations. I would be very upset to have the off leash area limited or eliminated. I am not happy that you have proposed this. I worked for years to be able to retire here and walk my dog at the beach. Many places would have been easier and I could have retired earlier, but I loved going to the coast for a long walk at Muir Beach. Pleasedon't ruin my dreams.

**Correspondence:** I know at this point I'm supposed to say something measured, calm, and respectful. But here's how I really feel:

I am completely disgusted at the unrelenting, ceaseless attack by the National Park Service to vastly infringe on the ability of pet owners like myself to enjoy our public lands with our pets. The truth is that I and millions of my fellow citizens will rarely if ever take advantage of our public lands if this unprecedented assault on our rights to enjoy them is allowed to go through. I, like the vast majority of dog owners, carefully pick up after our pets (and others when the occasional owner irresponsibly or careless fails to) and my dog is always under voice command. The whole explanation that dogs need to be banned or leashed to save some birds is a ridiculous canard. Over the last twenty years I've owned two, very active Australian Shepherds, and not once has either of them ever caught a bird. Perhaps, this has been overlooked, but you might note that they have wings and can fly. Catching a bird is unquestionably a very rare event that I cannot ever recall having seen. I would further note that these precious birds whose wellbeing evidently trumps the interest of every other living being have rest of the California coast enjoy, where days if not weeks no doubt go by between their being disturbed by a human, much less a dog.

Muir Beach and the rest of the areas under consideration for these draconian measures are designated recreational areas. They are literally within the very large San Francisco metropolitan area where, despite the Park Service's fervent wishes, human beings would like to enjoy them with their families, including their pets. When this land was transferred to the Federal government under the mistaken belief that it could be trusted to hold it for purposes it was given, recreational use, off-leash dog walking was a long-

established practice that was expected to continue.

This outrageous attempt to trample our rights on our land (yes, they are our lands, not the private reserves of the Park Service), has caused me and a great number of people to lose respect for that federal agency. Previously, I thought well of their efforts to preserve our natural resources. Now, I and many others look at them with disdain; they are the officious, obnoxious, heavy hand of the federal government, solving problems that don't exist and destroying little-by-little, but unrelentingly (Dakes Bay Oyster Company anyone?) that which made this region such a special place to live. I am hardly the only one disgusted. The backlash in people's attitudes toward this oppressive agency is reaching a tipping point.

<b>Correspondence:</b>	A tired dog is a good dog.				

---

A dog on leash never gets anywhere close to the amount of exercise that he does off leash. On leash, dogs are restricted, less stimulated, they grow frustrated and angry, energy builds up and has

---

nowhere to be released. Their behavior, in turn, can become destructive, reactive, impulsive and unpredictable.

A wired dog is a not so good dog.

To quote and reiterate comments I have read and profoundly agree with...

"I oppose the draft foundational purpose and all management alternatives for park lands in Marin, San Francisco, and San Mateo counties. The goal of the Plan should be to increase, not decrease, recreational use. These lands are part of local communities where millions of people should be actively encouraged to continue enjoying regular relaxation, exercise, and inspiration that make it one of the most valued and visited lands in America.â€”â€”The GGNRA is not the equivalent of the vast Yosemite wilderness and should not be misrepresented as an idealized "backcountry". Neighborhood trails and beaches should not be managed to artificially exclude people so that a selected few have "solitary" and narrowly defined recreational experiences and expect others to drive farther away and increase crowding in a few small 'diverse opportunity' areas."

My daily off-leash walks with my dog, at Land's End and Fort Funston are my exercise, my therapy, my church, my meditation, my vitamins. I am enthralled by the nature I have the privilege to immerse myself in. From the plethora of flora, to the sparkling black sand and wondrous birds. Never knowing what fascinating creatures the receding tides will reveal. The hawks I marvel at through my binoculars and the thrill of spotting a dolphin pod or playful sea lions sunning themselves in the distant waves. I share these joys with my dog and with so many other people enjoying these extraordinary spaces.

I am a responsible dog owner. In areas where there are a lot of people and picnics and kids, I choose to put my dog on leash. And in areas that are open and sparse, he is free to explore, people calling to him, where he is happy to greet them with a friendly sniff, welcoming a friendly pat. I believe in caca karma, and often carry other people's pooh bags along with my own to the nearest trash can. I've seen other equally responsible dog owners do the same.

I have not, nor can I explore a large portion of the GGNRA parks because they are already closed to dogs. The whole point of being out walking in nature is to share it with my dog. Why would I leave him home and go walk myself?

The thought of our tax dollars paying a salary for someone to ticket me because I have chosen to live my life in an all-encompassingly healthy and balanced way, utterly astounds me.

Instead of going backwards to match other cities in their restrictions and limited thinking, I wish that the GGNRA would continue to be the trailblazer that SF has always been, to do things better. To do things that have for years, clearly proven that they work and to build upon that.

People are happy and healthy because their dogs are happy and healthy. I've read many biographies of people looking back on their lives recalling that some of their most treasured moments are the walks they shared with their dogs. Nothing more pure and simple than that.

With your new and severe restrictions to substantially fewer areas where dogs can be at all, and almost no areas where they can be off-leash, these areas will become overcrowded, worn and rundown. The increased tension of the gathering of a higher concentration of dogs in these limited spaces, having had substantially less exercise, can create conflicts and inevitably aggressive situations with grave repercussions.

I moved to SF a year and a half ago, amazed to discover that I landed in doggie paradise. A city and its

magnificent surroundings, that welcomed and celebrated dogs. A city that finally got it. That understood that if it treats its dog owning residents with respect, that they in turn would behave in no less a manner.

Dogs in large and small numbers pass each other on the streets, in the parks, on trails and on beaches, playfully, peacefully, and naturally. They've figured it out. They are social and socialized. A dog yanked back on his leash instills a sense of defenselessness which can immediately translate to aggressiveness. No leash, no problem.

We are incredibly lucky to live in magnificent Northern California. In all the places and cities I've lived, I have never met so many conscious, responsible, respectful and aware people who so greatly appreciate how blessed we are to be here. Please enable us to continue to celebrate that, in our freedoms, in our choices, in our cherishing and sharing of our beloved natural wonders, with our very best canine friends by our sides.

Sincerely,  
Jennifer Saxon

**Correspondence:** I am writing to support increased restrictions of off and on leash dog access in GGNRA, especially in the Ocean beach area. As a long time local resident, I am concerned that the interests of a narrow class of users ( dog owners) are being place above those of both wildlife and the greater public. As a long time local resident and beach user, a day at the beach virtually never passes when I do not witness off leash dogs harassing sea birds ( in restricted areas) while their owners refuse to control them, even when politely asked. Also the large number of dogs using the beach areas daily turn it into essentially a dog urinal, despite the fact that children, surfers, sunbathers, etc. should be entitled to a beach free of waste from domestic pets. Thank you for considering the interests of both wildlife and the greater public in supporting continued restrictions on dog usage in our National Recreation area.

**Correspondence:** As a former resident and frequent visitor to Marin and San Francisco counties, I want to express how much having leash free areas in the GGNRA for dogs contributed POSITIVELY to the quality of life for people and their dogs.

People benefit positively from dogs and dogs have a real psychological and physical need for open space and the ability to exercise without being on a leash; people also have this need! Dogs - and people - have an innate need to spend time in a natural setting, which the GGNRA provides.

The issues that NPS presents as problems with dogs in these areas is really an issue with a small minority

---

of badly-behaved dogs and their owners. These issues can be easily remedied by requiring those offending dogs to be on a leash, or barring those particular dogs from the areas. This could easily be accomplished by having citizens report to the NPS staff - as they do now - which dogs and their owners are causing the problems. The answer is NOT draconian over-reach by the NPS to cause the majority of dogs and dog owners (tax payers) be disallowed their rights to public recreational lands.

I am certain that responsible dog owners could actually help the NPS create a positive environment for the public.

**Correspondence:** Thank you for all of your hard work on this. It is clear that you are listening to varied groups and trying to balance a lot of factors.

If I'm understanding Alternative F, the NPS preferred alternative, I'm supportive of this proposal. I've been living in the city for 17 years, now have a wife and 2 kids (7 and 4) and frequently enjoy East Beach (and the far West beach). We have had numerous unfortunate encounters with dogs during our time visiting the beach. We are dog lovers and plan on getting one in the near future, but think it isn't fair to everyone to have dogs running around off leash. My kids have been knocked over, our food eaten, our toys urinated on (sorry to say) and had dogs tearing across our blanket and shaking off their water all over us. I think having East beach as dog-free (except of course for ADA dogs which should be able to go anywhere) will be welcomed and keep San Francisco family friendly.

I like that there is a designated place to run the dogs (central beach) which isn't as crowded.

I wasn't able to tell if the western beach (by Petite Baleen, etc.) would be dog-free (or dog-leashed), but think that would be beneficial as it is also a crowded family area.

Thanks for doing this.

Ron

**Correspondence:** SAVE OFF LEASH!

Off leash dog walking in GGRNA's off leash areas greatly increases me and my pooch's quality of life on a daily basis. Reducing off leash in GGRNA will cause severe and unsafe crowding in other off leash areas within GGRNA and other San Francisco Parks.

In a time when our country is trying to rebuild its economy is not the time to make changes that negatively impact many dog walking businesses and the other pet businesses they support.

Please do not make changes to off leash in GGRNA.

**Correspondence:** I walk with my dog - a 14 lb Cotton - at Rodeo Beach every weekend morning that I am not working and would really hate for this to end. I would in fact be willing to pay for the privilege to walk my dog off leash at Rodeo. Dog owners could, for example, pay \$150 per year for a permit proceeds of which could be use for beach cleaning/maintenance as well as enforcement of "dog rules" (e.g., fines for lack of dog feces clean up, aggressive dog behavior, etc.). This would be a small price to pay for the ability to visit such a magical place with our friends.

**Correspondence:** The GGNRA must protect and preserve the parklands. The growing population of dogs is invasive to a sensitive and natural environment. The parklands are increasingly becoming dominated by dogs. All park goers- -not just dog owners- -should have the opportunity to safely enjoy the parklands.

A recent visit to Chrissy Field felt like being in the middle of an off-leash dog park. We could not relax and enjoy the view. Dogs were bumping into us, kicking up sand and shaking water all over our clothes. In addition, dogs were chasing the shore birds and pooping in the sand. It was a shame that such a beautiful area had "gone to the dogs".

Dog owners are often not aware of how their dogs impact other trail users and wildlife. Many dogs are not under voice control. It seems many people do not understand what that means. They think the dog is

under control until it encounters the unfamiliar. An example would be the Pit Bull who recently attacked an Officer's horse.

I strongly urge GGNRA to take control of it's parklands. Loose dogs should be confined to a fenced-in area. Dogs should be on a leash in the majority of the parklands. Leash laws need to be strictly enforced.

I have been a professional Dog Groomer for the past twenty years. I'm a dog enthusiast and dog owner.

I support the proposed GGNRA changes to dog policy.

<b>Correspondence:</b>	Dear GGNRA,				

I was at Fort Funston yesterday. There were hundreds of people with their dogs, there were surfers in the waves, and people watching the dolphins. It was crowded: this is an urban park in a densely urban area. It was a great day.

We need to preserve the space for the people who use it intensively. I disagree strongly with the proposal to limit dog areas. You've heard the arguments, I'm sure, so I won't repeat them all here. But really, it's silly to try to create a wilderness experience in a place where lots of people need park access. Your plan essentially closes the park to nearly everyone who wants to use it. I'm kind of amazed that you'd advance this idea. I usually love the park service, but you've really misunderstood what people in San Francisco want. Let go of this ridiculous plan, and offer local folks a way to use more of the space, not less of it.

please don't hesitate to contact me for more - - Patrick Ball.

<b>Correspondence:</b>	As a dog owner and Parent of 3 young children I welcome the enforcement and request dogs on leash at Sutro Park. I have had my young children jumped on and knocked over to the floor by dogs more than 5 times in the past 6 years and I have had to kick unleashed dogs off my kids. The part that is most disturbing is that the dog owners don't pay attention to their dogs when they are off leash. Additionally when I am out with just my dog on a leash other dogs charge us. It is not safe at all for kids and we have a lot more kids now in the neighborhood. We all go to the park at the same time after work dog owners and kids and there is no enforcement officers to provide a safe environment for kids. The same is for Kelly's Cove (the area of Ocean Beach under the Cliff House). My kids have been attacked several times and the dog owners have told me that dogs are equal to humans and not to kick their dog off my kids. Let me ask you - is a dog equal to a human? If a dog kills or attacks one of my kids are they still equal? I				

---

feel that where I live in SF Outter Richmond dogs rule and kids have to deal. I would like leashes enforced. If I can leash my dog for the safty of others, can't we all?

**Correspondence:** I totally support god strict leash laws in the GGNRA.

While this "urban park" is next to high density dog ownership, the parks or for people in nature, and dogs, while natural, are natura predators of much of the wild life there.

Even more problematic is the fact that often urban dogs are not well trained on appropriate park behavior especially in really open spaces, not just pocket parks.

Don't let the dog crowd overwhelm good land management. I own pets, and really feel that they do not have more rights that people citizens.

**Correspondence:** G.G.N.R.A,

My name is Barbara and I have been going to Ft. Funston for over 30 years. I have many fond memories and have found solace there, when things weren't going so well.

I am concerned about the environment and want other generations to enjoy Ft. Funston and all of mother natures domains. I've been around for over 60 years and I think people do more damage to the environment than animals, including dogs. Restricting the dogs to a small area is going to create frustration. I do not like having my dogs on a leash all the time. Dog parks can be nice, but there aren't that many. I have to drive to mine and its very small. I love coming to Ft. Funston. My dogs can run, swim, and play with other dogs for hours and I get a nice work-out. Tourists are amazed that San Francisco has such a place and I haven't ever seen a sad person who complains. More and more people are going there because there aren't any places quite like it. I wouldn't mine volunteering or paying a small fee, if you keep it like it is. Dogs to a service to mankind by search rescue, guide dogs, service dogs security work. They make people happy. I think thats why San Francisco has so many.

The G.G.N.R.A. has done work there before, but the fences are falling, the landscape is changing, and more military structures are showing. Dogs didn't do anything except trample ice plants and dig some holes. Now more wild flowers and strawberries are growing. There are lots of crows and some sea birds, but I don't think it would be a good place for mammals. Harg. #1 would be a killing field as they try to get to Lake Merced for water. Ft. Funston hasn't changed that much is 30 years and Mother Nature is more in charge than the G.G.N.R.A.!

Frank Dean  
General Superintendent  
Golden Gate National Recreation Area  
Bldg 201, Fort Mason  
San Francisco, CA 94123-0022

Ref: Dog Management Plan and Draft EIS

Dear Mr. Dean:

For minimum public safety any dog in the National Park should be on a leash.

There should be no off leash areas for two reasons: first, as you know, many dog owners will abuse that privilege by allowing their dogs unleashed into leash areas.

Second, dogs are animals and therefore totally unpredictable, as anyone who has been around them and whether bitten or not can attest. Even when on leash they injure people, particularly large size dogs that owners cannot control. For that reason I believe the study is remiss in not addressing the hazard of large size dogs in the park.

Crissy Field should have no off leash area, dogs should be banned from Crissy. People use it. Dogs attack joggers and walkers and I have seen the result of dog of attacks there- - even when the dog is on leash

Sincerely;

Charles P. Burns

**Correspondence:** Dear Mr. Dean,

Please explain how the powers that be in the GGNRA failed to carve out a few acres at Rancho de Corral for off-leash dog walking, while providing off-leash areas at both Ft. Funston and Crissy Field. Rancho de

---

Corral is vast in size, 3,000 acres, and lies in a semi-rural part of the country. I would have thought its locale and decades-long tradition of usage primarily by canines and their companions would have made it the ideal choice for an off-leash area. Please take a second look at your "preferred" option.

I am a resident of Montara and have walked my dogs in the open space since 1977. I am appalled to learn that the GGNRA wants to ban dogs from the back of Montara and Moss Beach!

I have come to the conclusion that POST was a superior custodian of the land - less intrusive and maintained positive relations with the community. Certainly, no local citizen was ever assaulted by one of POST's representatives. Dogs and their owners were respected and welcomed and, to my knowledge, there were no negative repercussions during POST's tenure.

I will attend your public meeting.

<b>Correspondence Type:</b>	Letter				
<b>Correspondence:</b>	Golden Gate National Parks Building 201, Fort Mason San Francisco,CA 94123-0022				

Sept. 11, 2013

Dear Golden Gate National Recreation Area,

I would like to applaud your efforts to limit dogs in the recreation areas. I fully support these efforts. In addition, when I read about the Park Ranger who stood up to an irate dog owner and disciplined him, I was in full support.

I have often encountered dogs whose owners have taken them off leash. When the dogs go to the bathroom off the trail, the owners pretend not to notice and do not clean up after them. Additionally, these dogs may have run through poison oak and then run up to people or other dogs, with the potential of spreading poison oak to people.

I also note that when I ask the question "Shouldn't your dog be on a leash?," the answers are often hostile with shouting, name calling and use of profane language etc. This is a danger to myself ( a single senior citizen and person of color) which I am glad the GG NRA is willing to address and try to limit.

Lastly, I note that as a scientist with a B.S. and M.S. in the biological sciences and a career in an environmental agency, dogs do impact and degrade the natural environment.

Please feel free to use my comments, but do not use my name. Angry dog owners can take

reprisal.

Thank you for your attention,

Fay Shon  
522 Jackson Dr.  
Santa Rosa, Ca. 94509

**Correspondence Type:** Web Form  
**Correspondence:** This proposal does NOT provide sufficient access for on- and off-leash recreations for dogs and their people in Crissy and Ft. Funston, in particular. It will degrade what was intended as a recreation area for the residents of San Francisco, where our dogs outnumber our children. Your revision did not adequately address concerns to this effect raised from the prior proposal. This proposal must NOT go into effect as currently written.

I support protection for endangered species, and for enforcing leash laws where birds are at risk. That does NOT require eliminating access from such broad areas as indicated in the current proposal.

**Correspondence:** I oppose restrictions to dog walking on beaches. I favor the status quo. We are in a city, and those beaches have not been wild for over a century. Restoration of native plants, wilderness experience are all great concepts, but they do not work in a densely populated area. This area was set aside for recreation, and this should remain its primary function. The restoration of habitat and native plants can be done on other stretches of the coast. The beaches in San Francisco and the headlands should be accessible to all. Like many people, I got a dog for companionship but also because he forces me to go out and exercise. While I do not go to Ocean Beach or Fort Funston often with my dog, I would never go without him: my time for exercise is limited, and any walk I take must include the dog. Closing the beach

---

to the dogs means pretty much closing it to many of their owners. If getting rid of people on beaches is the goal, which I suspect it is, indeed closing the beaches to dogs is the way to achieve it.

**Correspondence:** In April of 2013 the perennially dog friendly East Bay Regional Park District's Board voted unanimously to amend Ordinance 38 adding significant controls and limitations for dogs and their owners accessing the EBRPD's system. The basis for this ruling was public safety and environmental preservation. I ask that the National Park Service at least rise to the level of EBRPD's action.

As a dog and horse owner and lifetime Bay Area resident, I support a strictly enforced version of the Dog Management Plan. Environmental issues are important, and dogs by their nature and through no fault of their own are invasive and can be disruptive to local wildlife and fauna. That should be obvious to all parties. Other places besides the most pristine areas of our State should be identified where these wonderful animals can roam and play, which are not as destructive to sensitive natural habitat.

These are some of the most aesthetically stunning places in the world, and having dogs running wild while residents and tourists, old and young, attempt to enjoy these beautiful places begs the question "who does this belong to?". Many of these places have become off-leash dog dominated.

**Correspondence:** Off leash dog walking areas should be available for each park, as each park serves a separate community. Depriving neighbourhoods around those areas (such as Lands End) of a park to let their dogs off leash is not sustainable, and will be difficult to enforce. The best way to balance the need to protect trails from dog damage, and to provide a space for dogs is to always present an alternative area for off leash walking. I can see an effort at that at Ocean beach for instance, but Lands End needs a ROLA area, as does the East end of Ocean Beach. The middle beach section is too small, and not very accessible.

**Correspondence:** I was at Ocean Beach this afternoon and had a lovely time. I was delighted to see so many beautiful, joyous, playful, glorious dogs bounding around. I don't have a dog, and am more of a cat person, truth be told. However, dogs need to run around at the beach- -and dogs generally are an enhancement to people's experience at the beach. Dogs need to be part of the Ocean Beach experience.

---

Ocean Beach is huge. There is certainly enough room to allow dogs to be off leash with voice control. I read as much of the 1500 pp report as I could, and yet I don't remember which Alternative I'm referring to, but I think dogs should NOT be on leash a Ocean Beach, and do NOT think there should be a restricted or controlled dog area. I find the assertion specious that there needs to be uniformity of NPS policies. There are so many variables from site to site. I might have a very different opinion of another NPS site. As to the piping plover areas of Ocean Beach - - they should be marked clearly as such, with clear signage indicating "NO DOGS - PROTECTED AREA," but that is sufficient.

**Correspondence:** After looking at your "preferred alternatives" for Headland trails and Muir Beach, I feel trapped. We live in Muir. Totally surrounded by Park. Need to be able to walk out of Muir Beach with a dog. As a woman, this is very important You (please) cannot take away all of our access to these important trails. Please reconsider your plans for these trails!!! Enforce existing leash laws & don't make Muir inaccessible to the people who live there & love these trails. Your plan is too DRACONIAN.

**Correspondence:** Preferred PLAN FOR MUIR BEACH & COASTAL TRAIL:

- 1) Do not direct public to the "Little Beach" adjacent Muir Beach. This beach cannot sustain the traffic, nor is access all year round as tides vary with the season.
  - 2) Coastal trail is currently open to dog walking. In preferred plan no dogs will be allowed. This will virtually cut the community of Muir Beach off from any dog walking other than on the busy Frank Valley Rd, Hwy 1 community roads.

**Correspondence:** Thank you for your efforts to find agreement on this difficult topic. I have reviewed the full text and am in support of Alternative F. However, my greatest focus and concern in moving forward relates to Fort Funston and the area of beach south of Fort Funston. (Morton Beach). I believe the new plan will work if maps are broadly distributed city and county wide as well as posted prominently at the start of each trail. I horse back ride and have a dog. Both my companions are very well trained. I feel safe and can call my dog away from any bird, dog or distraction, even when on horse back. My horse is the best dog ambassador I have ever met. Not everyone trains their animals like I do and I have been put in some very dangerous situations by dog owners that just don't know better. It is with this in mind that I suggest a broad and continuous PR campaign on the part of the NPS and the GGNRA so we can all enjoy the beautiful surroundings safely.

**Correspondence:** Saturday, Nov 9 around 1030 I was walking (in the direction of the Warming Hut and GGB) across the "wooden bridge" watching the birds below. I stopped (close to the guard rail and bench) to text my son to let him know where I was.

A dog, running with a (about 2 ft, I would guess) stick in his mouth, hit me from behind, full speed ahead. The dog (and owner) continued on their run.

The back of my leg was gashed, other walkers stopped to my aid. One of them knew of the Emergency Care Center on Scott and Lombard. I spent the rest of the morning and part of the afternoon at Emergency Care, (instead of meeting my son for his birthday celebration). I drove back to Sacramento and he went back to Mt View.

The wound required 10 stitches.

I know of the controversy about dogs and leashes - until that gets resolved a good "rule" would be not to let dogs run with sticks in the mouth.

I doubt the owner had a clue what had just happened, however, I did see her down the path take the stick from the dogs' mouth.

Please pass this on to the admin that should be aware of this incident. Thanks

**Correspondence:** Facts About the Dangers of Dog Poop. Keep it off the trails and away from creeks! The U.S. Center for Disease Control and Prevention (CDC) confirms pet waste can spread parasites including hookworms, ringworms, tapeworms and Salmonella. When infected dog poop comes into contact with your lawn, the poop will eventually "disappear", but the parasite eggs can linger for years! When a human or animal comes into contact with that soil through everyday activities like walking barefoot, gardening or playing, they risk infection from those eggs ... even years after the poop is gone. Pet waste is teaming with E. Coli and other harmful bacteria including fecal coliform bacteria, which causes serious kidney disorders, intestinal illness, cramps and diarrhea in humans. (There are 23 million fecal coliform bacteria in a single gram of pet waste!) Dog poop often contains roundworm larvae, which cause blindness. If a human ingests a roundworm larva, it can migrate through the body causing disease to the brain, lungs, kidneys, liver, heart or eyes. So when people (especially children) touch soil, dog toys or anything that has been in contact with dog feces and then touch their mouths, they can become infected. Dog poop doesn't just "wash away" or disappear. So if you're not disposing of your dog's waste, you're putting yourself, your family, your dog and your water supply at risk.

To Whom It May Concern:

I am a visitor from the Boston area. I just wanted to comment on how wonderful I find the experience of a community that has areas that are so open to dogs. I especially delighted in the experience at Fort Funston. It is truly remarkable to see such a dynamic community interaction between hang gliders, dog groups, individuals including children and a beautiful environment... and it seems to work for everyone.

San Franciscans' are so lucky to have a large area where dogs can run freely off leash. I wish we had that kind of option in the Boston area.

Keep up the good work!! This is an inspiration and an important "ecosystem".

Thanks so much,

Kathleen Wolf RN (I work in the mental health field and maybe this is one of the reasons I delighted so in this environment.)

I support Alt A on Map 19 A , Cattle Hill Sweeney Ridge area.

The value of loop options is paramount in spreading out user groups.

Spreading out user groups is key in our highly populated area to ensure a pleasant park experience for all including dog walkers.

I support map#20-E Alternative E for Pedro Point.

This area is highly disturbed from past uses, and would be suitable for dog walking on the entire parcel.

I support 21-A Alternative A for Rancho Corral de Tierra.

The value of loop options is paramount in spreading out user groups.

Spreading out user groups is key to ensure a pleasant park experience for all including dog walkers.

Providing expansive dog walking within the Rancho will engage a valuable new segment of trails users in protecting these remote coastal lands.

Thank you for your attention to this matter.  
Amy Owens

**Correspondence:** Dear Sirs/Mdmes:

I am categorically opposed to further limitations on access for dogs. San Francisco has approximately 150,000 dogs. (more than children!)

I have been visiting the parks and beaches with my dogs for many years. I can't think of one instance of seeing a dog destroy property or chasing wildlife. Furthermore, any dog guardian will tell you that dogs are much less a danger to people when they are off-leash, rather than constrained.

I believe that if an irresponsible dog guardian allows her/his dog to misbehave, then the person should be cited. A sweeping ban on access for dogs is unfair, and punishes the innocent.

Thank you,

L. Chardin

**Correspondence:** I am an individual dog owner and have been for years in San Francisco. I live in North Beach and find that Crissy field is a lovely and convenient place for me and my dogs (2) to walk and run in the afternoons - it is restorative and fun for all of us.

While I appreciate what the NPS is trying to do, but I think that a balanced approach is the best one, after all, this is an urban park and not a remote wilderness, like many of the NPS parks. Crissy Field is used by many different kinds of people in many different kinds of ways, dog walkers included.

While I would like to keep access to what it has been for many years (Alternative A), I can accept Alternative F with somewhat limited off leash access, but nothing less than that. The off leash areas have to be somewhat close to parking for people who can not walk too far, and both open field and beach frontage should be included.

thanks - Wells Whitney

**Correspondence:** Dog owners deserve access to open space just like everybody else. To limit access is an unjust misappropriation of our rights. Not only do the proposed restrictions unfairly demonstrate a bias of written law, it violates the laws of nature by constricting an animals instinctive need to run. There are very few places left for responsible owners to run their dogs; please do not impose a senseless law that will makes our lives more difficult. At the risk of being trite, the more I get to know people, the better I like my dog.

**Correspondence:** I reviewed your original plan choices and your preferred plans for San Francisco and have now reviewed the Draft Dog Management Plan/ Supplemental Environmental Impact Statement. I am deeply disappointed in your plans, which once again, seek to remove significant areas which I currently enjoy on a weekly basis from access to off leash dog use.

This is a major city, not a rural area. San Francisco has more dogs than children residing within this city. You may not like that but it is a fact. The residents of San Francisco own dogs and want to walk dogs and have them with them when they visit the city parks. Dogs need exercise and on leash exercise is not sufficient for many dogs larger than a Chihuahua. I am over 60 years old and no longer jog with my dogs. I cannot hike over sand dunes at Fort Funston and want to walk on paved roads while my dogs are off leash. Your "preferred" plan for Fort Funston will make it no longer a place I will want to walk my dogs, so I will not go there anymore. My husband does not walk well and he can only walk on the paved roads and cannot manage a leash as he uses walking poles to maintain balance. He cannot use the off road areas either. So Good bye, Fort Funston. Chrissy Field will get the overflow in a reduced area and will soon show damage. You are creating an environment that will be damaging by upsetting a balance that works right now.

I read the impact reports very carefully. There was no proof of damage to the areas from the current dog use. The dog walkers and other users make a big effort to keep the places clean and pick up after the dogs. I see much more damage at Fort Funston & Chrissy Field from gophers than dogs. Furthermore the damage to the cliffs is from the weather not dogs. Go out to the beaches on any fine day - Ocean Beach, Baker Beach - Chrissy Field and you will see garbage everywhere from people with children. Drink containers, candy wrappers, cigarettes and diapers everywhere. Perhaps you should ban cigarettes, food and drink from the beaches? I know I have cleaned beaches for earth day and I do not pick up garbage that dogs left - it is all from people. The dog people are the few to pick up after themselves.

Leave it alone - it ain't broke!

**Correspondence:** When considering the needs of a varied group of users of the NPS it would inappropriate to not consider the needs of animals, meaning dogs, and their owners. The NPS is not just for humans and we shouldn't be too high on ourselves to think that is the case. Is it appropriate to limit dogs to sidewalks only? If this were truly about the environment then we would limit human traffic and impact, which is the more damaging to the environment. But the reality is you are trying to balance the needs of the environment while ensuring that humans and other animals can enjoy it. So if we let humans roam wild, and I don't see anything about limiting horses and the piles of waste that they leave behind, why are we picking on the dogs?

I am fully supportive of protecting the environment, from us, for us. I would strongly encourage you to allow the access that is currently allowed but to more stringently enforce it. If dogs aren't under voice control fine the owners, if dogs aren't on leash but should be- fine the owners, and most importantly if an owner doesn't pick up after their dog- FINE the owner. With this approach either you wouldn't have any work to do and there would be no more staff needed, or more likely, at least initially, there would be steady income to support the salaries of the staff you need to enforce.

I am also fully supportive of limiting the number of dogs being walked, three should be plenty, as more than that do have a much larger impact on both the environment as well as other visitors.

I am strongly encouraging you to go with Alternative A with more enforcement. Please consider these thoughts and perspectives. Thank you.

**Correspondence:** There should be no off leash dog walking at Crissy Field or the beaches there, especially not on the old airfield area. Dogs chase wildlife and dig into the gopher holes with no interference from their owners. Dogs urinate on the path, on the field and on the beaches making for unsanitary conditions, especially on the beaches where children are playing the sand. There is almost no monitoring of off leash activity by the Park Rangers. The Crissy Field area should not be considered a city park but considered wildlife refuge.

RE: Dog Management Plan/EIS

The following are comments on the National Park Service Supplemental Environmental

---

Impact Statement for the Dog Management Plan, Golden Gate National Recreation Area. As a National Park and National Recreation Area user, I support a total ban on dogs (other than ADA service dogs on lease) in our National Parks (NPs) and National Recreation Areas (NRAs).

Dogs provoke unneeded conflicts with other NP and NRA users and wildlife. NP and NRA visitor experience is diminished when confronted by barking dogs, whether on- or off-lease. A NRA is a National Recreation Area, not a National "Pet" Area. It does not make sense to allow dog owners to threaten wildlife or other visitors with their animals. The National Park Service should adopt a policy that dog use in the Golden Gate National Recreation Area is NOT an appropriate use; that dog use does NOT preserve or protect natural and cultural resources and natural processes; that dog use does NOT improve visitor and employee safety; and that dog use does NOT reduce user conflicts. Department of Interior funding for NP and NRA maintenance is woefully inadequate. Taxpayers should not bear the costs of having to provide for additional law enforcement, erect fencing, or repair damage from dogs.

Unfortunately, too many dog owners are not responsible owners, especially those who maintain that their dog does not need a leash because it is under "voice-control." Such dog owners are often hostile and become abusive and threatening toward other park users who object to being approached by unleashed dogs.

Good planning requires identifying non-compatible uses. Dog use in our NPs and NRAs is a non-compatible use. Just because dog is god spelled backward, does not give dog owners any god-given right to run their animals in our NPs and NRAs. Please ban dogs (other than leashed-dogs under the ADA) from our National Parks and National Recreation Areas.

Because many dog owners are not only irresponsible dog owners, but vindictive as well, this comment must remain anonymous.

**Correspondence:** I fully support the GGNRA's Draft Dog Management Plan (SEIS). The problem of uncontrolled dogs (leashed and unleashed) is an endangerment to people, other living creatures, and vegetation. I've been a life-long walker and, am now, a senior citizen. In the 'leashed dogs only' portion of the San Francisco GGNRA I have been chased, threatened, run into, and tripped by dogs whose owners couldn't or wouldn't control them. Owners of offending dogs were either far away, had no effective 'voice control,' were dismissive of my complaints, or blamed me for their dogs' behavior.

On my visit to the GGNRA open house on November 2, 2013, at Fort Mason, Bldg D, San Francisco, I saw that the research and analysis upon which the proposed changes are based were well documented and illustrated. I hope the GGNRA will become an area that all responsible visitors can use and enjoy.

Sincerely,

Jane Church-McDaniel

Re: Draft Dog Management Plan/Supplemental Environmental Impact Statement

Within a few days of going for a walk on the beach and enjoying, among other things, watching dogs scramble after tennis balls, I was surprised to learn that the GGNRA was planning to require that dogs be on leashes. Watching the dogs is as much a part of our enjoyment of the Dolphin Club I am familiar with and a user of the waterfront and beaches.

We are not currently dog owners, but understand the value of dogs being able to run free in open areas whenever possible. This is particularly true of dogs in San Francisco, where housing density precludes many dog owners from having yards, and the city's being on a peninsula precludes, taking dogs elsewhere to run on a frequent basis.

From having had dogs in the past, we know firsthand how necessary it is for dogs to break out and run loose regularly, to keep them mellow. Few dog owners (definitely not us) are able to run leashed dogs at a speed natural to them. Dogs' behavior in dog runs make it clear that they still have pent-up energy that is not being adequately discharged. Unhappy dogs are more likely to bite and otherwise misbehave. The beauty of running on a beach is that it wears 'em out quickly with minimal damage. Sand is a forgiving medium.

If someone has a dog that's out of control, that dog (and that owner) needs to be dealt with. It shouldn't determine the availability of open areas for all dogs, any more than shutting down the roads is a reasonable response to irresponsible drivers.

Taking our dogs to the beach also got us to the beach and exercising, way more than we manage to do now without them. (We're about to get another.) It's a stretch to think that we would have gone if the dogs had to be on leashes anyway.

I hope this bad decision will be reviewed and reversed, Its unnecessary, counter-productive, and extreme.

Thank you for your service.

Sincerely,  
Cynthia Ehrlich

Dear Superintendent Dean

I am writing to you in much distress because of the ongoing dog situation at Crissy Field. I continue to be frightened at walking on the path and on the beach because of large, aggressive dogs off leash. I frequently have to turn back from my walks because I encounter a pack of them fighting, barking, jumping. I am so upset about this matter that your organization continues to allow dogs and dog owners to control Crissy Field. I simply cannot understand it. At the very, very least, the dogs should be on leashes. And, in my opinion, they should be restricted to a specific area and not given free reign of all areas. This is terribly unfair to those of us for whom the Park was intended to serve. Let the dogs have some portion of the field or designate some more remote park for their use. Crissy Field is a heavily used Park and it is insane and unsafe to allow the current situation to continue. I hope that you will address it, though I have serious doubts in light of the dog lobby

Sincerely,  
Mary Faust

<b>Correspondence:</b>	GGNRA Dog Management Response				

Executive Summary

The GGNRA Dog Management Plan (SEIS) seems to have artificially created a problem with dogs within the GGNRA parks, then makes a convoluted case of supporting why the impact of

dogs within the parks is so substantial that they need to make dramatic restrictions. I live in Burlingame near 280/Trousdale, so the focus of my comments will apply mainly to the 3 parks in San Mateo County that I frequent multiple times each week, namely: Milagra Ridge, Mori Point and Sweeney Ridge.

Im stunned that the SEIS makes a dramatic case about habitat destruction and the environmental impact of dogs within these parks, but fails to quantify that their impact is an extremely minor rounding error vs. other factors (including human impact) that are many orders of magnitude more significant. The comments seem to clearly indicate that the GGNRA management has never frequented any of these parks, or, at least not on any sort of regular basis. Alternatively, it points to the possibility that GGNRA management started with a mission of restricting dogs, regardless of the actual facts of their impact.

Milagra Ridge, Mori Point and Sweeney Ridge are 3 fantastically stunning properties that draw surprisingly few regular visitors vs. a multitude of other GGNRA properties. Many of the restrictions that challenge visitors coming to these 3 parks are obscure locations, parking limitations and steep/challenging terrain. All of these natural limiters virtually guarantee that these 3 parks wont ever be overused. Theres just a surprising trickle of people at all of these properties, even on weekends. On weekdays or weekday evenings, its not improbable to only pass 2-3 people during an hour long walk.

The bulk of the habitat and environmental damage I saw at all 3 of these parks is almost entirely human-caused. Its orders-of-magnitude greater than that of dogs. In fact, its almost impossible to see any impact of dogs at all except for the rare occasional 'poop that a neglectful owner didnt pick up. At Milagra Ridge, most of those poops look more like they come from coyotes than from domestic dogs. I also want to be very clear that these 3 parks are all in fantastic shape. Even though the human impact is dramatically greater than that of dogs, there are only minor changes required to address them. Those changes should be focused on human causes, as I struggled to find the impact of dogs.

Im a strong environmentalist and a member of Environment California. Im also a strong believer in responsible use of our treasures, as thats part of their true value.

My writeup below, including pictures, is specific and detailed on each property. Since there are specific nuances of each property, Ive tried to provide a thorough description so readers can understand why there just isnt the problem with dogs at the San Mateo County properties that the GGNRA indicates. I really want Milagra Ridge, Mori Point and Sweeney Ridge preserved with the existing dog management rules (Alternative A) for responsible dog owners that frequent these locations. Theyre such stunning treasures that Id never have spent the considerable time exploring had it not been for my dog!

#### Milagra Ridge

Milagra Ridge is one of the most beautiful, and most difficult, of all of the GGNRA properties to utilize. The parking area allows only 6 cars (possibly 7 if smaller cars are parked in very tight formation). The remainder of the lane is entirely red curb, no parking zone. This is a natural throttle on this park, and guarantees that it can never be over utilized. The beauty of this park is its isolation, the views and the limited people traffic.

On an ongoing basis, 30-40% of the total visitors to Milagra Ridge are dog owners who come to walk their dogs. During much of the winter, spring and summer Milagra Ridge is challenging. It sits on an unprotected ridgeline overlooking Pacifica, so it is regularly very foggy, windy and wet. It requires a coat, gloves, hat and strong motivation to be there during these times. During these times, the few that dare brave the elements are almost entirely dog owners, representing 70%-95 of the visitors Ive encountered. Also, when its foggy and windy, there are usually only ever 2-3 cars parked in the lot.

#### Habitat Protection

Except for the occasional dog poop that a neglectful owner hasnt picked up, I havent found any impact of dogs on this habitat. In fact, most of the poops I see across the entire Milagra Ridge

site look more like they come from coyotes than from dogs. Its as if dogs have never even used this park. However, the human impact is stunning! Heres what I have cataloged:

" Tagging: Someone tagged virtually every sign in Milagra Ridge during the summer of 2013, which took the Park Service significant time (and likely associated cost) to fix. I dont think dogs were responsible.

" There are a number of off-trail trails that continue to show wear where humans are going cross-country within the park, even around fenced-off and designated closed areas. However, theres not a single track to indicate that dogs are culprits.

" On a few occasions, Ive seen kids riding their mountain bikes cross-country at Milagra Ridge through protected habitat and down below the batteries. Its also visible via the tire tracks, although I havent seen a single dog track in these same areas.

" Finally, Milagra Ridge was used for Nike missiles from 1954 to roughly 1974, so there is likely perchlorate and other extremely toxic chemicals interlaced throughout the soil and complex near the batteries. Although no missiles were ever fired, the contamination of the area from both the missile containment areas and human staffing is likely still very present. Dogs werent responsible for any of that contamination.

My main point in bringing up these specific environmental and habitat abuses is to contrast the incredible toll of humans at Milagra Ridge compared to the extremely minor impact that dogs have made (or are making) at this site. It seems completely disingenuous of the GGNRA to attack dogs as even a rounding error of environmental and habitat destruction at this site when the human impact is so stunningly more dramatic.

#### Conclusion

I would like to see Milagra Ridge kept with its current dog permissions with Map 18-A. Any impact of dogs is a rounding error compared to the human impact at this site. Ive never seen a single professional dog walker at this location in 8 years. This is such a wonderful site, and the limited use it now receives would be stunningly negatively impacted by the Alternative F restrictions. The ridgeline trails are some of the most beautiful areas of this park, and the fencing and shrubbery along this route already form a contained walkway that protects adjacent habitat.

#### Mori Point

Mori Point is a fantastically beautiful site overlooking the Pacific Ocean near the Sharp Park Golf Course. Since its entrances are somewhat difficult to find amongst the adjacent bedroom community, this park is never very busy. At most, Ill only pass 8-10 people during a walk through this park during busier times, and 3-4 people during off-hours. Additionally, Mori Point has two fantastic peaks/ridgelines that have stunning views of Mt. Tamalpais and the Farallones on clear days.

The peaks and ridgelines at Mori Point are not for the faint of heart. Even the easier climbs to the top of Mori Peak or to the Timigtac ridgeline (from Upper Mori trail) are extremely steep. There are circuitous routes to the top of Mori Peak, but theyre steep, narrow and often hard to find because they arent marked very well. The net effect is to make both of these parts of the park very minimally travelled. In my 8 years of traversing the Timigtac ridgeline with my dog, I think Ive only ever passed 4-5 people. Try the trails sometime and youll understand why. Mori Peak has some easier access points, but is also a stout climb through some tough terrain. Seeing people on Mori Peak is more common, but 70-80% of the times that Ive been there Im completely alone.

#### Habitat Protection

Ive traversed Mori Point regularly for the past 8 years, and have only seen an occasional dog poop or trailside poop bag left by a neglectful owner. Other than that, its virtually impossible to see any impact from dogs at all. Ive only seen a single occasion where a dog ran into the protected areas near the boardwalk. Ive never encountered a professional dog walker, nor have I seen any dog owners with more than 2 dogs. On an ongoing basis, only about 10-20%

the total visitors to Mon Point have dogs.

However, the human impact at Mori Point is stunning. Im including a number of pictures I took during my latest walks to make these points:

" Beer cans, liquor bottles, fast-food containers and general trash thrown into the ponds and streams along Polywog trail. This is the bulk of protected frog habitat and the human impact is insane. I've seen overnight camping in the woods and campfires too. One of the park rangers said they continually clean dumped trash out of the creek, including tires and even a cash register. Dogs certainly aren't the culprits.

" Graffiti and destruction of various signs throughout Mon Point. Ive also included pictures of these too. Taggers have not only hit the signs, but also the bunkers and cement near the old batteries. Additionally, someone completely ripped out the sign at the intersection of the Coastal Trail and Timigtac Trail during the summer of 2013 and left it on the trail. The sign is now missing altogether. Im pretty sure that dogs arent responsible.

" Automobile tires buried and half exposed all over the Timigtac ridgeline. Not sure why these are there at all. Theyre not environmentally friendly.

" Non-native, invasive vegetation. The park service did a major cleanup at Mon Point in 2012 and 2013 to try and corral and destroy the invasive species impacting the local ecology. Ive included pictures of the black plastic covering a number of these hotbeds that are being used to burn up and kill the plants. These invasive species are completely human introduced and have had a stunning impact on the native ecology. Again, dogs arent responsible at all.

" Cats from the neighboring subdivision regularly frequent the protected habitat areas along Polywog trail. There are at least 5 cats that Ive seen going under the fence.

However, during the 8 years Ive been going to Mori Point, Ive never seen a single dog in this protected area. The existing fence keeps dogs completely out, even if the dog werent on a leash. The fence does nothing to stop the flow of cats, which are a significantly greater risk to the protected habitat than are dogs.

" Off-trail hiking. I see myriad areas of Mori Point (and have witnessed countless hikers) going cross-country and forging their own trails. This is incredibly destructive to habitat and contributes to erosion. Ive never seen a single indication that dogs are responsible for any of this impact.

My main point in bringing up these stunning human abuses is to make the point that dogs are a mere rounding error for environmental concerns and habitat destruction at Mori Point, while humans are 1000x more negatively impactful to the same areas.

#### Conclusion

I would like to see Mori Point kept with its current dog permissions with Map 17-A. The impact of dogs at Mon Point is strikingly minimal to nonexistent. Any impact of dogs is a rounding error compared to the human impact at this site. Alternative F eliminates the least-used and most isolated portions of the site that I consider to be some of the best dog walking areas in the entirety of San Mateo County. Additionally, keeping Alternative A enables key portions of the adjacent land and trails of the City of Pacifica that allows dogs to be accessed through and along-with the Mori Point trail system. Please keep Mori Bluff trail, Mori Peak trail, Upper Mori Trail, Lishumsha and the Timigtac trail accessible to dogs.

#### Sweeney Ridge

Sweeney Ridge is one of the more challenging GGNRA sites because of its steep terrain, but it is stunningly beautiful. There is ample parking on the Sneath Lane side, and access is fairly easy to find. Since Sweeney Ridge requires a very challenging uphill climb to get to the rest of the site, it is probably one of the least traversed parks of the San Mateo sites, especially in the more remote regions of the park.

Because of the steep climb required from almost every entrance to get to the flatter ridgeline

areas of Sweeney Ridge, it makes it a fantastic location for walking dogs to complete exhaustion while encountering only a very few people. Because of the cut of the main road and surrounding shrubbery and guardrails, it funnels traffic strictly on the roads up to the ridgeline. The walk on the Sweeney Ridge Trail between the Notch trail and Shelldance Nursery is so steep in parts that most hikers never attempt it, despite it being an actual fire road. The net effect is that environmental damage from both humans and dogs is virtually non-existent at this site.

#### Habitat Protection

I struggled to find anything other than the occasional off-trail footprints of humans cutting through a few parts of this site and an occasional mountain bike tire track off the main trails. However, I could find no sign that dogs have been there at all.

Sweeney Ridge was also part of the Nike missile site along with Milagra Ridge, so toxic contaminants left over from human use are likely the main environmental challenges.

#### Conclusion

I would like to see Sweeney Ridge kept with its current dog permissions with Map 19-A. This site is incredibly challenging for both humans and dogs alike to get to the ridgeline. As such, human, dog and mountain bike traffic beyond 1/4 mile up from any of the entrances is a bare trickle at most. The restrictions on this beautiful property are all completely natural, and there is no value in artificially imposing the additional restrictions of Alternative F for problems that just don't exist.

#### Professional Dog Walkers

I attended the Nov. 4, 2013 meeting in Montara at the Farallone View Elementary School and spoke at length with multiple GGNRA representatives, most notably Shirwin (sp). She was one of the most knowledgeable representatives I've met. Her comments and our ensuing dialogue seemed to gravitate most heavily toward professional dog walkers as the bad apples. She indicated that some of them can bring 6, 8 or even 10 large dogs to GGNRA properties, and struggle to have them under any sort of control. The problem seems most heavily centered on the GGNRA properties that allow off-leash dog access.

I'm dismayed that a few bad apples are likely creating the bulk of the problems that the GGNRA feels they need to address. I'm absolutely in favor of restricting professional dog walkers; as I feel that they are not indicative of the bulk of responsible owners.

In the 8 years I've been going to Milagra Ridge, Mori Point and Sweeney Ridge, I have never seen a single professional dog walker. In fact, I've never seen any owner with more than 2 dogs. I just don't think that that problem exists at these properties, mostly because of the natural access restrictions I mentioned previously. Owners that I've seen are very responsible. Putting restrictions on professional dog walkers, even pre-emptively at these properties, is probably not a bad idea.

**Correspondence:** September 28, 2013

Frank Dean, General Superintendent  
GGNRA, Building 201, Fort Mason  
San Francisco, CA 94 123-0022

Dear Superintendent Dean,

The purpose of this letter is to comment on the most recent (September 2013) issue of the Supplemental Environmental Impact Statement for the GGNRA Dog Management Plan. I am a non-dog walker who lives in Marin City, adjacent to the Alta Fire Road and the Oakwood Valley Fire Road and Trail, which I use regularly. I use other GGNRA trails occasionally. So my comments are limited to the Marin portion of the GGNRA. My comments are generally directed toward Alternative F, the NPS Preferred Alternative for each of the Marin sites listed.

Permits: It is not clear to me that the requirement for permits for dog walkers with 4 to 6 dogs is worthwhile. It seems that signs posted on the trails and fire roads designating the allowable times more than 3 dogs could be walked beyond that point would serve the same purpose just as well, and would save both dog walkers and the Park Service a lot of administrative paperwork. But I have no strong opposition to permits so long as they are free and easily obtained. So while I favor Alternative A on permitting, Alternative F is acceptable.

Stinson Beach ' Alternate F is acceptable.

Homestead Valley ' While I would prefer Alternate A, Alternate F is acceptable.

Oakwood Valley/Alta Trail ' As a regular (several times a week) user of these trails, I do not understand why off-leash walking should not be permitted on the fire road portions of the trails (i.e., the Oakwood Valley Fire Road and the Alta Fire Road). For this reason, I support Alternate A. However, since these fire roads are also heavily used by joggers and bicyclists, and occasional horseback riders, I can at least see a reason why some users would prefer no off-leash walking in this area. This being the case, I can understand how Alternate F might be the most acceptable alternate for everyone. I am glad to see that Alternate F now includes the short link between the upper Oakwood Valley Trail and the Alta Fire Road within the allowable dogwalking boundary and that dog walking along the Alta Fire Road would be permitted clear out to and including the Morning Sun Trail, thus allowing access to Sausalito residents. I am very glad to see that the nonsensical environmentally unfriendly idea of constructing a wildlife habitat subdividing fence along the Oakwood Valley Fire Road and Trail is not contained in Alternate F. Whoever dreamt up that idea should be ashamed. Hopefully the Park Service environmental reviewers of the Dog Management Plan would never allow such a travesty to be built.

Muir Beach ' Alternate F is acceptable. While dogs love to run free on the beach, that beach is not that large and is heavily used by families and sunbathers who might not like dogs running loose around them. In this case, I think requiring that dogs be limited to three per walker and be on a leash is reasonable.

Rodeo Beach ' Alternate F is acceptable. At least there will be one beach where dogs can run free.

Marin Headlands Trails ' It is not clear to me why Alternate F eliminates some of the trails that allow leashed dog walking in Alternate F from being included. But since I do not use those trails regularly, I do not feel I am in a position to pass judgment on the selection of allowable dog walking trails in this area.

Fort Baker - - Alternate F is acceptable.

In conclusion, I consider Alternate F of the current draft to be an improvement over the previous 2011 draft proposal. It appears you have been open-minded about many of the comments you must have received on the earlier draft.

Thank you for your consideration of my comments on the September 2013 draft,

Robert Hollingsworth

Frank Dean, Superintendent  
National Park Service - Golden Gate National Recreation Area  
Building 201, Fort Mason  
San Francisco, CA 94123

Dear Frank,

I would like to comment on the most recent version of the GGNRA DRAFT Dog Management Plan (Plan). As I reviewed the Preferred Alternatives (Alternatives), I am concerned over the effect the implementation of the Alternatives may have on the San Mateo County Midcoast, City of Pacifica, and visitors.

Throughout the process conducted to produce the Plan, I heard residents of San Mateo County ask not to have trail access for dog walkers reduced. As I reviewed the Alternatives, I am concerned by how many trails are being prohibited to dog walkers. By prohibiting access to trails used for decades by both dog walkers and non-dog walkers, it may discourage people from using the parks and trails. Furthermore, many women have expressed to me, including my own wife, that without their dog they would not feel safe walking on open space trails. Having their dog present provides a level of security that otherwise would not be provided.

In addition to the aforementioned issues, I have concerns over the potential impact this can have on San Mateo County's coastal communities. By reducing the amount of trails people can access with their dogs and citing people for violations, GGNRA will be discouraging people from engaging in outdoor activities and enjoying their national park lands.

GGNRA states that they have selected the Alternatives because it grants multiple user groups the opportunity to enjoy the property, allows for habitat restoration, and is justifiable and enforceable by NPS Rangers. For decades, dog walkers, non-dog walkers, mountain bikers and horseback riders have all enjoyed the trails that are now managed by GGNRA. Multiple user groups have been enjoying the trails together in the past and should be able to continue to do so. Additionally, as the County has proven through projects conducted at San Bruno Mountain, habitat restoration can be successful while still providing recreational opportunities for a variety of visitors. Given these points and the strong desire by dog walkers and the community to continue to use these trails, I suggest that it may be difficult for GGNRA and the NPS Rangers to effectively enforce the Alternatives.

I ask that you reconsider your Alternatives and not place such heavy restrictions on trails currently used by dog walkers. Thank you.

Sincerely,  
Don Horsley  
Supervisor, District 3  
San Mateo County

Dear Mr. Dean

I fully endorse the application and enforcement of lease laws in the Golden Gate National Recreation Area, most specifically the Presidio Trust region.

As a victim of dog attack, I know that dogs off lease pose a real threat to children and adults using the Presido. This is an inner city park and the access to this area, without threat of attack from personal pets should be a highest use priority.

Best regards

Tim Irving

**Correspondence:** As a dog guardian who believes/knows that dogs need to run play, without leashes, for the health of all (overly confined dogs are the ones most frustrated likely to attack), I am for as much off leash area as possible. But there are 2 specific concerns I have that may not have been already addressed.

Around xmas time 2012, I was accosted by a park ranger in what I call the wild area between Sutro Park and the ocean. I did not know this was an on-leash area did not mind being told so by the ranger (mid-40s I'd guess w red hair). But as a 60 year old woman, I did mind being told to sit in the dirt be rudely questioned as to whether I was carrying weaponry in my purse. He seemed to be training a younger ranger (my guess IE the training) but I was remind of him 1 1/2 years later when the teen, Andy Lopez, was killed by a sheriff's deputy near Santa Rosa. The responses of both the Sutro pk ranger this deputy were both over-the-top out of control. I am a Sutro Heights home owner who contributes to my neighborhood park-not that anyone should be treated the way I was - for so little reason.

We need East Beach to remain leash free!

And re Crissy Field, East Beach - the only accessible beach for the elderly physically disabled w dogs needing off-leash.

**Correspondence:** Thank you for having made the program more understandable and effective wiht the "draft plan/SEIS." I am 88 years of age, trying to recover from a spinal fracture. Walking is essential but hazardouse where irresponsible owners are allowed to let their dogs off-leash. This has denied me the pleaseure and healing of Ft. Mason Meadow, Muni Pier, and the Marina-Crissy Field-Ft. Point route. Indeed, uncontrolled dogs swarm the entire region. A personal vow: I love dogs!!! But I learned a sad lesson at age 20: it was animal abuse to confine a puppy to city rooms!!! My saddest memory came when I sent my cocker spaniel puppy to rural relatives.

Enclosed is reference to a scholarly study proving again that our problem is NOT dogs. The challenge is to educate dog-owners. Congratulations on your excellent efforts.

Dennis McDaniel

Fr: Robert Rosiner,

RE: Comment on Dog Management Plan

Dear Mr. Dean,

Yesterday, I was attacked by a large vicious dog on the Crissy Field beach. I almost went to the hospital and instead saw my doctor. I am very, very upset and scared. This was the second time I have walked on the beach in quite a while, out of fear because of past incidents, and now I will not do it again. I am 62 years old, well able to walk, but not that strong. I have osteoporosis, so if I fall I am at risk of fractures. The dog management plan has taken more than a dozen years. In my view, the conclusions are outrageously slanted in favor of dogs and dog owners. Crissy Field is a heavily used urban park, closest

to the largest concentration of the public. It naturally should favor use by pedestrians, who include small children, the elderly, disabled people. Your plan continues to put us at risk. I am outraged that dogs will be allowed in all areas and off-leash in some. The most sensible solution is to fence off a portion of the field for use by dogs.

There are plenty of other parks that are not in as heavily populated areas where dogs can be freer. Crissy Field should have as is priority the enjoyment and safety of people not the absolute freedom of dogs.

I urge you to review the situation in light of the needs of ordinary people who have a right to be safe.

Sincerely,

Robert Rosiner, San Francisco

**Correspondence:** I've had 3 wonderful dogs thru the years. I loved to let them off leash roam frolic about nature. But my dogs stayed close to me, obeyed my command I was attentive to them their surroundings. They obeyed the rules of the road. Now I go to the beach at Fort Funston (of Pacifica Park, take your life at risk) to enjoy the sun, sand water I've some intense experiences where I feared my bare legs would be ripped apart. Most dog owners are responsible but there are enough that are surley, inattentive on their cell phones consider my fears cries for help an inconvenience at best. When a dog is aggressively coming forward, barking incessantly, showing his teeth nipping at my clothes - I have good reason to be afraid. Packs of dogs are the worst. But one horrible time a woman was there with her boyfriends dog for fifteen minutes the dog was running rapid circles around me with her between me the dog as he fiercely growled showed his teeth. Panicked I yelled he wants to bite she said No he just wants to harm me, I'm not sure what the difference is. Finally I took refuge in a tall hefty guy walking down the beach. Suddenly the dog calmed down. The woman told me this was a rescue dog with fierce instincts to protect her. Micronare/rescue dogs

All I know is over the last five years dogs have become a public menace. When a car hurts or kills someone, the verdict is vehicular manslaughter. The same applies to a dog. The verdict donicular manslaughter.

Dogs should be on leashes or muzzled. Dogs packs of dogs dominate the beach now at Fort Funston. I know an older woman whose leg was ripped wide open - she screamed for help the dog's owner did nothing. She another friends both carry bear repellant.

Thank you for your time. Please do something.

Thank you-

Sandi Sinll MFT

**Correspondence:** TO: GGNRA General Superintendent, Frank Dean  
**DT:** 11/6/13

As a resident of Muir Beach and concerned citizen of Marin, I am writing to express my concern over the GGNRA's current Dog Management Plan and Draft EIS, specifically the proposed dog rule changes to Muir Beach and the surrounding trails of the Marin Headlands. Because of its location, the community of Muir Beach is uniquely impacted by decisions of the National Park Service and the GGNRA. We are virtually surrounded by the Park, and the proposed changes would negatively impact our community.

In the NPS's "preferred alternative" for Muir Beach, leashes would be required on Big Beach. The NPS's justification for the workability of such a change is that Little Beach is there for all who want to let their dogs run. Here is the language cut and pasted from the draft EIS:

"There is some limited availability for off-leash dog walking, on the beach below the adjacent neighborhood, a small county beach (Little Beach) adjacent to the NPS beach. Visitors could access Little Beach by walking their dogs on leash across Muir Beach."

I am especially disturbed by this missive. This is using Little Beach as a de facto ROLA (Regulated Off Leash Area). Little Beach is not part of the park. The property is County and privately owned and, as a practical matter, often inaccessible due to high tides. We have serious concerns about funneling an entire user group over to Little Beach- -without services, trash, restrooms or parking.

Local residents are concerned about the impact on Pacific Way, Sunset Way, Cove Lane and the beach trails when nonresidents try to access Little Beach with their dogs. From a safety standpoint, we are concerned that visitors will cross over to access Little Beach and become stranded during high tides, then try to unsafely cross over the rocks to get back to "Big Beach", creating more incidents for our emergency services. From an environmental standpoint, we are concerned for the continued erosion of the hillside trails and the potential increase of dog waste left at these trailheads.

I appreciate the new barriers that have recently been placed on the beach to protect the restored Redwood Creek area and feel this is a reasonable solution to keep both people and pets out of the area. However, by removing the off leash access to the beach, we feel the GGNRA is cutting off one significant user group from enjoyment of the beach.

I also object to the proposed rule changes to the trails around Muir Beach. These changes would virtually lock in our community with no hiking opportunities with our dogs. We'd be left only with a looped trail around the parking lot.

Historically, Muir Beach residents and dog owners from around Marin have always enjoyed off leash access at Muir Beach and the Headlands Trails. These proposed changes don't just affect residents of Muir Beach, where these areas are, quite literally, our backyard. The loss of these currently available areas for people and their dogs would change the quality of life for the worse for all Marin residents and their dogs.

Please keep off leash access on Muir Beach and on the surrounding trail system so that we can continue to enjoy these areas with our pets. At a minimum, I request that limited hours of off leash use be allowed when the areas are not in peak use. (i.e. non-holiday, midweek, early morning/late evening). Quite literally, the beach and surrounding trails are often nearly empty at these times and, as a result, we should be able to continue to enjoy these areas with our dogs as we always have.

Tha you for your consideration,  
Joan Wynn ' Muir Beach resident

**Correspondence:** Oakwood Valley has been an area for me to walk my dogs for over 20 years. My dog walk off leash & are under voice control. To apply a leash law will impact my life tremendously in an awful way. I can not drive to Rodeo Beach every day to exercise my dogs. It is impracticable & unfair! There are seven to nine areas in Marin impacted by your plans & only one is off-leash. Alternative E is acceptable & doable for me & my "friends" - "Preferred Alternative F is NOT!"

**Correspondence:** For Oakwood Valley alternative E is reasonable. We walk our dogs responsibly under voice control; we pick up after them. If anything more restrictive were implemented we would feel you are driving us out of the area! We would have to decide between giving up our dog or moving to another area. This is patently unfair. We pay taxes to use these areas, and we have a right to use them!

**Correspondence:** Restricting off leash areas to designated areas at GGNRA sites essentially creates enclosed dog parks. The impact of all the dog walker's dogs plus individual's dog being confined in smaller areas would be detrimental to both the dogs the owners. Off leash is a necessary method of exercise for dogs. In such a dense city, space is needed for dogs to burn energy. They would no longer have that freedom if all dogs were packed into the same area. I do not support any restrictions. Having off leash areas for dogs is one of the perks of living in a liberal, amazing city. Its exercise for me my dog! Its necessary for dogs to properly socialize while still having their personal space. A socialized dog is a safe dog. Trying to socialize a dog by tossing it into a small, densely packed area would be dangerous. I love my city. I love my urban parks. Keep them free!

**Correspondence:** To Whom It May Concern:

I am writing to express my opposition to the GGNRA plan to severely restrict canine access to certain parts of the Golden Gate recreation area.

I do not own a dog, but I certainly enjoy seeing dogs - along with their guardians - play at Ocean Beach, at Fort Funston and at Crissy Field.

In a city and region where canine companions outnumber children, it just doesn't make sense to so drastically limit the places where, under constant supervision, dogs can roam and play free.

Please reconsider this draconian proposal; more than anything, it is seen as a punitive measure and not as a way of preserving public lands.

Thank you.

**Correspondence:** I oppose any restriction on dogs in the GGNRA. Here are some BETTER ideas:

1. NPS leave. Let local people handle things.
2. Horses out. The make big piles of poop which nobody cleans up.
3. More dog areas. There are more dogs than ever and we need more space.
4. Cars out. They are responsible for bird hazards, not dogs. In fact, dogs scare away ferral cats, which helps birds.

**Correspondence:** (Frank Dean: I'm the person from the Berkshires)

I am concerned about all the areas, but the area I visit most and can speak to is Ocean Beach. For the last few years I've gon fairly often, independently picking up trash and observing. Every time I go when I see shorebirds I see dogs chasing them. I often see bags of poop on the beach. The birds were here first, they are in decline, and they REALLY don't have alternatives. Their habitat is declining. We need to prioritize the migrating shorebirds, and most of all we need ENFORCEMENT. Realistically, dogs have other places to go. Realistically, the birds don't.

I support the strongest measures to protect wildlife, which in the case of O.B. I think is Alternative B. Alternative F maybe, if the boundary is rigid (I heard vegetation would be planted) and enforced. P.S. how do you plant vegetation in intertidal zones?

**Correspondence:** Dogs need to run, just like we need to exercise. An unhealthy dog is an unhappy dog, and an unhappy dog is a violent dog. If you take away 90% of the places dogs are allowed off-leash, then the level of dog aggression will rise.

As for the argument that dogs destroy the wilderness, well, that's complete pfoeey. Humans have and always will destroy more. The GGNRA should be working on stopping rainforests being cut down, not on stopping dogs from being happy. This is supposedly a revised version of the old plan. What exactly have you changed. Next to nothing. Why do you feel it is necessary to squash the livelihood of our furry friends? It is a waste of time.

I am 13 years old but I felt that it was necessary to come all the way across SF to get here. Maybe that will make you think about what you're trying to do to the community.

**Correspondence:** I walk my dog off leash several times a week at the beach at Crissy Field. The walks keep me and my dog happy and healthy, and they also keep her tired and well behaved when we aren't at Crissy Field. I don't think it is in the best interest of the residents of San Francisco to take away so much space where dogs can free. This will overcrowd other areas of the city with dogs, and will be much worse for the human residents of the city.

Please help me and my dog stay happy & healthy by allowing us to use the open spaces we were

---

promised to run free and enjoy the outdoors - the beautiful outdoor spaces make San Francisco special, and it would be nice if everyone were allowed to continue to enjoy them.

**Correspondence:** We love having our dogs on the beach with us and they love the water and freedom on the beach. Especially they love us if we were to take that away from them it's like having to feel caged. As we humans we have freedom we can do anything eat anything we want well dogs have the same thing they are like humans to but different looking and fuzzy fur. Imagine if it was you and someone told you you can't go on the beach how would you react? how would you feel? if you like animals reconsider them to be free on the beach everyone deserves to be happy free and most of all loved. Having love is everything for dogs and it would mean a lot to them if you said they can go on the beach without their leashes that would pull their necks all the time. and if they are passing the beach it would be like you're teasing them if you don't like being teased don't do it for the dogs. If you see how they act on the beach they love it and so do we. So take it BACK and let them be free please.

**Correspondence:** The proposed plan to ban people with dogs from 99% of GGNRA land would have a devastating effect on the people of San Francisco & the Bay Area. I have been walking my dog in all your parks for over 30 years. It means the world to be. This is an urban park given to the GGNRA with the explicit understanding that traditional forms of recreation would continue.  
We need recreation not an urban wilderness.  
The GGNRA needs to be held accountable to their promise to serve the recreational needs of the people of San Francisco.

**Correspondence:** The proposed restrictions pertaining to the Ft. Funston site fails to comprehend the use of the area. The greatest number of users are dog-related activities where thousands of citizens of San Francisco have been using this site well before it became part of the GGNRA.  
The NPS has failed to identify important habitats for wildlife. The Ft. Funston Bluffs do not harbor endangered species. The only wildlife seen at this location are ravens and a few red-tailed hawks. More important are the bluffs right above the beach, where the cliff swallows build their nests, but the NPS has failed to protect these birds and have concentrated and diverted their attention to the upper bluffs.

**Correspondence:** As a resident of the marina and a dog owner - these plans make the area less desirable. Having a dog and regularly using a dog walker - as numerous friends do as well - these proposed changes will make it basically impossible to 1) have easy access to an off leash area 2) it makes it unfeasible for dog walkers to do their job while keeping prices and availability w/in reason 3) getting a dog proper room to run and exercise - I am more concerned by two legged foot traffic, keg parties on the great meadow, and tourists who can't read and don't obey rules. Numerous times we see responsible individual and dog walkers call non responsible dog walkers/owners out for not picking up feces. We want to keep the parks beautiful and around for years to come - I just don't feel this is the way to do it. Education, ongoing community service - these may be better options but don't take away the areas and freedom for dogs, dog owners, dog walkers - this doesn't change things just for "dog people" - events, city experience, and the numerous friends that gather in these areas is affected. I support a lot of the GGNRA initiatives - however this is NOT one of them! If this goes thru - I would love for you all to be a professional in the city w/ an active dog - and see how it works!

**Correspondence:** San Francisco's many beautiful off leash dog areas - specifically Crissy Field and Fort Funston - are what makes this city so special. This is a dog city - we love our dogs and there is no reason to take these off leash areas away from them. Comparing the GGNRA areas in SF into other national parks is ridiculous - there are no bears running around SF or other animals present in other national parks that would pose a legitimate threat to off-leash dogs. The incident at Crissy Field involving Charlie and the horse is the only incident I have heard of, and it was frankly the fault of the officer riding the horse who had no business riding through that area and frightening dogs. This plan is restrictive and completely unjustified.

**Correspondence:** We are parents, dog-owners, voters and business owners in SF. We are very upset about the proposed changes to off-leash access for dogs.  
We have walked our dogs, often with children, on Crissy Field, Baker Beach and Ocean Beach for over 12 years. There are ~120,000 dogs in SF - more dogs than children. In an urban environment, it is not realistic, desirable or SAFE to deny dogs off-leash recreation in a city like SF.

Off-leash access is critical for SAFE well-socialized dogs. The city and families will suffer without it.

Dog owners are also nature lovers! We financially support the Nat'l Park system, GGNRA, Friends of NPS, CI, etc. We believe in wild places and preservation. But this is an urban environment! It is not realistic to deny park use to the over 100,000 families who own dogs in the city!

For over 20 years, Alternative A has been in place. Leave it be.

**Correspondence:** The proposed plan has a number of serious shortcomings, and its an embarasment that our elected officials and public services have proposed such an incomplete and shortsighted plan. A few points that I would like to draw to your attention:  
-dogs and dog areas promote community building as it allows for owners, walkers and the general public a chance to meet in a comfortable area  
-off leash dog walking develops dog socialization  
-controlled areas will in time develop anomisty, stress, and a brewing sense of angst within the community  
-off leash dog walking areas enable many dog walkers to earn a liveable income  
While I could go on, the point I want to make is good dog owners are an asset to this community, help us make sure all support dog owners and enforce legislation upon the careless and ignorant, don't take a fascist approach to oppress the many to support the few. We appreciate your leadership and trust you will make the right decision by rejecting this proposal.

**Correspondence:** I visit East Beach with my dog almost every day, rain or shine. We've been going there since he was 2 months old and now he's 26 mos. It's the highlight of our day and I love to watch him run with the other dogs he meets there. He's a rhodesian ridgeback and to watch him run in a wide open space is stunning.  
By limiting the amount of open beach and field, the assigned space will become dangerously crowded and probably unusable. Dogs need open space to run and trying to confine them will present hazards of both people dogs getting run into as well as ruining the enjoyment of visiting the beach field with your dog if it's too overcrowded to join.  
I also recently had a baby daughter. While I've seen how some families with young kids do not like dogs to play near them, I would love to have my daughter and my dog able to play together in the open spaces at East Beach. I also see that being impossible if the dogs are forced into an overcrowded, limited area. There are many other alternatives to the current proposal. Limiting the on leash section to be directly across from the parking lot, while keeping the stretch of beach in front of the marsh off leash could be a fair solve for all parties. Or in the essence of public pools, have an "adults only lap swim" period of time where dogs aren't allowed off leash. This could be during peak tourist hours from 12-2 pm, which also coincides with lunchtime, which will prevent dogs from interrupting picnickers.  
Again, there are many other solutions that do not limit the amount of of-leash space as significantly as the current proposal.  
I hope that a more fair and appropriate solution for all parties involved.

**Correspondence:** You are taking our comments & not hearing what we are telling you and asking for. You have had an agenda of your own all along and have not moved off your position. Do not forget what the "R" in recreation GGNRA means. There are so many choices for no dogs or dogs on leash, we must keep lots of space for the lots of dogs belonging to the lots of voters/taxpayers who demand the option to hike/walk with their dogs & let them chase balls, play together, and enjoy our beaches & open spaces too. The EIS is no option at all. I vote no on all proposals & the underhanded GGNRA reps. You work for us too.

**Correspondence:** Kudos to all the hard work navigating this very contentious issue. The current status quo is incredibly unfair to those who DON'T own dogs. As a regular user of Crissy Field, it is frustrating to see almost the entire area overrun by off leash dogs. We all have a right to enjoy Crissy Field. The preferred alternative is a fair balance that will allow dog owners a very large area to run their dogs off leash. I cannot understand why the dog owners do not like this.

**Correspondence:** Keep Fort Funston friendly to dogs!

The GGNRA as a governmental organization should exist to serve the needs of the people and promote harmony and peaceful co-existence for recreational use in the surrounding territories. Dogs are valued members of their family packs, not just simply property. A well socialized dog is a well trained and exercised dog. Without space and freedom (from leashes) it is nearly impossible to properly socialize a dog. The GGNRA is not adding more off leash space, they are in fact contracting this space in an urban environment with an ever growing population of people and their dogs. Listen to the will of the people and respect dog owners as well by expanding and maintaining the less than 1% off off leash recreational space now available. No to the draconian proposed Dog Management Plan! More open space for recreation, not less.

John Chirico

**Correspondence:** Dear reviewing committee:

Please do not restrict dog walking in GGNRA, especially in Crissy Field, Ocean Beach and Fort Funston. These areas are a crucial lifeblood of this city. I care deeply about preserving wildlife and would welcome

seasonal restrictions in specific areas to protect wildlife. However, this city depends on GGNRA areas for dogs and owners to responsibly recreate and enjoy, as there are not sufficient parks in the city to accommodate these activities. Responsible dog owners should not be penalized and restricted from use in these areas.

Our city is unique and lucky to have these beautiful lands within our borders. However, the fact that these fall under federal jurisdiction makes them prone to scrutiny that is appropriate for vast wilderness national parks but is inappropriate to these urban spaces. The SEIS and dog management plan do not account for this unique nuance of urban lifestyle which can and must coexist with nature and wildlife. I urge you to consider the needs of our large urban population and do not enact restrictions that are more appropriate to national wilderness areas.

Sincerely,  
SatKartar Khalsa

<b>Correspondence:</b>	My wife and I are have lived in the Marina District of San Francisco for over thirty years, within walking distance to Crissy Field. We have one small dog, Daisy, a miniature Schnauzer. Daisy goes to Crissy Field on almost a daily basis, either with us or with a dog walker.				

Having spent a great deal of time at Crissy Field, I have seen very few problems with off leash dogs on the beaches or the airfield. Almost all dog walkers are extremely responsible in terms of controlling their dogs and picking up after them. In addition, because of the weather in San Francisco and the water temperature, these beaches are not a prime area for swimming or picnicking.

I recommend that the regulations allow dogs to be off leash under voice control on both the East Beach and the Central Beach and on the whole of the airfield.

I don't believe any more restrictive rule would serve the interest of the people who use the park or make any significant contribution to maintaining the nature of this protected area.

Thank you for considering this comment.

<b>Correspondence:</b>	To Whom it May Concern:				

My name is Charlene Ho, and I have been a resident of San Francisco since 2007. My husband and I live in Noe Valley with our 7 month old Pembroke Welsh Corgi. Our dog is a valued member of our family. He frequently exercises at Ocean Beach, Crissy Field, and Fort Funston. He has a dog walker who takes

him to Fort Funston 3 days a week.

Like many San Francisco residents, we do not have a yard. The opportunity to let him off leash in a park is one of the ways he gets his exercise. His physical stimulation at these locations allows him to be the well-adjusted dog that he is. My husband and I were very disappointed to hear about the proposed new restrictions for dogs at the aforementioned locations. It will affect our entire family greatly. We would prefer no change to the current park plans.

San Francisco is known to be very dog friendly. Please do not change this. Generally, the dogs in San Francisco are well socialized and well behaved. I believe this is due to the openness of the parks in San Francisco. With these proposed changes, there will only be 100,000 dogs in the city that will not be as well socialized or exercised. This will only lead to unhappy dog owners.

I appreciate your time.

Regards,

Charlene Ho

<b>Correspondence:</b>	WWJMD? (What Would John Muir Do?) He would keep Ft Funston as it is. There needs to be a place for dogs to run off-leash, as there are very few places to do so. That area has been used that way forever. Considering how many people and dogs use the park there are very few issues. I've been going there for 15 years - with and without dogs - and have never seen a dog fight or confrontation. What I do see are scores of people and dogs enjoying the space. It is a unique place that brings the community together - people are smiling happy, talking to neighbors, really using the time to connect with each other and nature. Many here are isolated, busy, and live in small apartments. This allows dogs to get out, but really it helps the humans and makes the city a nicer place.

**Correspondence:** I am a 24 YR SF resident w/ 2 kids and a dog & I am a business owner - I am very supportive of the GGNRA & have in past supported it financially but this proposal is misguided.

Where is the significant environmental impact on these urban parks which rise to the level of trumping the sure to be negative impact on such a significant segment of the environment - US the dog loving population of San Francisco?

Many areas such as Baker Beach are areas rarely visited by non dog owners & greatly enjoyed by dog owners & dogs. The weather alone means dogs & dog owners are the people who typically use those areas. How does it make sense to close this to dogs?

I would like the GGNRA to have it put on record now that if you restrict so drastically the off leash areas in SF, over time dogs will become less socialized & THEN you may have a safety problem. Please Keep SF unique and as is!!!

**Correspondence:** Any way to curb the professional dog walkers that park at the gate on Lattie? not only are they parking illegally but are not using leashes and leaving lots of doggie calling cards behind. I recognize 5 or 6 vehicles that are there on and off all day. (Red Chevy Suburban and Mazda minivan, white pickup truck with camper are worst offenders- -I have photos of the cars if you like)

**Correspondence:** As a runner, hiker and biker on the trails of Marin and Crissy field, I completely agree with your recommendations for those areas. There has not been a single run that I've taken in the past year on your referenced trails or beaches where I have not had a negative encounter with an off leash dog. 100% o the time. It may be that I'm skittish as I've been bitten more than a dozen time by a dog in my life but every run, hike or bike ride an off leash dog makes an aggressive move to me. "Oh he's a good dog" doesn't cut it.

"If we want to encourage birds to flock to city parks, we should make some areas off-limits to dogs, researchers say. According to a new study in Israel, pooches can lower the diversity of bird species in urban gardens."

"To minimize this effect we recommend creating areas in gardens that will be inaccessible to people and dogs," the authors write in Landscape and Urban Planning. "This can be done by planning trails in such a way that relatively large areas of shrubbery will be far from them, and also by keeping dogs on leash, as required by law in Israel."

**Correspondence:** Please don't let the dogs ruin the beach, lagoon and stream areas. These should be off limits to dogs. It's such a wonderful place, the headlands, but small beach to have shit and piss all over. Check by your comment sign, there are two stinky piles. You can't trust the owners to be responsible. And who wants to be confronted, woken up, sand kicked on by a dog. Let the dogs go shit and piss on the trails, and have rangers there to give out stiff fines for the assholes who won't clean up. Does every beautiful park and beach have to be ruined by shit and piss; you dare not sit down anywhere. You are making parks toilets.

The dogs don't care, they just want the stickiest place to poop; so keep them on the land trails, on leashes, and other less special places.

Also please rope/fence off the fragile cliffs; they are getting trampled.

Larry Pruss

**Correspondence:** Off-leash dog walk is about being humane and that's what we should strive for in our society. Off-leash dog walk is what makes San Francisco great and sets us apart from other cities.

Off-Leash Benefits

For Dogs:

• Socialization - A well socialized dog is a well behaved one!

• Exercise - Many popular breeds, such as retrievers and spaniels, require substantial amounts of exercise to be on their best behavior!

• Need - Dogs are social animals by nature. To deny them the opportunity to play with other members of their species is to deprive them of a basic need.

For the Two-Legged Companions:

• Human Socialization - Humans benefit from the community and friendships established with other walkers.

• Family Outdoor Enjoyment - The whole family, including its four-legged members, can lead active and healthier lives while experiencing the joy of outdoors and beauty of our natural environment. Such family activities encourage children to appreciate responsible pet supervision as well.

• Access for the Elderly and Disabled- For some, walking a dog on leash is an impossibility. The availability of off-leash areas enables such people to have dogs and experience all of the benefits of dog ownership.

• Contagion of Play - Humans, studies show, catch the joy of play and obtain great enjoyment from watching dogs run and play.

• Exercise -Allows humans to walk or run with their dogs and contributes to physical health.

**Correspondence:** GGNRA was created in 1972 to "provide for the maintenance of needed recreational open space" for the people of the Bay Area. Congress stated that the purpose of the creation was to "assure the preservation of open space ... to provide public access along the waterfront, and to expand to the maximum extent possible the outdoor recreation opportunities available to the region."

Maximum extent possible and available to the region,how could you revise this now?

Our dogs are part of our family and enjoy the few open areas that they can run and enjoy the parks. Please do not limit the use of these areas.

**Correspondence:** To Whom it May Concern,

It is vital to have off-leash dog areas in the San Francisco bay area. A place for dogs to play, run, socialize, and get exercise is lost in so many places, and the fact that places like Fort Funston and Ocean Beach are havens for this is what makes San Francisco so special and dog friendly. I am from Arizona, where the leash laws are extremely strict and dog are confined to smelly and crowded dog runs. It is critical for the dog walkers, as well as health and happiness of the dogs and owners. Please reconsider this proposal and keep off leash areas open.

**Correspondence:** Dear Friends,

I've read the documents with a particular focus on Fort Funston where I have walked my dog for nearly 20 years. As your report shows, the vast majority of users (60% or higher) of Fort Funston are dog walkers and the number of adverse incidents related to dog walking are minimal (less than 2% of reported incidents).

I agree with some limitations on where dog-walking can occur but would like to see as much area as possible to continue to be open to off-leash dog-walking. And, it is very important that there be some kind of loop from the parking lot through the areas of the park that are allowed to be off-leash, rather than some very limited fenced-in area. Please, NO fences!

I also agree with setting limits on the number of dogs one person can walk, with permits required for numbers above those limits.

One thing missing from the report and recommendations in over 1,000 pages is any recommendation for finding ways for users of the parks to be part of the overall solution. I would encourage you to solicit a citizen-advisory team for each park that can help implement, improve, and manage whatever the final policies are for each park.

Thank you for your work and please, please, please, keep as much of Fort Funston open to off-leash dog-walking as possible.

**Correspondence:** Comments specific to Pedro Point Headlands: This plan's preferred alternative B is not the best option. NPS draws its conclusions by stating that dogs on leash in areas other than Multi use coastal trail would have an impact on red legged frogs, garter snakes and Mission blue Butterflies. None of these species exist in this area and there are no bodies of water anywhere on the site as mentioned in the plan. The NPS analysis of the preferred alternative is highly flawed due to this non-existent impact on these endangered species.

Additionally, the vegetation is very dense on this site so it is almost impossible for dogs to wander off trail if not on leash (which they would be) on all the proposed trails thus they would have virtually no impact on vegetation and would have no access to the restoration areas which are very steep areas.

There is also multiple hiking parks managed by the county within the city of Pacifica (i.e. San Pedro Valley County Park) where dogs are not allowed at all so an alternative is needed where people can walk their dogs on longer trails as reported overwhelmingly by previous public comments.

Because of the very low impact where no endangered species are at risk and the need within the city of Pacifica for more dog walking trails Alternative E is the best option- -allowing on leash dogs on all existing and PLT proposed trails.

**Correspondence:** As a voting SF citizen with a dog and a family I strongly urge Alternative A on Fort Funston, and its equivalent for the other sites in question. This entire process feels like solutions in search of a problem, and forcing local families with well-mannered dogs (and responsible handlers) to walk leash-only is unfair to both the residents and their animals. This is very un-San Francisco.

**Correspondence:**

Seriously, what are you doing? I mean, I really, really don't understand. You heard the public comment - - the fury - - the resulted from the publication of your plan the last time. And instead of listening to what the people who actually use these areas with their dogs need, you've instead tightened the plan to be even more restrictive. Since when does a plover have more rights than a human or a dog? I really have no idea how you can think that this plan is a good idea, in a city that reveres and celebrates its dogs and the responsible people who love them. I walk on Ocean Beach with my dog nearly every morning, and you know how many other dogs we see during the hour we're there? About four - - all of them regulars. Know how many fisherman we see, who are far more disruptive to the wildlife? About a dozen. And surfers? On good surf days, several dozen, at least.

My guess is that the people putting this plan together don't have dogs. Otherwise, you would realize that your perceptions about dogs and their impact are all wrong. Please be reasonable. Please open yourselves to actually listening to what the citizens of this city want. Our beaches were given to your care on the PROMISE that they would remain recreational spaces, which we need so badly in a city this tight and small. Keep your promise, please. After all, you are the one who made it.

Jenny Johnston

**Correspondence:** After reviewing the range of alternatives, including the preferred alternative, I support Alternative A.  
All other alternatives failed to consider the impact limiting off-leash activity in our Natl. Recreation areas. If space is limited, more off leash dogs, walkers, and owners will be forced together creating increased conflict of dogs and people. The space limitation will cause an increase in dog fights and stress which leads to unwanted animal behavior. Off leash walking creates happy, healthy, and well adjusted dogs. Also it fosters happy athletic owners.  
GGNRA is a recreation area, and as such providing an area for people to run, play, and picnic with their pets is an asset. Implementing any alternative other than A will be costly and time consuming. Increased regulation will only increase dollars spent.

**Correspondence:** My wife and I are San Francisco residents in the Marina District. We have a 2-year-old Australian shepherd named Bear. She is an active pup who needs daily exercise to be healthy. The problem is that my wife and I both work full time and cannot be home during the day to walk her properly. We are grateful that Bear is able to run and play off leash at the Crissy Field Beach "Dog Run" - with out this exercise with a professional dog walker, Bear would be terribly unhappy - and on a personal note, we as her owners would be equally unhappy.

I am writing today to let you know that there is a very personal impact at risk here. We live in a city that we love and one of the reasons is the amount of recreational space afforded to us. Bear is part of our family and deserves to utilize that space as well. It is critical that the GGNRA allow dogs off leash in recreational areas because that is what we use them for - exercise, play, and overall health and wellness.

Thank you,

Alex Livingston and Amanda Livingston

**Correspondence:** Dear GGNRA

I've been walking my dogs at fort Funston and Crissy beach for 35 years. I've seen no problems. Both places are very popular. I think I've seen maybe three rangers on my walks all these years. Now you want to spend millions of dollars to get rid of me! Why? The sand has covered all your stupid fences. You have to bulldoze the sand the keep the paths passable. If you want an empty parking lot, ban dogs. Maybe that's what you want. It's been a wonderful place for people and their dogs and children. No child has been hurt up there. Children get hurt by dogs in their own homes wiht irresponsible dog owners who don't walk their dogs on GGNRA land. By taking away land you make areas more crowded and you will have trouble.

<b>Correspondence:</b>	<p>Science has shown that dogs help reduce stress in humans. They have been an important part of society for hundreds of years. A happy dog is a well exercised dog that has access to off leash areas to run. Changing the current rules will make this far more difficult. Please allow us to continue to access the beautiful off-leash areas with our dogs. There is significant human impact if they are reduced.</p> <p>Dogs break down social barriers and allow community to come together. Please preserve the off leash spaces to allow us to continue as a positive, healthy community.</p> <p>Thank you!</p>

**Correspondence:** GGNRA is an urban Recreation Area. The parklands that are managed by NPS have  
had access for dogs and their guardians and provide critically needed open space for city dwellers to  
exercise and recreate with their dogs. Until now San Francisco has been a relatively dog friendly city  
and I strongly want to retain the current dog access policies and the already very limited off leash access  
areas that we have. We chose to buy a home and live in district 1 outer richmond primarily because of the  
dog policies and open space access. Alternative A - no change in policy or local action to return  
management to the city are the only alternatives that look reasonable, and yes, I did read all of the  
alternatives!

Beth Pruitt

**Correspondence:** Dogs are hunting animals they have to be able to run outside. If they are kept inside the house all day their instincts will be frustrated. They will become neurotic, and growl and snap at people. They have to have a place to run free. There also have to be some rules about where dogs have to be on a leash, and about where they can't go; to protect wildlife. See the following opinion paper for more details

**Correspondence:** Walking my dog off leash, throwing her a ball, watching her swim and play with other dogs fills my soul and makes living in a city doable. Without off leash areas this city would lose a lot of appeal. Dog walking is one of my favorite recreational activities, it is simply not the same on a leash. We are becoming more isolated having a place to stand with a group of people and share the joys of watching our dogs play & run is important socialization for people & dogs. Dogs keep some people from depression and going crazy, dogs need a place to run.

My 96 yr old mom has a dog, she can not walk it on leash, she goes & sits on a bench enjoys the park or beach while her dog runs. She lives alone, this is important to her.

**Correspondence:** The GGNRA lands are within and adjacent to the urban landscape of San Francisco, where pollution and other urban factors directly impact the health of the environment. Dog use of the areas has minimal impact compared to other GGNRA-sanctioned activities, such as the building and maintenance of commercial buildings on the land - the Beach Hut, parking lots, East Beach bathrooms cafes - where visitors tourists are encouraged to visit. Singling out dog walkers, who are often residents of the area and who walk or drive shorter distances to the parks, is misguided. Further the much of the vegetation at Fort Funston and the few areas where dogs are now allowed is not indigenous could even be considered weeds a hazard to the environment. I'm fine w/ sharing spaces - perhaps limitations (and better signage) as to when dogs may be allowed in certain areas (to accommodate the Snowy Plovers on Ocean Beach for example), but shutting off Fort Funston and other areas of the GGNRA to dogs to the extent of the GGNRA "Dog management plan" is misguided and using my federal tax dollars for an effort that directly impacts my (and my dog's) quality of life in San Francisco is short sighted and anti-community. Instead, better signage, reasonable rules such as limiting the # of dogs per person, better education of the park rangers, and input/funds from the private sector specifically to support park-dog co-habitation would promote more good well in the community while providing for conservation efforts. I would suggest a fund-raising campaign (such as your initial Chrissy Field restoration campaign) to fund dog use preservation efforts - like the installation of dog fountains, dog-only fenced areas, doggie bags disposal staff. See Oregon Seattle (and even Point Isabel in the East Ry) as examples.

**Correspondence:** Whether there are designated off leash /or on leash areas of the GGNRA land or not people need to let their dogs run play off leash. If there are not large designated areas for responsible pet owners to take their dogs off leash your going to have a lot of rule breakers out there. If the areas are clearly marked with appropriate signs there will definitely be more compliance. I know which areas we are allowed on leash which makes me assume all other areas are safe to be off leash. I would be very angry to receive a ticket/fine in one of these many confusing unmarked trails.

**Correspondence:** In Re: Rancho: We do not feel like you are hearing us. We have commented & commented & your compromise is a postage stamp sized dog park, we want to continue to walk & hike wiht our dogs in a larg off leash area. You ask for specifics, however, there are no street signs out there to describe an area. Give us back off leash from the creek @ Farallone to the spine just past San Pedro MT Rd up to the neighborhoods & streets of Montara. The no change is from when you took over & we had off leash everywhere. The frogs thrived w/ dogs already. Are you going to have on leash kids to keep

them out of the creek catching frogs & tadpoles? Since you have taken over we have had more illegal campers, a huge fire, overgrown foliage hmpiring trail access & the pampass grass, that was almost under control, is everywhere! ATVs & motorcycles are still on the trails, I can see their headlights & hear their motors.

**Correspondence:** I have lived in Montara for over 16 years and have walked my dogs on the Rancho Corral de Tierra lands for the entire time. On our daily walks we have noted that the predominant use of this area are dog walkers, who prefer "off leash" use. There are a few hikers & a few bicyclists - but the dominant use has ben dog owners - I purchased my home with the intent of using the area in my retirement to enjoy the surroundings (with my dog). We have a unique environment, low density population with lots of open space, we need to establish an off leash zone!!!

**Correspondence:** 1. High energy dogs need to have opportunities to run around, supervised by their owners.  
2. The ROLA area is much too small to be effective.  
3. Given the vastness of the Rancho area, surely dogs and their owners can share in the wealth of the area along with bikers, horse riders, and walkers.  
4. The general, non-dog walking public have multiple options to walk and enjoy our scenic coast and parks, whereas, dog owners are so very limited in where they can enjoy walks with their dogs.  
5. Most dogs and their owners are considerate  
6. Offer training classes for dogs/owners?  
7. Could a considerate owner/trained dog get a badge, or something that could be worn, to allow for off leash walking?  
8. I am, unfortunately, not able to run with my dog, due to my physical condition/aging. Please don't restrict an important quality of life, for me and my dog, by not allowing me to walk my dog unleashed. This assumes that I leash my dog whenever meeting up with walkers without dogs, or contact with unfamiliar dogs.  
9. I moved to Montara because of the open areas where I could walk my dog freely  
10. I know there have been some dangerous incidents involving dogs - often these involve a particular breed (eg. Pit Bulls). Similarly, there have been dangerous incidents involving children. The incidence is very low compared to all children and dogs. We do not ban children from parks because of bad behavior of a very few children. Similarly, it does not seem right to ban dogs based on bad behavior of a tiny minority of dogs/owners.  
11. The Plan Objectives seem to not address the needs of the Montara community who have successfully co-habited with wildlife and vegetation, while walking their dogs off leash on our beautiful trails.  
Thank you for your time and consideration.

**Correspondence:** Please provide trails to get to Rancho ROLA for more off leash exercise for dogs. I have a service animal who is on leash all day with me and needs space to exercise off leash to be calm enough to do his job for me. The current proposed ROLA in Montara is TOO SMALL to exercise an 80 lb dog.

I moved to Montara so I could exercise him and myself in the open space here without getting in my vehicle. Most of my neighbors moved here for the same reasons. Please don't ruin our neighborhood and force us all to move. We need a reasonable amount of open space to exercise dogs off leash (2 miles at least).

There are more trails here you could make off leash and still accommodate non-dog owners.

**Correspondence:** I have been coming to Fort Funston for over a decade and it is my favorite place for dogs off leash and the amount of space makes it a wonderful retreat for dogs and humans alike. If you don't get along with one dog there is so much more space to retreat to. At any one time there are hundreds of dogs at Fort Funston, and suddenly limiting them to 10% o that space would be a travesty. Fort Funston's off leash dog area should stay just the size it is.

**Correspondence:** Comment on Ocean Beach SPPA section:

GGNRA Dogplan/EIS Pg 920: The Document States:

During a long-term monitoring survey conducted from 1994 to 2006, 48 off-leash dogs were observed chasing western snowy plovers (Ward and Ablog 2006).

1. This Ward and Ablog citation is not applicable to SPPA since it is a study of Crissy Field WPA, not SPPA.
2. 48 dogs over a period of 12 years results in about 4 dogs a year. That seems pretty low impact

The law enforcement incident reports from 2008 through 2011 showed that there were 729 incidents reported for having a dog off leash within the Ocean Beach SPPA during the period (July 1 through May15) when dogs must be leashed.

1. This same data (Appendix G) shows the incidents of disturbing wildlife is very low or non-existent, most of the violations are related to leash law.
2. This same data (Appendix G) shows decreasing number of dog incidents from 2001-2006 before the new leash law 36 CFR 1.5, and then decreasing again From 2007-2011 after the new leash law 36 CFR 1.5
3. If compliance to current law is poor, why do think a ban of dogs altogether will be well complied with? Most people are very used to walking there dogs there now and will probably continue to do so since there are no other open space alternatives in the area

The document identifies SPPA as a moderate dog walking area. If thats that case than monitoring and citations could be used to enforce the leash laws.

In Chapter 3 of the EIS it states:

In November 2006 and July 2007, GGNRA adopted emergency regulatory provisions under 36 CFR 1.5, requiring on-leash dog walking when plovers are present (July 1 to May 15) in the Crissy Field WPA and Ocean Beach SPPA, and signs stating the seasonal restrictions were posted. A final seasonal protection rule, as detailed in the GGRNA Compendium (NPS 2009f, 31), was published on September 19, 2008.

This is at least a year after the US v Barley decision. The report claims disturbance of snowy plovers increased immediately following the decision in 2005 (This is not true according to your own data in Appendix G). What does that data show in recent years (2011, 2012, 2013)?

In Chapter 3 pg (252/253) of the EIS it states:

The NPS began western snowy plover surveys at Ocean Beach in 1988& The average number of plovers observed per survey during the winter was highest in the 1994-1995 survey period, at more than 54 plovers, and was lowest in 1999, at less than 13 plovers (NPS 2010b). The winter population of western snowy plovers was on average above 30 plovers per winter survey in 2002-2006 (NPS 2010b). Therefore, the numbers of western snowy plovers vary year to year based on a variety of factors, including conditions at other wintering sites, the width of the beach, the severity of storms, and other influences. &(NPS 2010b, 22).

It seems the population of these birds is variable form year to year with many other influences that dont

include dogs. I was on Ocean Beach in Late October and counted at least 50-60 snowy plovers in one small area. It appears the situation is improving and no action is necessary (Alternative A).

Each time an individual study is cited in this document, it says dogs may influence could disturb-nothing conclusive. It sounds pretty speculative to me.

The summary rational statement for Alternative A states:

&potentially limit their use of preferred habitat and interrupt roosting or foraging behavior, which causes birds to expend energy; frequent disturbance of this type affects fat reserves needed for migration and breeding.

I see these birds running around constantly expending energy when no dogs are present, would a brief encounter with a dog really matter? The expense of energy would be incremental.

In addition, frequent disturbance doesnt appear to be happening. I walk my dog every morning and evening on Ocean Beach. I see lots of snowy plovers and have never seen a dog go after any them. To me that would suggest disturbances are occasional at best.

Table 8 pg 246 indicates: Critical habitat has been designated for this species (Snowy Plover), but it does not occur in GGNRA. If Ocean Beach SPPA is not a critical habitat, then stable or increasing numbers of the birds overwintering implies no change to existing rules are needed.

#### Chapter 3 of the EIS Visitor Experience/Environmental Justice section

The document states: Some ethnic or low-income populations may be more negatively affected by off-leash dog walking that is a ridiculous and unscientific conclusion to reach from a random phone survey. They cite a roughly 7% dfference in response between two income groups. Due to the uncontrolled nature of the informal survey that would be well within the error band; especially if there are very few respondents in any of the income groups. They also cite 11% o respondents thought the dogs discouraged use of GGNA by disadvantaged groups. Thats is a meaningless and highly subjective, speculative statement.

The document states:

Latinos expressed the most concern&For example, dog owners assume that other people will like the owners dogs as much as they do; dog owners let their dogs approach other people without first asking their permission; and owners do not react to their dogs begging for other peoples food.

That is a completely absurd generalization. I, and many dog owners I know simply do not do that.

This entire section of the document seems to me like NPS is grasping at straws and trying to link dog walking with negative affects on low-income groups, minorities and other disadvantaged groups. I find this tactic deplorable and highly offensive

**Correspondence:** Thousands of San Francisco residents visit these parks every day without incident and while I appreciate the NPS's desire to meet the needs of the American public that visits GGNRA, the unique nature of these urban parks requires flexibility in also meeting the needs of San Francisco residents, both human and canine. The evidence that dogs damage fragile wilderness areas is weak at best. Better posting of existing regulations is all that's needed to educate visitors with dogs and overwhelmingly responsible vast majority of dog owners will happily assist in politely enforcing the rules. The proposed plan, which dramatically reduces off-leash access for no apparent reason. The public comments overwhelmingly opposed this plan, which is a solution looking for a problem and should be discarded or heavily modified to reflect the needs of the community.

**Correspondence:** I am against any new restrictions on the area in which dogs and people can recreate together, both off and on leash. This plan will cut where people can walk off- and on-leash by 90% compared with where people can walk with dogs now. The GGNRA has ignored what the people want, and are moving forward with an extremely unpopular plan and poorly thought out plan.

The GGNRA was created for the maintenance of needed URBAN recreational open space. That's why it's designated as a National Recreation Area, not a National Park. With the new dog management plan, the GGNRA is reneging on its promises to preserve and protect recreational access in region. The places like Fort Funston where people and dogs are free to recreate in a semi-natural environment are some for the safest and cleanest parks in the region because of the excellent care of the dog walking community.

There is no credible reason why people with dogs are not allowed to have adequate and reasonable space to walk their dogs in the vast 80,000 acres that comprise the GGNRA. Please do not impose these restriction on the people and dogs of the San Francisco Bay Area.

**Correspondence:** For people who don't want to be around off-leashed dogs, there are a myriad of trails available in Marin (99% o GGNRA land) including Tennessee Valley Cove where you can go without crossing paths with a canine.

Muir Beach and Oakwood Valley have for decades been off-leash dog walking spots- long before they were owned by GGNRA.

To make people get in their cars, wait at a five minute one way stop light thru the tunnel to go to Rodeo is not environmentally the right thing to do.

We need to share our trails with all user groups, and yes that means people who responsibly walk their dogs off-leash. And for those who don't pick up poop, or can't control your dogs, we need enforcement not a total ban on the vast majority of dog owners who are responsible.

Why are you spending all this energy making sure people with dogs have to drive further than they normally would to simply do the everyday activity of walking their dogs off leash? (And why are you more concerned with creating more parking spaces for tourists than implementing more mass transit for tourists?)... If all the Ocean Beachers have to drive to Rodeo, and all the Marin people, how much daily carbon foot print will that add up to?

**Correspondence:** Hello, I am writing to urge you to disallow unleashed pets on hiking trails in the GGNRA. These animals can become a threat to hikers, children, and other animals, and dog attacks on trails can easily become a major issue.

It is a small thing to leash a pet. It is a huge tragedy when an unleashed animal attacks and mauls a hiker, child, or pet.

Please do the right thing.

Respectfully,

Thom Morris

**Correspondence:** I've lived in San Francisco for 7 years and have been a dog owner for only two. Alamo Square is our main park, but we (and I do mean myself and my dog) greatly enjoy the open spaces, other dogs, and their owners of Chrissy Field and Fort Funston. The benefits of having access to these areas are obvious: exercise, play, socialization.

Because living in the city comes with a specific set of challenges in its own right, having a dog in this urban area raises the need for these kinds of designated open spaces.

Also of valid merit is the fact that this plan pays no consideration to the impacts on the physical and mental health of both dogs and their owners if dog walking is this severely restricted.

While the need for more responsible pet guardianship is needed (namely, picking up after dogs), this plan is very short sighted and unjustly restrictive. This punishes responsible dog owners for the bad actions of a few irresponsible ones.

To me what makes our area that we live in so unique is the vast amount of gorgeous hiking trails available to us. I work from home and break up the day by taking my dog on a hike each and every day. My German Shepherd runs up and down the hills, chasing bees and moths, etc. To think I might eventually have to have her on a leash at all times KILLS me. There are plenty of "no dog" trails already. I suggest that those who are annoyed by dogs use them.

When I moved to Marin in 1992 my neighbor clued me in to "the dog trail". He was referring to the Oakwood Trail. It has been known as the dog trail for years. Why on earth should it become a "tourist" trail? I suggest the non-dog people drive just a bit further and use the Tennessee Valley beach trail.

**Correspondence:** Changing the current dog plan at Crissy Field is needed because not having the dogs roam free during the mating/breeding period of the snowy plover was not being observed. Dogs on leash is generally not observed anyway and I saw no difference this summer during the mating/breeding window. Any plan that is implemented needs to be enforced starting with making sure dogs are on leash in the areas they are supposed to be. Around 5 or 6 pm people come out with their dogs and let them run free. Crissy Field, Sweeney Ridge, Ocean Beach. Restricting dogs completely in areas of sensitive wildlife habitat should take precedence. The only way to do this is to not allow dogs completely. Some dog owners let their dogs run free into the bushes regardless of the rules.

**Correspondence:** Fort Funston is so important to my dogs and me! I have healthy, beautiful, well trained, licensed dogs who thrive on the exercise they get off leash at Fort Funston. When we are walking at Fort Funston we see maybe one visitor there without a dog per every 50 visitors. The vast majority of people who use the park do so because of the off-leash dog experience. Dog walkers by and large also keep the park clean and free of rubbish/dog waste. Please don't restrict the off leash areas that are so crucial to the health of our dogs.

**Correspondence:** I am a 34 year resident of San Francisco and have been a dog owner for 18 of those years. I am a home owner as well. I am writing to protest any changes proposed to restrict the current off leash dog rules at Ocean Beach, Crissy Field East Beach and especially Fort Funston. I am a regular user of these RECREATION areas with my dog(s) when I am not working. When I am working I have Professional dog walkers who take my dog, Rigby (and Nico prior to 2011), to both Crissy Field and Fort Funston FOUR DAYS A WEEK!

I am a very responsible dog owner who picks up after her dog and keeps him away from any areas that are marked for restoration. I know for certain that my walkers are equally respectful.

These Recreational areas are for the Citizens of San Francisco for their use and recreation and should remain as they are currently being used.

I feel quite strongly that any changes to the current use and rules would be a violation of the rights of the tax paying Citizens of San Francisco. These RECREATION areas are currently and happily being used by many a dog owner and their dogs. We all work hard and deserve the joyous play we have with our dog pets at these beautiful areas.....we need the play time to be balanced. Balance is important for dog owners AND their dogs. Dogs need off leash play in wide open spaces and owners NEED their time with their dogs in OUR CITY'S beautiful off leash areas.

I also want to emphasize that there are more dogs than kids in SF and that they have rights as well. PLUS, the dog walking industry is HUGE in SF and employs many, many residents who pay taxes on their businesses and provide a much needed service to hard working people here.

By changing the use of Crissy Field East Beach, Ocean Beach or Fort Funston would be hurting many businesses, dog owning residents and the dog population.

I implore the GGNRA to leave us all these areas as it has been and stop these disturbing plans to revoke our rights.

Sincerely,  
Patrice Catanio

**Correspondence:** I am a responsible dog owner in San Francisco. It is absolutely necessary that we take our dog out every day to exercise, interact with other dogs, people, experiences. She has grown up in the city where she has been lucky enough to live near the wonderful Doboce park, however the daily routine must be broken by treats like beach days at Fort Funston with 1,000 of her closest friends or day hikes up in the Marin headlands. Say the word beach or dive in earshot of Barley and she starts salivating. She lives for the great out doors. Maybe its because we live in a typical 400sqft studio on the second floor in the lovely lower Haight neighborhood. Or maybe its because shes a dog and they love playing fetch and tug running around being a dog. We are responsible and respectful. We carry a backpack with extra poop bags, leashes treats water and toys. We are also not alone. I have never met a dog owner at any of the GGNRA parks who was irresponsible. We clean up after ourselves, pro actively prevent conflicts with our dogs and respect those who are not comfortable around our k9 friends. San Francisco offers so much to its residence but one thing lacking is clean open spaces. Now the plan is to restrict the best off leash dog ares. Why? Can someone explain this to Barley. Shes not going to understand why she cant play at

---

her favorite parks any more. Oh wait, She can be on a leash. Its almost the same, except that a well trained dog knows that while on a leash it is working. No pulling, No smelling that, No playing with that dog, no introducing yourself to that human. Dont get me wrong Barley loves walks but as soon as that leash clicks off there is an energy that cannot be matched. It's disappointing that one of the most open minded, coexisting citys in america is loosing its liberal attitude.

As I mentioned earlier, we take the pup to one of the local dog parks just about every day with the occasional weekend trips to the beach or hike up in the mountains. This new plan would essentially keep me restricted to dog parks such as Doboce, Dolores, Alamo Square and Corona Heights. So whats the big deal right? Other than Corona, none of these are fenced in and are surrounded by traffic. Luckily our dog is old enough to understand the boundaries of these parks, however as a puppy we were reluctant to let her off leash and the times she did step out of bounds were terrifying. Also these parks tend to be over crowded with people other dogs and homeless encampments. They show the wear and tear of use which the parks of the ggnra do not. We have to keep an eye out for our wondering pup making sure she doesn't get into the mud which is full of giarida, peoples pick-nicks or mess with the homeless. The only worry free area is fort funston where as soon as we park the dog had total freedom to play and i dont have to worry about anything except where Barley hides her ball. Pulling these parks from our go to's forces us to go for longer drives down to Santa Cruz or stick to the same old torn up local parks. its s shame anyone would limit this resource for absolutely no benefit to the community. Why did I move here?

<b>Correspondence:</b>	Ladies and Gentlemen,				

I have commented previously. My comments are restricted to the Crissy Field Area because that is where I go with my dog.

With the exception of the "no change" map/plan, no other alternatives adequately accommodate the elderly or people with disabilities to walk and exercise their dogs off-leash:

1. Exclusion from all hard services to walk dogs off-leash - - the path.
2. Lack of convenient parking to access permitted off-leash areas.
- 3 Distance to walk to gain access to off-leash area.
4. The inclusion of areas that are either grass or soft sand - - surfaces which are difficult/impossible for handicapped or elderly to walk on.

It is disappointing that you have made no substantive changes since the last time I commented.

Margot S. Parke

**Correspondence:** To whom it may concern:

As a regular user of numerous GGNRA trails and beaches, I wholeheartedly support alternative A: No Action. My family and I rely on the GGNRA for many of our recreational needs, from hiking to surfing, and feel strongly that the space should also be available for off-leash dog recreation, as designated by current regulations.

Let us take Rodeo Beach as an example. We visit Rodeo Beach at least once a week, typically on a Sunday or Saturday. Some days it is warm, sunny, and crowded; other days it is cold, foggy, windy, and deserted. Yet no matter the weather, there is always at least a handful of dog owners throwing balls for their dogs to run and catch. If the beach is crowded, the dog owners tend to move towards the southern part of the beach where there are usually fewer people. If the beach is empty, they tend to make use of the whole thing. The point is that most dog owners are responsible when it comes to keeping their dogs under control so that they are a nuisance neither to the environment nor to other beach-goers. In fact, far from being a nuisance, one of the great joys of visiting Rodeo Beach is watching the dogs play with one another, run at full speed, jump into the waves, and enjoy the sort of freedom few other places can provide. I trust that the authors of the dog management plan have had the opportunity to witness this joyful phenomenon.

In reviewing the SEIS document, I was delighted to see that the off-leash regulations at Rodeo Beach would only be slightly changed by all but the most ruthless plan (Alternative D), to which of course I am fervently opposed. However, even those plans that are most generous to dog owners (Alternative B, C, E, and F) would simply redistribute the demand for off-leash dog areas in the Bay Area. This poses a serious problem. Dog owners who ordinarily use Crissy Field or Muir Beach will flock to Rodeo Beach, for example. Not only will this increase vehicle traffic over the Golden Gate bridge and through the Marin Headlands (which is only supported by two small roads, which are already congested with tourist traffic), but it will also risk turning Rodeo Beach into an over-used dog-park. That would be terrible for both dog-owners and other visitors. By giving dog-owners a greater variety of choices (as the current regulations provide), not only will their dogs be happier, but so will the other people who use the areas for a variety of recreational activities.

Moreover, the complexity of some of the Alternatives strikes me as wholly unenforceable. The current regulations at Tennessee Valley offer a good example. A few years ago, I met some friends there for a hike. We had a dog with us and were disappointed to find that dogs were not permitted on the Tennessee Valley trail (for understandable reasons, having to do with the effect of their "predatory scent" on the

wildlife). Off the parking lot, however, we noticed a sign for the Miwok trail, which does allow dogs. We enjoyed the trail very much, but eventually it dumped us back onto the Tennessee Valley trail about one third of the way from the parking lot. As we were walking back to our car, we were approached by a ranger, who was eager to give us a citation for walking our dog on the Tennessee Valley trail; but we explained that we took the Miwok trail without knowing that it would take us back to the the Tennessee Valley trail. Like most rangers, he was understanding and kindly let us go with a warning. Despite the excellent signage along those trails, there was no indication that the dog-friendly Miwok trail eventually turned into a trail on which dogs were forbidden.

The point of this story is that these new dog management rules- -which stipulate, for instance, that dogs must be on-leash on trail A, but can be off-leash on the south end of the beach, but cannot set foot on trail C- -will only frustrate dog owners and the already overextended rangers who will be charged with enforcing the new rules in addition to their other important duties. It would be much better to designate certain particularly fragile areas as off-limits to all dogs (as in the current policy) than it would be to negotiate the fine lines of the particular spaces where dogs are allowed under particular conditions (as in the various Alternative policies).

In conclusion, the GGNRA has been an invaluable resource for dog-owners who really do need spaces where their dogs can run free, which is a joyful form of recreation not only for the dogs and their owners, but for those who have the pleasure of watching them play. If the water is too frigid for us to jump right in, we can live vicariously through those delightful animals who fearlessly plunge through the waves after nothing more rewarding than an old tennis ball. It makes us all better people and better citizens, more generous with and more appreciative of those freedoms which we have been given.

Making the proposed changes to the GGNRA dog policy risks ruining that by, at best, forcing people to travel farther to other areas within the GGNRA, protecting the resources of some areas, while overtaxing those of others. It would, moreover, be sad to see all of the hard work that has gone into producing this 1,500 SEIS document wasted when it finally comes to be implemented and is found completely unenforceable due to its needless complexity.

Dog-owners are generally very responsible (having a dog is much like having a child, but without the college tuition). They tend (in my experience) to take particularly good care of these magnificent lands which have been made available to us; I often see them picking up loose trash along the beaches and trails, which inspires me and others to do the same. But, of course, it is only possible for them to do so if their dogs are allowed to be off-leash.

Thank you for taking the time to read and consider my comment.

Sincerely,  
B. Saltzman

**Correspondence:** The plan should include access to trails from County View as today. This is along the built edge of Tamalpais Valley on two sides. Access trails exist (with the local Tam Valley Community) from Marin Avenue as well as County View. Current trails include Miwok access to Tennessee Valley Parking lot - again close to housing. Dogs (in family - not dog walkers) tend to behave on trails (versus wide open spaces). This is also a very social way for local Moms to hike walk dogs.

**Correspondence:** GGNRA DOG MANAGEMENT AT MUIR BEACH - Comments

I have followed the GGNRA's efforts at Muir Beach to bring salmon back to the creek, and to restructure the beach and the parking lot. I have been to past meetings and I would like ot make some comments and suggestions concerning Muir Beach.

1. Many residents of Muir Beach and nearby areas walk on Muir Beach at least once a week, if not more. Many of us bring dogs because we enjoy walking their dogs off leash and we know that dogs need exercise in order to remain healthy. For many of us, it is not possible to exercise dogs unless they are of leash because we cannot run and the dogs need to run. My experience for the most part is that these dogs are under voice control, the owners are careful to pick up after their dogs, and many of us also pick up trash on the beach which comes directly from people visiting the beach or from the ocean where people have thrown it. Generally we try to come to the beach when it is not crowded.

2. It seems that the salmon have not returned to the creek, at least not yet. I was told by a park employee that it was doubtful that the salmon would ever return because they had been gone so long and because the creek still dries up in the winter. In any case, people represent a much greater hazard to the salmon than dogs do.

3. It is clear that the current goal of the GGNRA is to encourage use of the beach by tourists to the Bay Area and by residents who live in the nine Bay Area counties, but not necessarily Marin. If this goal is successful you must remember that these tourists may come to the beach only once or twice in a lifetime, while residents of Muir Beach and the surrounding areas often come at least twice a week or more. For example, I have been coming to Muir Beach with my dogs, my children and now my grandchildren for 49 years. We have enjoyed being at Muir Beach several thousand times as opposed to once or twice in a lifetime. Please do not forget the residents in your quest to appeal to tourists.

4. Most people who like to walk their dogs off leash will find another place to go if Muir Beach becomes a leash only area. This means that local residents who now walk to the beach will have to drive to another area. This is not a good choice for the environment. It also means that Muir Beach residents will have no place in their town where they can walk their dogs off leash.

5. My observation is that you are not considering possibilities for dog management at Muir Beach other than requiring that all dogs be leashed at all times. I would like you to consider one of the following

compromises so that the local residents feel heard and represented:

A. Allow dogs to be off leash on weekdays because the use of the beach is low on those days. Require leashes on weekends.

B. Allow dogs to be off leash until noon every day and leashed after noon. This alternative will give some weekend time to local residents who work elsewhere during the week.

C. Allow dogs off leash at all times except peak times during the summer months.

Like most residents I am sympathetic to much of what the GGNRA is trying to accomplish. However, I like to think that local residents and their needs are being considered as well.

Penelope Foster, Mill Valley

**Correspondence:** Marin County Dog Walking Area

1. People should be allowed on all GGNRA beaches
2. Dogs should be allowed on specific beaches.
3. No more than 3 dogs per walker
4. All dogs should be on leash /or obedient to command
5. Areas should be (must be) prominently signed
6. All rules MUST Be enforced!!!! This requires staff - paid or volunteer
7. It must be remembered that the animals vegetation native to the area is more important than all else
8. People are trespassers. Dogs are people's responsibility

**Correspondence:** I moved from the east coast to SF for many reasons. One of the main reasons is the beautiful parks and open space. There's nothing else like it in the country. I live in an extremely small condo. I need to use the parks to keep my sanity. My dog is at home alone most of the day. I only want to go to parks spaces that allow dogs. Please keep as many areas open for people like me to enjoy with our dogs! It's a huge part of our daily life.  
I'm also concerned about the time, resources, and money that it will take from GGNRA to implement these new proposals. I think the time, resources, money can be better utilized on other important issues. Keep the parks open for ALL of us to enjoy! We already pay a HIGH price to live here!

**Correspondence:** 1. But in reality the shorebird population in SF is declining. Dogs have alternatives. Birds don't. The 5% is the part great for wildlife (but for dogs & other disturbances)  
2. Dogs and people (and wildlife) can co-exist peacefully and safely. The solution is better education of the public, park rangers and dog owners, not the whole sale/blanket limiting of the rights and traditional privileges of dog owners (and those who enjoy the company of dogs) on the <5% of GGNRA lands currently open to dogs. At Fort Funston ocean beach, the areas are naturally inaccessible to the very young (strollers), elderly handicapped. Unless GGNRA plans to pave over/build paved paths into these areas, dog use in these areas does not impact the part of the population who may have an issue with the dogs there. Again, 95% no dogs, and 5% dog use ok lands does not equal undue degradation of GGNRA lands (which are our tax payer lands, BTW).

**Correspondence:** I would like to advocate for your continued designation of areas where citizens can hike with dogs.

I live in the Muir Woods Park neighborhood and use the following areas on a daily basis, and ask that they be kept open for dog use:

- 1) The Miwok fire road between Panoramic Highway and Coyote Ridge. This trail is used extensively by hikers, bikers and dogs and everyone just seems to get along. I would suggest extending the area allowed by dogs to include the small steep stretch up to the top of Coyote Ridge on the Coyote Ridge Trail.
- 2) The area to the east of Four Corners including Homestead Hill is used extensively by local citizens to walk their dogs off leash. Please keep this open and available.
- 3) The Coastal Trail between Rodeo Beach and Muir Beach is the only extensive rigorous hiking trail open to dogs in GGNRA. Please keep it available.

Thank you.

**Correspondence:** I don't understand why you want to shrink the constituency that are actually using the park. I walk the oak valley trail every day and 98% o the people I run into have dogs. Do you think they will leave their dogs at home and continue to support the park? They won't and you will lose their support and they'll be forced onto the freeway just to hike. It's the one trail dogs can be on out of all the others. If people don't like dogs they can walk on any of the countless trails that don't allow them. There is public interest in dogs being well exercised and all dogs shouldn't have to suffer for a few bad apples. Not all dogs do well in dog parks and the oak valley trail is the only place in Tam Valley where human and dog can exercise together. When you work 50 hours in San Francisco with a commute as most of us do this kind of efficiency is needed.

**Correspondence:** Comment Disapproving the 2013 DEIS/SEIS Dog Management Plan

The GGNRA a Public Recreation Area is in a densely populated urban area of San Francisco , San Mateo, Marin Counties who's residents with dogs use the open space in its jurisdiction. Fort Funston is one of these recreational spaces that has had Off Leash with Voice Command & control with Dog Walking for over 50 years and should remain that way. I personally meet people in their 80's who have been coming to Fort Funston for 50 years while walking with our Four Pawed Friend. These areas have evolved over decades as Dog Friendly Recreation Areas that have been the first and best place for residents of these counties to bring their Dogs. This is because of the health benefits that both the Dogs and their Guardians receive from an outing to these Recreation Area's.

When the San Francisco Parks and Recreation thru the approval of Prop F in the 1970's gave these open space area's to the GGNRA it was understood that these area's would remain open to the popular recreation of off leash voice command dog walking.

The following Paragraphs contain information that refutes the GGNRA claims being used to drastically reduce or eliminate off leash dog walking in Fort Funston, Ocean Beach ,Fort Baker, Crissy Field, Montarea Beach and San Mateo County land. I implore you to read them along with my concluding comment at the end of this letter.

Thank you

,

Thomas Roop (13)  
Daly City CA  
November 26, 2013

\*\*\*\*\*

Where As:The GGNRA's Dog Management Plan/DEIS/SEIS asserts that the change in Dog Management Policy is essential to protect the resources of the GGNRA. The DMP/DEIS/SEIS is unlawful and must be set aside (thrown out) because:

Â” Where As:The enabling legislation and Memorandum of Understanding with SF require the GGNRA to exercise "sound principles of land use, planning and management."

Â” Where As: GGNRA management is in persistent violation of the enabling legislation, the Memorandum of Understanding with SF for this park property, and NPS Rules, Regulations and Policy because they have failed to perform "vital monitoring" which NPS considers an essential element of sound principles of land use, planning and management.

Â” Where As:GGNRA management can provide no monitoring report to substantiate visitor use patterns or conflicts, no documentation of degradation of the Recreation Area resources due to the presence of

dogs nor their guardians, as well as no documentation as to whether resource degradation is inevitable or under the control of management prior to proposing these management changes.

Â“ Where As: Federal law requires site-specific, peer reviewed studies to justify and guide changes in management of National Park System resources.

Â“ Where As: The SEIS acknowledges the GGNRA has no such site-specific, peer reviewed studies for the impact of dogs and their guardians on water quality, vegetation, soils and wildlife in the GGNRA.

Â“ Where As: There are no plant species which are endangered or threatened on Federal or State registers that have designated "critical habitat" in the GGNRA. Displacing recreation to enhance the growth of any of these listed plants is not required by the ESA and violates the enabling legislation for the GGNRA. However, we see that GGNRA management has displaced recreational access to plant these plants with regularity, the most egregious location being Fort Funston.

Â“ Where As: The Monitoring Based Management Strategy is again a poison pill. This proposed compliance strategy has a measure of compliance that is totally subjective, with the GGNRA making all the decisions. Further, short or long term (permanent) closures could be triggered by any number of conditions totally under the purview of the GGNRA. It appears the language is designed to allow the GGNRA to make most or all of Fort Funston a native plant restoration/habitat, despite the fact that this is inconsistent with the enabling legislation and MOU with SF.

Â“ Where As: Federal Law prohibits agency actions which are arbitrary, capricious and an abuse of discretion. Accordingly, this agency action, findings and conclusions should be set aside as prescribed by the Administrative Procedure Act, 5 U.S.C. 706 (2)A.

#### A brief post WWII history of Fort Funston (aka Doggie Disneyland)

Where As: Post WWII, Fort Funston (FF) was pretty much abandoned. In the 50's and early 60's, FF was a fabulous habitat - but not for wildlife. Rather, FF became a favorite hangout for seedy S.F. and Daly City gangs, drug dealers and users, sexual predators, off road recreation vehicle enthusiasts and a few off-leash dog walkers. Parents in nearby neighborhoods forbade their children from playing at FF due to its reputation for being unsafe. Tired of being harassed/harangued at other city parks, the dog community soon recognized the value in FF. It was clear that FF provided them an opportunity to recreate with their dogs off-leash in a beautiful seascape without any of the hassles presented at the other parks. No longer would they have to be inundated by the claims that they were infringing on the enjoyment of the city parks by adults and children who were afraid of dogs and complaints about dog waste.

Where As: Soon the word got out in the dog community and in the mid-late 60's FF realized a huge spike in the number of dogs and their human companions. It was these people who became the true custodians of Fort Funston. They were the ones who turned it into a real park. They took pride in their park. They kept it clean and safe. In fact, because of the significant presence of dogs and their humans, the criminal element soon left FF in search of a new refuge where they had control and would remain unchallenged. Many went to Golden Gate Park. Truth be told, the criminals were afraid of the dogs. And the dogs, being the good judge of people that they are, didn't like the criminals. Yes, it was because of the dogs, and only because of the dogs, that FF was now a VERY desirable park. This did not go unnoticed by the National Park Service.

Where As: When SF deeded FF in 1972 to the NPS/GGNRA, they inherited a spectacular park that was

safe and well taken care of by its true custodians - the dog community. In return, the GGNRA promised via its enabling legislation to respect the historical usage of FF which included off-leash dog walking. This promise was codified in the GGNRA 1979 Pet Policy which officially designated FF as an off-leash dog park. In the early 1990's a new management philosophy permeated the GGNRA where conservation would now trump everything else in this national recreation area. Most notably, it would trump recreation. In 2000, after several illegal closures at FF, Fort Funston Dog Walkers sued the GGNRA and won. In 2001 the GGNRA arbitrarily and capriciously wiped out 30 years of promises and promulgations and voided the 1979 Pet Policy (see Fort Funston Forum for details). This action was reversed in 2004 in Federal Court and then again in 2005 in Federal Appellate Court. The 1979 Pet Policy was reinstated as the law of the land and remains that way today (also see GGNRA Pet Policy History). Presently, we are embroiled in a process, i.e., the 2013 GGNRA Pet Management Policy SEIS, which assures us that the GGNRA will once again remove off-leash dog walking from all of its recreation/park spaces.

#### The GGNRA'S Proposed 2013 Dog Management Plan

Where As: It was at the conclusion of the latest legal battle wherein Federal Judge William Alsup reinstated the 1979 Pet Policy, over the objections of the GGNRA/NPS/DOI, that a statement was made by the Judge that became the impetus for initiation of the planned changes in Dog Management in 2006. The June 2005 decision by Judge Alsup cited in this SEIS noted that the court's action "in no way restricts the authority of the Superintendent to 'protect the resource,' including the protection of endangered and threatened species."

Where As: The GGNRA/NPS/DOI asserts that the change in Dog Management Policy (DMP) in this SEIS is intended to protect the resources of the GGNRA. A Freedom of Information Request was made for the data, documents, and/or Staff Report which substantiated the GGNRA's claim that there was controversy over the dog policy, compromised visitor and employee safety and resource degradation which warranted the change in Dog Management Policy (DMP) and DEIS. The GGNRA's response merely stated: "The Staff Report and other documents you seek do not exist at this time". [emphasis added]

Where As: There is no mention in the DEIS or SEIS of the judge's additional admonition that "Congress has committed the proper balance of resource protections and recreation to the park professionals. Their judgments should be respected by the courts absent a violation of the law." [emphasis added]

Where As: The GGNRA has violated the law by ignoring the fundamental legal underpinnings provided by the enabling legislation, NPS Laws, Rules, Regulations and Policy. The GGNRA has demonstrably violated the enabling legislation and the Memorandum of Understanding with the City by failing to meet their requirement to utilize sound principles of land management.

Where As: The enabling legislation states specifically: "In the management of the recreation area, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall utilize the resources in a manner which will provide for recreation and educational opportunities consistent with sound principles of land use planning and management."

Where As: The MOU with the City states: "The 1975 agreement for the lands transfer from the City of San Francisco to the NPS states that the National Park Service, acting through the General Superintendent, agrees to utilize the resources of GGNRA in a manner that will provide for recreational and educational opportunities consistent with sound principals of land use, planning and management.."

Where As: The National Parks Omnibus Management Act of 1998 established the sound principles for

land use, planning and management. This Act provided the framework for fully integrating natural resource monitoring and other science activities into the management processes of the National Park System. The Act charges the Secretary of the Interior to "continually improve the ability of the National Park Service to provide state-of-the-art management, protection, and interpretation of and research on the resources of the National Park System", and to "assure the full and proper utilization of the results of scientific studies for park management decisions." Section 5934 of the Act requires the Secretary of the Interior to develop a program of "inventory and monitoring of National Park System resources to establish baseline information and to provide information on the long-term trends in the condition of National Park System resources."

Where As: NPS policy specifically states: "Natural resource monitoring provides site specific information needed to understand and identify change in complex, variable, and imperfectly understood natural systems and to determine whether observed changes are within natural levels of variability or may be indicators of unwanted human influences."

Where As: In short, site-specific, peer reviewed studies are required to justify and guide changes in management of National Park System resources. Clearly, the failure of GGNRA management to conduct any consistent monitoring or study of the resources in the GGNRA is a violation of Federal law. This SEIS highlights the fact that GGNRA management is in persistent violation of the enabling legislation for this park property. GGNRA management can provide no monitoring report to substantiate visitor use patterns or conflicts, no documentation of degradation of the Recreation Area resources, as well as no documentation as to whether resource degradation is inevitable or under the control of management prior to proposing these management changes.

Where As: In fact, the DEIS asserted dogs negatively affect water quality in the GGNRA. Those assertions have been omitted in the SEIS with the following explanation on page 28:

Where As: "Although water quality monitoring currently occurs at GGNRA, no site-specific, peer-reviewed studies have been conducted at the GGNRA sites to document impacts to water quality specifically from dogs. It is also difficult to discern what is causing an impact to water quality, especially in a large metropolitan area where water quality may already be degraded. The literature review found very few investigations or peer-reviewed, scientific studies that document the isolated effects dogs have on water quality in recreational settings. Water quality has therefore been dismissed as a resource topic in this document due to lack of literature."

Further, the SEIS on pages 373 and 376, admits the following:

Where As: "Site-specific, peer-reviewed studies have not been conducted at the GGNRA sites for the sole purpose of documenting impacts to vegetation or soils from dogs.... Very few site-specific, peer-reviewed studies have been conducted at GGNRA for the purpose of documenting impacts to wildlife as a result of dogs."

Where As: Without the site-specific, peer reviewed studies, the GGNRA is left to argue that potential damage will be done should they fail to change the DMP. This is not sufficient to justify a change in the DMP by the standards set by the NPS itself.

Where As: The GGNRA has also embarked on a mission to create native plant habitats where no habitat previously existed. GGNRA management alleges this is a part of their obligation to "preserve" the park for future enjoyment, however, this is NOT what they are doing. When you read the overview for Fort Funston (in our full Comment text), it is abundantly clear that they are creating these native plant habitats,

and in doing so they are destroying parts of the park that existed long before the GGNRA took control. This process is not preserving anything. Additionally, this is in violation of their authorizing directive, as they insist establishment of native plant areas requires the exclusion of humans from the site, eliminating all recreational activity in the area. Essentially the GGNRA is creating habitats adjacent to heavily used recreational areas, and then subsequently utilizing the habitat as a means to eliminate the recreational area.

Where As: If you read the Affected Environment section carefully, you will learn that there are no plant species which are endangered or threatened on Federal or State registers that have designated "critical habitat" in the GGNRA. Based upon the ESA and the enabling legislation for the GGNRA, it is a violation of the law to displace recreation to enhance the growth of any of these listed plants in the GGNRA. However, we see that GGNRA management has displaced recreational access to plant these plants with regularity, the most egregious location being Fort Funston.

Dr. Suzanne Valente

\*\*\*\*\*

#### Conclusion:

In light of the fact that there is no substantial evidence that there are any endangered birds or plants at Fort Funston. I demand that the People's Public Land in the jurisdiction of the City and County of San Francisco and being Maintained by the NPS thru the Golden Gate National Recreation Area forever stay open and free range for Voice Command Off Leash Dog Walking. Therefore I reject Plans A,B,C,D,E,F in the current one foot thick DEIS-SEIS Plan which is to be withdrawn because it is shallow of any truth that proves that dogs are the menace to the land that the NPS/GGNRA would like us to believe!!!.

The NPS should make a permanent policy of the 1979-1980 Dog Management Policy Plan with full access to Off Leash Dog Walking under voice Command as it is now. This would also include a more progressive attitude in the maintenance of Fort Funston, IE repair or replace boxes for bags for litter pick-up, trash cans at all entrances and the north Sunset trail. The clearing of sand off paved roads, fence repair , the clearing of sand off stairs, the repair of south staircase to Fort Funston Beach and a more pro-active friendly attitude by the Rangers interaction with Dog Walkers!

All of this can be accomplished by ratifying The 1979 Pet Policy and making this plan permanent and open Ocean Beach south of Staircase 21 all the way to and through Fort Funston further south to and through Pacifica and through Montara Beach and all Beach's south under the GGNRA's jurisdiction to off leash voice controlled dog walking.

Thank You

**Correspondence:** We are a young family, living in Bernal Heights, and one of our favorite family outings is to take our terrier Chip, for a walk on the beach at Fort Fun and Crissy Field - sometimes both in the same weekend.

I understand the need for conservation, and caring for the environment - we own an electric car, and have solar thermal and photovoltaic panels on the roof of our house. But this GGNRA's proposal goes too far in an urban area like San Francisco. In my opinion, it doesn't address the following points:

1. Part of the GGNRA's founding charter was to preserve recreation for the residents of San Francisco, not to maintain a "backcountry experience" akin to a national park.
2. Off-leash dog walking is already prohibited on 99% of GGNRA land, providing ample space for people who prefer not to mix with off-leash dogs.
3. The vast majority of San Franciscans who enjoy these areas are walking their dogs. The proposals will prevent a large number of people taking recreation, but don't provide any clear benefit, other than to harmonize the rules with those of wilderness area national parks.

I commented on the original proposals and I was very disappointed that the GGNRA didn't go further in their revision, following the volume of feedback they received. I hope the GGNRA can remember their mandate, listen more closely and better serve the residents of San Francisco, by revising these plans.

**Correspondence:** This plan will cut where people can walk off- and on-leash by 90% compared with where people can walk with dogs now. It is going to create a huge impact on the Bay Area, which we simply can't afford.

I had hoped that this new plan would be significantly different from the original GGNRA dog management plan, because thousands of people-the overwhelming majority-submitted substantive comments in opposition to the plan. But the GGNRA did not make significant changes. They ignored what people want, and are moving forward with an extremely unpopular plan no matter what we say.

The GGNRA was created in 1972 for the maintenance of needed recreational open space, and to expand to the maximum extent possible the outdoor recreational opportunities available to the region. That's why it's designated as a National Recreation Area, not a National Park. With the new dog management plan, the GGNRA is reneging on its promises to preserve and protect recreational access to the GGNRA.

There is no credible reason why people with dogs are not allowed to have adequate and reasonable space to walk their dogs in the vast 80,000 acres that comprise the GGNRA.

Re: Dog Management

This discussion has gone on for years now, and I urge you to make a decision, establish a rule, and then enforce it. I personally believe that dog owners make extravagant demands, and I don't believe that even the best behaved animals are entirely under control.

I also believe ardently in the democratic process, but this issue has gone on far too long and at considerable expense of money and time. I admire, respect, and am grateful for GGNRA, have been a long time supporter, and wish you good fortune.

**Correspondence:** Frank Dean, Superintendent

Golden Gate National Recreation Area

Building 201, Fort Mason

San Francisco, CA 94123

Attention: Dog management

Dear Superintendent Dean,

Let me first introduce myself. My name is Alan Brooks and I am 82 years of age and currently reside in San Mateo where I have lived since 1978. My history in San Francisco begins in 1946 where I attended Polytechnic High School, graduated and subsequently I served in the United States Coast Guard during the Korean War. After military service I attended City College of San Francisco and San Jose State College. I was employed by the San Francisco Unified School District as a secondary school teacher. Later I joined the Faculty of City College of San Francisco where I taught art until my retirement in 1992. I am writing to express my opposition to any alternative plan under consideration by the GGNRA that restricts Fort Funston acreage and the beaches of San Francisco from full off-leash dog access. I have two large athletic dogs that require space to exercise. They are trained, well behaved and under voice control. I have run dogs at Fort Funston for over 2 decades and have never experienced a conflict with any person nor dog.

I have been walking my dogs off-leash on San Francisco beaches for more than 40 years; initially on Ocean Beach from the Cliff House to the Zoo and when that was taken away I moved over to Fort Funston.

As a point of interest, I should mention that I am a volunteer at the San Francisco Maritime Park and have

provided maintenance and crew service on the scow schooner, Alma, for nearly 15 years. In addition let me emphasize again that I am unalterably opposed to restricting off-leash dog walking from all the San Francisco beach areas and Fort Funston. And finally I must mention that I have noticed a recent decline in maintenance at Fort Funston. The crumbling roads are now disappearing under large drifts of sand being blown over the roads. Many fences have fallen down the cliffs or are being buried by sand and the signage has deteriorated or is missing. Respectfully,

Alan Brooks  
1216 Palm Avenue

**Correspondence:** I would appreciate it if you would allow off leash dog walking @ Rancho Corral de Tierra because:  
1. off leash is the dominant use @ this site  
2. this is a low density population area where bicyclists/walkers of dogs can take alternate trails if they wish to converse with nature privately  
3. locals keep the area clean & maintain the area by removing trash & keeping trails clean  
4. out of towners trash the area & then feral cats/racoons are more damaging than dogs.

**Correspondence:** I have walked my dogs off lead under voice command on Stinson, Muir and other GGNRA lands for years. This exercise is essential to their health and mine. The GGNRA's plan to limit by over 90% the lands on which dogs can be walked is unreasonable and massively unpopular, and the GGNRA has pushed forward this plan despite overwhelming public comments against it, totally ignoring the public's wishes. The Supplemental Plan does not address many of the criticisms made in public comments on the Draft, despite being required to do so. They have ignored both the people and the Board of Supervisors. 40% of households have dogs which will not get inadequate exercise and be denied access to Public Land.

The 1980 GGNRA General Management Plan offered a realistic view of the GGNRA. It acknowledged that much of the GGNRA, especially in San Francisco and southern Marin, is man-created landscapes, and called for managing Ocean Beach and Fort Funston to continue to accommodate relatively high use levels with a commitment to intensive maintenance in order to retain the appearance of a natural landscape. The new 2011 GGNRA Draft Management plan flies in the face of this 1980 plan. It's intention is to turn previously accessible land into "nature zones" for "back country types of visitor experience". There are millions of acres of park land available for this kind of experience in the US, but the GGNRA lands are

close to urban centers where families and their dogs need access for exercise, not a remote back country experience.

Respond to public comments (instead of ignoring them) and change the plan to include dogs on GGNRA lands, and recognize dog walking as a valid use of these lands.

**Correspondence:** My roomates, our dogs, our friends, their dogs and i go to noriega sands and fort funston often because of the dog friendly nature of the areas. Everyone there is so happy about having a place where we can all enjoy nature together. we are all very careful about our impact because we treasure having these places to frequent so close and convenient to where we live. I think it is unfair to ban dogs or restrict access to these public places for dogs and their owners. Pets in the city already have a raw deal because of the lack of places to run and play. WE DESPERATELY NEED OFF LEASH AREAS FOR OUR DOGS TO RUN AND EXERCISE.

**Correspondence:** As a 5th generation family of four with a dog, please continue to allow dogs at Fort Funston and the beach below it. My family and children (9 & 12) adore taking the dog for a run and swim with them.

Also I can see absolutely no logical reason to not allow dogs on the beach north of the main parking lot and south of the no dogs beach at Ft. Point. It is a great spot where my kids can play with our family dog and play in the water while the dog swims.

We have always had a dog that likes to swim in our family and we thoroughly enjoy access to the beach.

As a dog owner, we are compulsive about cleaning up after our dog and in fact clean up any dog mess we may find while on a walk in our neighborhood. We find this helps foster good will and it just plan the polite and right thing to do.

The majority of people who take their dog to a public area are respectful Don't let a few ruin it for all.

Please let the dogs swim!

Thank you,

Lisa Craib McMillan

**Correspondence:** I have been walking my dogs 2-3 times per week for over 20 years on Milagra ridge. I live in a development bordering the ridge. In all that time I have never seen any interaction between dogs (on leash or off) which has resulted in any contact closer than 100 feet (usually the wildlife spot the dogs and me and move off at their leisure). In fact, I see many of the animals in my development foraging, so it would seem that they have acclimated to the proximity of both domestic animals and people. I would maintain that continued walking on leash on all Milagra ridge trails would be advisable and not detrimental to anything I have seen over the years. In fact, during the day, off leash along the fire trail and road from the ridge to the High School would not seem to be a problem as I rarely (perhaps once per year) see any wildlife anytime later than 2 hours after dawn or two before dusk. Both the deer and coyotes seem to spend most of their daylight time well away from these trails during the day. I would suggest that signs be posted warning owners of small dogs that they should be cautious during dawn and dusk walks (even with dogs on leash), particularly at Muscle Rock where attacks of coyotes are not uncommon even on large dogs during the early morning. Incidentally, you should add "poster at park" to your How did you hear about this.

**Correspondence:** The GRNA is meant to be enjoyed by all citizens. Dog owners included. Dogs are a significant and critically important element of American culture and society in general.

The NPS GRNA plan Alternative A should be the continued course forward, Alternative F preferred by NPS is overstating and the issue. Dogs are not running wild owners are responsible and additional government action is not required.

As a tax paying citizen we expect and will settle for nothing less than full use of the resources we support and fund.

The NPS verbiage here in these summary remarks, "compromising", "not be available for enjoyment by future generations", "increased public expectations", "compromise visitor and employee safety".... these are examples of NPS EIS authors embellishing with the purpose of their specific agenda.

The public demands and will get full use of GGNRA resource. Alternative should is more than sufficient and the NPS needs no further intervention.

Politically and financially the NPS GGNRA should better focus their limited resources on more important and pressing matters than restricting the public from the enjoyment of this public resources.

A plan/EIS is needed because Golden Gate National Recreation Area (GGNRA or park) resources and values, as defined by the park's enabling legislation and the National Park Service (NPS) Organic Act, could be compromised to the extent that, without action, those resources and values in some areas of the park might not be available for enjoyment by future generations. Additionally, a dog management policy inconsistent with NPS regulations and increased public expectations for use of the park for dog recreation have resulted in controversy, litigation, and compromised visitor and employee safety, affecting visitor experience and resulting in resource degradation. The conflicts will likely escalate if not addressed in a comprehensive plan/EIS.

Dogs NEED to run. Many dogs NEED to swim. Dogs NEED to socialize (by running together, playing together, etc.)

Dogs NEED to be off leash. [as an SF resident, there simply is not enough space for dogs to run off leash!]

I suspect that this change in policy may be racially motivated. In my experience, Chinese people do not like dogs and are often afraid of dogs. With such a large Chinese population now in SF (and a mayor of Chinese decent) .. I suspect that this change in dog policy is racially motivated and supported by dog haters. This is at least something to consider.

Can't the city and the governing bodies of the land and common areas spend money and time on much more important issues than changing the dog leash policies!!! Come on.

**Correspondence:** As a dog owner and San Franciscan, I am concerned about the limited off leash areas this plan proposes. As a city which already has more dogs than kids, we are very lucky to have the number of off leash areas we currently have. Having such off leash areas allows friendly co-habitation by providing easy access to exercise pets.

If there are concerns about enforcement of existing policies, then a reasonable first step is to make sure those policies are clearly communicated. I have been very confused about which areas of Ft. Funston are considered "off path" for humans (who are heavier and more disruptive to their environment than any almost any other animal). If there are concerns about protecting the park, then enforcement of existing restrictions is a reasonable first step. Instead of spending money on a plan, the GGNRA could be making money by fining violators to existing restrictions.

I would like to continue to have access for my dog, but also want to make sure that the park is preserved so the park will still be there for future generations of dogs and dog owners, which does require compromise. Please consider keeping a similar level of off leash areas available for exercising dogs as we have today, even if new locations are identified as options.

Thank you for providing the opportunity to comment.

Jessica Johnson

**Correspondence:** As a long time Bay Area resident, I find the proposed dog restrictions in your plan to be deeply disturbing, particularly the elimination of off-leash dog areas. As a rule, good citizens who own dogs keep their animals in control and clean up after them at all times, without exception. There are, of course, bad citizens who own dogs, but these people should not be regarded as the model visitors of GGNRA lands. Just as you wouldn't expect all visitors to deface monuments and leave their trash behind, I ask you that you dismiss the flawed view that dogs off leash equate to an uncontrolled environmental impact. Most importantly, in this country we love dogs. And dog owners need to be able to access natural settings with their companions with off-leash areas for recreation. In my opinion it would be a cowardly and quintessentially un-American act to further restrict the already limited areas for on-leash and off-leash dog access. Please recognize our freedoms and scrap the proposed dog restrictions.

**Correspondence:** I object to the proposed new leash law/regulation proposed for Muir Beach and Oakwood Valley. For the past 30 years I have walked these areas, first with my own dog, and now with my friend's dogs. These beaches have always been considered "dog friendly" and have allowed dogs to run freely and socialize without the hinderance of being leashed. This is a concept long held in Carmel, California. Residents there have learned to control their dogs, clean up after them, and dispose of waste in containers provided. It is a joy to us to see dogs capering freely and playing in the ocean waves and shores. If dog owners can learn the proper etiquette, clean up, and learn to voice control their dogs, then they are not a problem. If time is going to be needed to enforce the leash law, it could easily be adjusted to citing owners who do not respect proper animal control and cleanup. Please reconsider this new proposal. Well-behaved animals deserve to run free too! Thank you!

**Correspondence:** San Francisco is one of the most exceptional cities in the world for many reasons, one of those being the near-unparalleled off-leash access dog owners enjoy in many of the outdoor recreational areas that abound here. Every time I visit other cities and towns in the bay area, I am reminded how lucky we are and, more importantly, how unlucky the people and dogs of other communities must feel. Most dogs cannot achieve the sort of exercise they need as a fundamental part of staying healthy and happy merely by walking on a leash, no matter how far or fast they are walked when accompanied by a human. Some receive adequate exercise if they accompany a person running, but that seldom happens for most dogs. The only way for our canine companions to achieve physical and psychological fulfillment is to allow dogs to run free, the way they have for hundreds of thousands of years. Another, probably more important matter, is the socialization of dogs, both with other dogs as well as humans. Dogs who spend their whole lives on leash tend to be more aggressive and skittish around dogs and humans, leading to attacks and injury for innocent humans and canines. Fundamentally changing the off-leash allowances that residents have enjoyed for years will significantly impact the population of San Francisco in many ways, almost all of them negative. The current off-leash areas provide what I and many others, including the Supervisors, believe to be an equitable sharing of our open space between those with four legged companions and those without. I urge you to reconsider the changes being discussed. Thank you for your time.

**Correspondence:** I writing with strong opposition to the implementation of the proposed restrictions for on and off leash dog recreation in the GGNRA. As a resident of Marin County and formerly of San Francisco, I have frequently enjoyed the off leash dog access available at Stinson Beach, Muir Beach, Alta Fire Road, Rodeo Beach, Ocean Beach, Baker Beach and Crissy Field. Using these areas with my dog bring incredible joy and happiness to both of us. I understand that the primary purpose of these lands is to provide public use and enjoyment. These areas are frequently used by dogs and humans together and I can honestly say I never witnessed or experienced a harmful dog-related incident in the GGNRA. These areas have been used for dog recreation going back decades and I do not understand what the impetus is to change them now and curtail dog access.

I urge you to consider leaving the current dog access in place as is. The amount of money required to enforce additional dog bans should instead be spent on upgrading the antiquated facilities at the beaches. During the previous commentary on this project, the public was overwhelmingly in favor of not adding additional restrictions on dog access in the GGNRA. That is still the case today. Please follow the charter of the GGNRA and keep dog access available to your fellow citizens.

Sincerely,

Anthony Brown

**Correspondence:** I am a native Californian and have seen in my life, the continuous loss of freedom, space, beauty, orchards, forests, lakes etc., given over to others to determine our destiny.

The dogs are family members and feel very much like humans. They bring us company and joy, even if we don't own one, which I do not. I love to see them happily cavorting about spreading joy and love.

Their joy becomes my joy. They add to the environment, in any venue, wilderness or civilization.

Does everyone have to be a prisoner to satisfy some obsessive people and their fears?

The original Californian did not have these compulsions to control life and others.

This is primarily why everyone loved California and decided to move here..... and then change it. They are slowly removing the elements which made the area what they love. They are vacuuming the essence out of Marin and California.

I firmly oppose forcing the dogs to be on a leash in the wilderness where life is spontaneous and poetic. Marin was not "sterile" but is becoming so. I want to share my life with animals , birds, fish, reptiles, bugs and people. I don't want to be sheltered from the creatures placed on the planet to live and teach us and vice, versa.

Sincerely, Jean Mastagni

**Correspondence:** As a life long resident of West Marin and a recent resident to Muir Beach, I strongly oppose the leash law. Quality of life for owners and their dogs depends on the ability for a dog to be able to run free on the beach; This is one of the primary reasons I moved to muir beach.. For the ability to walk my dog unleashed on a beach. When dogs are leashed they become more aggressive as they become more protective of their owners, and unleashed dogs have the opportunity to be properly socialized with other members of their species. Both the private areas in Stinson Beach and all of Bolinas have no leash laws. If you make Muir Beach into a leash dog region, of course the owners of the dog will simply migrate to little beach.

This area is a bit of a sanctuary for residents and it seems incredibly unfair to have that protective very small beach encroached upon by tourists when the main beach is made specifically for visitor recreation. in addition there is danger to both dog and owner alike migrating from the main beach to little beach... if you add the treat of an unleashed area you will surely encourage migration and very likely, potential injury to visitors and their dogs.

Due to the mandates of the coastal zone much for coastal region has given priority to visitors... please

---

consider residents requests to enjoy our beach, walk our dogs off leash without the additional visitors who would significantly change The neighborhood feel of little beach.. What a shame that would be.

Respectfully, Lesa Kramer

**Correspondence:** Muir Beach is the ONLY area within GGNRA, other than Rodeo Beach, where dogs may be exercised off-leash under the existing regulations. I disagree with changing the regulations to prohibit off-leash dogs from Muir Beach for the following reasons:

- 1) Although protection of the beach environment is important, there is little evidence that off-leash dogs in this very small area of beach have a significant adverse impact on the population of sea-birds and marine life in the GGNRA in general.
- 2) Closing Muir Beach to off leash dogs may displace some of those dogs to Rodeo causing increased traffic on the roads leading to Rodeo, itself with adverse environmental effects.
- 3) A vocal minority of dog haters should not dictate policy to the general public.
- 4) Nuisance dogs are occasionally a problem. These animals adversely effect the beach going experience for both those visitors with and without dogs. Rather enforce a leash-only rule, GGNRA should step up enforcement of policing the existing rules to remove nuisance dogs and cite their owners from.

**Correspondence:** I strongly opposed any measures that would further restrict dogs in the GGNRA. We are already highly restricted in where we can go and there are very few places dogs are allowed off leash. The open space is for all of us, and many are dog owners.

There has been a lot of construction in the Rodeo Beach area of the GGNRA. Huge parking lots and widened roads are far more impactful than dogs. These giant parking lots are not needed and the open space is critical to my well being and that of my dog. There is no evidence that dogs have an adverse impact on the natural area.

Please do not further restrict dog access to the GGNRA. I would support adding more trails that allow dogs off leash.

Thank you for your attention.

Norma Brach

**Correspondence:** Begging you to actually care, and ready this please. For years, I was one of those people frustrated by dog lovers. Constantly dodging friendly dogs coming up to me, dodging the poop bags left on the trails. Then, I got a dog, and after two years, finally got comfortable enough to hike with her off leash. And I observed something interesting. Frankly, the dog owners in this county are more considerate, and dogs better behaved, than most parents and their little kids (and I can say this, because I have kids).

I keep my dog under control, and I pick up her poop and dispose of the bags. I don't find myself accosted by other dogs. You know who does threaten me? Bikers with no sense of speed control and horseback riders who seem to think the trails only belong to them. So, why are you banning only dogs???

The places we are currently prohibited from taking our dogs off leash greatly outweigh those where we are permitted. Can't we compromise please? Throw us a bone (no pun intended), and let us keep Oakwood Valley Trail and Muir Beach.

Thank you,  
Susan Burns

**Correspondence:** I would like to encourage you to stick with Alternative A at least on just a few of the trails I hike and run every day with my dogs. You must realize that this NRA is surrounded by residential areas - much more so than most other National Parks. An accommodation needs to be made for those of us living here. we have limited alternatives due to the fact that most of the land surrounding us is parkland. I understand your desire for consistency in your regulations across all the National Parks, but that doesn't take into consideration our specific situation. Added to this is the fact that this is California and, at the risk of making a gross generalization, we are very active outside. I take my dogs (2) to Oakwood up to Alta and back down at least three days a week, two more days on Miwok from Tennessee Valley - up and back. These trails are heavily used by other dog owners. The off leash trails are by far the most enjoyable. Not only do my dogs like being off leash - but I get to be off-leash too. Leashes restrict both parties. A final point - my fellow dog owners and I are regular patrons of the Park. "The purpose of GGNRA is to offer national park experiences to a large and diverse urban population while preserving and interpreting its outstanding natural, historic, scenic, and recreational values." By restricting our use of the park by eliminating our ability to enjoy it with our dogs, you are contradicting your stated purpose. I have enjoyed these trails, this Park, for the 18 years I've lived here, it is discriminatory and unjust for you to change the rules at this point.

**Correspondence:** I oppose GGNRA's plan to take away public access to parkland for folks with dogs off-leash. I do not even own a dog and I think this is a terrible idea. The dogs and their owners are by and large very responsible and I don't think they should be discriminated against. The dogs need a place to run and play off-leash and those are shrinking rapidly. Please don't add to the decline of our fair Bay Area by restricting off-leash areas in GGRNA.

**Correspondence:** Please do not reduce the space where our dogs can run free and consider increasing the size of voice-control for dogs.

I am a San Francisco voter and I have a dog. I have had multiple dogs over the course of the 23 years I've lived in San Francisco. I have never had a dog that chased birds, much less caught them or caused any damage to wildlife or plants.

I use the off leash areas at Fort Funston, Ocean Beach and Crissy Field regularly, at least twice per month and often more. My dogwalker also takes my dog to Crissy Field every weekday morning. I also use the San Mateo and Marin county recreation areas offleash. In fact, if those places became on-leash areas, or worse yet, closed to dogs, I would not use them nearly so often.

From my experience, there isn't enough off leash space now and the areas get crowded and messy because of it. My dogs are much better behaved and more friendly to adults and children because they regularly run and get tired out.

For each of the maps, the voice control areas should be as large as possible.

**Correspondence:** I would like to voice my strong support for requiring dogs at Muir Beach be on leashes. I don't care too much about the Oakwood Valley Trail but off leash dogs have had a negative impact on visits to Muir Beach as well as damaging the habitats of native plants and animals. Dog owners too often refuse to take responsibility for their pets and should not be allowed to let their dogs off-leash at Muir Beach. I would hope the requirement is aggressively enforced if it is put into effect. Stiff fines please!

**Correspondence:** I live in the Castro with my dog Buddy and am very much opposed to this plan. Buddy is very much the highlight of my life, and in fact has helped me overcome depression and addiction. One of the draw backs with living with a dog in the city is that I don't have a backyard for him to go out and play in. And most of the dog parks in my area are very small and not big enough for him to get enough exercise - and he wont chase balls if there are other bigger dogs around (the guy is 20 lbs so fairly small).

This is where big parks like Fort Funston enter into our life. I take Buddy there 3-4 times a week in order for him to get enough exercise he needs, and be able to enjoy the beauty of a true San Francisco park. I can go on an actual hike with him off leash so he gets plenty of exercise and socializing time. We are very respectful of the park and marked areas where dogs and humans are not allowed and see most other dog owners doing the same.

Please please please don't cut back on one of the very few areas when I can actually go and enjoy quality time with my dog in the city.

**Correspondence:** I am not a dog owner. In some ways, I'm not even a "dog person." I hope you consider my comment in this light.

I am opposed to the new proposed rules to the extent they disallow dogs, or limit dogs to leash-only handling on certain trails.

I like to hike and I do so at least once a week. I am often on the trails with dog owners, or surrounded by dogs. It's outdoors; it's nature; dogs are natural there. I actually like to see dogs and talk to owners about the dog's breed or the dog's name. It makes us interact - - not demand to experience nature on our own terms or in a bubble.

I do NOT like dogs at restaurants or Target stores, but on a trail?? sure! Banning dogs or having them leash-only is excessive. To the extent the proposed rule is just a shortcut, so the enforcement agency can avoid assessing situation (to see if the dog was controlled or if someone is overreacting), then this new proposed rule will not withstand a challenge. (it's sort of lazy, really).

Don't ban the dogs; don't demand a blanket "leash only" status. Let's enjoy dogs out enjoying nature. And remember, I'm not even a "dog person"!

---

**Correspondence:** I believe the highest amount of environmental protection is preferable over all other alternatives. I am a dog lover and have been a dog owner. There are plenty of places where a dog can be taken off-leash as well as on-leash without having to shift more public land over to dog-friendly use.

Dogs impact others in numerous ways. First, one is far less likely to observe wildlife when a dog is present. I have seen bobcats, coyotes, owls, etc. in many of these areas and I certainly notice the lack thereof when I am with a dog.

Beyond that, it is the dog owners that are really to blame for poor dog management. If an area is designated on-leash, it is more often than not that only a few yards in, many people take their dogs off-leash.

Numerous times I have witnessed dogs chasing wild animals (e.g., rabbits, birds). The dogs' good-natured play could be trampling nests and/or young and the dogs' presence can deter wild animals from foraging for food.

Dog waste also becomes a repulsive problem. And, though I love to see dogs chasing one another, this play can be hazardous for folks who are less steady on their feet and not expecting to be rushed or bumped by a passing dog. We should have some areas where this concern does not present itself.

Naturally, if folks are eating, dogs will often come to beg for food or snatch food away. While the owners apologize and laugh about it, I have packed my food in for the picnic and I am not so amused.

While I understand the desire to have one's loving companion along for walks in nature, I do not believe this outweighs the rights of humans and wild creatures to also have the right to a dog-free environment. The bulk of the areas need to be closed off to dogs and the signage must be clear regarding which areas are open and what degree of freedom is allowed. Signage should also attempt to educate dog owners so they understand why so many of us can love dogs but not want them to have open access to parklands.

Much of this leads to the bigger issue of enforcement. This, I think, is also a big potential money-maker for the state. Expensive tickets for violating the agreements should be levied to help pay for the increased need for policing. It is a win-win to do this. The parks either make money or the problem improves sufficiently to require less enforcement. (Parks might also post a convenient and obvious phone number to report violations.)

**Correspondence:** I strongly OPPOSE the GGNRA Dog Management Policy. Based on its own admission, the GGNRA has not studies or data to back up the claim that dogs inhibit visitor safety or the natural resources of the recreation area. The proposed policy is based solely on anecdotal evidence. This is extremely poor public policy.

Furthermore, the policy attempts to expand the authority of the GGNRA beyond what was contemplated in the enabling legislation of 1972. In 1972, San Francisco voters agreed to include certain parks owned by the city and county of San Francisco in the GGNRA AS LONG AS the areas retained historical recreation access INCLUDING dogs being off-leash. Not only does this policy seek to restrict the historical recreation access but it also seeks to expand the authority of the GGNRA to decide to close off the areas too all types of recreation. This is NOT what San Francisco voters agreed to in 1972 and should not be allowed today.

The opportunity to allow dogs to go off-leash in certain areas of San Francisco is one of the few opportunities we have as San Franciscans to commune with a diverse set of neighbors. Dog lovers come in all shapes, sizes, colors, ethnicities, and belief systems. Our city is divided in so many ways- - none of this matters at the dog parks where neighbors come together as one and dogs roam free.

**Correspondence:** I strongly support the ban on dogs and off-leash dog walking at the Racho Corral de Tierra location. I run or bike through that area at least four or five days a week and cannot remember a day when I was not harassed by a dog that is offleash. While there are a few responsible pet owners who have trained their dogs to be under voice control or have them on a leash, the vast majority ignore the leash rules and allow their pets to interfere and threaten humans who are in the area.

It has gotten so bad that I do not feel comfortable bringing my children, ages 7 and 4, to that location.

They have been harassed and almost bitten numerous times. When I nicely ask the dog owners to please

---

keep their dogs on a leash, I am mostly ignored and occasionally threatened or verbally abused by the dog owner. This is not a tenable situation. I believe the choice has to be framed as to whether dog enjoyment of the open space is more important than human enjoyment of the open space. Thank you for your consideration of my opinion.

**Correspondence:** I would like to strongly SUPPORT any restrictive action GGNRA wants to place on off leash dog walking.

My children and family are constantly harassed by off leash dogs in our neighborhood as well as other parks around the City. In Golden Gate park, Crissy Field, Dolores, Precita Park - off leash dogs are constantly coming up to my kids and licking and sniffing them. When you are a 3 foot child, a dog coming up to you and sticking his/her nose in you face is INTRUSIVE. (I don't let my kids lick other people, I don't let my kids defecate in the streets)

Now I am actually a dog-lover - however, I think actual PEOPLE should have more personal freedom than animals. If a dog owner is not willing/able to control his/her dog (and shows no interest in doing so) then their dogs should be ON-leash.

I understand this is an environmental issue - but I think it is a human issue as well. Just because the cost of living and housing shortage is driving families out of the city doesn't mean our future generation of CHILDREN are less important than ANIMALS.

Thank you!

**Correspondence Type:** Web Form

**Correspondence:** I am the owner of two dogs and I frequent Fort Funston on a daily basis. San Francisco is a location in the world where there is an abundance of dogs and a need for off leash areas where the dogs can get exercise and their human companions get an opportunity to run along their side.

There are multiple environmental impacts on every portion of our country; however, that doesn't mean we are shutting down refineries and seeking alternative fuels any faster - production is up and although people are utilizing the electric car market it is not enough to have a large scale environmental impact and this is where the environment is impacted, not by dogs running through the jungle at Funston.

While I understand there is a vibrant ecology at Fort Funston, I also know that dogs are a part of our natural ecological environment and this particular part of the world is very important to owners and others who visit the site. There are other parts where the dogs do not wander which is not squandered by anyone's ability to visit and study.

I oppose closing of these parks for their current use and will continue to oppose as they are currently being utilized in a very positive and useful manner.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	General Comments:				

1. Cited studies are generally older data from 1996 to ~2008, do not adequately assess the impact of the late 2006 and 2007 Rule requiring leashes from Jul-May (36 CFR 1.5). There is no reference to the change in snowy plover populations from 2006-2013. In addition the EIS state there are many non-dog factors that effect the number of plovers overwintering in Ocean Beach SPPA, so you dont even know what affect if any are due to dogs. Banning dogs from the beach is a heavy-handed attempt to fix a perceived problem.
2. Cited studies use terms like may affect and possible disturbance from dogs. Thats not very conclusive.
3. I see more small children chasing birds than dogs. It would appear they are a bigger threat. Are you going to try and ban them too?
4. Document states the need for a clear and enforceable plan. NPS preferred alternative F, includes many differences based on area. Thats not very clear. Also, the NPS has already demonstrated enforceability problems now. How is changing to alternative F going to fix that? You still have the same resources; therefore alternative F does not meet this need.
5. Ocean Beach SPPA is in an urban environment and is not designated as a critical habitat for snowy plovers. Those of us who live in urban environments need access to our nearest open spaces to walk our dogs. It is absurd to try and create pristine wildlife preserve conditions in an urban space. The projects sited by the EIS at Point Reyes and Bolinas Lagoon should greatly enhance the snowy plover population eliminating the need for any changes in Ocean Beach.
6. At Ocean beach SPPA, you probably have bigger problems from teens and homeless hanging around the dunes at night then you have from walking dogs.
7. The EIS states that nearly all the snowy plovers survived the initial effects of the Cosco Busan oil spill and were still alive 2 years later. If they can survive that, they probably can survive the occasional chase by a dog (which I still havent seen actually happen)
8. The entry sign posted at the Noriega entrance to SPPA suggest keeping dogs at the shoreline to avoid

snowy plovers. That is where I see 99% of the dogs anyway; only people seem to hang out around the dunes. It appears no change to the current state is needed since most dogs are not running around the dunes.

**Correspondence:** I am disappointed by the lack of consideration of the local recreational use by dog owners and the city's history of access for voice-command recreation of residents, visitors and their dogs. The EIS does not give scientific evidence nor data that off leash access by dogs to these recreational areas is driving these proposed changes. We chose to live in San Francisco because of the dog friendly parks and voice-command access to places like ocean beach, fort funston, baker beach, crissy field and especially the lands end trail as well as on leash access in Sutro Park and the rest of Ocean Beach. There are many instances of alternate rules for local parklands and seashore areas managed by NPS and the need for "uniform and consistent rules" is a weak argument that only suggests an inconsistent ability of rangers to be knowledgeable in their local park areas, this is a vital ability in managing a non-wilderness, urban recreation area like SF bay area parks. I support maintaining the access that dog owners now enjoy, do not punish the owners and walkers of well behaved dogs for a few bad examples among the 150,000 dog owners in San Francisco!

**Correspondence:** Balancing the needs of the community as a whole and dog owners in particular is a very difficult task. Finding the balance between creating an environmentally sound policy while also ensuring availability of off leash areas is very important to a significant number of Bay Area residents, including me. I've lived in San Francisco for 25 years. Having had access to Fort Funston and several other areas that are part of the national park system and GGRC, I think it is vital to the community to keep the current off leash areas available to everybody. In terms of percentage of off leash areas vs. more severely restricted areas, it already feels very restrictive.

Please consider my comments as a vote toward the least restrictive policy (the one currently in place).

**Correspondence:** We live 1/4 mile from areas affected by this plan, and strongly oppose it. Here are some of our reasons:

The GGNRA's first "dog management" was roundly criticized 3 to 1 in public comments against it and

---

opposed by the San Francisco Board of Supervisors. Yet almost three years later, the GGNRA has now released a new plan that is identical to the original with insignificant, meaningless changes.

The plan does not offer any evidence to support the need for such a drastic change in usage. The plan fails to manage the GGNRA for the recreational needs of the people of the Bay Area, in direct contradiction to its reason-to-be as described in the legislation that created it.

The Plan will severely cut where people with dogs, who have walked in the GGNRA for decades, will be able to walk in the future, without offering any evidence to support the need for such drastic change in usage.

The Plan fails to manage the GGNRA for the recreational needs of the people of the Bay Area, in direct contradiction to its reason-to-be as described in the legislation that created it.

The Plan wrongly acts as if the GGNRA is a remote wilderness, when it is actually located within and adjacent to a large city, with its services and environment inextricably intertwined with those of the cities that surround it.

Recreation is the reason the GGNRA was created, and it must continue to be its guiding principle.

**Correspondence:** Dear National Park Service;

I would like to comment on the draft plan in connection with the dog walking access both in the Mill Valley Area and at Crissy Field.

I have noticed that the "off leash" areas in your plan are very restricted. When I spoke to a park service employee at the open house, she explained that there were 2 main reasons for this; 1) people are not using the parks because of dogs and 2) there are environmental considerations in areas such as Alta in the Headlands. My comments will be both personal and not and are innumerable as follows:

1) There are PLENTY of areas in the park where dogs are not allowed, more so than areas where dogs are allowed. People with dogs need to compromise so perhaps people with our dogs need to compromise.

2) I have a dog who needs to RUN. I live in Mill Valley and I take him to Alta frequently. He is 4 years old and a leash walk would just not do. He is under voice control and rarely ventures far from the road. I cannot take him to the dog park because he is not fixed and he loves to go in the water. So the dog park means altercations with other dogs and a muddy and/or smelly dog when I get home. Rodeo and Stinson Beach are too far a drive on a regular basis.

3) I believe one of the options is to have part of Oak Valley off leash. This seems strange to me as there is so much wildlife in that valley. I understand that there is the endangered butterfly on Alta but not ALL of Alta. Is there a way to fence off the areas that are particularly vulnerable? Also is there proof that dogs on Alta are endangering the butterfly? That is such a large area - keep dogs just on Alta and not on the surrounding hills. Also, no dogs are allowed in much of the headlands - there is no need to deny access to all of the Headlands - or make them all leash required.

4) As far as people and dogs.... what about having times when dogs are not allowed? For example between 12 and 3 in the afternoon or something. That way if people REALLY want to go hiking without dogs they have that option.

5) I would imagine that the problem is not dogs per se but the number of dogs. Being a dog person myself I am often bothered by the number of dogs that dog walkers are walking on Alta. I would suggest limiting the number of dogs that are allowed to 3-4.

6) My suggestion about times for dogs and times for people could be particularly useful at Crissy Field.

Why not have afternoons for one and mornings for the other? That way everyone gets their needs met.

7. I have been walking dogs in Marin for years and I think the poop problem has improved greatly. It used to be a real mess but I rarely see poop left around anymore. People are awake and responsible and especially if bags and canisters are provided at the beginning of each trail.

8. I think it would be a tragedy to implement the rules put forth by the Park Service. One of the reasons I live in Marin and have not moved to Sonoma County is because there are so many public lands where I can walk my dog. I understand that with an increase in people sometimes there needs to be an increase in management but don't take away all of our dog walking leash free privileges.

9. Muir Beach is another area you are considering closing off to dogs. I would suggest that there be a dog area and a no dog area. Beaches without dogs are like peanut butter with our jelly. Even without a dog I would miss seeing dogs at Muir Beach.

10. Let's find a way of cooperation not restriction. It would be a real shame and tragedy to enforce the rules you all are suggesting.

**Correspondence:** Please don't allow such an act to happen and have dogs, even humans restricted from areas such as Crissy Field, Ocean Beach and especially Fort Funston. My dog looks forward to Fort Funston the most. Miles away, he senses the smells and notices the way to Fort Funston and howls of happiness pour out. Minutes turn into hours and the hours seem like an eternity of heaven for my dog Koa when he's off running, freely enjoying the weather, wind, soil, smells, dogs, flowers, ocean, water and even other people. Let there be freedom for our dogs, let's not let this happen.

**Correspondence:** I applaud the National Park System for revisiting their rules on dogs in their parks.

I am a dog owner, who walks my dogs on leash. I look in dismay at signs in parks saying "Dogs on Leash" where dogs are running all over the place off leash, which creates a threat to dogs on leash. I know the park budget is tight, but without enforcement (and tickets given), this rule is not respected.

I would like to see "no dogs" in fragile areas, such as beaches and wildlife nesting areas, and restored planting areas.

**Correspondence:** There are still significant ways in which the new rules fall short of protecting wildlife:

They do not require fencing or natural barriers around off-leash areas.

They allow commercial dog walking with permits, for up to six dogs.

They dont set numerical compliance goals. The first draft of the EIS required a fixed percentage (such as 75%) f dog owners to comply with the rules, or tougher regulatory measures would automatically kick in. We are concerned that without fixed compliance targets, the new rules will not be enforced.

Even with these shortcomings, the new rules will be a significant step forward for ensuring the park is accessible and enjoyable by a wide variety of visitors - families with young kids, seniors, joggers and (yes) birders.

**Correspondence:** Dogs, like people are visitors to the GGNRA lands. We have codified behavior standards for people. Let there be standards for does as well. Of course, the dogs' owners or guardians will have to be held responsible. Designate off leash areas away from where children play, where wildlife breeds/nests/and roosts, and fence them off. Pay for the fencing by fees against the users. Establish dog free zones/trails. Require dogs to be on leash elsewhere.

**Correspondence Type:** Web Form

**Correspondence:** I am writing to support your proposed dog management plan for GGNRA lands - even though I believe it needs to go MUCH FURTHER in protecting wildlife, birds, vegetation, and people from the impacts of dogs.

I am a dog and animal-lover, but for that very reason, I think GGNRA (and other agencies!) need much strong policies regarding dog management in open spaces and parks. The very things that dogs love to do (run, play, chase, pounce, attack, dig, jump, defecate, etc.) are the same things that decimate sensitive wildlife populations, injure or kill a whole array of species (sensitive or not), threaten personal space and safety (particularly for seniors and children), and produce pollution and litter issues for people.

The proposed policies represent an improvement over the status quo in several important ways. They prohibit dogs from some key areas such as Ocean Beach south of Sloat Avenue, and the Crissy Field Wildlife Protection Area. They also require dogs to be leashed in some areas where they are currently allowed off-leash, such as the Ocean Beach Snowy Plover area. Overall, the new rules will provide more opportunities for people to picnic, hike or view wildlife without dogs running around.

However, there are still significant ways in which the new rules fall short of protecting wildlife:

- \* They do not require fencing or natural barriers around off-leash areas.
- \* They allow commercial dog walking with permits, for up to six dogs.
- \* They don't set numerical compliance goals. The first draft of the EIS required a fixed percentage (such as 75%) of dog owners to comply with the rules, or tougher regulatory measures would automatically kick in. We are concerned that without fixed compliance targets, the new rules will not be enforced.

The roots of these problems need to be addressed, specifically:

- \* There are not enough dog-free trails in the San Francisco section of the GGNRA. It is hard for visitors to find a place to have a quiet, dog-free nature experience.
- \* Off-leash areas are not set off clearly enough from other parts of the GGNRA, so it is not clear to dog owners where pets need to stay on-leash. All off-leash areas should be enclosed by fencing.
- \* Some dog owners can't sufficiently control their dogs. In off-leash areas, dogs are supposed to be under voice control. But many dogs aren't well-trained enough to respond to their owner at moments of excitement. Several recent, horrific incidents of dogs killing goslings, and another dog killing a gull while its owner stood by ("great training for duck hunting"), are reminders of how abusive of the rules some

dog owners are - and these owners create such severe problems that GGNRA DOES need to make rules more stringent, and enforce them rigorously.

\* The number of commercial dog walkers with multiple dogs continues to grow. Its hard for anyone to control five or six off-leash dogs.

\* Enforcement is lax. Non-compliance has been the status quo. During 2007/08, for instance, only 27 percent of dogs in the Crissy Field Wildlife Protection Area were on leash as required by the rules.

Even with these shortcomings, the new rules will be a significant step forward for ensuring the park is accessible and enjoyable by a wide variety of visitors - families with young kids, seniors, joggers and (yes) birders.

The new rules still provide plenty of opportunity for responsible owners to spend outdoor time with their dogs! As the San Francisco Chronicle stated in a recent editorial, "Dogs deserve a place in the outdoors, and so does everyone else. It makes sense to share this scarce space without letting one group [dog owners] take over."

Please pass the proposed plan, and work to further strengthen and enforce dog management rules for the future protection of people, wildlife and our precious open spaces.

**Correspondence:** I am sad to see how loud and insistent is the dog owner rights community. Dog walking, running, playing really should be restricted to limited areas in parks maintained by towns and cities. I'm not a dog hater or dog owner hater, just a person who enjoys going to a special place to appreciate the landscape, the quiet, a bit of native plants, birds and other animals which manage to survive in a diminished and diminishing condition. NPS is one of the great guardians of what is left of our natural landscape.

Professional dog-walking is definitely not to be supported by GGNRA. These are for profit businesses supported by public funds. They in no way enhance the various missions of the parks.

It seems as if dog-ownership in the Bay Area is growing. But dog-owners have to find other places besides GGNRA to walk their dogs. In and around the towns and cities of the Bay Area, not to mention the streets, there are countless parks where dogs and their owners can walk. In SF particularly there is the huge Golden Gate Park available to dog owners.

Please, Please keep the impact of pets to a minimum on the public lands you guard for us today and in the future.

**Correspondence:** I'm writing to support the more stringent rules on dog use in the GGNRA.

I believe there should be more dog-free trails in the San Francisco section of the GGNRA. When walking through the GGNRA, it's an everyday event to have an off-leash dog run up to you. Owners usually "control" their dogs by yelling at them. This creates an unpleasant experience for the non-dog-walking user of the park.

Off-leash areas should be set off clearly enough from other parts of the GGNRA, so it is clear to dog owners where pets need to stay on-leash. All off-leash areas should be enclosed by fencing or natural barriers.

I believe that enforcement of the existing rules should be stricter.

Dog owners don't understand the impact that their dogs have on wildlife. When dogs chase shorebirds, for example, they not only have the potential to catch and kill them (as one did last year to two goslings). They also are, demonstrably, halting the bird's necessary foraging activities. The birds have nowhere else to go to forage and roost. The dogs do.

Thank you.

**Correspondence:** I support the new dog draft management plan for the Golden Gate Recreation Area.

I think there need to be separate areas for off-leash dogs, dogs on leash, and dog-free areas.

I am concerned about the natural environment and wildlife in our parks, particularly the nesting birds that are defenseless against dogs. There is a difference between natural predators, which are to be expected, and the increasing number of domestic dogs that are brought by humans. I think we need to pay attention to the balance of nature, and preserve the little we have left.

I am also concerned about the safety of children and people who are not comfortable around dogs. They have a right to enjoy areas of the park free of being barked at or jumped on by dogs.

I think it is not enough to require that dogs be "under voice control." I often witness people walking several dogs who are not able to control all of them at once, even when they are supposed to do so. I think

that leash laws need to be enforced, and when there are numerous violations further restrictions need to kick in.

I also think there need to be some kind of barriers around off-leash areas so that the dogs cannot go into other areas.

I enjoy our parks and natural areas. I like to take family and children to explore the wonders of nature. I understand that some people enjoy being accompanied by their dogs. I think there is enough space for all of us. But it will take planning, rules, and enforcement to make it work.

**Correspondence:** Please rethink this truly horrific and incredibly poorly thought out plan. Specifically, please consider that:

1) Dogs are biologically wired to retrieve objects from water. Retrieving an object from the water while on a leash = death by drowning. Being banned from retrieving objects from the water = no point in being alive. So the upshot of this plan is that compassionate dog owners should euthanize their animals.

2) People with dogs generally love the outdoors and nature and are normally staunch defenders of the environment. Presenting them with a proposal this outrageously hostile to dogs turns natural supporters of environment causes and the park service into avowed enemies. The political ramifications of this utter idiocy will have a negative effect on fundraising for environmental causes, and on congress' willingness to fund the park service, for decades.

3) This will go to court. Count on it. You can not tell people to get off their own land and expect not to be sued. Lawyers fees will run into the millions of dollars and will come out of your budget. These dollars should be used to fulfill your mission, not to enrich lawyers.

I honestly believe that the authors of this plan should be fired and fined for this breathtaking waste of taxpayer dollars (in effect a massive theft of dollars from environmental causes). The GGNRA's mission is to administer a Recreation Area located in a major population center, not to turn one into a wilderness area. For the amount of money the GGNRA has already spent on this, THOUSANDS OF ACRES OF LAND COULD HAVE BEEN PURCHASED AND PROTECTED FOREVER. Instead you gave us this stinking pile of \*\*\*\*.

**Correspondence Type:** Web Form  
**Correspondence:** I write in support of the GGNRA dog management plan, as far as it goes. I am a dog owner, and I believe people should be allowed to walk their dogs in a sane manner, respectful of other people. This is not the case for many off-leash dogs, especially for professional dog-walkers, who are often seen (I live in the Presidio) walking 10 - 12 dogs at a time.

---

The main problem I see going forward is enforcement. Even regulations presently in place are not enforced, and are therefore ignored.

The cities involved simply need more numerous satisfactory areas where dogs can run free. It's a problem. There isn't space for wildlife. It's a big problem. Too many people. Why aren't we discussing that?

Thank you.

Sarah Hummingbird

<b>Correspondence:</b>	To whom it may concern:				

I am a dog lover and soon-to-be dog owner, but I support the new GGNRA dog management policies that protect wildlife. I have little interest in ensuring SF residents a "dog-free" nature experience, as I've read touted by many of the policy supporters, but I do think it is vital to balance space for leashed dogs and their owners with areas that are sensitive to canine activity (e.g., plover nesting areas). I would like to see these new policies strictly enforced, but also support more fencing/barriers around "off leash" areas, providing dogs with space to romp AND protecting critical habitat areas.

Sincerely,  
Christopher Reiger

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Hello,				

I cite the following reasons to save off leash dog walking in the GGNRA:

he Golden Gate National Recreation Area has spent millions of dollars trying to severely cut and in many places entirely ban where people have been walking their dogs for decades in Marin, San Francisco and San Mateo Counties.

Â· The GGNRA's first "dog management" was roundly criticized 3 to 1 in public comments against it and opposed by the San Francisco Board of Supervisors. Yet almost three years later, the GGNRA has now released a new plan that is identical to the original with insignificant, meaningless changes.

Â· The plan does not offer any evidence to support the need for such a drastic change in usage. The plan fails to manage the GGNRA for the recreational needs of the people of the Bay Area, in direct

contradiction to its reason-to-be as described in the legislation that created it.

Â· The Plan will severely cut where people with dogs, who have walked in the GGNRA for decades, will be able to walk in the future, without offering any evidence to support the need for such drastic change in usage.

Â· The Plan fails to manage the GGNRA for the recreational needs of the people of the Bay Area, in direct contradiction to its reason-to-be as described in the legislation that created it.

Â· The Plan wrongly acts as if the GGNRA is a remote wilderness, when it is actually located within and adjacent to a large city, with its services and environment inextricably intertwined with those of the cities that surround it.

Â· Recreation is the reason the GGNRA was created, and it must continue to be its guiding principle

Please reconsider the proposal.

Thanks,  
Vigyan Ahirwar

**Correspondence:** I strongly support the GGNRA's efforts to improve dog management through this plan. It represents essential (though small) steps forward toward balancing the recreation opportunities for dogs and dog owners with EVERYONE ELSE. I am continually frustrated by the unreasonable reactions of dog owners to any efforts to limit access to free-roaming dogs, while at the same time repeatedly failing to control their dogs and prevent them from harming other visitors to the park, including children, and wildlife. It is the National Park Service's duty to protect both wildlife and recreation opportunities, but it cannot do this effectively without placing limits on dogs and dog owners, and ENFORCING those rules. I am hopeful that the GGNRA will adopt this management plan and enforce these rules.

It might be helpful if there was an 'app' (or other easily-accessible method) for reporting dog-wildlife or dog-visitor conflicts (or any kind of problems visitors might want to report). My sense is that the NPS knows of only a small fraction of these incidents, and if these data could be collected in a way that provided wider access to their frequency, locations, and seriousness might provide additional support for efforts to manage dogs. It might also provide a better sense of how many people are unhappy about and willing to report these incidents, and thus how many people would support dog management efforts.

**Correspondence:** I strongly oppose the plan to cut the number of areas where people can walk their dogs off leash. This greatly reduces the recreation opportunities for those of us who live in small apartments with no yards -those of us who can't afford to own our own open space. The ability to enjoy this open space and allow dogs off leash is a freedom that we as tax payers should be afforded to enjoy the recreation areas that are for all of us. Thank you.

**Correspondence:** I want to strongly encourage the Park Service to create and ENFORCE regulations to ensure that wildlife and park visitors are protected from dogs in GGNRA.

I do not visit the San Francisco beaches of GGNRA often, but the last 2 times I have been there, I have been menaced by off-leash dogs and witnessed illegally off-leash dogs chasing shorebirds. I have seen a number of people with 10 or more dogs off leash and certainly not under control - presumably these people are professional dog walkers, and they should not be permitted to run their business in a National Park at the expense of other members of the public.

The current situation with respect to dogs is unpleasant and dangerous for non-dog owners and wildlife and needs to be remedied.

**Correspondence:** To Whom It may Concern.

I oppose the Golden Gate National Recreation Area's (GGNRA) Draft Dog Management Plan. The plan proposes to either eliminate or severely limit dog-walking access in 21 locations in Marin, San Francisco and San Mateo counties - including traditional off-leash areas like Crissy Field, Fort Funston, Marin Headlands, Mori Point, Muir Beach, Ocean Beach, and Rodeo Beach.

The GGNRA is located in a major urban area with minimal open space, so these restrictions will have a dramatic impact. We believe an acceptable dog management plan must take into consideration the impacts of the proposed plan on neighboring city parks, on the health and well-being of people who enjoy recreational dog walking, and must respect the recreational values that are part of the GGNRA's original mission (to provide for the maintenance of needed recreational open space), which this plan fails to do.

The document failed to provide substantial evidence to its claims that dog waste at Crissy Field is contributing to water quality issues. The document needs to provide localized monitoring and data to back up such claims, or else, if such data does not exist, it should remove the discussion of dog waste as an issue. Moreover, the document mischaracterized how much dog waste is left at Crissy Field; reading the document one has the impression that dog waste is left everywhere. I walk my dog weekly at Crissy Field and can attest that the grounds at Crissy Field are very clean and that dog owners who walk their dogs at Crissy Field are extremely responsible about picking up after their dogs. The document needs to more fairly characterize the amount of dog waste at Crissy Field, and therefore the issue of dog waste at Crissy Field.

Here are some specific comments about the plan:

â€ The document failed to properly characterize the urban setting of the GGNRA; reading the document one is left with the impression that the GGNRA is a wilderness area, and not the urban parklands of the San Francisco Bay region. The document should better characterize the general setting of the GGNRA, and the level of visitation to the GGNRA.

â€ The document's proposal to ban dogs on east beach does not consider access concerns, including restroom access and wheelchair access. The proposal should be modified taking into consideration the needs of all visitors.

â€ The document mischaracterizes the level of dog noise and does not properly characterize the soundscape at Crissy Field. The document should fully consider the soundscape at Crissy Field, which in my experience, walking my dog regularly at Crissy Field, may include (depending on day/time of day) construction noise, emergency vehicles, highway traffic, kids yelling, music, crowds, noise from equipment removing trees, etc.

â€ The document does not provide adequate data to support its claims that dog conflicts are a significant issue. In my experience walking my dog regularly at Crissy Field, I have very rarely witnessed dog conflicts; dogs are generally well trained/controlled. The experiences I almost always witness of dogs at Crissy are experiences of joy and contentment, and not conflict. The document should modify its discussion of dog conflicts to more accurately characterize the issue - which is largely a non-issue.

â€ The proposal to ban dogs on Crissy Field in order to protect wildlife/sensitive species is not consistent with the regular use of Crissy Field as an event space (e.g. for races/walks, Fleet Week, etc.). The document needs to be modified to present the impacts of dogs in proper context of all other uses of these same spaces.

â€ The document mischaracterizes dog's presence in the Wildlife Protection Area (beach at the west end of Crissy Field). In my experience, dog owners are very mindful of not allowing their dogs to enter the WPA, and even remind other dog owners who may inadvertently let their dogs in the WPA that dogs are not allowed during most of the year. The document needs to modify its characterization of dog presence in the WPA.

â€ The document fails to accurately or fully characterize the issue of potential disturbance to wildlife in the WPA. In my experience visiting Crissy Field regularly, there are many users of the WPA that disturb wildlife, including families picnicking, kids running around, kite-boarders, horses. Especially on a sunny weekend day, the WPA is often packed with people enjoying the beach. The document needs to be modified to more fully and accurately describe issues of potential wildlife disturbance at the WPA.

**Correspondence:** I support the Audubon Society's work to ensure that off-leash dogs don't overwhelm the wild residents of National Parks, particularly the Golden Gate National Recreation Area. While I enjoy dogs, and am sympathetic to their owners' desire to have a place to hike off leash, I am becoming more and more concerned about preserving areas for nesting and breeding where they need it, not where it is convenient for us.

Please continue to work to keep space for wild animals protected.

Thanks,  
Jessica Forbess

**Correspondence:** I am writing to emphatically oppose the GGNRA's draft dog management plan. I believe the plan will have a negative impact on the residents of the City of San Francisco, as it proposes extremely restrictive policies about where we will be able to enjoy off-leash hiking, running and other recreation with our four-legged family members.

---

The purported goal of the plan is to provide a variety of visitor experience, improve visitor and employee safety, reduce conflicts between users, and protect natural habitats and cultural resources. There is no evidence or data, however, that shows the current laws regarding dogs in the GGNRA are insufficient or that show dogs that use the GGNRA with owners who abide by existing regulations are a source of conflict, interfere with the use of the GGNRA by others, or destroy habitats or cultural resources. I would posit that more damage has been done to the natural resources and landscape by the ill-advised and executed "Pacific Overlook" trail modification along Lincoln Blvd in the Presidio that resulted in massive washouts, destroyed the trail and undermined Lincoln Blvd necessitating what looks to be a repair project in the hundreds of thousands of dollars, than has ever, cumulatively been done by dogs with responsible guardians who abide by existing regulations.

This plan disregards the health and well-being of people, dogs, and the community. It arbitrarily ignores the needs of Bay Area residents who exercise regularly with their canine companions. This plan discriminates against all people with dogs, including tourists, seniors, families, the disabled, minorities, and others.

In my opinion, the GGNRA can accommodate both recreation and conservation. It was designed as an urban recreation area- -and it IS an URBAN recreation area- -not a pristine wilderness areas like Yosemite. In fact, the courts have repeatedly upheld the existing 1979 pet policy on the grounds it was consistent with both the fact and intent of the original mandate for recreation upon which the GGNRA was founded. The effort of some individuals and entities to turn the GGNRA into a National Park like Yosemite, rather than a national recreation area, is inconsistent not only with the daily needs and lives of SF's over 800,000 residents, but with prior court rulings.

Further, by my observation and in my experience, there are quite a number of restrictions on off-leash use of GGNRA land already in place, but enforcement seems to be the real issue. I fear that if these more restrictive regulations are enacted, it will only be the law-abiding dog owners who will suffer; the scofflaws won't care about the new restrictions- just as they don't follow existing regulations now.

The GGNRA draft management plan does not provide tangible evidence that justifies such drastic changes to over 30 years of healthy dog and human recreation under the 1979 Pet Policy. The Park Service should honor the original 1979 Pet Policy, respect dog-walking/hiking/running as legitimate recreation and recognize that there are hundreds of uninhabited miles along the California coastline for wildlife to thrive, while we San Franciscans and our pets have a 7 x 7 mile peninsula on which to recreate. In my experience, when people and their families walk with their pets, they are more open to meeting and engaging in a positive way with other people, usually via inquiries about their pets. If they can do this in their own backyard, without having to get in to a car and drive to another location, all the better because they get to know their neighbors. In the years we've had our dog, we've met more people and engaged in more pleasant conversations with strangers than I have ever experienced in all my years before owning a dog. I truly believe pets can bring out the best of humanity in us all.

Please do not adopt the proposed regulations, but rather, honor the 1979 Pet Policy and spend the resources that are being spent on adopting, revising and promoting the new plan on more fully enforcing existing regulations under the 1979 Pet Policy.

Thank you for your time and consideration.

**Correspondence:** I am adamantly opposed to the proposed revised Dog Access plan for the GGRNA as it severely limits/diminishes off-leash access for dog owners. As far as dog access being labor-intensive, I don't know what our government expects when they severely limit this activity. The effect of this is to simply drive the same number of dog & owners to overuse what few places are left. You can't just decide to issue an edict for everyone to leash their dogs because it's a "problem" for you. If doesn't work that way; dogs need a certain amount of off-leash exercise, especially when young. It's as if you had management issues with out-of-control children and told parents to leash them.

As far as our organization goes, maintaining the current off-leash access would enable Springer owners to provide proper exercise for the younger Springer (under 5 yrs) as our breed is normally athletic and energetic. We are able to find excellent homes for Springers thru our rescue because of the easy and prolific access to on-leash & off-leash dog areas generally in the SF Bay Area. We are afraid the GGNRA revised plan may start a trend. And if off-leash dog areas are diminished, we are fearful we will see an uptick the number of Springers (and other dogs also) surrendered to rescue and shelters in the area.

<b>Correspondence:</b>	Dear NPS,				

I feel that your plan isn't legitimate because there has not been a single peer-reviewed, site specific study completed and there is no data to support ANY of their assertions about the supposed harm that dogs are causing. Without vital monitoring, the SEIS is a sham and the NPS doesn't have any justification for a proposed draconian change from the 1979 Pet Policy of the GGNRA.

Please reconsider this egregious dog management plan. I moved here to be able to enjoy the 80,000 acres of supposed public, recreational open space within the GGNRA. I got a dog because this was such a great place to hike and play outdoors. I would not own a dog if I lived in a restricted area (like a city). Our daily hike is the highlight of our day - we do nothing that would possibly have a negative impact on what we consider our very precious recreational open space. Dog walking is NOT a crime!!! Please do not penalize us for enjoying our very precious public recreational acreage.

Thank you for reconsidering.

**Correspondence:** I sure hope I'm submitting my comments to the right place.  
I so want my voice to be heard and don't want my plea to fall off the desk onto the floor.  
I never had the joy of a dog growing up; got my first dog when I was 50 and am so so SO happy I learned of the pleasure therein.  
That first dog helped me through my father's death. My dad lived in S. San Francisco and when I went to visit him, I brought my dog and afterward we enjoyed a walk on the beach at Fort Funston. It was what made the visit tolerable- watching my dog run on the beach afterward. I grew to love that beach and still visit it regularly with my current dog, even though my dad is no longer on this earth.  
I think non-dog-owners can't appreciate the joy of watching one's dog run on the beach. I just can't keep up with her on a leash to provide this kind of unmitigated pleasure.  
I beg you to leave some off leash aread off leash(specifically/especially the National Park Fort Funston ) for the joy and sanity of hundreds of us dog lovers and their dogs.  
Thank you,

**Correspondence:** Hello. I am an avid hiker in our local parks, both here in Oakland and also in Marin and San Francisco. I have been hiking in them for the last 6 years that I have lived here. One of the main reasons I go out into our parks is that I take my two dogs for long walks.

Dogs are like my fellow Americans, they need lots of exercise, mental stimulation and particularly, nose stimulation. We have domesticated them and bred them into tiny incarnations of the wolf so they can live inside our homes. But it doesn't change their natural instincts to prowl a large territory. And I'm sorry, most Americans are not for running 20 miles a day so their pet can be properly exercised.

Instead, we have these wonderful parks where our pet canines can run to their hearts desire. I know how rare it is for dogs to be able to roam on beaches. My parents live in the Los Angeles area and there are very few places for the dogs to roam. As a result, dogs are often neurotic and crammed into small living areas where they drive people crazy barking. I listen to my mother all the time complaining about the dogs barking and carrying on in her area. Also the dog parks are crowded and over run.

Contrary to what a lot of people think, dogs who are crammed into these small dog parks often end up in aggressive situations. They are not all cut out to have such an overwhelming social experience. Dogs need to greet their fellow dog for short periods of social time and then able to move on. Our parks are ideal for this kind of exercise and social interaction.

I just recently went to Marin Headlands, to Fort Cronkite. There I played with my dogs in the surf, all the while remembering my recent friend who died of liver cancer. Ft. Cronkite was her favorite place to go on hikes. I am so lucky I was able to be with my very dear friends, my dogs who unconditionally love me and are always by my side.

I would hate for that resource to be taken away from the many Bay Area residents who have dogs. I think San Francisco has more dogs than children, that's a lot of people who would be denied access to our natural resources, the wonderful coastline we all share.

**Correspondence:** As a resident of San Francisco and a dog owner, I must comment that changing the current allowances at dog parks with force three issues. One, a decrease in off-leash land with increase dog play in confined areas. If the idea is to decrease wear and tear of the areas, this will in fact increase wear and tear, poop piles and less natural states of terrain in the confined spaces. Two, the argument is that dog activity damages environmental terrain. Don't other animals as well? Will the next stop to net the foliage to keep birds and wildlife out as well? Please consider this argument as you redefine boundaries. Perhaps consider fencing off particularly delicate areas, rather than ban off-leash play from the entire space. Three, as a dog owner who moved to San Francisco with the off leash dog parks in mind, I would re-evaluate staying as it was a major reason we came to the city.

Please reconsider this decision. Thank you for your time.

**Correspondence:** This comment is in regards to the Draft Dog Management Plan/ Supplemental Environmental Impact Statement for San Francisco.

I have been living in San Francisco for over 10 year and I am a dog owner. I spent many hours training my dog to make sure he responds well and immediately. My family, dog and I go on very regular, almost daily walks along Ocean Beach to enjoy the beautiful surroundings and to give our dog the exercise he needs to be a great canine citizen.

I urge you to keep the off-leash areas in San Francisco unchanged! It is vital for dogs to get a lot of exercise, especially living in a busy city where there is not a lot of space surrounding the houses for running and playing. I cannot imagine not being able to have our Aussie play fetch on the beaches anymore! That would be cruel and very sad for our whole family. My daughter is still young and she already loves spending time on the beach playing freely with our dog - and others!

The off-leash areas are well known to people living in San Francisco and anyone who doesn't enjoy dogs has plenty of space in other parts of the beaches that are on-leash.

I strongly urge you to consider the voice of the many dog owners in San Francisco. We live here, we pay taxes, we truly CARE about our city! I understand that there are many visitors but if you need to be careful then you should just be very clear about the off-leash beaches with signposts, in official guidebooks and websites etc. I strongly believe people should have a choice! People can choose to stay away from the beaches that allow dogs off-leash.

I agree that little parks need restricted off-leash areas because they are small and surrounded by streets and busy city life. But the beaches and also the trails around Land's End, Sutro Park are pure nature and dogs are as well. Do NOT restrict the off-leash areas, it's one of the few areas of freedom left in our big city!

I especially urge you to promote off-leash areas in the following beaches and trails:

Ocean Beach (Staircase 1-21, 21 seasonally) - proposal A

Land's End Trails - proposal A

Sutro Park - proposal A

Fort Funston - proposal A

Baker Beach - proposal A

Crissy Field - proposal A

Make a statement for the residents of San Francisco with their many dogs - a well exercised dog is the best guarantee for canines to be good citizens! Let our kids enjoy the freedom of free play with their dogs! Let us choose our beaches - if someone doesn't like dogs they will choose a on-leash area without a problem. Spacious off-leash areas are crucial for San Francisco, a city where there are so many dogs and

dog owners! Put up signs and clear notices to alert visitors that beaches have off-leash dogs instead of restricting our citizen rights!

Thank you,  
Jeannette

**Correspondence:** I am in support of the NPS preferred alternative for Ocean Beach, but I would like to stress the importance of enforcing the law. Without enforcement there is no law, and that is the current state of Ocean Beach.

I regularly walk the entire length of Ocean Beach. Along the way I make a point of letting dog owners know about the leash requirements between Sloat and Stairwell 21, July 1st - May 15.

Problems I see there include off leash dog is chasing shorebirds and/or snowy plovers, defecating without the owner picking up after them, harassing people and/or small children, and harassing dogs that are on leash.

I never assume the dog owners are purposefully breaking the law when I approach them, but that is often the case. While many people simply don't know about the leash requirements, the majority of people I speak with do not comply once I have educated them. Most likely because they know there is no consequence to breaking this law.

I have walked the full length of Ocean Beach 72 times over the past year. I observed egregious amounts of non-compliance with the current laws, and I have never once seen a Park Ranger doing anything about it.

Any changes in the law will be purely symbolic unless they are actually enforced. Whether the current laws stay in place, or the preferred alternative is initiated, I urge the NPS to actually enforce the laws to protect natural resources and visitor experience.

**Correspondence:** As a dog owner and resident of San Francisco, the banning of off leash dogs in the GGNRA concerns me. I am a frequent visitor to East Beach, Crissy Field but I frequently take him to Fort Funston as well. I really feel that all this is because of a few "bad" eggs and this will dramatically restrict where we can take our dogs on GGNRA lands. Less than 1% of all GGNRA space is open for off-leash dogs while there are concerns about environmental impacts of the dogs, it is not right to take away the little that us as dog owners do have.

---

I feel that the individual dog owners are responsible and clean up poop and watch their dogs. Perhaps we can put more restrictions on commercial "dog walkers" to limit the number of dogs per walker to ensure they are able to properly look out for their charges. It is really those who are not keeping control of their dogs which have the potential to cause damage or annoyance to tourists and the like. If we have more signs for on/off leash area restrictions. BY taking this away, we are no longer the dog loving city we tout ourselves to be. Let's not restrict our dogs. Let's enforce the rules that exist and have overall public education about this so we can continue to make our dogs happy and enjoy the beauty and wild freedoms of the Golden Gate National "Recreational" Areas.

**Correspondence:** I oppose all management alternatives for park lands in Marin, San Francisco, and San Mateo counties; the plan is deceptive and disregards the legislative mandate to "preserve for public use and enjoyment" and "provide for the maintenance of needed recreational open space". The plan effectively seeks to change the enabling legislation which is unlawful without an Act of Congress and also does not restore and maintain the recreational value agreed to when SF deeded Ocean Beach and Fort Funston to the US government.

**Correspondence:** Stop the GGNRA Dog Management Plan! San Francisco is a dog-friendly city and our pets deserve to have a place to roam off-leash. Fort Funston and Chrissy Field are two popular areas that people enjoy taking their dogs and have an opportunity to get exercise off-leash. It would be criminal to outlaw this freedom. Dog owners are tax payers too and our funds continue to support Golden Gate Parks and our liberties to walk our dogs off-leash.

**Correspondence:** I live in the Outer Mission and take my dog "Ringo" to Fort Funston almost every day to walk. Fort Funston is one of a very few public spaces near my home where I can take Ringo off-leash. I understand there are some concerns with allowing certain dogs off-leash (including safety and possible environmental impact). However, well-behaved dogs should be allowed off-leash. Not only does it allow the dog to interact freely with other dogs, it allows dogs to get a better range of motion and exercise than on-leash walking. This is very important to dogs like Ringo with joint and mobility issues. I oppose compliance based management. It would require well-behaved dogs to be on-leash without evidence of impact of non-compliance. I also oppose the Proposed Alternatives in the DEIS, including the

---

Preferred Alternative, because they are too restrictive. My almost daily walks at Fort Funston are beneficial to Ringo because he gets much-needed exercise and socialization and interaction with a variety of dogs and people. Fort Funston is one of my favorite places to walk Ringo because of the beautiful scenery and nature and the opportunity to interact with all types of people and dogs. I support off-leash walking in the GGNRA.

**Correspondence Type:** Web Form  
**Correspondence:** Thank you in advance for taking the time to read my letter. I am writing to plead for you to NOT approve nor proceed with the presently proposed GGNRA Dog Management Plan.

I moved to San Francisco a year and a half ago, amazed to discover an extraordinary city and its magnificent surrounding as well as a city that welcomes and celebrates dogs. A city that understands that if it treats its dog owning residents with respect, that they in turn would behave in no less a manner.

My daily off-leash walks with my dog, alternating between Land's End, Fort Funston and the Marin Headland Trails around Rodeo Beach are my exercise, my therapy, my church, my meditation, my vitamins. These easily accessed walks, keep me healthy, energized, and inspired.

I am enthralled by the beautiful nature I have the opportunity to immerse myself in. I am honored to share these mountains, forests, cliffs and beaches with hawks and pelicans, dolphins and sea lions, coyotes and deer. I am here, exploring, exercising and appreciating because of my dog. And not a day goes by that I do not give thanks for this immeasurable privilege.

~~~

The following paraphrases and reiterate some of the comments I have read and profoundly agree with regarding opposition to the proposed Plan:

\* "The GGNRA park lands in Marin, San Francisco, and San Mateo counties are part of local communities where millions of people should be inclusively and actively encouraged to continue enjoying regular relaxation, exercise, and inspiration that make it one of the most valued and visited lands in America.â€œ"

\* "The new plan is not only a significant change from both the legislative mandate but also from the existing 1980 general management plan, which was highly supported by the public." â€

â€\* "The GGNRA is not the equivalent of the vast Yosemite wilderness and should not be misrepresented as an idealized 'backcountry'. Neighborhood trails and beaches should not be managed to artificially exclude people so that a select few have 'solitary' and narrowly defined recreational experiences and expect others to drive farther away and increase crowding in a few small 'diverse opportunity' areas."

~~~

I have not, nor can I explore the State and National Parks because they are already completely closed to dogs. The Coastal Trail, one of the very few GGNRA Marin Headland trails open for dog walking is proposed to now be off limits too. If I can't go with my dog, I won't go without my dog. The whole point of being out walking in nature is so we both benefit. Why would I leave him at home and go walk myself?

An example of a negative effect from closing off urban nature trails to people walking their dogs, is a gradual arrival and settling in of Squatters, contributing litter, human waste and a diminished sense of safety.

Another is that with less foot traffic of walkers with their dogs, wildlife (coyotes for instance), normally kept at bay, comfortably expand their territory. This increases the risk of contact, confrontation and injury with the fewer people using the trails.

A tired dog is a good dog.

A dog on leash never gets anywhere close to the amount of exercise that he does off-leash. On leash, dogs are restricted, less stimulated, they grow frustrated and angry, energy builds up and has nowhere to be released. Their behavior, in turn, can become reactive, impulsive, destructive and unpredictable.

I am a responsible dog owner with an extremely well behaved dog. In areas where there are plenty of people and picnics and kids, I choose to put my dog on leash. And in areas that are open and sparse, he walks freely, people who call to him are greeted happily and he in turn welcomes a friendly pat.

Instead of going backwards to match other cities in their restrictions and limited thinking, I wish that the GGNRA would continue to be the inclusive, trailblazer that San Francisco has always been. To do things better. To do things that have for years, clearly proven that they work and to build upon that.

As it is now, dogs in large and small numbers pass each other on the streets, in the parks, on trails and on beaches, playfully, peacefully and naturally. They've figured it out. They are well exercised, social and socialized. With the proposed new and severe restrictions to significantly fewer areas where dogs can be at all, and almost no areas where they can be off-leash, these areas will become overcrowded, overrun and rundown. The increased tension of the gathering of higher concentrations of dogs in these limited spaces, having had substantially less exercise, can create conflicts and inevitably aggressive situations with grave repercussions.

To witness the joy of dogs running, bounding, playing and swimming with their owners, with other dogs and with other people and kids is incredible to behold.

We are astoundingly lucky to live in magnificent Northern California. In all the places and cities I've lived, I have never met so many conscious, responsible, respectful and aware people who greatly

appreciate how blessed we are to be here. Please enable us to continue to celebrate that, in our freedoms, in our healthy choices, in our cherishing and sharing of our beloved natural wonders, where we are all welcome with our very best canine friends by our sides.

Thank you kindly,  
Jennifer Saxon

**Correspondence:** GGNRA does not have the right to make changes for use of the lands 'given' it by San Francisco and Marin County. The terms were clear at the time the areas were turned over to GGNRA. We residents need to have access to these spaces for the recreational activities that have been permitted for years. If not for this access we would have to travel long distances. I have been walking with my dogs, who get their off-leash exercise at Fort Funston and Crissy Field for more than 20 years. I clearly remember when the renovation at Crissy took place how GGNRA assured us that we would continue to have access to the meadow and beach when it was done.

Were it not for my daily walks I doubt that I would now BE a 'senior citizen'. That is how important having access to GGNRA areas is for me.

Part of what makes Fort Funston a destination is the presence of dogs with their people. There is an inordinate presence of good will . . . people with smiles greeting each other and the dogs. People who don't have a dog come there for the vibe. It gets mention in national publications because of the dogs. Yet for the past seems like 20 years GGNRA has been resistant to our presence. Every bit of 'science' GGNRA has provided as a reason to prohibit dogs has been shown to be faulty. Case in point: "Shadows from dogs running above the cliffs frighten the cliff swallows." There are no shadows cast from above the cliffs. The sun rises in the East and sets in the West making it impossible. The ravens, now almost the only birds present, do harass all the other birds. There were once swallows, sparrows, finches, hawks, even occasionally great horned owls there. None were discouraged by dogs. Ravens, encouraged by misguided humans feeding them, have changed the bird populations. Yet there is no signage to prohibit the feeding of wildlife.

You can count this comment as one definitely opposed to all proposed changes by GGNRA to these areas.

**Correspondence:** My dog Kermit is like a member of my family. She is a healthy active cattle dog mix, 4 years old, and just loves to run around at Ocean Beach and Fort Funston. She literally jumps out the car in pure joy when we park in the lots at Funston and Ocean Beach, barely able to contain her excitement.

Being a cattle dog, she never strays far from me, or her dog walker, who walks her 3 times a week at Fort Funston in the off-leash areas. I can't tell you how happy my dog makes me, and she is happy when she gets to exercise off-leash at many of our beautiful parks in the San Francisco area. She would be a

miserable dog if she had to stay on-leash at all times on our walks. Just like people need to have the freedom to exercise, so do dogs. They need to stay healthy and run. It helps to socialize them as well. Most dogs are well-behaved at Ocean beach and Fort Funston, and most owners are responsible. I always carry poop bags and pick up after my dog and her leash is at the ready, and if I ever sense an issue arising, I immediately put Kermit on her leash. This rarely happens.

There are a few dog owners and dogs that give the rest of us dog owners a bad name. I am a responsible dog owner, and so are many of my friends who are dog owners, including my wonderful dog walker. I hope that these strict leash laws are not put into place. I live and work in SF, I my pay local taxes, pay rent and give back to my community. I deserve to be able to take my dog to off-leash areas in SF, so we can play and be healthy together. Thank you for your consideration.

**Correspondence:** I am against this plan. Please reject it.

This plan is bad! Do not further restrict off leash dog walking in the GGNRA. There are already so many places that dog owners are restricted to go; this is unfair and will limit the ability of dog owners to enjoy the GGNRA which belongs to all of us.

I can see see that a part of Chrissy Field beach could be made as on-leash only, but further restrictions at

Fort Funston just seem mean-spirited and intended to punish dog owners. The restriction of dogs from Muir Beach is completely unacceptable. There are plenty of other wonderful beaches that do not allow dogs access all up & down the CA coast, and losing dog access to Muir Beach would be a tragic loss of one the few places that dog owners have in Marin to access the beach.

Please reject the current proposal.

**Correspondence:** I can understand both points of view on the matter of dogs running free on the beach at Crissy Field. Dogs are wonderful animals, and their joy at running free is wonderful to see. Their is obviously a great difference between this and exercising on even a long lead. At the same time, some frail people fear dogs, as do some children, and some people are allergic to them. I suggest that the best solution is the one adopted on Limantour beach at the Point Reyes National Seashore, where dogs are allowed to run free on the south part of the beach but not on the north part. I have often walked both parts of that beach, and the arrangement appears to work out well for everyone. This could very well be the best solution for Crissy Field.

**Correspondence:** I am opposed to the \*entire\* GGNRA Dog Management Policy for the following reasons:

In 1972, my husband and I both voted to transfer our beaches and other properties owned by the City and County of San Francisco to the NPS to become the GGNRA because of the promises made to the voters that this new recreational area would retain historical recreational access, including off-leash recreation.

When congress established the GGNRA in 1972, they included two "specific provisions" unique to the GGNRA:

First, the park was established "to provide for the maintenance of needed recreational open space necessary to urban environment and planning."

Second, the GGNRA statute imposes a unique limitation on NPS's discretionary power for "management of the recreation area" by providing that the "Secretary of Interior...shall utilize the resources in a manner which will provide for recreation and educational opportunities consistent with sound principles of land use planning and management."

The GGNRA does not use sound principles of land use planning and management, or even follow their own rules and regulations.

The premise that dogs in the GGRNA are compromising visitor safety and damaging the resources of the Recreation Area is absurd. By their own admission, the GGNRA has no data or studies to support these claims. They ignore/omit all studies that contradict their desired outcome.

How can the GGNRA undertake a Dog Management Policy change as proposed in this SEIS without any evidence of monitoring or site specific studies (as required by federal law) as a means to identify the alleged impairment?! Anecdotal comments and the "potential" to damage the area just don't cut it.

Once again, buried deep within the SEIS is the GGNRA's poison pill. Now called the Monitoring-based Management Strategy, the GGNRA gets to decide whether we are in compliance, and the measures of compliance are subjective. Short or long term closures could be triggered by any number of conditions totally under the purview of the GGNRA, all of which dog guardians have no ability to influence by our actions. The GGNRA could decide they want to make Fort Funston in its entirety a native plant restoration/habitat; and they can do so, based upon this language. More erosion at Ocean Beach or the beach below Fort Funston could be their reason to ban dogs entirely from these beaches. THIS IS UNACCEPTABLE.

My preferred option is one the GGRNA deliberately omitted: THE ORIGINAL 1979 PET POLICY which was affirmed as legal and the current law of the land by Federal Judge William Alsup in 2005.

The only way the citizens of San Francisco can get the GGNRA to follow their own rules and regulations is by taking them to court, which has consistently ruled in favor of the citizens.

Why must ordinary citizens use their own resources to battle the limitless legal resources of the NPS because of the GGNRA's illegal actions and refusal to abide by the enabling legislation?

I am old, tired, broke; and am on my 4th dog since this battle began nearly 2 decades ago. Fourth dog will surely cross over the Rainbow Bridge before this entire BS is settled. I'm tired of writing letters, attending meetings, testifying in court, and submitting comments, but I will continue until I'm dead or until the GGRNA honors their promise to the citizens of San Francisco.

Enough already. Either codify the original 1979 Pet Policy with a Section Seven Special Regulation, or ... turn the lands over to another agency to manage as promised or the land reverts back to the City and County of San Francisco. No more DEIS, SEIS, Rulemaking, or comment periods when we all know you totally ignore the thousands who have responded to you and continue to pursue your own agenda of keeping people and animals out of the GGNRA.

NO on SEIS  
YES on 1979 Pet Policy

Most sincerely,

**Correspondence:** Greetings,

My name is David Pellicciaro and I am writing in regards to dog policy in the GGNRA.

I've lived in Marin for 8 years, currently reside now in the East Bay. I walked our super excellent Corgi "Elvis" all his 14 year life, up to and including his very last day on earth this past June, off leash on all the great bay area beaches from Crissy Field to Muir Beach.

I cannot go without comment on the pending changes to this simple participation in our public parks. I support the No Action alternative to Muir Beach and I am for the enforcement of the 1979 pet policy. Further there is no legal or legitimate basis for the proposed regulation changes and further still no site specific studies have been done as required by law to support these changes. I find this is unacceptable and I am making my voice heard here. Please take it that we who feel like this feel strongly about this policy and will work to make substantive challenges to these proposed changes. Please do what you can do to make the policy reflect necessity and realistic application.

Sincere thanks for your consideration. David Pellicciaro

**Correspondence:** To whom this concerns,

Growing up along the Oregon coast as well as having a mother in animal control enforcement for Lincoln County, Oregon, I was well drilled in the reasoning of why dogs are contained on leashes on beaches and other recreational areas, such as national parks. I understand the impacts that pets and feral cats and dogs can have on a certain environment from personal studies and listening to first-hand experience. Unmanaged dogs can cause damage not only to wildlife but to other dogs and people. Improper disposal of animal waste can spread disease. Feral cats cause bird population decline. The list goes on but these are the main points and shall be explained further in this reading.

As a tourist of the San Francisco area, I found the beaches clean and managed well. Most dogs were leashed and though some dogs were not on leashes, they were managed through voice commands, were non-aggressive, and showed no behavioral issues. However, with wildlife (shorebirds for example) nearby and other people and dogs, voice commands can become inadequate if a conflict arises. A complete guideline for citizens and visitors should be outlined and available. All in all, I agree with the

draft management plan for dogs and cats for San Francisco and Marin counties.

Unmanaged animals should not be allowed in any recreational area or trail. One reason is safety (Foster, 2006). When there are large groups of people and dogs, aggression from one animal toward another dog and/or human can result in injuries. Unmanaged animals without proper training and control may have more aggression and can play roughly, resulting in fights and injuries. They may also scare children and a parent or another adult may injure the dog, even if the dog did not physically harm the child.

Another point is wildlife. Dogs disrupt areas that are habitat, mostly nesting sites for birds. Unmanaged dogs can do even more damage to the environment. Birds are the most harassed animal species, shorebirds in particular. Shorebirds do not nest in trees; preferred nesting sites are in sand dunes and grasses above tidal areas. Dogs will walk over nests, chase birds, kill adult birds, exhaust the bird's energy resulting in death, and frighten nesting birds to the point of those birds not going back to the nesting site. If there are chicks or eggs present, death of the young will occur. A prime example is the Western Snowy Plover (*Charadrius nivosus nivosus*) (Foster 2006). This bird is protected under the Endangered Species Act and as such, disruption from dogs can lead to large fines for the owner and possible destruction of the dog if the same problem of harassing or harming of federally protected animals is a common occurrence. Dogs may also attack small mammals, amphibians, or reptiles which can be found in recreational parks and trails (National Park Service).

Some people may argue that dogs don't cause that much damage to wildlife. The protection of wildlife on beaches and in parks is not an isolated thought. Many studies agree that dogs have a large impact to wildlife. As with San Francisco and Marin counties, many places in Australia (as an example) have implicated similar rulings for leash laws on their recreational areas (Parks Victoria). The State of Oregon has extensive regulations to leash laws (Parks and Rec. of Oregon).

Plants can also become affected by the presence of unmanaged dogs. Dog fur can carry seeds for great distances. This can bring in invasive species. When travelling with a dog across state lines, no one thinks to brush the animal for seeds. Keeping the dog in certain areas and controlled by the owner lowers the risk of the spread of invasive plants (Parks and Rec. of Oregon). Also, dogs cause excessive damage to the top soil and plants with behavioral digging or running. Sensitive plants and plants with shallow roots may become uprooted due to this form of damage.

Lastly, health is a concern (Foster 2006). Fecal and urine waste can carry pathogens (bacterial, viral, parasitic) that may affect visitors and other animals. The leading cause of illness is from contaminated water. Exposure to contaminated water from dog waste can result in fever, nausea, gastroenteritis as well as flu-like symptoms. It is well documented that areas with unmanaged and unleashed dogs show a poorer water quality than areas with strong leash laws. A state law already prohibits dogs on public swimming beaches for health reasons. A stricter policy will keep recreational areas even cleaner.

Feral cats and cat colonies are also mentioned. The largest concern is feral cat and bird interactions (Winter; Wallace 2006). However, the plan does not go into detail about what can be done to ensure nonissues with cats nor discuss further into cat colonies. Cat colonies should be kept clean for health reasons as well as the spread of rodents that can carry disease (mice species have been found feeding on food the cats do not eat) and insect pests (such as cockroaches) (Winter; Wallace 2006).

Unmanaged and uncontrolled animals should be taken care of by animal control or park management accordingly. Proof of a dog license should be available and ready to present if the need arises.

For the well being of a dog of any breed, off-leash walking and play is necessary. Better socializing for the animal and greater exercise lead to less aggression and pent up energy. Socializing for dog owners and overall responsible dog ownership can lead to positive human interaction. However, regulations must be in place to ensure that things do not get out of hand. The draft plan has provided a set of regulations as well as a list where dogs can go and areas that prohibits dogs. It must be enforced so both people, dog owners and the dogs can benefit from the recreational areas of San Francisco and Marin counties.

Sincerely,  
Faith N.S. Wall

<b>Correspondence:</b>	To whom it may concern,				

This is the brief letter that will be followed with a more detailed critique of the proposed 'dog management plan.' My main objection, echoed by many others with whom we have discussed these matters, is that many if not most of the trails already existing in the area have leach laws or prohibit dogs. There are a few, some very little used, where our dogs can go either on leach or off leach under voice command. This privilege is essential to the dog's health as well as our way of life- including enjoyment of the trails, forests and open spaces.

In those few places, it would be a major blow if dogs were not allowed or had to be on leach. In addition, the vast majority of dog owners are extremely responsible and dogs we encounter are very well behaved- friendly, responsive to commands, stay on trails and pose no threat to wildlife, homeowners or the land. Thus, we see no solid or valid reasons to make these changes- and see many detriments to the local population as well as our dogs. In the 10 years I have been using the trails, I have never had a problem- and there has been no harm to the environment or the population.

Thus, I strongly urge you to reconsider this plan- in light of the very few places where dogs are permitted on trails- and in certain places, where they can be off leach under voice control. We and many others feel very impassioned about this issue, and again, see no legitimate reasons for these changes. I will review the plan again and would appreciate hearing of any rationale for prohibiting or restricting dog access- when they desparately need the trails- and in the vast majority of instances, do not interfere with nature or the city.

Thank you,  
Glenn Fleisch, Ph.D.

**Correspondence:** Your proposed restrictions to dog walking at Ft Funston and other areas within the GGNRA will greatly impact my life and the life of my dogs. It's the only place we can for daily exercise. We have been enjoying this park for 15 years and have been actively involved in the monthly clean ups. Having large dogs it is important for their mental and physical health to be able it runoff leash. We enjoy the acreage at Funston where there is enough space to interact with other dogs should we choose but most importantly we can enjoy walks alone and not have to feel like we are at a dog park.

Please reconsider you plan.

Subject: Opposition to the Entire Dog Management Plan 2013 SEIS

Mr. Dean, Please find my comments along with an attachment Wheres The Proof?

As a current Dog Walker at Fort Funston:

I am opposed to the entire 2013 SEIS GGNRA Dog Management Policy for the following reasons:

When congress established the GGNRA in 1972, they included two "specific provisions" unique to the GGNRA:

First, the park was established "to provide for the maintenance of needed recreational open space necessary to urban environment and planning."

Second, the GGNRA statute imposes a unique limitation on NPS's discretionary power for "management of the recreation area" by providing that the "Secretary of Interior...shall utilize the resources in a manner which will provide for recreation and educational opportunities consistent with sound principles of land use planning and management."

The GGNRA does not use sound principles of land use planning and management, or even follow their own rules and regulations.

The premise that dogs in the GGRNA are compromising visitor safety and damaging the resources of the Recreation Area is absurd. By their own admission, the GGNRA has no data or studies to support these claims. They ignore/omit all studies that contradict their desired outcome.

How can the GGNRA undertake a Dog Management Policy change as proposed in this SEIS without any evidence of monitoring or site specific studies (as required by federal law) as a means to identify the alleged impairment?! Anecdotal comments and the "potential" to damage the area just don't cut it.

Once again, buried deep within the SEIS is the GGNRA's poison pill. Now called the Monitoring-based Management Strategy, the GGNRA gets to decide whether we are in compliance, and the measures of

compliance are subjective. Short or long term closures could be triggered by any number of conditions totally under the purview of the GGNRA, all of which dog guardians have no ability to influence by our actions. The GGNRA could decide they want to make Fort Funston in its entirety a native plant restoration/habitat; and they can do so, based upon this language. More erosion at Ocean Beach or the beach below Fort Funston could be their reason to ban dogs entirely from these beaches. This is unacceptable.

My preferred option is one the GGRNA deliberately omitted: the original 1979 Pet Policy which was affirmed as legal and the current law of the land by Federal Judge William Alsup in 2005.

The only way the citizens of San Francisco can get the GGNRA to follow their own rules and regulations is by taking them to court, which has consistently ruled in favor of the citizens.

Why must ordinary citizens use their own resources to battle the limitless legal resources of the NPS because of the GGNRA's illegal actions and refusal to abide by the enabling legislation?

I am old, tired, broke; and am on my 4th dog since this battle began nearly 2 decades ago. Fourth dog will surely cross over the Rainbow Bridge before this entire BS is settled. I'm tired of writing letters, attending meetings, testifying in court, and submitting comments, but I will continue until I'm dead or until the GGRNA honors their promise to the citizens of San Francisco.

Enough already. Either codify the original 1979 Pet Policy with a Section Seven Special Regulation, or ... turn the lands over to another agency to manage as promised ... or the land reverts back to the City and County of San Francisco. No more DEIS, SEIS, Rulemaking, or comment periods when we all know you totally ignore the thousands who have responded to you and continue to pursue your own agenda of keeping people and animals out of the GGNRA.

First Attachment: Where is the Proof : Where are the Sight Specific Studies:

It has been seven years since and the public has still not seen anything that proves that the DEIS/SEIS Dog Management Plan is based on any site specific studies that prove there is even a problem with People recreating on GGNRA land with their Dogs.

It is now December 12, 2013 and there still has been no Proof or Evidence provided to Dr. Valente's request to provide the data, documents, and/or Staff Report which substantiated the GGNRA's claim that there was controversy over the dog policy, compromised visitor and employee safety and resource degradation which warranted the change in DMP and DEIS.

In 2006 when the plan to change the Dog Management Policy(DMP)/DEIS was announced on the Federal Register, Dr. Suzanne Valente made a Freedom of Information Act (FOIA) request to provide the data,

documents, and/or Staff Report which substantiated the GGNRA's claim that there was controversy over the dog policy, compromised visitor and employee safety and resource degradation which warranted the change in DMP and DEIS. The GGNRA's response merely stated: "The Staff Report and other documents you seek do not exist at this time". [emphasis added]

An appeal from Dr. Valente to the Department of the Interior regarding this FOIA request elicited the following response (after several correspondences from Dr. Valente): "Since the Department has not made a determination on your appeal within the time limits set in the FOIA, you may seek judicial review under 5 U.S.C. 552(a)(4)(B). However, we hope that you will delay filing the lawsuit so that the Department can thoroughly review the issues in your appeal and make a determination. We appreciate your patience to this point and the Department will make every effort to reach a decision on your appeal as soon as possible." This letter is dated August 8, 2006. A written response to the appeal was received by Dr. Valente almost five years from the date of the original request. The Department of Interior again confirmed there were no documents to substantiate the need for a change in the DMP and this DEIS/SEIS.

The lack of data or any documentation to support the assertions used as justification to proceed with this Environmental Review violates Federal Law as it renders this agency action arbitrary, capricious and an abuse of discretion. Accordingly, this agency action, findings and conclusions should be set aside as prescribed by the Administrative Procedure Act, 5 U.S.C. 706 (2)A.

Why is it significant that other Recreation Areas perform annual monitoring of resources and the GGNRA does not? Why is monitoring so important? As stated in an NPS publication, "Monitoring the Condition of Natural Resources in US National Parks"

([http://science.nature.nps.gov/im/monitor/docs/Monitoring\\_Park\\_Condition.pdf](http://science.nature.nps.gov/im/monitor/docs/Monitoring_Park_Condition.pdf)) the purpose of monitoring is as follows:

"The overall purpose of natural resource monitoring in parks is to develop scientifically sound information on the current status and long term trends in the composition, structure, and function of park ecosystems, and to determine how well current management practices are sustaining those ecosystems. Use of monitoring information will increase confidence in manager's decisions and improve their ability to manage park resources, and will allow managers to confront and mitigate threats to the park and operate more effectively in legal and political arenas."

Additionally, a review of NPS online resources reveals that there is an entire infrastructure set up to guide and facilitate NPS properties in their monitoring duties, "Vital Signs Monitoring" (<http://science.nature.nps.gov/im/monitor/index.cfm>)

A subsection of the aforementioned web site (Program Goals) discusses the goals of park monitoring:

"Natural resource monitoring provides site-specific information needed to understand and identify change in complex, variable, and imperfectly understood natural systems and to determine whether observed changes are within natural levels of variability or may be indicators of unwanted human influences. Thus, monitoring provides a basis for understanding and identifying meaningful change in natural systems characterized by complexity, variability, and surprises. Monitoring data help to define the normal limits of natural variation in park resources and provide a basis for understanding observed changes; monitoring results may also be used to determine what constitutes impairment and to identify the need to initiate or change management practices." [emphasis added]

Further exploration of the NPS "Vital Signs Monitoring" Resources Online (see

<http://science.nature.nps.gov/im/monitor/ProgramGoals.cfm>) reveals that National Park managers are directed by federal law and National Park Service policies and guidance to know the status and trends in the condition of natural resources under their stewardship in order to fulfill the NPS mission of conserving parks unimpaired (see "Summary of Laws, Policies and Guidance" at <http://science.nature.nps.gov/im/monitor/LawsPolicy.cfm>).

More recently, the National Parks Omnibus Management Act of 1998 established the framework for fully integrating natural resource monitoring and other science activities into the management processes of the National Park System. The Act charges the Secretary of the Interior to "continually improve the ability of the National Park Service to provide state-of-the-art management, protection, and interpretation of and research on the resources of the National Park System", and to "assure the full and proper utilization of the results of scientific studies for park management decisions." Section 5934 of the Act requires the Secretary of the Interior to develop a program of "inventory and monitoring of National Park System resources to establish baseline information and to provide information on the long-term trends in the condition of National Park System resources." Clearly, the failure of GGNRA management to conduct any consistent monitoring of the resources of the GGNRA is a violation of Federal law.

The more fundamental problem this SEIS highlights is the fact that GGNRA management is in persistent violation of the enabling legislation for this park property. GGNRA management can provide no monitoring report to substantiate visitor use patterns or conflicts, no documentation of degradation of the Recreation Area resources, as well as no documentation as to whether resource degradation is inevitable or under the control of management prior to proposing these management changes. It seems impossible that GGNRA management would undertake a Dog Management Policy change as proposed in this SEIS without any evidence of monitoring or site specific studies as a means to identify the alleged impairment.

**Correspondence:** I am writing to urge you to stop the Golden Gate National Recreation Area from implementing your new dog management plan. This plan will cut where people can walk off- and on-leash by 90% compared with where people can walk with dogs now. It is going to create a huge impact on the Bay Area, which we simply cant afford.

I had hoped that this new plan would be significantly different from the original GGNRA dog management plan, because thousands of people-the overwhelming majority-submitted substantive comments in opposition to the plan. But the GGNRA did not make significant changes. GGNRA ignored what people want, and are moving forward with an extremely unpopular plan no matter what we say.

The GGNRA was created in 1972 for the maintenance of needed recreational open space, and to expand to the maximum extent possible the outdoor recreational opportunities available to the region. That's why it's designated as a National Recreation Area, not a National Park. With the new dog management plan, the GGNRA is reneging on your promises to preserve and protect recreational access to the GGNRA.

There is no credible reason why people with dogs are not allowed to have adequate and reasonable space to walk their dogs in the vast 80,000 acres that comprise the GGNRA.

Suggestion: to preserve access and the impacted off-leash areas, consider user fees, whether at the entrances or an annual fee. Dog owners are responsible and resourceful and will be happy to support the GGNRA in preserving and maintaining the CURRENT off-leash status of Ft. Funston, areas of Ocean Beach, Crissy Field, Stinson, etc.

**Correspondence:** I strongly disapprove of the proposed plan, particularly as it relates to Fort Funston.

The proposal is FAR TOO restrictive with regards to off leash areas at Fort Funston.

The proposal limits off leash dog walking to two relatively small, overused areas on the bluff which are the least attractive sites in all of Fort Funston and to the beach, which is excellent but difficult to access for elderly dog and disabled dog owners due to the steep, sandy trails which must be negotiated to reach the beach.

I would strongly urge the Park Service to keep all areas not currently restricted at Fort Funston AS IS.

Keep in mind that walking dogs on a leash isn't terribly fun for either the dog OR the owner. Off leash walking is very enjoyable for both. Fort Funston is probably the best place to walk a dog in the entire Bay Area. It is a precious and irreplaceable resource for dog owners. It would be a crushing loss if off leash dog walking were restricted to the preferred plan.

Re "Mixed Use" and sharing of the facility: I use Fort Funston at least twice a week. By my estimate, at least 90 % (robably more like 95 %) f all users of Fort Funston are people walking their dogs. Horse riders NEVER use Fort Funston proper (they stay in the slumped land and the beach to the South of Fort Funston). Hang gliders are active perhaps 5% o the time (if that)and are there in small numbers.

For all intents and purposes, Fort Funston is, in practice and by long history, a destination OFF LEASH

---

DOG PARK. I urge you to keep in as such and not eviscerate it by placing draconian restrictions on off leash use.

Thank you.

**Correspondence:** Please review this whole plan to dramatically decrease where people like myself can walk with our dogs on GGNRA lands. My husband and I moved to San Francisco from London, UK last year and one of the main reasons we were so excited to move was due to the dog-friendly nature of the city and amazing off-leash walking areas. We specifically love to go to Crissy Field, Fort Funston, Ocean Beach and Baker Beach and have encountered nothing but happy dogs and responsible dog-owners on our many walks over the past year.  
I think if you spent any time on these recreational areas and saw the amazing communities of dog-owners and fresh air-loving dogs, there's no way this plan would go ahead.  
I'm sure there are more dog-LOVERS in this city than dog-haters so I just don't get it. Take Fort Funston for example. At the moment the beach is loved by hundreds of us dog-owners but it's a) not the most accessible beach in the world for other recreational uses and b) the sand isn't the most attractive either - being generally black! It would be a real shame to take away those who love and use this beach for it to then hardly get enjoyed at all.  
I've never encountered anyone who doesn't love seeing a dog running around chasing balls on a beach and as far as a I can tell, this city is full of very responsible owners who pick up their dog's mess and have their pets under voice control at all times.  
Thanks for taking the time to read this. I'm now off out to take my mini Schauzer to his favourite Fort Funston destination... hopefully a spot he can continue to enjoy for years to come.

Yours

Georgia Gould

**Correspondence ID:** 676 **Project:** 11759 **Document:** 55416**Address:** San Francisco, CA 94117  
United States of America**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Dec,14,2013 12:38:58**Correspondence Type:** Web Form**Correspondence:** The proposed restrictions on dog friendly spaces in Bay Area GGNRA sites is unacceptable. As a tax paying San Franciscan I oppose this document. California is already one of the most dog unfriendly states with some of the most restricted access rules in the nation (with both county, state & city ordinances). Up to now San Francisco is one of the more dog friendly cities in California. Surrounded by water, it would be a shame to restrict dogs, and by effect, its tax paying residents, from enjoying romping through our wonderful parks. Almost the entire California coastline is restricted in some way to dogs. It's the ocean! Let them play! Dogs that are allowed to exercise off leash are healthier, happier & better behaved. Their owners are healthier, too!

There are, of course, a small number of incidents between dogs, people, etc. this is inevitable in a populated area. However, the answer is not to punish the majority of tax paying citizens & their furry friends. It is unfair, and will place unnecessary burdens on city parks, streets, and animal shelters. Even on leash dog areas are inadequate. My dog is a water dog & would be tortured if walked along the beach without being allowed to go in! If there must be more restrictions on off leash areas then it cannot be excessive. I propose the main area in front of the East Parking lot be leash only, but from the lagoon on continue be off leash, until the West Side that is already off limits due to snowy plover nesting. We all have to share. We all love this place. Crissy field is amazing. The citizens helped transform it, it is ours to enjoy. Running, playing with my dog on the beach weekly is what keeps me sane & happy! Please don't take it away!

**Correspondence Type:** Web Form

**Correspondence:** My name is Michael Barti. I live at 61 Cazneau Ave in Sausalito. I regularly take my dog to Muir Beach, Rodeo Beach, Chrissy Field, Stinson Beach, Fort Funston and places in the Headlands.

I STRONGLY OPPOSE your plan to reduce the off-leash and dog-friendly access to the GGRA. Your preferred plan is unreasonably restrictive. I haven't seen enough justification in the DEIS for major changes. There are plenty of places where dogs aren't allowed already. We shouldn't reduce them further.

I'm also opposed to a compliance-based management strategy. This punishes responsible dog owners for the actions of others. If the problem is owners who aren't complying, then the solution should be enforcing the rules and ticketing them instead of permanently closing areas to all dog owners.

One of the major reasons I live in Northern California for the access to the outdoors. I hike often and enjoy taking my dog with me, as do countless other responsible dog owners. Our voices should be heard and considered in any "plan." The Golden Gate National Recreation Area is about recreation (heck, it's in the name!) Why is enjoying these areas recreationally with our pets being outlawed?

I believe that you need to prove the assumptions in the DEIS before you consider such restrictive and draconian measures.

**Correspondence Type:** Web Form

**Correspondence:** I am writing to oppose the dog management plan currently being proposed on GGNRA lands - specifically for Ocean Beach, where I live and go every single day. I live at 48th and Lincoln, and chose this are to live in specifically because of the access to open space at the beach, where I could safely walk my dog. That beach is more than 5 miles long, and there are very few people out there most days - except mainly other people walking their dogs. It is an ideal place to walk a dog without impacting anyone. The majority of people I see at Ocean Beach have a dog with them, in fact - except for the rare days that reach over 70s at the beach, when 'regular' people come out to enjoy the area. So these proposed changes to beach use will most greatly affect the specific people that actually use the beach on a regular basis, and their furry friends. Please don't make these changes and restrict dog use at Ocean Beach, and the other beaches within GGNRA in SF.

Changing the dog use rules at GGNRA beaches would negatively impact the quality of our lives for those of us that use the beach regularly, and our dogs lives. I can't tell you how much I value being able to go to the beach daily and find a wild solitude, go running, and get exercise for both myself and my pup. This is such a wonderful and precious aspect of living in San Francisco! Its amazing to have a place where dogs can run, play in the ocean, and be with other four-footed friends in a nature. Without dog access to Ocean Beach I wouldn't want to live in my neighborhood anymore. Please please please don't take this away from all of us.

**Correspondence:** Dear Superintendent Dean -

I am writing to express my strong support for the GGNRA's management plan as proposed. I do not, however, support any fenced areas for "dog parks."

Please see my letter to Congresswoman Pelosi which goes into greater detail.

Thank you for all you do, and to your staff.

- Jennifer Greene

Dear Congresswoman Pelosi:

I am writing to request your support for the GGNRA's proposed dog management plan and the process timeline.

I am a mother of a 6 year old boy who lives near Ocean Beach. I have hesitated to bring him there, and have never brought him to Fort Funston or East Beach/Crissy Field because all of these park sites are unsafe and unpleasant due to unmanaged dogs and irresponsible owners.

I understand that you recently referenced St. Francis in support of the dog owner community's request for less regulations and an extended deadline. I encourage you to consider the whole of St. Francis' message, his love for all living things, which can include the snowy plover, wild coho salmon, even Park Police horses, all of which have been harmed by unmanaged dogs.

St. Francis also had great compassion for the vulnerable, such as children, the elderly, and poor. The parks are for all - no one group should overwhelm our national park and make people feel unsafe or unwelcome.

We love dogs, in the right places. There are many provided in the park. It is frustrating to me that their owners are irresponsible and single-minded and do not respect the resources we have. Referring back to St. Francis, I am sure you are familiar with his prayer, "Make me a channel of your peace." I encourage you to do what you can to protect our park and bring our community together, not divide it by supporting lax rules to benefit dog owners.

- Jennifer Greene

**Correspondence:** Dear Superintendent Dean -

I am writing to express my strong support for the GGNRA's management plan as proposed. I do not, however, support any fenced areas for "dog parks."

Please see my letter to Congresswoman Pelosi which goes into greater detail.

Thank you for all you do, and to your staff.

- Jennifer Greene

Dear Congresswoman Pelosi:

I am writing to request your support for the GGNRA's proposed dog management plan and the process timeline.

I am a mother of a 6 year old boy who lives near Ocean Beach. I have hesitated to bring him there, and have never brought him to Fort Funston or East Beach/Crissy Field because all of these park sites are unsafe and unpleasant due to unmanaged dogs and irresponsible owners.

I understand that you recently referenced St. Francis in support of the dog owner community's request for less regulations and an extended deadline. I encourage you to consider the whole of St. Francis' message, his love for all living things, which can include the snowy plover, wild coho salmon, even Park Police horses, all of which have been harmed by unmanaged dogs.

St. Francis also had great compassion for the vulnerable, such as children, the elderly, and poor. The parks are for all - no one group should overwhelm our national park and make people feel unsafe or unwelcome.

We love dogs, in the right places. There are many provided in the park. It is frustrating to me that their owners are irresponsible and single-minded and do not respect the resources we have.

Referring back to St. Francis, I am sure you are familiar with his prayer, "Make me a channel of your peace." I encourage you to do what you can to protect our park and bring our community together, not divide it by supporting lax rules to benefit dog owners.

- Jennifer Greene

<b>Correspondence:</b>	I urge you to keep the 1979 Pet Policy in place for the GGNRA. If off leash dog walking is banned it will create a tremendous burdon for city, county and state parks. During the federal government shutown in fall 2013 several if not all areas in the GGNRA were closed. During this time I noticed a huge spike in usage for off leash dog walking in San Francisco city parks. If off leash dog walking access is restricted in the GGNRA it will lead to unsustainable usage levels in city parks. The 1979 Pet Policy allows thousands of responible dog owners to enjoy the GGNRA with their dogs and it
------------------------	---

---

would cause a huge burden for the local governments to deal with fallout of increased restrictions of off leash dog walking in the GGNRA.

I have walked my dog off-leash at Fort Funston for a dozen years. I last commented on the GGNRA plan more than a year ago. Much has happened in the past year, and my former comments are now obsolete. Fort Funston has deteriorated to the point that any grand plan by the GGNRA is useless. Trails, fences and infrastructure are covered by sand almost as soon as they are erected. The cliffs are falling into the sea with alarming speed.

As a taxpayer I object to my tax dollars being used to fund futile efforts. The GGNRA can't make recommendations to keep pace with the changing topography. Mother Nature will undo any plan put in place.

Any dog management plan will become obsolete before it can be implemented. This is due to deteriorating conditions at Fort Funston and the lack of funding. The easiest and cheapest solution is to do little, if anything, at the Fort. The highest and best use for most of Fort Funston is to leave it as it is for the enjoyment of the hundreds of dog people who use it every day.

**Correspondence:**

I live in Montara and have been hiking the local trails for 35 years, in the area that is now included in the GGNRA. Recently - - in the last, say, 3-5 years - - I've observed a notable increase in the frequency of dogs walked by their guardians. For the most part, these dogs have been unobtrusively enjoying their experience and have not caused any negative impact that I could see. I like dogs; at least the ones which are minding their own pursuits and not jumping on, barking at or otherwise harassing me personally.

HOWEVER - - there are is a relatively small group of dog owners (guardians?) who seem to feel that any open space is their and their dogs own, and in which they can more or less do whatever they choose. This is a problem for me. I cite two examples, below, of the many which have affected me over the years.

I do not like to be approached by large dogs sniffing (or potentially biting?) my hands, when I have no idea whether or not they are "aggressive" to non-owners. The owners assurances that "... it's OK, he/she is friendly ..." are not assuring to me, as in several cases this has turned out to NOT be the case. Nor do I appreciate dogs which have been in the water or mud "greeting" me in the (hopefully) friendly way they seem to prefer by jumping up and pawing my torso.

As one example, on two separate occasions, the same woman's dog (off leash) rushed at me on a narrow

---

trail and, on one instances, knocked me off my feet. Not a problem in this case (other than my apprehension), but on other occasions involving other participants, a similar situation led to injury.

Another example - - a woman with three dogs (ALL THREE off leash) watched as one of her dogs came at me aggressively as I attempted to pass them walking along the trail. The dog started at me from approximately 50 feet away, barking and snapping at my legs when within range. The same dog after having backed off, attacked me a second time, in full view of the owner, who apparently felt that saying "I'm sorry" was sufficient. It was NOT to me! I've since encountered the same "clan," in the same circumstances, but thankfully, without the same aggressive experience. But who knows what will be the experience next time. Such owners are, in my opinion, irresponsible.

The jumping up and pawing examples are too numerous to mention.

To reiterate, I like dogs EXCEPT when they behave in the manner I've described above and are clearly not under the control of their owners. The vast majority of the dogs I've encountered over the 35 years I've been walking on what is now part of the GGNRA are very pleasant and I like to see them enjoying their experience with their owner/guardians. But the small minority makes it unpredictably unpleasant.

MY SUGGESTION? Provide areas where dogs can be off-leash and do whatever they want. But confine the dogs to these areas. I know from many conversations that this is unpopular. But until the responsible owners or others can figure out a way to control the irresponsible, I don't see alternatives that can accommodate/protect those who do not have dogs - - and there are many.

THE PROBLEM? How will any regulations/rules be enforced? I walk in the GGNRA nearly every day and see dogs off-leash that exhibit both positive and negative behaviors. I've only encountered rangers once or twice in over 6-8 months. As usual, it's the small minority of irresponsibles that makes it difficult for the rest.

Once rules are established and agreed upon, there needs to be strict and consequential enforcement and penalties. Please spend the time and effort to devise a way (ways?) to address this issue. Don't simply legislate rules and then not enforce them. To me, that would be an unfulfilled responsibility.

**Correspondence:** The Superintendent, GGNRA:

I am writting to let you know my position concerning the Draft Dog Management Plan which is currently being considered for implimentation. I am a 60 year old male that has lived on the San Mateo County, California coast since 1981, and I am an advid and responsible dog owner. I am greatly concerned over the Federal Governments plan to severely restrict dog access to our National Recreation Areas such as GGNRA. While I understand the need to regulate dogs in National Parks, such as Yosemite, I believe that alternate guidelines taking into account the needs of the local population, would better serve our community. Here are some of my thoughts:

1) I walk with my dog at Rancho Corral de Tierra twice each week. This is a beautiful part of the coastside and the reason that I moved here. Being local, I drive past or use these trails almost every day. My best estimate is that no more than 100 people use the trails climbing up on Montara Mountain each day, and almost all are local residents. I hike, bike and dog walk in this area and know from experience that dogs with responsible owners cause no harm to either the environment or other people. There are always those that don't like dogs and complain, however, this occurs all over the country and should not influence how our resourse is managed.

2) Further restrictions, that would ban dogs from The Rancho, would in effect ban me from using it as well. I would not be able to leave my dog at home in order to hike Montara Mountain on my own; the reason we are dog owners in the first instance is because we like the companionship of our dogs.

3) The US Humane Society estimates that there are 83.3 million dogs in the US with at least 47% o all

households having at least one dog. What this illustrates to me is that roughly half of us are dog owners. As dog owners we want, and even demand, that our natural resources be shared. This especially holds true for an urban National Recreation Area such as GGNRA.

4) For many years the Montara Dog Group has developed and maintained a network of pet waste stations at The Rancho. We are self-policed and an asset to our community. We clean up after ourselves, we do volunteer trail work and generally watch over our precious resource.

5) We must do everything we can to protect our right to use The Rancho as it has been historically. Over the last five years alone, the California State Rangers have restricted dogs on our beaches, The San Mateo County Rangers have restricted dogs on our coastal bluff tops and now the Federal Rangers are attempting to restrict our dogs from the hills on the East side of Pacific Coast Highway. I feel like I am now living in a police state; only the police are three species of Rangers. Is there any concern that we are over-regulated?

6) Finally, I must appeal to your humanity; dogs are not only companions, but integral family members. They require exercise and areas to play off leash. This is the coast side we are discussing; not an urban big city environment. Please consider this carefully when using your power and authority that will effect our very way of life.

Thank you for allowing me to comment.

Respectfully,  
Michael Yolken

**Correspondence:** I understand the need for dog owners to control their animals and I am a responsible dog owner. However, it seems a shame to punish the majority because a few are irresponsible and likely to remain so even if the laws change. Even before I had a dog, I loved going to Chrissy Field to watch the scene- -the vast majority of the time it's terrific dog and people watching as dogs and people of all ages coexist happily and seem to bring a lot of joy to each other. I think Chrissy Field is a uniquely San Francisco place and I think it would be a real shame to restrict it so dogs can no longer play there. Thank you for your consideration of my comment.

**Correspondence:** I am strongly for maintaining AND increasing off leash areas for dogs and other domesticated creatures. I feel strongly that all animals (humans included) need space to run, feel free and be with one's own will. I recognize that many urban dwellers are interested in keeping order, feeling safe and having additional rules and boundaries however, this should not come at the expense of other creature's freedom. My own dog (12 year old miniature schnauzer) is very well behaved, however, she too needs time to explore and feel free. Off leash areas allow our generous companions to reconnect with their own inherent freedom and thus, feel more at peace. Again, I am advocating for maintaining and increasing off leash areas.

September 30, 2013

Dear Mr. Edwards,

I have been following your draft supplement on the Golden Gate National Recreation Area Draft Dog Management Plan in California and I have some questions and concerns that I would like to share.

This is a very technical and in-depth report in order to enforce new dog regulations for the park, so my question is why? Who is your targeting audience for the report? I ask these questions because if you are trying to reach the community, city, or potential dog walkers you might want to do another report that isn't so technical and the people can understand it. The average person reading this might look over what the new regulations are for having dogs in the park and the good alternatives that you suggest.

When you go over Alternative C and discuss that some areas will be allowed for dogs to be off the leash in some areas is a good alternative. This way people can interact with the park a lot more by allowing their dogs to go off the leash. The only concern that I have with this alternative is what the extranets to the dogs being off leash are. Are there areas in the park where people can camp that their dogs can be off leash or will there be fenced off areas in the park to help protect the wildlife and the surrounding environment.

So to clarify my questions and concerns I have for the project are as follows:

Who is the target audience of the draft supplement?

For Alternative C, are the dogs allowed to be off leash in the park or are they in an enclosed fence?

I am a student of the University of Colorado at Boulder majoring in Environmental Design in Planning. I want to focus around city planning and urban planning maybe working with park space and redevelop communities. I was interested in your draft assessment because I didn't know that you needed to do an EIS draft to change something that sounds simple in a national park. After looking over the draft, it does make sense to do a draft when changing the dog regulations in a national park. I am in an Environmental Impact Assessment class currently and we have been looking at different EIS case studies. It just never crossed my mind that you would need one for changing the rules to allow dogs in a national park. But it does ask a few questions that would bring up the reasons for making one. Like, what will happen to the environment and wildlife when more dogs enter the park? How can you maintain the preservation of plant life and future plant life of the park?

I would appreciate if you could review my comment and maybe clarify some of my questions so then I can have a better understanding of what is all involved in changing regulations in a national park.

Sincerely,

Jasmen Rivers

B.

I didn't pull any sources to compare with the project, I just used my knowledge that we have gone over in class so far. Like, why would you need to do an EIS report? If you are changing the environment, want to seek public comment for a project, and want to view the possible consequences of the environment, these are all reasons for doing a statement. I didn't think that changing dog regulations would cause a big enough impact to the park that you would need to do a report.

The project is titled, Golden Gate National Recreation Area Draft Dog Management Plan and it is based in California. The project proposal is to offer new dog regulations to allow dogs in some areas of Golden Gate National Park. I EIS draft offer five different alternatives:

1. No action alternative
2. 397 units governed for dog walking. Allowing a three dog limit per person for all dog walkers and commercial dogs. All dogs have to be on a leash and no permits required.
3. Options for on-leash and regulated off-leash areas in the park

4. Overall highest level of protection for the natural and cultural resources and visitor safety. This would exercise dogs being on leash in protective areas to preserve nature.

5. Provide the greatest level of access to dog walkers all over Golden Gate National Park.

I was curious on why you would have to do an EIS draft for adding new regulations to a national park.

The only good point that I could find in the report was to protect and preserve the forest for the future and dogs can cause an impact on the park. After listening to other case studies that we went over in class, I'm having trouble seeing dogs doing a large environmental impact on a national forest.

**Correspondence:** To whom it may concern,

Having read the draft proposal for dog management on GGNRA lands, I would like to comment that the proposal is much too restrictive. Especially at Fort Funston and Crissy file, where off leash dogs have been allowed for decades.

Please loosen the restrictions proposed and further, adopt a similar set of restrictions as the city and county of San Francisco.

Thank you.

**Correspondence:** As a SF resident consider my comments targeted to SF. (map 9-16)

I am supportive of urban 'NPS' areas. But urban 'NPS' areas are inherently different than non-urban 'NPS' areas. The consumers are different, the possibilities and constraints are different and the goals are different.

In SF a large % of consumers of 'NPS' areas are dog owners who need a place for their dog to run around

and be a dog.

We don't have yards or other options. Not allowing dogs would be like stating that kids aren't allowed in the parks.

I can't say I understand the environmental perspective. We have concreted over the entire city so I find it hard to understand how we are ok with that development but we have decided to draw the line with off leash dogs.

In terms of safety, yes, lets create a safe environment.

And I do agree with some dog /non-dog areas in the proposal. But Fort Funston is currently used as a dog park. Everyone there has a dog and is there to hang around more dogs. Same with other areas of the proposal.

I have not see any data about how many dogs use these parks currently.

I'm glad we are spending money on NPS spaces but please be realistic about how people use the spaces.

<b>Correspondence:</b>	Dear Sir or Madam:				

I'm writing to ask you not to rule any areas in San Francisco where dogs are currently allowed to be "off leash" off-limits. Our city is tiny; space for dogs is already restricted. To further reduce their ability to run or play negatively impacts them and creates hardship for responsible owners.

I realize that you seek a coordinated national policy. But a very small city has different requirements than other places, and dogs do need freedom; it's good for them; it prevents aggression or fights over territory in limited areas; and it is beneficial for people who, like myself, live with illness and want our animals to enjoy optimal health.

Thank you for considering my request.

Sincerely,

Adrian

**Correspondence:** Please continue the same level of dog privileges in San Francisco. The dog areas at Fort Funston, the East Beach at Crissy Field and Ocean Beach are a vital part of the culture of our great city. San Francisco's "European Vibe" is the city's greatest asset. To disrupt the availability of dog owners to exercise their animals both on lease and off, would seriously disrupt the "European Vibe."

Allow responsible dog owners freedom; and punish irresponsible owners as necessary. Just as all people are not equally responsible, so too are not all dog owners.

**Correspondence:** It is very important that the Dog Management Plan be adopted and implemented to protect the park's resources. Off leash dogs unmanaged in the park cause great destruction to fragile environment and also degrade the condition and quality of the park's trails and amenities for all other users. Dog owners should be expected to respect rules that manage the park for the benefit of the broadest array of public users, not just the most dominant user group.

**Correspondence:** I am an owner of a 5 year old Boxer. I have always taken my dog to Muir Beach where he has been able to run, chase his ball and exercise on a weekly basis. I live in Novato where there is a dog park. Two years ago, I took Charlie to the dog park where he was severely bitten by another dog whose owner didn't react to his dog biting my dog. I had to take him to the hospital where I spend \$600.00 repairing his wound. After that incident, i've not taken him to the dog park since.

I have never once had a bad incident when at Muir Beach. We have not been there since the closure and we are patiently waiting for the re-opening so we can once again have the freedom to exercise off leash in a place where people and animals are friendly and well behaved. When walking Charlie on Muir Beach I pick up trash left by others at the beach. I also have a 4 year old daughter who accompanies me on our walks. This has become a routine of ours. Walking on the beach while Charlie chases his ball, we stroll and pick up trash, taking care of our beach and ultimately oceans.

I can't imagine the restriction of having dogs leashed at this beach. There are many others who are

---

accustomed to walking their dogs on the beach and we all respect and enjoy our freedom of doing so.

There is no reason why this needs to end. I've never witnessed a dog biting another dog or an owner neglecting their dog at this beach. I cannot see any negative impact this has to our environment. Especially if we owners are picking up trash.

Where will I walk my dog off leash in the future where they can exercise happily? It is the one area we go to safely for exercise off leash and have no other place to go.

**Correspondence Type:** Web Form  
**Correspondence:** I am a dog owner and lover, as well as a member of the Golden Gate Audubon Society, a devoted birder and wildlife enthusiast. I read with dismay the latest newsletter from the GGAS, excerpted below. Please create and enforce wildlife and domestic animal rules that enhance the lives of all concerned.  
Please revise the GGRNA dog management policies as proposed by the GGAS. Thank you. Celine Lielle

"Some parts of the GGNRA have become so thick with dogs that they are now essentially giant dog runs. Off-leash dogs menace the colonies of threatened Snowy Plovers at Ocean Beach and Crissy Field. Park staff spend large chunks of time managing conflicts between dogs and people, dogs and wildlife, and among dogs themselves.

In 2008, the National Park Service filed almost 900 pages of Criminal Incident Records related to dogs in the GGNRA, many of which involved dogs chasing and harassing wildlife.

These problems continue. Just this fall, GGAS board member David Anderson watched an off-leash dog kill a gull at Sutro Baths. The dog owner responded, "I let my dog train with them for hunting. It helps when I go duck hunting."

This problem has several roots. There are not enough dog-free trails in the San Francisco section of the GGNRA. Off-leash areas are not set off clearly enough from other parts of the park. The number of commercial dog walkers with multiple dogs continues to grow. Enforcement has been lax.

The proposed rules improve the status quo in several important ways. They prohibit dogs from some key

---

areas such as the Crissy Field Wildlife Protection Area. They also require dogs to be leashed in some Snowy Plover.

Off-leash dogs menace the colonies of threatened Snowy Plovers at Ocean Beach and Crissy Field. areas where they are currently allowed off leash, such as the Ocean Beach Snowy Plover area.

There are still ways in which the new rules fall short: They don't require fencing or natural barriers around off-leash areas. They allow commercial dog walking with permits for up to six dogs.

Yet, overall, the new rules will be a big step forward. They provide more opportunities for people to picnic, hike, or view wildlife without dogs running around. They help make park accessible to a wide variety of visitors-families with young kids, seniors, joggers, and (yes) birders.

San Francisco dog activists are mounting a loud, emotional campaign against the new policies, which they call a "plan to get rid of people with dogs."

We disagree. Many GGAS members are also dog owners and understand the importance of respecting wildlife while enjoying the outdoors with our dogs. We don't see this as an issue of dogs versus birds-we see it as an issue of balancing park uses.

Please join us in speaking up for a balance of uses in the GGNRA, along with a strong enforcement policy that will make the park safe and enjoyable for everyone."

**Correspondence:** I am greatly concerned about the environmental impacts of off-leash dogs roaming our natural parkland. I have witnessed off-leash dogs chasing birds and other wild animals along our beaches and trails. I have also seen off-leash dogs chase runners, jump up on children and attack other dogs. Dogs should be allowed off-leash only in specified fenced areas, similar to other "dog runs" that other cities have.

It also seems like only a small portion of actually pick up after their dogs and having dogs offleash only increases the likelihood of dog owners acting irresponsibly.

In addition, I would like to see pitbulls banned from the park. Pitbulls are aggressive dogs and should generally not be allowed in the park because of their tendencies to attack other people and dogs.

**Correspondence:** I suggest that GGNRA compromise by setting aside a certain amount of land for a "Dog Park" and if preferred, it could lease that land to a local Dog Association for \$1 so the Dog Association is responsible for usage, maintenance, cleanup and liability. GGNRA can erect an aesthetically pleasing fence around this area so dog owners can allow their dogs to run & play freely off leash in a setting that won't interfere with others use of the GGNRA park. On leash walking should still be allowed in the park as currently allowed. In GG Park, there is a fenced in area for Bison; there are also designated areas for various sports activities - so there is plenty of precedence. I used to live in Mountain View and they have a really well maintained Dog Park that even provides separation between large and smaller dogs.

**Correspondence Type:** Web Form  
**Correspondence:** For 19 1/2 years, my family has regularly walked our dogs at Rancho de Corral de Tierra in perfect peace and harmony. We have never had even one single incident with other peoples' dogs or our (many) dogs.

Almost the minute GGNRA took over the property there were PROBLEMS. We never had any dog problems before GGNRA. Now we do.

Before GGNRA, we didn't have a DOG MANAGEMENT PLAN. Now we do.

Before GGNRA, we didn't have our neighbors being shot with taser guns by rangers. Now we do.

Before GGNRA, our taxpayers didn't have to spend their money on 1,431 page DOG MANAGEMENT PLANS, including 29 pages of glossary terms and 10 pages of index. Now we do.

Question #1: Exactly how many tax dollars did the DOG MANAGEMENT PLAN cost, out of curiosity?

Question #2: Is your policy to shoot our coastsiders with taser guns going to continue per your new DOG MANAGEMENT PLAN?

Question #3: Do you think coastsiders are going to read your 1,430 page DOG MANAGEMENT PLAN?

Question #4: Do you think you have gained the respect of our coastsider community? If not, do you expect your DOG MANAGEMENT PLAN is going to help?

Question # 5: Have you considered the fact that We Live Here and You Don't?

Everyone I know who live on the coast has chosen to do so because they love and respect the natural environment and wish to preserve it. Perhaps GGNRA is under the impression that coastsiders are hapless anarchists who run amok with their canines destroying natural habitats.

Please consider your relationship with the coastsider community before implementing your DOG MANAGEMENT PLAN. Particularly if you expect it to be successful.

Regards,  
Debby Lesser

**Correspondence:** I am a resident of Moss Beach for approximately 27 years and have walked my dogs off leash in what is known as Rancho Corral Di Tierro, and have never had a problem with horseback riders and the occasional hiker, Being a horse owner myself, it is common knowledge to put your dog(s) on a leash when you see some one on horse back. We have co existed this way for years. Dogs need a place to run and chase their ball, and enjoy the out doors like everyone else. It would be a shame to restrict them just because of a few people's opinion. This area has been my backyard since I purchased my home and I would hate to lose what I have enjoyed for so long. I believe we can all get along without the government interfering with our everyday activities.

There are so many horse owners who also love to bring their dog(s) with them when they are riding, which is good exercise for their horse and their dog, if you restrict dogs to leashes only in this area behind the hospital, I am afraid the ranches in the area would lose their boarders.

Thank you

**Correspondence Type:** Web Form  
**Correspondence:** Thank you for allowing commentary on this plan.

I disagree with your findings to place extreme limits on dog use in what should be considered a recreational area and not a National Park. I list the following reasons.

1. I am a single woman, a taxpayer, and I like to walk. The GGNRA now has control of a majority of the public lands in the Bay Area. I do not have a lot of associates my age who like to walk longer distances, and I find I am much healthier with walking my animal every day. Plus, my dog is my companion.

2. Safety. I like my animal with me for safety reasons. My dog is a safety net for my solo walks. The Pacifica, CA police issued a statement that women should not walk alone after a single female hiker was anonymously videoed on a Montara Mountain trail. The culprit posted his videos of her without her knowing he recorded her and without her permission. Again, the police said "Don't walk alone". There have also been cougar sightings and caution postings in Quarry Park, in Montara, and at 900 Cabrillo Hwy in Half Moon Bay in during Fall 2013. With my dog on leash with me, the guy who videoed and

possibly the cougars would have been detected.

3. Your dog management plan will cause many dog owners to over crowd the few other park areas open to dogs. In my small one block area of El Granada, 11 of 12 households have dogs. You have to consider how the restrictions will impact other public use sites.

4. The trails that dogs on leash are restricted to are close to main roads and prevents me from having a wilderness experience. Horse back riders and bicyclists who maim trails a lot more than dogs are allowed a lot more trail access.

5. Carmel, Monterey, and Pacific Grove, CA have a park/city management/public relationship that should be explored as an example to use. Some beaches allow dogs on leash except for sea animal breeding areas and except for shore bird nesting sites. The park service in this area listened to the needs and wants of the community. I believe the NPS and the GGNRA management should listen to its community before restricting access. Again, I am a taxpayer and want to use the land as the title intends- -for recreation. Instead of alienating the community as this plan does, please be inclusive.

6. Dogs on leash would not disturb wildlife any more than a bicyclist, a hiker, or a person on horseback.

I believe the GGNRA could require a dog access fee to cover the use of trails and to provide poop buckets in strategic locations.

Thank you for the opportunity to express my thoughts.

Susan Messner Whipp, El Granada, CA

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Hello GGNRA Folks				

The National Park Service should not allow dogs within or adjacent to areas considered critical habitat for endangered species. The NPS biologist and the restoration/natural resource specialist should provide information suitable to support such action.

I specifically would like to see either alternative E or F used at Mori Point.

1.The sensitive nature of the Lishumsha Trail and it's proximity to critical habitat for the San Francisco Garter Snake and the Red Legged Frog should make it off limits to dog walking.

The Mori Point Ridge Saddle is a corridor for frogs and snakes dispersing or migrating to and from the quarry and Calera Creek to the Northern Mori Point wetlands. To do so they must cross the Lishumsha Trail.

2.The Mori Point Ridge Timigtac trail is very narrow winding thru grassland habitat. User conflicts can occur hear with leashed dogs using it.

3. There are many dog walking sites in Pacifica, two of which are off leash. The rock quarry area is a favored unofficial dog park used by both off and on leash dog walkers.

4. Please give wildlife in need the benefit of an unimpeded lifestyle.

Thanks for your Stewardship.

Ron Maykel  
Pacifica.

**Correspondence:** Of all the trails and beaches that exist on Mt. Tam and the surrounding areas there absolutely needs to be some that permit dogs to be off leash. Even if it's during the weekdays, for the locals, etc..

Dogs need to run freely and play as pack animals. This is pure joy for dogs, owners, and many viewers. I believe owners need to be responsible for cleaning up after their dogs, always, I believe we need to respect others who are anxious around dogs, and be proactive, always aware.

Pets increase longevity and quality of life in us. There is little that thrills and amuses me to the core than to watch my three dogs play at Stinson Beach. Almost all of the Trails on Tam either do not allow dogs or require dogs to be on leash.

I have lived here, on Tam, for 12 years and though I wish there were more responsible dog owners, less uptight folks in general, and more dog friendly areas, I would hate to see the latter diminish. John W.

**Correspondence:** I am a 51 year old San Francisco native. I am not a dog owner. I have been walking on Ocean Beach daily for over 30 years. I am a nature lover in every sense. I love the birds, the seals, the amazing proliferation of dolphins in recent years, the whales, and yes the dogs!

It is part of what makes the beach seem normal compared to other beaches in our state, seeing people walking and running with their dogs. It brings me joy to watch such happy animals running around, playing with other dogs and just being happy.

In all these years I have never seen a dog fight, a person get bit, or even an uncomfortable situation. Most dog owners pick up after their pets because they cherish our beautiful beach just like us non dog owners.

It is a very rare occasion to see a dog actually chasing the birds. Maybe not even one in a hundred.

I was told by a ranger that it's not the chasing that's a problem but the trampling of their nests.

If that is the case, then why don't we close the beach to people, with their careless children and their blankets and coolers and footballs. We have beach patrol in 4x4 trucks, cops on motorcycles, horses, wind pulled carts, tractors moving sand, thousands of walkers, runners and every possible type of beach goer imaginable.

If this is really about saving birds then lets do it right and close the entire beach to everything and everyone. Why are we singling out a mostly harmless factor without any formal studies showing that dogs are responsible for a decline in bird population.

This whole thing reeks of wealthy, special interest groups putting pressure on politicians and others in order to create a beach that fits their image of a safe, clean place.

I am a third generation San Franciscan. Our great city has always been uniquely tolerant of

---

different lifestyles and diversity. So many of the things that were part of this city's unique personality have been stripped away over time. Please don't turn Ocean Beach into every other up-tight beach along California's coast.

I would like to report that I was running on Ocean Beach this morning (at around 45th Ave). A dog, off leash, came up from behind me and jumped on my back. His owner was about a quarter of a block away. Frightened, it was a medium to large sized dog, I started screaming for her to get her dog away from me - the dog was continuing to jump on me and was growling. I turned my back to the dog and remained still(although I kept yelling at the lady to get her dog), as this is not the first time this has happened to me on this stretch of the beach, and experience has taught me not to continue running, to remain still and to turn my back to the dog.

The owner proceeded to lash out at me - asking me why I was being so nasty while her dog continued to jump on my back and growl at me! Several unpleasant "French" words were exchanged, but the upshot was that she felt it was my fault. Luckily, I was not harmed, but just shaken up a bit by this encounter and certainly by her response.

Human nature baffles me as her dog clearly ran after me and assaulted me on an area of Ocean Beach in which dogs are to be kept on leashes. Then to add insult to injury, the owner of the dog attributes the problem to be me! It's quite laughable, really.

As I said this is not the first time this has happened to me, but I am certainly not going to stop running on the beach and so I hope that a dog plan will be put in place and enforced that will allow dogs the freedom to run off leash in certain areas while affording that same freedom to humans so that they can run unharmed.

Thank you!

**Correspondence:** I have been to Ft. Funston for over ten years, both as a person with dogs and without. Currently I have two dogs whom I walk there. It has been an amazing place, as the dog owners at this site are responsible and take good care of their animals. every time I have been there most people have dogs. The few who do not have them generally enjoy watching the dogs. As to the environment the areas that were once fenced have been run down, so people with and without dogs walk these areas. Areas that are that sensitive need to be adequately fenced off, but other areas they need to be open for dogs under voice control. In a city like San Francisco there are very few alternatives where dogs can run and exercise, this being one of them. If those who work on the report stayed at the park for hours and observed they would see the park is enjoyed mostly by dog owners, and they are all careful to keep people and pets safe. So I believe alternative A should be in place for the next 20 years.

**Correspondence:** The main concern of my comments relate to the Ft. Funston dog walking area. First off, since the National Park Service has been overseeing this area it has deteriorated from pure

---

neglect by your department. Areas that have been preserved in the past are no longer fenced off as in the past with signage to restrict access to sensitive areas. Any destruction is the direct result of the NPS policy.

You do not acknowledge in your draft documents that the Ft. Funston property is a very small portion of the Golden Gate properties you manage. Yet I have never seen anyone out at Ft. Funston doing any sort of study concerning the populations that are using this area. You do not know the percentage of people with dogs, without dogs or what other users might be out there.

This property should be returned to the people of San Francisco and not become the disgrace that the Presidio has become as a monument to the miss use of national park lands.

**Correspondence:** Along with fellow residents of our home for the elderly, I walk Crissy Field in the early morning hours of Mondays, Wednesdays and Fridays. One of our fellow walkers, Norma Chan, no longer walks with us since she fell on the path after having been knocked down by a dog which was not leashed. Several months ago I suffered a dizzying blow to the side of my head from a ball that had been in effect "shot" by a dog's owner who used a wand to send the ball a greater distance for her unleashed dog to chase. This suggests that unleashed dogs present a menace to those who walk Crissy Field, at least during the more heavily traveled daylight hours between 9 a.m. and 5 p.m.

**Correspondence:** Reducing off leash dog walking by 90%? ur parks' strength is the ability and opportunity to recreate with our entire families (including our dogs). Restricting this access is unconscionable as this action will immediately tear apart the real fabric of what makes the Bay Area so great. We must return to the original 1979 pet policy because all reductions in off leash areas including this SEIS are NOT based on science and are clearly unlawful.

**Correspondence:** I am very concerned about the proposal to ban dogs from the vast majority of Fort Funston and the East Beach of Crissy Field. There are precious few places in San Francisco where dogs can romp on the beach and get the exercise they need. If you adopt this plan, you will make it even more difficult for my dog and thousands of others to get the exercise they need for their physical and emotional well-being. Urban dogs have a difficult enough life as it is, please don't make it even more difficult and restrictive.

I know there are a few irresponsible dog owners who may not clean up after their dogs or allow their dogs to cause a nuisance - but the large majority of dog owners are very responsible. It's not fair to restrict access for all dogs because of a few "bad apples." That would be like banning everyone from the beach because 1 or 2 people left a mess.

Please dont further limit dog walking in SF. Dogs are our friends and make our lives happier and more fulfilled.

Thank you.

**Correspondence:** I am certain I will not say anything others have not written. However, the proposed limitations placed on residents and users of the GGNRA areas under consideration represent a dramatic change to policies long older than the 30 years San Francisco residents have enjoyed these parklands with their pets under the 1979 policy. The reason the 1979 pet policy was instituted was to accommodate the needs and desires of the residents of San Francisco who had been enjoying these lands with their companions for years. Changes of the magnitude of limitations both in area and leash control will substantially limit the enjoyment of parklands that have been used this way for decades. This set of changes will most certainly have unintended consequences in other public use areas of the city.

A more considerate approach would be to limit commercial dog walking as proposed, but keep the area of access open as it currently is, and more strictly enforce these commercial limitations. These areas are for public enjoyment, not commercial for-profit use. Second, stricter enforcement of litter cleanup rules would aid in the public enjoyment.

The biggest problem with the status quo is that large numbers of dogs loosely under control by commercial dog walkers is compromising safety and enjoyment of these lands for other city residents.

I urge you to consider stricter commercial dog walking regulations, but at the same time leaving wide area access as it exists today for the residents of San Francisco to enjoy with their own dogs.

Ft. Function is my dog-beach of choice, and I have enjoyed it for decades with my pets. Please do not limit our enjoyment of our city resource. Thank you for your consideration and for taking the time to read my comments.

Sincerely,  
Marion Smith

**Correspondence:** I AM WRITING TO ADDRESS THE CURRENT PROPOSED BEACH CLOSURES TO OUR DOGS OFF LEASH AT CRISSY FIELDS EAST TO WEST BEACH AND OCEAN BEACH.

LET ME FIRST REMIND YOU THAT THESE BEACHES WERE "OUR" BEACH BEFORE IT BECAME A FEDERAL PROPERTY. AND, THESE BEACHES ARE STILL "OUR" BEACHES BECAUSE WE PAY TAXES, I DONATE TO THE NATIONAL PARKS AND BETWEEN TEDDY ROOSEVELT AND JOHN MUIR, I AM AN ENVIRONMENTALIST!

WITH SAYING THAT, THE BEACHES SHOULD BE SHARED BY ALL AND SOCIALLY RESPONSIBLE. I PROPOSE THAT THERE IS A TIME WHEN THE DOGS CAN COME TO THE BEACH AND ENJOY OFF LEASH. BEFORE SUNBATHING HOURS - OR SHOULD I SAY BEFORE HOURS WHERE AVERAGE FAMILIES AND FRIENDS WOULD CONGREGATE IN THE OPEN SPACE.

THERE ARE PLENTY OF AREAS THAT THE DOGS HAVE TO BE ON LEASH DURING CERTAIN TIMES OF THE YEAR AND THE MAJORITY OF PET OWNERS HONOR THESE LAWS. THE MAJORITY OF US PICK UP AFTER OUR DOGS AND THE MAJORITY OF US ARE CONSIDERATE OF OTHERS.

THERE ARE PLENTY OF SUNBATHERS WHO DO NOT PICK UP AFTER THEMSELVES AND ARE MORE HARMFUL TO THE ENVIRONMENT AND PUBLIC SAFETY THAN DOG OWNERS!

WE MUST SHARE THE BEACHES!

BEST,  
JULIE

**Correspondence:** First, I am not a dog owner or walker yet I still feel strongly in supporting access for dogs in all of our parks. They, for a large amount of park users, are integral parts of the experience while

---

offering little to no detracton to other park users. As such I support Alt A for Mori Point, dog walking has existed on and around Mori Point for decades. Providing opportunities for on leash dog walking when visiting Mori Point will engage acknowledge a large segment of not only the Fairway neighborhood residents who promoted the transition of this property into NPS holdings, but the thousands of visitors from afar that frequent this park with their dogs every month.

I support Alt A on Map 19 A , Cattle Hill Sweeney Ridge area.

The value of loop options is paramount in spreading out user groups.

Spreading out user groups is key in our highly populated area to ensure a pleasant park experience for all including dog walkers.

Providing human-dog walking opportunities is critically important to these historically dog friendly lands

I support map#20-E Alternative E for Pedro Point.

This area is highly disturbed from past uses, and would be suitable for dog walking on the entire parcel.

Spreading out user groups is key in our highly populated area to ensure a pleasant park experience for all including dog walkers.

Providing human-dog walking opportunities is critically important to these historically dog friendly lands

I support map 21-A Alternative A for Rancho Corral de Tierra.

Also,

All NPS trails-lands above Seton hospital to above Park st, referred to as Vicente Ridge on NPS maps should be all be open for dog walking.

The parcel consists of existing ranch roads multiple loop trails for excellent dog walking options

Lines of sight are ample,leash enforcement is complimented by these fire roads trails easily accessed from multiple locations by NPS patrol vehicles.

The value of loop options is paramount in spreading out user groups.

Spreading out user groups is a key to ensure a pleasant park experience for all including dog walkers.

Providing expansive dog walking within the Rancho will engage a valuable segment of trails users in protecting these remote coastal lands.

Providing ample human-dog walking opportunities near every neighborhood surrounding the Rancho is paramount in reflecting the National "Recreational" Area aspect of GGNRA's mission in serving the broadest segment of citizenry.

<b>Correspondence:</b>	GGNRA is large and I will limit my comments to the areas that impact me - but as a non-dog owner in San Francisco I am often bothered by the conflict between dogs and people in our limited space. While my preference would be for option D I realize that commercial dog-walking is not going away and that GGNRA covers a large amount of the available space for dog walking in the city.
------------------------	--

I agree mostly with Alternative F except that I would like to see a smaller number of areas available for

---

commercial off-leash dog walking. Commercial dog walkers generally have transport available to them (as they pick up dogs from residences) so they are able to get to the areas open to them.

I would like to see Crissy field (and beaches in general) made off-limits to commercial walking. When I worked in the Presidio I would sometimes try to take my lunch at Crissy field and would be regularly harassed by off-leash dogs. The walkers would make no effort to control them and intuit that I was to blame for having food.

**Correspondence:** I oppose limiting off leash walking by responsible pet owners, in areas that historically and responsibly have been used for decades within these urban parks.

End this. If you haven't sensed the deep and long lasting position the PUBLIC has taken on this issue, you are truly deaf (or worse).

Enjoin pet owners to support the parks with gardening and trail building and cleanup and fund raising. That would be easy and productive. Most pet owners would like to support you. However, if you stumble forward "trying to enforce" these new and radically restrictive regulations, well... the future is clear. The opposition will not roll over and play dead.

CA politicians are picking up on this, and you are on the losing side. So...are you deaf (or worse)?

**Correspondence:** The plan does not cover nesting areas and sensitive habitat for birds. There should be fences to control off leash dogs from running thru. Also, the dog's raw sewage that many don't pick up are a threat to wildlife and children who play in the sand. It is a shame that this jewel of a park is being degraded from off leash dogs that can ruin a walk by jumping on you or harassing your dog who is behaving on a leash. Parks are for everybody, not just to the dog people who are let their dogs roam free while they are yacking on the phone and not taking responsibility for their dog(s). Just because they are the majority, that does not give them the right to overtake the parks. Please do the right thing to preserve and protect this valuable resource.

**Correspondence:** Comment of Dog Management Plan in Supplemental Environmental Impact Statement (SEIS)

1. I think that dogs should be on leash (fixed 6 foot, one dog per person) in all areas of Golden Gate National Recreation Area (GGNRA), except in areas where all dogs are prohibited. The leash law should be consistent will all National Parks, such as Kings Canyon/Sequoia, and Yosemite National Parks.
2. The SEIS make continual reference to "voice command". There are so many variables associated with "voice command" that it in effect dogs are simply "off leash". Some people have their dogs professionally trained to respond to "voice command", most people simply train their dogs at home with varying degrees of success. Also the owners must see and recognize when the dog is chasing wildlife, other dogs, or people. How many times have I heard "oh he's a sweet dog he won't hurt anyone", but to some people the dog barking or running at you presents a threat.
3. The National Park, like all land areas has a finite "carrying capacity", that is the number of people that can enjoy nature on a given amount of land. Dogs off leash reduce the number of people that can enjoy nature in the park. Dogs off leash drive people away from the area to seek enjoyment of nature elsewhere.
4. California beach is scarce and a very valuable recreational resource. The National Park Service can provide a "dogs off leash" area away from the beach, but the beach is too valuable and scarce to allocate to a "dogs off leash" park.
5. The National Park Service should not be in the business of providing a dogs off leash area. This should be done by the National Forest Service or better yet provided by private business.
6. My personal experience is that dogs off leash degrade my enjoyment of nature, especially at the beach.
7. The Pacifica State Beach in Pacifica, CA. recently instituted a "Dogs on Leash Only", and it has added to the peace and serenity of the park. Previously the beach area was taken over by dogs running off leash, chasing balls, chasing wildlife, and chasing other dogs. This was disruptive to the general public, in effect

the dogs were taking over the beach. Since the leash law was instituted the beach has become a much more people friendly place. This is feeling and difficult to quantify but the beach is now a much more pleasant place to visit. A small special interest group, such a people who want to let their dogs run off leash, should not be allowed to take over a public beach or any public area.

**Correspondence:** First, thanks for all the effort the NPS puts into maintaining and improving so many public lands. These lands are true treasures!!!

I would like to request that dogs be allowed to be off-leash at Muir Beach in GGNP into the future. My family has been taking our dog, Socks, there for seven years now. Part of the beach experience is dogs freely chasing balls and playing off leash. I have never experienced a negative interaction with dogs or dog owners at Muir beach, and hope that dog owners will always have the experience of "free dogs" on Muir Beach.

Thanks for your attention!

Calvin Trampleasure

**Correspondence:** As a dog owner for many years, I feel the public (dog owners) must take a responsible role managing their dogs if they wish 'freedom' for their dogs, and to enjoy full exercise for the health of their dogs.

As covered in meetings, and documents, the primary areas of responsibility are animal control, non-interference with other persons or dogs, and PICKING UP DOG FECES ! Like bicyclists who are frustrated by other bikers not practicing bike etiquette on the roads - relative to other bicyclists, and particularly relative to motorists, dog owners must recognize other public, rather than just themselves.

I submit the following suggestions:

- Pet store chains be engaged to hold pet owner classes/seminars on public space pet responsibility and etiquette.
- for areas in danger of Leash Only regulation, set calendar dates for regulated ROLA days, rather than 100% 'losure' to dog freedom.
- like Marin Watershed Volunteer programs, an Open Space non-confrontational volunteer force should be promoted to monitor and educate the public in more visually controllable areas such as beaches.

Sincerely,

Tony Lester

Corte Madera.

Dogs: 2 English Springer Spaniels

Long time areas favored for dog training and exercise: Muir Beach, Rodeo Beach (south end), Miwok and Coastal trails.

**Correspondence:** Have witnessed event on birding trip @Crissy Field about 2 years after the restoration work was opened for the public. A Grebe was beached & obviously unable to fly when her two dogs off lease charged @the bird & began barking @it. We told the woman to call in her dogs & lease them but they continued to avoid her. The bird was obviously in stress as it tried to prevent the dogs from coming closer. We even tried to help round them up. We finally had to cover the bird with our windbreaker & remove the bird as it was becoming exhausted from its efforts & found a box to transport it to rehab. The woman could not recognize the behavior of the bird's panting & inability to escape from the lunging behavior of her two dogs. She was under the delusion that she had control of the dogs. They wouldn't "hurt" the bird. Her action reflect a common dog owner behavior: ignorance & denial. There will always be individuals who will test the rules set up to give balance to an area so everyone can enjoy the setting - to enter a place which reflects the balance of life & the movement of the creatures within it. The attitude of entitlement w/o control which seems prevalent because the few who are louder, who continue to challenge the established rules is more difficult to address. They do not reflect some of us who try to educate & reveal the beauty of the area we live. You do have people who support the mission of GGNRA - I have witnessed both places in the world where there is no control & places where the citizens take pride & ownership to protect their special place. I hope you can steer us towards the latter...MK

**Correspondence:** As a former San Francisco resident and dog owner, I stand in disbelief sometimes at the way other dog owners do not appreciate that not everyone and not everything sees the need for dogs and their activities to dominate the outdoor landscape.

Leashes were invented to protect dogs, people and wildlife. Areas restricted to dog on leash or no dogs at all are essential if the GGNRA is going to function as a national park.

As a regular park user, I am quite aware that one of the huge issues concerning dogs in the park continues to be enforcement of the existing and proposed rules and regulations. (I also know that no one really wants to spend a lot of time and resources having to do/say/repeat the same thing over and over again. It is soooo tiresome.) But a strong and consistent enforcement policy would help to manage the various uses and users of the park system and help make the park feel like a park, and not a large, unsupervised dog run.

Thank you.

**Correspondence:** I love the idea that people can bring their dogs to the park, but I love the idea of providing safe habitat for wild animals even more. What is a simple chase for one dog is uninterrupted harassment for weary animals, especially birds. Please limit off leash access and enforce good citizenship of dogs and their owners alike.

**Correspondence:** I believe that in too many instances people and wildlife are harried, and, in some cases, threatened by dogs that are off leash in GGNRA lands under management by the NPS. I believe that the majority of dog owners are responsible and well-intentioned, but there is a committed core that place the perceived needs of their dogs above the needs of other people as well as the wildlife that utilize GGNRA lands. The proposed rules seem to strike a reasonable balance between the needs of dogs and their owners and the rest of the public and the wildlife that utilize these precious places.

Thank you for posting the revised plan for dog management policies. Balanced use between dog owners and non-dog owners is very important in an area that gets such heavy usage as GGRNA, especially at San Francisco areas like Crissy Field and Ocean Beach. I would like to see more protection given to bird nesting areas, restricting off lease dogs from these areas, and also stronger enforcement and penalties for letting dogs roam free. Nesting birds are disturbed, wasting precious energy. Often birds are killed by the dogs - Golden Gate Audubon has reported numerous cases of this, but no penalties have been enforced. Endangered Snowy Plovers are particularly at risk but even common gulls and baby geese and ducklings are frequently killed. Most dog owners don't seem to care - one commented that he lets his dog kill gulls as practice for duck hunting. Thank you for your consideration of my comments.

**Correspondence:** Living in a small apartment, the parks and beaches of Fort Funston, Crissy Field, Lands End, and Ocean Beach are the areas we go to with our dogs to have unfettered play.

It is important to our health as well as the health of our dogs to have these areas where we can commune with nature and be free.

After looking at the maps for San Francisco parks and beaches my vote is for option A. Voice command in these areas is enough to keep our dogs enjoying the park while caring for the park foliage and visitors.

Thank you.

**Correspondence:** As a regular hiker in many Bay Area parks, including GGNRA, I would like to see all the proposed stricter dog policies implemented and better enforced.

Dogs frequently aren't under control of their owners.

Off-leash and even on-leash dogs approach me, growl at me, jump up on me, and escalate aggressive behaviors when they see that I'm afraid of them. Dog owners laugh or casually say to me, "Oh don't worry, she doesn't bite," or "He just wants to play, that's his way of being friendly" and then that same dog starts barking in a mean manner or looking like it's going to bite or jumps on me and then the owner looks surprised. By then it's sometimes too late, especially when the dog is close to me and off leash and the owner can't call their dog off successfully.

I have never observed park staff around in these situations for help and never seen any misbehaving dog owners approached by enforcement staff ever.

Another recurring problem is collared dogs whose owners are letting them run off leash, while the owners hold the (empty) leash. About half of such owners immediately call their dog back and put it back on the leash long before I get closer; that's great and it's much appreciated. But other owners aren't paying attention and don't act fast enough, or they call their dog back but the dog ignores them and runs toward me barking aggressively. I can't outrun a dog. I'm reluctant, when hiking by myself, to get into an confrontation with a dog owner or challenge them about their dog's behavior or about the rules of the park, especially on a trail where nobody else is in sight.

What exactly are my options if I'm enjoying a hike and a big dog or an aggressive or angry dog starts running toward me? Should I carry around mace or pepper spray in a national park (I don't) and spray a dog that won't back off when I'm petrified and I'm confident that I'm in danger of being bit? (For the record, I've been bitten once, and had my clothing bit on two other occasions, and been jumped on by other angry barking dogs, so I do know the difference between a dog merely barking and a dog about to attack or bite.)

Friendly dogs are a problem too. Too many dog owners believe that everyone must be a dog lover and everyone must want to stop and pet their dog, let their dog lick their face and drool on them, let their dog shove its nose into their crotch or butt, or jump up on their legs or stomach. But these things are NOT in fact welcome by all members of the public.

I regularly see dog owners violating the policies of individual trails, such as letting their dog run off-leash in an area where it's prohibited, or having a dog on a trail where dogs are prohibited.

If I'm seated on a bench bird-watching or sitting on the ground near the trail resting mid-hike - if I hear a dog or see any dog at all that's off leash or if it's leashed but the owner doesn't appear to be managing their dog, I have to immediately stand up to put myself in a better position in case the dog comes closer.

Many dogs and dog owners aren't a problem in the parks. But it's not just a rare few that are a problem, it's a regular thing. If all dogs were truly under the voice or leash control of their owners, and all owners actively made sure their dogs didn't approach people who aren't interested and people who are afraid, that would be a different story.

I want to be able to hike in my parks without being afraid of being jumped on, growled at, or bitten by someone's aggressive dog.

I want park wildlife and habitat to be similarly protected from being physically harmed by dog behavior.

**Correspondence:** I object to the plan to require owners to leash their dogs at Fort Funston. In my experience, almost everyone who uses the beach is a courteous owner of a well mannered off-leash dog. For individuals who wish to access local beaches without off-leash dogs, they can go to Ocean Beach, Linda Mar or a number of other local beaches. I would like GNRA keep Fort Funston as one of the sole off-leash beaches in the area.

This issue is important to us because our dog Koda is 100% daf, we cannot safely allow her to run free in any location near moving vehicles. Since the San Francisco Bay Area is so dense and urban, almost no places meeting this description exist in our area. Fort Funston is the one place we can feel confident that she can run and play safely without a leash. As a dog who resides with us in a small apartment (like many dogs in San Francisco) this unrestricted running is a critical part of her exercise routine. If the restrictions in the plan are passed it would adversely affect our ability to get Koda the exercise she needs. Accordingly, I respectfully request that GNRA maintain the status quo and allow dogs to run off leash at Fort Funston.

**Correspondence:** My son has a service dog, and we walk regularly (always - - year-round- - with dog on leash, because that's her cue that she's on duty) on Ocean Beach in the area between the stairwells and Sloat. We have been dismayed at owners who allow their off-leash dogs to chase birds.

However, we would urge you to choose Option E for that area. There is a balance to be struck between prioritizing wildlife and accommodating domesticated life. There are precious few areas for dogs to walk in natural surroundings with their humans. Restricting dog-walking to being on-leash will strike that balance.

Prominent notices that warn people not to let their dogs lunge at birds, and to avoid bird nesting areas, will likely help. It may also help to point out how few of these endangered birds exist in the world.

Ideally, we'd have enough green space that everyone could wander freely and there would be extremely low impact. But this is an urban area, and the life settled here, wild or domesticated, needs to compromise.

Thank you for your consideration.

<b>Correspondence:</b>	We have walked our dogs at Ocean Beach and Baker Beach for the last 35 years. In my experience dog owners are respectful of areas that have been set aside for bird nesting and planted areas fenced off for landscape reclamation.				

Regular visitors of the GGNRA beaches tend to be surfers and daily dog walkers. In my experience these groups take a direct and consistent interest in the quality of the local environment.

We rarely find any dog feces left by the hundreds of dogs walked at Ocean and Baker Beaches every day. Everyone carries bags to pick up after their pets. Additionally, I think the example set by responsible dog walkers encourages people to remove their own trash when leaving the beach. The overall level of trash at both beaches is negligible compared to 10 years ago. I know various groups volunteer regularly to clean the beaches, but the consistently cleaner landscape would not be evident by that effort alone.

I have never seen a dog that is possibly difficult or aggressive off-leash. I have never witnessed a true dog fight or an attack on a person by an off-leash pet. Dogs will confront each other briefly, but are under control and move on to share the area separately.

Please find a compromise that allows people and people with dogs to continue to use the very public areas of GGNRA to play freely together while setting aside the wildlife protected areas that are of concern. The human population at Ocean and Baker Beaches is already disruptive of any truly wildlife protected condition. Educate beach users to respect these valuable places, don't change them into nature museums that restrict our enjoyment of the tides and weather at the close range of walking the shore with our well behaved four legged friends.

**Correspondence:** I have 2 points I wish to make:

1) This continual delay for additional comments or re-evaluation favors the group who desires the changes. This is true for any changes to rules, be it park rules, local zoning changes, or legal cases. I am invited not to comment again if I have already done so, but the group wanting more freedom for dogs will be rallied to comment as often as possible, thereby stacking the deck in their favor.

2) Dog Owners do not obey the rules anyway - Look at ANY park in San Francisco. When I last visited Pine Lake Park, SF, I was driven away by off-leash, out-of-control dogs. As I am elderly, I did not try to confront anyone. I just left.

I'm a birder, and my companion and myself have about given up trying to bird in San Francisco. The dogs are everywhere, and usually off-leash in spite of all the "No Dogs" or "Dogs on Leash" signs.

Thank you  
Travis Hails

**Correspondence:** Hello,

My name is Chris and I own a dog walking company. We go to Crissy Field and central beach every work day. While I understand some of the complaints addressed in "preferred alternative F," I am concerned about the small spaces provided for off-leash activity. I fear that it would force too many walkers and dogs into the limited spaces provided and a whole new range of problems would arise from the over-crowding. I feel that if such large areas were deemed off limits, some spaces should be created to off set the restrictions. What about the creation of fenced in dog parks within the Presidio? They would be safer than the areas now allowed and would keep us away from the people who do not care for dogs. The parks

could be located in parts of the Presidio that are currently unused and that people do not regularly go to. It would also separate us from distractions such as the police horses where there have been the occasional bad encounters. Further, the limit of 6 dogs per walker could be easily enforced by the proper authorities.

Thank you for your consideration,

Chris Petersen

<b>Correspondence:</b>	this is a thorny issue, but luckily the nps is in a good position to make a sound decision.				

---

My opinion is that the nps must balance user group interests/wants with the ecological and biological needs of these protected places.

Dogs MUST be severely restricted (and in many cases eliminated) from GGNRA properties.

In the areas that they are allowed, there should be areas that are dog-centric and developed amenities for dig users. BUT in all other areas, they must be regulated (even requiring permits, user-education, conditional access dependent on compliance) to protect these natural areas for the plants, animals, and other non-human residents AND to protect the resource for the non-dog-user humans.

We all know that dogs are "man's best friend," but they are not the best friend of birds, small mammals, and the non-dog-centric public.

please follow-through with your proposed restrictions of dogs, their poop, and their destruction to a very small subset of the GGNRA lands, with tight controls on their access conditional on their compliance with sensible regulations (just like any other user group).

**Correspondence Type:** Web Form

**Correspondence:** I am a home owner in SF, a lesbian parent of 2 children, and a dog owner who has enjoyed Fort Funston as an off leash recreational area with my family for over 12 years. I bring my dogs to Fort Funston every morning and I am writing to voice my opposition to the GGNRA dog management plan. I disagree with its premise that dogs in the GGNRA are compromising visitor safety and damaging the resources of the Recreation Area. By their own admission, the GGNRA had no data or studies to support these claims and they are relying upon these claims to initiate a process whereby access for people with dogs will be severely limited or completely banned. Even now, with this SEIS, the GGNRA admits they have no site-specific peer reviewed studies (required by Federal law) to substantiate their claims that dogs are a problem for wildlife, water quality or vegetation in the GGNRA. Instead, they rely upon anecdotal evidence and baseless assumptions to claim dogs have the potential to damage this Recreation Area.

Additionally, in the SEIS the GGNRA asserts they have the right to redefine the term "recreation" as utilized in its enabling legislation and in the promises made to the voters of San Francisco back in 1972 by the GGNRA/NPS/DOI and the GGNRA's first Superintendent, the Honorable William J. Whalen, in order to secure various properties then owned by the City and County of San Francisco. These promises, most importantly, stated that this National Recreation Area would retain historical recreational access (including off-leash recreation) should the citizens vote to include SF park properties in the GGNRA. These promises, along with the conventional definition of the term "recreation", do not comport with GGNRA's current philosophy exemplified by Daphne Hatch, Chief of Natural Resources Management and Science for the GGNRA, who in 2007 was quoted as saying "Ocean Beach without the people is an incredible habitat. But people think of it as a sandbox or their backyard." The GGNRA does not have the legal authority to rewrite history or its enabling legislation to their own design.

Deep within the SEIS is the GGNRA's poison pill. Only the name has changed; it is now the Monitoring-based Management Strategy. The GGNRA gets to decide whether we are in compliance, and the measures of compliance are subjective. Under this SEIS the GGNRA may decide to impose short-term or long-term closures of areas. These short or long term closures could be triggered by any number of conditions totally under the purview of the GGNRA, all of which dog guardians have no ability to influence by our actions. The GGNRA could decide they want to make Fort Funston in its entirety a native plant restoration/habitat; and they can do so, based upon this language. More erosion at Ocean Beach or the beach below Fort Funston could be their reason to ban dogs entirely from these beaches. This is unacceptable.

The GGNRA still has the authority, the ability and the moral responsibility to codify the original 1979 Pet Policy as a Section Seven Special Regulation. All properties added subsequent to the 1979 Pet Policy and in the future should have historical off-leash recreational usage allowed. This would accurately reflect the enabling legislation for this National Recreation Area which GGNRA management has held in disregard for quite some time.

If the GGNRA does not want to manage these properties as a Recreation Area, then they should transfer the Recreation Area to another entity better able to manage it, e.g. the Forest Service or Bureau of Land Management. Alternatively, for sites heavily utilized by dogs and their guardians, such as Ocean Beach and Fort Funston, these properties should be reverted back to San Francisco.

The GGNRA should develop a new alternative, the A Alternative, that will better balance the recreational needs of the Bay Area with protection of natural resources. The DEIS calls the No Change Alternative A. This is the 1979 Pet Policy with some restrictions, particularly restrictions on off-leash at Ocean Beach, Fort Funston, and Crissy Field because of the snowy plover and native plant restorations. More than one-third of Bay Area residents have dogs and we now know the importance of off-leash recreation for dogs physical and mental health, as well as the importance of the significant social communities that develop where people recreate with their dogs off-leash. This large segment of Bay Area residents should not be restricted to significantly less than 1% of GGNRA land (that is how much GGNRA land is available for off-leash recreation in Alternative A) to have a satisfactory park experience, especially since there is little scientific evidence supporting restrictions on off-leash. There has to be more space available for off-leash recreation, not less, given the huge demand for it in the Bay Area. The A Alternative would include everywhere that is currently off-leash, plus sufficient off-leash opportunities in San Mateo County to meet the demand, and more trails off-leash throughout the GGNRA. In addition, new land added to the GGNRA would include off-leash areas, especially in those areas where it has traditionally taken place. There would be no compliance-based management strategy in the A Alternative. Any dog management philosophy in the GGNRA, like that for any other recreation use, should be based on Bay Area values of co-existence, shared space, collaboration among park user groups, and education where problems arise. Enforcement of already existing regulations should target irresponsible dog owners who create the few problems documented by the GGNRA, while allowing responsible dog owners to continue their traditional off-leash recreation without harassment.

-----------------------------	----------

<b>Correspondence:</b>	Dogs are not an endangered species - in San Francisco or anywhere else. The number of dogs running off leash in park areas continues to increase every year. I am an animal lover and I live with a small dog. I feel there are plenty of places to take a dog off leash and that we need to set
------------------------	--

---

aside park areas to help protect animals such as the Snowy Plover. Additionally, there is a Burrowing Owl atop the rocks at south Ocean Beach, just north of Fort Funston. Dogs pose the largest threat to birds and other wildlife. Dog owners who insist that, "My dog doesn't chase \_\_\_\_\_," are part of the problem. They believe they maintain control of their dogs while they are off leash, but evidence has shown time and again that dogs on the hunt will not respond to their owner's voices. A Burrowing Owl was killed in Berkeley last year, and it likely was the victim of an off-leash dog.

Please consider that dogs should not be allowed in some sensitive wildlife habitats, and they should be required to be on a leash in other areas. Wildlife deserves a chance, and the public also deserves a place to walk where they don't have to deal with dogs (and dog excrement) as well. Dogs are great, but just because we are such a dog-centric city, does not mean that we need to continue to let dogs run off leash in our national parks. Please consider putting in place some restrictions on dogs so the public and wildlife can enjoy our national parks more thoroughly.

**Correspondence:** I love animals, but I think we need to put people first as far as our parks are concerned. Yes, dogs need to run and their owners need to make sure that they are cared for properly, but we have way too many dogs running wild at many of our parks and beaches. Small children are often knocked over and sometimes bitten. The children and their parents and caretakers need to be able to enjoy our parks without worrying about run ins with aggressive canines. And, I haven't even mentioned the mess that animal owners often leave for the rest of us to contend with. I feel that there are many areas within our parks that should be completely off limits to dogs, particularly where endangered wildlife (nesting birds for example) can still be found.

**Correspondence:** I am writing to support the position of Golden Gate Audubon on the GGNRA Draft Dog Management Plan.

I support a balance of uses in the GGNRA, along with a strong enforcement policy that will make the park safe and enjoyable for everyone.

I feel that dog owners/activists and commercial dog walkers have taken over large areas of the GGNRA and that the majority of these people seem entitled as if the GGNRA belongs only to them. There are other people such as seniors like myself who would like to walk and enjoy the GGNRA without dogs everywhere barking and jumping up on you and knocking you over. Also the GGNRA is a prime birding location and there are many people who enjoy birding for a hobby. This is difficult to do if there are dogs everywhere chasing the birds and other wildlife away. Lastly there are areas of the GGNRA which need to have restricted use for wildlife protection, such as nesting areas for sensitive birds and dogs need to be banned from such areas.

**Correspondence:** I love dogs, but I think dog owners should take more responsibility and prohibit their pets from running off-leash around wildlife. Also, some people (such as small children) may be frightened by off-leash dogs, so I believe that leash laws are important. I've seen many irresponsible dog owners not pick up after their pet, or ignore their dog's destructive behavior (digging/trampling plants) on public land. I would be in favor of sectioned-off areas especially for off-leash dogs, but also leaving sections of area strictly for wildlife and people. There should be a balance.

**Correspondence:** It will be a disservice to a large population of tax payers who own dogs and use the GGNRA if off-leash areas are restricted or eliminated. A responsible dog owner understands that a well-exercised dog is a well behaved dog. To eliminate and/or severely restrict off-leash use of the GGNRA will force owners to have to secretly exercise their dogs in an area that has been off-leash for years. Dogs are a huge compliment to many families and exercising with your dog and family together is an immensely satisfying experience. The GGNRA is a beautiful asset to the Bay Area and should be able to be enjoyed by dog owners and their dogs in the same capacity that generations have experienced. Please keep the GGNRA open to off-leash in the same capacity that exists today.

Kind regards,

Laura Kennedy

**Correspondence:** I understand the reasons you have provided for greater restrictions on dogs and owners however I strongly disagree. There are many restricted areas already. I believe responsible dog owners are being unnecessarily harmed by these restrictions. Consequences are already expensive enough. Just stop, Freedom in this county/country is coming at an incredibly expensive price. Compare the users of the area and the number of incidences and you will realize how unbelievably stupid this endeavor is. The expense and idiocy has gone too far.

**Correspondence:** I support the proposed rules which will prohibit dogs from the Crissy Field Wildlife Protection Area, require dogs to be leashed in the Ocean Beach Snowy Plover area and increase enforcement of the regulations. I believe that all dogs should be leashed at all times in public parks except in fenced dog parks; however, the proposed regulations do not go that far. They are reasonable and moderate changes to allow the public a bit more access to this publicly funded and broadly supported resource.

The present dog management policy makes it impossible for people like me to access safely and to enjoy the golden Gate National Recreation Area. I urge passage of the improved dog management policies.

**Correspondence:** I strongly support implementation and strong enforcement of more stringent controls on dogs within our National Parks and Recreation Areas, especially within the very urban GGNRA. I urge you to require on-leash control in high use areas, sensitive wildlife areas (e.g., Ocean Beach Snowy Plover area, Crissy Lagoon, Sutro Baths), and beaches where kids and the public play and walk in the sand.

Dogs should only be allowed off-leash in clearly marked and fenced areas. There should be high fines (\$100s) for out-of-control, aggressive dogs outside of fenced off-leash areas and for not picking up their dog waste. These fines should be used to support the implementation and enforcement of the more stringent dog management policies.

The number of commercial dog walkers and the number of dogs they are permitted to walk should be strictly limited with a high permit fee to be used to maintain the off-leash fenced areas and to pay for clean-up, enforcement, and resolution of dog-related conflicts.

I am sick and tired of having to watch out for, and protect myself from, out-of-control, off-leash, aggressive and rambunctious dogs; and having to always watch my feet so that I do not step into dog waste. Dogs are NOT people or kids. In fact, I fear for the safety of all the small kids and people who use GGNRA who are at significant risk of injury from the large number of out-of-control dogs and their irresponsible, disrespectful owners.

There are more than enough exclusive dog play and running areas provided throughout our cities for dog owners and commercial dog walkers to let their dogs off-leash without putting our kids and wildlife at risk.

GGNRA and other public parks were set aside and preserved as peaceful places for people (not dogs or pets) to enjoy nature, protect unique flora and fauna, and to preserve our natural heritage. Our parks are special places and are NOT DOG RUNS!

Please control the dogs in GGNRA! Thank you.

Sincerely,  
Laura Fujii  
Berkeley, CA.

**Correspondence:** I am commenting to make clear that I support the NO ACTION alternative. If the GGNRA further limits dog walking as recreation, what few surrounding parks and trails that do allow off-leash will become overcrowded and overburdened. We need more access, not less. Well-socialized and well-exercised dogs are much more likely to engage in nuisance behavior like barking and biting. There is no legitimate reason to restrict dog walking beyond the restrictions already in place.

**Correspondence:** Dear Park Service Staff- -

I would like to commend you on your commitment to an an open and thoughtful process for the development of the Draft Dog Management Plan.

Although I would still like to see some of the habitat protection areas strengthened further by adding fencing or natural barriers, I think the plan is a good step in the right direction. It seem that you have managed to balance all the needs of the park users while making sure that we are doing as much as we can to protect the natural systems and habitats upon which all life depends.

I strongly urge you to adopt the current Draft of the Management Plan.

Thank you.

Sincerely,  
Tracy Grubbs

**Correspondence:** For the life of me, I cannot understand why the government is spending millions and millions of dollars to address a problem that doesn't exist. This is not Yosemite, this is not Yellowstone... this is an urban area that is blessed to have beautiful, contained beaches where people and dogs have co-existed respectfully for decades. Certainly these dogs are less destructive than the feral horses on Assateague - why aren't they removed to preserve a much more vulnerable ecosystem? Better yet, ban

---

people because they leave plastic and other deadly materials behind that will actually kill sea life. Under control, dogs don't pose any more of a risk to wildlife and environment than coyotes.

I am all for aggressive enforcement of people who do not clean up after their dogs or allow them to roam beyond voice control, but I haven't seen one convincing, undeniable fact that warrants the exclusion of dogs from our beaches. Having this as a blanket policy for national parks is like requiring snow chains to visit the Dry Tortugas - - one policy does not fit all national parks and recreation areas.

Stop wasting tax money on this nonsense and let everyone coexist as they have for decades.

<b>Correspondence:</b>	Please do not impose new rules prohibiting dogs anywhere in GGNRA around Bay Area or requiring leash-only areas currently allowing voice-control off-leash areas in San Francisco or Fort Funston.				

Please do not require dogs on leashes on Crissy Field or adjacent beaches. Please allow the 1979 Pet Policy to remain in effect. We allow for ball fields, baseball diamonds, other sports, kite flying, picnicing in all these areas, and dog playing and exercising is another of life's outdoor pleasures and sport that should not be so restricted in a city that enjoys a large dog/pet society.

There is no reason to implement any restrictions in the park. I use Crissy field and other open areas within GGNRA every day to walk and allow my dog the freedom to run and never encounter any problems from other dogs or their owners. I see more damage left by users who leave cigarette butts,beer cans, picnic waste, etc than anything a dog would leave behind. City dog owners are respectful to remove dog waste and manage dog behavior.

Dogs need open areas like kids need soccer fields, like softball and baseball players need fields and tennis players need courts; these sports are accommodated all over the city; please let us keep our open areas for dogs.

Thank you for your consideration.

<b>Correspondence:</b>	Thank you for working on this Dog Management Plan. As dog owners who enjoy the outdoors, we want to take our dog on our outings. There is a rich choice of open space in the bay area and most of it is off limits to dogs. POST is an example. POST studied allowing dogs and has opened very few areas.				

---

I think the maps I am seeing show an area and then multiple maps with different possible plans of trails available for leashed dogs. Please use the maps with the most trail miles and then consider a place for off-leash dogs to run and chase balls. Leashes are necessary in most areas, but there should be some area where the dogs can truly run.

I support Alt A for Mori Point, dog walking has existed on and around Mori Point for decades. Providing opportunities for on leash dog walking when visiting Mori Point will engage acknowledge a large segment of not only the Fairway neighborhood residents who promoted the transition of this property into NPS holdings, but the thousands of visitors from afar that frequent this park with their dogs every month.

I support Alt A on Map 19 A , Cattle Hill Sweeney Ridge area.

The value of loop options is paramount in spreading out user groups.

Spreading out user groups is key in our highly populated area to ensure a pleasant park experience for all including dog walkers.

Providing human-dog walking opportunities is critically important to these historically dog friendly lands

I support map#20-E Alternative E for Pedro Point.

This area is highly disturbed from past uses, and would be suitable for dog walking on the entire parcel.

Spreading out user groups is key in our highly populated area to ensure a pleasant park experience for all including dog walkers.

Providing human-dog walking opportunities is critically important to these historically dog friendly lands

I support map 21-A Alternative A for Rancho Corral de Tierra.

Also,

All NPS trails-lands above Seton hospital to above Park st, referred to as Vicente Ridge on NPS maps should be all be open for dog walking.

The parcel consists of existing ranch roads multiple loop trails for excellent dog walking options

Lines of sight are ample,leash enforcement is complimented by these fire roads trails easily accessed from multiple locations by NPS patrol vehicles.

The value of loop options is paramount in spreading out user groups.  
Spreading out user groups is a key to ensure a pleasant park experience for all including dog walkers.

Providing expansive dog walking within the Rancho will engage a valuable segment of trails users in protecting these remote coastal lands.

Providing ample human-dog walking opportunities near every neighborhood surrounding the Rancho is paramount in reflecting the National "Recreational" Area aspect of GGNRA's mission in serving the broadest segment of citizenry.

<b>Correspondence:</b>	It is not really about dogs ... It's about humans and why Crissy Field was created and how humans fit into it. My late husband work tirelessly for *years* BEFORE the opening of Crissy Field GGNRA to build a place where humans can relax, reflect and rejoice. Robert Haas himself gave my late husband (and so many others) a banquet in appreciation and special sweatshirts: "I Helped Build Crissy Field." But within weeks following of the opening of Crissy Field my husband and I saw the future...the loss of Crissy Field for humans (and loss of habitat for wild creatues) due to unbridled dog intrusion. Crissy Field was created with the sweat and tears of people who dreamed of a place where **people and wild creatures** could safely walk. They envisioned a place without threat of unleased dogs and mounds of canine fecal waste. Ah shoot I'm crying. This matter is so very very sad. But please get the dogs out. I say this as a dog-lover and former dog-owner til my beloved airedale Max died. Maybe fence off a part of Crissy Field to make PART of "Crissy Field Dog Park"?

**Correspondence:** With 5 million Americans being attacked by dogs every year, a significant percentage of the population has good reason to be uncomfortable around strange, unleashed dogs. To someone who has been attacked, being approached by a group of unleashed dogs and a single human (often off in the distance somewhere) can be a terrifying experience. Having been in this situation I can assure you that compassionate reactions from dog walkers are rare. Mocking amusement, scoffing at the person's fear, or outright anger and aggression are far more common. Add to this those who are not steady on their feet, such as the elderly, and others who are vulnerable, such as children, and we have a situation where dog owners demanding that all areas be off leash are being extremely selfish. Furthermore, while dogs can be great companions, their benefits are exaggerated- for example, why do people need to have a dog in order to be motivated to walk for exercise? You can go with a group, a friend, or on your own to have a more meditative experience.

---

One of the biggest hypocritical attitudes I have observed in most dog advocates is their total disregard for wildlife. I have observed many instances of dog owners allowing their dogs to chase wildlife, especially birds. In many ways, dog advocacy seems to have an irrational element to it and I implore policy makers to keep this in mind. Bending to the will of hysterics may quiet things down in the short term, but only because dog advocates are so aggressive - it will not help wildlife or those who have a right to enjoy the park in peace.

**Correspondence Type:** Web Form

**Correspondence:** I live in Marin City below Alta Avenue, part of GGNRA, above Oakwood Valley. My husband and I walk up there from our house on a regular basis. This area has become a MAJOR dog walker destination. We often see 7 - 12 dogs walk/run off leash per dog walker with over 100 dogs a morning frequenting this area. We both love dogs but are very tired of being barked at and rushed by sometimes multiple dogs that are off leash. Some dog walkers are great about getting the dogs gathered to the side of the trail and under voice control while people pass while others don't even call the dogs off when we are feeling threatened by them. When I was very young I bent down to pet a dog that the owner assured me was very friendly. I was bit on the face by this "friendly" dog. I feel part of the problem is that dog walkers and individual dog owners who have a loving relationship with their dogs don't see this aggression and warnings by dogs as a big deal. When we are being threatened we often have to insist that they call their dogs off and get them under voice control. We shouldn't have to do that. When we tell them that the dogs are supposed to be on leash we get the finger or are told to "shut up." We are getting sick of this situation.

We have a couple of neighbors who no longer hike up there, which is in their "back yard", with their dogs (one dog each on leash) because their dogs have been attacked too many times by other dogs off leash. It is completely out of control up there. I do feel that dog walkers are making it worse for those who only have one voice controlled dog. So if you hire a dog walker ask them where they are taking your dog and how many dogs go out with them at a time. We have seen as many as 13 dogs with one dog walker. You as their customers have the best influence on their behavior.

We live near two dog parks where dogs can run and socialize. They don't have to be off leash in the park.

Another problem is the number of dogs in the San Francisco Bay Area overall. The dog population has exploded over the past 10 years. According to a 2007 article in the SF Chronicle: "There are an estimated 120,000 dogs in San Francisco, according to the city's Animal Care and Control department. There are anywhere from 108,000 to 113,000 children, according to U.S. census figures from 2000 and 2005." Who knows what the true number is now 5 years later.

As wildflower photographers we see the effects of so many dogs on special wildflower areas and the plant life where these large numbers of dogs are allowed to run off leash off trail in GGNRA on daily basis. It seems that individual dog owners don't always see the cumulative effect of so many dogs in the Bay Area.

I hope we can find a way to respect each other and what little is left of the magnificent natural world around us.

**Correspondence:** To whom it may concern:

I am a dog owner and dog lover who lives on the San Francisco Bay. I walk my dog off leash every day for his and my health, sometimes at Crissy Field.

I want to ask you to enforce the rules on dogs in the GGNRA.

The birds were there first. And more importantly they need our protection in order to survive.

Do not let people's sense of entitlement and confusion stop you from protecting the birds.

For the birds, it's life or death; for the dogs and people it's fun and a sense of abandon.

I appreciate what you do to protect the birds.

Yours truly,

Mandy Wallace

**Correspondence:** Dear NPS,

I am writing to submit comment on the proposed dog management policies. I am in favor of a balanced approach that gives dogs and dog owners a place for off-leash activity, as well as protected areas where dogs are not allowed and/or are required to be on leash.

I visited Fort Funston myself today and loved the experience of seeing dogs, children, and owners roaming freely amid the waves, dunes and open beach, but I believe part of the amazing GGNRA area should also be set aside for wildlife who need to thrive as well. I didn't see any birds during my visit except a few in the air and indeed, it was dogs galore.

We need to protect the wildlife that is integral to the beauty of the place as well as the place's "recreational" uses for our families (and pets) as well.

Sincerely,  
Rachel Medanic  
Oakland, CA

<b>Correspondence:</b>	I have been encouraged to comment on the Draft Dog Management Plan by Park Service personnel, who suggested that my experience might give a useful perspective. I want to stress the importance of limiting the number of dogs in a group to six, and to require permits for groups larger than three.				

I have worked in Fort Funston as a Parks Conservancy employee and a volunteer. I have been doing volunteer work at Fort Funston for almost 15 years. I have had very few bad interactions with dogs. However, the couple that did occur are generally with large (> 5) packs. I have also noticed that the animals in such groups are rarely well controlled and often range far off the trails, while dogs being walked individually or in pairs generally keep more or less to designated trails. Thus the restrictions on number of dogs that can be walked is essential.

In addition, the regulations in the GGNRA, at least those areas in San Francisco proper, should be consistent with the city of San Francisco regulations, which require a maximum of six dogs per walk (<http://www.sfgov2.org/index.aspx?page=1083>) and a permit for professional walkers (<http://www.sfgov2.org/index.aspx?page=3857>). If regulations in the GGNRA do not align with those of the City, every would-be professional walker who can not get a City license will walk their dogs in the GGNRA. For simplicity of paperwork, both for the Park Service and the walkers, it might be easiest to simply require that professional walkers have a City license.

Thank you for your time.

**Correspondence:** As a dog owner and regular user of Ft. Funston, I implore the National Park Service not to close any off-leash areas in or around San Francisco without simultaneously opening other similar sized areas for dogs to be off leash. It is unrealistic not to provide dog owners with a large space to exercise their dogs off leash in San Francisco. If Ft. Funston were to be closed to off-leash dogs but another area were to be opened, perhaps at Ocean Beach, Golden Gate Park, or the Presidio, I would understand and accept the new regulations. But to close an off-leash area without opening another in its place will put dog owners in an extremely difficult position. I, for one, would likely exercise my dog in areas with leash requirements but lax enforcement, which is not a good solution for anyone.

Thank you for your consideration of this comment.

**Correspondence:** I would like to thank the National Park Service for allowing me to make public comments in reference to the Draft Dog Management Plan / Supplemental Environmental Impact Statement.

I have concerns about several issues raised in the Statement. For your convenience, I am including the page number from the Draft Dog Management Plan / Supplemental Environmental Impact Statement for each issue I am addressing, and in some cases I am including references (also for your convenience, I am including references in the form of web addresses so that you may more easily review the basis for what I am writing), and I am including some information about myself in order to establish why I believe I can legitimately offer criticism.

Page 35 of the Draft Dog Management Plan / Supplemental Environmental Impact Statement states: Exercise. Visitors with dogs, including elderly and handicapped visitors may experience beneficial effects of walking their dogs. Dog walking provides mental health benefits by providing a social community for many people. Studies have shown that dog owners exercise more than people who do not own dogs. A study in Australia looked at how dog ownership influenced physical activity (Cutt et al. 2008). Dog owners walked their dog on average 2.6 times per week. Frequency and duration of total walking, walking for recreation, walking in the neighborhood, and total physical activity were higher among dog owners than those that did not own dogs. The results confirm the potentially important role that dogs could play in increasing levels of physical activity among owners (Cutt et al. 2008). In a separate study, 61 percent of the 2,170 dog owners sampled walked their dog for at least 10 minutes at a time. The

median number of times dog owners reported walking their dog each week was three and the median duration was 25 minutes. The median weekly duration of dog walking was high among young dog owners, declined in middle age, and increased in persons aged 65 years and older. Dog walking contributed to a significant increase in the total amount of walking conducted per week (Reeves et al. 2011). In addition to providing physical health benefits, dog companionship has been linked to better physiological, social, and mental health. Although I agree with what is written, a reasonable review of the medical literature supports a much stronger view of the health benefits of dog ownership. As a licensed California physician who is a Fellow of the American College of Allergy, Asthma, and Immunology, a Fellow of the American Academy of Allergy, Asthma, and Immunology, and a Fellow of the American College of Physicians, I believe I have standing to offer additional information; to wit, The American Heart Association, in its peer reviewed medical journal *Circulation* recently (May 9, 2013) published an analysis of this issue

(<http://circ.ahajournals.org/content/early/2013/05/09/CIR.0b013e31829201e1.full.pdf.html>) entitled Pet Ownership and Cardiovascular Risk: A Scientific Statement From the American Heart Association. They noted on page 1 that cardiovascular disease (CVD) is the leading cause of death in the United States. Further, obesity and physical inactivity are at epidemic proportions. They concluded on page 4 that Pet ownership, particularly dog ownership, is probably associated with decreased CVD risk (Level of Evidence: B). Level of evidence refers to the estimate of certainty or precision of the treatment effect. In order to reach a higher level of evidence, more studies would be needed and randomized studies would be required: this is problematic as it is hard to get patients to agree to being randomized into a study where they either get or do not get a dog, and further, it would be difficult to perform a blinded study as most participants would know whether or not there is a dog in their house! The American Heart Association further concluded, Pet ownership, particularly dog ownership, may have some causal role in reducing CVD risk (Level of Evidence: B). It is my professional medical opinion, as supported by the best available applicable medical literature, that dog ownership is causally related to lowering the risk of the most deadly disease in the United States of America today. Restricting available parkland that can be used for dog can reasonably be inferred to be likely to decrease exercise and pet ownership, and would likely cost lives. I humbly submit that page 35 of the Draft Dog Management Plan / Supplemental Environmental Impact Statement should be strengthened to reflect the medical evidence that this is a matter of life and death for some visitors, and any analysis of limiting areas where dogs are to be allowed should include loss of human life as the likely outcome of any significant restrictions. As noted on page 1226, under the heading HUMAN HEALTH AND SAFETY GUIDING POLICIES AND REGULATIONS

#### NPS Management Policies 2006

The NPS has designated management policies related to human health and safety for park facilities as outlined below or as discussed in the NPS Management Policies 2006.

8.2.5.1 Visitor Safety - The NPS will seek to provide a safe and healthful environment for visitors [sic]. It appears to me that NPS regulations would thus be required to not further limit dog access without a reason that outweighs death.

Pages 1231-2 of the Draft Dog Management Plan / Supplemental Environmental Impact Statement concerns pathogens. It notes, Evidence shows that pets and urban wildlife can be significant bacterial sources. In the case of Fort Funston, the facts clearly show otherwise. The San Francisco Public Utilities Commission operates the Oceanside Wastewater Treatment Facility and Lake Merced. It monitors Ocean Beach and Lake Merced for bacterial contamination. The Daly City Water and Wastewater Facility monitors water quality just to the South of Fort Funston. I separately asked both of these government agencies if they had any evidence of even a single case of water contamination of any kind that has been attributed to dogs at Fort Funston since the GGNRA was established on October 27, 2013. By personal communication, both agencies could not find any evidence of dogs as a detectable source of bacterial contamination. A related issue that has been noted is that horse owners would like to be able to ride in areas apart from dogs. As a dog owner, I can from personal experience attest that dog owners frequently

pick-up their pets waste material. Sadly, my experience is that horse owners do not do the same. Thus, any consideration of limiting dog access, in favor of the pleasure of equestrians, should consider the potential for worsening of this problem. The Statement also notes, Assuming compliance with the regulation, the amount of dog waste at each site should decline and would reduce the health and safety risks associated with dog-related pathogens. I challenge this assertion. It assumes by limiting dog access, the net amount of fecal material would be decreased, and unless there was a concomitant prohibition of riding, this assertion could be described as horse manure. In any case, bacterial contamination has been monitored and not found to be an issue.

Pages iii of the Draft Dog Management Plan / Supplemental Environmental Impact Statement concerns The 1979 Pet Policy provided for on- and off-leash dog walking, and states the 1979 Pet Policy, developed with input from park staff, provided general guidance for dog walking and recommended locations for both on-leash dog walking and off leash or voice control dog walking in lands owned and managed by GGNRA, although this recommendation did not abide by the federal regulation regarding dog walking in national parks (36 CFR 2.15). Although I am not an attorney, I read 36 CFR 2.15 (<http://www.gpo.gov/fdsys/pkg/CFR-2012-title36-vol1/pdf/CFR-2012-title36-vol1-sec2-15.pdf>) and it states (e) Pets may be kept by residents of park areas consistent with the provisions of this section and in accordance with conditions which may be established by the superintendent. Per the NPS (<http://www.nps.gov/goga/historyculture/creation-of-golden-gate-national-recreation-area.htm>) The Golden Gate National Recreation Area was established in 1972 as a new urban park. To me, the operative word is urban, which can be defined as being of, relating to, characteristic of, or constituting a city per The Free Merriam Webster Dictionary (<http://www.merriam-webster.com/dictionary/urban>). It stands to reason that as an urban park, per the law cited in the Statement, the superintendent is empowered to allow pet access to residents of the park areas, and since it is an urban park, that would include the defining, urban environment surrounding the park. Thus, the assertion that this recommendation did not abide by the federal regulation regarding dog walking in national parks is undercut by the intent expressed in the creation of the park and is invalid. Although I cannot make a legal argument, morally, I believe the good people of the Counties of San Francisco, San Mateo, and Marin, should have the right to continue, unchanged, the current Pet Policy under the legal doctrine of adverse possession (per [http://legal-dictionary.thefreedictionary.com/adverse possession](http://legal-dictionary.thefreedictionary.com/adverse+possession), Adverse Possession is

A method of gaining legal title to real property by the actual, open, hostile, and continuous possession of it to the exclusion of its true owner for the period prescribed by state law. Personal Property may also be acquired by adverse possession. The legal theory underlying the vesting of title by adverse possession is that title to land must be certain. Since the owner has, by his or her own fault and neglect, failed to protect the land against the hostile actions of the adverse possessor, an adverse possessor who has treated the land as his or her own for a significant period of time is recognized as its owner.) Morally, this doctrine should protect citizens who lawfully get a dog under the assumption that they shall have a place to walk their dog, while one set of rules is in effect, from having public park access taken from them, at least, during the life of the dog. Morally, in my opinion, if there must be changes, they should have a lead-time where the current rules are maintained for a period of time that just exceeds the lifespan of some of the longer-lived dog breeds, or current park visitors should be able to get a permit allowing access for the life of their current pet.

Page 18 of the Draft Dog Management Plan / Supplemental Environmental Impact Statement concerns endangered or nesting birds, particularly, plovers of the Genus Charadrius. The Statement notes off-leas dogs disturb snowy plovers, potentially reducing their chances of survival. I have a Master of Science degree in Biological Sciences from Stanford University, and although I concur with what was written, I fear this leaves out crucial information. I reside in the Park Merced apartment complex, and over the last year I have on three occasions seen coyotes there. I have walked my dog in Golden Gate Park and Glen Park and have seen warnings of coyotes. From my observations, these three areas are not used as extensively for dog walking. In contrast, I have never seen a coyote, or seen a coyote warning sign, or seen a reference to coyotes in any of the regions of the

GGNRA that are extensively used by dogs (such as Fort Funston or Crissy Field). From the perspective of a dog, some shore birds bear an unfortunate resemblance to the tennis balls they have been taught to fetch. However, from the standpoint of coyotes, snowy plovers look like dinner. Excluding dogs from regions of the park where they currently exist in large numbers might allow coyotes to take up residence, and such a scenario could be much more damaging to birds than the current state of affairs. Page 351 of the Draft Dog Management Plan / Supplemental Environmental Impact Statement clearly states: Impacts can be either beneficial or adverse. I concur. I suggest that before dogs are removed or leashed in an area where they appear to thrive, and coyotes have not, further research on predation of shore birds, and the impact of relatively dense dog populations, as a counterbalance to predation by coyotes, should be considered. Moreover, The San Francisco Chronicle (<http://www.sfgate.com/default/article/State-of-the-Birds-report-focuses-on-Bay-Area-2327006.php>) reports The beach-loving bird called the western snowy plover and the bay-centric bird known as the California least tern, have seen population increases over the past few decades. Both are federally listed endangered species. It appears the current plan is serving well the interests of the snowy plover, and any change, including limiting dog access, should be viewed as a potential threat to the survival of this endangered species.

Page 20 of the Draft Dog Management Plan / Supplemental Environmental Impact Statement concerns Soundscapes, and notes The natural sounds heard in GGNRA are a positive and valued park resource, as well as a component of the visitor experience, which dog barking may interrupt. As a native San Franciscan who grew up in the Sunset, is a graduate of South Sunset Tiny Tots, Ulloa Elementary School, A. P. Gianinni Junior High School, and Lowell High School, who has lived within earshot of Fort Funston for nearly half of a century, I believe I have standing to point-out the obvious: in reference to Fort Funston, the idea of natural soundscapes is completely undercut by its location under a flight path of SFO, next to a highway, and across the street from the San Francisco Police Department Pistol Range and the Pacific Rod and Gun Club trap and skeet shooting range. It is disingenuous to use this canard to try to exclude dogs from any part of Fort Funston.

In view of the concerns I have raised, and for the good health of the people who use the park, I hope the current rules (<http://www.nps.gov/goga/parkmgmt/pets.htm>) can remain, unchanged.

Thank you for your consideration.

Dean Kardassakis, MS, MD, FACAII, FAAAAI, FACP

---

(similar to what I've seen at Muir Beach recently), since all too often I've observed people allowing their dogs off-leash even in areas that are already clearly designated as on-leash only, or no dog areas, and I realize that enforcement through higher staffing levels is not realistic.

I'm particularly pleased that this plan calls for better protections of the Crissy Fields Wildlife Protection Area which is a great, highly accessible, urban bird-viewing area that needs sufficient regulation to provide safety for its diverse wildlife.

Thanks for taking our views into consideration.

Sincerely,

Wendy Hoben and Lydia Huang

**Correspondence:** My dog and I enjoy walking the trails in the NPS (as well as other trails). I enjoy being able to take him both on leash and off leash (depending on the rules of the trail). I am concerned that the trails I current use could change from on leash to no dogs (and from off leash to on leash). My dog is trained and well behaved (and well socialized). I clean up after him and ensure that he stays on trail. I am concerned that the NPS is going to penalize law obeying and considerate/responsible dog owners for the actions of the few that do not obey the laws and/or are not considerate or responsible. The NPS should enforce the current laws - rather than looking to change the laws.

**Correspondence:** No 10 page letter, just a few comments and a need to add my voice to the calls for a carefully balanced use plan. The GGNRA is such a precious resource for so many people and creatures, and some of both of these groups need protected. As a senior, I enjoy watching dogs play in duly designated areas. Meeting hordes of them on the trails is another thing.

I applaud you for making Wildlife Protection areas safer for wildlife, but am concerned about the plan providing for no containment of off-leash areas. I believe it's necessary to have some sort of barrier to provide clear delineation of the areas and prevent inevitable roaming and unwanted human and wildlife encounters.

I'm also concerned about the burgeoning number of professional dog walkers. This could make the growing number of dogs untenable.

The GGNRA is the only national park in the country that allows unleashed dogs. There's something very democratic and san franciscan about that. On the other hand, there's probably, when all is said and done,

good reason for that decision.

Thank you for listening, and I wish you the wisdom of Solomon in resolving this matter

**Correspondence:** Hello,

I have been walking my dog in the GGNRA for over 10 years and taking away space to walk dogs will have a negative impact on one of the biggest reasons for moving to Marin. As a dog guardian and citizen it would place me in a limited position in relation my enjoyment of the space and constrain my ability to properly care for my pet. It seems to me that there is already a limited space to walk dogs off leash and taking more away will only further crowd and burden the few areas left. I would argue that we need more off leash space as opposed to less. I can tell you from experience that a dog that gets a lot of exercise is a well behaved dog -> and that has a direct impact on the community and environment as a whole.

I also have some concerns about the decision making process:

It seems that the decisions are not based on any scientific data and lean heavily on assumptions and assertions that provide little firm evidence that support them. It also appears to lack any peer reviewed site specific studies that I would think would be required before taking such action. Without studies and more formal review process, there do not seem to be any legitimate or legal foundations for these policy changes. Also, the plan does not differentiate between the impact caused by human beings or other animals and assumes that all negative impact is caused by dogs.

I oppose the GGNRA's preferred alternative and support the NO ACTION alternative.

**Correspondence:** I strongly object to the GGNRA Dog Management Plan. San Francisco is a dog friendly city with limited open space for dogs to run off leash. As any dog owner understands, this is critical to a dog's health. Below are some additional thoughts and a poem by Mary Oliver from her latest book, Dog Songs:

If You Are Holding This Book by Mary Oliver

You may not agree, you may not care, but  
if you are holding this book you should know  
that of all sights I love in this world-  
and there are plenty-very near the top of  
the list is this one: dogs without leashes.

Thank you for soliciting comments and I hope rational and compassionate hearts prevail in this discussion and decision.

Nora Blay

<b>Correspondence:</b>	I adopted my dog in early 2013 and she has substantially improved my quality of life, requiring me to get outdoors, recreate, and socialize with others. I've learned what it is to care for someone other than myself. I now have a healthy support community of fellow dog owners.				

The biggest shock to me since becoming a dog owner is the level of dog regulation in our state. I am opposed to the entire GGNRA Dog Management Policy because I disagree with its premise that dogs in the GGNRA are compromising visitor safety and damaging the resources of the Recreation Area. My dog has learned to be social through being with me wherever I go, but most importantly, through visiting various parks throughout California. Yet I find myself increasingly anxious about where I can take her given regulations and policies like the one proposed. I'm increasingly forced to research where we can or cannot be and never imagined the outdoors/wild wasn't the place to bring a dog. Who would growing up with stories of Old Yeller and White Fang?

If we care at all about the state of health in California, we will stop going out of our way to make it a crime to enjoy nature, not simply observe it. My love and respect for nature grew out of running x-country, mainly at Ocean Beach and Golden Gate Park. My new running companion makes long runs much more challenging and fun; she pushes me to explore new trails and my limits. I learned to love the parks during family picnics and camping excursions with our dogs in the GGNRA, East Bay Regional Parks, and Sierra Nevada. That's what makes the GGNRA a resource: because people have enjoyed bringing their families and family pets there to explore and play for decades. A day in the park with your dog, frolicking and foraging, or playing in the waves is an integral part of California recreation. We should be expanding access and reducing the limitations for off-leash park access.

<b>Correspondence:</b>	The document and drafts are a bit confusing and not very clear. It seems like there are a number of drafts but not sure which one is the proposed one. With that said, I vote for the 10A and				

---

12A at Crissy Fields and Baker Beach respectively. I have been a dog walker for almost 19 years now and I definitely think that there needs to be regulation but not so much about off leash areas BUT number of dogs people can take as well as gathering of dog walkers where there are two dog walkers walking together that would be about 15 to 20 dogs in one area. This is truly what I feel has been the problem from the geco.

Back in 1995, dog walkers were responsible and not taking so many dogs. There were limited complaints. Now there are so many dog walkers who take any kind of dog whether aggressive or not plus 10 plus. Not all dog walkers. There are so many like myself who are responsible, taking only voice control dogs, well behaved dogs and also only 7 to 8 dogs at the most.

When dog walkers gather or walk together it creates so much confusion for everyone...dogs get lost, dogs get into fights and it is hard for even someone like me who is a dog walker to walk through or by these people.

I truly think that if you regulate the number of dogs that each dog walker has to 8 dogs like the city has done as well as enforce no more than 10 dogs in one area or dog walkers standing with each other, this will alleviate many problems. When a dog walker has control of 7 dogs and has them with her or him, it really is not a spectacle like when someone has 10 plus dogs or walking with another dog walker.

I do feel like the number should be 8 as many dog walkers take 7 dogs plus their own canine.

In addition, I think that the GGNRA should team up with SF city and their permit situation if they are going to do a permit situation. It would be so confusing for everyone to have to carry so many different permits for different areas. I think that could cause problems as well. As the old saying goes "Keep it simple stupid". GGNRA in SF is in a city/urban area and I think you need to accept this is not Yosemite and work with the city adopting their policies that seem to be working. everyone needs to be on the same page because whether you like it or not Baker Beach, Crissy Fields, Fort Mason, Fort Funston etc are in a city called San Francisco. Not the great outdoors of Yosemite Valley.

I also find it fascinating that you are so worried about dog walking ruining the environment when I continually find used condoms, human feces, used tampons and sanitary napkins as well as beer bottles, wine bottles and toilet paper all over the Presidio, Baker Beach, and even in the headlands on Alta trail. It is really disgusting and actually unsanitary. I take my kids walking with me and I worry about them touching some of the garbage I find out there.

It would be a mistake to limit off leash dog walking but I do believe in regulation of dog walkers that I think has gotten out of control with the number of dogs each person takes as well as the gathering.

In addition, my husband is a Phleger as in Phleger acres and he is also going to comment but has told me that his family were huge dog fans and walked their dogs off leash on the Estate as well as everyday at Crissy Fields (benches down at the beach are his mom and his uncle). He said his mom would be so upset by the restrictions the GGNRA are doing to dog walkers and dog owners. Please keep in mind that the Phleger family graciously donated thousands of acres to Open Space to then to give it to GGNRA. Respect their wishes of dogs being able to walk off leash.

Thank you,

Lisa Gates

**Correspondence:** Re; Dogs off-leash at Muir Beach.

The NPS has just completed a wonderful multi-million dollar refurbishment project at Muir Beach.  
Wonderful and congratulations.

I am writing to encourage the NPS to require that dogs be on-leash only at this beach. My main concern involves dogs (I've counted up to a dozen at a time) playing and swimming in the pond that empties Muir Creek into the Pacific Ocean. This is the creek that runs through Muir Woods and is vital to the survival of the annual salmon run.

Despite posted signs requiring owners to keep their dogs out of that area, far too many dog owners ignore the signs to the peril of the salmon, birds and other wildlife for whom this critical area means their survival.

Please require dogs on-leash at Muir Beach!!

Thank you.

**Correspondence:** To whom it may concern,

Hello. My name is Zachary. I'm an eighth grade student at Chinese American International School in San

Francisco. I have deeply value the idea of public land and conservation, and I am committed to the upholding of personal safety as well as right to benign recreation in the national parks. I am also a dog owner. I'd like to encourage you to be conservative in your regulation of canine recreation in the parks. Animals of all kinds have many uses, but dogs have held a position close to the heart of man for thousands of years. Many San Franciscans own dogs, and consider them a part of their own family. In your support of indiscriminate and accommodating recreation opportunity in the national parks, I hope that you consider the health of these dogs and their families.

I'd like to share with you a tradition that has survived many weekends in our family. It's a feeble, informal tradition, but I would be dismayed to discover that this activity is no longer legal in our parks. Our dog, Maisie, is a Boston terrier with bright brown eyes, short black and white fur, and a great capacity for rapid release of energy. She loves chasing her ball. Many times, we have taken her down to Crissy Field to play ball. We typically purchase food at the hot dog stand or the warming hut, and take our food further down the promenade to eat. All the while, Maisie is running back and forth. If there is a gap between different members of the family, she quickly runs back and forth, making sure that everyone is accounted for. But no person catches her eye nearly as often as her rubber ball: fluorescent orange, and not a tennis ball because those had worn away her teeth. This ball, modest in size, had a jealously guarded place in her heart. If one just raised it in their hand, Maisie's eyes would widen, and follow it. Her muscles would be poised to explode, her heart thumping, and her mouth open, panting. No other dog could distract her. And when the ball was released from the plastic "chuck-it", she would be spirited away by the wind. Nothing could match her speed. And her ecstatic gaze, so smug, as she carried the ball back would infect me with a bit of her unrestrained excitement. Doubtless, Maisie's joie de vivre will sustain until the day she dies, but I hope the ability for dogs like her to play, imbued with such vivid energy, will last long after she does. I will hate the day that the Crissy Field promenade is restricted to leash only, as demonstrated in Map 10-B of the plan.

Dog owners in San Francisco face a plethora of restriction. The streets are busy and dense, and the bustle of city life can restrict the time available to walk a dog. Please sympathize with our search for a safe, beautiful place to walk and play with our dogs. These are public lands, and indeed, they should belong to the animals more than us. Domestic canines may not have as much of a place there as the wildlife, but there is a canine that makes every day a bit better for me. Please allow this happiness to continue in the lands we all own, and share, and have coexisted in since 1872, when President Grant set aside Yellowstone National Park for protection. Dog walking is a recreational activity that can leave us all imbued with ecstatic energy, an energy to be outside and in nature, and an energy that should be preserved along with all else that is beautiful in the national parks. Please, once more, I urge you to support canine rights in the Golden Gate. It's not just dogs we're talking about; these dogs belong to a family that needs a place to walk their dog. Thank you for your consideration.

Cordially,  
Zachary Ngin  
8th Grade Student

**Correspondence:** I strongly oppose Alternative F, instead, I support Alternative A, the No Action Alternative.

I live in Mill Valley and regularly - - including on cold and foggy days when no one else is there - - visit Muir Beach with my dog. On the few hot days when the beach is mobbed with people from all over the Bay Area, I don't take my dog there. Muir Beach's biggest advocates are those who live in the area. We cherish and protect this natural resource in our own back yard, and most days it's just locals out there with or without a dog.

Marin is a dog-friendly county, with many educated owners and well-socialized animals. We pick up after our dogs and do not allow them to be nuisances.

I understand that the Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Thanks -  
Sylvia

**Correspondence:** Plans A through F are unacceptable to me as a dog owner who loves to see my dog able to run around freely at Ft Funston, Ocean Beach, and Chrissy Field. I 100% support saving the 1979 Pet Policy Plan as the new permanent plan or rule.

Our dogs aren't doing any harm to the environment, they are more a part of the natural environment than we are. Humans are the environments worst enemy! Dog owners are responsible people and take care of and pick up after their dogs in these areas. I've never encountered an issue with another dog owner not being responsible. We know how precious and lucky we are to have these areas for our dogs.

Please save the 1979 Pet Policy Plan! My Laboradoodle Caleb would forever be grateful and so would I.

Thank you  
Ashley Leifer

**Correspondence:** Marin County Trails - Need MORE Dogs Access

To Whom it May Concern:

Countless studies have shown the immense physical and mental advantages of dog ownership. In Marin County we have a beautiful outdoor space where we are privileged to get our exercise with our beloved canine companions.

Dogs on leashes do NOT cause problems other than waste management. It has been my experience that Marin County dog owners are extremely conscientious about picking up their dog litter, and so what is the logic in the further restriction of dogs on our magnificent hills.

As a Marin County tax payer and voter, I respectfully request that you EXPAND on leash dog access, but if necessary increase the fines on those who do not pick up after their dogs.

Thank you for consideration of my request.

Sincerely,

Sherry Thomas-Healy

**Correspondence:** Dear Sirs and Madames,

I was born and raised in the Bay Area, traveled the world for work, and despite my love of other countries, returned to my home of Marin County to raise my family. Part of what I appreciate about this region, and what brought me home, is our collective effort to create a model of tolerance and mutual respect for all life. I believe this should carry over to responsible dog ownership.

Having witnessed my younger sister being attacked by dog at the age of seven, an attack which led to a huge number of facial stitches, one might assume I would be pro-dog leash at all times. However, I think that just like there are some bad seeds of people, there are some bad seeds of dogs, and not all dogs (and dog owners) should face punishment and prohibitive laws because of a few bad seeds.

The joy and emotional support brought to many a family via off leash playing with their dog(s) together in places such as parks, beaches, and open spaces provides meaningful connection for many individuals. True that on rare occasions, there are out of control dogs and irresponsible owners. But the vast majority of dogs and dog owners work together beautifully, as can be witnessed on any given day at open spaces throughout the Bay Area.

We live in a society in which a great deal of decisions are made out of fear. Doing so begets only more fear, not to mention increasing insurance costs due to litigious behaviors rather than personal responsibility. It is healthy and wise to be aware of fear; it is unhealthy and unproductive to lead with fear. I implore our elected officials and the decision makers of our region to lead with the power of positivity rather than fear and keep open spaces available for off leash freedom of families with dogs.

Thank you.

Kind regards,  
Kimberly Falkenburg

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to (put your preferred GGNRA trails and beaches here).

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

In addition, on some open space trails (not GGNRA), there is a CARRY LEASH policy. If people carry leashes for their dogs, people who object to a dog's behavior can ask the owner to put the dog on leash.

**Correspondence:** As a resident of Muir Beach, I cannot urge you strongly enough to retain the current policy regarding dogs and their access to beaches and trails- - to restrict them even further seems pointless. This is the sort of thoughtless silliness that makes people distrust and loose respect for their government. Why you would restrict dogs from beaches and trails while at the same time doing everything in your power to encourage an even heavier carbon footprint in the increased amount of cars and people flooding into a tiny valley and even smaller and more fragile site is beyond comprehension. This is senseless and absurd meddling and, by the way, will be extremely tiresome to try to enforce - - BACK OFF, Parks Department.

**Correspondence:** I love hiking and beach walking with my dogs. I keep them on leash, except on certain beach areas. I take them to the beach when few people are there- weekdays . They are well trained. As much as I would love to let them run free on the trails - I know this is what will take the privilege away from all of us- so they are on leash. I have lived where there was nowhere to walk a dog off leash - except my backyard! If dog owners want to keep our privilege to enjoy the outdoors with our beloved four legged friends- please ask other owners to obey leash laws. If we did not see dogs on trails where they are not allowed, and leash laws ignored-we would not be fighting to keep our present privileges. I also think the park service could do a better job with signage, and tickets should be issued to pay for enforcement of the rules. This would be far better than loosing our special lifestyle in Marin.

**Correspondence:** Please take account of the phenomenon that the people who are annoyed by inconsiderate dog owners are less vociferous than the owners who loudly proclaim their demands. I live alongside Lafayette Park in San Francisco which just been redeveloped at considerable expense. It has an a specific area for dogs. More owners than not continue to use the entire park (including the area adjacent to the toddler playground) to play and poop their dogs off leash. I have seen no effort to correct the condition. Ask them why this is the case and whether any rules for dogs will be obeyed or enforced. It makes this process hard to take seriously.

**Correspondence:** Hello, I am a frequent walker in Fort Funston and Ocean Beach, and spend a lot of time in other GGNRA parks. Often with family members and my dog.

I am opposed to the entire proposed GGNRA Dog Management Policy. There is no evidence or studies that show dogs in the GGNRA are compromising visitor safety or damaging the resources of the Recreation Area.

The GGNRA wrongly asserts in this SEIS that they have the right to redefine the term "recreation" from what it was defined in enabling legislation and in the promises made to the voters of San Francisco back in 1972 by the GGNRA/NPS/DOI in order to secure various properties then owned by the City and County of San Francisco. These promises, most importantly, stated that this National Recreation Area would retain historical recreational access (including off-leash recreation) should the citizens vote to include SF park properties in the GGNRA. The GGNRA does not have the legal authority to rewrite history or its enabling legislation to their own design.

I strongly oppose the SEIS' "Monitoring-based Management Strategy", which is just a mechanism tried earlier that allows GGNRA to decide whether we are in compliance, since the measures of compliance are subjective. Under this SEIS the GGNRA may decide to impose short-term or long-term closures of areas. These short or long term closures could be triggered by any number of conditions totally under the purview of the GGNRA, all of which dog guardians have no ability to influence by our actions. This goes against the spirit of the enabling legislation and is totally unacceptable.

The GGNRA should instead codify the original 1979 Pet Policy as a Section Seven Special Regulation, which it has the authority and responsibility to do. All properties added subsequent to the 1979 Pet Policy and in the future should have historical off-leash recreational usage allowed. This would accurately reflect the enabling legislation for this National Recreation Area, which GGNRA management has held in disregard for quite some time.

If the GGNRA does not want to manage these properties as a Recreation Area, then they should transfer the Recreation Area to another entity better able to manage it or these properties should be reverted back to San Francisco.

Thank you for your attention in this manner. Please do not fix something that isn't broken!

Regards

Greg King

**Correspondence:** Almost one-third of households in San Francisco have dogs. The plan to limit off-leash access for the city's dogs means that our city parks will become over run with dogs.

The new plan affects not only dog owners: anyone who uses city parks will immediately notice the difference. The city parks alone are not large enough for all the dogs that already live here in the city!

This new plan is bad for dog owners AND for people who do not have dogs.

Please reconsider!

---

**Correspondence:** This proposal if allowed to be put into effect will have profoundly negative consequences on the citizens of San Francisco. There is an abundance of land for all to enjoy the natural beauty and resources of the GGNRA. To focus on limiting areas for the 120,000 dogs that live here is going to have a drastic impact on the use and enjoyment not only of the GGNRA but our city parks as well. Please, allow common sense to prevail. These limitations are severe, unnecessarily restrictive and will dramatically lesson the use and enjoyment of these areas for \*all\* citizens, not only those who enjoy the parks with their canine family members.

**Correspondence:** Dogs need places to run freely.

Dogs are more sociable when off-leash.

The majority of dog owners are responsible.

As a Muir Beach resident, I respect the natural habitat and make sure my dogs are under control, well-trained, and responsive to voice commands.

Muir Beach and trails throughout the Marin Headlands should be SHARED and not dictated by a minority.

California has hundreds of miles of coastline for birds and sea life such that environmentalists' arguments that Muir Beach and Marin trails need more regulation are unfounded.

It is unreasonable to limit off-leash dogs to Rodeo Beach which in fact seems to get more urban visitors than beaches further north.

The status quo is working; more rules do not equate to better solutions.

**Correspondence:** Dear National Park Service,

San Francisco is a city founded on the principle of many living as one. As a whole, we are a community committed to taking care that our individual choices don't harm others.

In the case of our many parks, dog owners here are particularly dedicated to making sure others are not bothered or harmed by their pets. Difficult or aggressive dogs are almost never encountered in off-leash

areas, and owners are quick to rein in overly-friendly or rambunctious dogs.

The generous off-leash areas in San Francisco are in fact an important safety valve, because dogs who are well exercised are almost never aggressive in more restrained situations like small city parks and sidewalks. Dogs who are never allowed off leash can become anxious and unpredictable, which is much more of a concern than dogs running free and relaxed in wide-open areas like Baker and Crissy Beaches.

San Francisco is chock full of dogs who need regular exercise to be safe and happy members of our community. Please consider the logic of this. We hope you will realize how well our parks function when ample space is allowed for dogs to release their natural energy and live peacefully with all their human neighbors.

Thank you,  
Cara and Miles

**Correspondence:** I'm writing to express my STRONG OPPOSITION to the proposed dog management plan for GGNRA. My concern stems from how this plan will negatively affect Bay Area parks that are not part of the GGNRA. By pushing most of the dogs out of the GGNRA, the most likely place for people to take their pets is regional and urban parks, such as McLaren Park in the south eastern portion of San Francisco.

McLaren is a dog-friendly place, and already there's concern that heavy dog use is affecting the flora and fauna of the park, especially with the volume of dog walkers with their client's pets. If GGNRA properties are deemed off limits to dogs, parks like McLaren will be overwhelmed and the natural environment of this park could be severely damaged.

By spreading dogs throughout all the open space in the bay area, including GGNRA properties, the damage to any one location will be minimized.

**Correspondence:** I use both Fort Funston and Crissy Field regularly for dog recreation. I prefer to see no changes on any of these site, or the other GGNRA sites. The documentation is confusing at best, but if you are forcing a choice, Alternative A is the only viable option for my use.

I also employ responsible dog walkers who use these sites, and we depend on their continued, year round access.

The proposals for seasonal access rules are absurd.

Please remember that GGNRA works for me and other dog owners.

I expect GGNRA and the US Government to apply fair and equitable access to all kinds of recreational usage, in my case off leash pet exercise and quality family time with our pet.

Steve Loving

**Correspondence:** NPS Decision Makers,

I urge you to maintain unleashed access to dogs accompanied by their owners on Park land.

As a life long resident of Marin County, I've been to Muir Beach many times, some with a dog and some without. Sharing the beach with dogs is part of the character of Muir that everyone I know appreciates.

The existing policy increases use of the area by local residents, many of whom own dogs and would not visit the beach otherwise. The policy also aids local businesses like the Pelican Inn, who are often frequented by dog walkers like me and my wife.

In other areas like Oakwood Valley and Alta Ridge, use is predominantly by dog walkers, who pose no conflict with other activities. It would be a shame to limit a dog's freedom in these areas and essentially close the trails to half the population by changing the current policy or instituting any plan beyond voice control.

Thank you,

Howard Flax

**Correspondence:** I seriously oppose this law that has been put on the ballot, particularly with Fort Funston. Had I not had a dog I would have never learned of Fort Funston. The second citizens of San Francisco (the dogs) need this space as well as their owners, many of them whom pay property taxes that seem to benefit everyone but themselves in the city.

As it stands, Crissey Field and Fort Funston among others are needed by the dog walkers. Taking that away will overcrowd the city parks with animals. The City parks are now shared by animals that are familiar with each other and live in harmony with parents and their children. The facts remain that dogs outnumber the children of the city. Dogwalking is another source of employment as well as revenue for the City in licensing. Not everyone works at Silicon Valley and thank God for that, but I'm sure that many of them have animals and use DogWalkers. Whoever proposed this law must hate animals.

**Correspondence:** I am very concerned with the conservation of our City parks, and the impact that extremely restrictive regulation of dogs in our treasured GGNRA/SF will have on our neighborhood parks. So please do keep on/off leash areas available, except Land's End which is a very, very delicate habitat.

For the sake of fair distribution of dogs in San Francisco County, and the safety of people, critters and the land, I prefer the following options:

Upper Fort Mason Map 9-C

Crissy Field Map 10-D

Fort Point Maps appear to have little difference, on to the other, so any will do

Baker Beach Map 12-E

Land's End Map 13-D

Sutro Heights Park Map 14-A

Ocean Beach Map 15-A

Fort Funston Map 16-F

Thank you for your exceptional efforts to address a very difficult situation.

All the best for 2014!

This process has been hijacked by a small but vocal minority. Though there's some room for leashed dog walking in a federal protected area that harbors threatened species, this balance has swung ludicrously far away from resource protection due to steady, aggressive pressure by a minority.

At this point virtually all of the GGNRA is a de-facto off-leash dog area! Because of relentless political pressure, the NPS has been unable to enforce the existing laws. Some areas - the beaches near Chrissy Field, and Fort Funston, for example - are so crowded with unleashed dogs that their use for any other purpose is effectively denied to other park visitors. Exploring a scenic beach loses its appeal when the experience is reduced to a steady stream of uncontrolled dogs running at you, jumping on you, or sniffing your crotch. You need to do what is right, obey the laws that guide your agency, and protect the land that's in your trust.

The concept of "voice control" seems to have no legal definition, and in practice all areas with "voice control" regulations simply become at-large off-leash dog toileting areas.

Please take the time to leave your planning offices and visit ANY of the areas under discussion. Within minutes you'll see that the NPS has completely ceded control of these places to those possessing uncontrolled dogs, both on the ground - and now - in the planning process.

Thank you for considering my opinion.

<b>Correspondence:</b>	Hello, As a responsible SF dog owner for over 20 years, I am extremely concerned about the proposed ban of				

---

dogs from Fort Funston, Crissy Field, and most of Ocean Beach.

As you know, nearly one-third of households in San Francisco include at least one dog, and they all need to be walked daily. Limiting the areas that already allow dogs will flood our city parks with dogs (both on and off-leash), which seems unnecessary and counter-productive.

Please do not support this ban.

Regards,  
Thomas Muer

**Correspondence:** Dear Folks,

I am another Marin County dog-owning resident, and also oppose Alternative F, the plan restricting dog activity in the GGRA. Instead, I would ask you change your focus to the "No Action" Alternative A.

I regularly use the GGRA, and take my dog to Muir Beach or Oakwood Valley Trail 3 or 4 times a week.

As you know, almost all of the GGRA is off-limits to dogs. There aren't any real reasons to restrict the rest, and there aren't any studies that support these restrictions of the public's use of our public lands.

As you also know, the GGRA was created as a recreational area for local residents, and is not a wilderness area like Yellowstone or Yosemite, so a different strategy for management for the GGRA is necessary.

The original charter as detailed in the 1979 pet policy calls for access for all users, including people and their dogs. This was a cornerstone of the that policy, and it still works today, and will work in the future.

We appreciate and love the opportunity to use our open space! Please, consider the concerns of the population of Marin County and the Bay Area when you make your decisions.

Thank you for your consideration,  
Darrell Adams

**Correspondence Type:** Web Form  
**Correspondence:** I am a native San Franciscan, a responsible dog owner and a senior citizen. In order for me and my two dogs to get adequate exercise, we need reasonably easy access too off-leash areas where we can walk a sufficient distance in a pleasant outdoor environment. Currently there are far too few such areas in San Francisco.

---

At present, I must drive several miles from my home to access a pleasant off-leash area to walk with my dogs. Your current proposal would unacceptably decrease the number and size of such areas. Walking with my dogs is an important part of my health regime; it is equally important for my dogs' health to be able to obtain adequate exercise. Walking on leash with a 70-year-old woman does not afford them adequate exercise.

The passing of any proposal which further limits the off-leash areas in San Francisco would be a travesty. If the current off-leash areas seem crowded, it is simply because they already are to limited in area. We need more off-leash open space, not less.

**Correspondence:** I strongly oppose any ban on dogs at Crissy Field, Fort Funston, Baker and Ocean beaches. These areas are wonderful resources that Bay Area residents, and their dogs, should continue to be allowed to enjoy. Fort Funston, in particular is one of the few paved off-leash areas in SF and allows access for people with disabilities or injuries to walk, crutch, or wheel with their dogs off-leash. I grew up in SF, and now have a child and I very much enjoy taking him to these parks and have never experienced a negative interaction with dogs. It is important that we retain these areas as places where we can enjoy the outdoors with dogs. Every so many years the GGNRA considers banning dogs, and there is such tremendous outcry every time because so many people with dogs share these outdoor spaces and use them on a daily basis. These outdoor spaces provide beautiful, free places for people to enjoy our natural and local resources, get exercise, and appreciate our city. Do not take away this space. Thank you!

**Correspondence:** Thank you for the opportunity to comment. My initial response would be to support Alternative D, because we have been negatively affected while on GGNRA land by dogs and dog owners in the past. But after reading through more, I am willing to be satisfied with Alternative F. Alternative E seems to have too much enforcement that will eventually negatively impact parks because of cost and lack of funds. I really appreciate the fact that you are addressing the increase in the number of professional dogwalkers and the number of dogs they have. There is really no way they can handle so many dogs sometimes and it makes me and my family very uncomfortable when we see them coming. I hope that SF parks and rec follows this recommendation as well.

Regards,

Kim

**Correspondence:** For God's sake what are you people thinking? Crissy Field, Ocean Beach and Fort Funston are not fragile rural ecosystems filled with rare species and so forth. San Francisco is a big city, and these are its beaches. The giant concrete retaining wall on Ocean Beach or the thousands of buildings by Crissy Field should have tipped you off. This is a solution in search of a problem.

Hundreds of thousands of people and their dogs happily use these beaches every day. If you need to make restricted areas without dogs, they should be as few as possible. Stop trying to pretend that this is Yellowstone and respect the wishes of the people who ACTUALLY USE these highly urban beaches every single day. This is a City! It's full of people - and their dogs. The few NIMBYs who think they should have the advantages of living in a big city, yet have empty beaches and trails whenever they want them right outside their door, are selfish and unrealistic. If you want an empty beach experience, move to Mendocino.

I am genuinely flabbergasted at how restrictive and unrealistic these proposed rules are. It is almost like the people who drafted them had never seen how the beaches actually are used, or where they actually are, or thought about whether the rules could possibly work.

If this comment is a little strident, I am sorry. I just get frustrated when I see the same few curmudgeons exaggerating and imagining problems to get their way. No, people are not being attacked all the time on the beaches. No, Crissy Field is not a giant open sewer. No, normal children are not terrified when they go to the beach and a dog runs by and sniffs them. People and dogs coexist just fine right now on these beaches. If you think it necessary to set aside an area as a "children's beach" or a plover habitat, that makes sense. But other than that, the default status should remain as unrestricted as possible, in keeping with the reality of urban beaches.

**Correspondence:** As a disabled person with a companion dog, I really value the ability I have to take my dog to places like Chrissy Field and Fort Funston where he can run off leash. I have Spina Bifida and use leg braces and a cane, as a result it is very difficult for me to walk my dog on leash. The loss of access to such places would be a great blow to both of us, and severely limit our options for outdoor recreation in the city. I find it very hard to use the existing enclosed dog parks in the city, as the dogs there tend to be very territorial and aggressive. In the past I have been knocked over by these animals, and so I am forced to sit on a bench. My dog is protective and will then sit beside me and thus not take advantage of being off-leash. This is not a problem that occurs at more open spaces such as Chrissy Field and Fort Funston, where I am able to walk more freely and he can accompany me.

I do not see any valid reasons why these spaces (particularly Fort Funston) which have ben used this way for so long now have to change.

I live near McLaren Park, which also has a large and well-used off-leash area for dogs, perhaps the only other one in the city that is equivalent to Fort Funston or Chrissy Field. I am concerned that if this new plan goes into effect, then McLaren will become even more heavily over-used, creating a serious threat to this beautiful city park.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	To Whom it May Concern,				

I am writing to strongly oppose the proposed dog management plan for Golden Gate National Recreation Area.

I am a long-time resident of San Francisco, and a have been a pubic educator in the city since 2003.

I have actively served my city (and my nation's) children and their families by providing experienced educational leadership, particularly in the area of literacy. I hold two master's degrees: a Master of Science in Teaching from New School University in New York City, and a Master of Arts in Educational Leadership from University of California, Berkeley. I taught in San Francisco public schools from 2003 - 2013, and have recently taken on a new educational role as Assistant Principal of a public K-8 school in Oakland, CA.

I am also the owner of a rescue dog named Theo. I actively use Golden Gate National Recreation Area as a place to both enjoy nature and to experience the release that both Theo and I acquire because of our access to such a beautiful space. My ability to visit Golden Gate National Recreation Area will be restricted if the proposed dog management plan goes into effect. As life in San Francisco and the Bay Area becomes even more financially restricted for the poor, artists, activists, and civil servants such as myself, the open access that Golden Gate National Recreation Area provides must be maintained. The proposed dog management plan with contribute to the homogenization of a region already beset by severe economic and social inequity. All residents of the Bay Area (both human and dog) need access to places that provide sustenance and renewal.

If the proposed dog management plan goes into effect, I will consider moving to another area of California, taking my extensive educational leadership and social service experience with me.

Thank you,  
~Meroe Elahi

I live in Sausalito and walk my three small well behaved mixed breed dogs frequently in the Marin headlands.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

**Correspondence:** Dear Friends -

Increasingly across the planet we are removing fauna from public places.

Dogs provide humans with a connection to animals and to wildlife by patiently serving us, listening to us and sharing their world with us. Dogs bring joy, peace and love to humans. Dog-owners are among the few humans that recognize the importance of animals to the health of the planet and the human population.

By limiting the areas for dogs and their humans to roam, you sever the connection between man and nature and you deprive one of the more important contributors to the health of the planet - human cared-for dogs - a last space to act as dogs. it is cruel, unthinking, unconscious and unnecessary.

There is very little public space for human-dog recreation. Do not eliminate any more. In urban and suburban areas, which mankind must develop and evolve if life is to continue on the planet, we must also keep our connections to nature, to animals, to flowers and grasses and trees. There is no need to keep dogs off public lands - especially when so much of this land is already restricted against dogs. Do not take anymore of this land away.

Thank you,

Virginia Thomson  
Conservationist, Mother

**Correspondence:** I am a resident of San Francisco and a frequent user of GGNR, for hiking and bird watching. I am also a Biologist. I do not think dogs should be allowed off leash within the GGNR. In addition I do not think that professional dog walkers should be allowed to use GGNR. Our federal lands are not used by other commercial entities. Some dog owners are responsible for cleaning up their dog feces while others are not. The urine that dogs produce cannot be removed and produces foul odors that accumulate during the dry season. I believe that the buildup of nitrogenous wastes from dogs is harmful to the soil and the plants that grow within the GGNR. A number of these plants and the animals that depend on them are endemic to the area. Many dog owners are not responsible about keeping their dogs under control and this results in danger not only to humans but more importantly to wildlife. The GGNR is established to be a place of recreation for people and also a place to protect the beautiful and valuable resources of the area; because the Bay Area is so densely populated these uses are not compatible with major dog usages of the areas.

To make regulations hold, there will need to be more rangers or other enforcement people dedicated to giving citations out to people breaking the regulations and the citations should carry a significant fine. I believe this would be a good use of resources since the damages that dogs cause can be significant. Dog owners have been given a chance to show responsibility for their pets and have, in my observations, failed notably at doing so.

Thank you for considering my comments.  
A San Francisco Biologist

**Correspondence:** San Francisco residents and their dogs are all part of a healthy community. Getting out and walking with your dog has been proven to increase mental and physical health. Reducing the places dogs can walk in the city, will increase stress, mental illness and physical ailments. Can San Francisco afford this burden when population density is on the increase?

Also, the idea that we are making a conservation effort in the middle of an urban area is silly. It is not along the shores of a major city that we should be trying to revert back to nature. But the many miles with private single family homes or housing complexes. But also, even with many people getting out and visiting the beaches, we have had little impact on the over bay and coast health. It has been big business, oil tanker spills, chemicals release into the water system and air causing environmental pollution. Not a dog running on the beach.

I wonder, too, is this just another move to keep us out. I live in the south east part of the city and one day when we tried to visit the Presidio, the entrance from Presidio street is closed off. Of course, Fort Mason entrance is open to the Marina community while we had to lose over 30 minutes making the detour. Are you sure you don't want to keep the beaches for the rich in the big condo being in the Presidio?

Long time SF resident,  
S.J. Ong

**Correspondence:** It would be a shame to restrict or exclude dogs and responsible owners from trails in the GGNRA. The taxpayers pay the maintenance for the area. It is a beautiful area and has a lot of room for various groups or individuals to enjoy. Although I no longer live in the Bay Area, I would hate to see restrictions placed on responsible dog owners to not be able to enjoy the area with their dogs. I enjoyed many days hiking and spending time on the beach with the two dogs I had then. I have always hoped to visit friends there with my dogs and enjoy the GGNRA again.

**Correspondence:** As 33 year residents of SF who have raised children and dogs in the city, my husband and I are concerned that one of the reasons we enjoy our city (we have ample space within which to exercise our dogs) is being severely threatened. Dogs are a part of what makes an environment habitable. For them to behave in a civilized manner they need to be able to get their necessary exercise. I believe that Sf is a city that prides itself on trying to make space for all comers as long as they practice reciprocity and respect the space of others. I believe that the new laws under consideration are too limiting for dog owners and their dogs and compromise the quality of life for both. This is not the city I moved to 33 years ago, nor is it the city my husband or now adult children will be happiest in if such changes are enacted.

**Correspondence:** I doubt that I have any comments to make that you have not already heard, but please add this letter to those who oppose restricting off leash dog walking at Crissy Field or Fort Funston. Although they are part of the National Park system, they are parks in urban areas where off leash dog walking is a longstanding tradition and I believe a good one. The wildlife and native plant life habitat has not been impacted so much by dogs but by people. Shorebirds used to be plentiful at Crissy Field when I walked my dog there before the restoration project and the onslaught of windsurfing, The Americas Cup and the thousands of people walking along the paths now bordering the shore. It is beautiful and I appreciate the great effort that has gone into the planting of native plants, but I don't believe it has really improved the area for wildlife.  
I ask that you please leave the off leash dog walking areas intact

**Correspondence:** As a responsible and proud dog owner, and a voting tax payer, I implore you to reconsider banning off-leash areas in GGNP. In particular, my dogs and I use Fort Funston on a very regular basis it is almost my only exposure to parks and a significant portion of my personal hiking and outdoors time. My dogs enjoy the outdoors, and I enjoy the outdoors with them. If part of the mission of our parks is to allow Californians to enjoy the parks, then making fewer and fewer parks unfriendly to dogs and dog owners then you are excluding more and more of the human population.

In fact, every time I have out of town guests I take them to Ft. Funston, which I call the greatest dog park on Earth. All of my guests have marveled at the beauty of San Francisco and California at this park. Please don't take this away from us.

Thank you,  
Cara Meverden

I'll leave with one final thought. You seem to be hell-bent on banning dogs on the trails and beaches in and around GGRA in Marin County, but I don't see any mention of banning horses from the very same trails. Horses do far more destructive damage to the trails than dogs, with these 3,000 lb. animal's hoofs eroding the trails, not to mention the large mounds of shit that is left behind by their owners/riders. I myself use these trails to run and hike, and I find it very annoying that I have to be subjected to stench, health hazards, and inconvenience, of the enormous quantities of horse shit. You need to get (pardon the

expression) your heads out of your asses before you start to effect the lives of Marin County residents, who appreciate the environment they live in, and quite frankly pay quite the premium to live here.

**Correspondence:** I commend you for your exhaustive, comprehensive approach to this challenging issue. I don't envy your having to try to appease all the various groups and their respective passionately held opinions, so thank you for your efforts.

As a dog owner, I can certainly appreciate the benefits of enjoying the beautiful outdoors with one's pet dog(s). But I must say that I have seen too many instances of irresponsible dog owners who don't adequately manage their pet, be it picking up the waste or keeping them under proper control. I can certainly appreciate that there are people who are afraid of dogs or who simply don't want them in certain areas of NPS areas. It is also my strong sense that we are dealing with a very fragile ecosystem that is being subjected to ever increasing use, one that deserves more than less protection.

Though I love dogs, I am even more of a nature lover. There are, after all, other alternatives other than NPS territory for recreating with one's pet dog(s). Thus, I support Alternatives C and F. C is my first choice, F my second. I think the ability to effectively enforce whatever policy is chosen should be a major deciding factor; there is no point in choosing an Alternative that can't realistically be enacted, especially in this era of governmental budget cuts.

My main observation, however, is that the Dog Management Plan document is simply overwhelming. I can't imagine how anyone has the bandwidth to really take in all this information. Unless one is an attorney and used to dealing with such massive documents, I don't think the average person can absorb it all. Perhaps a summary document with the important points and summarized options would be useful.

Thank you again for your efforts.

**Correspondence:** Ocean Beach should be completely off-limits to dogs since dog owners consistently refuse to leash or clean up after their dogs and the GGNRA lacks the means to enforce leash and dog feces laws. Dogs off leash regularly harass people, other dogs and wildlife. The NPS has failed to provide adequate signage to inform dog owners of their responsibilities and the fines are too low to make an effective impression.

Dog feces are a public health hazard. Children playing on the beach are constantly exposed to this hazard. Owners do not clean up after their dogs and there is little or no enforcement.

Dog owners seem to feel as though they are exempt from the law and that they have special privileges. There are many responsible owners, but as in many other cases of the abuse of the commons, irresponsible dog owners ruin it for the rest.

I have often approached dog owners whose dogs are off leash in areas that are off-limits and whose dogs are left to harass wildlife. The responses range from ignorance (feigned or other wise), which is due in part to a lack of signage, and outright hostility as if their dogs have some kind of inalienable rights.

Dog owners have only themselves to blame for restrictions on their dogs. As a group, they have shown a lack of respect for the law, understanding of the impacts of their dogs on wildlife and the failure to police themselves.

The GGNRA is an invaluable resource for all to share. Those who fail to abide by common courtesy and personal responsibility have forfeited their rights to bring their pets to this common space.

Thank you for the opportunity to comment on this important issue.

**Correspondence:** Our family respectfully requests that GGNR not restrict access to Muir Beach to dogs off leash. There are so few places where we can let our little guy run free. We do not have a yard for him to run. He is a 10 lb. dog that is terrified of big dogs, so taking him to dog parks is not an option for us. Muir Beach is one of the only places he can let his doggie spirit out. We are conscientious dog owners and always clean up after our dog no matter where we are. In this age of computers and other electronic distractions for kids, taking our dog to the beach with our 13 year old is one family bonding experience we don't want to lose. Thank you.

<b>Correspondence:</b>					

I am writing to ask you to please not implement your new dog management plan. This updated plan will still dog areas by 90% ad will have a very negative impact on the Bay Area. People need areas to walk their dogs, where will we be able to go? Any remaining areas will be completely overrun.

I had hoped that this new plan would be an improvement over the original GGNRA dog management plan, because of the overwhelming opposition to the last one. This new plan, however, ignores what the vast majority of people say they want.

The SEIS plan will ban people with dogs from 99.9% o the GGNRA's 80,000 acres. There is no way that one can say this plan is balanced or fair, since it denies dog-walking access to hundreds of thousands of people in the Bay Area who have dogs.

There is no credible reason why people with dogs are not allowed to have adequate and reasonable space to walk them in the vast area that comprises the GGNRA.

Are there no dog lovers in the National Park Service? Is there no one there that understands the joy of enjoying the outdoors with your pet? It would not be such a hardship if there were a number other places in this area to go to but there are not. Can't your mission include finding a reasonable way to serve the needs of such a large portion of the people who live and visit this area.

It would seem to be a much more reasonable strategy to work with dog people, who I know could be an important resource for contributions and volunteers to help maintain the parks. Instead of alienating a large portion of the population why not work with them. Instead of having meetings where there is no real discussion why not have meetings where all points of view are listened to. Making so many people so angry does no one any good.

Isn't it possible to have some of the plans discussed be at least remotely acceptable to dog lovers? The way it is now the Park Service is pretending to listen and to have public comment but you must know you are not fooling anyone. The way you are acting just doesn't seem like what I have always thought the Park Service to be. Are Park Rangers no longer the friendly and helpful people I have always known? How will I be able to be able to enjoy getting my national park passport stamped in parks across the country after being treated like this?

Please reconsider what you are doing and the way you are going about it. There has to be a better way.

**Correspondence:** Please, please do not change the leashed areas at Ft. Funston and Crissy Field. They are two of the few places in/near San Francisco where we can take hike with our dogs and let them play freely. It's really unclear why the GGNRA is striking out against the people (dog owners) who use these areas the most. Instead you should be restricting bikes on these paths that are so heavily used by pedestrians, runners and owners walking their dogs. The rental bicyclists - who usually ride without helmets - are the real threat.

Crissy Field and Ft. Funston should be kept off-leash friendly. Otherwise, I don't know what my taxes and donations are good for.

United States of America**Outside Organization:** Unaffiliated Individual**Affiliation:****Received:** Jan,05,2014 17:19:28**Correspondence Type:** Web Form**Correspondence:** Dear GGNRA,

I am writing to request that you not make changes to the 1979 Pet Policy in the Golden National Recreation Area. This area was established to provide outdoor recreational opportunities to people who live in a densely populated urban area. The management approach should be one that reflects the number of residents and visitors who use this easily accessed area. With easy access to this area of our "backyard", we are able to regularly (and responsibly) enjoy the beauty of Marin and the company of our four legged companions.

It is important that you consider that the SEIS alternatives will instead require us to drive to other Marin areas to walk our pets. Existing traffic already impacts the ease of travel and the congestion and pollution we experience. We do not need changes which will make travel worse.

Please consider you actions in making this important decision.

Thank you.

Sally Peck

I strongly oppose Alternative F to further restrict dog access. You are wasting your own time and

---

everyone elses, not to mention the probably millions of tax payer dollars you have already wasted by dragging out this issue. Why do you feel the need to further restrict access to dogs when it is already severely restricted? Do you really think this would be an improvement? GGNRA was founded as a recreation area for a reason and it is near a major metro area, its not exactly pristine wildneress.....it doesn't take a million dollar study to figure out that one... Are you planning on restricting horses from using trails also?

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog on the Miwok trail and to Muir Beach

Dogs are already off-limits on over 99% o the Golden Gate Recreation Area. **Correspondence:** I strongly feel that there should be strict rules and regulations what goes to walking dogs off leash, but more importantly they have to be enforced.

As a mother of two young children it worries me a lot when I see a dog (once it was a pitbul) running towards the park where my children play and the owner 20ft behind talking on the cellphone! No matter if an owner thinks his/her dog is the friendliest dog in the world it's an animal and it is unpredictable! I love dogs, but some owners think their dogs have more rights than my children!

**Correspondence:** Hello,

I am very happy to hear that wildlife will be protected by requiring all dogs to be leashed in certain areas. More and more often, I am finding dog owners to be irresponsible with their pets when in public: leaving feces on trails, allowing boisterous dogs to approach small children; on 1/1/14 I saw unleashed dogs starting to chase after a bobcat just across the street from the Oakwood Valley Trailhead (in Tennessee Valley). My preference would be to have NO dogs allowed in areas where wildlife is commonly present, but barring that, to have all dogs leashed at all times.

Thank you,

A Mill Valley Resident

**Correspondence Type:** Web Form  
**Correspondence:** When those without dogs and those with dogs share public space problems can and do arise. My experience has been that irresponsible dog owners are to blame for most of the problems. My comments focus on the things I think the plan should address to mitigate these shared use problems. Banning dogs from public space is NOT the answer. Addressing the irresponsible owners is the answer. The best the plan can do is have a state employee stationed at each spot to walk and monitor dog owner activity and issue citations and/or park bannings for irresponsible ownership.

I am a dog owner. We enjoy twice daily outings in San Francisco because the exercise and variety is good for my dog and his well being (and mine). Before I got my dog I read about dog behavior and dog

---

ownership. When I got my dog, we went to training sessions. My dog is well mannered and on voice command because of the time I put into understanding him and training him and because I watch him when he is off leash. We frequent many SF area open spaces and trails including Land's End, Chrissy Field, Ft. Funston, Mt. Davidson, Bernal Hill, McClaren, Candlestick Pt., Golden Gate Park and many others.

Since I take my dog out twice a day, and have for 7 years, 365 days times 2, times 7 years is a lot of times out to see what goes on at off leash parks, the legal off leash spaces and the not allowed off leash spaces. Problems I see with the dog people vs. the no dog people, are without exception, the fault of the dog owner who acts irresponsibly in the off leash space: Chrissy Field is the perfect example. If there was a park officer walking the premises, maybe owner behavior fines and proof of dog training certificates would encourage irresponsible owners to be more aware when they are in public spaces.

Please, do not eliminate off leash space at ALL locations. Chrissy is used by walkers, joggers, picnickers, bikers and dog owners and dog walkers. Maybe off leash restriction would make sense there. All other above mentioned places are used by dog owners and walkers and not others, like Chrissy. Incidents of shared space problems do NOT occur at the other places, because they are primarily used by hikers with no dogs, and dog owners and walkers with dogs and these groups cohabitate well without incident.

Please do NOT simply eliminate off leash space for ALL locations. If the new plan cant finance dog officers issuing citations for bad/irresponsible human (dog owner) behavior, please at least limit off leash in areas where the problems might exist: at Chrissy.

Thank you

Rachel Smith

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach, Stinson Beach, Rodeo Beach etc etc..

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** I applaud this version of the dog plan. I appreciate the park service's efforts to find ways to make the GGNRA accessible and enjoyable for everyone and strongly support the idea of keeping some parts of the GGNRA available to those who seek a dog-free experience.

Off-leash dogs have jumped on our children, trampled our picnic blankets, and have deposited dog waste in many areas of the GGNRA, including places where dogs are supposed to be kept on leash. As well, I see people and dogs trampling in protected snowy plover habitats despite clearly posted signs and fences.

I know that the park service is attempting to provide for a balanced use of public land. The current balance of use has swung too far in favor of damaging use by both dogs and people, and I appreciate this attempt to make clearer distinctions about which areas are and are not suitable for off-leash dogs and for people.

**Correspondence:** I rescued a large dog 2 years ago, and live in the Glen Park neighborhood without a yard. I was able to adopt my dog in this situation with the understanding that I had many public areas where I could run my dog to provide her with enough exercise to keep her healthy and well-behaved.

---

If 90% of the areas are closed under the new laws, the remaining areas will become very crowded and overburdened and likely no longer a good place to take my dog. I may be forced to move out of San Francisco.

We walk in designated off-leash areas 4-6 times a week at Crissy Field, Fort Funston and McLaren Parks.

I do not see where in the SEIS there is conclusive scientific data showing that dog walkers and owners are causing damage to designated off-leash areas, which means there is no legitimate or legal foundation for these policy changes. The plan doesn't differentiate between impacts caused by humans or other animals. It just assumes all the negative impacts are caused by dogs.

The GGNRA is an urban park, not a wilderness area. Its critical recreational open space for a densely populated urban area. By severely reducing off-leash dog walking, the GGNRA is in violation of its enabling legislation that allows different user groups to recreate.

I support the NO ACTION alternative and ask that you rather enforce the existing (and adequate) rules to manage dogs.

<b>Correspondence:</b>	I want to strongly endorse the off-leash police for Chrissy Field out to the Golden Gate Bridge, Fort Funston and other dog walking areas. I use these regularly and have never experienced either any aggression or Litter. Most dog owners are very grateful for this urban resource for their pets and behave in a responsible manner. Let the community enforce the dog management as stakeholders. We want orderly parks - with no rangers and citations. These areas are vital to San Francisco quality of life and pose NO problems. If it isn't broken, don't fix it! The animosity and expense of policing this activity would be very bad for the NPS image. This is not wilderness. There should be rules for high density urban situations and others for wilderness. I am a native, tax-paying citizen, who cares about keeping as many areas "off-leash" as possible. It would also be great to have bigger paths to walk along the bay. Now there are strollers, old folks,				

---

bikes, joggers and scooters. It gets pretty full. .  
Thanks for your consideration. Ann hatch

**Correspondence:** As a dog owner who had a wonderful, uneventful off-leash/under voice control walk with my dog at Fort Funston just yesterday, as well as a wonderful New Year's Day walk at Crissy Field, I cannot for the life of me understand what problem exists. At the same time, I did read the report of impacts made by off-leash dogs in environmentally sensitive areas, and the complaints of those who have been harassed by dogs. People, dogs and the existing natural life co-exist right now. Some people with dogs are irresponsible and let their dogs run wild and harass people, but the majority of dog owners are responsible and considerate.

The benefits of having open space (and especially on beaches like Ft. Funston and Crissy Field) available to off leash dogs is critical. Dogs, and especially medium to large dogs, need that kind of open space exercise; they do not get it from on leash walking or off leash in tiny enclosures. Dogs that do not get sufficient exercise can potentially become more dangerous, quite frankly.

Even if you put dogs on leash in some of these natural areas, people and dogs will still be there, so the natural bird life is not likely to use the space any differently with dogs on leash. I have never seen any incidents with a dog being out of control, so I can only imagine that this situation is about as common as humans breaking the law - it happens, but not constantly and not with the majority of the population.

I would support there being hours in certain areas during which time dogs under voice control are allowed in the areas where this is currently allowed and prohibited during other times. The truth of the matter is, a compromise is needed. Human beings are also dirty and destructive of habitat and some of them can be quite hostile and dangerous. We simply have to prosecute those who break the law rather than preemptively punish all those who are good and law-abiding. Otherwise, by this logic, we shouldn't allow human beings to use the NPS either.

My dog is the reason I regularly get out to these parks, and I know that is true for many others. I love these parks and want to support them and maintain them. I would even pay a dog license fee to help fund clean-up and habitat restoration if that would help. But please do not go on-leash everywhere all the time. That would be a catastrophic decision that will cause lots of battles and folks will simply break the law, which will cost the NPS more money trying to enforce and punish. A compromise that brings everyone together who loves the parks and it's wildlife, including dog lovers, is the path towards a sustainable and harmonious future. The dogs are not going away, but neither should they run free everywhere, and it costs money to manage their use. There is a path through this that can come close to making the majority of

people reasonably happy. Sensible compromise!

Thanks for taking this response.

Sincerely,  
Nicole Grindle

**Correspondence:** Baker Beach and Fort Funston are tremendous resources for all San Franciscans, but especially for responsible dog owners. It is well-known that dogs outnumber children in San Francisco, and based on the current housing trends, I would guess that most of these dog owners are live in cramped apartments, often with no outdoor space.

For many dogs, walking on-leash is simply not adequate exercise for keeping a dog healthy, both physically and mentally. For our dog personally, unless we traverse the entire length of the city, it is not the most effective form of exercise. A dog that is not well-exercised does not only affect his owner, but society at large. Many behavioral issues such as aggressiveness, boredom barking, and anxiety directly correlate to a lack of adequate exercise. Off-leash areas, specifically large areas such as those at Baker Beach and Fort Funston are essential to keeping dogs well-exercised and sane, leading to fewer anxiety issues, and better socialization interactions with both humans and other dogs.

Personally, my husband and I have been taking our medium-sized, trained, and very active dog to Baker Beach for over 4 years on a twice weekly basis. We live less than 5 minutes away from the beach by car, and are thankful every day we are able to go. Whenever we do go, the beach is often fairly empty. We always pick up after our dog, dispose of our trash properly, use voice commands to maintain control over her, and are respectful of others at the beach, be they families, tourists, crabbers, or other dog owners. We know they enjoy Baker Beach as much as we do.

While I understand the environmental and social concerns for this proposal, I do feel a significant number of this city's population would be negatively impacted.

With respect to the Baker Beach proposal specifically, I would support Map 12-E (Alternative E), which maintains a regulated off-leash dog area in the South Beach area. This appears to be the existing rule according to "Dogs on the Beach: A Review of Regulations and Issues Affecting Dog Beaches in California" (Lisa K. Foster, May 2006, <http://www.library.ca.gov/crb/06/06/06-006.pdf>). This is also where we tend to take our dog anyway, as it is typically not that populated and enclosed at the end.

I would also propose clear signage to encourage responsible dog ownership (i.e., using voice commands, picking up after your dog, and being mindful and respectful of other visitors). For those who are mindful or law-abiding, I do believe such signs would be helpful generally. Those who are not law-abiding or have ill-behaved dogs, will likely do what they want regardless of the rules, meaning an on-leash law would be useless anyway.

Having had off-leash access to these areas for many years, I believe it is unlikely that this proposal will have an effect on the behavior of the dog owners of San Francisco. However, I do believe some compromises are possible. Please do not take away one of the greatest and important resources San Francisco dog owners have.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	As a San Francisco homeowner, public school parent and dog owner, I am very much against the proposed "Dog Management Plan". It's not our dogs that need managing - it's our irresponsible citizens and our elected officials that believe they can make changes to services we pay for and desperately need, to please a few and without asking all of us. If I cannot stand there during the meeting, will my voice even be heard?				

As a homeowner, I would not want you to decide to arbitrarily cut down a tree in my backyard because falling leaves impact the yard of my wealthy neighbor.

As a parent, I would not want you to decide my child is damaging the schoolyard grounds with their sneakers so they are to kept inside all day.

So as a dog-owner, why would you severely limit the places I can take my dog outside to play in the water? Are they not animals also?

Are dogs ruining these coastal areas? Are you sure?? Why not ban children as well? Elderly adults? Those that illegally fish in those areas? Are you punishing the masses to benefit a chosen few? Who not section out the areas we can use for different needs, rather than a blanket ban against one particular group?

Additionally, regulate dog-owners and dog-walkers who have more than 4 dogs at a time, so they can easily monitor the dogs they have.

I welcome more discussion on this topic so we can all come to a mutually beneficial decision and share our waterside spaces!

**Correspondence:** This plan is not well thought out at all, and does not seem to take safety considerations into account. Dogs need safe designated areas in order to run off their excess energy (from being cooped up in houses, living in a metropolitan area) and to learn socialization skills in a non-threatening space. Dogs who do not get enough chance to run and play become nervous, making them aggressive with not only other dogs, but people as well.

Please at least consult with someone who 1.) knows about dogs and 2.) doesn't hate dogs, and then revise this terrible plan!

Thank you for your time.

Rebecca Coolidge

**Correspondence:** To Whom it may concern:

re: GGNRA

I am a lifelong resident of Marin County, and have been blessed to make the Golden Gate National RECREATION Area, Mt. Tam, the headlands, Muir Beach, Rodeo Beach, and the many trails surrounding the area my backyard. These areas were set aside for public recreational use. Although we consider it to be equally as awe inspiring as Yellowstone or Yosemite, this area is very different and has very different uses which have been in harmony with the area for decades.

I am writing regarding the changes that were made in the 2013 SEIS, and that fact that they absolutely do NOT address the criticisms and concerns expressed in the comments that were filed in 2011. Please let it be noted that the 2011 comments were overwhelmingly (3:1) against this plan.

The SEIS has no peer-reviewed studies specific to our sites. It contains no information on vital monitoring (as required by law) to make such a significant change to the public's use of this public land.

Muir Beach has always been a favorite destination for our family (including our dogs). The GGNRA should retain the longstanding 1979 Pet Policy. The GGNRA is a recreation area and the citizen's of Marin have been excellent stewards of the area. I appreciate that the National Parks need to mandate certain things countrywide, such as accessibility, but each park should be considered in the context of their environment. GGNRA is special and unique and should not be treated like Yellowstone or Yosemite. This is a special park near a populated area and requires an altogether different management approach than other National Park Wilderness areas.

Thanks you for your consideration of this matter.

Please do not put my name on any mailing list.

Sincerely,

Lisa Williams

**Correspondence:** Dear GGNRA, please just leave things as they are. No harm is being done and everyone is happy and can walk and play with their dogs in beautiful places that belong to everyone, dog people as well as non-dog people. As a wheelchair user I in particular need places I can drive my dogs to and just let them loose to run and run and run and play and play. Dogs need fresh air and space and currently there is plenty of this around San Francisco. Unfortunately for some reason the GGNRA have decided to curtail, severely, what is currently available. Who is not happy? Only the GGNRA. Who for some reason do not want dogs on "their" property. But it is not "your" property. You are merely the current stewards of the land and should be providing it on a freely available bases for all to use. Including dogs and their owners. I look at your proposed maps and it makes me cry. I can't bear to see how much you want to take away and how much of nothing you want to leave for myself and my dogs. Shame on you. Instead of taking away why can you not provide more and better facilities. But I doubt you will and I shall be forced to seek somewhere else to run my dogs. I shall miss the spaces and the views and the walks and so will they.

<b>Correspondence:</b>	Why are you removing more and more of the freedoms that make Marin such a fantastic place to live?				

This county is famed for its walks, views and open attitudes. Yet one by one these freedoms are being eroded away. The very things that drew its residents and tax payers here are now being eliminated, so that life here is no better than in the cities we left?

Dogs (of which there are more than children) are part of those freedoms and environment we pay for and protect. Already the options to walk off-leash with dogs is limited, yet again and again GGNRA continues to remove those options. This recent series of restrictions is just too much. The latest recommendations - without peer review are going too far for those responsible pet owners who love and support the countryside we live in. The SEIS initiative contains insufficient studies and monitoring and is bad for dogs, owners and the environment, as we will be forced to drive further and further afield to find alternatives.

Please take no further actions to restrict the choices of dog owners in this area. Keep Muir Beach, The Marin Headlands, Homestead and Oakwood Valleys accessible - please take the No Action Alternative and keep our open spaces, truly open for all who use them - and pay their taxes to do so!

**Correspondence:** Please keep Fort Funston open for the dogs. San Francisco has plenty of open space for people to roam.. Healthy dogs need to run free. The city parks will be overwhelmed and destroyed if the footprint if the GGNRA becomes smaller and smaller. Regulate dog walkers and fine people who let their dogs run out of control.

**Correspondence:** In reference to Oakwood Valley, the Miwok trail and Muir beach the preferred alternative , alternative F, is overly restrictive, contrary to the recreational intent of GGNRA, dismissive of historic uses, over reaching and supported by assertions rather than facts.

The legislation which created the GGNRA states, in part; The objective of H.R. 16444 is to assure the preservation of open spaces presently prevailing within the proposed recreation area, to provide public access along the waterfront, and to expand to the maximum extent possible the outdoor recreation opportunities available to the region. Please note the phrase "maximum extent possible". Restricting areas where dogs are allowed and requiring leashes in areas previously allowing off leash is clearly contrary to the intent of establishing legislation. Alternative F clearly reduces outdoor recreational opportunities.

The Oakwood valley area and Miwok trail from Tennessee valley to highway One is frequently populated with dogs and their owners. On many days, more than 50% o users have dogs. I have been walking, hiking and biking these trails for 26 years both with and without dogs. I have never had any incident with a dog, nor seen a dog harassing people or wildlife. Most of the users in the area are residents of the area and if like myself moved to the area because of numerous available recreational activities including dog walking. To restrict the use of areas adjacent to suburban areas adversely impacts those who make greatest use of said areas. We are stakeholders, with a long pattern of use whose use of areas with dogs has not been demonstrated by SEIS to adversely impact other users nor wildlife.

The citing of various studies where dogs affect wildlife may be applicable to a national park such as Yosemite but fail to consider multiple uses of an urban park. The GGNRA is not a wilderness, it is an urban park, historically used and abused by the military and ranchers. Allowing historic uses in regards to dogs strengthens the community of stakeholders, fulfills the intent of those who were instrumental in establishing it and is consistent with previous NPS policies.

**Correspondence:** Please, please don't take dogs away from Muir Beach. My husband I got married there in 2002 because it was simply gorgeous and because we could bring our dogs to be part of the small wedding party. It was the most beautiful sunset wedding I can imagine and everything I hoped for, then we stayed at the lovely Pelican Inn (we had sitters for the dogs that night). Please don't take the opportunity away for others to have such a joyous wedding! Twenty years from now I can only hope our son will be able to bring the woman he loves, a few friends and a dog or two to Muir Beach and create the happiness we all have now. Spread the happiness! Please!

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Fort Funston. Anyone who gets into their car with their dog and drives across the city is already much more likely to be a responsible dog owner and I have never seen any of the issues described in your letter.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

**Correspondence:** I applaud GGNRA for putting limitations on dogs in Marin...though the proof will be in the enforcement. Currently I feel that every natural or public area we go in Southern Marin or San Francisco (even those where dogs are not allowed or are only allowed on leash) is overrun with dogs off-leash. If you plan to increase leash laws, what are the plans for enforcement/fines?

I have a 2-year-old who loves hiking on his own. We go to GGNRA areas frequently, but lately there have been several incidents where we were walking and without warning an off-leash dog has come bounding up to my son, jumping on him or stomping on him or just surprising him before I could make an appropriate doggy introduction or pick him up out of reach- -while the dog's owner has ineffectually shouted "he's very friendly!" from far away. I have tried to downplay the incidents in my son's mind, but the result is that now he is scared of all dogs and runs screaming from them. (I hate to think if any of these

dogs had actually been unfriendly or aggressive toward him!)

If there is an area where off-leash dogs and children are both present, the dogs always win, and the children always lose (from incidents where dogs scare/injure children to dog poop that hasn't been picked up). There needs to be a balance of uses.

Dogs are beloved members of families and communities, but they are not people, and their "rights" should not trump the rights of the humans to safely enjoy at least some public or natural spaces. Nor should they trump the rights of endangered or threatened bird, butterfly, or plant species or native habitats, all of which have been here much longer than either the dogs or the people.

Consequently, I support the most stringent restrictions on dogs being considered in Marin, and those most protective of the natural environment. I also strongly support adequate enforcement. I hope you will provide signage and online information educating people about who they should call or what they should do if they see dogs on- or off-leash where prohibited. Otherwise, GGNRA's bark will be worse than its bite, and off-leash dogs will continue to run rampant over our precious natural areas.

<b>Correspondence:</b>	Recently I was walking with my 4yr old son on the beach at Chrissy Field when suddenly a wet, slimy tennis ball struck me in the head. A woman with one of those ball throwers (the thing dog owners use so they don't have to touch the slimy wet dog ball) approached, but didn't apologize. Instead she told me i shouldn't be walking with my son in that area because it was for dogs.				

Last I checked the dogs aren't paying the taxes that keep our national parks open. Why then should they get to run free to kick sand on picnics or knock over small children while everyone except dogs and their owners suffer. There are plenty of spaces for dog walking that don't disturb the public. Please restrict dogs from our national parks.

<b>Correspondence:</b>	Although we no longer have a dog, we did for many years when our children were growing up. Dogs can be good teachers of values that we want our children and residents to have, especially responsibility and being able to connect emotionally and for many people, they contribute to emotional stability and happiness.				

Having a dog is part of the Marin lifestyle for many. People aren't going to just get rid of their dogs if Alternative F is passed, and restricting all those existing dogs to such a small area is bound to create problems of over usage as well as dog conflicts. Additionally, dogs without sufficient exercise and freedom can be aggressive and are certainly not as happy or acceptable as well-cared for dogs who are allowed to have a reasonable amount of exercise and freedom.

Dog ownership is of critical emotional value to many, especially single people, children, and seniors. Proper ownership of a dog requires space to allow the dog to run and socialize with other dogs. Dogs also encourage people to get out and exercise, something that is repeatedly emphasized as being critical to the emotional and physical health of people.

For all these reasons, I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative. RESTRICTING DOGS TO SUCH A LIMITED AREA OF THE PARK IS IRRESPONSIBLE AND UNNECESSARY!!! If dogs are creating problems for the GGNRA or other people using the park lands, design solutions that address those problems such as heavy fines for not picking up after their dogs. Don't throw the baby out with the bath water!!

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park. Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

<b>Correspondence:</b>	To Whom it May Concern				

I am writing to inform you that I support Alternative A, the No Action Alternative.

Please note that I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA.

I regularly take my two dogs to the different GGNRA trails and beaches in Marin County. My dogs need the ability to run freely to control their energy levels and maintain their mellow personalities.

Dogs are important companions for a large part of Marin's population, and it is hard for many Marin citizens that dogs are already off-limits on over 99% of the Golden Gate Recreation Area.

It would vastly impact the recreational option of dog owners and their pets to eliminate or further restrict the remaining 1%, which constitutes a dramatic restriction of the public's use of our public lands.

I understand that the GOLDEN GATE NATIONAL RECREATION AREA was established to give outdoor RECREATIONAL opportunities to people in a densely populated urban area. Such an area requires a different management approach than wilderness areas like Yellowstone or Yosemite.

The SEIS preferred alternatives you have put forth force people into their cars, in search of places to walk their dogs. This is bad for the environment and bad for Marin County.

Please stay with Alternative A, the No Action Alternative, to support the needs of a large part of the

Marin County population that owns and loves their dogs in the 1% o the GGNR in question.

Thank you, Vera Sparre

**Correspondence:** I understand the comment period for the controversial GGNRA Dog Management Plan is coming to a close next month. As a dog owner in San Francisco, I'm writing to strongly urge dramatic amendments to the Plan to support the continued use of the GGNA.

I'd like to add my voice to those who strongly believe that making the Bay Area less dog friendly by restricting off-leash areas is a terrible idea. The overwhelming majority of Bay Area residents are responsible dog owners, and only use off-leash areas for dogs under voice control and without behavioral issues. And, the negatives to restricting off-leash areas dramatically outweigh the positives. I found the comments and statistics by a San Francisco dog advocacy group to be quite persuasive. A list can be found at <http://www.sfdog.org/content/tips-writing-ggnra-comments>

My wife and I make use of Fort Funston and Chrissy Field weekly to exercise our playful and friendly terrier; the joy it bring our family is a highlight of any week. I strongly urge you to take whatever action you can to make sure the voices of the thousands of responsible San Francisco dog owners are heard by the NPS and GGRA.

Please help us keep San Francisco and Bay Ares dog-friendly.

Warm regards,

Matt Gubiotti

**Correspondence:** Please leave the rules they way they are and have been for years. I'm particularly interested in allowing off-leash dogs on Oakwood trails, Muir Beach, and Rodeo Beach. I am dismayed by the disconnect the NPS seems to have.

GGNRA is a recreational area in an urban/suburban area. While I want to preserve the environment, I also see this area as a park, not a nature reserve.

In addition, at the same time GGNRA uses "preserving the environment" as a reason for not allowing dogs off leash (without any scientific evidence that dogs have actually harmed anything), the park service

---

continues to greatly disturb the environment with paved parking lots, proposals for more paved parking lots, concrete restrooms, and by finding ways to bring more and more people into the park. The people walking dogs in Oakwood Valley are neighbors for the most part who have a keen interest in preserving the area they use daily. However, as the park service continues to "improve" the trails and promote them, we're seeing more and more tourists - people who visit once and are less interested in the future of the area. As more people come, more "improvements" happen. I wouldn't be surprised to see the park service eventually pave that precious meadow on Tennessee Valley Road - the one they worry about an occasional dog disturbing - and run shuttle buses to the trailhead. By focusing on putting dogs on leash in the remarkably few areas dogs are allowed at all in GGNRA, I think the park service is looking at a tree, not the forest.

**Correspondence:** I have been at Stinson Beach for more than 30 years, and strongly encourage you to continue banning dogs in the beach area and ban a dogs in any other areas where they are now allowed. Everywhere I walk in Marin, dog owners abuse their privileges by allowing dogs to be off leash and run free. The beach is for people, not dogs. Dog owners have consistently abused their privileges by allowing dogs to chase and bark at after beach walkers ("Oh, she won't hurt you, shs nice"), and to poop on the beach and in the water. For health and safety reasons, please continue to ban dogs in the park and adopt the strictest policy possible anywhere you have authority to do so.

**Correspondence:** To whom it may concern,

Thank you in advance for considering my opinion. I know that a lot of thought has gone into Alternative F and the overall dog management debate. However, I strongly oppose Alternative F. Instead, I support Alternative A, the No Action Alternative.

My wife, our dog Hazel, and I recently moved to Mill Valley because of the easy access to GGNRA trails that are dog friendly.

Because dogs are already off-limits on over 99% of the GGNRA, there isn't any compelling reason to eliminate or further restrict the remaining 1%. Furthermore, there seems to be a complete lack of peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The GGNRA was established to provide recreational activities to local residents in a densely-populated area. Residents of Marin County, like our family, rely upon this open space on a daily basis. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** I support the "No Action Alternative" in the 2013 SEIS for Muir Beach, and request that GGNRA keep the long-standing 1979 Pet Policy.

Muir Beachers with dogs want to continue to recreate together in our adjacent Golden Gate National Recreation Area. This ability is a feature that has always drawn neighbors to live in and love our special town.

Banning us from what's right outside our doors, and forcing us to drive to some other place that will be crowded and is 30 or 40 minutes away so that we can try to play and run with our dogs makes no sense for the environment, the roads, the dogs, us or that other place!

**Correspondence:** I am shocked and dismayed to learn that there are current plans to reduce off areas in Golden Gate National Recreation park by 80%. As a 5th generation San Francisco native, this defies one of beautiful elements that comprise our San Francisco culture. With more dogs than children in this city, San Francisco's liberal and respectful animal practices are what draw many people to this city. My experiences with my family (i.e. my dogs) and the ability for them to run free in many areas, is what

---

makes my existence here so spiritual and unique.

Dogs on leashes, all of the time, with no outlets, are not happy dogs. This will create undo stress for the dog, the dog owner, and the community at large. Please refrain from altering one of the major staples and joys of our city. The impact to our city's reputation and growth is at stake.

**Correspondence:** Hi -

I have a dog and live in San Francisco, very close to Baker Beach. I'd like to request that you keep the current off-leash allowances on Baker, Crissy, and Fort Funston. One of the wonderful things about living in San Francisco is our ability to take our dog to certain areas in the GGNRA. We're very respectful of the many places where dogs are not allowed, but really value those few places where they are welcome. There are even fewer places where they are allowed to run and play off-leash, and the beaches I mention are some of those which are left.

Thank you for your consideration,

Fiona Smythe

**Correspondence:** This letter is being written to respectfully express my strong opposition to Alternative F, the preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I wholeheartedly support Alternative A, the No Action Alternative.

We regularly take our dogs to Homestead/ Four Corners; Oakwood Valley Fire Road and the Miwok Trail from Country Road. Our dogs desperately need places where they can run and be outdoors. Losing access or off-leash access would pose a major hardship to the quality of our dog's lives as well as countless other residents. We have been using these trails for over 20 years and as with nearly all dog owners we encounter, are highly respectful and protective of the environment- including clean-up of waste, keeping dogs on leash and on trails, and being very conscious of keeping dogs away from any children or adults who seem uncomfortable. In all our years, we have never had any incidents- and in fact, have found dog owners to be highly aware of taking control of their dogs.

While we certainly acknowledge that some people especially children may be scared of dogs and that there are some irresponsible dog owners, we strongly feel that there can be some provision to assure that all dog owners have had some obedience training classes for dogs.

In addition, dogs are already off-limits on a very high percentage of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining very small areas where dogs can walk. As far as we can tell, there have not been any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained. It is our understanding that the Golden Gate Recreation Area was originally granted and established in order to provide recreational activities to local residents in a densely-populated area. It was set up with the intent of being primarily used by the residents of Marin County, who live in the area, pay taxes and support the local environment. The GGNRA is not located in a wilderness area like Yellowstone or Yosemite, thus necessitates a different management strategy than other National Parks.

As long-time Mill Valley residents, we would be hit especially hard by these what seem to us unnecessary restrictions. We are open to valid reasons to further protect our environment and provide safe and inviting outdoor trails and space for all Marin residents and visitors. However, these measures do not seem to address any legitimate concerns- which if presented, we could discuss other possible solutions. That seems to be the reasonable approach, one that considers not just Marin resident dog-owners but all residents.

Thank you for your consideration,  
Leah Lazar/ Glenn Fleisch

**Correspondence:** My concern is the area of East Beach of the Crissy Fields area. I use that area regularly and seldom do I NOT have an issue where I have to be on the guard for the 'Dog Racing' events. The dogs are so excited to be out and about that they begin to race up and down the beach in a small pack. The includes dogs 'checking you out' and running away with sand flying around most notably in your food. My 4 year old was terrified of the beach for a few years. She didn't like the idea of the larger dogs that were about her height checking her out. It got to the point we abandoned a number of trips based on the stress level of the dogs. I love dogs but when I'm out trying to enjoy the beach area with my family the wild racing dogs they just destroy the event for us. It would be great for any of the plans EXCEPT for plan 10-A to be enforced. Thank you for allowing me to comment on the plans.

**Correspondence:** I'm writing to express my strong opposition to the revised Dog Management Plan in the Golden Gate National Recreation Area. As a responsible dog owner and lover of the bay area's beautiful parks, I believe it is a terrible idea to limit the access of dogs in these areas. These parks are meant to be enjoyed by the public - - limiting the access of dogs in these areas will result in less use in

---

these areas, not more. We take our dog to one of these parks literally every day - - we have \*never\* seen dogs (or dog owners) not behaving responsibly. This is part of the bay area's heritage - - a way for residents and their dogs to enjoy the gorgeous area where we live.

Please don't take away something so valuable to our local quality of life. A visit to any one of these areas will show how much these dog-friendly areas are currently enjoyed.

Best,

Stephanie Stafford

<b>Correspondence:</b>	Dear National Park Service,				

Please, no restrictions on our green space. I am a long-time San Francisco resident and request that you do not implement the proposed restrictions on land use at Fort Funston, Ocean Beach, and Crissey Field. We live in one of the most beautiful cities in the world, and imposing restrictions on how we enjoy the land with our friends, families, visitors and pets will undermine our city, and create an unfriendly environment. I have a dog and live less than one block from Ocean Beach. If the proposals go through I will have to drive to a different part of the city to enjoy green space. I will be a contributor to pollution, traffic, and burden parking for residents of a different neighborhood. This proposal will undoubtedly stress the city resources. Please consider that the green space you're proposing limited access to is in an urban environment full of people and their pets. We need access to be healthy, happy, and maintain balance with our neighbors throughout the wonderful city we all call home.

Regards,  
Meghan

**Correspondence:** I'm Urging the GGNRA to keep the existing areas now dog friendly to continue to do so and maintain or allow dogs be off leash with full access to the existing land areas they now enjoy today and in the near and foreseeable future.

I meet my 75 year old mom with her dog a Queensland Red Heeler an Australian Cattle Dog at Crissy field on the weekends to walk with. Queensland Red Heelers dogs are some of the longest living dog breeds, so its important they get a good workout by being able to run freely. We have enjoyed this activity for many years. The walk takes us over 2 miles. This keeps me and my Mom healthy. With the dog off leash he can run in the sand and surf. This keeps the dogs health maintained, as we simply can not run at the proper speed needed for the dog if he had to be leash bound. For both of us its the most beautiful area we have seen and Crissy Field for us with its stunning views and landscape is an amazing place to be. Historically the area has worked well for many families and dog owners generally very respectful of each other. It simply would not be fair to the dog owners and other folks impacted who use San Francisco parks to lose Crissy Field's status as a dog friendly park. My Mother and her dog are very healthy for there age and it is because she has the dog she has to get out and walk this dog everyday. I feel this is a great social resource that can and should be shared. In my experience we have always have had good and positive time at Crissy Field. There are many good reasons to keep the park off leash dog friendly and I hope I was able to express at least one today.

My kindest regards,

Danny Ames

**Correspondence:** I am in favor of INCREASED dog access within the GGNRA in San Mateo County, both on and off leash.

I oppose further restriction of dog access and elimination of off leash areas.

Further restrictions of our open lands will reduce the quality of life we currently enjoy in San Mateo County. The areas that we are allowed to take our dogs to are already relatively few. Dog owners tend to be nature loving people who enjoy the outdoors. In many cases, they are the primary users of some of these areas. There are already many dog free options and there is no good reason to add further restrictions.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach and I have recently started hiking on a few trails, only to discover my dog is not welcome on most. This is a very disappointing situation. I moved to this area because of the availability of outdoor recreation and the dog friendly environment, only to find out that it is being taken away. In my experience so far, it is the humans, not the dogs, who create the issues in our outdoor spaces.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

**Correspondence:** I have walked my dog at Crissy Field for 9 years and think most dog walkers are responsible and considerate of the environment and fellow park users. Accordingly I think the current Option A works reasonably well and could simply be supplemented with clearer regulations and enforcement. This does not seem to have been considered.

That said understanding some modifications are desired I think Option E is the most reasonable alternative to Option A. It provides a mix of no dog, on-leash and off-leash alternatives that would accommodate a range of park users, including dog walkers with limited mobility. I think the further reduction in designated dog access areas proposed in other options including the preferred Option F could result in overcrowding of dogs in designated areas and thus could possibly cause more impact to vegetation in those areas. In addition I think the fencing proposed in Option F while making boundaries clear would be visually unfortunate and would prefer clear signage and enforcement.

**Correspondence:** I am writing to urge you to allow dogs to continue to use Muir Beach off-leash. I respectfully request that the beach area itself at Muir Beach be made a ROLA.

The justification given in the Fall 2013 Draft Dog Management Plan for requiring dogs to be on-leash on Muir Beach is the need to protect sensitive habitat (p. 113, and Table 6, p. 256). However, that report does not establish that dogs, which have been using Muir Beach under voice control since 1979, have damaged the environment or harmed wildlife at Muir Beach. To the contrary, Table 14 (p. 315) reports only one dog-related incident of wildlife disturbance over a four year period. And the beach itself has not been damaged by dogs playing there.

I can understand the desire to protect Redwood Creek, the lagoon, and the dunes. I have no objection to making these areas off limits for dogs. I also have no objection to requiring dogs to be on-leash on the bridge and path leading to the beach, as they currently are. I am ONLY talking about the beach itself, where dogs have, for years, had great fun playing, together and with their owners. Please, please, allow dogs to continue to play off-leash on the beach itself, while restricting their access to other, more sensitive areas as necessary.

Carl Shapiro

---

**Correspondence:** For over thirty years I have shared the joy of walking my dogs off-leash at Fort Funston, Ocean Beach, and occasionally at Crissy Field. This has been of great benefit to my dogs, enabling them to be well socialized around other dogs, and people. Dogs and humans interact well in these areas and I have seen or heard only a handful of inconsiderate or rude interactions in all that time; far fewer than I can experience walking down the street! Fort Funston is a place where I find community. It gives those of us who love dogs as much pleasure to watch our animals romp and play as it does parents watching their children at a playground - both delightful, refreshing experiences in a day.

Over a number of years there have been rumblings and outright threats about the closure of huge areas now available for off-leash. At first this seemed like a rumor mill but then became serious. People rallied to voice their strongest objections, and I recall being so outraged that I attended a meeting at the Officers' Club in the Presidio, along with hundreds of other people, and stood outside in torrential rain because this was so important. There seemed to be a modicum of peace for a short while and then the rumblings started again, growing ever more ominous.

My particular area of daily use in the GGNRA is Fort Funston, but I am concerned for the estimated three million Bay Area residents who have dogs living as part of their home. At this time we have about 1% of the GGNRA where we can have dogs off-leash and now that is to be reduced to .1%! This makes no sense in an area given by the City for the express purpose of recreation; recreation that clearly includes walking with our dogs off-leash. It is as if the City had given \$100 for recreation and we have been told we can only use \$1 of that for traditional recreational use. The new plan reduces that to about one cent! In whose sense of fairness and responsible management does that seem acceptable?

As I grow older I am even more in need of adequate off-leash areas to walk my dogs. Gone are the days of hiking along the streets to be able to give the dogs enough exercise. There are small areas in some of the local parks, but dogs, like people, do better when they are not too cramped together. I have three dogs, two inherited by the deaths of dear friends, and two of them are over 120lbs! They need a lot more space than the tiny wee dogs that enjoy sitting on their owners' laps.

I appeal to you to reconsider this restrictive plan for the GGNRA.

Sincerely,  
Sister Ruth Hall.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to the Oakwood Trail in Tennessee Valley. We clean up after our dog and have her on voice command off-leash, while bringing leash in hand. We have never had an incident with a hiker or runner as we pull her out of the way for others to pass. At least 90% of the individuals who use this trail are walking their dogs. Those who have dogs that need to be on-leash seem to be stalwart about keeping the dog on the leash.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely

upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Humans are a much bigger threat to the environment which you are trying to protect. They cause more physical damage to the flora and natural plantings of the GGNRA. Are you going to ban us as well?

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.				

I regularly take my dog to Muir Beach.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** Thank you for the thought and work that has gone into this.

---

As a dog owner, a small not particularly brave woman over 65, a lover of peace and quiet and beauty at the beach and when hiking, and an advocate for our natural environment - I found the document to be educational.

I am only commenting on Marin as I don't have the experience and knowledge to speak to the other areas included in this plan.

After reading the document I am left with that a case can be made for increased leashing and banning of dogs.

However, by using similar logic, an equally strong case could be made for banning (leashing?) the enormous number of noisy, messy, and often unsightly people (including banning their polluting cars and unmuffled motorcycles).

I could almost make a case for banning those smelly, shrieking shorebirds, but that is going too far.

Point is, even though we are getting more crowded and have to find creative ways to live closely together, for the most part I don't think more banning and heavy restrictions is the way to go. It is likely to produce more instead of less angry people and confrontations. Rather, I would like to aim for more opportunities and structures to support it working for everyone...humans, dogs, and wildlife.

1) Waste on the beach/more about poop than I ever thought I would have to say

A friend of mine who lives at Stinson Beach gathered all the trash on the beach for two days and took photos of the accumulation. It was disgusting. I have the photos if you are interested.

I run that beach a couple times a week with my dog and while there are occasions when I find myself cleaning up after other dogs (and cursing under my breath while doing so), the trash pick up I do is manifold the bigger job. Most of the trash is plastic (some glass and styrofoam) - and as to environmental impacts, we all know that plastic and the ocean and sea birds is a terrible combination.

Yes, even one dog poop on the beach is nasty, but providing convenient bags and trashcans makes a difference as well as posting unmissable signs that have an impact. (Eg I read that in Bristol, England they put up signs with toddlers picking up dog poop, smearing it all over themselves, and even eating it. This seems overkill but I am betting you know an advertising agent ((or can have a contest)) who'd create clever signs to effectively remind people to clean up after their dogs including perhaps mentioning a hefty fine.)

I know we already have bags and trash cans at Stinson, and despite my occasional cursing, in my experience it is working well there. If it is worse than I realize, I suppose you could add signs that give a phone number to report a description of the dog and owner any time you see waste being left (a picture of the dog and owner could even be sent via text). Since even the best owner can be distracted and miss a poo in progress, I would think first a warning then a ticket etc.

Meanwhile - even though people leaving trash is a bigger problem...I would really miss the beach if we were banned.

2) Dog walkers

My experience is that "6 dogs under voice control" is almost always an oxymoron, three is sometimes stretching it.

### 3) Noise

It seems to me that non-stop barking is no fun. Hurrah for creative signs saying so and enforcement. Loud music fits in the same category for me.

Kids laughing and yelling ...I think we should continue to allow. But who knows, if we did a phone survey maybe we'd find kids drive 56% o people crazy? I say to heck with those 56% o the people. Sometimes the majority is just plain wrong, and I think that is important to remember when looking at your survey results.

### 4) Fencing

The new fencing at Muir Beach is wonderful! In fact, all the work done at Muir recently is much appreciated and well done. In particular I appreciate the fencing, the dogs can run and not impact the wildlife or the dunes. Best of both worlds. Job well done! Thank you!

I noticed on a run by the water in Sausalito they had added a similar fence by a lagoon the birds like, and it works incredibly well. Even when my dog went up to the fence the heron and egrets close on the other side of the fence just looked at her nonchalantly and continued their feeding or dozed back off. If the birds know they are protected they seem to settle right in on their side of the fence.

I hope this attractive solution will be used wherever feasible.

### 5) Dogs scaring people

I appreciate that people can be afraid of dogs.

I am a scaredy cat. Mostly when I am hiking or running I get scared that the nice guy coming is actually a mad killer/rapist or that I will get eaten by a mountain lion (I've seen two, mountain lions that is, no mad killers) or a shark or stalked by a family of coyotes (this happened).

Like the people who avoid places because of dogs, I used to avoid places because of the fears above. With my dog I feel safe and I go where I did not before. (Though she is no use with the sharks, so I am still staying out of the water)

There are miles and miles of trails and lots of beach areas already where dogs are required to be on a leash or are banned. Perhaps we can gently recommend to people who are afraid of all dogs that they enjoy one of the many areas that are dog free or where dogs are leashed.

Any good dog owners will be responsible for making sure others feel safe around our dog(s), and there will be a few jerks who also own dogs. Let's take action against the jerks.

### 6) Dogs hurting people and especially children

This is just not ok and should legally be treated as such. This should include dogs attacking other dogs.

### 7) Protecting wildlife and natural habitats from the dogs

For the most part it seems like the wildlife is flourishing (coyotes, mountain lions, deer, bunnies, otters, hawks, certainly the gophers and moles..)

Where endangered wildlife needs protecting we should do it, eg fencing around stream beds or nesting/feeding areas when dogs are allowed nearby.

Re the Snowy Plovers - As I understand it only 4% o California's Snowy Plovers are in Marin and all of theses except one pair are safely protected at Pt Reyes and that this has been the case historically (in other words, the dogs have not chased them off).

That's it for me. You can see I feel strongly about this. Please forgive my loquaciousness.

I, like many people in Marin, live a happier life with my dog beside me. And neither she nor I would be quite the happy, quiet, friendly citizens we are with more restrictions instead of fewer.

Thank you for your generous listening.  
And please forgive my typos.

Linda

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

As a responsible dog owner, I exercise with my dog every day, come rain or shine. I regularly take my dog to Oakwood Valley Fireroad and Trail, Alta Trail, Orchard and Pacheco Fire Roads, Miwok Trail, and Coastal Trail.

â€”

I am opposed to the entire GGNRA Dog Management Policy because I disagree with its premise that dogs in the GGNRA are compromising visitor safety and damaging the resources of the Recreation Area. You have no site-specific, peer reviewed studies (required by Federal law) to substantiate the claims that dogs are a problem for wildlife, water quality or vegetation in the GGNRA.

The Golden Gate National Recreation Area was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog-walking since the original pet policy in 1979. The GGNRA is not a wilderness national park like Yellowstone and shouldn't be managed as if it were.

Again, I support the No Action Alternative!

Sincerely,  
Melanie Barti  
Sausalito, Ca

**Correspondence:** I strongly AGREE with the NPS proposal to further limit off leash dogs and areas where dogs are allowed. It is too bad that dogs spread diseases, such as the recently reported outbreak of distemper in the Tam Valley neighborhood, and are generally hard on the environment. It is high time that the National Parks started to defend the habitat within their boundaries, as the last remaining homes of many of our native species. The purpose of these parks is to preserve our natural places for future generations and these proposals are right in line with doing that. As our area has grown, we have decimated habitats throughout Marin, causing the disappearance of many of our native animal and plant species. As a long time resident of Tam Valley, I am appalled and saddened by this. Dog owners are a passionate group who love their dogs as family members and don't get it that dogs cause harm to the environment, especially off leash. I have seen all kinds of dog mischief out on Oak Valley trail and fire road, as well as Muir Beach. This includes digging, chasing animals and running through posted streams. Some owners are good about cleaning up after their dogs, but others think that dog poop is biodegradable and so it is "OK" to leave or throw into the creek, with or without bags. They don't realize that not only diseases, but parasites and medications are spread throughout the environment every time a dog leaves poop behind. Not only that, but the scent will linger and encourage other dogs to mark the same area. I know it is a difficult decision to stand by, especially under the organized onslaught by dog owners, but PLEASE stand your ground. Once this is in place, dog owners will just have to find or create other alternatives for their pets that wont destroy the public lands and their delicate environs. Thank you!

Dogs give so much pleasure to humans and it would be a shame if the owners were restricted from enjoying the out doors with their animals. Many of us would consider our dogs to be our best friends.

**Correspondence:** The SEIS does not adequately address dispersion issues. The SEIS does not adequately address the environmental and social impact of forcing large numbers of people and dogs into much smaller areas. Reducing the amount of area available for off-leash will significantly degrade the park experience for people with dogs. It will increase conflicts. Even more importantly, the SEIS does not

---

address the environmental and social impact on small, neighborhood parks in cities like San Francisco next to the GGNRA. Because the GGNRA is located immediately adjacent to one of the most densely populated areas in the United States (San Francisco), it provides much needed recreational open space for Bay Area residents. If that open space is lost to recreational access, people and their dogs will move to the much smaller city parks and they will not be able to absorb the hundreds or thousands of people with dogs each day that will be kicked out of the GGNRA. As further proof that the GGNRA did not consider impacts on city parks in San Francisco, the Preferred Alternative suggests the nearest legal off-leash area in San Francisco to Fort Funston is Lake Merced. That off-leash area has been closed to off-leash for years and has been turned into a native plant restoration area and habitat for the endangered red-legged frog among other animals. Yet this is where the SEIS suggests people with dogs go.

**Correspondence:** I am a frequent user of the Miwok trail between Tennessee Valley and Hwy 1. My family and I live near that trail and we take the dog for walks almost everyday. I walk that trail at different times during the day and I must say, if I see 3-4 people (mostly others with dogs) thats a lot of people. For the most part I go days in a row seeing nobody at all. I have no idea why you would restrict dogs on this trail. It makes no sense. In addition, Muir Beach is a great place for dogs. It isn't a beach for sunbathing and the water seems too treacherous for swimming, so walking with your dog seems perfect. Please consider the thousands of Marin families that are responsible dog owners and need a place near their homes (in addition to a dog run) where both 2 and 4 legged creatures can exercise together. I'm sure this knee jerk reaction to restrict dogs comes from a few loud individuals that have had a negative experience on a trail with a dog. But if we're doing our homework on this, I think you would find that hikers and other users of our trails within GGNRA have more complaints about the bike riders as they are always more aggressive and rude than any dog or dog owner.

**Correspondence:** We live in Sunnyvale, one hour south of Fort Funston. When we first went to Fort Funston it was specifically because we got a dog and researched where he could run off leash. When we

---

got there it was pure elation, and our dog had fun too. The dogs in the free environment act naturally, respecting each other as most of us humans do. Putting a leash on a dog is like "road rage" to a human. The people who bring their dogs to this beach are conscientious, kind, respectful humans who pick up after their animals. Those that don't would most likely relieve themselves and not pick up after themselves, so this is not a dog issue, but a human concern. If the issue is protecting certain natural environments, humans should also be disallowed, which would be a completely different issue altogether, how to restrict mammals from disturbing the natural environment.

To keep SF beaches "pristine to visitors" we need to keep the beach as is. It is a beautiful mix of canine and human and nature that brings a smile to everyone's face that visits. It is absurd that all the dog owners who pay taxes shouldn't be able to continue taking their family members to their favorite beach.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	I live in San Francisco and enjoy taking my dog to the GGNRA parks, especially Crissy Field. I only go to parks where my dog can be off leash and under voice control, because it is critical that she run and play to get adequate exercise.				

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the SEIS for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I am opposed to fences that surround or delineate any off-leash area in the GGNRA. The SEIS Preferred Alternative proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like jails and visitors using them will feel unwelcome. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

I oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

SEIS says that, during the last six years, NPS staff did extensive literature searches to look for reports of impacts from dogs in other parks. In that same time, they could easily have conducted the site-specific studies that might have shown whether or not impacts are occurring in the GGNRA. Yet they chose not to do them.

SEIS admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. However these anecdotal claims have no context - how frequent were they, how serious, etc. - and cannot be used to set policy. An SEIS is supposed to be based on science, not anecdote. The SEIS also says it relies on the "best professional judgment of NPS staff" to determine impacts from dogs and their importance when there are no scientific studies of impacts in other parks available (e.g., p. 396). NPS staff have

demonstrated a long-standing, strong bias against dog walking, and the SEIS should not depend largely on their biased judgment and anecdotes for "proof" that impacts from dogs are currently occurring.

SEIS says there has to be a no-dog area at all sites where off-leash dog walking is allowed. For example, the SEIS says Muir Beach is too small to have both an off-leash and a no-dog area, so therefore there cannot be an off-leash area at Muir Beach (p. 113). There's no similar idea that sites that are no-dog also have to include off-leash areas. This shows the inherent unfairness of the SEIS.

Thank you for your consideration.

I oppose the Monitoring-Based Management Strategy that replaced the DEIS Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

SEIS data still does not support claims that there are major safety problems from dogs that require off-leash restrictions. The total number of dog bites or attacks from 2008 to 2011 (four years) was 95 (p. 21). Even if this number is undercounted and should be tripled or quadrupled, it still represents a miniscule portion of the millions of dog visits each year to GGNRA sites. Even the total number of dog-related incidents (nearly all of which were for having dogs off-leash where they weren't supposed to be) from 2001 to 2011 - 4,932 - represent a tiny fraction of the million dog visits each year (p. 252). The vast majority of incidents (at least 89%) in the GGNRA involve people without dogs, including murder, rape, robbery, drugs, and larceny. People are the safety problem in the GGNRA, not dogs.

SEIS still does not consider management tools that could mitigate alleged impacts from dogs in the No-Action Alternative. For example, dog training classes, dog-horse workshops, and poop cleanup days could all mitigate concerns about dog safety and pathogens in feces that are used to argue that the No-Action Alternative will not work and therefore the GGNRA must restrict off-leash access.

SEIS misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a national park experience to a large and diverse urban population (p. 1). However, the enabling legislation says the purpose of the GGNRA is to provide for the maintenance of needed recreational open space (Enabling legislation, first paragraph). The SEIS notes, in a negative way, that in many parts of the San Francisco Bay Area, residents have come to expect that GGNRA lands will be available for dog walking and other recreational activities. (p. 19). Yet that is exactly what Congress intended when it created the GGNRA in 1972 - The objective of [the creation of the GGNRA] is to & expand to the maximum extent possible the outdoor recreational opportunities available to the region. (H.R. Rep. No. 1391, 92nd Congress, 2nd Session, 1972)

**Correspondence:** One of the most pervasive problems in national parks is the presence of marijuana growers. High traffic keeps these guys at bay. Dogs have to be walked every day. Which means that they are in a park every single day, creating safety zones wherever they go. The trade off is a little poop, trash cleanup and the occasional dust up. Weighed against pollution from fertilizers, pesticides, herbicides, water theft from streams and dangerous heavily armed criminals wandering around, it seems like a relatively inexpensive means of protecting an area.

**Correspondence:** I am a native San Franciscan with a degree in Biology and a lifelong commitment to environmental issues. I also walk my dog every single day at Fort Funston and can't imagine my life without the opportunity for the continued recreation promised us when we voted to transition management of Funston and Ocean Beach to the Federal government. I am a disabled, retired middle-aged woman who feels safe in the presence of the dog community. My gait is unbalanced enough that trying to walk my dog on leash is relatively dangerous. Please stop seeing those of us who walk at the Fort or at Ocean Beach as the enemy. I stay on paths and can make it down to the beach on some days (wouldn't be able to do that if I was clinging onto a leash). My dog stays near me and is certainly not destroying the beauty and integrity of the land...I wouldn't tolerate it. As a day-to-day observer, I can say that the biggest impact on the park is by those profession dog-walkers whose packs are way too large. Focus on reducing that wear and tear and let's see what evolves. Let me hobble along with my best friend...

Sincerely,  
Lauris Jensen

**Correspondence:** I am strongly opposed to any changes that will limit the already restricted dog laws in the GGRA. I support alternative A - the No Action alternative. Not only am I a dog loving resident of Mill Valley, but I am a dog trainer. For 20 years this has been my profession and I worked many years at the Humane Society. I am on the trails, specifically Miwok every day, for pleasure or with clients. On an average day, I may see a few people, at most. The majority of the people i see have dogs and they are well behaved and responsible. I moved to Marin from the East Bay as a way to continue to build my business and improve my family's lifestyle. The changes you propose would dramatically affect my personal and professional life.

Do not further reduce the small percentage of space that I can enjoy with my dogs and my clients.

**Correspondence:** Please, Please, Please don't restrict dogs on Crissy field and beach.

This is a treasure for all people (and dogs) to enjoy. The park must get a significant amount of additional usage because of all the dog lovers that happily bring their dogs to the park.

We have been going to the park for many years to run or play with the kids on the beach. We have never had a problem with dogs being there off lease.

We love it. The dogs love it.

Please don't change it.

respectfully,

Jim Stafford

**Correspondence:** I am writing to request that you keep the Fort Funston and Crissy Field sites open to off leash dog activity. The VAST majority of dog owners are very responsible people who pick up after their dogs and make sure that they only permit their dogs to go off leash if the dogs are well-socialized to other people and other dogs. My dog, and those with which she plays are happier and healthier for being able to romp and play, something they cannot do while on leash. Most off-leash dog parks are small, poorly maintained (at cost to the communities), and the limited size creates potential problems.

The fact that some people are afraid of dogs, or simply don't like them, is no reason to restrict the enjoyment of the thousands of local citizens who want to enjoy the outdoors with their dogs. My guess is that restrictions may be ignored by many, and policing dog policies is a poor use of NPS or local law enforcement resources.

**Correspondence:** I have submitted comments on this COMPLETE waste of your time and my money on previous occasion. Just wanted to let you know that this plan will bring protests the likes of which haven't been seen since the '60s. I know because I will organize whatever it takes to overturn your

---

bureaucratic power play. Picture thousands of people lined up at the federal courthouse in SF to contest their citations for walking their dogs off leash... Picture thousands more marching (with their dogs) to those specific sites you identify as being no longer "off leash." I will personally solicit civil disobedience from those kindly people who now take their dogs to city dog parks to gain numbers...

While I have been a critic of NPS for eons, this ill advised and ill fated mission of yours sets new standards... While my personal favorite was the boneheaded idea to re-integrate raptors to the Muir Beach headlands by baiting them with frozen quail, all the while trying to expand the quail population in SF, (the raptors with new appetite for the quail were killing quail in SF by the thousands... ) the dog ban will be new and different...

I have lived in Marin for 60 years... and I am old enough to remember how to organize a protest... just watch.

**Correspondence:** I am concerned that the Draft Management Plan does not adequately address the problems created by the rapid growth in dog walking within the GGNRA. This is particularly a problem at Ocean Beach where dogs interfere with the nesting Snowy Plover. Simply requiring dog owners to keep their dogs on leash will be ineffective without enforcement. Dog owners already routinely ignore leash requirements because of inadequate enforcement. Without increased enforcement they will also ignore leash requirements at the Snowy Plover habitat.

<b>Correspondence:</b>	This comment relates to the portion of Stinson Beach that is currently dog friendly.				

The status in place now is working just fine. A portion of the beach is designated for people without Dogs; a portion of the beach is designated for people with Dogs.

Why is our government spending tax payer dollars conducting voluminous studies attempting to change a beach that is currently friendly, in separate areas, to both people without dogs and people with dogs? What is wrong with the present status quo? Why does the U.S. government now have to create all of these studies and attempt to change the rules of a beach that has worked well for all of these years?

Dogs need a place to run; to walk; and to have some fun. The current management of the beach provides this need. Why change it?

**Correspondence:** First, thanks to the staff for working so hard on this project. The issue has become very complicated. I think the entire park area should be open ONLY to dogs on leash (except in a fenced area for off-leash dogs only) and that no one should be walking more than 3 leashed dogs at a time. So I prefer Option D, but my second choice would be Option B. Option F allows too many dogs being walked by commercial dog walkers- -there is no way anyone can walk 6 dogs at a time without forcing pedestrians off of the path as they pass. Also, there should be no dogs off leash on Baker Beach. The GGNRA is currently overrun with dogs and owners who can't (or won't) control them.

**Correspondence:** I live two blocks from Land's End Trail.

I have been walking my 2 dogs off leash in the GGNRA in the Land's End area, as well as other areas of the GGNRA, on most days for ten years. I have not encountered any problems or issues with these outings.

During these walks hundreds of people of all ages have come up to me and asked me if they could pet my dogs. During these walks hundreds of people have smiled at me and asked me about my dogs or told me that my dogs are cute, or that they enjoy seeing my dogs.

During these walks I have encountered thousands of off leash dogs of all sizes. I have not had any problem with these dogs.

Only two times in these ten years has there been a person who has shown concern that my dogs were off leash. Both of these people mistakenly thought that it was illegal for my dogs to be off leash and that was the basis of their concern. My dogs were not even near them or threatening them in any way. When a person looks at my ten pound dog, who is standing next to my feet, from fifty feet away and tells me they

have a problem with my dog. I KNOW that the problem is theirs, and that it is a mental problem.

It is very important to me to retain the off leash dog walking rights in the GGNRA, in the areas that it has historically been allowed, for my health and for the health of my dogs. I feel that you are mis using your authority when you make rules trying to take away the rights of American citizens for no good reason.

I understand that you wish to take "recreation" out of the title assigned to these lands, and bring these lands into regulatory compliance with other lands known as national parks. I can see that you are posting signs that say Golden Gate National Park instead of signs that say Golden Gate National Recreation Area. I think this is a very poor judgement on your part; to mistreat American citizens and their dogs in this way, without justification.

These Golden Gate lands border large, heavily populated urban areas. They are not in a wilderness.

It seems you have attempted to show justification for your actions, but it does not appear that any of the justifications you have put forth, or cited in your papers, environmental or otherwise, have merit or factual significance to them. Your statements appear vague and speculative. It also appears that your papers are superfluous, as if you are trying to confuse people and create ambiguity, in order to achieve your mis directed purpose of taking away the rights of and oppressing American citizens.

<b>Correspondence:</b>	I am a native San Franciscan, avid hiker and financial supporter of both national and state parks. The new anti dog proposal has made me halt my funding to both since a large part of how I enjoy these parks is with my dog. We make daily visits to Fort Funston, and several times a month go to Crissy Field. These are the only areas where people and dogs have enough space to really let go and run/play without worry about cars or bikers. City parks are too small for adequate exercise. On my daily visits I meet people without dogs, visitors to the city and of course, other dog owners; almost always the visitors are excited to see my dog and want to pet him. On the occasions that someone is not dog friendly,				

---

I use voice recall and my dog doesn't bother them. There is room for everyone to enjoy our beautiful SF nature. The quality of my life and in fact of all the visitors to these parks will be severely and negatively impacted if this plan goes through. Please see my below comments and include them as substantive comments in opposition to this narrow minded plan.

Oppose the Preferred Alternative because it is too restrictive. There is no justification in the SEIS for major changes. Support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

Oppose fences to surround or delineate any off-leash area in the GGNRA. The SEIS Preferred Alternative proposes to install fences at the eastern and western ends of Middle Beach at Crissy Field, around the proposed off-leash area at Fort Mason, and around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Fences secure enough to keep small dogs in will hinder movement of wildlife. If fences are not secure enough to keep small dogs in, why have them?

Oppose the Monitoring-Based Management Strategy that replaced the DEIS Compliance-Based Management Strategy. The MBMS is still based largely on compliance with leash restrictions. Although the SEIS says the MBMS will consider impacts on resources from non-compliance, it still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

SEIS did not adequately consider comments to the DEIS from dog walkers and appears to have dismissed nearly all of them. There is no information in the SEIS about why these comments (e.g., negative impacts on community and human health from off-leash restrictions) were dismissed and not considered in the development of the preferred alternative. The SEIS lists many, many comments from people opposed to dog walking and very few from people who support dog walking. The SEIS copies, without change, entire sentences and text from the DEIS about studies of dog impacts, especially on wildlife and birds, even though DEIS comment showed that this text was inaccurate, misleading, and misrepresented what the studies actually said. Yet the SEIS copied it word for word. Comments supporting dog walking were not used to argue that there should be more off-leash restrictions, while comments opposing dog walking were used to argue for more restrictions.

SEIS still lists impacts that might, can, or could happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. This point was raised in DEIS comments, and should have been addressed but was not. For example, the SEIS admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils (p. 373). Yet they also claim these impacts are currently occurring in the GGNRA and therefore dog walking must be curtailed to stop them (e.g., p. 97). Without site-specific studies, there is no proof impacts are occurring.

SEIS says that, during the last six years, NPS staff did extensive literature searches to look for reports of impacts from dogs in other parks. In that same time, they could easily have conducted the site-specific studies that might have shown whether or not impacts are occurring in the GGNRA. Yet they chose not to do them.

SEIS admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. However these anecdotal claims have no context - how frequent were they, how serious, etc. - and cannot be used to set policy. An SEIS is supposed to be based on science, not anecdote. The SEIS also says it relies on

the best professional judgment of NPS staff to determine impacts from dogs and their importance when there are no scientific studies of impacts in other parks available (e.g., p. 396). NPS staff have demonstrated a long-standing, strong bias against dog walking, and the SEIS should not depend largely on their biased judgment and anecdotes for proof that impacts from dogs are currently occurring.

SEIS says there has to be a no-dog area at all sites where off-leash dog walking is allowed. For example, the SEIS says Muir Beach is too small to have both an off-leash and a no-dog area, so therefore there cannot be an off-leash area at Muir Beach (p. 113). There's no similar idea that sites that are no-dog also have to include off-leash areas. This shows the inherent unfairness of the SEIS.

SEIS never gives results of public comment on the DEIS (neither does the Response to DEIS Comments by the GGNRA document on the GGNRA website). They say they received over 4,700 comments, but never say how many opposed restrictions on dog walking and how many supported them. The SEIS says: NPS received many public comments complaining that dog use precluded their enjoyment of areas. (p. 100). But there's no indication of how many negative comments were actually made. Are they from a small minority or are they widespread? An independent analysis of the DEIS comments showed that the vast majority (at least 3:1) supported dog walking. This is not reflected in the SEIS.

SEIS still does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by public comment to the DEIS and by the San Francisco Board of Supervisors in 2011. The SEIS claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. It also claims that because people will still be able to walk their dogs on-leash at some sites, most will continue to walk in the GGNRA. No evidence is given to support either assumption. The SF Supervisors and dog walkers asked for a thorough analysis. What we got was cursory at best.

SEIS data still does not support claims that there are major safety problems from dogs that require off-leash restrictions. The total number of dog bites or attacks from 2008 to 2011 (four years) was 95 (p. 21). Even if this number is undercounted and should be tripled or quadrupled, it still represents a minuscule portion of the millions of dog visits each year to GGNRA sites. Even the total number of dog-related incidents (nearly all of which were for having dogs off-leash where they weren't supposed to be) from 2001 to 2011 - 4,932 - represent a tiny fraction of the million dog visits each year (p. 252). The vast majority of incidents (at least 89%) in the GGNRA involve people without dogs, including murder, rape, robbery, drugs, and larceny. People are the safety problem in the GGNRA, not dogs.

SEIS still does not consider management tools that could mitigate alleged impacts from dogs in the No-Action Alternative. For example, dog training classes, dog-horse workshops, and poop cleanup days could all mitigate concerns about dog safety and pathogens in feces that are used to argue that the No-Action Alternative will not work and therefore the GGNRA must restrict off-leash access.

SEIS misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a national park experience to a large and diverse urban population (p. 1). However, the enabling legislation says the purpose of the GGNRA is to provide for the maintenance of needed recreational open space (Enabling legislation, first paragraph). The SEIS notes, in a negative way, that in many parts of the San Francisco Bay Area, residents have come to expect that GGNRA lands will be available for dog walking and other recreational activities. (p. 19). Yet that is exactly what Congress intended when it created the GGNRA in 1972 - The objective of [the creation of the GGNRA] is to & expand to the maximum extent possible the outdoor recreational opportunities available to the region. (H.R. Rep. No. 1391, 92nd Congress, 2nd Session, 1972)

SEIS will not allow off-leash dog walking on any trail anywhere in the GGNRA. The only site-specific

consensus agreement to come out of Negotiated Rulemaking was to allow off-leash dog walking on a trail in Oakwood Valley in Marin. This was included in the DEIS. However, it was removed from the SEIS (Oakwood Valley is now proposed to be on-leash only) because the GGNRA decided that there would be no off-leash dog walking on any trail. All the money and work that went into Negotiated Rulemaking was wasted.

SEIS still will not allow any off-leash dog walking on New Lands acquired by the GGNRA in the future, even if dog walking occurs has traditionally occurred there.

SEIS cites several surveys of visitor use and visitor satisfaction, including two done in 2011 in response to DEIS comments, that were so poorly done that their results are essentially meaningless. A 2008 visitor use survey at Ocean Beach and Crissy Field used people who intercepted people at these sites and asked about their park usage. However, the interceptors were observed by several people to actively avoid talking to people walking with dogs, hopelessly skewing their results. A 2011 visitor use survey at Fort Funston and Muir Beach, done specifically in response to DEIS comments, only counted people as walking dogs if they had a leash in their hand. People walking with a friend and the friend's dog were not counted as a dog walker (because they did not have a dog of their own with them), even though they were only walking there to walk with the friend's dog. A 2011 Visitor Satisfaction Survey was so confusing respondents didn't know if they were being asked about their satisfaction with current conditions at GGNRA sites or with the severe restrictions proposed in the DEIS.

SEIS still describes the visitor experience as focused on people who don't want to be around dogs. This criticism was made of the DEIS too and apparently ignored.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative. If there are problem in certain areas, they can be addressed more creatively on a one-off basis.				

For example - I have been walking at Oakwood Valley and Miwok trail (and more recently Rhubarb) since moving to Tam Valley 12 years ago, the last 10 years with my dog. I have never had or caused a problem at any of those places. Oakwood Valley is full of non-native Eucalyptus, so it is hardly a pristine wilderness area, or likely ever to be (unlike Muir Beach for example). That site especially is heavily used by the people who live in the immediate area. The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park. Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Cramming everyone and their dogs (which almost everyone seems to have) unto some tiny corner of open space will create vastly more problems that it will solve. I have no issues with some space being restricted, but adding the additional restrictions makes no sense and it totally counter-productive.

**Correspondence:** I have been using the Ft. Funston dog walk area for 15 years. I have not seen an overall decline in the cleanliness of the park, the wildlife or plants in the park, nor have I seen any fights among dogs or people using the park. I have seen many examples of people within the community coming together in a friendly atmosphere, being neighborly, and in some cases becoming friends.

I understand that part of the concern is the impact on flora and fauna at the park. There are many areas in the park that are marked off for multiple reasons and access is blocked off. My experience has been that people are respectful of those boundaries. I suspect that the flora and fauna are doing just fine in those areas. If a raccoon can a home under my deck, I am sure various animals can thrive in a protected area.

This is a public park paid for using tax funds. Like many other public service, the rising costs of labor, lawsuits, and the increased bureaucracy create a budget deficit. However, the cost of the above will not be affected by eliminating off leash access. Rangers will still have to patrol/service the park, lawsuits will still occur, and the bureaucracy will still exist.

One possible solution to offset the cost is to require dog walkers to obtain park permits. They are essentially using public land to operate a private business and they make money from that business. This would be a "business use fee" and could even be applied for commercial sightseeing buses that bring tourists to Ft. Funston.

It would seem that restricting the off leash dog walk area would be in contrast to the intent, and possibly the letter of, the granting of the land to the city. This would also seem to be denying a service to the community. There are many areas for people to walk alone or with a leashed dog, including Ft. Funston, but there are very limited areas for people to have their dogs off leash.

Please, leave the park as is in terms of allowing off-leash access. Let's work to find a creative solution that allows for the future viability of the park while maintaining the long standing tradition and character of Ft. Funston.

**Correspondence:** I am writing in response to the proposal of limiting the space and off leash access to dogs at Fort Funston. I think this is ridiculous this property was given to San Francisco County with the understanding that the dogs and owners would be able to be off leash under voice control.

This is not right for GGNRA trying to take back land that was given to the dogs in the late 1970's. San Francisco County needs to stand tall and not let GGNRA take this land back or alter access for leash .

This will also hurt DOG Walkers business ALOT. DOG WALKERS are an IMPORTANT PART OF

---

PEOPLES LIVES.

THANK YOU

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative. I regularly take my dog to Fort Funston, Ocean Beach, Crissy Field, Lands End, Sweeney Ridge as well as city parks throughout the bay area. Part of my job is to help at-risk youth reconnect with the community as a whole. I believe that recreation and access to nature is critical to feeling integrated in a community. I walk with my elderly parents, at risk youth clients, disabled young adults, and young children. Being able to walk my dogs in these areas provides all of us with a premise for recreational use of GGNRA land. When my first dog died, I became acutely aware of how important the presence of a dog was to bring these people out to enjoy our parks. The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands. As a person who uses my dog as a tool in educating at-risk youth about positive recreation opportunities in the Bay Area, I am very worried about the impact of your proposed dog management plan. On both access to recreation for all and the environmental impact by way of dog owners having to find alternate places to bring their dogs.

As I mentioned above, having a dog provides a reason to go out and enjoy the beautiful landscapes of GGRA. When I am out working with or walking my dog, I see the most diverse group of people out there doing the same: all ethnicities, social classes, ages, and (dis)abilities. GGRA dog friendly areas are some of the rare places where all of these people connect through their dogs. When I am out with my African American or Hispanic youth from Hunters Point, the Excelsior, or the Fillmore and they are handling my dog (it teaches them responsibility and leadership skills), they are sometimes spoken to by older white women from the Marina who typically cross the street when they encounter these same youth on the sidewalk. Remove the dog from the equation, and you remove that connection.

I live in Bernal Heights just blocks away from one of the few off-leash city parks in San Francisco. The park is already very well frequented, and I dare not imagine the devastating environmental impact your plan would have on our park. Simply put, if you restrict dog access the way you outline it in Alternative F, the dogs that frequent GGRA land are not going to magically disappear, they are going to have to be walked somewhere, and the city simply doesn't have the infrastructure to handle that influx of dogs in its city parks. The parks would be ruined, and recreation really would become inaccessible to non-dog owners who weren't frequenting GGRA sites anyways and are now unable to enjoy city parks. Not to mention the fuel emissions of those responsible dog owners who would decide to seek friendly trails in East Bay Regional Parks.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained. Please keep GGRA open and welcoming for all!

**Correspondence:** I have been a homeowner in San Rafael for 22 years now. I am a volunteer dog walker at the Marin Humane Society, which is how I ended up with two rescue dogs. I'm also a fitness instructor and have a clear understanding of the need for regular exercise in both humans and even more so, with dogs.

I see that so clearly at the Humane Society. After the dogs are cooped up in a cage, we walk them on leash, into a fenced area, designated by the Humane Society, then let them loose, as Mother Nature intended. It is so healing for them to be able to embrace that free-spirited part of them.

I so appreciate the opportunity to allow my dogs to run as nature intended, in open space. I can't even imagine it any other way. They run so much faster than I do and I'm pretty fit for a 53 year old. I can't imagine, people less fit, having to keep their dogs on leash at all times. It can be VERY challenging when they are leashed and just not natural for them. I have a lot of empathy for dogs, as you can tell.

And of course, I do recognize that there are dog parks. Which is great, but very different from a trail head. They don't get nearly the exercise at a dog park as they do running free and some dogs aren't so comfortable being in such close proximity with other dogs. My dogs will sniff and of course, pee more than exercise when in a dog park. It's a very different experience for them.

We really love the Sleepy Hollow trail that so many other dog owners have come to appreciate. It's a very harmonious experience for all.

I do understand everybody has different needs, which is why there are plenty of trails with no dog access. And I do understand that some dog owners can be irresponsible. I wish that weren't the case. I often will pick up other doggies poopies to make it a more pleasant experience for those that are not dog lovers. I'd like to see that change. Perhaps with this recent threat of losing their rights, they will be more responsible. Perhaps we could have a campaign for people to pick up after other owners dogs in order to protect our rights? I'd hate for them to ruin it for us, who are responsible dog owners, those that pick up after them, for those that train them to be under voice command, etc.

For the love of dogs, I hope that you will consider their needs and not punish them for a few irresponsible owners and a few not so dog loving people that want to have all parks to themselves. Lets share the beauty of California in a harmonious way.

---

During our recent visit to San Francisco we stayed in the Marina District. The kids (ages 3 and 7) loved walking down to Crissy Field. Their favorite place to play became where Crissy Field Marsh flows into the bay.

During one of our visits, we were over run by large dogs off-leash. I guess it is pretty well accepted by dog owners to take their dogs off-leash near this stream to allow the dogs to exercise.

The dogs made a number of close runs by our children and other children playing in the same area. This greatly frightened the children and we eventually left. The dog owners seemed not to care that the dogs were scaring the children or running by quite close (within a few feet; one dog actually licked my child).

I support rules being put in place to require a leash for dogs on the beach at all times. Even the most friendly dog can be scary to a small child or an elderly person. There is no way a person can quickly tell if an off-leash dog is safe or not.

I urge you to consider this issue and enact appropriate rules before someone is harmed.

Take care,

Mark Anderson

**Correspondence:** As a home owner I have been a resident of Muir Beach for over 5 years and prior to that, a frequent visitor to this location for many years. One of the reasons I invested in property at Muir Beach was to become a member of this unique community and to enjoy the local surroundings with my dog and friends with dogs. I walk twice a day locally.

I am therefore deeply committed to Muir Beach and its surrounding trails remaining dog friendly and I am opposed to the suggestion of a leash law being imposed.

In the years that I have walked my dogs on the beach and surrounding areas, there has never been a time when I have come across problems with other dogs or dog owners disrespecting the environment or creating problems for others in their enjoyment of this area of natural beauty - to the contrary in fact.

Many who use this area recreationally have approached me with their children or dogs to socialize them and have expressed pleasure in seeing the dogs play and run freely. Allowing dogs off leash in Muir Beach enhances the enjoyment of this area for others it certainly doesn't hamper it.

I believe that imposing leash laws at Muir Beach would create problems that don't currently exist for both residents and visitors alike and their dogs and it would have a negative impact generally.

Please DO NOT impose a leash law at Muir Beach!

<b>Correspondence:</b>	Please take no actions to change the GGNRA rules at the beaches of Marin.						

Please enforce the existing rules established in 1979 and avoid any rules restricting access to dogs and other pets. There are restrictions enough already throughout the county regarding this matter.

BTW, the photo on your landing page regardint his matter is heavily biased against dogs / dog owners with what is clearly a photo of several professional dog walkers with their charges. Why?! I've never seen so many dogs in such a small beach area (let alone any area!) in my 20 years here. We, the majority are tax paying, rule abiding families with dogs. We are not professional dog walkers with five dogs released to roam freely on our beautiful beaches.

Don't change the rules to penalize everyone. Address the problems with enforceable rules and citations.

Do not make my personal information available to the public.

Thank you.

**Correspondence:** Dogs and their owners have overrun parts of the GGNRA. The presence of dogs is very detrimental to wildlife and especially shoreline and marsh habitats. Pets have no business in GGNRA, especially unleashed dogs, and they should be prohibited except to very limited sections of the GGNRA. Off leash dogs are a menace to nesting birds and other wildlife whose ranges have already been severely restricted. I urge the NPS to protect our natural resources by severely limiting, or banning, dogs from GGNRA.

**Correspondence:** The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011, and comments in 2011 ran 3:1 AGAINST the plan.

I support the "No Action Alternative" in the SEIS for each area: Muir Beach, Homestead, Oakwood Valley and the Marin Headlands.

The SEIS contains no peer-reviewed, site-specific studies or vital monitoring as required by law to initiate such a dramatic change to the public's use of their public lands.

Retain the longstanding 1979 Pet Policy.

The GOLDEN GATE NATIONAL RECREATION AREA was established to give outdoor RECREATIONAL opportunities to people in a densely populated urban area. It requires a different management approach than wilderness areas like Yellowstone or Yosemite.

The SEIS preferred alternatives force people in to their cars, in search of places to walk with their dogs. This is bad for the environment and bad for Marin County! Also, it could force me, a woman, to walk in isolated areas that don't feel safe.

I moved to Mill Valley in 1985 and Forest Knolls more recently. I think the efforts to discourage people

---

to walk in the beautiful parks that attracted us here are way off base. We need to get out in nature for our, and our dogs, well-being.

**Correspondence:** I am a user of various parts of GGNRA and it is one of the reasons why I love living in the Bay Area. As a person residing in a large metropolitan region, open space is imperative to healthy living. I believe we should have more. But we are lucky for what we do have now & I am grateful for it. I have friends who are dog owners & friends who are dog walkers. I fall into neither category. But I respect the daily requirement needed to maintain a pet.

GGNRA offers folks like myself and dog owners a chance to get out and enjoy a less urbanized environment. However, in order to enjoy this park space one must feel safe and comfortable. Many dog owners keep their pets on a leash while in the park. Some dog owners let them run free. A dog needs its exercise. But any dog not on a leash should not be far from its owner and should be very responsive to its owner's commands. The one place where I have witnessed this scenario ineffectually has been in GGNRA in Marin; the Headlands. On several occasions I have seen dogs run off trail, through the brush, chasing wildlife. Owners have called to no effect. I believe this is not healthy for the local fauna as it does not allow them the safety of living in their homeland environment. In San Francisco, I have seen this far less except with the dog walkers.

My main concern with this current issue at hand is with the dog walkers and their canine clusters. At Ft. Funston a friend & I were both harassed by one dog walker who told us it was his domain to bring dogs to this park because he was there everyday and we were not their everyday (we had both felt intimidated by one of his unleashed pets and asked him to leash it). In fact, there were so many dog walkers that day I have not returned to Ft. Funston because it turned out to be a very unpleasant experience constantly surrounded by packs of dogs.

This past weekend at Crissy Field a friend and myself saw a dog walker with ten dogs on the beach, off leash. We did not feel she could control them all. One dog ran separate from the group & with her eyes on the other nine did not see the one dog defecating on the sand. None of the dogs were unruly when she passed us and they all seemed to be having fun but I did not feel safe or comfortable.

I believe that dog owners should be allowed to walk their dogs in GGNRA and that there should be designated areas for off leash and on leash as well as parts where no dogs allowed. This will only work if rangers are out there to issue tickets for abusers. I never see them out in Marin....never, and I am there once every two weeks. Dog owners disregard rules if no one is out there to enforce them.

Dog walkers, however, I feel should not be allowed to use GGNRA for their private enterprises. I feel it is unsafe for the general public and overall not great for the park's natural environment. I do not think dog walkers can control their packs at all times nor do I feel that their responsibility to their job/employment should rest within the park's borders.

I would feel comfortable with dog owners or walkers using the park for dogs, no more than 2 at a time. I would be ok with a dog owner or walker having three dogs at one time in the park as long as they were leashed. I believe one or two dogs can be controlled and more than that, not so much.

I do not think GGNRA should have doggie runs either. The city, if it wants, can create doggie runs (and not on existing public park land).

Thank you.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

We spend at least 5 days a week on the trails of GGNRA hiking with our dogs. Dog owners on the trails are very respectful of nature and keeping their dogs under voice command. Over the decade that we have lived in Marin, we have never had a problem on the trails with other dog owners.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. It requires a different management strategy than a National Park.

Marin residents rely upon this open space. We pay for this access and enjoyment through our tax dollars.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** My family visits Muir Beach several times a year and we enjoy bringing our dogs along on our vacations. It is a privilege to be able to take our dogs down to the beach and let them run in the surf leash free. If you invoke a leash law some of the charm and wildness to the local beach will be lost. It is so enjoyable as a dog lover and nature lover to be able to share the beauty with our furry friends without the constraints of a leash. In all my visits I have never seen anyone abusing the privilege. People

---

with dogs are very aware and probably more careful than most to clean up after their pets. I have never encountered a problem with other people or dogs on the beach. Please don't take away this simple pleasure that has disappeared from most public trails.  
No Lease on the Beach :)

**Correspondence:** I am opposed to the proposed plans for management of the GGNRA, especially the restrictions to dog access.

If the portion of the GGNRA contiguous to San Francisco cannot be managed as intended when it was created - as recreational space for a crowded and water-locked city - I would definitely support its assignment to another entity that could better focus on the unique conditions of this resource and the unique needs of its natural constituency.

In San Francisco, our leaders and bureaucrats are constantly pushing for more housing, more jobs - while my neighborhood is already the densest in the country outside of Manhattan. Taking away use of the GGNRA open space for my main sport - walking my dog off leash - will significantly reduce my quality of life, especially as I get (even) older.

Urban dog ownership has skyrocketed to new levels over the past 2 decades. Why? I believe the fact that many baby boomers are aging out of other forms of exercise, coupled with a greater tolerance for dogs at work, shops, etc.. Perhaps the tension of our crazy world needs this sort of antidote. But, while we recognize a host of new sports - mountain biking, kite sailing, snow boarding - we have not recognized the new role that dogs have in our urban lives. There are national standards for the number of baseball diamonds, tennis courts and play areas but nothing about accommodating dogs in urban settings.

The smug and inexorable march forward with this policy ignores the desires of a large and critical constituency. I cannot imagine the Conservancy would be as successful if all dog owners withdrew their support.

Truly progressive and forward thinking would recognize the uniqueness of these parks and this opportunity.

**Correspondence:** Dogs visiting national parks & national recreation areas (eg, Golden Gate National Recreation Area) need to be on leash at all times. there should be fencing around off-leash areas and i strongly feel dog walkers should not be allowed to conduct their business (& it is a business) in any national park or recreation area.

---

i personally object to dogs off-leash in all parks except in fenced areas. i regularly walk in various parks & recreation areas in Oakland, San Francisco & other parts of the Bay Area. I am offended by dogs bounding up to me, sometimes jumping on me, in their totally natural excitement & curiosity. i get enough of that walking the streets of Oakland. I would prefer not to hike or try to commune with nature in an area with off-leash dogs.

I wish dog owners would extend love of their pets & love of dogs to all creatures & recognize how fragile wildlife is. for example, annual bird counts show decrease in songbird populations in many sites. i wish dog owners would recognize all wildlife is severely stressed by loss of habitat. i wish they would not visit national parks & national recreations area with their pets at all.

i do understand the joyfulness of an off leash dog & maybe there need to be more dog parks in urban areas.

**Correspondence:** I would like to voice my objections to limiting the access of dogs to trails and beaches in Marin County CA. It is already difficult to find places to walk dogs and particularly to have them run unfettered and unleashed. I do not have a dog personally, but have dog sat for others occasionally and have been frustrated in my lack of flexibility of where to take them. Please stop this over regulation of park areas.

Sincerely,

Ron Chin

**Correspondence:** To Whom it May Concern,

Thank you for considering to keep the Oakwood Valley/Alta Vista trail dog friendly. I live in Sausalito with two dogs. I am a bird lover and involved in marsh restoration. It is wonderful to have a trail, such as Oakwood Valley, that is a designated off-leash zone where my dogs can get the exercise they need. I understand that dogs can have a negative impact on wildlife, therefore it is vital to have designated zones for them. Without designated zones dog owners let their dogs run in sensitive habitat - this happens already and would increase if Oakwood Valley/Alta Vista becomes off limits to dogs or leashed dogs only.

I urge you to continue to grant dog owners off leash access for their dogs on Oakwood Valley/Alta Vista, it is one of only two spaces (the other being Rodeo Beach) in southern Marin.

Thank you for your time and consideration,  
A 12 year Sausalito resident and business owner.

**Correspondence:** I am so sorry to hear that NPS Muir Beach is considering putting a leash restriction on dogs. There are so few places for owners and their dogs at the beach to recreate and enjoy the beauty of a beach environment with the family. I think everyone with dogs is respectful at the beach in cleaning up after their dogs, I've never seen an issue with aggressive dogs and the ability to hike with them on the weekend and then go for a dip really is a great benefit. I can't imagine Muir Beach without dogs - it's such a gem and perhaps NPS should work on the parking situation there vs. outlawing dogs. I have been a \$ park supporter for many years and it's largely because I enjoy these spaces with my dogs.

**Correspondence:** To Whom it May Concern,

Dog restrictions in the GGNRA need to be stricter and enforced. Crissy Field and Ocean Beach have become huge dog parks and no longer serve the purpose they are intended to. The garbage cans at Crissy Field contain so much dog waste that you can smell them from several yards away. Also, I do not believe that any dogs should be off leash at all in these areas as they are a menace to wildlife and other park visitors. I have witness several dog fights, one at Ocean Beach that resulted in a dog dying due to another dog attacking it because the owners couldn't control the animals. The purpose of the GGNRA is to enjoy the outdoors and wildlife and provide a respite for threatened wildlife. This is an area that all PEOPLE are supposed to have access to and enjoy. Not just dog owners. Increasing restrictions and enforcing them will allow all people, including dog owners to be able to enjoy the area. Dogs have completely overrun these areas. It is time for PEOPLE to take back control.

Anastasia

**Correspondence:** I did a little experiment today. I decided to see what it would be like to walk my dogs as if the changes had already been made. I did not go to any open space areas, and instead, walked them through the avenues. It was an enlightening walk, and something I would encourage the people making these decisions to consider.

First, the only place for my dogs to eliminate their waste was either on the sidewalk, or, on the vegetation that my neighbors were so beautifully trying to create outside their homes. I also felt awful that I was not able to completely clean off the solid waste from the sidewalk, and imagined much more in the future as everyone else begins to walk their dogs away from open spaces. Just as any environmental impact caused by change, forcing dogs into a new area would have an impact, and it seems like it will be a huge inconvenience for the humans.

Additionally, I noticed there were not any garbage pails along the way. I know there used to be some, but it looks like they have been removed. Although I carried my waste bags, I noticed some people had not, and the sidewalks had the occasional bag left behind. I can only imagine how much this would increase with the proposed changes.

I also found my dogs to be an inconvenience to others who were simply walking to the store, walking their children, etc. Although my dogs were leashed, and also nice, non-aggressive dogs, I know to others they may appear intimidating. People were visibly uncomfortable by our presence, and there wasn't much space for us to move on the limited space on the sidewalk.

This is just something to keep in mind when making these decisions. I realize a lot of research goes into these decisions, and I hope the future of where dogs will go and its full impact, will be considered.

Furthermore, I would like to add that having an open space, like Sutro Park, has allowed the neighborhood to gather. I would not have met all the people I have met in my neighborhood, had I not had a dog, and then met many of them with their dogs, at the park. We have built a strong, community, discussed safety issues, kept track of each other, and built a very nice community. As a single woman, transplanted from the East Coast, this community building has been invaluable. When I broke my foot, people noticed my absence and checked in. Likewise, I've been able to check in with others who have needed a helping hand. Without a place to gather, initiated by getting our dogs out, much of the community feel will suffer. This would be a shame.

Thanks for listening.

**Correspondence:** I hope you will preserve the off-leash voice control areas for the dogs on our beaches and Crissy Field. It is very important that animals have places to run, socialize off-leash with other dogs for many reasons. I'm a former dog guardian who no longer has a dog, and I still really enjoy seeing the dogs play out there and interacting with them. I think the dog owners are the ones that get out and use these areas the most and should therefore have a say.

If there is some compromise that can be reached where there are sections of beach that the dogs can run free, that would be a better option and would prevent further confrontations from those hostile towards dogs and their guardians. Where there is a car/bike/pedestrian traffic safety issue concerned it makes sense to have strict leash areas but not so much near the shoreline where there are not that many people.

Leashing on trails where people are running with their dogs can be a trip hazard. It might make more sense to have certain days or times for dog use and certain days/times for restrictions instead of blocking off entire areas from them.

**Correspondence:** I have two dog that i regularly walk off leash on the Alta Vista trail above Marin City (foot of Donahue St.) and both of the legs of the Oakwood Valley trail. If i have enough time i combine the two for a wonderful long hike. These and the Rodeo Beach to upper parking lot are the only trails within easy reach for us to go to on a regular basis to give my dogs the proper exercise they need. At the same time i am getting the proper exercise I need and can enjoy the beautiful surroundings. (who wants to huddle in a dog park...)

My dogs are under voice control and I monitor their pooping and pick up and hike out their droppings.

I understand and appreciate the notion of leaving park areas off limits for dogs since even their scent might influence nature. Both of these areas however should remain voice control off leash areas.

They are close to urban settings and provide a safe environment for the animals to romp around. We are lucky in Marin that there is so much park and recreational nature, that it is possible for us to have both.

The issue of dog walkers with great amounts of dogs that are impossible to control is another one. I would be in favor of a limit for off leash dogs per person.

**Correspondence:** I walk my dogs on fire roads near and around Mill Valley and some are GGNR areas. I also love to take them to Muir Beach. I am retired so many days I go are week days. Sometimes we walk empty trails for hours, never seeing another person, dog, or deer. My dogs do not chase anything but their ball. If we do see people - they are usually walking their dog. So why should all this space just be unused? It is unreasonable and I wonder at the sense of it. We, dog owner are here because of what you are tryig to take away. I will fight for the right to use this land I grew up around and walked for 50 years. Believe me.

**Received:** Jan,11,2014 16:23:53

**Correspondence Type:** Web Form

**Correspondence:** As a nature loving dog owner I've long appreciated the seeming balance that exists within the diversity of GGNRA properties so that approximately 1% or so of the overall land is open for dogs and dog walking while the rest is set aside and protected. Sure, there were times I wish I could walk my dog in areas marked off but I think many dog owners feel as I do it is fair and reasonable to have the Pet Policy rules that are in place since 1979 and in keeping with enabling legislation for the National Recreation Area.

What causes me to write now is my understanding that proposed regulations would drastically reduce (perhaps by 90%) the access that dog walkers presently enjoy in the GGRNA. Not only that, but there seems to be an overall aim by the present leadership of GGRNA to reduce or eliminate dog walking from future lands that may be gifted or acquired.

I am concerned that I read a statement ascribed to the current director of the National Park Service, Jon Jarvis, that he would rather give up properties than have dogs running loose on them. Without the benefit of full context I can't know how literally this comment was intended but as a woman who spent many years as a manager in local government I do know from experience when the head of an agency makes a statement like that to his/her team, the team has a way of making the vision of the boss come to be. And I think the news articles and charges we've been reading over the past years in regard to lack of data, abuses of data and poor science cited in reports used by the GGRNA is very troubling. Clearly when reports consist of vague notions and mixed evidence it is not surprising staff might pick and choose what they can to support the goals and broad statements made by their leadership. When a staff report is requested with an outcome in mind, reports can be and typically are bent toward the desired outcome.

In this case, from my reading and from the recommendations so far, it seems the current leadership of GGRNA has a bias to significantly cut back on the approximately 1% of leash dog access currently afforded by the 1979 policy. The impact of the recommendations come across almost as though dog walking on and off leash is not recreation worthy to protect now or in the future. The outcome of the new report seems to be less about fine tuning, e.g., addition of dog waste pick up bags and waste disposal, fencing, and more about an assertive take away of the privileges enjoyed by dog walkers for more than 20 years without compelling reasons.

Not all people enjoy dogs or being around them and it is understandable, as is the case currently, that restrictions exist to give dog lovers and those who prefer to avoid dogs access to enjoy scenic parklands. That has been done fairly effectively and people have become used to those existing restrictions I believe. I can at least speak for the areas I most frequently use myself which include Stinson Beach, Muir Beach, Ocean Beach and Chrissy Field. I enjoy variety in my walks and appreciate being able to choose beautiful areas to take my dog for off leash and leash walks. Good signage and continued good markers for public education reinforces appropriate restrictions to keep things comfortable for all. Dog owners often look to each other to recommend not only most convenient and suitable areas for walking but those most beautiful and those where the other dog owners are responsible and friendly. Much is about education and establishing good habits. To create so many substantial geographic restrictions when a large community of dog walkers has come to enjoy and rely upon the use is a take away from this community that seems unbalanced and unwarranted.

I am object to the very premise that dogs are generally damaging and problematic to GGRNA resources and visitor safety. Should all people be banned because a few of them litter or vandalize? There are methods to deal with nuisance dogs and nuisance people that do not require across the board bans of both. I oppose broad restrictions on park use based only upon speculation of what might or could happen and anecdotal accounts that feed only a certain point of view. Before broad dog use restrictions are

implemented I urge serious, fact-based study, recognition and acknowledgement of the active use of GGNRA park areas by the multi-generational dog walking community, not only opinions from the organized groups, but those countless numbers of us who are regular users who appreciate the out of doors with our canine companions. I believe the majority of those in our community, dog owners and those who are their friends, families and companions want to preserve or even enhance quality opportunities for off leash dog play and running as well as on leash walking. I believe public opinion and an objective study will bear this out.

Dog walking and responsible dog play is encouraged by reasonable accessibility as is currently the situation in the recreational areas controlled by GGRNA. There is evidence and testimony outside the current study but not mentioned that communities with more off leash exercise areas for dogs appear to benefit from better behaved dogs in the community overall. Has this been researched, considered or pursued as part of the decision making process in regard to community impacts? How can the study purport to have no negative impacts on the community when these aspects are ignored? And isn't there research that shows restricting dogs to small areas and overcrowding of trails with dogs leads to more acts of aggression and problems? Has there been any reasonable attempt to determine what percentage of park users walk dogs or accompany a dog owner on walks as part of their use of the current recreation area? Is there any rational look at current or future use patterns vis-a-vis dogs and dog related recreation on these GGRNA properties? Could it be that dog owners and their families represent the majority? Without a reasonable basis and more credible information, it seems there is no compelling reason for drastic restrictions on permitting responsible dog owners access to much of the land that is accessible at present. I strongly oppose implementation of the new dog management policies as unsupported by need or fact and as detrimental to the recreational needs and desires of a substantial number of recreational users.

If the GGNRA does not want to manage its properties as the recreation areas they have been intended to be, I support these areas being transferred to another entity better able to manage them whether it is the Forest Service or Bureau of Land Management or some other entity that broadly supports outdoor recreation. For those more urban sites such as Ocean Beach or Chrissy Field, if the GGNRA is not able to keep them dog friendly as they have been for so many years I would suggest consideration of the feasibility that they revert back to the City and County of San Francisco where I believe good access to recreational dog walking is broadly supported in the community.

Sincerely,

Kathleen Hurley

**Correspondence:** I support the proposed dog management policies. It's not that they are perfect, but they would be a big improvement over the chaotic scene that often occurs presently. We need a balanced approach for uses of the park- -protecting some key areas such as the Crissy Field Wildlife Protection Area and the Ocean Beach Snowy Plover Area. There will still be many places that dogs can be walked without infringing on other park users' activities.

---

We need to respect those who don't want dogs interfering with their picnics and walks, and we also need to protect wildlife.

This is not about dog lovers vs. non-dog lovers, it's about balancing various uses.

**Correspondence:** I am concerned that our Parks are not allowing enough rest time for the wild animals. The snowy plover and other birds are harassed by even good dogs. There should be more clear separation of areas for wildlife, people without dogs and the off leash areas. I feel that then pro dog walkers who use our parks should be closely monitored and that part of their business taxes should benefit the park systems. I also feel that the pro dog walkers should be fined if they are abusing the system. Regular dog walkers, dog owners should also be warned and then fined for violations.

I feel that wildlife should have night time free of additional light pollution and public events like skateboarding, movie night, evening concerts and all evening events should be disallowed. Daylight hours in all of our public parks are the only appropriate times for public events.

Thank you. Christina Braun

**Correspondence:** Living in an urban area, parks and other natural areas are essential to physical and mental health. In California, there are few places citizens can go to freely exercise with their dogs - not state parks, not national parks, not many county parks. Most natural areas are not open to dogs already. I go to Ocean Beach, Chrissy Field and Fort Funston regularly with my dog. We jog for a few miles or hike for even more. These activities provides me great physical and emotional stimulation that I would not be able to experience in a small dog park or a restricted off-leash area.

Please allow me, my family and friends to continue to make urban living sustainable by having easy access to these large park areas in the company of our off-leash dogs.

**Correspondence:** This is an extraordinarily long document at over 1500 pages, not including the several hundred additional pages in the appendixes. While on the one hand, this speaks to the amount of effort the NPS has invested in addressing this issue, on the other it does make it extraordinarily difficult for the average citizen to participate at an informed level.

I would suggest that the central issue behind this is that the National Park Service's vision for managing the Recreation Area according to wilderness area rules is inconsistent with the desires of the public. This has caused significant non-compliance and resistance to efforts to NPS policies, which in turn exacerbates the conflict.

Preamble aside, I would like to register support for Option A in the attached maps: no change from current practice. I have reviewed the data on dog incidents, and do not see a strong justification for restricting usage. I was not able to find a definition of "dog incidents" in the documentation, and would be curious to know what level of severity is represented by this categorization. Nevertheless, the overall levels did not seem at all high relative to the usage of park lands by dog owners. Ocean Beach, with its high overall levels of incidents, is probably the least 'noisy' data, and that shows dog incidents being below 15% of the total on a consistent basis. Crissy Field for the last 2 years of data have also been below 15%. Without knowing the proportional use of the lands by dog owners it is difficult to know with certainty how this compares, but considering the fact that well above 15% of households own dogs it would seem that this data does not support increasing restrictions on dog usage in a broad-based fashion.

I would also request that fire roads universally allow voice control, assuming no presence of endangered species in the vicinity.

Restrictions on citizens' use of public land should face a very high hurdle. We all want to preserve these lands for future generations, and I recognize that multiple uses of the lands need to be accommodated. But it is inappropriate to treat urban recreation areas as wilderness areas. Please hew as closely to current allowances for dog owners to enjoy their public lands as possible.

<b>Correspondence:</b>					

More than one-third of Bay Area residents have dogs and we now know the importance of off-leash recreation for dog's physical and mental health, as well as the importance of the significant social communities that develop where people recreate with their dogs off-leash. The current conditions at Fort Funston are acceptable and should not be changed. There are no other comparable places to Fort Funston for owners to take their dogs off leash in the Bay Area.

I oppose off-leash restrictions because dogs will not be able to enjoy the park the same if leashes are required or if fenced-in play is the only option (which is sometimes stressful for dogs), as leashing dogs can result in aggressive behavior in dogs.

Additionally, restricting off-leash areas at GGNRA will cause overcrowding of other dog parks and a negative or unsafe experience for dog(s).

Let me introduce myself, I am a 3rd generation native San Franciscan and I have owned and operated a dog walking service here for 8 years. I depend on the income from this small business to financially support myself and it allows me to remain living in my hometown. Fort Funston is where I take a pack of dogs daily for their off-leash exercise.

I find your "preferred alternative" for Fort Funston to be too restrictive and oppose it based on the premise that there no justification in the SEIS for major changes to the dog walking policy's at Fort Funston. I support the formalization of the 1979 Pet Policy and insist that you consider this as the preferred alternative solution for Fort Funston because your management plan violates the terms of the deeds that transferred San Francisco lands to NPS.

Public input was not sought or considered enough in the creation of the plan. SEIS still describes the visitor experience as focused on people who don't want to be around dogs. This criticism was made of the DEIS too and was ignored.

SEIS still does not consider management tools that could mitigate alleged impacts from dogs in the No-Action Alternative. For example, dog training classes, dog-horse workshops, and poop cleanup days could all mitigate concerns about dog safety and pathogens in feces that are used to argue that the No-Action Alternative will not work and therefore the GGNRA must restrict off-leash access.

SEIS misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space" (Enabling legislation, first paragraph). The SEIS notes, in a negative way, that "In many parts of the San Francisco Bay Area, residents have come to expect that GGNRA lands will be available for dog walking and other recreational activities." (p. 19). Yet that is exactly what Congress intended when it created the GGNRA in 1972 - "The objective of [the creation of the GGNRA] is to ... expand to the maximum extent possible the outdoor recreational opportunities available to the region." (H.R. Rep. No. 1391, 92nd Congress, 2nd Session, 1972)

Fort Funston is not a pristine park - Fort Funston will never be Yosemite or Yellowstone or Crissy Field, for that matter. If you were to deny access to people with dogs, the park would be empty most of the time, except for a few hang-gliders and horseback riders. People do not come to Fort Funston to stroll the paths, the terrain is too rugged for the average sightseer and has an ugly component caused by the high winds and sand-swept strong coastal conditions and the ice-plant that is necessary to keep the sand from blowing on the highway below. Other parks in San Francisco are more tourist friendly, have more picturesque views and are more appropriate for attracting the average visitor. Crissy Field is an example of such area where I can actually see how the dogs might impact the visitor experience and I do agree that the dog access should be restricted there.

#### NO STUDY TO SUPPORT Restricting Dog Walkers Pack Size to 6.

There should be some reasonable restrictions on the number of dogs that dog walkers are allow to walk off-leash at one time. I agree that 15-20 at a time is too many. However, I do believe that your suggest number limited to 6 is impractical and unfair. The San Francisco city supervisors already reviewed this issue and concluded in 2012 that restricting the number to 8 makes it possible for dog walkers to make a living wage. Below that number, it would be really hard to live in this city. Dog walkers in San Francisco play a vital role in helping families to be able to own a pet that brings them such unbelievable happiness and joy. Restricting dog walkers to fewer than 8 dogs off-leash impacts our ability to make a living wage and provide this service to San Francisco families. Matching the city park limits is the best decision for all concerned and the supervisors and Mayor Ed Lee have all voiced their concerns that if you do not match the city, you will be causing impact to nearby city parks.

The SEIS is not valid because it does not adequately analyze impacts on nearby parks.

This analysis was requested by public comment to the DEIS and by the San Francisco Board of Supervisors in 2011. The SEIS claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. It also claims that because people will still be able to walk their dogs on-leash at some sites, most will continue to walk in the GGNRA. No evidence is given to support either assumption. The SF Supervisors and dog walkers asked for a thorough analysis. It is my belief that reducing off-leash dog walking areas will negatively impact other dog parks or adjacent lands through overcrowding and you have not adequately analyzed the impact.

The SEIS will not allow off-leash dog walking on any trail anywhere in the GGNRA is an impractical restriction.

"Some commercial dog walkers complained that they cannot control their dogs on leash on trails, and suggested that the trails should be off-leash for the dog walkers safety."

Restricting our ability to walk dogs off-leash on trails or near our parked vehicles creates problems as well. There are reasons that we do it the way we do it. For example, grasping several dog leashes at one time hinders the dogs ability to eliminate waste. Many dogs need to run a bit to get their systems moving and some need to turn in circles, while some are embarrassed and like to look for shelter to hide, just as humans do. We cannot change this, this is a fact of life for dog walkers. It is physically impossible to reach down and pick up litter while holding on to 6-8 leashed dogs. Others want to poop, others are charged up and want to play with the dog standing next to them or a dog several feet away and some just want to run to the beach and jump in the water! And this is all occurring as we are bending over to pick up the litter. Could you make it work? I sincerely doubt it!

By the time we get to the park with a truck full of dogs, they are excited and are high with energy, which makes it nearly impossible to walk them all leashed. Again, this is why it is so important for dog walkers to be able to let their animals out of the vehicles unhindered. Because they are powerful animals, it is a safety concern that we do it this way. Walking a pack of 6-8 dogs leashed directly from the vehicle and down the trails is a dangerous proposition. There is a much greater possibility that dog walkers can become injured in the process by excited dogs lunging, twisting and pulling them down the treacherous paths, than if the dogs are allowed to descend the paths on their own. Holding on to several leashed dogs going down a hillside is dangerous because we do not have the use of our hands and limbs to save us from falls. It would make our jobs so dangerous that it would exclude many of us from utilizing this area of the park, limiting our usable space even further.

There should be NO Fences!

Another reason I oppose the SEIS Preferred Alternative is because you propose to install fences around the proposed off-leash areas at Fort Funston. Fences will make off-leash areas feel like pens and squeeze too many dogs into a small area at Fort Funston. By reducing and limiting the areas in which dogs can access off-leash, you will be concentrating many more people and dogs into a confined area which will escalate tempers of both humans and animals. By leaving the NO ACTION Alternative in place, you actually increase everyone's ability to get along peacefully. Dogs and People do not do so well when they are forced into smaller areas where "their space" is invaded by others. It will not be a pretty sight. Just imagine a concentration camp and that is what it will be like.

The SEIS is not valid because the MONITORING BASED MANAGEMENT STRATEGY contains a Poison Pill that nobody wants!

I also oppose the Monitoring-Based Management Strategy that replaced the DEIS' Compliance-Based

Management Strategy because it unfairly carries a "poison pill". The MBMS is still based on compliance. It still is primarily focused on mere compliance with leash laws and the GGNRA can consider changing off-leash status for non-compliance even if no impacts on resources or other visitors are reported.

#### Invalid assumptions regarding Protecting Wildlife

One of the main objectives of the Management Plan states that it is to protect native wildlife and their habitat, which includes harassment or disturbance by dogs. Other uses of GGNRA lands (e.g. hiking, biking, hang-gliding, horseback riding) have a greater impact than dog walking and their access is not being limited or addressed. Birds and other wildlife have the rest of the California coast to make their home, while San Francisco needs a place to exercise a growing dog population.

We talked about ground-nesting birds being at risk because of off-leash dogs in the area, yet raccoons, coyotes, and humans are just as detrimental. The birds don't appear to be scared of dogs. If you ever watch a dog swimming or running towards one, they wait until the last minute before moving, and then only move a short distance away. The birds appear as if they're teasing the dogs. The birds, in all honesty, seem to be playing with the dogs.

Any of the areas where dogs would be restricted on the premise that dogs are impacting wildlife are currently doing well, despite the fact that dogs are present there. It has not been shown that removing dogs from the GGNRA will have a beneficial impact on wildlife in the park. Wildlife has adjusted over time to dogs so they are no longer viewed as a threat, and dogs are not impacting wildlife. The SEIS admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils (p. 373). Yet they also claim these impacts are currently occurring in the GGNRA and therefore dog walking must be curtailed to stop them (e.g., p. 97). Without site-specific studies, there is no proof impacts are occurring.

SEIS admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. However these anecdotal claims have no context - how frequent were they, how serious, etc. - and cannot be used to set policy. A SEIS is supposed to be based on science, not anecdote. The SEIS also says it relies on the "best professional judgment of NPS staff" to determine impacts from dogs and their importance when there are no scientific studies of impacts in other parks available (e.g., p. 396). NPS staff have demonstrated a long-standing, strong bias against dog walking, and the SEIS should not depend largely on their biased judgment and anecdotes for "proof" that impacts from dogs are currently occurring.

Bottom line it seems that the biggest concern is for people who do not like dogs and I think they should avoid Fort Funston since they know there is a possibility that they might run into dogs and go to the MANY other places that they can enjoy where dogs are not allowed. Fort Funston should be the "Dog's Place" where they can enjoy the 1979 Pet Policy - with no restrictions!

<b>Correspondence:</b>	I have two energetic and wonderful and coming dogs. I live in mill Valley. I rely on having access to off leash areas. I am always considerate and I make sure that I pick up after my dogs.				

---

Too many areas are already restricted for off leash. There are not many places I can take my dogs currently. Please do not restrict any more areas. It's not fair. Dogs need to have places to run and be free. We all need to share this community. Have negligent owners learn the rules of having off leash dogs. Post signs to be respectful. Issue citations. Offer more dog poop bags. But please please do not restrict any more areas. It will be cruel to owners and dogs.

**Correspondence:** I strongly OPPOSE Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog, Ruby to Muir Beach, Homestead, Oakwood Valley and the Marin Headlands.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Again, I support the "No Action Alternative" in the SEIS for each area: Muir Beach, Homestead, Oakwood Valley and the Marin Headlands.

Lastly, the SEIS preferred alternatives force people into their cars, in search of places to walk their dogs. This is bad for the environment and bad for Marin County!

**Correspondence:** I am writing to oppose further restrictions on dogs in the GGNRA. I believe strongly in the need to protect the areas, but I do not believe that on leash dogs cause any more harm than human encroachment has caused, and in fact, there is no comparison whatsoever. I advocate enforcing existing regulations but not further limitations on tax-paying local residents who wish to have their dogs accompany them on specified outdoor trails and other locations.

**Correspondence:** As a San Francisco resident of almost six years and I strongly oppose the restrictive dog management plan the GGNRA is considering. For both dog owners and non-dog owners, the new plan would greatly diminish the quality of life in the Bay Area.

The Preferred Alternative is far too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

Â· I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

Â· I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

Â· The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

Â· The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

Â· The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

Â· The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

Â· The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all.

This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

Â· The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

**Correspondence:** OUR national parks, recreation areas were created for both the preservation of the United States' ecosystems and the experience of the same by the people. It is an unfortunate fact of life that rules are required to maintain Homo sapien behavior within acceptable bounds. Oddly, nowhere is this more obvious than in the Bay Area where we pride ourselves on being so intelligent and the "pace setters" for the United States.

Why are we spending such huge and unnecessary amounts of time because of the whining of a few dog walkers? Follow National Park rules: dogs are on leash. I have been told that even in Southern California on the beaches, police really do police the areas and KEEP people keep their dogs on leash.

This is only a people problem, not a dog problem. The troublemakers, the complainers, are those Homo sapiens who use their dogs as projective means, i.e. they take pleasure in letting their dogs run anywhere, everywhere as the dogs simply do what the poor Homo sapien wishes they could do- -have no boundaries. We have spent far too much time and resources pandering to these people. Put down the rules, AND MORE IMPORTANTLY, ENFORCE with fines. That seems an excellent way to add to the financial

resources of parks while protecting and enhancing our parks.  
John and Janet Fiore

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, of the published alternatives, I support Alternative A, the No Action Alternative.

I am a resident of Central Marin and work in Southern Marin. I regularly take my dog to the following areas under GGNRA control: Muir Beach, Oakwood Valley Trail, Oakwood Valley Fire Road, Miwok, Alta Trail, Rodeo Beach, Rodeo Beach Loop. Very often the only other people I see on these trails are other people walking their dogs. This use by my family and my dog and other dog owners is I believe completely consistent with the founding goals of the GGNRA - to provide recreational opportunities for local residents and visitors.

I've never encountered any hostile dogs, though I accept they must exist. As do hostile humans, and other predatory wildlife - they can all be controlled via existing enforcement mechanisms. Dogs are already off-limits on over 99% of the Golden Gate National Recreation Area, so using logic and mathematics alone one can conclude that they cannot possibly be having a detrimental impact on the area as a whole. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands. The public as a whole must agree since their comments in 2011 ran 3:1 against the plan as proposed back then.

The Golden Gate National Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite and it is most certainly not a wildlife preserve or sanctuary such as the Mojave National Preserve or the Gulf of the Farallones National Marine Sanctuary. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained. So again I reiterate my support for Alternative A.

**Correspondence:** I strongly oppose Plan F, in favor of Plan A. In Marin, where great things happen with regard to the environment, we get carried away with our "good deeds," at the risk of losing our soul. That is a sign of misplaced power. To access the incredible outdoors is a right that was provided us through access to Park Service trails way back in the 70's. To limit access is to virtually exclude those who most frequently use our trails- people with dogs- and to deny us the joy of where we chose to live. Will future generations be deprived of a freedom we once enjoyed?

I am in favor of leash laws in many of these spaces and cleanup responsibilities of dog owners, but please be cautious about acknowledging the fears of a few uptight do-gooders, at the cost of the right to access and joy for all.

**Correspondence:** I 100% OPOSE these proposed restrictions I have always had a dog. GOOD dogs are GOOD because they are well exercised and allowed to BE DOGS. The people who oppose this open space must not be dog owners because they are completely out of sink with how special these creatures are wired. Saying things like "they can play in dog parks" is like holding them prisoner in our beautiful world. Dogs need their exercise. I get MY exercise walking my dog. We MUST do all we can to keep these spaces open. Kids have play grounds&.it is like saying they can only play with in the fences of a playground. PLEASE&do not limit the space dogs can walk FREELY.

**Correspondence:** Hi. I realize you have a tough job at hand. There is no way you can make everyone happy. My comment is to please consider leaving Fort Funston as it is now and not reduced to less off leash area. Rather than slightly reducing each dog area (Chrissy Field, Ocean Beach, etc.) make cuts in off-leash areas where they matter most and leave as is some areas. Everyone knows Fort Funston has dogs so if those people don't want to be around dogs, let them go to Ocean Beach. Pick and choose your battles - and I think Chrissy Field and Ocean Beach have a lot more non-dog people who just want to relax without being bothered. But give us dog people at least 1 spot where we can still go without having to worry. Don't treat all areas the same, please.  
Thanks for listening and good luck.

Heather Sears  
San Francisco dog owner

**Correspondence:** I would like to add my support to the NPS policy of limiting dog and "off leash" dog access to NPS (GGNPS, Open Space) parks and beaches .

I hike, bike, and recreate almost daily on Southern Marin open spaces. The negative impacts from dogs and dog walkers is a regular and unpleasant experience. I have been bitten by small white fluffy dogs (off leash) with owners who swear that that has never happened before. I have been pushed to trail edges by dogs running ahead of or catching up to their absent owners. This is very, very common with trail runners who conveniently don't see where their dogs take a dump either. I have been given patches of poison oak after said dogs brush past my calves and ankles. I have been "greeted" by jumping, barking, "friendly" dogs who are clearly not under anyones control. These owners don't see the problem with this behavior because they welcome dog interaction. Many of us do not. I don't want a dog nosing my hands or pants or running across my beach blanket to see what I'm eating. This is considered a friendly and positive experience by dog enthusiasts who just don't understand that it's anxiety producing for parents of babies and small children, frail or older folks or non-dog lovers.

I haven't even mentioned the trail short-cutting that I see dogs doing on switchbacks, the crazy amount of dog excrement on and around trails, (and why should we have to pay for a company to pick that up ) as well as the number of times I've seen dogs chasing an animal off trail...who knows to what end.

I'm not sure what the NPS can do about enforcing the leash laws. I have hiked with dog walking friends who are otherwise law abiding people who take off the leash when they deem it safe (from a ticket) and make a point of warning other dog owners if they've seen a park service employee. But I do hope that they continue to recognize the negative impacts and restrict dog access. Most times people have to get in their car and drive to an appropriate site to swim, fish, ski, kayak, rock climb, roller-blade, or fly a kite. What is the objection to driving to an appropriate area to exercise and socialize one's dog?

As a responsible dog owner I hope that the National Park Service will reconsider its stringent stance in limiting off-leash access to the Golden Gate National Recreation Area.

I consider myself, like many others, respectful of the public land, native plants, and animals that are also trying to thrive there.

Please do not punish all pet owners for the disrespectful few who do not control or pick up after their animals.

All of us, regardless of pet ownership, have a stake in being able to enjoy the Golden Gate National Recreation Area - the time I could spend in the GGNRA would be very limited if I were not able to bring my dog or let him exercise off-leash. Please allow us to keep that precious 1% of off-leash that is currently available.

It would be such a shame to ban dogs from the GGNRA. I am a native and a current resident of Mill Valley and one of the perks of living here and owning a dog are the trails and beaches. I am a respectful and responsible dog owner and always pick up after my dog, stay on the designated trails and never encroach upon the natural habitat.

I support the No Action Alternative in the SEIS for each area: Muir Beach, Oakwood Valley, Marin Headlands & Homestead.

The SEIS contains no peer reviewed, site specific or monitoring as required by law to initiate such a drastic change to the use of our public lands. The changes made in the 2013 SEIS do not properly address the concerns voiced in 2011 & those comments ran 3 to 1 against the plan.

As you know the GGNRA was established to give us outdoor recreational areas in a urban environment and should be treated as such. There should be a different management approach for the GGNRA than wilderness areas like Yosemite or Yellowstone. Please retain the longstanding 1979 Pet Policy.

My family, my friends, myself and our dogs really hope that you consider these points and make a decision that is fair for us and our K-9 companions. Thank you for your time.

Sincerely,

---

Mari Walsh

**Correspondence:** Having moved to Marin a couple of years ago after living in many other states, I've been amazed by how restrictive the existing dog policy is. I can't imagine making it even more restrictive. I lived in Portland, Oregon most recently and always went for walks on the weekend with my dog. We'd pick different trails each weekend and would never even have to think about whether our dog would be permitted to join us... it was never an issue. My family still loves to walk on trails each weekend but now we almost never bring our dog - - he's not permitted in most of the areas where we walk. He loses out on the exercise, and my family loses out on the joy of having him with us.

We just returned from having taken our family, including our dog, to Muir Beach... one of the few areas that I know our Beagle is welcome and where he loves to run around, to everyone's delight. I was disappointed to learn that Muir Beach is one of the areas where the new dog policy will restrict dog access. I'd sincerely ask you to reconsider this change.

We have an amazing outdoor area around us, and one of our greatest enjoyments has always been to share that with our family's dog. I wish that the discussion would be around expanding dog access, but I would at least ask you to not restrict it further.

Regards,  
Brad Rodrigues

**Correspondence:** I am vehemently opposed to Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

A big reason why I stay in Marin is because of the access for my well behaved voice controlled dogs. I regularly take my dog to many of the Marin County beaches. Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. As a 32 year Marin Resident I rely upon this open space.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** I am writing to support the proposed revisions to the dog management policies in the GGNRA. I am an avid hiker and runner who uses the GGNRA regularly with my family, and I also own a dog that enjoys outdoor adventures, so I am definitely a "pro-dog" person. That said, I think that the current liberal policies for off-leash dogs have gone too far within the GGNRA, particularly since it encompasses such special and sensitive habitat areas for birds, native plants and mammals. Many dog owners disregard postings in the sensitive areas that prohibit dogs, and I know that budget cuts limit enforcement of regulations. I think the pendulum has swung too far.

I have been distressed to witness irresponsible dog owners let their pets chase (and maim in one case) the wild shorebirds that enhance the beauty of the beaches at Ocean Beach and Crissy Field. I have been angered by off-leash dogs at Crissy Field whose inattentive owners allowed them to urinate on my personal belongings that were on the lawn and torment my dog that was within my control on a leash.

I think that a happy medium can be found in GGNRA that provides better protection of visitors and the environment from unleashed dogs. Perhaps you can add more designated "dog play areas" where dogs can cavort off leash, without running amuck among the bicycles, picnicking families and migrating wildlife.

As someone who is very supportive of the Save The Bay campaign, I am very appreciative of the efforts that have been taken to restore habitat to wildlife while also providing enhanced access for public enjoyment. Please don't allow unleashed dogs to diminish those efforts that are so important for future generations.

With appreciation,

TF

**Correspondence:** I love dogs, but I think that we deserve at least one public beach (as the proposed Ocean Beach) that is reserved for human beings alone. I walk/run Ocean Beach at least five days a week and every dog owner that I view feels that they are exceptions and allow their dogs to run off leash. I have had large dogs run up and frighten me when sitting quietly on the beach.

On most days there are more dogs than humans on the beach, and it is impossible to walk barefoot anymore for fear of stepping in dog waste. Even wearing shoes I am not able to keep my eyes on the ocean and the surrounding beauty, but must constantly look down to watch what I am stepping in.

I saw the sign posted about this Plan on the Great Highway entrance to Ocean Beach at the stoplight at Lawton St.

**Correspondence:** I support the GGNRA's plan to restrict the presence of dogs at most park lands. Not everyone is a dog owner or even a dog fan. I'm sure I don't need to reiterate the reasons dogs should be leashed on any parklands, and not even present at all in the wilder areas.

I know you are going to get a lot of comments from dog owners and dog lovers on this, since there are several online campaigns aimed at getting people to submit pro-dog comments. I urge you to stay the course, thus helping to ensure a good user experience for everyone, and preserving wildlife and its habitat.

**Correspondence:** I'm writing to strongly oppose the GGNRA dog management plan preferred alternative. I walk with my dogs on a regular basis at Fort Funston and Crissy Field, and the preferred alternative will negatively impact me, my family and the entire San Francisco community.

There is no justification in the dog management plan for the major changes included in the preferred alternative. Rather, I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption. I am sure that places like Stern Grove will be inundated with dogs if the preferred alternative is implemented.

The GGNRA is a national recreation area, not a national park. But the dog management plan misrepresents the GGNRA's enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

Recreation is the reason the GGNRA was created, and recreation must continue to be its guiding principle.

**Correspondence:** I am in favor of the NPS recommendations presented in the Draft Dog Management Plan. I am a resident of Homestead Valley and frequently hike in many of the areas effected by this plan. While I love dogs, I have all too often encountered dogs in prohibited areas where sensitive habitat and wildlife are impacted by off-leash dogs. Now that the ecosystem at Muir Beach has been restored, it would be a shame to have off-leash dogs hinder the reestablishment of the flora and fauna that is intended. I'm also very pleased to see the proposal for on-leash requirements at Oakwood Valley. I frequently encounter dog walkers with far more than 6 dogs running off trail and into the woods and creek beds. Combined with poop bags left along the trail, walking here is no longer very enjoyable. I am also please to see that the NPS preferred plan would keep dogs off the N Miwok trail - a place where I have frequently seen bobcats, coyotes, and lots of birds.

It is important to have resources in place to monitor and police the regulations in the final plan. Somedog walkers seem to think that they're special and that it's no big deal if they let their dogs off leash or take them to places where they are prohibited. It's not all that uncommon to see a dog or two on the Tennessee Valley Trail - a no dogs allowed trail. I will generally point out that dogs aren't permitted because of the sensitive ecosystem, but the response is generally unpleasant. And with not one to hold these people accountable, it they will continue to flaunt the rules.

Dogs do need places to run and play, but not at the expense of public safety or the protection of sensitive habitats that will be enjoyed by generations to come.

Thank you to the NPS professionals who have compiled the data and are working to ensure sound requirements for dogs in the GGNRA.

**Correspondence:** You are trying to take away what is one of the best and unique things left in the bay area, a place that doea not let us take dogs EVEN with leashes on most parks! Dogs NEED a place to be off leash, in order to be healthy and able to mingle and socialize with other dogs. Ive been here for years and have never heard of complaints from other beach goers, even those without dogs. It is such a special place that allows humans and animals to be free in such a beautiful place! Everyone is super aware to clean up after their dogs and if there is some dog dirt that is somehow forgotten, the culter of the regular beach goers there tend to pick up ANY dogs waste that is found.

I have never seen any evidence of the concerns expressed in the 2013 SEIS. I fully support NO Action alternative in the SEIS for Muir Beach, Homestead, Oakwood Valley and Marin Headlands.

If it isnt broken, dont fix it! Please RETAIN the 1979 pet policy!!!!!!

This area is a recreation area designed to give outdoor space for us pet owners to escape densely popuklated areas with our dogs, please dont take this away from us. You already have 99% cosed off to

---

us already!

I feel our tax dollars could and should be better served than to mess with this!

regards

Rej Bourdages

**Correspondence:** I am a dog owner, hiker, beach user, mountain biker, and outdoor enthusiast. I like having areas where I can take my dog and hike, but I am concerned about the potential impact of off leash dogs on trails and in areas such as Muir Beach.

In walking my dog through water district lands (leash required), open space lands (leash required except on fire trails), and other such areas, I often wonder about how seemingly law abiding dog owners turn into anarchists when it comes to their dogs.

I have seen too many dogs who run out of visual sight of the owner. I have seen too many owners who may believe that their dog would be under voice command, but the dog does not come when called. I have been in nature reserves (leash required) areas where dog owners have frantically called to their dog for over a half hour and were still looking for the dog when we walked by. I have been told by dog owners that leash requirements do not apply because everyone takes their dog off leash in particular areas. I have had dog owners who look at me like I am being unfair when I ask them to call their dog. And I have had a dog or two take a nip.

At Muir Beach, I would support a return to the original plan of keeping dogs away from the beach altogether. There are other beaches that are more open, where it is more appropriate to allow dogs. But if dogs were allowed, I would want to see them on leash, with those restrictions enforced.

**Correspondence:** My husband and I moved to San Francisco last year and a big consideration was to be near somewhere we could let our dog off leash regularly. With my mutt, I run in the Presidio alternate days, visit Chrissy Field on the other days and go to Baker Beach and Fort Funston several times a month. I am concerned that such a progressive city is proposing to cut out one of its highly attractive feature for no reason. I am not aware there are any negative impacts from off leash dogs. The proposed ban will stop off leash from places that have been allowing it for years (in Marin). I am also concerned that any future lands purchased will automatically ban off leash, even if it has been allowed before.

In my experience, dogs, especially my own, are much more social when off-leash, are much less aggressive, and fight less.

Finally, the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population". A great number of these people have dogs and enjoy the park, outdoors, exercise, and restricting them in their enjoyment seems outside the aims of a park.

**Correspondence:** I support the freedom to have dogs under voice command and off-leash in the GGNRA. I am an avid hiker. In the many contacts with dogs, both on and off-leash, there have been hundreds of well-behaved, well-controlled dogs both off and on-leash. I would love a non-emotional count of the number of aggressive dog attacks vs the many well-behaved dogs on trails. I also do not have

---

a controlled study of this, but would guess that the dogs causing problems are in the vast minority, yet, get all the press.

I have a dog that is controlled under voice command, stays close to me and is submissive to other dogs. He needs places to be able to roam and look about. Due to his submissive nature, dog parks are not a good option for him. So, the idea that open space should be on leash and owners should just take dogs to a dog run, is not a good solution.

I strongly support Alternative A and other motions that would allow dog owners to take control of their pets and determine which dogs should remain on leash and allow others to be off leash.

<b>Correspondence:</b>	I am against more off leash dog restrictions in San Francisco.				

I walk my dog at fort funston twice a week as do many many people, if you haven't been there on a sunday afternoon or almost any day when people are off work, please take the time to check it out for your self, you will see how meaningful this space is to the 180,000 dogs and the owners who live in this city. It brings quality of life to a very busy crowded city. The people i bring there love the beauty of the place and the dogs walking. It is important to have space for animals to roam and burn off energy especially when they have to be on leash almost all the rest of the time.

There are already tons of beach areas for people without dogs and lots of places for birds to nest. In this city I have to live with coyote enthusiasts, native plant enthusiasts, bicycle enthusiasts etc. The part of the GGNRA that is off leash is miniscule relative to the amount of space that is restricted. I would hope the city could afford the same respect to me and my love of dogs that I have to afford all these other groups.

Are these restrictions really necessary?

Thank you

**Affiliation:****Received:** Jan,12,2014 22:23:08**Correspondence Type:** Web Form**Correspondence:** Thank you for managing this process.

I support dogs on leash in public areas, I do feel dogs off leash under voice command is very important. If pet owners let their dogs go into unauthorized areas that should be fined.

Please do not restrict any additional areas for dogs. Marin is a very unique area and the laws and considerations MUST address this area not others that are different from Marin.

**Correspondence:** I don't know how much all this analysis is costing tax payers, but I do believe it's an unbelievable waste of money. Doesn't the Park Service have anything better to do than cater to the whims of the anti-dog crowd? Why don't you just designate one or two beaches for them to have without having to worry about other people's pets?

Personally, I believe the beaches should be left to voice control. Just adopt stiff fines for violations - innocent until proven guilty - like with humans. The owners who clean up and raise friendly dogs should not be penalized because of a few bad apples. And by the way, I don't currently own a dog - it's not worth it with this kind of legislation pending.

What has happened to the Park Service anyway? You get a little power and a lot of money and suddenly you become so heavy-handed? Marin fought to create these parks many years ago and did not expect them to be managed this way. People have enjoyed exercising their pets in these parks for 50 years and it's not okay to take away this privilege.

What's next? No smoking? No drinking? No snack foods? How about restricting certain swim wear? What else can you try to regulate in our parks? PLEASE - enough with regulating anything you can think of!

If certain people hate being around dogs, give them designated areas to go and leave the rest to us - the real majority on this issue.

**Correspondence:** Overall, I am extremely concerned with the reduction in liberties in this document. I do not own a dog, but do not want to impose on others with dogs that want to walk them. I prefer the alternatives that maximize the access for everyone, with and without dogs.

Regarding off-leash access, the document references conflicts an wanting to reduce conflicts by banning dogs. That would certainly reduce the possibility of this type of conflict, but reducing liberties for all because there are a few people causing conflicts is always the wrong solution. It would be fare more equitable to hold the people causing conflicts to be responsible for those conflicts. Increase fine for owners of aggressive dogs who are not able to control them. But don't punish the owners of well behaved dogs who are under full voice control?

**Correspondence:** I own a home here in San Francisco and have a dog that we rescued from a shelter and like to walk and hike with each week. I'm very concerned with the proposed plan to dramatically reduce where people can walk and hike with their dogs on GGNRA lands, including: banning dogs from the vast majority of Fort Funston, the East Beach at Crissy Field, and most of Ocean Beach; limiting off-leash dog walking in Marin County to Rodeo Beach; and prohibiting off-leash dog walking anywhere on GGNRA land in San Mateo County. Families with dogs should have equal access to all GGNRA lands. Please reconsider your intention to restrict my family's access. Thanks.

**Correspondence:** As a dog owner living next the the Alta trail, having off-leash trails to walk on has numerous health benefits for myself and my dog. In the 5 1/2 years I have been walking my dog daily on Alta trail and Oakwood Valley trail, I have encountered nothing but other content dog owners enjoying the GGNRA. I also recongnize that the majority of trails are not available to dogs and I respect this. The GGNRA was established to give recreational opportunities to people in a densely populated urban area. Because of this it requires a different management approach than National parks.

I am writing this comment to tell the GGNRA to retain the longstanding 1979 Pet Policy for the following reasons:

"The SEIS contains no peer-reviewed, site-specific studies or viatl monitoring as required by law to initiate such a dramatic change to the public's use of their public lands".

Changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filled in 2011 and that comments in 2011 ran 3:1 against the plan.

I support the "no action alternative" in the SEIS for each area: Muir Beach, Homestead, Oakwood Valley and Marin Headlands.

Please don't force people in to their cars in search of places to walk our dogs! Please recognize that the Recreation Area is also for people with dogs!

**Correspondence:** Hello GGNRA-

My name is Sarah and I've lived in San Francisco all my life. My husband and I are avid hikers and a few years ago decided to rescue a dog. We soon learned that we could no longer go to many of our favorite

---

trails with him. This is why it is so important to us to have space in the GGNRA lands to take our hiking buddy. It's really is just not the same walking a dog on leash compared to off leash. Our dog is well trained and stays with us on the trail.

I am especially concerned about the Hill 88 hike in the Marin Headlands. This is the only place in Marin that we humans can get in a good hike with our dog! A small dog area does nothing for us getting exercise!

Because the current plan that is being put on the table, I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Please, leave GGNRA lands alone! I am a tax paying SF resident and want to be able to walk my dog off leash!!

thank you,  
Sarah Breivis

**Correspondence:** I have three dogs that, like I, live for being out on the trail in wide open spaces. I am an avid trail runner and will only run trails where I can take them with me. Half of the pleasure of running for me is to see the pure joy they exhibit when I take them out on the trail. The GGNRA was established to provide this outlet for creatures like us that live in such a densely populated urban area. To deny them access to these trails, is effectively denying me access to them as well. I am originally from the East coast, and moved out here primarily for the access to open space that did not exist on the East Coast, as well as the extremely unfriendly dog policies in effect back East.

Please don't turn Marin county into an unfriendly pet area. I am also a realtor, and good trail access, where people can walk their dogs factors large into many a home buying decision for my clients.

In my opinion, humans are far more harmful to the natural environment then dogs will ever be. Do not take away some of the last places in the area where they are allowed to reconnect with their 'inner wild dog'.

Thanks,  
Michelle

**Correspondence:** To Whom It May Concern:

I strongly oppose Alternative F, the dog management plan to restrict off-leash and dog-friendly access in the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I am a Marin County resident and regularly take my dog, Piri, a small terrier mix who loves the Headlands, to Muir Beach and Rodeo Beach, and hike with him along the Coastal Trail, Wolf Ridge, and Miwok Trail. I am respectful of the heavy dog restrictions that exist all ready and do not take my dog on trails where he is not allowed.

As its name implies, the GGNRA is a recreation area, not a national park or wilderness area. People should be allowed to "recreate" in a variety of ways including walking, running, biking, and with their dogs. I can understand making certain trails off-limits to bikes and certain trails off-limits to dogs, but dogs are all ready allowed on VERY FEW trails in the GGNRA, and it feels very punitive to dog owners like myself to restrict them even further.

Walking the Coastal Trail between Muir Beach and Tennessee Valley with my dog is one of my greatest joys, and being out there with Piri makes me so appreciative to live in Marin County. I will be deeply

---

saddened and disappointed in the park service if this is taken away from us.

Sincerely,  
Rachel Alt  
Sausalito, CA

**Correspondence:** As a dog owner, I would like to strongly express my desire to retain the GGNRA pet policy as it has been for decades. GGNRA is a unique resource in our otherwise very dense Bay Area, and the loss of off-leash access to its trails and beaches would seriously impact the quality of life for residents, a huge percentage of whom have dogs. Permitting access to Rodeo Beach does not adequately address the issue of access for dog owners. The research done to date is insufficient basis for such dramatic proposed changes, and I encourage more thorough study- -as required by law- -before any modifications to policy are enacted.

**Correspondence:** I don't support increased restrictions on dogs in Marin County, and urge the federal government (as well as state, county and municipal governments) to allow off-leash dogs on all beaches and trails, so long as dogs are within owners' voice control. The opinions of a few have catalyzed an already onerous level of restrictions on our public resources, and to increase such restrictions further is only encouraging intolerance. In those areas where habitat restrictions are needed, rope off those areas in accordance with a publicly-approved natural resource management plan. Otherwise, allow the public, and their pets, to enjoy their (publicly-owned!) resources.

**Correspondence:** My name is Elizabeth Gaynor and I live in San Francisco, Ca (94115). I use most of GGNRA's off leash locations. Kylie my labradoodle dog is superbly trained and always comes back when called. Moreover she is an extremely active dog that requires quite a lot of exercise. In the three years we've had her we have NEVER seen a problem with dog owners disregarding the wetland rules at Crissy Field and very rarely see dog owners who don't pick up after their dogs. In fact we more often see humans littering as opposed to throwing trash away. The ability to take our dog off leash is one of the brightest parts of our weekend and provides her with the exercise she needs to stay healthy, fit, and happy. Moreover it is a wonderful family excursion that is irreplaceable.

With that being said, I oppose the GGNRA plan because it does not incorporate any of the suggestions made by others. It is far too restrictive and is not based on any scientific fact. I pay taxes in this city and deeply resent that my wishes are not being heard. Let's remember that there are more dogs in the city of San Francisco than children. More often than not I hear foreigners at Chrissy Field explaining in wonderment at all the beautiful dogs and based on the number of people who enjoy the area it does not seem to inhibit the number of visitors. Finally, if GGNRA significantly reduces the amount of space dogs have to run undoubtedly there will be more dog-dog problems as the dogs are squished into spaces that are far too small to accommodate the number of dogs using said space.

We should also remember that the Board of Supervisors opposes the plan and that the land was deeded to GGNRA under the condition that the space would be used in the manner that city residents wanted it to used.

Further:

â€¢I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

â€¢I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

â€¢I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

â€¢The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

â€¢The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much

smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

â€¢The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

â€¢The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

â€¢The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

â€¢The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

â€¢The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

**Correspondence:** My name is Mario Yovkov and I live in San Francisco, Ca (94115). I use most of GGNRA's off leash locations. Kylie my labradoodle dog is superbly trained and always comes back when called. Moreover she is an extremely active dog that requires quite a lot of exercise. In the three years we've had her we have NEVER seen a problem with dog owners disregarding the wetland rules at Crissy Field and very rarely see dog owners who don't pick up after their dogs. In fact we more often see humans littering as opposed to throwing trash away. The ability to take our dog off leash is one of the brightest parts of our weekend and provides her with the exercise she needs to stay healthy, fit, and happy. Moreover it is a wonderful family excursion that is irreplaceable.

With that being said, I oppose the GGNRA plan because it does not incorporate any of the suggestions made by others. It is far too restrictive and is not based on any scientific fact. I pay taxes in this city and deeply resent that my wishes are not being heard. Let's remember that there are more dogs in the city of san Francisco than children. More often than not I hear foreigners at Chrissy Field explaining in wonderment at all the beautiful dogs and based on the number of people who enjoy the area it does not seem to inhibit the number of visitors. Finally, if GGNRA significantly reduces the amount of space dogs have to run undoubtedly there will be more dog-dog problems as the dogs are squished into spaces that are far too small to accommodate the number of dogs using said space.

We should also remember that the Board of Supervisors opposes the plan and that the land was deeded to GGNRA under the condition that the space would be used in the manner that city residents wanted it to used.

**Correspondence:** I am writing to submit my comments on the revised 9/26/13 Draft Dog Management Plan. I appreciate the work that NPS has put into this document, but feel the proposed changes are too restrictive towards dogs and their owners.

My main comment is that the Draft Plan undervalues the role that dogs and the opportunities to walk them play in the public enjoyment of the GGNRA. A very high percentage of the users of many trails and areas in the GGNRA are walking their dogs. Without that opportunity, these people (not to mention their dogs), would be stuck inside or on city streets. Providing public opportunities for exercise and the enjoyment of nature and the outdoors is central to the mission of the GGNRA and of the NPS. The Draft Plan is overly restrictive, and would in many cases eliminate the primary factor that gets people into the parks.

My specific comments on some of the proposed area regulations are:

No reason to limit Homestead Trails to on leash only. Use of these trails is relatively light and I would guess the majority of users of these trails are in fact dog walkers. I have heard of no conflicts between dog walkers and other users, and see no reason to limit dog walking on these trails.

No reason to limit Muir Beach to on leash only. This has historically been a major outlet area for dog owners, and should continue to be so. It may be that some fencing should be installed to protect sensitive habitat, but otherwise dogs should be allowed to run on the beach, as they are now.

No reason to limit Miwok fire road south of Highway One to on leash only. This is a major, wide fire road, with plenty of room for multi-use.

And finally, thanks to the drafters of the current plan for continuing to allow (as I understand the Plan) dogs off leash on Ocean Beach north of Stairwell 21. Ocean Beach is a true treasure in San Francisco, easily accessible, and with a long history and culture of freedom and multiple use. Those who do not want to share space with dogs (a small minority), can easily take a left and walk south of Stairwell 21. Please keep Ocean Beach accessible to dogs off leash!

Thanks to GGNRA for the open space it provides to the Bay Area, and to our dogs for getting us out into it!

**Correspondence:** I fully support restricting unleashed dogs in the parks. Today I was at Ocean Beach and when I walked up the hill to the street I saw a sign saying that I was in the protected area for western snowy plovers (which I saw none of today, whereas when I moved here 12 years ago, I use to see them frequently). There was no difference along the areas of the beach that are supposedly protected, the dogs were running loose everywhere (I've also seen them loose in the netted area at Crissy Field). Dogs, like their human owners, are very destructive and do not stay out of "protected" areas, whether they have a fence around them or not, unless on a leash. Their human owners are often not paying close attention to what they are doing, and besides the harm to wildlife and plants that they cause, they can also be dangerous to people. Though most dogs are friendly and only cover you with muddy paw prints, some dogs are not - I have been snarled at and threatened by two different off-leash dogs in the past year - one in Golden Gate Park, which I managed to scare away by yelling at it, another at Fort Funston, where the dog did not back off after I told it to. I had to yell at it's owner, sitting some distance away - talking on her cell phone and not paying attention. She foolishly told me to just turn around and walk away from the dog. I did not feel comfortable turning my back on a threatening animal nor did I think it had more of a right to be there than I did. I had to keep "bothering" her until she finally came over and got the dog! People are often distracted and not paying attention to their pets, and I shouldn't have to fear for my safety because of it.

**Correspondence:** I oppose Alternative F, and support Alternative A. My husband and I have two dogs that we rescued from local shelters. We try to walk them frequently for both their physical and mental health. Alternative F would bar us from trails where we regularly walk our dogs, such as the Oakwood Valley Trail, and some of the Marin Headland Trails, and would restrict off-leash, voice control use on others that we walk them on, such as the Oakwood Fire Road and the Alta Trail. We also walk our dogs on the beaches near Crissy Field, and are concerned about dogs being banned entirely from the East Beach.

It is very distressing to lose the use of so many trails. There are already so many in Marin, where I live, on which dogs are restricted or banned. The Oakwood and Marin Headlands trails are especially important because in the summer they are among the few areas in Marin open to dogs where the weather is cool enough to allow us to safely walk ours on warm days.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. You haven't conducted any peer-reviewed, site-specific studies that support dramatic restrictions of the remaining 1% that are being proposed.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area and access for all users, including people and their dogs, was a cornerstone of the

original charter as detailed in the 1979 pet policy. For these reasons, I urge you to reject Alternative F and adopt Alternative A.

**Correspondence:** To Whom It May Concern:  
I am a dog lover/owner who is currently living in NYC but is from the San Francisco. My plan was to move back to the Bay Area in the next few years and I have been so excited to take my dog to some of my favorite dog friendly beaches and parks back home. When I heard about what was going on with these possibly new laws I knew I had to at least try to speak my mind.  
As much as NYC is an amazing city the one thing that is hard for me who owns a large dog is how unfriendly the parks and outdoor space is unless you can afford to rent or own a car and get them outside of the city. Even then the beaches here are off limits for most of the year and it is very sad for my water loving Chocolate lab. I think one of the things I was most proud of being from the Bay Area was how dog friendly our outdoor space is/was. We have some amazing parks not only for people but for dogs to enjoy off leash. I have heard of all the change going on in San Francisco with the astronomically high rent costs and the once artist filled city is now changed for the worse. Again living in NYC I'm no stranger to that story. However the one thing I would hate to see change is the regulations for animal lovers and nature lovers to be able to enjoy the breathtaking location of the Bay Area. Please reconsider this current idea to change these dog friendly laws!

**Correspondence:** I wish to encourage off-leash access to two of the beaches covered. My dogs love to run with other dogs on the beach and into the water. I have heard that these beaches were open to off-leash dogs before the GGNRS became the agency in charge and would like to encourage the historical precedent already set.

I believe Muir Beach would be good to go with plan 5-E that designates the southern portion of the beach

---

to dogs off leash.

At Crissy field I again wish for the dogs to run free and into the bay waters. I support plan 10-A.

**Correspondence:** My comments will pertain specifically to Chrissy Field, between the St. Francis Yacht Club and Fort Point.

This area is one of the great promenade walks in the world. It is a gathering venue, attracting residents and visitors of San Francisco for active and passive recreation. Included in the class of people who frequent Chrissy are those who run their dogs. This group has been using the area for many years prior to the GGNRA. The group is sensitive to the pristine nature of the beach and as you know, self-regulates litter management (picking up their pet's waste). The group does this voluntarily without question. I have been walking/running my dogs at Chrissy for years and like so many of those who comment on the leash law as proposed, I am amazed that this has become an issue. I understand that National parks restrict dogs and that the Park Service is a creature of conformity but I argue that The Presidio is unlike the other National Parks. It is a unique urban park and thus treated as such. People walking their dogs, on or off leash, interacting with others without dogs, sunbathers, runners, bicyclers, etc. It is a system that not only works, but enhances the Chrissy Field experience.

To impose a leash law would remove a certain character from the venue. This is not about dogs; it is about people.

If I might offer one point: Should the GGNRA feel compelled to leash dogs, a compromise might be to offer a time when dogs are off-leash. The use pattern for off-leash activity is early morning (dawn to 10 AM) and in the late afternoon. Follow

the current use patters and seek a compromise.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGNRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to various GGNRA trails and beaches. I ALWAYS keep my dog on leash, clean up after my dog and have control of my dog. Most dog owners doe likewise. There are some 'bad apples' in the bunch but this proposed legislation should not be directed solely because of the 'bad apples.'

Dogs are already off-limits on over 99% o the Golden Gate Recreation Area. I do think that there should be stiff fines/penalties to dog owners who do not control their pets or who fail to clean-up after their pets. Perhaps this will encourage everyone to appreciate the opportunity to continue using GGNRA trails and beaches.

**Correspondence:** I walk with my dog every morning. In order to be able to walk and work a full day I need to work as early as possible or after work. I would not feel safe walking without a dog at these times.

I appreciate nature and the community of other walkers I see out there. We are all very vigilant of cleaning up after our dogs. I always pick up any extra poops I see. Everyone else is as well. On Alto trail I often walk in about 3 miles and then turn round and walk back. In those cases when my dog poops I bag it and leave it for my return trip. Never once has the bag been there. This gives you an idea of how vigilant dog people are. There are so many trails for horses and bikes but so few for dogs. I love to see my dog run with other dogs. They are social animals. Please don't take the trails away from us.

**Correspondence:** I regularly hike GGNRA trails around Tennessee Valley and Mill Valley. In the past year or so the increase in the number of people on the trails with dogs off leash is tremendous. I see 5 to 20 of them on almost every hike I take. All the trails I hike are either completely off limits to dogs or the dogs must be on a leash. I have pointed this out to dog owners many times, and not a single one has put their dog on the leash as a result of "learning" that their dog is required to be on a leash. Many times the owners feign ignorance or treat me as if I'm doing something wrong by pointing out their disregard of the regulations. I've called dog dispatch a few times, but they never seem to be available to come give out citations. If there isn't any way to enforce the current leash regulations then no dogs should be permitted on the trails at all.

**Correspondence:**  
I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.  
I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.  
I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Optional Points to Make (choose as many or as few as you want):

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits

---

the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

<b>Correspondence:</b>	I think it is a bad idea to restrict off leash access to dogs, especially in large parks like Fort Funston, Crissy Field, Bernal Heights and McLaren Park. Dogs need and thrive on the freedom to be able to run around off leash. This is when dogs are the happiest and get the most exercise, which is so essential for a dog's well being. Let's not forget the effect this also has on tax paying dog owners. Humans get much needed exercise too taking their pets to these larger parks that provide lots of walking/running/hiking for both dog and humans, Take this all away and we are left standing in small, overpopulated and heavily congested city parks. Parks that are already heavily accessed by city residents and their dogs.

<b>Correspondence:</b>	Banning dogs on Ocean Beach SPPA is not the best use of our limited urban open space. People who live in the area need an area to walk their dog that is within a reasonable walking distance from their homes. Ocean Beach provides this for many residents who would have to otherwise drive somewhere. The alternative of Ocean Beach Trail is really not a fair trade off. It is too narrow to accommodate pet owners who have shy, fearful or even aggressive pets. It is easy to maintain separation from other animals and people while on Ocean Beach. On the trail, it is impossible. In addition, I love to see the Ocean when I walk my dog, On Ocean Beach trail, you can't even see it. I will have to take my dog home if I want to look at the Ocean-that is ridiculous.
------------------------	---

---

Since this area is not a designated critical habitat why does it need such a draconian rule? The national park service currently does not treat this area as if it needed extreme environmental protection. On the beach currently, between Lawton and Kirkham, there is a broken pier pylon (festooned with 40-50 rubber tires), a large grey plastic box (maybe it's a broken pier bumper-now it just collects trash) and a rotting seal carcass. Each of these things has been lying on the beach for MONTHS! If the sea birds were as delicate as some of the EIS suggests, surely this is not good for them. In fact, I am sure some environmentalist can use the same speculative approach in the current EIS to show these items are damaging to the birds.

If a new rule is put in place to ban dogs from Ocean Beach SPPA, how will you know if it was successful in achieving the desired goal with respect to snowy plovers? The EIS already states there are many factors (none of which include dogs) influence the number of snowy plovers that overwinter on the beach. So, if the number goes up or down, you won't even know if the dogs (or lack thereof) had anything to do with it.

I attended the open house at Fort Mason and spoke with a Ranger. I mentioned I was confused about the need to ban dogs since I see tons of snowy plovers on the beach every day. The Ranger said they probably weren't snowy plovers since they are really hard to find and hiding out in the dunes. If I can't find them when I am looking for them, how is my leashed dog going to even have the opportunity to disturb them? If they are hiding out in the dunes, then just ban dogs from the dunes. I never see any dogs up there anyway (I do see lots of people hanging out on the dunes).

The Ranger also mentioned the proposed rules were necessary since lots of people were violating the current law. Then why not just ENFORCE the current law? If you don't have the resources to do so, you won't have them under the new law either. So, the reasoning that it is easier to enforce the preferred alternative is not true.

In summary, my opposition to the proposed rule changes is simply because the reasons given are speculative and don't seem to match my experience. I am on the beach almost every day. There are just a few people and dogs there each time I go, lots of birds, and no dogs chasing them.

**Correspondence:** To Whom It May Concern:

Living in Marin County and walking trails and fire roads for the past 40 years and having owned a dog, I want to say that there are many places for dogs and owners to have outings. Our GGNRA is a real gem for the people in the Bay Area and it is used more and more. We must keep the area for use by people old and young as pristine as possible. Dog owners should be willing to walk on leash in small parts of the area, but I am against off leash running of dogs in any of the region. The fire roads in the area are littered with waste and not fit for children to roam. Wildlife needs safe areas to be. I think we need to keep to a minimum the areas for dog use in the Golden Gate National Recreation Area

**Correspondence:** The greatest joy I have in being a dog owner in Homestead Valley is the open space available to hike with my dog.

I am concerned about the GGNRA proposed dog management plan. The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011, and comments in 2011 ran 3:1 against the plan.

The SEIS contains no peer-reviewed, site specific studies or vital monitoring as required by law to initiate such a dramatic change to the public's use of public lands.

The GGN RECREATION AREA was established to give outdoor RECREATIONAL opportunities to people in a densely populated urban area. It requires a different management approach than wilderness areas like Yellowstone or Yosemite.

I strongly support the "No Action Alternative" in the SEIS for Muir Beach, Homestead, Oakwood Valley and the Marin Headlands. Please retain the longstanding 1979 Pet Policy!!

Sincerely,

Roberta Sarnoff

**Correspondence:** I am a mother of two kids and have lived in San Francisco since 1988. My kids and I take our dog to Fort Funston every weekend. It's a great time for my kids and I to get away from the electronics, be outside and enjoy seeing our dog - Freckles - in her favorite place in the world! We have been going there for years and now that my kids are teenagers there aren't that many things that I can get them to do with me. But we all love Freckles and enjoy seeing her jump and splash in the waves, so it is a special place for all of us. It would be awful if you took that away from us.

During the week I take Freckles to Ocean Beach, Fort Funston and sometimes Crissy Field, usually 5 times a week. Freckles, like all living things, needs space to run and be free. Putting her on a leash, particularly at Fort Funston, would be cruel and would be like telling kids that they couldn't run on grass but could only walk sedately.

I am a member of the Sierra Club, but I DO NOT AGREE with their position on this. I understand some of the issues with the birds, but if you want to really focus on protecting the birds you will also need to restrict people from GGNRA areas too.

**Correspondence:** December 30, 2013  
Frank Dean, General Superintendent  
Golden Gate National Recreation Area  
Building 201, Fort Mason  
San Francisco, CA 94123-0022  
RE: Draft Dog Management Plan/Daft Environmental Impact Statement  
Dear Superintendent Dean,

I am a 3 generation San Franciscan and have enjoyed taking my dogs to the Presidio, as well as other local public parks, since I can remember. As a responsible dog owner, and citizen of our great city, the

off-leash areas have provided my family and our pets great joy over the years. The off leash areas are crucial for their health, socialization, and recreation.

In prior years, I brought my late dog "Steve" to Crissy. Steve had a degenerative spine disease-walking for him was very difficult. At Crissy, I was able to take Steve in to the water where he could float and swim unencumbered by gravity. The access to the water not only gave him a better quality of life, it enabled to him to live a longer life as well. I often see similar scenarios now-handicapped pets able to wade and/or swim in the bay at Crissy. It would be a shame to take that away.

Now I go to Crissy Field, virtually every morning, with my 3-year old rescue dog "Georgia"-usually from 9:00 AM-10:30 AM. Except for the rare tourist (and they usually want to pet the dogs!), it is only dogs and their owners/walkers using this beach each and every morning. The dogs have the chance to run and play together, and swim in the gentle surf. If you were to take this valuable asset away from us, the beach would be empty in the mornings-an unused and sadly wasted resource.

I have read through your proposals to severely limit off-leash areas for our dogs, and then searched for the reasoning behind them. There were no facts I could find to suggest that having dogs romp on the beach in any way threatens the wildlife or environment at Crissy Field. The dogs do not breach the cordoned off areas that are restricted nor can they get near the wildlife in the marsh on the south side of the walking path. We dog owners and walkers are "regulars" at Crissy-always cleaning up after our pets and making sure they do not enter any of the restricted areas.

To quote from the ASPCA on the benefits of socializing and exercising dogs: "They {parks} promote responsible pet ownership; give dogs a place to exercise safely, thus reducing barking and other problem behaviors; provide seniors and disabled owners with an accessible place to exercise their companions; and provide an area for community-building socializing." in my opinion, keeping these off-leash areas available-as they are now- will benefit both the dog and non-dog owning public.

I hope you will consider letting the off-leash areas remain as they have since the Pet Policy was established in 1979. If there must be change, please consider available options that would have the best interests of both the dog and non-dog owning public alike. Allowing specific off-leash hours (perhaps sunrise to 11:00 AM; 4:00 PM to sundown) or keeping the west beach off-leash and restricting off-leash on the east beach would appease both groups.

I urge you to go to Crissy Field yourself in the morning to witness what I see every day. Happy, well-socialized dogs and their responsible owners enjoying one of our city's greatest and most beautiful treasures.

Respectfully,

Nancy Dickson

Gary Moore

President and CEO

Golden Gate National Parks Conservancy

201 Fort Mason

San Francisco, CA 94123-1304

Oct. 1,2013

Dear Mr. Moore,

I received a mailing two days after your first public meeting regarding the Presidio Exchange. After all the years of planning that went into this that seems like a pretty significant error. The fact is I am afraid to attend your meetings, anyway, because of how aggressive dog-owners are in shouting people down whose ideas they don't like.

I was also confused by the email I received a couple weeks ago stating it contained a PDF link to the new proposed plan. I tried to find it, but only found that the plan is in public libraries? Really, is that true? In this time of technological wonder you can't send out the plan? One has to go to the library. This seems like a very bad idea and a decision that will keep many people from reading the long-awaited plan.

I am disappointed that your mailing, touting the great new plans for the space didn't mention the three most contentious issues of space planning. Dogs, dogs, and dogs. I have lived in San Francisco for 32 years. For the first 30 I often took a morning walk in the Marina and Chrissy Field area. I used to see Joe DiMaggio talking his morning walk as well. I wonder if even Joltin' Joe would feel safe taking a calming morning stroll with the risk of pit bull attacks so common place.

It was never a good idea to consider dog toilet space and space for children and families to lie in the grass or play a good duel use of space. This is obviously a bad idea.

Your plan needs to include a dog free area. Maybe a 220 track, where citizens can take a health walk and children can play in the grass without tear of attack. There is plenty of space. A little of it needs to be saved for the majority of the people - non dog owners.

Now unlicensed dog walkers use publicly owned and maintained space to make a living without paying for the privilege of dumping tons of urine on Chrissy Field. If I put up a card table and tried to sell sodas without a license I would be ticketed and chased away, because someone else has the refreshment concession, yet tons of urine and feces can be dumped in a park, free of charge.

I stopped going, it was too stressful to be surrounded on the walking path by dozens of off-leash dogs, wet and excited, jumping, barking and nipping at each other. I have also been jumped on, pawed and nipped at from behind. When one reminds walkers that this is not an off-leash area one gets the same response, uniformly "Fuck you!" I'm not bothering to be polite and say "the F word," because I feel you should hear the truth.

I would come to your meeting if I could find a copy of your policy and if you could assure my safety if I expressed these opinions. Can you guarantee the safety of a non dog owner? Let me know.

I feel these years of process have been a waste of time if I am still afraid to go to Chrissy Field. I have

written in the past, even sent photos of off-leash dogs. And I get a dated mailing that doesn't even mention the issue that has driven so many San Franciscans from one of the most beautiful views in the city. One of the Seven Man made Wonders of the world is now a doggy toilet for vicious breeds.

Congratulations.

If anyone asks, or cares - I think there should be an area of Chrissy Field that is fenced in by your beautiful Native California grasses, where dogs are not allowed. People are allergic to dogs, people are afraid of dogs, some people have PTSD from childhood maulings, and some people just don't like dogs and would like a public space to be free of their poop, barking and entitled walkers and owners. I'm one of them. A former Chrissy Field user who hasn't been there in two years for one reason. FEAR.

In San Francisco a person with "social anxiety" can get a permit to take their dog anywhere, restaurants, grocery stores.. . but if a person has social anxiety around dogs they are told - fuck you, get over it. This philosophy seems to have carried into your organization.

Please put me on a list of people to be informed if there is ever a dog-free zone at Chrissy Field and let me know if you can guarantee my safety if I come to a community meeting or if I can write a letter that can be read without the being present.

Sincereley,

Douglas Holsclaw

<b>Correspondence:</b>	1870 Jackson Street, #502 San Francisco CA 941 09 January 6, 2013 Superintendent Frank Dean National Park Service Bldg. 201, Fort Mason San Francisco, CA 94123 RE: GGNRAIDog Management Policies Dear Superintendent Dean,				

Over a 30 year period, our family had the pleasure of owning two dogs, consecutively. As we lived in the City, we wouldn't think of allowing our dogs to run freely without a leash. I never observed that the dogs felt "deprived". When walking them, if we came to an "open area" where unleashed pets were allowed, we untied them. I visit Crissy Field frequently - I am a birder - and it appears to me that the areas zoned for dogs are more than adequate.

There have been times when I have chased dogs out of the Lagoon area and have suggested to the owners that they keep their dogs under better control. Most owners appeared contrite. I think that if the regulations are clearly stated, if there is no inconsistency among the boundary makers for the various areas, if monitoring is frequent and firm, then dog owners, on the whole, will comply. You will always have that minority that becomes emotional to the extreme when it comes to their pets. I think that the National Park Service has bent over backwards to please both sides - actually, many sides: seniors (such as me), dog owners, birders, families with small children, dog walkers, runners. The Golden Gate National Recreation Area serves visitors with a wide variety of interests. As visitors, it is our responsibility to respect and protect this beautiful environment for all to enjoy.

Thank you,

Alice Abbott  
Member, Golden Gate National Parks Conservancy

Mr. Frank Dean, General Superintendent

Golden Gate National Recreation Area, Building 201

Fort Mason

San Francisco, CA 94123-0022

Dear Mr. Dean,

I am writing to you because I wish to state my displeasure and disappointment with the Dog Management Plan being developed by the National Park Service for their various holdings within the Golden Gate National Recreation Area.

All of the five alternative proposals in the Supplemental Environmental Impact Statement, shown as Alternatives B through F, either remove completely or limit off-leash and on-leash areas from the lands under the GGNRA's stewardship. In my opinion the restrictive NPS "Preferred Alternatives" are not called for. Even the least restrictive alternatives seem needless, at least at the sites which I visit.

I visit Fort Funston and Ocean Beach in San Francisco, and Mon Point/Quarry in Pacifica, regularly with my dogs, and I have witnessed, for the most part, only joy...their joy as well as our own. We of course, as their guardians, are responsible for our dog's behavior, as we are for our own. Are dogs destructive of the natural environment? They can be...but the same can be said for us. I strongly believe that there are places where dogs do not belong, as I also believe that there are places where people do not belong. But neither Fort Funston nor Crissy Field is the Denali Wilderness.

As you know, dogs are by nature social beings...perhaps even more so than us. They ' and we ' benefit by their being allowed to experience life ' to romp with their fellows ' in a natural setting such as Fort Funston, freed for a few moments from the "no dogs allowed" conventional restraints which a dog and its caregiver faces on a daily basis.

We can never remake the Bay Area to look like it did some 300 years ago. But I do not see why we can't both protect the fauna and flora, as well as provide realistic open space for people with dogs by perhaps making the restrictions seasonally effective, in order to protect migrating/nesting birds and other wildlife. Sensitive vegetation/soils, sand dunes, and even historical relics, can be fenced off from both dogs and people.

I ask you to do whatever you can to leave our dogs the open space in which they can be dogs. Please help to find a more "compassionate" plan of action which will continue to allow us to share the natural settings which we are fortunate to have here in the San Francisco Bay Area with our dog companions.

Yours Truly,

Gene Chasey

**Correspondence:** Dear Superintendent -

The purpose of this letter is to express my thoughts about the Dog Management plans for the GGNRA.

1. name one park in GGNRA that is for dogs and their owners.

2. no dogs on beaches

3. dogs only on a few trails, they must be on a leash.

4. no dogs in the coves of Land's end, Baker Beach, Chives Beach (Sea Cliff area).

5. no dogs on beaches at Crissy Field - this is for birds sea life. I have seen seals on the beach. Dogs should not be allowed.

6. Increase fines.

Thank you,

Kathryn Hyde

**Correspondence:** Dear Sup,

I have visited Crissy Field for 50 years with my dogs! I would so hate to see this have any more changes than already have.

I am a 4th gen San Franciscan 5th Californian and San Francisco needs its beach for dog use. They need a place to get out pent-up energy - the children love to play with the dogs there also.

We don't need anymore aggressive dog behavior - changing the present rules will have a great impact on this. Leave Crissy Field alone. If anything change it for the reckless bike riders!!

Thank you,

Susan Jordan

Attn: Dog Management

Dear Superintendent bean:

Thank you for this opportunity to provide comments on the Supplemental Environmental Impact Statement (SEIS) for Dog Management in GGNRA. I am a responsible SF dog owner with 2 dogs. Most of the time I walk them in the SF City parks. However, it is always nice to know we can take them to Ocean Beach, Fort Funston or Crissy Field which we have done numerous times.

Nancy Pelosi has come out in support of off-leash dog walking in the GGNIA. According to official comments by SF Dog: there hasnt been any consideration of how city parks will be impacted by the proposed new plan restricting 90% of whats available now. Should the restriction occur, all the SF city parks would be deluged with hundreds of dogs. This would ruin the already crowded city park experience for everyone.

The 1980 GMP was based on recreational objectives as well natural, historic and scenic values. It was not written as a 'national park experience. These places - Ocean Beach, Fort Funston - are within city limits. We are not talking about a wilderness place like Yosemite. I support the No Action Alternative as the only beneficial and reasonable choice vs the draft GMP other Action Alternatives.

One last comment: again from the 12-8-2011 SF Dog official comments: apparently there is no evidence that the Western Snowy Plover or Bank Swallow have been impacted by dogs.

Sincerely,

Barbara Lancaster

Frank Dean, General Superintendent

GGNRA

Building 201, Fort Mason

San Francisco, CA 94 123-0022

Dear Mr. Dean:

We were part of the original group that established the Crissy Field Dog Group at Joan Booth's house over 10 years ago. We helped organize the protest at the Golden Gate Club around 2001 including notifying the NPS police of the anticipated large turnout. Nearly all of the original CFDG members are no longer involved in the organization, partially because the many public meetings stretching over 8 years were so unproductive, but mainly because the very small group of CFDG's current leaders won't listen to reasonable compromises. Their insistence that the Promenade should be a ROLA defies all logic. Most of us would like to see the East Beach open in the early morning, particularly for the adjacent residents during the week; however, we understand this could be a management issue. An informal survey of weekend dog walkers, including a lot of former CFDG members, support the above position.

We want to be sure that NPS will partner with the CFDG to guarantee that the preferred alternative will never be rescinded. You must agree that dog litter at Crissy Field has been greatly reduced in the last 10 years, partially because of the pickup bags provided by CFDG at numerous locations. Most CFDG members even clean up after the dogs of tourists or inconsiderate local dog owners.

The draft EIS indicates there will be a huge increase in the budget for policing dogs. Hopefully this is not a subterfuge to achieve Yosemite standards of no dogs. Many years ago I worked on the planning for a police/fire station at 35 Keyes in the Presidio and I know first hand the efforts of police leaders to create huge many layered bureaucratic organizations with lots of policemen. We would hope that you would instruct officers to talk to offenders and only issue tickets as a last resort to repeat offenders. Signage needs to indicate an enforceable standard for "voice control" such as 30 or 60 seconds. If the NPS wants the off leash area to be successful for us dog owners I would hope that tickets

would only be issued on very rare occasions and the rules be loosely enforced, especially at the Central Beach and early mornings or late afternoons at the East Beach.

We need clear well placed signage to make the preferred alternative work. Wherever parking is available there must be signs. Signs at the lagoon bridge would be effective. At the many paths which access the Central Beach we need signage indicating this area is reserved for off-leash dogs. The signage plan should be coordinated with CFDG and offered to the public for review.

Again, thanks for coming up with a reasonable preferred alternative for dog management at Crissy Field.

Yours very truly

**Correspondence:** Dogs have taken over Crissy Field. It is unsafe for people especially children and the elderly. Some dogs are aggressive and scary. They run free. At the very least, leashes should be required in all areas. The best solution is to allow dogs only in certain fenced off areas on the field and not on the beach. This is an urban park. Let the dogs go to a more remote open area with fewer people. Your job is to protect people, not animals. The dog owners are controlling the process, they are too powerful. Individuals like me have less of a voice. GGNRA is negligent in not protecting people. Dog owners say that the problem is limited to a few individual owners dogs that the problem self-corrects. This is nonsense. I was attacked by dogs several times and jumped on dozens and dozens of times. Not once did any other dog owner assist or intervene. And no officer was around. Please protect the needs of people, especially vulnerable populations.

**Correspondence:** Dear GGNRA Superintendent

RE: Dog Management Dog.

I wish to comment on the plan you have put forth to the public regarding off-leash dogs in the GGNRA.

I totally oppose off-leash dogs anywhere within the GGNRA.

The national regulations should apply here just the same as every other Federal Park.

You say the pet policy of 1979 makes it mandatory to have some off-leash areas. In 1979 there weren't nearly as many dogs in San Francisco as there are now so the impact was slight. The current dog population in San Francisco is estimated at 120,000.

Since the city itself does not enforce the leash law, and the vast majority of dogs do not have a license, the dog community has taken this to mean they are entitled to do what they want everywhere.

Dogs dominate SF City Parks. It is a most unpleasant situation. Please don't let the "political machine" of the city influence how you conduct Federal Regulations.

Many of us have been unable to use the GGNRA because of all the off-leash dogs. We are taxpayers too and are entitled to a safe and pleasant experience in the park. The sheer number of loose, barking dogs has

made it a nightmare to use the GGNRA. I have been jumped on by dogs, startled, and have to look down when I walk to avoid stepping in dog poo.

I see no reason that any exception has to be made for dogs in the GGNRA.

Trying to attend dog meetings to put forth my point of views is too scary. I have been to the dog policy meetings in San Francisco and they boo and hiss at you. They call you names and are out of control. It is a mob mentality.

The management of the GGNA is Federal. Why should there be special exceptions not given to dogs in other national parks?

Please do not be bullied into this. You have a lot of support from those of us who feel left out of the park because of the dogs.

Sincerely,

Miriam A. Moss

Dear Superintendent,

When you refer to "continued concern" of some stakeholders for the reason to again extend the comment period I hope you realize how that comes off as less then credible.

Shame on you for caving into the "progressive" politics of the city and the bully tactics of the dog community by giving them even more time to ruin the experience for the rest of us in the GGNRA.

I for one am tired of being forced out of the GGNRA due to all the off-leash dogs dominating the entire GGNRA

The Federal Government needs to get a backbone and apply the same rules here as they do in the rest of the United States.

Sincerely,

Miriam Moss

**Correspondence:** My nephew lives in San Francisco and spends time everyday in your parks with extremely happy dogs. He sends me their pictures. I feel a little jealous of the dogs playing freely. I do believe there should be some fenced in areas for dog owners who would feel more comfortable in that environment. But, every fenced in area is the same as saying "Off limits" to non dog walkers. Therefore, there should be many non fenced in areas so everyone can enjoy nature in a natural way.

**Correspondence:** Please uphold the present laws that allow dogs off leash in the GGNRA. It is a joyful experience to allow my small, well behaved dog off leash. I hike about 3 times a week and I have only once encountered another dog that threatened my dog, nor has my dog ever been a threat to other hikers or their animals. I have felt that the majority of other dog walkers were polite and careful about their dogs. I realize that I am only one small voice, but I have lived in Marin most of my life and feel that our trails are a wonderful treasure to be enjoyed by all. A dog on leash never gets the amount of exercise that it can when set free. Please do not make laws based upon a small group that complains the loudest. Thank you for listening.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog all over the Marin Headlands.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Thanks,  
Philip

**Correspondence:** December 29, 2013

Mr. Frank Dean, General Superintendent

Golden Gate national Recreation Area

Fort Mason Building 201

San Francisco, CA 94123-002

Dear Mr. Dean,

We oppose the GGNRA's preferred alternative of the Dog Management Plan and urge you to adopt the NO ACTION plan.

As a life-long San Franciscan and Marin County business owner I have owned many dogs and found great joy in sharing my environs with them. Dogs require daily exercise, and especially for medium and larger breeds, open space and being able to run off-leash allows them the opportunity to play and exercise. Exercised dogs are better-behaved dogs too!

The Supplemental Environmental Impact Statement (SEIS) is flawed in many ways that inequitably impact citizens and their dogs:

1. No scientific data supports the proposed policy changes. The SEIS assumes dogs cause negative impact on GGNRA parks but studies have revealed the opposite is true. In contrast, GGNRA Park Police reports are replete with accounts of humans littering and vandalizing GGNRA property.

2. Dog owners are responsible. The result of the dog-owning community to encourage responsible ownership and clean up after their dogs has been remarkable.

3. The GGNRA has no federally designated critical habitat. Therefore there is no reason to ban dogs citing harm to such habitat.

4. The GGNRA urban park was created under legislation to serve the entire community. Off-leash dog walkers are specifically allowed to use the park in the enabling legislation. The radical changes and limitations proposed violate the intent of the initial legislation.

5. Studies show there are more dogs in San Francisco than children. So why would the GGNRA reduce the existing allowed dog recreation areas in favor of human-only access?

6. The severe reduction (up to 90%) of off-leash dog access plus reducing the numbers of trails in 21 existing sites where leashed dogs are currently allowed smells like rules from a person or committee who is irrationally afraid of or hates dogs. We would hope our public lands do not befall the fears of the few. For all these reasons and more, I urge the GGNRA to adopt the NO ACTION plan with regard to dogs access to our urban parklands.

Sincerely,

Jeffrey Nebenzahl

e-mail: scpaech@comcast.net

Superintendent

GGNRA

Fort Mason, Bldg. 201

---

San Francisco, CA 94123

Dear Madam or Sir:

For the past 35 years my wife and I have been regular visitors to Fort Funston and Ocean Beach. Recurring problems we are facing in these recreational areas are not properly controlled dogs (mostly of the recently sky-rocketing number of "dog-herders").

I am a disabled person suffering from limited peripheral vision and balance problems. Fast running (large) dogs ' in their excitement of being "let go" - often brush me from their rear and even try to weasel through my legs causing me to lose balance. Through my limited vision I cannot detect them quickly enough to guard myself against unexpected collisions. At a height of 6'3" (and an age of 71) a loss of balance is a painful experience!

When pointing out my dilemma to the dog owner (herder) more than once the response was "it's a dog park". While lack of civility (the use of a public park requires recognition ' and respect ' for the sharing of a facility) cannot be indoctrinated by policies (and neither would GGRNA be the platform for enforcing them) we suggest:

â€ Place a sign (yet another one, like the "You have to know the rules") reminding people the only way everyone (not just dog owners) will enjoy the use of GGRNA requires mutual respect for all by all (specifically that dogs must be under proper control).

Another concern with free running dogs is (1) enthusiastic slobbering on the clothes of unsuspecting hikers (sure, we have a washer at home; but who wants to walk around with dog paws and slobber on pants and shirts?); (2) lack of control over defecating dogs. The latter point presents health risks for small children and infants playing at Ocean Beach (and other beaches) not to speak of the intimidating effect of a huge dog on an infant sitting in the sand (we have been victimized in this manner many years ago earning the only but very common response by the owner "he/she (it??) is a friendly dog" (which is only for us but not for the dog owner to decide!). We offer the following solution:

â€ Divide Ocean Beach into two segments: stair well 1 to 11 no dogs; stair well 12-22 dogs permitted (or vice versa).

â€ Throughout the GONRA dogs must be properly controlled to ensure a pleasant coexistence of all participants, particularly on narrow trails (the "friendly dog"-label is absolutely inadequate!).

Sincerely,

Christian Paech

GGRNA

Fort Mason/Bldg 201

SFCA 94123

Attn: Dog Management

I would like to submit a new comment:

The Mayor of San Francisco has been pressured by dog owners to advocate for dog owners and to prevent any limitation of dogs in parks and public areas.

The GGNRA has worked hard on their plans which I totally support.  
An effort now to sabotage those plans will be made by the Mayor I hope the GGNRA will continue to support more freedom from dogs in our parks and recreation areas.  
There is something unhealthy about a city that has more dogs than children  
Berenice Palmer

RE: Comments regarding the Golden Gate National Recreation Areas Draft Dog Management Plan and Supplemental Environmental Impact Statement and Ocean Beach

Dear Mr. Dean,

As strong supporters of our national parks, we wish to commend your efforts to preserve the resources and values in our parks for the use of future generations and to align your dog management policy with NPS regulations. However, our offices, jointly representing the constituency living near or using Ocean Beach for public recreation, have heard from our communities their serious concerns regarding the Supplemental Environmental Impact Statement (SEIS). We are primarily concerned with the loss of dog walking opportunities as presented by the Preferred Alternative as well as the impact this will have on our City parks.

Under the Preferred Alternative in the 2013 Supplemental Environmental Impact Statement, 80% of Ocean Beach would be closed to dogs, where currently 100% of Ocean Beach is open to some form of dog walking. The Preferred Alternative would leave only the portion North of Stairwell 21 would be open to dogs. Furthermore:

- In the Ocean Beach Snowy Plover Protection Area, dogs would no longer be allowed on or off leash. Currently, dogs are allowed on leash year-round and off leash with voice control for 47 days.
- In the area North of Stairwell 21, there would be a regulated off-leash area (ROLA) with dogs under voice and sight control where currently, dogs are allowed off leash under voice control.
- South of Sloat Boulevard, no dogs would be allowed where currently dogs are allowed off leash under voice control.

Reducing available open space for dog walking on or off leash will strain our City's Parks and open spaces. The Ocean Beach Trail along Great Highway, which is cited multiple times throughout the SEIS as an available on leash dog walking area within the Ocean Beach Snowy Plover Protection Area, is actually under the jurisdiction of the San Francisco Recreation and Park Department. This trail also is already constrained by its multiple uses, including pedestrians, bicyclists, joggers, and dog walkers. It is further constrained due to its width of approximately ten feet. Removing dog walking from this portion of Ocean Beach would put further pressure on this already heavily used pathway.

Furthermore, District 4 contains only two off-leash dog play areas managed by the Recreation and Park Department in its boundaries, both of which are located in Stern Grove, over one mile away from Ocean Beach. Without an adequate analysis of how closing 80% of Ocean Beach to dogs would impact our City dog play areas and the maintenance load of our City departments, we cannot support the Preferred Alternative.

Similarly, District 1 contains three off-leash dog play areas that are managed by the Recreation and Park Department and would also, potentially, suffer negative impacts should the Preferred Alternative be implemented.

With over 120,000 dogs in San Francisco, balancing recreational opportunities for our communities is paramount. We are supportive of a more balanced approach for Ocean Beach. In the SEIS, Alternative E is the most balanced option for Ocean Beach. Alternative E would allow dogs off leash under voice and sight control North of Stairwell 21 and on leash in the Snowy Plover Protection Area and South of Sloat Boulevard. This would keep 100% of Ocean Beach open to some form of dog walking but would additionally eliminate visitor confusion about the seasonal leash restriction in the Snowy Plover Protection Area. We believe that this alternative could, with adequate enforcement of leash restrictions, make Ocean Beach a place where people, dogs, and wildlife can coexist.

We remain committed to working with you and your team toward a dog management policy that represents the values of the Golden Gate National Recreation Area (GGNRA) and also best serves our community. Should you have any questions regarding our comments on the SEIS, please do not hesitate to contact our offices.

Sincerely,

**Correspondence:** I am very sad to hear you would like to take away yet another of our open spaces. I think the word OPEN is self defining. Open space is for public use by responsible citizens. One of the joys of living here is being able to walk out of my house and in 5 minutes be in quiet wooded areas where my dog and I can enjoy a fine hike and exercise. I see no justification for your taking away this small pleasure. I sometimes get the feeling that everyone at GGNRA would like to see all our pets in a crate from birth to death. Please prove me wrong.

Dear Superintendent,  
Thank you for accepting my comments on the National Park Service's proposed dog management

---

policies.

The GGNRA is the only U.S. park allowing unleashed dogs, so Snowy Plovers at Ocean Beach Crissy Field are threatened.

Needed are enough dog-free trails so wildlife is allowed to live and flourish without predator, i.e., dog worries. Off-leash areas need fencing.

New rules should allow the elderly to walk, families to picnic people to hike, jog watch birds.

I'm not advocating a ban on dogs, but instead, want to see a balance so both dogs and birds can be protected, as well as people who enjoy these spectacular areas of nature.

Joyce Stanek

**Correspondence:** I am a resident & Dog owner in San Francisco and I strongly encourage you to reconsider your adjustments to off leash dog walking areas.  
I have worked in the presidio for 5 years, two of those years I brought my dog to work & walked him daily on Chrissy Field. I am so sad that you would limit the area dogs can be off leash. I disagree that dogs are doing any damage to the area, infact I would argue that dog walkers are your BEST advocate for keeping the parks clean and a nice place to congregate. I have seen first hand that dog walkers pick up after themselves, and each other, because they consider this area their backyard and want to keep it nice. I urge you to use that group to your advantage - they want to keep the area just as pristine as you do - they have to come back everyday & walk again. Please let our dogs play!

I am a senior citizen (81) I have walked my dog at F.F. almost daily since 1980. We as dog owners love F.F. do what we can to keep it safe. I feel if I did not have this place to walk exercise my dog, I would not have reached this age.

I have a large dog that need to run fetch balls, at my age there is no way I could exercise him on a leash. Fort Funston has a large community of Senior Citizens who need to be able to walk their dogs off leash. There is also a large community of people who have walked there for years. We pick up trash, try to educate new dog owners do a monthly clean up.

It would be a mistake to limit areas at F.F. You will have more problems from non dog people who will destroy what ever they can.

**Correspondence:** This is ridiculous! There are more places in SF city to have your dog off leash than in Marin county- how can that be?

Dogs are members of peoples families and enjoy being outdoors and running around. It is crucial for their health and well being. Everyone knows that you can not effectively achieve the same level of exercise for the animal with it on the leash- especially true for older folks with dogs. Would you also say that children can only go to parks if they are contained in a stroller?

I am a tax payer who pays to use and maintain these areas- not having the use of this OUTDOOR space to take my dog and enjoy it at our leisure is absurd an unacceptable. My dog is happiest when running outdoors, playing with other dogs, and rolling in the grass or just observing nature. He deserves this right, as do all dogs.

These rules are cruel and annoying. STOP IT!

**Correspondence:** I am absolutely IRATE that yet another government entity is trying to SCREW UP MY PERSONAL RIGHTS AND FREEDOMS!

I pay a fortune in taxes to live in a place with open space...because I USE IT! Animals are FAMILY - and as such are a daily part of our lives. How dare you try to shut down even MORE dog friendly open space! It's already absolutely so difficult to take a hike around here with my dog! I have to basically never do a nice loop in Tennessee Valley because of the restrictions and you need to be a freaking map specialist to figure out where else they are allowed and not allowed.

My favorite trails have become pet unfriendly over the past few years, and I'M FRIGGING SICK OF IT!!!

Are you hearing me???

MY taxes pay YOUR salaries!! Stop screwing us over!

I am fine with certain breeds being leash only - I don't really want my kids to run into a off leash pit bulls, but even as much as I hate that particular breed, we are Americans, and we have RIGHTS, to life, liberty and the pursuit of FREEDOM. That means we get to HIKE with our entire family, not just the human ones.

Mr. Frank Dean, Superintendent  
National Park Service - Golden Gate National Recreation Area  
Building 201, Fort Mason  
San Francisco, CA 94123

Dear Mr. Dean,

I am writing to offer my reaction to the GGNRA Dog Management/Environmental Impact Statement Plan. As I review the Preferred Alternatives, I am concerned over the effect the implementation of the Alternatives may have on the San Mateo County residents and visitors. As the San Mateo County Supervisor representing the Supervisorial District adjacent to Fort Funston, I respectfully ask that GGNRA considers continuing to allow off-leash play areas. Citizens in my District have used Fort Funston to recreate their dogs responsibly for years.

Throughout the process conducted to produce the Plan, I heard residents of San Mateo County ask not to have trail access and off-leash play areas for dog walkers reduced. As I reviewed the Alternatives, I am concerned by how many of these areas are being prohibited or restricted for dog walkers. In addition, I have concerns over the potential impact this can have on San Mateo County's coastal communities. By reducing the amount of trails people can access with their dogs and citing people for violations, GGNRA will be discouraging people from engaging in outdoor activities and enjoying their national park lands.

GGNRA states that they have selected the Alternatives because it grants multiple user groups the opportunity to enjoy the property, allow for habitat restoration, and is justifiable and enforceable by NPS Rangers. I am sympathetic to the need to reduce conflict between dog owners and those who may be afraid of dogs, the preservation of habitat, and reducing potential liability of the GGNRA. For decades, dog walkers, non-dog walkers, mountain bikers and horseback riders have all enjoyed the trails and park areas that are now managed by GGNRA. Multiple user groups have been enjoying these areas together in the past and should be able to continue to do so. I believe the strong desire by dog walkers and the community to continue the traditional use of these areas for recreation of their pets will make it difficult for GGNRA and the NPS Rangers to effectively enforce the Alternatives.

I ask that you reconsider your Alternatives and not place such heavy restrictions on trails, and especially the Fort Funston area currently used by dog walkers.

Sincerely,

Supervisor Adrienne J. Tissier  
District 5  
County of San Mateo

**Correspondence:** Our family cares deeply about the environment and we care deeply about animals. It is one of the reasons we live in Marin County. We feel so grateful that so much land is protected and a wonderful home for many species of birds and other wildlife. We believe that the wildlife of Marin County has enough protected land to exist without taking more away from dog owners. If this is not the case we would like to see scientific evidence of this. We adopted a dog that needed a home and we enjoy the trails in and around Marin with her and our family. Without this option we may not have rescued her and if we did and we didn't have outdoor space to enjoy we would be in our cars driving to a locations where she could run freely. This would surely cause more environmental damage than dogs being allowed on trails. Please do not close the many beautiful trails to dog owners that are likely the same people that are conscious of the environment and do their best to cause no harm!

Thank you,  
JP H Salz

**Correspondence:** Most of the dog walkers I know and others that I meet on the trails of Southern Marin are considerate and obey the rules of the GGNRA. To take away the use of some of these trails and roads is not what the GGNRA stood to represent. The use of most of the GGNRA was supposed to be open to everyone....bike riders, runners, hikers, and dog walkers.

To exclude the dog walkers from the Southern Marin Trails would be a example of Government using poor judgement.  
Please pay attention to the overall needs of those who use the GGNRA and not just a few users.

Keep the trails and roads open for everyone.

**Correspondence:** The proposed solution of the dog management plan, alternative F of the SEIS Report, penalizes dog walkers as whole, and does so to a significant degree. Although the solution would address environmental impact and user safety, it is far too constrictive to the population of park users, where many are dog walkers. If environmental impact and user safety are of concern, I urge you to design a more artful solution than excluding park users. This may be a historically popular solution, but that does not make it the right answer, especially to the severity that the dog management plan provides.

Instead design a management plan that meets the current requirements: the needs of the dog walker, safety needs, and environmental needs. Take your solution to a more granular level than leashing, banning, or not banning dogs. Devise a more creative plan that meets your requirements.

I do not support the implementation of the dog management plan due to its severe exclusion of dog walkers and therefore lack of ability to meet the needs of GGNRA users.

**Correspondence:** Changes to GGNRA Dog Access.

I'm a frequent, almost daily, user of Fort Funston and weekly user of Chrisy Field.

We will be DEVASTATED if we lose "off leash" access to these areas!

Our little dog is going to go bonkers.

We visit other parks in SF but nothing compares to these two areas. Plus all the other parks can't / won't be able to handle the increase in usage if these areas are closed! Most Dog parks in SF are already getting overwhelmed, and this is only going to exacerbate this issue.

I believe that these areas should remain as "off leash" dog areas. I do understand the need to some "education" for all visitors (dog and no dog people). I'd recommend some more basic signage ie) restricted access areas, stay on trail, etc.... Plus more garbage cans, not only for doggy poop but human litter, also; start fine/ticketing people who don't pick up dog waste and who litter. Have some rangers present in and around the areas of concern. I can't even recall the last time I saw a Park Ranger!!!

It would be nice to see some Volunteer efforts, sponsored by the GGNRA, to help in the maintenance these areas, help educate and maybe even sponsor a monthly/quarterly "work parties."

The Draft guidance is a little more then overwhelming for the general Joe/Johanna to understand or even want to understand (its over 1500 pages, w/ exec summary at ~20 pages). Lets see some reasonable enforcement and education in order to avoid this massive bureaucratic nightmare.

Regards

**Correspondence:** Thank you for the opportunity to comment on the Draft Dog Management Plan.

There are adequate facilities in dog runs and other parks where dogs can run off leash. Dogs off-leash should be very limited if not entirely prohibited in the GGNRA.

Dogs and their owners can enjoy the parts of the area where they are allowed on leash. This will limit the significant negative impact on sensitive habitat, wild animals and birds as well as other visitors of all ages.

"Voice control" rarely seems to work for dogs and should not be considered an acceptable alternative to having proper control over a dog on a leash.

Thank you again for the opportunity to comment.

David Riedel

**Correspondence:** Dear Committee Members,  
Thank you for taking the time to solicit input from the citizens of our potentially impacted communities. It is a testament to the thoroughness of the committee and its recognition of the gravity of this debate.

I would like to start by requesting the committees acknowledgement that our dog owner community is currently already drastically discriminated against in its access to our Bay Area parks. In Marin County, families with dogs are permitted access to merely 1% o our parks land! This alongside the fact the recent surveys show nearly 40% o all Californians are dog owners.

As frequent users of parks, dog owners are often the most committed volunteers to park maintenance and fund raising. In addition, our parks are funded equally by all tax payers, dog owner or not. This discrimination alone should give any fair analysis pause before considering further reduction of dog friendly public space.

Lastly, I would like to address the economic sense of further restricting parks from dog friendly space. Any tightening of dog restrictions would naturally require additional resources for policing and enforcing said policies. With our park systems already under intense financial pressures (park closers, etc), could our park dollars not be better spent reopening and maintaining our parks system instead of degrading the experience of some the parks systems biggest advocates and supporters?

In closing, I ask you to please reconsider any changes to our current dog friendly park space. It is unfairly over-limited as it is and to add to this discrimination makes little sense in regards to economic factors nor general equality.

Sincerely yours,  
Charles Gulick

**Correspondence:** I oppose Alternative F for the following reasons:

Most of the people who take their dogs to the GGNRA are responsible and care greatly about the environment. One of the wonderful things about living here is that residents can take their dogs on trails. Many dogs are ill-suited to dog parks, and their owners don't want to stand around in the same place all the time. Most GGNRA visitors with dogs want to do everything possible to preserve this special privilege. It makes no sense to exclude responsible dog owners and their well behaved pets under the circumstances.

I agree with comment 29688: Issue more citations and fines. Fines should increase every time a person receives one, and it should be possible to ban people and their dogs who consistently flout the rules. Trained volunteers should be allowed to give citations. There should be a special phone app where people on walks can report violators.

Perhaps people who want to take their dogs to the GGNRA off-leash could take a class for a fee, the class covering where dogs mustn't go, proper etiquette, and so forth. The fee can go to paying for stricter enforcement, building simple barriers to keep dogs out of areas that are being revegetated.

Having people pay a fee for the privilege of walking their dog off-leash makes sense to me. They need to have this document available to show at all times, and dogs can wear a noticeable tag on their collars. Professional dog walkers need to take a class and need to be limited in the number of dogs they bring.

Dogs that are aggressive to other dogs or who chase joggers or otherwise annoy other visitors should not be allowed in the GGNRA.

I think the GGNRA should harness the passion and enthusiasm of the dog owners around here to make sure all rules are followed! That might be the most effective means yet of ensuring that the GGNRA lands and the wildlife they support can thrive.

I am writing to let you know that I strongly oppose the dog management plan.

Over the last 13 years I have been a daily park user at Fort Funston and I have enjoyed this beautiful space to recreate with my dogs OFF LEASH. During this time I have formed bonds with several people

who also share in the enjoyment of walking with their pets off leash. There are several seniors who use this park daily that at one time had their own dog but with age and failing health can no longer care for a dog. However they still show up, walk and enjoy the company of other people dogs.

I'm not sure why you feel the need to fix something that isn't broken. This has been a much loved off leash area since the 70's. From reading the DEIS I do not see any solid proof of the claims against dogs destroying the land and killing birds.

The GGNRA has over 80,000 acres. Off leash dogs use less than 1%. Dog owners are tax payers too. I don't think asking for use of 1% of your land to play with my dogs off leash is asking a lot.

In addition to Fort Funston. I also use Sweeney Ridge as well as several trails in Pacifica. When I use these trails I don't even bring my dogs. I run them at the Fort then meet up with friends and hike your other land. So it's not that us "dog people" are asking to run free all over your land. We just want to keep what we have for our dogs.

Please leave us dog lovers a place to run with our pet "kids."

Thank you,  
Shannon Carlin

**Correspondence:** As a resident of San Francisco I urge you not to implement any restrictions on non-professional dog walking in the GGNRA. Since the City of San Francisco has given up all its ocean side land to the GGNRA it is vital that the GGNRA take into consideration the needs of San Francisco in managing GGNRA land in San Francisco. The Mayor of San Francisco, several of its board of supervisors and thousands of its residents support allowing off leash dog walking in San Francisco. I urge you to take this into consideration in the new dog management plan. There are over 100,000 dogs in San Francisco and if the current dog rules are changed to be more restrictive to non-professional dog walkers it will force many people that currently walk their dogs in the GGNRA to turn to city parks. The city parks do not have the capacity for the increased dog walking usage. If you feel the need to restrict dog walking please do not place restrictions on non-professional dog walking. Any restrictions to dog walking should be to dog walking professionals. Something along the lines of what the city of San Francisco is doing in their recent requirements that professional dog walkers need to be licensed and cannot walk more than 6 dogs at a time.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to many of the GGNRA trails and beaches. My dog is very well behaved and my whole family including the dog really enjoy these activities.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands. Please don't take more recreational areas away from us.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Please don't take away our enjoyment. Please.

**Correspondence:** I support the Park Service's efforts to manage the impact of dogs on our natural resources so that their negative impact on birds and wildlife are minimized. There are significantly more dogs and people than there were in 1979, and therefore more pressure on the environment and more negative impact. The impact to the beaches and their degradation from overuse is not something one can ignore just because it's not politically correct to do so.

In addition to people and dogs, the beaches are a resource for birds too, who get their food from the shoreline. I see them having to fly away from dogs, using their precious energy that they could be using to find something to eat. While I love dogs, it would be great to have an area where the birds can be undisturbed, and where people like me who do prefer to enjoy the beach without a bunch of dogs running around, their excrement everywhere, and I don't have to worry about the dogs who don't pay attention to 'voice control' - of which there are many. People and dogs, when there are many of them as there are in SF, degrade our natural resources like our beaches. More restricted areas would mean fewer dogs and people in those areas, which would help preserve the natural beauty of our beaches and help protect wildlife. It requires a sacrifice and crowding of other areas, yes, but sometimes that is what it takes to preserve our environment. We have a responsibility for the health of our pets, but we also have a responsibility for our natural resources too. We also have a population like me that would like at least some beach areas to enjoy that are dog free. Thank you!

**Correspondence:** I am a dog walker in San Francisco. I currently walk my dog in a handful of different places within the city a few of which happen to be within the GGNRA park area both on-leash and off-leash sections. I urge you to reconsider this off-leash issue and do not ban it outright and if anything just restrict the current areas to smaller ones. If you completely eradicate all of these off-leash areas such as Chrissy Field and Fort Funston then all these dogs and owners will have no where left to take them to play. The smaller off leash places like Stern Grove and Corona Heights will start to get flooded with people and get very overcrowded so that these too will have problems with erosion from people and their dogs whether they are on or off the leash. I feel that when dogs are on the leash they are in fact more territorial, aggressive, and do not demonstrate their instinctive playful and curious attitude toward life. Please do not put this into effect without considering that dog owners are citizens to of this county and deserve to retain their rights to recreational activities within the GGNRA system along with everyone else that utilizes the area. Do not discriminate against one group of people and ban them from exercising, playing, and socializing their dogs with others.

**Correspondence:** I am concerned about the message that is being relayed by the proposed impact statement. It implies that dog owners are not able to respond to environmental concerns without being told how to handle being a dog owner.

I have had a dog for one year and live in Tam Valley. Juno is s medium sized dog who is good natured and easy going. Because I have become a dog owner, I am getting to know humans and dogs in my community. I speak to people on a daily basis. I am out enjoying all the beauty offered by living in Mill Valley.

I happen to be someone who enjoys letting my dog have her freedom when we are out walking. It also afford me more freedom. We regularly go to Muir Beach, and use the Oakwood Valley trail in addition to small parks in the county.

I would welcome being educated about what I need to do to be a more responsible dog owner and would be very willing to volunteer my own time to educate others. I am willing to be part of a local clean up committee in the Tam Valley area.

I would be greatly disappointed if I had to constantly have my dog on leash in order to comply with the law. I feel this is similar to agreeing that my child must be restrained while we are using the National Park. She is just as likely to do something that would be a problem. She is under voice control most of the time but perhaps a little less than the dog.

Thank you for your consideration of these statements. I believe we are all keenly aware of how privileged we are to enjoy the GGNRA. I for one consider it a primary reason that I choose to live in Mill Valley.

Laurie Sterling

**Correspondence:** Dogs are an important part of many peoples lives and deserve to have open places to be outside. The beach and trails are these places.

I oppose any changes to the current regulations and actually would like more trails open and accessible to dogs.

The GGNRA is a RECREATION AREA. It is NOT a designated wilderness area !

An integral part of recreation is to allow humans to enjoy the outside world with their dog.

The current limited open areas are at the bare minimal and I oppose any further restrictions or regulations ... enough is enough.

**Correspondence:** I strongly oppose the GGNRA plan to ban the various popular areas for dogs off leash. This seems cruel to dogs and their owners. Dogs are meant to run. Already there are very few free areas for our dogs. In general, most folks are very respectful of clean-up and doggie social behavior practices. What is the purpose of this over zealous limitation?

---

The idea of such restrictions serves only to remind us that our county is over-crowded with people coming from everywhere else and that we must feel the consequences in our daily living.

Please take this plan off the table!!

Furious,

Julie

**Correspondence:** As with the previous proposals, the NPS fails to take into account the large number of park users who bring along canine friends. Many dogs can't get a proper amount of exercise while tied to a leash, just as many humans wouldn't consider slowly walking to be adequate exercise. The GGNRA is a gigantic area and way too much of it is already off limits for dogs and their owners. Combined with the large number of beaches the State has declared off limits, it's increasingly hard for us taxpayers to enjoy the very parks we're paying for.

The current rules should be viewed as the minimum amount of flexibility and you should be focused on technologies and arrangements that open up more areas to voice control dog walking, not the other way around.

California has long been known as a burdensome administrative state, and it's a shame that it continues to happen via the NPS as well. We have more than enough wilderness already roped off. Please roll back your proposed regulations to a better balance between users.

**Correspondence:** Please reconsider severely limiting off-leash areas in the GGNRecreationArea. Emphasis on recreation. I use Ft. Funston, Crissy Field and Ocean Beach often for recreation, and responsibly. These are great venues for people and their animals, funded by my/our tax dollars. Off-leash is wonderful exercise for dogs; something they cannot get on leash. I always pick up after my dog, and have taught him good doggy manners. There are plenty of leash-restricted areas already; we do not need more. What's going to be the unintended consequence here; where are these dogs going to go?

If this is about professional dog walkers, put in place measures that restrict/control large groups; do not penalize individuals.

Thank you for giving this issue more consideration.

**Correspondence:** Thank you in advance for taking the time to read my letter and to consider my comments. I find the present GGNRA Dog Management Proposal to be severe and extremely restrictive, exclusionary and selective, unjust and unjustified. I am writing in support of the NO-ACTION ALTERNATIVES.

I moved to San Francisco a year and a half ago, amazed to discover an extraordinary city and its magnificent surroundings as well as a city that welcomes and celebrates dogs. A city that understands if it treats its dog owning residents with respect that they in turn would behave in no less a manner.

My daily off-leash walks with my dog, alternating between Lands End, Fort Funston and the Marin Headland Trails surrounding Rodeo Beach are my exercise, my therapy, my church, my meditation, my vitamins. These easily accessed walks, keep me healthy, energized, and inspired.

I am enthralled by the beautiful nature I have the opportunity to immerse myself in. I am honored to share these mountains, forests, cliffs and beaches with hawks and pelicans, dolphins and sea lions, coyotes and deer. I am here, exploring, exercising and appreciating because of my dog. And not a day goes by that I do not give thanks for this immeasurable privilege.

~~~

The following paraphrases, reiterates and expands upon some of the comments and information that I have read and profoundly agree with regarding opposition to the proposed Plan:

\* The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011, and that comments in 2011 ran 3:1 AGAINST the plan. The SEIS appears to have dismissed nearly all the previous comments from dog walkers.

\* SEIS still lists impacts that might, can, or could happen, while providing no site-specific evidence that any of those impacts occurring now or have ever occurred in the GGNRA. This point was raised in DEIS comments, and should have been addressed but was not. For example, the SEIS admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soil. (p. 373.) Yet they also claim these impacts are currently occurring in the GGNRA and therefore dog walking must be curtailed to stop them. (e.g., p.97). Without site-specific studies, there is no proof impacts are occurring.

\* SEIS says that during the last six years, NPS staff did extensive literature searches to look for reports of impacts from dogs in other parks. In the same time, they could easily have conducted the site-specific studies that might have shown whether or not impacts are occurring in the GGNRA. Yet they chose not to do them.

\* SEIS admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), (which are required by law to initiate such a dramatic change to the public's use of their public lands), so they cite anecdotal observations of impacts made by NPS staff. However these anecdotal claims have no context - how frequent were they, how serious, etc. - and cannot be used to set policy. An SEIS is supposed to be based on science, not anecdote. The SEIS also says it relies on the best professional judgment of NPS staff to determine impacts in other parks available (e.g., p. 396). NPS staff have demonstrated a longstanding, strong bias against dog walking, and the SEIS should not depend largely on their biased judgment and anecdotes for proof that impacts from dogs are currently occurring.

\* SEIS says there has to be a no-dog area at all sites where off-leash dog walking is allowed. For example, the SEIS says Muir Beach is too small to have both an off-leash and a no-dog area, so therefore there cannot be an off-leash area at Muir Beach (p. 113). There's no similar idea that sites that are no-dog also have to include off-leash areas. This shows the inherent unfairness of the SEIS.(

\* SEIS never gives results of public comment on the DEIS (neither does the Response to DEIS Comments by the GGNRA document on the GGNRA website). They say they received over 4,700 comments, but never say how many opposed restrictions on dog walking and how many supported them. The SEIS says: NPS received many public comments complaining that dog use precluded their enjoyment of areas. (p. 100). But there's no indication of how many negative comments were actually made. Are they from a small minority or are they widespread? An independent analysis of the DEIS comments showed that the vast majority (at least 3:1) supported dog walking. This is not reflected in the SEIS.(

\* SEIS still does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by public comment to the DEIS and by the San Francisco Board of Supervisors in 2011. The SEIS claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. It also claims that because people will still be able to walk their dogs on-leash at some sites, most will continue to walk in the GGNRA. No evidence is given to support either assumption. The SF Supervisors and dog walkers asked for a thorough analysis. What we got was cursory at best.(

\* SEIS data still does not support claims that there are major safety problems from dogs that require off-leash restrictions. The total number of dog bites or attacks from 2008 to 2011 (four years) was 95 (p. 21). Even if this number is undercounted and should be tripled or quadrupled, it still represents a miniscule portion of the millions of dog visits each year to GGNRA sites. Even the total number of dog-related incidents (nearly all of which were for having dogs off-leash where they weren't supposed to be) from 2001 to 2011 - 4,932 - represent a tiny fraction of the million dog visits each year (p. 252). The vast majority of incidents (at least 89%) in the GGNRA involve people without dogs, including murder, rape, robbery, drugs, and larceny. People are the safety problem in the GGNRA, not dogs.(

\* SEIS still does not consider management tools that could mitigate alleged impacts from dogs in the No-Action Alternative. For example, dog training classes, dog-horse workshops, and poop cleanup days could all mitigate concerns about dog safety and pathogens in feces that are used to argue that the No-Action Alternative will not work and therefore the GGNRA must restrict off-leash access.( In fact, I often carry out an extra poop bag (or two or more) from someone else to the nearest garbage disposal. Inexpensive provisions of bio-degradable bags and bins and anti-bacterial dispensers at parks could encourage people to do the same, i.e. An addition of playful signage could encourage everyone to share the responsibility.

\* SEIS misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a national park experience to a large and diverse urban population (p. 1). However, the enabling legislation says the purpose of the GGNRA is to provide for the maintenance of needed recreational open space (Enabling legislation, first paragraph). The SEIS notes, in a negative way, that in many parts of the San Francisco Bay Area, residents have come to expect that GGNRA lands will be available for dog walking and other recreational activities. (p. 19). Yet that is exactly what Congress intended when it created the GGNRA in 1972 - The objective of [the creation of the GGNRA] is to & expand to the maximum extent possible the outdoor recreational opportunities available to the region. (H.R. Rep. No. 1391, 92nd Congress, 2nd Session, 1972).(

\* SEIS will not allow off-leash dog walking on any trail anywhere in the GGNRA. The only site-specific consensus agreement to come out of Negotiated Rulemaking was to allow off-leash dog walking on a trail in Oakwood Valley in Marin. This was included in the DEIS. However, it was removed from the SEIS (Oakwood Valley is now proposed to be on-leash only) because the GGNRA decided that there would be no off-leash dog walking on any trail. All the money and work that went into Negotiated Rulemaking was wasted.(

\* SEIS still will not allow any off-leash dog walking on New Lands acquired by the GGNRA in the future, even if dog walking has traditionally occurred there.(

\* SEIS cites several surveys of visitor use and visitor satisfaction, including two done in 2011 in response to DEIS comments, that were so poorly done that their results are essentially meaningless. A 2008 visitor use survey at Ocean Beach and Crissy Field used people who intercepted people at these sites and asked about their park usage. However, the interceptors were observed by several people to actively avoid

talking to people walking with dogs, hopelessly skewing their results. A 2011 visitor use survey at Fort Funston and Muir Beach, done specifically in response to DEIS comments, only counted people as walking dogs if they had a leash in their hand. People walking with a friend and the friend's dog were not counted as a dog walker (because they did not have a dog of their own with them), even though they were only there to walk with the friend's dog. A 2011 Visitor Satisfaction Survey was so confusing respondents didn't know if they were being asked about their satisfaction with current conditions at GGNRA sites or with the severe restrictions proposed in the DEIS. (

\* SEIS still describes the visitor experience as focused on people who don't want to be around dogs. This criticism was made of the DEIS too and apparently ignored. (

\* The GGNRA park lands in Marin, San Francisco, and San Mateo counties are part of local communities where millions of people should be inclusively and actively encouraged to continue enjoying regular relaxation, exercise, and inspiration that make it one of the most valued and visited lands in America. (

\* The new plan is not only a significant change from both the legislative mandate but also from the existing 1980 general management plan, which was highly supported by the public. (Please retain the longstanding 1979 Pet Policy.

\* The plans proposed fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Fences secure enough to keep small dogs in will hinder the movement of wildlife. And frankly, it seems like a contradictory intention, when there is nothing uglier than fences to scar the magnificent landscape and vistas of the GGNRA.

(\* The GGNRA is not the equivalent of the vast Yosemite wilderness and should not be misrepresented as an idealized 'backcountry. Neighborhood trails and beaches should not be managed to artificially exclude people so that a select few have 'solitary and narrowly defined recreational experiences and expect others to have to drive farther away, (bad for the environment) and increase crowding in a few small 'diverse opportunity areas.

\* The GGNRA was established to give outdoor RECREATIONAL opportunities to people in a densely populated urban area. It requires a different management approach than wilderness areas like Yellowstone and Yosemite.

~~~~

I have not, nor can I explore the State and National Parks because they are already completely closed to dogs. The Coastal Trail, one of the very few GGNRA Marin Headland trails open for dog walking is proposed to now be off limits too. If I can't go with my dog, I won't go without my dog. The whole point of being out walking in nature is so we both benefit. Why would I leave him at home and go walk myself? An example of a negative effect from closing off urban nature trails to people walking their dogs, is a gradual arrival and settling in of Squatters, contributing litter, human waste and a diminished sense of safety.

Another is that with less foot traffic of walkers with their dogs, wildlife (coyotes for instance), normally kept at bay, misguidedly expand their territory. This increases the risk of contact, confrontation and injury with the fewer people using the trails.

City parks with fenced in dog runs are not an alternative. They are limited, restrictive and already crowded. I experience no gain from standing around a dog park. My dog is not a 'fetcher' therefore he nor I get any exercise, stimulation, nor benefits.

A tired dog is a good dog.

A dog on leash never gets anywhere close to the amount of exercise that he does off-leash. On leash, dogs are restricted, less stimulated, they grow frustrated and angry, energy builds up and has nowhere to be released. Their behavior, in turn, can become reactive, impulsive, destructive and unpredictable.

I am a responsible dog owner with an extremely well behaved and VOICE CONTROLLED dog. In areas where there are plenty of people and picnics and kids, I choose to put my dog on leash. And in areas that are open and sparse, he walks freely, people who call to him are greeted happily and he in turn welcomes a friendly pat. Nine out of ten people I meet ANYWHERE react with delight and receptiveness upon seeing my dog. And it gives me great joy to see strangers smile and laugh, knowing that my dog contributed to that.

Instead of going backwards to match other cities in their restrictions and limited thinking, I wish that the GGNRA would continue to be the inclusive, trailblazer that San Francisco has always been. To do things better. To do things that have for years, clearly proven that they work and to build upon that.

As it is now, dogs in large and small numbers pass each other on the streets, in the parks, on trails and on beaches, playfully, peacefully and naturally. They've figured it out. They are well exercised, social and socialized. With the proposed new and severe restrictions to significantly fewer areas where dogs can be at all, and almost no areas where they can be off-leash, these areas will become overcrowded, overrun and rundown. The increased tension of the gathering of higher concentrations of dogs in these limited spaces, having had substantially less exercise, can create conflicts and inevitably aggressive situations with grave repercussions.

To witness the exuberance of dogs running, bounding, playing and swimming with their owners, with other dogs and with other people and kids is incredible to behold.

We are astoundingly lucky to live in magnificent Northern California. In all the places and cities I've lived, I have never met so many conscious, responsible, respectful and aware people who greatly appreciate how blessed we are to be here. Please enable us to continue to celebrate that, in our freedoms, in our healthy choices, in our cherishing and sharing of our beloved natural wonders, where we are all welcome with our very best canine friends by our sides.

Thank you.

Kindly,

Jennifer Saxon

**Correspondence:** I have been taking my two dogs, Golden Retriever and Australian Shepherd, to Funston Beach for more than two years. This great natural resource is the perfect place for dogs and owners to go out, be in nature and get some exercise. Dogs need to run off-leash. Most weekends we get in a 3-4 mile run at Funston. This exercise is essential to the health and well being of my dogs as well as my health and well being. Walking calmly, on either end of a leash, down the street or through the park is not sufficient as a main source of exercise. We live in a city and we are very lucky to have the great resources of the GGNRA lands available to us. I'd hate to see these lands become overly regulated. Any weekend at Funston beach will show you how many dog owners love to use this space. Let's not shut out the very people that most appreciate these lands. I'm impressed with San Francisco and its openness to dogs in a variety of locations. In my 2 years in the city I have not see a single problem with this policy. Let's not make regulations where none are needed.

**Correspondence:** Hello,

I am a dog owner and have lived in Pacifica for 25 years. I have loved walking kids and my dogs over the

---

years down the Beach Blvd. promenade, out to the open space of Mori Point which is GGNRA land. We have seen the landscape change a bit over time but all in all it still remains a great resource in our backyard of breathtaking beauty and easy accessibility. I also am the parent of an autistic child, so having this opportunity to take my pack out into this national treasure is as much a blessing as it is a necessity for my sanity and well-being. I would hate for it to be completely off limits to my dogs as it has been our escape for decades. We are responsible dog people and sometimes pick up other dog owners droppings just because we respect the landscape and want it to be preserved and yet always available for our use.

I saw the documentary "Rebels with a Cause" which was about how the GGNRA, Pt. Reyes and other various open-space preservation agencies got their start. The founding fathers and mothers who worked relentlessly and tirelessly to shape the future of these lands for public use made it very clear that these areas were for the residing citizens, visitors, and future generations alike. So many of us are responsible dog owners and count on these open spaces to enjoy and recreate (it is a recreational area as the "R" in GGNRA denotes). This is the original intention of GGNRA and we as citizens, taxpayers, voters and dog-lovers want to continue to bring our four-legged, furry friends along with us when we enjoy this national treasure that is our backyard.

Please consider allowing leashed-dogs to be permitted in San Mateo County and vote yes to make that part of our legacy!

thank you,  
Pam Raymond

<b>Correspondence:</b>	The prospect of banning dogs in the GGNR is ridiculous, and unfair. It punishes those of us that keep our dogs on leash AND those of us (like myself) that have a physical condition where having a dog could be the difference between hazard & safety. I suffer from M.S. I hike using an ankle brace, two poles, and a knee brace. My dog is trained to pick up things I drop, help me regain my balance if I fall, and give me support when needed. To ban her from the trails is to ban me. Seems very biased against those with disabilities. Linda Mannella

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. I do support Alternative A, the No Action Alternative.

I regularly take my dog on the Miwok, Coastal and Wolf Ridge trails and will be disheartened to be banned from these beautiful trails. As a homeowner in Southern Marin since 1998, I have helped support the maintenance of these trails along with the school system. I have paid thousands of dollars to improve our schools and do not have children.

99% o GGRA is already banned to dogs. One of the reasons I moved to Marin County and subsequently got a dog is to enjoy the beautiful outdoors. I am one of the responsible dog owners, who carry bags and scoop my poop as well as others. You can not make policy based on a few bad eggs.

Dog owners in general tend to partake in outdoor activities that promote healthy lifestyles for themselves as well as their 4 legged family members. Suggesting one take their canine to a dog park is ridiculous. First, that is not real exercise for the owner and is limited for the dogs, second, there are an insufficient number of parks to accommodate the population and the overcrowding is not healthy and will be a breeding ground for trouble.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area. Marin residents rely upon this open space.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. that policy still works today and should be retained.

You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands. Should this pass you will force people to get in their cars creating more traffic, pollution and create even more congestion than what is currently being experienced.

In 2011, the GGNRA tried to implement a similar plan. It was opposed in the public comments b a margin of 3:1. these are public lands and the GGNRA need to listen to the entire public. For those grievously opposed to having dogs enjoy the 1% o trails and beaches available, they can certainly use the remaining 99%.

**Correspondence:** I really oppose alternative F and strongly support alternative A. I am a 72 year old long time resident of Marin County. I walk my dog on many of the designated trails and have never seen any problem with my dog or any other dog. Both people and the environment are not injured by our dogs since all of the dog owners I know are responsible dog owners. WE value our natural resources in this county, do not want them harmed but we value our pets also and want them to be able to enjoy nature. I don't understand why you want to ban dogs from so many areas which are now open to them. Are there many instances of problems???? If so, why have we not heard of them??? Please reconsider regulations which, for no good reason, will only decrease the wonderful life we Marin residents now have.

SEND YOUR COMMENTS TO THE BNP BEFORE FEBRUARY 20th 2013:

<http://parkplanning.nps.gov/commentForm.cfm?documentID=56275>

Comment on the Biscayne National Park Supplemental Draft General Management Plan / Environmental Impact Statement - November 2013

Alternative 1: No Action is my preferred alternative until the Biscayne National Parks Fishery Management Plan (updated November 2013) has been given enough time, over the next five to ten years, to take effect on the long term sustainability of the Parks fish.

However, if the GMP takes effect than I urge you to include the following modifications to the GMP.

1. Allow spearfishing. It is only fair that the GMP not discriminate against spearfishing. Also, spearfishing is helping to control the damage by Lionfish in the Park. Spearfisherman also helps to clean the Park of debris on the reefs. Besides, spearfishing is a selective sport that harvests fewer species, smaller numbers and size than other recreational sport as recorded by the IUSA and the IGFA.
2. Specify the science that will be used to adjust the number of harvesting permits, take species, and limits in the GMP (Adaptive Management Section). For example; if the GMP has a better than expected result as evidenced by a 10% f count boost to a target species than 10% m permits will be issued.
3. Allow anchorage. Buoy only options will present safety problems between boaters and divers. Instead, I encourage you to increase your budget allocation to enforce current park regulations including no anchorage on coral reef. Just a few well-placed fines will drive behavior and budget for continued enforcement.

Also, please let me know how I can be of assistance to the Park. How can I help to get Park personnel into our schools to educate our children of the importance of the Park and its marine environment? How can I help the Park at our marinas, docks and launch ramps to educate boaters about the park and best boating practices to protect its sensitive environment? And how can I help get Park personnel on and in the water first hand?

Otherwise I select Alternative 1: No Action. Thank you.

Sincerely,  
Manuel Diaz

**Correspondence:** My personal opinion is that I love this plan the way it stands. There are just too many people who are not in control of their dogs. The amount of dog poop on trails is so disturbing and people (even if they think their dog is an angel) are just oblivious to their pets behavior. I worry about the environmental impact of poop on the trails and how those dogs affect other wildlife and plants in the area. There are also many people who want to hike peacefully without fears of an aggressive dog off leash and unattended coming up to them. I know it happens even if it never gets reported.

I am pro dogs on leash as much as possible and no dogs in areas that need rehabilitation and have a large or sensitive wildlife populations.

An example of a trail in Marin that allows dogs off leash is Baltimore canyon near Kentfield...The whole trail smells like dog poop. People leave their little plastic bags of poop on the side of the fire road (if they bother to even bag it) then never retrieve it on their way out. I'm not sure who is responsible for cleaning it up, though I know at times it looks like someone has. Every time I am there, there are people yelling and trying to break up dogs that are not playing nicely.

I know there are good people and that many of them are outstanding pet owners, but there are just as many oblivious ones. Even with rules people will bring their dogs off leash and do what they want, but at least these rules will control things a bit.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative. You should maintain the long-standing 1979 pet policy.

I have been taking my dogs to Muir Beach since 1971 off-leash and never had or seen an unpleasant

incident. I went to Muir Beach for my 50th and 60th birthdays - - it is critical to me and my dog (she is the third dog I have had who is a MUir Beach Fan) to have Muir Beach for recreation.

I also go to other GGNRA off-leash sites. These areas are meant for recreation by urban people and their dogs. Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Bay Area residents rely upon this open space. It requires a different management strategy than a National Park.

Please do not ban off-leash dogs at Muir Beach!!!!

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Please do not choose Alternative F of the dog trail plan. Please keep the "no action" alternative and leave things, limited as they are, as they are.				

Walking with our dogs is a fundamental pleasure in Marin County. It is already very restricted. I take my dogs to Muir Beach and enjoy watching them enjoy their freedom to run and sniff while I enjoy mine. I keep the dogs under strict voice command and never let them bother other beach goers. Many non-dog owners seem to enjoy meeting the dogs and having a chat. I have never had a complaint on the beach. I always take any litter off the beach. I also walk along the quiet Oak Valley Trail and enjoy meeting my fellow dog owners. Very, very rarely do I meet someone on that trail who does not have a dog. And the Miwok Trail is home to us. I can't believe that it would be closed to dogs and their humans.

Having Rodeo Beach as the only off-leash area in Marin is untenable. For one thing, it is very difficult to reach. It is completely against any ecological idea of reducing driving because it is impossible to get there without a major drive either through the headlands or through the tunnel- -both already crowded on nice weekends and always a long drive in the best of circumstances. I live in southern Marin and still find it too far to go on any regular basis. What about people living farther north? Also, if all Marin dogs are there, it will make it more crowded and less enjoyable for both people and dogs.

One of the best things about having a dog is the health-promoting aspect of a daily dog walk. To allow citizens to enjoy our beautiful nature, keep our dogs exercised with a walk, and keep ourselves healthy with outdoor recreation is good policy. There are many, many places a non-dog person can walk in Marin. There are fewer and fewer where a family can go with the family dog.

Please consider these issues when making a decision on dog policy.

---

Thank you,

Juliana Jensen

**Correspondence:** Hello, I am writing to request you to ban off-leash dogs on GGNRA trails.  
Off-leash dogs are a threat to:  
1) Other pets  
2) Hikers  
3) the natural habitat  
4) Wildlife

Dog owners often will claim that their dogs are under "voice control", which may be true until the dog

---

becomes excited, at which point it is out of control.

As well, many dog owners claim they need to have their dogs off-leash in order to exercise them. This is not true, as dogs can be exercised just fine on leash.

For the safety of everyone, and in order to help prevent dog attacks and accidents, please require dogs to be on-leash on GGNRA trails.

Thank you.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.				

I have lived in San Francisco and Marin counties since 1999, and feel strongly there needs to remain a recreation area that families can enjoy with their dogs. The GGNRA is sufficiently restricted, please do not impose any additional restrictions on this public land.

Have you done an impact analysis on where all the dogs will go if your proposed plan is in place? This could cause over concentration of dog use in dog parks and neighborhood/city parks.

<b>Correspondence:</b>	I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.				

I am not currently a dog owner. I hike these trails every week and have never experienced or observed an issue with people's dogs. I enjoy watching the dogs in the ocean and think owners should be allowed to bring dogs on trails.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Thank you,  
Kerry

**Correspondence:** I find it unacceptable that our dogs are going to lose off leash access to Muir Beach, Alta and other trails and that there is a proposal that my friendly labs will be completely banned from Coastal trails, Miwok, Wolf and Rhubarb. My family has lived in Marin for 25 years. My husband and I are lawyers and we have three children. Our family takes Sunday hikes with our dogs and have been doing so for 25 years. We run the Dipsea Race. We are very involved community members. We pick up after our dogs and they look forward as do we to our Sunday hikes. To only allow off-leash access at Rodeo will create dog chaos with too many in one space, traffic jams and lots of complaints and outrage

---

from local neighbors. The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in 2011 comments; we support NO ACTION ALTERNATIVE, the SEIS contains no peer-reviewed, site specific studies or monitoring as REQUIRED BY LAW to initiate such a dramatic change to the public's use of public land. We want the longstanding 1979 Pet Policy to be retained. The proposal is taking away rights to a RECREATIONAL AREA that was meant to give outdoor RECREATIONAL opportunities including walking dogs to people who live in densely populated areas. We are not Yosemite or Yellowstone and different concerns and rights need to be balanced in our community. If we have to drive further from Belvedere to the only approved area, we will be harming the environment and it will defeat the entire purpose of this exercise, won't it? Diane Rice, Hosie Rice LLP

**Correspondence:** I live in the Outer Richmond and visit Ocean Beach and Fort Funston almost daily. My dog and I thoroughly enjoy visiting with neighbors and being outside- where dogs and people can be happy. We have this incredible resource, that should remain a public use space, not be conditional usage for only a select few. My dog is a part of my life, and like any family member, we want to enjoy downtime with him. Now, we are not allowed to bring dogs many places, but the beach should be one of those areas. Dogs need to exercise, run and chase balls, frisbees, each other. You wouldn't shut down playgrounds because they are loud, then why take away what effectively is a play area for dogs AND their humans? It doesn't make sense. I feel that there is a way to provide adequate space for this as well as space for Nature. Dogs are part of Nature- aren't they?

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Thank you,  
Natasha

in the SEIS for each area: Muir Beach, Homestead, Oakwood Valley and the Marin Headlands.

Dogs are only allowed on 1% of the GGRA, and with more restrictions on dog friendly trails dog owners would be forced to take dogs to very densely dog populated parks. Dog owners need to spend much more time walking their dogs to get their dogs the exercise they need when on leash.

The name says it all: GOLDEN GATE NATN'L RECREATION AREA, it was designed for local residents to recreate and enjoy, you should not take that little percentage of space away from us.

Instead, we strongly suggest you reinforce laws for dog owners to clean after their animals and keep the trails and open spaces clean and healthy for everyone to enjoy.

**Correspondence:** I 100% oppose the GGNRA's proposed Dog Management Plan. The 1979 Pet Policy has been since challenged and upheld as recently as 2005. No evidence has been shown that changes are needed. And certainly insufficient study has been done to show the impact to lands from the displacement. These lands could include GGNRA lands where dogs are not being taken (legally or not), other state parks in the area, and of course city parks, which will then be the only remaining legal dog areas that will not be able to cope with increased load.

**Correspondence:** I don't have a dog, but I just have to say, for the most part, most dog owners are responsible and watch their dogs. I don't think they should be punished for enjoying nature with their pet and not causing damage to the ecosystem. Horses are 1000lb creatures that stamp on the trail and leave massive piles of feces. I don't see any raids against horse riding any time soon.

**Correspondence:** Six months ago I walked into my heart doctors office for an annual check-up and I had the best blood work numbers of my life. My doctor asked me what had changed and I told him that I had a new young energetic dog and that my dog and I had walked over 900 miles together over the previous year on different trails in Marin County. He congratulated me and told me that I could probably thank my dog for my better health since that was the reason I was getting out everyday. We usually do two to three miles a day.

Please keep as many of your areas as possible available for us to walk with our dogs off leash. Dogs in general tend to be much less aggressive with each other when they are not constrained by a leash. When dogs are leashed they are much more leery since they know they don't have the freedom to move away from a problem or something they do not like.

I meet so many other people enjoying the trails and sharing the experience with their dogs and friends. There is a reason dogs are people's best friends, they help us to get out and enjoy the outdoors plus they give us unconditional friendship.

I sincerely hope you will not further restrict the places available to share the outdoors with our dogs.

I do not normally write letters to public officials, but this is one topic I feel strongly about.

Thanks you for your consideration in this matter.

**Correspondence:** We live along the great highway where we can enjoy watching dogs at the beach from our home. Although we don't have a dog we find extreme relaxation and enjoyment from watching other people's dogs happily prancing along the beach. When we are stressed and see the dogs it helps lower our blood pressure and provides a medical benefit both physically and mentally for us. One solution would be to designate one half the beach for people only and the other half for people with dogs.

---

It would be best to make the dog section that part of the ocean beach that runs between the zoo and Judah Avenue.

Since people need to walk their dogs they should not mind having to park and walk quite a distance to get to the beach therefore allowing the people that need to park right near the beach to be able to have dog free Areas.

Also there should be more doggy bag stations at all the stairway entrances to the  
And fines can be issued to pet owners who do not pick up their doggie waste.

<b>Correspondence:</b>	Designated areas for dog walking on leash, and other designated areas for off leash. I walk two small dogs on leash several times a week on Milagra Ridge. Usually other dogs are on leash, but owners with large dogs tend to let them off leash and take them on the narrow trails. I stay on the main paved road as I am never sure which large dogs would attack or cause harm to me or my small dogs. Signs are posted that all dogs must be on leash.				

If there were some designated areas for off leash and on leash it would be less likely that negative

incidents would happen. Also I do not feel the need to pick up after one's dog as long as the feces are off the main path or trails. Owners that leave feces on the walkway are inconsiderate of people with or without dogs. I do not have any ideas how to enforce this, but perhaps periodical ticketing and fines would help. Certain park areas in the Golden Gate Park area should be, I feel, off limits to all dogs so that those without dogs don't have to be subjected to the above.

From: Thomas Roop, Member of Ocean Beach Dog Walkers at Fort Funston

Subject: 2013 SEIS Dog Management Plan

The GGNRA is an absentee custodian of the GGNRA parks in San Francisco. There are insufficient restrooms, garbage cans and the roads and paths are poorly maintained. While it was two members of Ocean Beach Dog Walkers just the other day witnessed a man defecating on the Stairs of Ocean Beach just south of the Cliff House. There are no Public Restrooms in the area and refuse cans are in short supply. Is this the type of Experience you want visitors to have in the GGNRA?

I go to Fort Funston every day of the week with our Family dog Goldie, she is always under voice control when she is off leash and we always carry a leash for her and use it as needed.

I find the Dog Management Plan SEIS 2013 an intrusive idea that will impede our freedom to recreate with our family dog Goldie at Fort Funston and other GGNRA parks in this urban setting.

I also find at Fort Funston the idea to let no dogs on or off leash on the Horse Trail, parts of the Sunset Trail and land in between the two trails along with the area west of Battery Davis, South and East of the Parking Lot and the outer rim trails which run along Skyline Blvd and. These trails and open spaces are primarily where Goldie and I walk for both our exercise and health and recreation one to two hours each visit

My doctor has advised me that this type of steady pace walking is good exercise for my heart condition. Goldie's veterinarian also believes that daily walks in a place where she can socialize off leash with other dogs is also very good for her health. The Key Here is Recreation and they way you want to close off Fort Funston is not right and will ruin the quality of our Experience at Fort Funston

I move that you throw away plans A through F and make the Original 1979 Pet Policy the law of the land in all three counties where the GGNRA operates..

The following paragraphs contain reasons I believe that the GGNRA is wrong and is participating in an unlawful change in policy/rules with regards to the historic recreation of dogs off leash at Fort Funston and the GGNRA as a whole. I demand answers to all questions posed in these pages well before any rule making is to be considered.

Yes for the Original 1979 Pet Policy to be made the law of the land!!!

No to the SEIS 2013 Dog Management Plan

Thomas Roop

Daly City, CA

Member of Ocean Beach Dog Walkers at Fort Funston

\*\*\*\*\*

The GGNRA's Dog Management Plan/DEIS/SEIS asserts that the change in Dog Management Policy is essential to protect the resources of the GGNRA. The DMP/DEIS/SEIS is unlawful and must be set aside (thrown out) because:

Â” The enabling legislation and Memorandum of Understanding with SF require the GGNRA to exercise "sound principles of land use, planning and management."

Â” Your GGNRA management is in persistent violation of the enabling legislation, the Memorandum of Understanding with SF for this park property, and NPS Rules, Regulations and Policy because they have failed to perform "vital monitoring" which NPS considers an essential element of sound principles of land use, planning and management.

Â” GGNRA management can provide no monitoring report to substantiate visitor use patterns or conflicts, no documentation of degradation of the Recreation Area resources due to the presence of dogs nor their guardians, as well as no documentation as to whether resource degradation is inevitable or under the control of management prior to proposing these management changes.

Â” Federal law requires site-specific, peer reviewed studies to justify and guide changes in management of National Park System resources.

Â” The SEIS acknowledges the GGNRA has no such site-specific, peer reviewed studies for the impact of dogs and their guardians on water quality, vegetation, soils and wildlife in the GGNRA.

Â” There are no plant species which are endangered or threatened on Federal or State registers that have designated "critical habitat" in the GGNRA. Displacing recreation to enhance the growth of any of these listed plants is not required by the ESA and violates the enabling legislation for the GGNRA. However, we see that GGNRA management has displaced recreational access to plant these plants with regularity, the most egregious location being Fort Funston.

Â” The Monitoring Based Management Strategy is again a poison pill. This proposed compliance strategy has a measure of compliance that is totally subjective, with the GGNRA making all the decisions. Further, short or long term (permanent) closures could be triggered by any number of conditions totally under the purview of the GGNRA. It appears the language is designed to allow the GGNRA to make most or all of Fort Funston a native plant restoration/habitat, despite the fact that this is inconsistent with the enabling

legislation and MOU with SF.

“ Federal Law prohibits agency actions which are arbitrary, capricious and an abuse of discretion. Accordingly, this agency action, findings and conclusions should be set aside as prescribed by the Administrative Procedure Act, 5 U.S.C. 706 (2)A.

A brief post WWII history of Fort Funston (aka Doggie Disneyland)

Post WWII, Fort Funston (FF) was pretty much abandoned. In the 50's and early 60's, FF was a fabulous habitat - but not for wildlife. Rather, FF became a favorite hangout for seedy S.F. and Daly City gangs, drug dealers and users, sexual predators, off road recreation vehicle enthusiasts and a few off-leash dog walkers. Parents in nearby neighborhoods forbade their children from playing at FF due to its reputation for being unsafe. Tired of being harassed/harangued at other city parks, the dog community soon recognized the value in FF. It was clear that FF provided them an opportunity to recreate with their dogs off-leash in a beautiful seascape without any of the hassles presented at the other parks. No longer would they have to be inundated by the claims that they were infringing on the enjoyment of the city parks by adults and children who were afraid of dogs and complaints about dog waste.

Soon the word got out in the dog community and in the mid-late 60's FF realized a huge spike in the number of dogs and their human companions. It was these people who became the true custodians of FF. They were the ones who turned it into a real park. They took pride in their park. They kept it clean and safe. In fact, because of the significant presence of dogs and their humans, the criminal element soon left FF in search of a new refuge where they had control and would remain unchallenged. Many went to Golden Gate Park. Truth be told, the criminals were afraid of the dogs. And the dogs, being the good judge of people that they are, didn't like the criminals. Yes, it was because of the dogs, and only because of the dogs, that FF was now a VERY desirable park. This did not go unnoticed by the National Park Service.

When SF deeded FF in 1972 to the NPS/GGNRA, they inherited a spectacular park that was safe and well taken care of by its true custodians - the dog community. In return, the GGNRA promised via its enabling legislation to respect the historical usage of FF which included off-leash dog walking. This promise was codified in the GGNRA 1979 Pet Policy which officially designated FF as an off-leash dog park. In the early 1990's a new management philosophy permeated the GGNRA where conservation would now trump everything else in this national recreation area. Most notably, it would trump recreation. In 2000, after several illegal closures at FF, Fort Funston Dog Walkers sued the GGNRA and won. In 2001 the GGNRA arbitrarily and capriciously wiped out 30 years of promises and promulgations and voided the

1979 Pet Policy. This action was reversed in 2004 in Federal Court and then again in 2005 in Federal Appellate Court. The 1979 Pet Policy was reinstated as the law of the land and remains that way today. Presently, we are embroiled in a process, i.e., the 2013 GGNRA Pet Management Policy SEIS, which assures us that the GGNRA will once again remove off-leash dog walking from all of its recreation/park spaces for no good reason that I can see.

Yes on the Original 1979 Pet Policy

No to the 2013 SEIS Dog Management Plan

Thomas Roop

Daly City CA

Member of Ocean Beach Dog Walkers at Fort Funston

**Correspondence:** Look, I have read the report. It was so unprofessional I can't believe that I t was even accepted let alone used,.It's very clear there is an agenda on the part of the preparing parties. It's hard to believe that this farce continuing after all these years. I'm an outsider in this arena, just a citizen who has dogs. It's a fact there are more dogs than children in the county...yet the pet owners have to fight to use their own taxed services! Argh I'm so disgusted that I even have to do this.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

HAVE YOU ACTUALLY READ THE REPORT? It doesn't take a college education to see that it's poorly done and there is zero empirical data. The report used to justify that Dog's disturb plovers was done on one afternoon, and was merely one guy observing. There was no "study" done. That's just one example of the many falsities perpetuated in this whole situation. Even I an outsider to politics on either side of the issue can see that this is clearly some agenda by some parties who have motives that are unknown, either way they are not as altruistic as their supporters believe or they would not have had to lie in the EiR nor had to twist the truth to get the supposed environmentalists to support the cause. Argh.

It's such a waste because Fort Funston could be an incredible example to the nation, an amazing tourist attraction and if were fully utilized could be a destination to host huge income producing national events

for dog owners and lovers. National dog surfing events, earth dog events, festivals...the list could go for days.

**Correspondence:** It's been my understanding that for many years certain areas of the GGNRA (Golden Gate National Recreational Area) have allowed people to walk their dogs and let their dogs play "off-leash" in many of the areas of the GGNRA . Now that much of the land seems to be under the control of the NPS (National Parks Service)it appears the rules allowing dogs to be "off leash" on these public lands is about to come to a halt. I personally think we need to have some designated areas for our dogs to play and walk "Off leash" while under the visual and verbal control of their owners. I would like to ask that those involved in the decision to change the rules and not allow dogs "Off leash" in these areas please consider not changing the rules and keeping these areas accessible for us to allow our dogs to be "off leash" while under our control. It's been this way for many years and apparently worked OK so why change this, please keep the rules such that do allow our dogs to be "off leash" and some freedom in these public/designated public areas!

**Correspondence:** I oppose these extensive restrictions on citizens whose contact with nature and whose healthy exercise if from frequent hikes with their canine family members. Walking on leash is OK as required by safety and common sense. but being free in the outdoors is the essence of contact with the natural creatures of our planet.

A very large % o the SF Bay Area urban population live with canines. The benefits of doing so to their human families is well established. Few of these people would be out enjoying the trail if their canine family members didn't regularly walk them.

Dog owners are overwhelmingly people who care about their canine friends and the natural world. Their presence and enjoyment of the trails supports the parks and adds a usually responsible presence.

For those making the decision who don't know, taking a recreational walk in nature with a canine on leash is like walking with a human toddler. Their pace and interests differ from ours even as we go happily together down the trails.

Finally, while most of us have a deep respect for wild life, it is important to honor the presence of their domesticated presence, the dog, by allowing these loving creatures contact with outdoors which benefits their health and temperament as it does our own.

Please make your rules so they encourage use of the beautiful national park areas and enforce only against actual abuse. Our urban society will benefit from happy healthy dogs living among us.

Written by a widow, 75 years old, who hikes daily with her special friend and companion.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to Muir Beach, Miwok Trail, Coastal Trail, Wolf Ridge Loop, and other areas that would be affected.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** My name is James Raymond and I am a 22 year resident of San Francisco. I use the off-leash areas of the GGNRA with my dog at least 3 times per week. The off-leash areas provide a uniquely safe, enjoyable area to get exercise and recreation with my dog.

I oppose what the GGNRA calls the "Preferred Alternative" and instead I urge formalization of the 1979 pet policy.

I oppose the "Preferred Alternative" for many reasons: it's too restrictive for both current and future GGNRA lands, the Monitoring-Based Management strategy is too easy to misuse, and a number of other reasons.

However, the primary reason I oppose the "Preferred Alternative" is that the plan that justifies the changes, the Draft Dog Management Plan/ Supplemental Environmental Impact Statement, is biased, unscientific, and seems to have been crafted to justify the personal preferences and biases of whoever wrote the plan, and not on any scientific reasons or even mass public sentiment. The many problems that the plan says "could" or "might" arise from off-leash dogs are simply conjecture; trumped up fearmongering invented to support the personal preferences of the writers of the plan. As a basis for a change in policy, the Plan is flimsy and unacceptable.

If decision makers at the GGNRA change policy based on this poorly written, poorly revised, biased and unscientific Draft Dog Management Plan/ Supplemental Environmental Impact Statement, THE NEXT STEP SHOULD BE TO MAKE SURE THAT THE DECISION MAKERS AT THE GGNRA GET FIRED. Anyone who bases decisions on such a biased, flimsy document does not have the intelligence or skills to run a national recreation area.

Thank you.

James Raymond  
Resident of San Francisco

**Correspondence:** I question that you truly "welcome" comments about the off leash dog issue. So far you have totally ignored the extensive comments.

I am a senior citizen who has lived here in San Francisco since 1973. I have, over time had four dogs and still have one. I get my exercise and enjoyment by walking my dog at Fort Funston and particularly on the beach from Sloat Boulevard to Cliff House. My dog also gets much needed exercise by running into the surf and along the sand. It is a joy for me to watch this. It is a joy you will be taking from ME if off leash use is restricted. There are few areas that compare to the beauty and have the fresh air as the ocean areas. I am baffled by the concerns being voiced about some environmental degradation being used as a reason for this limitation. It hasn't happened in all the time I've lived here and there is no reason to believe otherwise now.

To the contrary, confining people with dogs to small areas is going to cause degradation and health problems as well both for the dogs and their owners. Psychologically such confinement smacks of a depressing setting more akin to dog and dog owner concentration camps. Already the few off leash City owned parks are overcrowded, showing wear and resulting in people not being willing to go to them where they are packed in. I can point to Corona Heights and Upper Douglass Dog Park as prime examples.

When it was originally proposed that San Francisco turn over the lands to the National Park Service it was with the understanding, voiced at that time by both local leaders and our Congressional delegation that the uses would remain as they were and as well that these areas would not simply be lumped into the standard National Park Service regulations.

This new action is a betrayal of these understandings. The areas have not been wild in well over one hundred years. They are part of the City not some area with true wilderness areas. People here do not expect or want some wild area when there is a population topping a quarter million just within city limits including many people whose only transport is the public MUNI. They count too. If you were to go out to the beach you would see a very ethnically mixed group - together. You will disrupt this.

Thus:

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo. There are numerous beaches in San Mateo County that have been off leash forever and there is no showing that taking them away will be of any benefit. It will simply diminish any use by the public of public lands. â€

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions. People not complying can be cited. People not picking up feces can be ticketed. A stiff fine is better than these restrictions.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral de Tierra.

**Correspondence Type:** Web Form

**Correspondence:** Hello,

My name is Erin Hyden and I am opposed to outlined changes to the GGNRA as it applies to dramatically slashing off leash access for recreational dog walking. I live in Alameda but often visit Fort Funston with dogs off leash as well as other affected areas in San Mateo and Marin counties. My dogs are well-behaved, productive animals as are any friends' dogs that accompany me. I oppose the "preferred alternative plan for a multitude of reasons and have specific grievances with many of the plan details:

1) It is too restrictive because there is no justification in the dog management plan for major changes. I do not understand why the current plan is not being upheld since no good reasons have been given.

2) I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

3) Restricting animals to a small space can create crowding and dogs simply behave best when they are allowed wide open spaces to walk with their two and four-legged counterparts. Fencing in small areas just is not a smart thing to do.

4) I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions. Instead tickets should be issued to those who do not comply and all others should be left in peace.

5) The new dog management plan does not represent the people that it is supposed to serve. It does not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

6) The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

7) The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

8) The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

9) The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

10) The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

11) The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

Please listen to the people who pay taxes for these recreational areas...most of them want to use these spaces with their dogs.

Thank you for your consideration,  
Erin Hyden

**Correspondence:** I absolutely oppose the closure of Fort Funston to dogs.

I am taking my dog and child to Fort Funston every weekend, it is part of our regular routine and exercise and we can not imagine our weekend without that adventure.

I have been a responsible dog owner for 20 years, and Fort Funston provides us with an opportunity that is very special living in a big city.

The weekend trip improves our quality of life, gets us out into nature and my son has great fun running and playing with our dog on the beach.

Do not close Fort Funston to dogs!

**Correspondence:**

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to (put your preferred GGNRA trails and beaches here).

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** - don't ruin something that's working well

- park is very low maintenance the way it is
- park is enjoyed by so many people the way it is
- where would we go????
- the propose plan will not work, and very unfair
- more people will get hurt by the proposed changes
- people will not take good care of the park out of frustration
- will have more dog fight
- to much government
- other parks will be over crowded
- base on my experience using the park like fort funston for the last 11 years. taking this away and limiting access simply make no sense and will not make the park better, it will just upset people, creating more problems for everyone.
- please use your common sense not politics
- keep the uniqueness of this dog park (fort funston) it is enjoyed by so many people and animals for very little cost the the government
- changing the system that people have created at fort funston may cause an environmental hazard to the beaches and park itself
- old people and young children wont have a good and safe place to go to????
- animal shelters will experience less adoption
- dog walkers will be force to walk where they are not welcome.

**Correspondence:** Since this has been going on nothing has been done to repair walking trails or to remove sand from the trails. Is that because GGNRA wants NO ONE on the land? If dogs are not allowed off leash, the parking lot would be empty. Why can't you leave it the way it is and perhaps charge a small fee for upkeep? Who do you think you are? San Francisco should take back this land. You do not deserve to run it.

The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Optional Points to Make (choose as many or as few as you want):

\* The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

\* The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

\* The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

\* The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

\* The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

\* The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

**Correspondence:** I live in San Francisco and generally use Crissy Field, Fort Funston, and Ocean Beach. I am an active dog owner and enthusiast. I walk every single day on GGNRA land with my dogs. I am also a dog trainer, so my dogs are under excellent voice control, have great manners, and love people and other dogs. Taking my dogs to the beach is my biggest passion. It is my hobby as well as my main means of exercise. I'm 47 and my doctor says that my dogs are keeping me in excellent health. My dogs are also emotionally and physically healthy from running off leash and socializing with other dogs. Here are a few points I'd like to make concerning the proposed changes:  
\* I feel totally betrayed by the GGNRA's complete dismissal of the 70% o comments supporting keeping ALL of the current off leash areas open to dogs. You asked for feedback, we gave it to you, and you IGNORED US! Are you going to do that again this time?  
\*We have such a small percentage of GGNRA land as it is. It is less than 1%! It is outrageous that you want to take this from us. Other groups or individuals who don't like dogs have 99% i GGNRA land to use!  
\* I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. (  
\* I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.  
\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions. We don't punish an entire group of people for the actions of a few. If you have money to monitor, you have money to ticket individual law breakers.  
\* The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.  
\* The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new

---

plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption. This is ridiculous! Your proposal is so limiting that dogs will be forced into surrounding parks that are already crowded. It is irresponsible to ignore this concern.

\* The plan lists impacts that might, can, or could happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

\* The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

\* The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a national park experience to a large and diverse urban population (p. 1). However, the enabling legislation says the purpose of the GGNRA is to provide for the maintenance of needed recreational open space.

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

\* The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral de Tierra. Dog owners pay taxes and have the right to be heard. We have as much right to use the land as anyone else.

Sincerely, Marya Taylor

<b>Correspondence:</b>	Hello,				

My partner, James Dewald of the same address, and I recently found out about the proposed changes severely limiting off-leash dog access in all of the areas we currently take our dog. This has shocked and deeply saddened us. We, and all of the people we know, strongly oppose these changes.

I can honestly say that having access to open nature to enjoy with our dog is the primary reason we bought our home in the city and continue to stay here despite the cost of living. Walking at Fort Funston, Crissy Field, Ocean beach and then all of the parks across the bridge is our daily pastime and immensely increases the wellbeing of our own lives as well as that of our dog.

We rescued a senior dog 2 years ago, and the first time we saw his depression lift was when we discovered how much he loved the waves at Crissy Field. Walking there and in the hills at Funston have without a doubt been the primary source of his healing and continues to be his main joy in life. Walking around the neighborhood doesn't bring the same gleam to his eye, nor to ours.

People and animals strongly need a sense of freedom and open space, especially in an urban environment. Please do not take that away from our community.

We oppose the following changes:

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

<b>Correspondence Type:</b>	Web Form				
<b>Correspondence:</b>	Hello,				

I am a San Francisco resident and dog owner. I am strongly opposed to GGNRA's Preferred Alternative because of its overly restrictive dog management plan. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.  
â€

I will be forwarding my position to my representatives at all levels (city, State and Congress) so that they understand how strongly their constituents are opposed to this plan.

Furthermore, I urge you to consider the following points:

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims

that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

<b>Correspondence Type:</b>	Web Form
-----------------------------	----------

<b>Correspondence:</b>	I am very concerned about the new dog management plan. This plan will cut where people can walk off- and on-leash by 90% cmpared with where people can walk with dogs now. It is going to create a huge impact on the Bay Area, which we simply cant afford.
------------------------	--

I had hoped that this new plan would be significantly different from the original GGNRA dog management plan, because thousands of people-the overwhelming majority-submitted substantive comments in opposition to the plan. But the GGNRA did not make significant changes. They ignored what people want, and are moving forward with an extremely unpopular plan no matter what we say.

The GGNRA was created in 1972 for the maintenance of needed recreational open space, and to expand to the maximum extent possible the outdoor recreational opportunities available to the region. Thats why its designated as a National Recreation Area, not a National Park. With the new dog management plan, the GGNRA is reneging on its promises to preserve and protect recreational access to the GGNRA.

There is no credible reason why people with dogs are not allowed to have adequate and reasonable space to walk their dogs in the vast 80,000 acres that comprise the GGNRA. Please take action to stop the GGNRA from imposing this radical plan on the San Francisco Bay Area.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative. Its already restrictive enough in Southern Marin.

((I live in Tam Valley and regularly take my dog to Homestead Valley, the Oakwood Valley Fire Trail, Muir Beach, Rodeo Beach and the headlands. Our dog is very friendly and well-behaved. Dont punish all dog owners for the misbehaving few.((

Over 99% o the Golden Gate Recreation Areas off-limits for dogs, which already seems completely unnecessary. We already feel limited in our options. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands. Its just not right. ((

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.((Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

Changes made in the 2013 SEIS did not adequately address the criticisms and concerns expressed in comments filed in 2011. Comments in 2011 ran 3:1 AGAINST the plan. Furthermore alternative A will force people into to their cars, in search of places to walk their dogs. This is bad for the environment and bad for Marin County.

**Correspondence:**

Hello,

I have been walking my dog in the GGNRA for over 8 years and taking away space to walk dogs will have a negative impact on one of the biggest reasons for moving to Marin. As a dog guardian and citizen it would place me in a limited position in relation my enjoyment of the space and constrain my ability to properly care for my pet. It seems to me that there is already a limited space to walk dogs off leash and taking more away will only further crowd and burden the few areas left. I would argue that we need more off leash space as opposed to less. I can tell you from experience that a dog that gets a lot of exercise is a well behaved dog -> and that has a direct impact on the community and environment as a whole.

I also have some concerns about the decision making process:

It seems that the decisions are not based on any scientific data and lean heavily on assumptions and assertions that provide little firm evidence that support them. It also appears to lack any peer reviewed site specific studies that I would think would be required before taking such action. Without studies and more formal review process, there do not seem to be any legitimate or legal foundations for these policy changes. Also, the plan does not differentiate between the impact caused by human beings or other animals and assumes that all negative impact is caused by dogs.

I oppose the GGNRA's preferred alternative and support the NO ACTION alternative.

**Correspondence:** I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative. The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils. The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote. The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

**Correspondence:** I have been walking the trails of the GGNRA for over 25 years. I am very familiar with the Coastal Fire Road and the Coyote Ridge Trail. Over these last few years, I have noticed a significant increase in dogs off leash on these trails. There are no dogs allowed on these trails and signs are posted. Most of the owners are fully aware of the restrictions as many of them live in the surrounding neighborhoods that are adjacent to the GGNRA. The rules are completely ignored. Many dog owners view the GGNRA as an extension of their backyard and do as they please. Park service employees are nowhere to be found to enforce the rules. When the cat is away....

Yes, dogs need designated areas where they can run off leash. But OWNERS need to be responsible and follow the rules. If they cannot follow this basic principle, then the privilege of walking dogs in a designated park area should be removed and/or restricted even further.

**Correspondence:** I am a resident and voter living in San Francisco. I am a dog owner and we use GGNRA off-leash areas frequently both for recreation and for health and well-being reasons. We use these areas responsibly and over the many years we have not noticed any abuse caused by other dogs and dog owners that justify the changes now proposed.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog

---

management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

\* I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

\* The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

\* The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

\* The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

\* The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

\* The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

\* The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

**Correspondence:** I am at a loss to understand why you would change something that works! Dogs are restricted to a relatively small part of available trails and space. Why change it?

Marin County is not a wilderness area and people do not come here for a backcountry experience; the open space GGNRA is for RECREATION - which includes open space for dogs and their owners. Non-dog owners smile when they see dogs prancing along trails -

There is no compelling reason to further restrict dog access from places they have had access to since 1979 - with no problems.. Retain the "no action alternative" in the areas so beloved for dog access: Muir Beach, Oakwood Valley, Marin Headlands... Marin County is not Yosemite...

**Correspondence:** I walk our dog approximately twice a week at Fort Funston. I wouldn't change anything about it. I really love and appreciate having the freedom to walk the dog off lease in such a wonderful place.

I understand that the GGNRA feels the need to restrict and regulate the use of Fort Funston as an off lease dog walking area. That is what government bureaucracies do. It however does not make it a good idea to change things. The idea that we must protect the wildlife from dogs may be well intentioned but is ridiculous in the big scope of things. This is a small small sliver of a huge coastline. Think of it as a unique Eco-system the dogs coexisting with shorebirds, hawks and ground squirrels. This park is well loved and gets lots of use. I suggest that if it is too much trouble for the Park Service to run that they give the land to San Francisco.

There are plenty of beautiful protected areas but few where dogs can go of leash. If you restrict the area with fences you will ruin a great place. Don't be mindless government stooges. Leave well enough alone. We know you are better than that.

**Correspondence:** Hello - 2 years ago I was a resident of California. I loved my time in San Francisco but certainly not as much as my dog Mali. A chow mix that loved running and swimming in Crissy Field and playing ball at many of the beautiful parks in the city. I currently reside in NYC and luckily live across from Central Park where my dog can still enjoy a little bit of nature but unlike SF dogs have to be on-leash all the time with the exception of morning and late evening. I have witness a clear difference in dog behavior between leash and off leash times. Dogs are more protective when they are on-leash. I always have to be alert because if my dog wants to do the "meet and sniff" while the dog is on-leash, the dog can become aggressive...and strike, a very difference experience when off-leash. Everyone is happy, dogs are friendly. I've been wanting to move back to San Francisco and once I heard parks were evaluating their off-leash regulations I am hesitant to return. I find these new limitations unfair to our animals, I hope you are able to find a more agreeable compromise.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. Dogs should be able to walk freely on trails and make sure owners are ensuring dogs can remain on the trails.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative

Please consider what an impact the drastic change will have on San Francisco.

**Correspondence:** Muir Beach is a spectacular spot and our dog Fallon loves to run and catch balls in the waves there. We always have bags on hand to pick up her poop and can understand the concern about that. But tightening the leash laws in my opinion will not help but in the end make for unhappier dogs with limited places to run with freedom. It is a dog owner's responsibility to understand their dog's behavior (good or bad) and make appropriate decisions. Dog classes are readily available for those with behavioral and social issues and dog poop bags are easy to find as well. I think part of the solution is stressing high dog-ownership standards instead of limiting places for them to be free. Please consider

---

keeping Muir Beach a leash-free zone.  
Thanks for your time and consideration!

**Correspondence:** My name is Christine Stuart. I live in Mill Valley and hike on the Miwok and Oakwood Valley trails with my golden retriever Sadie every day. The following are my comments on the proposed alternative.

i,§ I oppose the Preferred Alternative because it is too restrictive. At in-person meetings when all of this movement began, I was told the sole reason for these changes was to ease the rangers' ability to enforce regulations; I was also told that no one had reported serious issues with the current status of trail usage. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

i,§ I oppose fences to surround or delineate any off-leash area in the GGNRA; this will change the entire experience of hiking these trails. In addition, in my 16 years of hiking these and other trails, I almost never see dogs more than 1-2 yards off the main trails. Installing fences will ruin the serenity of walking these trails.

i,§ I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

i,§ The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. As stated earlier, there are no compelling reasons or justification for these changes aside from "ease of enforcement," thereby depriving the most frequent users of these trails of our daily benefit from using these outdoor places which were originally intended for our benefit.

i,§ The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils. Without question more serious degradation is imposed on trails throughout the Bay Area by bikers every day, not to mention the egregious lack of courtesy for other users of trails and outdoor space. Could we consider putting them on leashes??

Finally, again at the in-person meetings in Mill Valley some years ago, I proposed that you take advantage of the insights of people using these trails every day, most of whom are accompanied by dogs. We see the uses and abuses humans impose on our trails and parks. I've personally cleaned up after humans almost daily including those camping illegally in these places.

Consider making us "trail guardians" who can give you more useful information about what's going on in Bay Area parks; you could establish a site wherein we could register any useful observations. We love and treasure our daily hikes with our dogs. Oh, and by the way, we all know it's completely unlikely that you have the money and manpower to enforce whatever you decide to impose on us; you are simply

losing our respect through this continued effort to threaten us with deprivation of reasonable rights to use these incredible outdoor places.

**Correspondence:** My name is Susan Garbuio, and I live in San Francisco. My husband, William B. Nern, and I walk our dog, Jasmine, at least weekly at Fort Funston. We enjoy this experience very much, and appreciate how lucky we are to have such a beautiful location to walk our dog. Our dog enjoys being off leash and having an opportunity to play with other dogs. We also on a less regular schedule walk our dog off leash at Crissy Field. I am registering my opposition to the proposed changes to the GGNRA dog walking policy.

I am opposed to the Preferred Alternative because it is too restrictive. I support the formalization of the 1979 Pet Policy and would like to see included off-leash access in San Mateo County and on new lands the GGNRA acquires in the future. Since my tax dollar will be used to purchase and maintain both existing and new GGNRA lands I want to be sure that I have the right to access these lands in an appropriate manner with my dog such as off-leash under voice control.

It is my understanding that the GGNRA was established to "provide for the maintenance of needed recreational open space." To date I believe the GGNRA has done a good job of meeting this goal; however by restricting off-leash dog walking you would be restricting access to recreational space for a segment of the local population. This does not seem to be in keeping with the reason GGNRA was established. I supported the establishment of the GGRNA. At that time I never would have thought that at some point my access with my dog would become restricted by the same organization I saw as protecting this beautiful land and my guaranteeing my access.

As a San Francisco resident I am also concerned about the impact the Preferred Alternative, if implemented, will have on City's dog parks. Given San Francisco's size there are a limited number of off-leash dog parks in San Francisco, and in my opinion none as beautiful or as enjoyable as Fort Funston.

Much of the Preferred Alternative sounds arbitrary such as not allowing off-leash dog walking on any trail, or on any newly acquired land, especially since there appear to be few scientific, peer-reviewed studies that show impacts from dogs on vegetation and soils.

Lastly I am also opposed to the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version. Allowing GGNRA to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions appears to be very arbitrary and contrary to the democratic process .

Thank you very much for accepting my public comment opposing the dog management plan. I sincerely hope you will not implement the Preferred Alternative.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to (put your preferred GGNRA trails and beaches here).

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:** To Whom it May Concern,

Because local communities use Rancho and we have a history of walking our dogs off leash responsibly, I am writing to urge the GGNRA to continue off-leash walking of dogs in areas that are already established off-leash dog walking locations such as the lower portions of Rancho Corral de Tierra in Montara and El Granada, and allow on-leash dog walking in Moss Beach. San Mateo County is the only county where GGNRA is proposing to ban off-leash dog walking despite the history of walking dogs off leash responsibly.

Like so many other people in the area, I moved to Montara only a year ago specifically because I knew that there were places where I could walk my dog both on and off leash here.

Most of the walkers at Rancho Corral are local and are dog walkers, according to the SEIS, so I am puzzled why the GGNRA is proposing to limit the use so much for dog walkers given the recreational needs of the residents.

Furthermore, the SEIS fails to link dog walking with document resource impacts. Rancho continues to provide valuable habitat for many endangered species. GGNRA fails to provide any scientific data about the impact dog walking has on the natural resources.

Thank you for your consideration and I do hope you revise the plan for on and off leash dog walking in Montara and the coastside in general.

Sincerely,  
Emily Benson

**Correspondence:** Your proposal is not based on scientific evidence and speaks again to government bowing to special interests. This area has more dogs than children and it should be expected that this will impact future voting and funding support if the change is enacted as so proposed.  
As a resident of San Francisco,I will ensure that any change will not go unnoticed especially when NPS is not supporting its charter.

Christine Templin

**Correspondence:** We live close to the Presidio and often walk our dog on its many wonderful trails. Our family likes to take our dog to Crissy Field and we estimate that we walk on GGNRA property at least five times a week.

We oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. Our family supports formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

We also oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

We oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions

Importantly, we feel the new dog management plan did not adequately consider comments to the earlier

version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

**Correspondence:** Please do not allow dogs in the National Parks. They are destructive to the environment and wildlife. They create an unwelcome and hostile atmosphere for human beings. On leash, off-leash it's all the same. I have not enjoyed any park experience in recent years due to the ever increasing dog population. There is little if any enforcement of the leash law, dog walkers violate rules far more consistently than they follow them. The sense of entitlement among dog owners is truly stunning. I do not feel safe, nor do any of my friends with children.

In addition, there is rampant abuse of the "service" dog license/medallion. I see it over and over again - people claim their pet is a "service" dog, but then do not follow any of the service dog requirements/rules.

Please, no more dogs - the owners abuse the freedoms they've been given thus far and violate the laws.

Parks for the people.

Thank you for your kind consideration.

**Correspondence:** This would be tragic. There are so few off leash dog areas left in an area FULL of dogs! Dogs extend and enhance the lives of humans. They make us happier and healthier. But they can only do this if they are happy and healthy themselves. Requiring dogs to be on leash at Fort Funston and erecting penned in off-leash areas is too restrictive and will look ugly.

\* I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

\* I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

\* The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

\* The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

\* The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

\* The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

\* The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no

evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

\* The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

Each segment of society should have adequate, accessible appropriate space for recreation, and not be funneled to remote, small lots, and concentrated into high densities. I do not believe that the NPS is serving the general public well, by isolating and concentrating large segments of the population. The rules that were laid out in 1979 defined areas that were adjacent to the populations, and were well distributed amongst all the NPS lands, thus reducing the amount of driving needed. That is the sane way to deal with this issue.

Rodeo beach is distant and isolated from the population in Marin. It seems a very poor choice of locations, and people generally do not drive that far to walk the dog. They will continue to use the areas adjacent to where the live. The best rules are the ones designed to work well, with the target population.

I do go to Rodeo beach several times a year. However, i regularly go to Muir Beach, Oakwood trail, and Homestead Hill, as they are adjacent to my neighborhood, within walking distance, and the only adequate areas to run the dog.

Once there are NO legal, accessible trails (except areas to far away to access), when it is time to walk the dog, people will be walking the dog illegally on any trail they walk on. There is then no incentive at all for the public to remain only on the specific dog-trails. I fear that some of the NPS proposals will result in problems, and the local public will be ill-served.

Thanks for your consideration.

**Correspondence:** Hello,

My name is Julia and I am a responsible dog owner living in San Francisco. My two well trained dogs and I frequent different parts of GGNRA, mostly Fort Funston, five to seven times a week. During these visits I make sure to clean up after my dogs, I keep them out of protected areas and they are under voice control at all times. I also join clean-up sessions or sometimes just bring a bag and clean up trash.

We need this area to remain off-leash area because of the positive and balancing effects that visiting the GGNRA has on us. Living in a city, this space is needed to relax the body and the soul and the dogs need the opportunity to run off leash. Most city dogs, like my dogs, spend most time leashed, and they are of great service to their owners and the community.

!!Without the option to let them run off leash on a hour-long walk, working dogs like mine will have to live in non-appropriate living conditions as running off leash on a regular basis is needed to keep them physically and mentally healthy!!

A lot of hikes and areas are already not dog friendly and we live in a county with a very high amount of dogs This should be considered when the rules and regulations are made and the needs of the citizens of this county need to be catered to and protected, which means in this case that room to let dogs run needs to be provided and protected from lawmaking that will limit it.

I strongly oppose cutting back the opportunity to let dogs run off-leash at Fort Funston and any other GGNRA.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to many beaches and trails. I actually take my dogs wherever I go. They are my best friends and they love going with me everywhere. I am responsible and keep them on voice command and pick up after them. I always carry leashes as well. My dogs are friendly and others respond favorably to them, especially families.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Correspondence:**

Hi I'm justin velo

I live in the Potrero district of san francisco and usually visit Fort Funston with my family and dog about twice a week. Our dog walker takes our dog & others to Fort Funston an additional 2 times a week ( at least- mid week )

We usually go on the weekends and meet up with other couples with their dogs and take a wonderful leash free 2 mile walk around and down to the beach .

To summarize, Fort Funston is THE ONLY place where we feel comfortable taking our dogs off leash. It's the only place where a dog can really run and be off leash without us being worried about car traffic and pedestrians. Because of this we make the 7 mile drive every weekend. Its just a very special place where dogs can socialize wit other dogs and get the real exercise they deserve as pets. I

below are some points :

\* I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

\* I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

\* The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

\* The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

\* The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

\* The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A /supplemental environmental impact statement needs to be based on science, not anecdote.

\* The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says

the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

\* The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

<b>Correspondence:</b>	Dear GGNRA:				

I am a 4th grade teacher in Marin, and I live in San Francisco. Part of my work with my students is teaching them the importance of biodiversity and balanced ecosystems. We conduct an intensive unit on native, non-native and invasive plants of the Bay Area, and we conduct student-designed service learning projects in the interest of habitat restoration and community education on important principles of caring for open spaces over time. We work with local park rangers and plant experts from the community, and we take class trips to Muir Beach to support the habitat restoration efforts there.

In addition to being a schoolteacher, I am also a dog owner. While my partner and I work full work weeks, our dog walker picks up our 10 month-old large-breed puppy every day and takes him to Fort Funston for the critical exercise he needs to maintain a happy, healthy lifestyle. There, he is able to run, play and splash around off-leash. Similarly, my partner and I take Truman to East Beach at Crissy Field every weekend so he can run and play off leash. He absolutely loves it there- -as one student in my class described it, "It's a doggy wonderland,"- -and he is a safe and friendly addition to the milieu on East Beach.

As you probably realize, in our urban district it can be a challenge to provide a large dog with the exercise he needs. GGNRA has been a welcome, necessary component of the workability of our happy family.

With the proposed GGNRA Dog Management Plan, that would change. I am writing to express my strong opposition to that plan. Below are the points our walker helped outline about the plan, all of which I have carefully reviewed and heartily agree with based on my research of the matter.

I implore you not to restrict off-leash dog access that is so vital to our family, and many others.

Thank you,  
Christopher Warner  
cwarner@mcads.org

\* I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog

management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

**Correspondence:** Dear Superintendent/GGNRA staff:

I am a dog owner that has lived in San Francisco for 17 years. I walk/run my dog off leash daily under voice control on GGNRA land, especially Fort Funston and Baker Beach. Over 40% of our population are dog owners. This is a huge portion of our population that deserves to have access for recreation and to enjoy this public land.

\* I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. (

\* I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

\* The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

\* The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

\* The plan lists impacts that might, can, or could happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

\* The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

\* The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a national park experience to a large and diverse urban population (p. 1). However, the enabling legislation says the purpose of the GGNRA is to provide for the maintenance of needed recreational open space.

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

\* The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

**Correspondence:** Dear National Park Service,

Please do not strip my privileges of off-leash recreation for me and my dog. I pay my taxes and love the ability to use our National, State, and local parks for recreational purposes with my well trained, respectful canine companion. I am not alone in this. I do believe these are privileges and I treat our public lands as I do my own, they are sacred.

I explore you to keep the off-leash areas of all parks open for use. Furthermore, I ask you to expand these areas to every park possible.

Sincerely,  
Jai Carrell

**Correspondence:** Hello I am a responsible dog owner who frequents Fort Funston and it's beach with my dog. It is one of the only remaining spaces available for my dog to be with me off leash. Please stop inching out SF home owners who own dogs. You're giving us NO space to be outside with our well behaved dogs off leash.

I am writing to oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

Additionally, I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most

people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. <b>Correspondence:</b>	My comment and the initial reason I signed a petition protesting your policies began with an park employee tasing a citizen who did not instantly obey her command. You should not employ idiots who cannot handle having some small measure of authority and who go crazy when their meager authority is challenged by TASERING someone. Please do not employ fools. Please do not give these idiotic fools tasers. These ignorant, untrained jerks will eventually kill or terribly injure someone. IS THIS WHAT YOU WANT???

**Correspondence:** I have been a resident of San Francisco for over 20 years. During that time I have frequently visited the areas under consideration in the documents. Twenty years ago I was single and would walk through many of the off-leash dog areas in hopes of being able to pet the dogs that I was unable to have because I lived in an apartment. What I found was a community of dog-walking people happily socializing, while the dogs happily socialized too. To get my dog petting in I had to approach the dogs because they were not interested in people who walked by them. The dogs were friendly and happy to be petted because they were well-socialized.

When we able to have dogs in our home I was excited to take the dogs to the many beautiful areas in San Francisco. This was a great social activity for myself and my dogs. My dogs are over 14 years old now. I have been taking my dogs off-leash several times a week, specifically to the beach and Fort Funston. What I have discovered is that my dogs NEED to be off leash. I can walk them on leash day, after day, but when their paws hit the sand and they can run, they are happy dogs. I am a happy person.

This is a city where people tend to accept people's differences, as long as the differences are the same as their own. I believe people should be respectfull of others. I don't expect everyone to love dogs, but I also don't expect to be yelled at when I am out walking my dogs. Dog walking is a great exercise and community builder. To limit dog walking, restict dog walking, is to limit the community from building. Being part of a community in a city is a special thing. I know many neighbors because we are out walking our dogs. I also have many encounters with other dog owners because we are out walking our dogs at the same time at the same place, no matter what the weather may be. Dog owners are not fair weather friends. We are out there through thick and thin fog, light and hard rain, sunshine and wind. So if a trail is worn, it is worn from use. It is hard to find a group of people dedicated to getting out and going for a walk than a dog owner.

<b>Correspondence:</b>	I am a dog owner and I fully support the no dogs rule at all of the proposed park areas and the dogs on leash only rule at all of the proposed park areas, especially at Corral de Tierra in Montara.				

I feel that the public is fortunate to have so much open space and park land in the City and elsewhere in the GGNRA, and dog owners like myself are obligated to respect the rights of those who prefer to not interact with dogs- on or off leash- at parks that have been identified as suitable for such restrictions.

As a lifetime resident of San Mateo County, including 20 years on the coast in Montara and Pacifica, I was actively involved in local efforts to acquire and protect what today is the park at Corral de Tierra. While I realize there are residents in Montara who view their "backyard park" as theirs to enjoy as they see fit, i.e. dogs off leash anywhere in the park, such a position/attitude ignores the fact that the park was created with state and federal funding and as such is a resource of not only local significance but of state, national and world-wide significance.

As with anyone who lives in a place as special as the Bay Area, and especially within proximity to SF Bay or the California coast, we should all be willing to abide by park rules that serve to protect natural resources and provide a safe and enjoyable experience for all park users, including those without dogs.

Thank you.

Timothy Duff

**Correspondence:** It is truly astonishing after all of this time developing the DOG MANAGEMENT PLAN that GGNRA has made the decision to hold an informational meeting about the Plan in San Francisco during working hours! Not on the coast during the evening when the people who are affected by the Plan can actually attend and have input.

It wasn't enough for a GGNRA ranger to shoot one of our coastside neighbors with a taser gun, it wasn't enough to impose your DOG PLAN on the coastside community who has no need for your plans. We've been doing just fine without a DOG PLAN for decades. Thanks anyway.

Why don't you do yourselves a BIG favor and actually TRY to reach out to our coastside community in a positive way. Maybe YOU should come to US and present your PLAN.

Have you considered that it may behoove GGNRA to do a little community building, since the first action taken by GGNRA after securing ownership of Rancho Corral de Tierra created extremely negative PR for the agency (wouldn't want to be THAT PR Director)?

Maybe you should think about that. Particularly if you expect any cooperation by the coastside community and their dogs.

**Correspondence:** I live in the Outer Sunset of San Francisco, four blocks from Ocean Beach, an area which is very impacted by your dog policy. I have reviewed your draft proposal for a "Dog Management Plan". It seems like a policy designed to cover up your own mismanagement. That's because you already don't enforce the CURRENT plan that you have. At Ocean Beach, where I live, huge numbers of dogs run off leash in the on leash areas on a daily basis. The last two weeks has been sunny and warm at the beach, and on any day there were DOZENS of dogs down there - - and their owners - - who were violating the CURRENT regulations on on-leash. Yet I have not seen a single GGNRA office writing citations to violators.

In addition, the dogs crap all over the beach (and many owners don't scoop), they chase birds (including threatened species), jump up on people that want nothing to do with them (and have destroyed my headset for my iphone on one occasion when a dog jumped up and clawed my chest), and generally create havoc. Many dog owners are responsible with their pets, but many are not. When I have(courteously) informed

---

some dog owners that their dog was off leash in an on leash area, I have been physically threatened, verbally abused and harassed.

All of this is going on RIGHT NOW, with rules being violated according to the CURRENT PLAN. When I have told your officers as well as supervisors about these violations, they have been ignored. On one recent occasion, two of your officers were sitting in their vehicle in the parking lot of Ocean Beach, and I informed them that there were five dogs just over the sand dunes that were off leash in an on leash area. They basically ignored me, and when I asked them if they were going to do their job, one of your officers threatened me with being cited for some bogus violation.

In a conversation I had with one of your supervisors, I was told that "It's a resource problem, we don't have the officers to patrol the beach for dog violations." Yet you have tons of officers to harass local people who are having fires at night, enjoying the beach and minding their own business. Just the other night, I saw THREE of your cruisers sitting in the parking lot, waiting for the 10 pm parking lot curfew so you could start harassing those on the beach. Where is that zeal and number of officers when it comes to enforcing your current dog policy during the day?

It's clear to me that your priorities are off, and it's just "a resource problem." You are putting the wrong amount of resources to the wrong things.

Moreover, in this draft proposal for a new "dog management plan", I don't see any provision for adding "more resources" i.e. more officers to enforce your regulations. Did I miss it somewhere? Without that, how will you be able to enforce a new plan any better than you been able to enforce the current plan?

Frankly, at this point you guys at the GGNRA have very little credibility. It looks to me like you are "shifting the deck chairs," nothing more. You are creating the perception of "action" to mask your current inaction. There is nothing about the CURRENT plan that couldn't be made to work if you guys were to actually prioritize your resources in a better way, and have some officers down there to enforce your current regulations.

Sincerely,  
Steven Hill  
Outer Sunset, San Francisco

\* I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

\* I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash

areas feel like pens and visitors using them will feel unwelcome.

\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

Optional Points to Make (choose as many or as few as you want):

\* The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

\* The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

\* The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

\* The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

\* The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

\* The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

\* The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

<b>Correspondence:</b>	To whome it may concern				

I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-

friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog to the Oakwood Valley trail, the off-leash section of Stinson Beach, and various other trails and beached in the area that allow off leash access.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained, especially considering the great number of families in this area who have dogs as pets, and need space to get their dogs exercise. Further, many people employ dog walking services - - banning dogs off-leash would destroy jobs.

Allowing dogs only on Rodeo Beach would also have the unwanted effect of making that beach very, very densely used by dog owners, and would create a \*dangerous\* environment there for both people and dogs due to the extra chaos created by an overblown density of people and dogs. This plan is RIDICULOUS and written by people with no understanding of our area and how our citizens use it.

You haven't conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the public's use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

**Affiliation:****Received:** Jan,21,2014 14:52:12**Correspondence Type:** Web Form**Correspondence:** It seems, every few years we have to address this question....

The simple fact remains that Fort Funston is essential to the live and routines of many people, I'm sure you have the numbers...

Dog behaviorists will inform you that off leash exercise is essential to the physical and behavioral health of all larger canines. Frankly, I was a bit surprised at the sheer number of dogs over 50# that daily attended Fort Funston. One might expect a few less, in an area so deficient in open space.

It is well known that dogs greet each other best when left to their own devices, the act of restraining a dog, in the presence of another, can instigate violent behavior. The disparity in the numbers of bad incidents at Fort Funston, as opposed to those of Crissy Field seem to bear that out.

We all know the damage to life and property that an out of control 75# dog can do...

In the interest of public safety, the only logical course of action would be to leave a good thing alone.

This has always seemed like a handy, but very short sighted, show of a solution in search of a real problem.

<b>Correspondence:</b>	Hi-				

I am a homeowner in Potrero Hill and the owner of 2 dogs that were rescued from a shelter. I am also the CEO of Nixle, which employs 30 people and is based in San Francisco. I am also a life-long resident and a contributor to environmental funds, including the GGNRA.

I STRONGLY oppose the "Preferred Alternative", and I support formalization of the 1979 Pet Policy plus off-leash access in all GGNRA-managed areas.

I STRONGLY oppose fences for off-leash areas.

I STRONGLY oppose the monitoring-based management strategy. The GGNRA has no right to change leash statuses.

The GGNRA is overstepping its domain. These parks are for the people of San Francisco, and enjoyment with dogs has always been an integral part of that enjoyment. San Francisco is a dense urban area. San Franciscans love pets. San Francisco parks are a huge part of bringing those things together. Changing these laws will kill a critical dynamic in our city.

Please reconsider and stop the above mentioned items.

Eric

**Correspondence Type:** Web Form

**Correspondence:** My name is Susan D'Amours and I live in the Hayes Valley neighborhood. I often take my dog to the off leash areas at Alamo Square Park, Bernal Heights and Fort Funston.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome. I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

The new dog management plan does not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan also does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote. The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space." The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.

Thank you,  
Susan D'Amours

**Correspondence:** This dog management plan appears to take the recreation out of the GGNRA.

There are many respectful dog owners that want to take their dogs with them while they exercise in Marin and SF

We live here so we can enjoy the outdoors. Taking this land away makes no sense. There is only 1% tat is designated use for dogs anyway. I urge you to leave the policy written in 1979 in place.

If there are issues with individual dog owners that are Not responsible then that should be addressed.

Taking the use of the out doors away from all the citizens of marin county is not the answer.

I personally walk Muir beach, Crissy fields with my dog. I am a responsible Guardian and my dog is well behaved and i pick up after him.

**Correspondence:** Good Morning,

Can we just leave "Fort Funstone" open for dog walking as it is and stop throwing away taxpayer money for useless proposal? It is working for many years just fine.  
Did management at GGNRA just lost any common sense and try to follow a few people who just hate animals? It is a sad time for our country, when the elected official or government employees start to listen to a few lawyers who just want to suck out money from the government funds.  
The only suggestion for any kind of change, would be limiting a number of dogs under escort of the professional "Dog Walker". Sometimes when is more that 5 dogs per person the control can be lost.  
Please let dog owners enjoy their animals. There should be no more time or government money spent for this matter.

**Correspondence:** My name is Jennifer Carter and I'm a native San Franciscan who has grown up with dogs and now am the proud owner of a 2 year old French bulldog. I have fond childhood memories of taking our family dog to Fort Funston and watching the hanggliders while Charlie, then Max and now Ronin enjoyed the freedom of the outdoors. Never once did I witness an incident between either four legged or two legged creatures. But rather, a joyous and simbiotic coexistence that even the non-dog owners seemed to enjoy and actively seek out.

Over recent years, I've noticed a steadfast pursuit to destroy this experience. With new laws and changes to existing laws that seek to turn San Francisco into New York City where dogs are contained in shallow fenced in runs sprinkled around the city. Or worse, where dogs need to go to a "gym" just to get enough exercise.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

**Correspondence:** I understand the concern for dog waste, but what about the huge amounts of horse or pack animal excrement that you are allowing to be left on trails? I hike and ride my bike through piles that for some reason never seem to be a concern of yours, yet dog waste is mentioned. Are we in 1860 and the horse and owner are not responsible for their own? Why should this issue be left cold. Seems everyone else that is visiting the park is held accountable for plenty of small time issues yet the largest piles just lay there for weeks on end.

**Correspondence:** I have been a member of the GGNRA for over 10 years. I joined before I even had a dog (and now I have two). I see no reason to change the dog management status quo in the GGNRA.

While any plan for public lands must incorporate the needs of all of its visitors, it seems absurd to put the needs of those who don't like dogs above the needs of those who have them, since the latter group is statistically more likely to use the park in the first place, and often during times when others do not. In addition, the areas that are currently designated as off leash are a minute portion of the overall land (less than 1%). My guess is that dog owners and dog walkers comprise a lot more than 1% o the park users. Don't be taken in by the very vocal minority of anti-dog people. Many people don't have dogs, and they still enjoy being around them. The number of dog-related complaints has increased purely because the population has increased - it's not because dogs have become more out of hand.

Reducing the areas where dogs are free to be dogs will make it difficult for dog-owners in the Bay Area to exercise their dogs (and themselves), and this will result in (a) overcrowding of existing dog runs in the City parks, and (b) increased dog aggression since they will not be as tired and happy as they currently are. My favorite places to go with our dogs are Crissy Field and the beaches (where they go almost every day to romp with their doggy buddies), Ocean Beach and Fort Funston (I call this place doggy heaven). On any given weekend, you will see hundreds of people, single people, couples, groups of friends, families with kids, elderly and handicapped people, walking with their dogs. Fort Funston and Crissy Field are especially precious since you can walk with your dogs and kids (not just throw the ball), see beautiful sights and the paths allow wheelchair access.

All that said, I would like to propose a couple of things that might improve the situation: off leash areas should have clear signposting so that those who are not comfortable around dogs, or who would just prefer not to be around dogs, can choose to go elsewhere (in the other 99% o the lands); in addition, we dog owners are willing to compromise seasonally when native species of bird or plants need some extra protection from the dogs, and if during those times, signs are posted, we would be willing to have our dogs on leash in those sensitive areas, or under voice command to keep out.

Attn: Dog Management Plan

January 21, 2014

Dear Sir or Madam,

Re: GGNRA Dog Management Plan

I lived in the Marina in San Francisco for nine years and I now live in Mill Valley in Marin County. I am the owner of two Vizslas. I walk my dogs three times a day and send them out with a dog walker twice a day while I am at work. Every day after work I take my dogs on a walk on GGNRA land for 30-45 minutes. On Saturday and Sunday I usually walk them at Chrissy Field in the morning and in the Presidio or Marin in the afternoon. In addition, my dog walker takes the dogs to GGNRA trails in Marin daily Monday through Friday.

I am from the East Coast and have lived in the Bay area for 15 years. I consider myself fortunate to live in such a beautiful and historical city. Some of the areas I treasure are Chrissy Field and the Presidio, and the GGNRA hiking trails in Marin. There are few cities anywhere in the world where one can walk with their dog in a National Park or along a beach. Chrissy Field and the Presidio are two special places in that they are bursting with natural beauty and yet are also grounded in rich history. The trails in Marin are gorgeous and allow one to get out into nature on multi-use trails with hikers and other dog owners.

Chrissy Field, the Presidio and Marin are perfect places to walk your dog off leash. At Chrissy Field the dogs can run on the beach and romp in the field. Few other places provide such diverse terrain and excellent play areas. The Presidio is also an excellent place for dogs to walk off-leash as there are few people, no cars and ample trails. Other excellent off-leash dog walking areas are the Marin Headlands, Fort Funston and Baker Beach. These are all ideal spots for us dog owners to walk and exercise our dogs safely away from traffic and other hazards.

As I am sure you are aware, it is very important for a dog's mental and physical health that they get plenty of exercise. Some dog breeds require more exercise than others and it would be difficult for those breeds, such as the Vizsla, to get the proper exercise they require if they cannot run and play off leash. My dogs are very high energy and need to exercise at least two hours a day. Exercise and socializing is critical to a dog's health and well-being. I make taking my dogs out for exercise my number one priority.

I am strongly in favor of allowing dogs off-leash in as many GGNRA areas as possible. The more places that one can walk their dog(s) off-leash, the better. I hope you will consider the impact on San Francisco and Marin if off leash dog walking is banned in the GGNRA. Banning or further limiting off leash dogs will have a significant negative impact on San Francisco and Marin parks. And recreation areas At least 10,000 dogs visit the GGNRA every day. San Francisco city parks are much, much smaller than the GGNRA and will be unable to absorb the impact of all those dogs if they are forced out of the GGNRA. The negative impact on parks and other recreation areas in San Francisco and Marin far outweighs any potential negative impacts in the GGNRA.

Given that I walk my dogs several times a day, I am able to get out and meet many locals in both San Francisco and Marin as well as tourists on my daily walks. Given my passion for the Bay area, one of the things I am able to do is share stories and history with people who are visiting from out of town. One of the things that makes it easy for them to approach me is my dogs as they form a common bond between people. Every day I am out with my dogs I meet and socialize with people young and old; people gay and straight, people from the city or Marin or out of town folks who are just visiting.

One of the nice things about Chrissy Field, the Presidio and GGNRA trails in Marin is that they are multi-use areas. So on any given day one is apt to encounter joggers, walkers, hikers, school children, botanists, photographers, people picnicking, etc. One of the charms of the area is that it attracts and supports such a diverse group of people and wide range of activities. The community of people recreating with off leash dogs represents a tremendous cultural resource in San Francisco, Marin and the GGNRA. Where else can you see people from nearly every ethnic background and race, all socio-economic levels, seniors, families with kids, etc. all getting together every day and every week to socialize together while their dogs play off leash. Walking and playing with off leash dogs brings together people who otherwise would rarely see or interact with one another.

I oppose the Preferred Alternative plan because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

I am alarmed that the new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative. I have written numerous letters over the years and feel my voice and comments, and those of others, have not been heard!!

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades. This will impact hundreds of dog owners such as myself! I am extremely alarmed about the possible restriction. It will be a nightmare for myself and all other dog owners!!

San Francisco and Marin residents have been walking dogs off leash in the GGNRA for decades and this is yet another valid consideration for maintaining off leash areas. Off leash dog walking is the status quo. Banning or further limiting where off leash dogs are allowed constitutes a change to the current and historical use of the park. Continuing to allow significant off leash recreation opportunities constitutes a "continuity of use" of park land. I implore you to maintain continuity of use. I am strongly in favor of allowing dogs off-leash in as many GGNRA areas as possible. The more places that one can walk their dog(s) off-leash, the better.

Thank you for your time.

Sincerely,

Emily Church

<b>Correspondence:</b>	Frank Dean, General Superintendent Golden Gate National Recreation Area,				

I strongly favor keeping the GGNRA Alternative A Dog Plan or even opening up more places for people and their dogs to enjoy. Growing up at Ft Barry during the 1970's we enjoyed the natural beauty and marveled at the views, while maintaining a sense of community. It is my feeling that something I consider to be part of my heritage and my heart will be restricted even more then it is now and I will no longer be able to share that with my children, because we can't take our 4 legged family member Bella. If you can tell me what to tell a child when they ask, "Why can't Bella come on the trail anymore", I would appreciate it. It may sound funny, but it is a real issue for me and makes me balk at setting aside lands for "Open Space", because I may not be able to utilize them. So, it pushes me to think more favorably about development and less about Open Spaces or recreational concerns. As a member of the Sierra Club it

pains me to think Pro-Development, but if it creates recreation trails or large dog parks, then I'd be likely to vote for Development.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

We need more access, not less, to the places we hold dear in our hearts and minds.

Thanks again, Robert L. Jupe Jr. Owner- Sir Walks-A Lot Dog Training

<b>Correspondence:</b>	PROPOSAL				

DOG MANAGEMENT PLAN  
For GGNRA land

The current Preferred Proposal for ways to regulate dog activity on GGNRA land had created a contentious and adversarial relationship between the quite severe regulatory actions proposed in the GGNRA plan and the dog-owning users of the land. This Proposal suggests a way forward that would have these adversaries work together on an on-going basis to achieve the highest and best outcome for all.

## ESTABLISH CITIZENS' COMMITTEES

Each of the areas addressed in the GGNRA DMP will be invited to form a Citizens' Committee; dog owners and non-owners would be encouraged to participate.

Any area that doesn't have an established representative or doesn't come forward with a Committee would be regulated as stated in the final DMP.

A protocol is established defining the relationship and levels of authority between the GGNRA and the Citizens' Committees

In participating areas, a Citizens's Committee is formed and a Chairperson is elected by the Committee.

Each area that forms a Committee will be assigned a representative from GGNRA. It is the responsibility of that representative to present concerns specific to the area.

The responsibilities of each area's Committee would be:

- o Draw up a list of mitigations, if perceived, to the DMP, including specific oversight actions for which the Committee accepts responsibility (see sample examples below)
- o Address the concerns of the GGNRA rep, per above
- o Submit and discuss the list with its GGNRA rep; reach trial agreement
- o Establish a renewal agreement plan (follow-up to ensure the conditions of the mitigation are met and consequences if they are not)
- o Implement the agreed-upon mitigation

## EXAMPLE OF A MITIGATION PLAN

I live and walk my dogs in Southern Marin so am only familiar with the trails in this area and will use the Oakwood Valley trail as an example. Of course, each area has its own issues and each Plan would, therefore, have different components. NOTE that this is only an example, NOT a suggestion for a final plan.

GGNRA Plan - Alternative E, Map 4-E: dogs allowed off-leash, under voice control, only on the fire road section of the Oakwood Valley trail up to the bridge. Dogs allowed on leash on trail section.

Possible Citizens' Plan - Alternative B, Map 4-B: dogs allowed off-leash, under voice control on Fire Road, Oakwood Valley Trail, and Alta Trail. Dog owners required to carry leashes.

Mitigation Terms and Conditions for Oakwood Valley (NOTE THAT THIS IS JUST AN EXAMPLE, NOT AN OUTCOME):

Local Committee is formed, Chair is appointed by group.

Committee meets with the appointed GGNRA rep to hash out specific needs and concerns of the specific area.

Alternative E would be in force on weekends and holidays, Alternative B on weekdays.

Citizens will patrol the trails and roads covered in Alternative B a minimum of once every 2 weeks to pick up all dog droppings not collected in GGNRA-supplied trash bins.

Chairperson will be forwarded complaints, including those concerning out-of-control dogs and unpicked-up droppings, from citizens. A log will be kept of the complaints for review with GGNRA rep. Serious complaints (attacks by dogs, injury, etc.) will be submitted immediately to GGNRA.

Initial trial period will be 60 days.

## SUMMARY

This is a bare bones and sketchy Proposal, just to give you the idea of a new way of approaching this volatile issue. The Proposal is intended to find a way for reasonable citizens to cooperate with its reasonable governmental bodies to address the problem of dog management on public land; if it is decided that neither group can be reasonable and Intervention From On High is required, then this is a loss for all concerned and, unfortunately, for democracy. As your extended Comment Period

demonstrates, you believe that any plan works best when those affected by the plan help design its component parts. The assumption of this Proposal is that enough people are involved enough in the DMP issue that they would put their money where their mouth is - and their time and effort where their concerns are. The people I know who are concerned about the perceived draconian extent of the GGNRA Preferred Plan are reasonable people who understand the negatives of dogs on open space trails and areas, but they also know the positives of well-behaved dogs getting adequate off-leash exercise. GGNRA will need to monitor and police any regulations it puts in place; this Proposal has the advantage of sharing some of that responsibility with the citizens of each affected area.

**Correspondence:** I feel strongly that it is important to distinguish the difference in geographical areas within the National Park Service. What may apply to an urban area is likely to be very different in a less populated rural area and regulations should be set appropriately. With respect to Montara Mountain CA, tolerance, acceptance and peaceful co-existence should continue as it has for as long as I can remember. This philosophy should apply to horseback riders, bike riders, hikers, dog walkers (both on and off leash). There have been so few "dog-related" incidences that it is such a shame to implement further restrictions for those of us are responsible and enjoy walking our dogs off-leash. Not only is it an important freedom for dogs, but also for ourselves. I'm hoping logic and reason will be taken seriously in this matter going forward. There are risks with everything we do and often there are appropriate laws set to manage those risks. This however, is clearly not a big enough risk to enforce such a frivolous law. There will always be the occasional, irresponsible person or dog owner who may or a may not have control over their dog(whether on or off leash), but from someone who has lived on the coast for 4 decades, dog owners with exceptionally aggressive dogs tend to tightly manage them or keep them out of public areas... especially on the coast of Half Moon Bay. It's certainly understandable to implement such a law in some areas(particularly urban settings), however, not within the hills of Montara. So far the result has made both dog owners and dogs more unfriendly and un-social causing even greater risks for dog-related incidences. For anyone who knows anything about animal behavior, dogs tend to be far more aggressive on-leash and just as difficult to control. Again, there are risks to be taken when venturing out in nature such as an encounter with a mountain lion or a situation with an un-skilled mountain biker. Have there been enough dog-related incidences to warrant this restrictive law? If statistics were examined, I'm confident the response would be "no". There are so few places to go anymore where we can enjoy such freedoms. For those that are fearful, they should consider the multitude of choices where the leash law makes sense and is strongly enforced. Please keep a piece of California wild...there is almost nothing left and this law just doesn't make sense. Not here and not at this time!

**Correspondence:** Dear National Park Service,

I love to hike and spend time in nature. I do so with a well trained, well behaved dog. She is an important part of my connection to nature. I would stop using the San Francisco Bay area parks if I couldn't bring her with me. Further more, I would probably move out of the area all together.

I, like many of my friends, am a responsible dog owner who cleans up after my animal and obeys the leash laws. I support responsible access with dogs in natural environments. Please keep natural areas open to me and my dog.

Sincerely,  
Ananya Hixon, MA

**Correspondence:** I regularly take my dog to (put your preferred GGNRA trails and beaches here).

I have been taking my dogs to Muir Beach for 40 years. I can not imagine it not being a place they can run freely and play. It would be such an incredible shame. We have rented a house every year in Muir Beach in the summer and I would reconsider going there now if my 2 small dogs cannot run freely on the beaches.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. **Correspondence:** Regarding Muir Beach, Alternative A is my most preferred plan. Muir Beach has been a wonderful place for families of all types to come and enjoy nature, and keeping dogs on leash while being tempted by the cool ocean can be a bit torturous. I have never seen or experienced any type of destruction or disturbance of the native wildlife by dogs. If this has proven to be an issue, I would suggest better signage at these areas. In my experience, having dogs under voice control has proven effective for this area.

Thank you for your consideration. I truly hope we can keep Muir Beach a wonderful place for all to visit and enjoy to its fullest.

**Correspondence:** Dear NPS,

Thanks so much for all you do for us! I submitted my comments before the last deadline, which you can probably find thru my name or email address. I have additional comments, after Mayor Lee's, & regarding his concerns that dog restrictions in our National Park would overwhelm City parks. If that is actually true, then it just reinforces that we have too many dogs. I adored my 2 dogs: a poodle mix & a black cocker spaniel. And I've been a dog-sitter for 20 years. The people I dog sit for don't have this "divine right to dogs any & everywhere," as dog advocates espouse.

I know there are great dog owners, but too many are NOT. I live across the street from Moscone Park on 1 side & Ft. Mason Great Meadow on the other; senior home The Heritage is on the other corner. Dogs are left to run "wild" & owners ignore their pets sniffing & jumping on kids & adults. If dog owners were so good, why do I see so much poop; or if picked up, then toss it when they think no one is watching?

Besides dog feces, what about & why don't we hear anything about dog urine? Do people want to sit in it or have their kids play on urine-soaked grass?

Dog owners just don't have the right to foul our parks. An idea is enforcing pets to be licensed, more dog runs/separate areas in parks; a big fine for non-neutered/spayed pets; working w/SPCA & other agencies for better pet guardians. I'm not so sure that 350 pets adopted from Xmas Macy's is such a good thing- - how many have been returned; or worse, abandoned.

This is about Dog Policy, but you'll probably need to deal with feral cats, too.

My great thanks to whoever reads this email & totes or tallies my issues. My wish is for parks that everyone can enjoy. Very sincerely, Jan

<b>Correspondence:</b>	I favor GGNRA going back to the plan adopted and agreed upon in 1979.				

Since the mid-sixties I have been a frequent visitor at Fort Funston and Crissy Field along with my dogs. I am a scientist, and as such make note of the environment to a fairly keen degree of detail. I agree with others who have observed that the 'findings' made by GGNRA are poorly researched and inaccurate.

The impact of humans and dogs at Fort Funston as I've observed appears to be less than that of the ravens and the wind.

Many of the people that I've met who are there without a dog tell me that they come there because they enjoy seeing the dogs playing. Often they want to interact with dogs on their walks as well. There are many people who come there with no dog, but carry a pocket full of dog treats.

There used to be several bird species there: sparrows, swallows, gulls, hawks, even a pair of great horned owls. It was the ravens that impacted those species, not dogs.

For an area visited by the large number of dogs that come to Fort Funston daily, it is quite clean and dog-litter free. At Point Isabel in Albany by comparison I encounter quite a bit of dog feces even though they have frequently placed bag dispensers and dustbins. At Fort Funston there's always been an unspoken ethic to pick up any litter seen regardless of 'ownership'. Yes, frequent emptying of the waste bins is a necessity, but the waste does get into the bins, not the ground so much. If not for the ravens pulling things out of the dustbins, there would be less paper and plastic on the ground as well. (How about some signage regarding cigarette litter?) My dogs understand that butts are litter and collect them even though I'd rather they not.

Personally, I've taken the extra step of teaching my dogs to pick up people-litter they see or that I send them to retrieve. Dogs like to play, socialize and run but they also really do enjoy having a job.

There's another special aspect to visiting Fort Funston . . . the people interactions. Dogs really are good conversation starters.

The thousands (millions) spent over this issue is truly sad. I wish San Francisco had never given the areas to GGNRA in the first place. In an urban area of this small size we need to have these spaces for the RECREATION that was promised.

Poe Asher

**Correspondence:** \* I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future. â€

\* I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

\* I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

**Correspondence:** The off-leash zones in SF are already minuscule, please don't take away what few zones we have. It's is proven imperative to dog health for them to be able to run free for a certain amount of time each day. If you under exercise dogs, they become anxious, and dog anxiety is what leads to aggression and has a direct correlation to aggressive attack behavior. I also strongly disagree with the environmental impact reports, I feel that they should be revisited. as a dog owner I respect the environment, keep my pet from altering it, pick up her feces, keep her from digging or chasing endangered birds, etc. I also feel that tourists cause more damage to the environment than dogs. They walk where they aren't supposed to, litter EVERYWHERE, and generally disrespect. So if you are going to make areas NO DOG ZONES for the sake of the environment, you have to restrict human access as well, to be fair.

San Francisco is praised for its forward and progressive thinking. We are a city for everyone, we respect nature and love being a smart city. Let's not take a step backwards, PLEASE.

As the city expands more and more due to the booming population, yards are becoming a thing of the past. Where are our dogs supposed to run?

This is WRONG and I'm SO upset about it. I love san francisco, please don't make me grow to hate this fair city.

**Correspondence:**   Sirs,

I will be commenting only on Crissy Field and Beach as this is the area that I have visited 3 to 4 days a week over the last 10 years. I walk, with my dog, the whole beach area, Crissy Field and all the way to Golden Gate Bridge. As a senior, this is my main source of exercise for myself and my dog. I would not be able to give my dog the exercise he needs to be healthy and well adjusted unless I had access to the off leash beach area. Having reviewed the draft proposal for this part of the GGNRA, I would like to make the following comments :

I support the idea of making the beach adjacent to the parking lot off limits to off leash dogs. I agree that there are some people who are uncomfortable around dogs and this will allow them to enjoy the beach without interaction with dogs. However, I would encourage you to consider making this area on leash only on weekends and holidays as there are very few people who visit this area during weekdays other than dog owners and professional walkers and , since there are so many dogwalkers who utilize this area during weekdays, it may create overcrowding on Central Beach on an everyday basis.

I agree that dogs should be on-leash in parking lots and all paths used by walkers and bikers for the safety of all concerned. Dogs should be allowed off leash once they reach the beach entrances.

I am in favor of having Central Beach officially designated as off leash. I do not enjoy negative interactions with people who simply do not like dogs and express this to me even though dogs are well behaved and under voice control.

Keep Crissy Field primarily off leash. Once again, I have rarely seen anyone other than dog owners and walkers utilizing this area during weekdays, or frankly, at any other time except on major holidays.

I have no problem changing the snowy plover beach to no dogs allowed. I do want to note, however, that I frequently see small children racing through this area, disturbing nesting areas and frightening birds. I also see this behavior on a regular basis on all the beaches and closed off sensitive areas. Parents need to educate their children that it is not OK to harass wildlife. I see this behavior far more in children while it is extremely unusual to see dogs chasing wildlife.

**Correspondence:**   I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I regularly take my dog(s) to Miwok, and other listed trails. I don't think that people should be "punished" for the lack of care on trails that very few display. Most dog people are respectful of the trails and hills they walk on and we take care of it like it should be..not letting our dog(s) run outside designated trails, picking up poop, cleaning up garbage found, etc. Dogs are a huge part of most people's lives and we need a place, other than dog parks where most bad occurrence's happen, to walk our dogs freely. Have us pay a usage fee...more ranger patrol...something other than just NO DOGS.

Dogs are already off-limits on over 99% o the Golden Gate Recreation Area. There isnt any compelling reason to eliminate or further restrict the remaining 1%. ou havent conducted any peer-reviewed, site-specific studies that support such dramatic restrictions of the publics use of our public lands.

The Golden Gate Recreation Area was established to provide recreational activities to local residents in a densely-populated area. It is not a wilderness area like Yellowstone or Yosemite. Marin residents rely upon this open space. It requires a different management strategy than a National Park.

Access for all users, including people and their dogs was a cornerstone of the original charter as detailed in the 1979 pet policy. That policy still works today and should be retained.

<b>Correspondence:</b>	To Whom It May Concern:				

Re Proposed GGNRA plan

I have grown up Mill Vly/Tenn Vly area riding my horses before it became GGNRA as well as when it transitioned. As a lifelong dog owner, this is an area I know like the back of my hand. I can remember the Marincello Rd and the little Spanish style fixtures at the entrance. We were all thrilled to see it grind to a halt. The area is being loved to death. it is understandable to control how it is used and managed. As a dog owner (and dog walker) I typically keep my dog on leash. I am also a multi-horse owner. It is impossible to regulate all users all the time. As a dog walker, I am very rarely, in the Headlands. I do however, occasionally walk my own dogs on the Miwok Trail that extends from the lower end of the parking area going N towards Mt Tam. It is over reactive, overly restrictive of the GGNRA management to clamp down in such a manner on this and other trails. It completely excludes a substantial group of users. I would hope you will reconsider this heavy handed approach.

Ellen Garvie.

<b>Correspondence:</b>	I suggest that dogs be allowed in public parkland only if they are leashed, muzzled and diapered. We diaper our children. We do not allow them to shit everywhere and then suggest that parents pick it up. We do not allow our children to bite and intimidate others.				

I am sympathetic to the need for some individuals who need dogs. But I fail to see why dogs deserve more consideration than human beings. Please do not let dogs roam without leashes, without muzzles, nor without diapers.

Thanks.

**Correspondence:** Although I currently reside in Virginia, I was a resident of San Francisco and still have many contacts in the city. I am a responsible dog owner, as are my friends in the city, and already there are too few places we can take our dogs for off-leash running time. Dogs need to burn off their energy to remain balanced and well-behaved, and sometimes the only way their owners can help them do that is by letting them run off leash. I am not a marathon runner, but my dog is, and she needs more places - not fewer - where she can get proper space to run. If you cut back on off-leash areas in and around the city you will definitely start to see the results in the behavior of the under-exercised, unbalanced dogs who will begin to act out because they will no longer have proper outlets to expend their energy. I don't think that's a side effect the proponents of these cuts have thought through.

**Correspondence:** I strongly oppose Alternative F, your preferred dog management plan to restrict off-leash and dog-friendly access to the GGRA. Instead, I support Alternative A, the No Action Alternative.

I only take my dog to off-leash areas as she is friendly, year old Labrador retriever mix and desperately needs the exercise that only off-leash areas provide. As a California voter, and a fully employed citizen, I feel that it is ridiculous for dogs to be restricted as they are already AND to extend these restrictions. It feels like a criminalization of dogs and a loss of rights to dog owners.

Dogs are already off-limits on over 99% of the Golden Gate Recreation Area. There isn't any compelling reason to eliminate or further restrict the remaining 1%. **Correspondence:** Dear Superintendent Dean,

My name is Bruce Yandell, a San Carlos resident for the past 21 years. I walk my dog regularly on and off-leash for the past several years and I regularly enjoy the GGNRA.

I strongly oppose the preferred alternative for GGNRA because it is too restrictive. In addition, there hasn't been a single peer-reviewed, site-specific study (as required by law) that supports such a drastic restriction of dog-friendly areas. Both the DEIS and SEIS fail to prove negative impacts are not only occurring now but that dogs are causing them. We want real science not anecdotes.

The GGNRA has lost sight of its purpose: it was set up to be a RECREATION AREA for a densely populated, urban area. These trails and beaches have been set aside for dog walking since the original pet policy in 1979. That policy needs to be formalized and supported with off-leash areas in San Mateo County and on new lands that the GGNRA acquires in the future.

The GGNRA was designed to be a place to enjoy and appreciate the outdoors and nature. I can't think of a better way to enjoy our natural beauty than with another animal and animal loving residents (and voters) of the SF Bay Area. Our community should be looking for ways to increase access to all individuals rather than implementing regulations which will restrict and reduce appreciation of the resources that were set aside for the greater good of the community.

Please join us in an effort to preserve the rights of everyone for access to the GGNRA.

Sincerely,

Bruce Yandell

**Correspondence:** As dogs outnumber children in this city, the rights of their guardians should be given equal if not more consideration.

As a dog trainer I know the importance of off leash recreation for dogs. Dogs are social animals and are part of our lives. It is important that people have ample areas for their dogs to run off leash and socialize

with other dogs.

If you restrict the access to off leash areas, this will push dog walkers to go to local parks which will be a burden for the city. It also might put many dog walkers out of business.

As a former SF SPCA employee who ran the mobile adoption department, I am concerned about the future of dog adoptions should there be restrictive off leash areas. People might think twice about adopting a dog if it means they can not have them properly exercised.

I oppose the Preferred Alternative because it is too restrictive.

I oppose fences to surround or delineate any off-leash area in the GGNRA.

<b>Correspondence:</b>	To whom it may concern:				

After reading the preferred dog management alternative for Mori Point, I am disappointed to see that the protection of the area's ecology and visitor safety takes a back seat to a vocal minority of dog-owners who fail to take responsibility for the impact their behaviors have on the area.

I used to walk and jog the Mori Point area almost daily with my toddler son, and since the first comment period , the amount of dog excrement has grown, as are the numbers of off-leash animals in already on-leash appointed areas.

It is rarely the case when I don't see off leash dogs running through the new plantings, damaging the work to preserve habitat for endangered species. I have been afraid several times for my safety and that of my son because of pitbull and similar breeds off-leash, as well as other large dogs chasing wildly through the area with their owners far from any ability to curb and control their dogs. I realize there are a number of respectful dog owners, but it only takes one neglectful owner to precipitate a tragedy.

And in my 13 years of frequenting Mori Point, I have yet to see one enforcement officer, hence the low number of reported incidents in the most recent report. If there are not enough resources to enforce on-leash and excrement pick-up policies, the proposed alternative of on-leash is useless. We are back to the status quo of lack of safety, damaged ecology for the animals that do belong in the area, as well as the unhygienic waste ubiquitous to Mori Point.

It is easy to see the stark comparison between San Pedro Valley Park which has a no-dog policy, and as a result I now prefer San Pedro Park and will leave Mori to the dogs.

Sincerely,  
Summer Lee

**Correspondence:** As a responsible dog owner and resident of Mill Valley, California, I am concerned about the new proposal to further limit dog access areas in Marin County. The changes made in the 2013 SEIS do not adequately address the criticisms and concerns expressed in comments filed in 2011 which ran 3:1 against the plan. I support the "No Action Alternative" in the SEIS for Muir Beach, Homestead, Oakwood Valley and the Marin Headlands. The SEIS contains no peer reviewed site specific studies or vital monitoring as required by law to initiate such a dramatic change to the public's use of their public land. I would request that you retain the 1979 pet policy and remember that it is a recreation area and not a national park.

Me, my wife and our 6 year old daughter have lived in Mill valley since 2004 and take our dog on daily walks throughout southern marin. The areas that allow dog walking are very limited. Restricting these areas further will require us to drive greater distances to find suitable dog walking areas. Thank you for allowing me to comment on this important topic. - J. Weis

**Correspondence Type:** Web Form

**Correspondence:** I have lived in the bay area for about a decade and have brought my family to the GGNRA almost weekly during that time.

I oppose the Preferred Alternative because it is too restrictive. There is no justification in the dog management plan for major changes. I support formalization of the 1979 Pet Policy PLUS off-leash access in San Mateo County and on new lands that the GGNRA acquires in the future.

I oppose fences to surround or delineate any off-leash area in the GGNRA. Fences will make off-leash areas feel like pens and visitors using them will feel unwelcome.

I oppose the Monitoring-Based Management Strategy that replaced the Compliance-Based Management Strategy in the earlier version of the dog management plan. The GGNRA should not be allowed to change the leash status in particular GGNRA areas just because it deems that not enough people are complying with the leash restrictions.

The new dog management plan did not adequately consider comments to the earlier version of the plan from people who support dog walking and appears to have dismissed nearly all of them. There is no explanation why these comments from 2011 about issues such as negative impacts on the community and human health from off-leash restrictions were not considered in the development of the preferred alternative.

The plan does not adequately analyze impacts on nearby parks of the Preferred Alternative. This analysis was requested by the public and by the San Francisco Board of Supervisors in 2011. The new plan claims that, because some off-leash space will still be available in the GGNRA, even though much smaller, most people will continue to walk their dogs there and not move to nearby city parks. No evidence is given to support either assumption.

The plan lists impacts that "might," "can," or "could" happen, while providing no site-specific evidence that any of those impacts are occurring now or have ever occurred in the GGNRA. The new plan admits the GGNRA has not conducted site-specific studies at GGNRA sites to document impacts from dogs on vegetation and soils.

The plan admits there are few scientific, peer-reviewed studies that show impacts from dogs (e.g., on vegetation and soils, p. 375), so they cite anecdotal observations of impacts made by NPS staff. A supplemental environmental impact statement needs to be based on science, not anecdote.

The plan misrepresents the enabling legislation and the reason for the founding of the GGNRA. It says the GGNRA's purpose is to offer a "national park experience to a large and diverse urban population" (p. 1). However, the enabling legislation says the purpose of the GGNRA is to "provide for the maintenance of needed recreational open space."

The plan will not allow off-leash dog walking on any trail anywhere in the GGNRA. There is no evidence presented that off-leash dog walking on GGNRA trails has had any negative impacts. Despite this, the GGNRA decided not even to consider the possibility of off-leash dog walking on any trails at all. This results in a major restriction of off-leash dog walking in Marin County in areas where it had been practiced for decades.

The plan will not allow any off-leash dog walking on new lands acquired by the GGNRA, even if dog walking has traditionally occurred there, such as recently acquired Rancho Corral di Tierra.
