

## VEHICULAR CIRCULATION

This section includes the value given to images while asking the question “How appropriate is the image you are seeing, now and in the future, for Vehicular Circulation on Fire Island?”

Limited access for vehicles is a functional need along the island. In this case, because cars are restricted on the island, the character of this access is important. The same spaces are used by pedestrians which enhances its function and contributes to the character of place. The key is the narrowness and the adjacent vegetation.

The top-rated image in the vehicular circulation category was this curving narrow sand road with natural vegetation on both side

Of equal value is a very narrow lessder used roadway defined by the two tire tracks dfine by ground cover and edged on both sides by vegetation. .

Sand road with adjacent boardwalk.

## Vehicular Circulation

Sand Road with adjacent concrete sidewalk, buried utility wires

**+5 (5)**

Sand road with adjacent concrete sidewalk and buried utility wires.
