Subject: NEPA and NHPA Clearance: 2010-075 Housekeeping Camp, Replace Existing Ice House (Machine) (32885)

The Management Team has reviewed the proposed project/action and completed its environmental assessment documentation, and we have determined that there:

- Will not be any effect on threatened, endangered, or rare species and/or their critical habitat.
- Will not be any effect on historical, cultural, or archeological resources.
- Will not be serious or long-term undesirable environmental or visual effects.

The subject proposed project, therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved and construction and/or project implementation can commence.

For the proposed project actions to be within compliance requirements during construction and/or project implementation, the following mitigations must be adhered to:

- No mitigations identified.

Project: 2010-075 Housekeeping Camp, Replace Existing Ice House (Machine)

PEPC Project Number: 32885

Project Description: The purpose of this project is to remove the existing ice house at Housekeeping Camp and replace it with a new, smaller ice house. The existing ice house has a limited capacity to provide ice to park visitors and is difficult to find replacement parts due to its age. The proposed replacement will have a footprint of 12 foot by 7 foot, 70% smaller than the present 45 foot by 10 foot structure. The new ice house would require the installation of a 12 foot by 7 foot concrete slab foundation as well as water and sewer lines. Trenching for the water and sewer lines will be required as part of this project to tie into existing water and waste water lines in Housekeeping Camp. Trenching will be approximately 25 feet in length, 1 foot wide and 18 inches deep. Trenching will take place in pre-disturbed, paved areas and will be patched appropriately. All tie-in activities will be coordinated with Valley Utilities in advance of actual work.

Operational or Special Considerations

- Back-flow prevention will be installed.
- Accessibility will be maintained.
- There will be no increase in noise with the new machine
- Lighting will be directed to specific locations on the Ice House and not flood the area.

Project Location:

Mariposa, CA

Mitigation:

- No mitigations identified.

Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):

C.8 Replacement in kind of minor structures and facilities with little or no change in location, capacity or appearance.

On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.
