

APPENDIX C:
CONSULTATION & COORDINATION

Appendix C: Consultation & Coordination

Internal Scoping

Internal scoping was conducted by an interdisciplinary team of professionals from Keweenaw National Historical Park (Keweenaw NHP), Keweenaw NHP Advisory Commission, the NPS Midwest Regional Office, the Midwest Archeological Center, and members of the consultant team.

A project initiation meeting was held on 20 September 2010 at the park headquarters in Calumet. The group reviewed the project scope of work and discussed evaluation and management issues related to the Unit. Also, a preliminary list of project stakeholders was prepared.

A 75% draft of Chapters I through III was submitted for internal review in April 2011. On 14 June 2011 a full-day internal project workshop was conducted at the park headquarters in Calumet. Attendees included Mike Pflaum, Superintendent KEWE, Steve Delong, COTR, KEWE, Brian Hoduski, Archivist, KEWE, Kathleen Harter, Chief of Interpretation, KEWE, Jeremiah Mason, Archivist, KEWE, Jo Urion, Historian, KEWE, John Rosemurgy, Historical Architect, KEWE, Tim Sickles, Seasonal Intern Architect, KEWE, Tom Baker, Administrative Assistant, KEWE, Louise Wilson, Will Ballard, Woolpert, Inc., Steve Jones, Historic Architect, QEA, Lindsey Pickornik, Architect Intern, QEA, and Brenda Williams, Preservation Landscape Architect, QEA. Ms. Williams provided an overview of the project scope, goals, objectives, impact topics, schedule, landscape history, landscape character areas, existing conditions and analysis, and led a discussion regarding these topics. This was followed by an introduction to design and treatment topics including overall Calumet Unit wayfinding, core visitor experience, Red Jacket Road corridor, Agassiz Park, Village of Calumet, Osceola No.13, South Mine Street corridor, railroad/recreational corridor, and housing locations. The remainder of the day was spent developing treatment alternatives for the landscape character areas noted.

Over the course of the project, NPS and consultant team members have conducted individual site visits to view and evaluate the treatment alternatives.

External Scoping

External public scoping was conducted to inform stakeholders and the public about the proposal to establish treatments for historic landscapes at the Calumet Unit of Keweenaw National Historical Park and to generate input on the preparation of this *CLR/EA*.

On 15 June 2011 a public meeting was held at the park headquarters in Calumet, Michigan. To publicize the public scoping meeting, a press release was forwarded to local media outlets and a public notice was forwarded to NPS partners and placed in public locations throughout Calumet (see Figures C-1 and C-2).

Eighteen individuals attended the meeting in addition to the project consultant team. Mike Pflaum, Superintendent Keweenaw National Historical Park, began the meeting and explained that the meeting was intended to be a visioning process to stimulate long-term ideas for the

1 future of the Calumet Unit of the park. He introduced Steve DeLong , landscape architect,
2 Keweenaw National Historical Park, who explained that the CLR for the Quincy Unit of the park
3 was completed in 2010, and the current project focus is the Calumet Unit. Brenda Williams
4 presented an overview of the project including a summary of the landscape history and analysis.
5 She then presented a series of treatment concepts for the core of the Calumet Unit, as well as Red
6 Jacket Road, Agassiz Park, Downtown Calumet, South Mine Street, Osceola No.13, and the
7 Railroad Corridor. The concepts were provided to stimulate conversation regarding desired
8 future landscape conditions within the Calumet Unit. The remainder of the meeting focused on
9 gathering comments and ideas regarding the future of the Calumet Unit from those present. An
10 account of the meeting and comments is provided in a memorandum dated 27 June 2011
11 prepared by Brenda Williams (see Figure C-3 through C-6).

12
13 During the June 2011 public meeting, additional interaction and dialogue with stakeholders was
14 requested. The NPS determined that additional dialogue and coordination of landscape treatment
15 alternatives with park partners during the development of part two of the CLR would reduce the
16 amount of work and government costs required if these changes were recommended by
17 stakeholders later in the process, during the public review period. To address stakeholder
18 concerns and coordinate landscape treatment alternatives with park stakeholders the project
19 scope was modified to provide additional efforts dedicated to synthesizing the NPS treatment
20 alternatives with park stakeholders. These efforts included consultation with numerous
21 stakeholders culminating in a series of stakeholder meetings held in Calumet in December 2011.
22 Meetings were held during the first week of December 2011. Stakeholder focused meetings
23 were held with the following groups: Calumet Township (9 attendees), Keweenaw National
24 Historical Park Advisory Commission (8 attendees), C-L-K Schools (2 attendees), Village of
25 Calumet (14 attendees), Houghton County Road Commission (1 attendee), Main Street Calumet
26 and local business owners (6 attendees), Western Upper Peninsula Planning and Development
27 Region (1 attendee), and the Calumet Housing Commission (4 attendees). Brenda Williams and
28 Steve DeLong attended all of the meetings and are not counted in the attendee totals. Written
29 invitations were distributed regarding each of the stakeholder meetings. One example of an
30 invitation is provided in Figure C-7. A memorandum summarizing information discussed at all
31 of the meetings held during the first week of December 2011 is provided as Figures C-9 through
32 C-25.

33
34 In addition, meetings were held focused on two specific landscapes, the Red Jacket Road
35 corridor (11 attendees) and Agassiz Park (7 attendees). Finally, a public open house and
36 presentation (11 attendees signed in additional attendees were present) were conducted on 8
37 December 2011. To publicize the public open house, a press release was sent to local media
38 outlets and a public notice was forwarded to NPS partners and placed in public locations
39 throughout Calumet (see Figure C-8). During the public open house, materials related to the
40 treatment alternatives were displayed and members of the project team were available to discuss
41 issues with the attendees. In addition, a handout with questions related to the treatment
42 alternatives was given to each attendee and they were asked to provide written responses. A
43 copy of the hand out including answers provided is included as Figures C-26 through C-33. A
44 memorandum summarizing information discussed at all of the meetings held during the first
45 week of December 2011 is provided as Figures C-9 through C-25.

Agency Consultation

In addition to the general public scoping, the project team contacted state and federal agencies for information and comments relevant to the proposed action. Agencies contacted included:

Federal

- U.S. Department of Interior – U.S. Fish and Wildlife Service (Section 7 coordination letter sent to USFWS on 25 January 2011). A copy of the letter is provided as Figure C-34. **indicate response when received.

State

- Michigan Natural Features Inventory. The information request letter to MNFI was sent DATE. The MNFI responded to the NPS on DATE.
- Michigan Department of Natural Resources. An email request was forwarded to MDNR DATE. The Michigan DNR responded in a letter dated 25 January 2011. A copy of the letter is provided as Figure C-35.
- Michigan Department of History, Arts and Libraries. Early contact with the State Historic Preservation Officer was initiated in DATE. The SHPO received the internal NPS draft of the CLR/EA DATE. The SHPO responded DATE.

Federal and State response letters are provided at the end of this chapter.

Cultural Landscape Report / Environmental Assessment Review

1
2 To inform the public of the availability of the CLR/EA for public review, the NPS published and
3 distributed a press release to various agencies and members of the public on the park's mailing
4 list, as well as placing an advertisement in the local newspaper. Copies of the CLR/EA were
5 provided to interested individuals upon request. Copies of the document were available for
6 review at the C-L-K Public Library in Calumet, Michigan Technological University Van Pelt
7 Library and Portage Lake District Library in Houghton, and the Hancock School Public Library
8 in Hancock, Michigan. Other copies were available at the Village of Calumet, Calumet
9 Township, the Keweenaw National Historical Park Visitor Center in Calumet, and the NPS
10 website.

11
12 The CLR/EA is subject to a 30-day public review and comment period. During this time, the
13 public is encouraged to submit their written comments to the NPS address provided below:
14

15 CLR/EA Comments
16 ATTN: Tom Baker, Management Assistant
17 Keweenaw National Historical Park
18 25970 Red Jacket Road
19 Calumet, MI 49913
20

21 Another option for public comment is to access the NPS website for Planning, Environment and
22 Public Comment (PEPC) at parkplanning.nps.gov and choose Keweenaw National Historical
23 Park to provided comments on the CLR/EA. Following the close of the comment period, all
24 public comments will be reviewed and analyzed, prior to the release of a decision document. In
25 response to internal NPS and public review, the NPS will make appropriate changes to the CLR
26 /EA as needed.

Park Invites Public – Seeks Input

(Calumet, MI) The National Park Service at Keweenaw National Historical Park (NHP) is hosting a public meeting at park headquarters, 25970 Red Jacket Road at the corner of US-41 in Calumet on Wednesday, June 15 from 6:30 to 8:00 p.m. to discuss the development of a cultural landscape report (CLR) for the Calumet Unit.

Cultural landscape reports provide park managers with an understanding of the history, evolution, and historical significance of historic landscapes. A CLR fosters informed and thoughtful management and preservation of these properties, and recommends future treatment of a historic landscape.

The meeting will present an overview of the Calumet landscape history and an analysis of existing conditions. It will also provide an opportunity to discuss suggestions, preferences, and concerns prior to developing landscape treatment alternatives.

All are welcome to attend, ask questions, provide comments, and learn more about the project. For more information on this meeting or the Calumet Cultural Landscape Report, please contact Keweenaw National Historical Park at (906)337-3168 or visit the park's website at www.nps.gov/kewe.

Calumet Cultural Landscape Report
Public Meeting
Wednesday, June 15, 2011
Park Headquarters
25970 Red Jacket Road, Calumet

Cultural landscape reports provide park managers with an understanding of the history, evolution, and historical significance of historic landscapes. They foster informed and thoughtful management and preservation of these properties. And they recommend future treatment of a historic landscape.

Keweenaw National Historical Park is developing a cultural landscape report for the Calumet Unit. Park staff will be hosting a public meeting to discuss the project with the public.

6:30 p.m. to
8:00 p.m.

Public Meeting
This meeting will present an overview of the Calumet landscape history and an analysis of existing conditions. It will also provide an opportunity to discuss suggestions, preferences, and concerns prior to developing landscape treatment alternatives. All are welcome to attend, ask questions, provide comments and learn about the project. This is also an opportunity to comment on the forthcoming Environmental Assessment of the treatment alternatives.

For more information on this meeting, or the Calumet Cultural Landscape Report, please contact Keweenaw National Historical Park at (906) 337-3168 or visit us on the web at www.nps.gov/kewe.

Subject: Public Meeting Notes, June 15, 2011

1037 SHERMAN AVENUE
MADISON, WI 53703
608 260 8020

On 15 June 2011 a public meeting was held at the park headquarters in Calumet, Michigan. An agenda is attached. Attendees included:

- Mike Pflaum, Superintendent KEWE
- Steve DeLong, COTR, KEWE
- Tom Baker, Administrative Assistant, KEWE
- Charles Masten (Charles_masten@nps.gov)
- Paul Lehto (calumettownship@pasty.net)
- Steve Albee* (salbee@op.net)
- Elmore Reese (ereese@mainstreetcalumet.com)
- John Sullivan* (jshs907@yahoo.com)
- Tom Baker (Thomas_m_baker@nps.gov)
- Bill Rosemurgy (calumethdc@gmail.com)
- Davey Holunbo (techdirector@calumetheater.com)
- Sue Dana* (villageofcalumet@pasty.com)
- Mike Hamilton (mhamilton08@gmail.com)
- Angie Hamilton (angiehamilton2010@gmail.com)
- James Newman (knewman@chartermi.net)
- Chris Green (cagreen@charter.net)
- J. Mahe
- Anita & Paul Campbell (pdcampbell@pasty.com)
- James Heikkila (jheikkila@pasty.net)
- Tom Tikkanen (ttikkanen@mainstreetcalumet.com)
- * indicates member of the Keweenaw Advisory Commission
- Lindsey Pickornik (lpickornik@quinnevans.com)
- Will Ballard (will.ballard@woolpert.com)

Mike Pflaum, Superintendent Keweenaw National Historical Park, began the meeting and indicated that this is a visioning process that is meant to stimulate long-term ideas for the future of the Calumet Unit of the park. He introduced Steve DeLong, landscape architect, Keweenaw National Historical Park, who explained that the CLR for the Quincy Unit of the park was completed in 2010, and the current project will focus on the Calumet Unit. Brenda Williams presented an overview of the project including a summary of the landscape history and analysis. She then presented a series of treatment concepts for the core of the Calumet Unit, as well as Red Jacket Road, Agassiz Park, Downtown Calumet, South Mine Street, Osceola #13, and the Railroad Corridor. The concepts were provided to stimulate conversation regarding desired future landscape conditions within the Calumet Unit. The remainder of the

Page 2 of 4

meeting focused on gathering comments and ideas regarding the future of the Calumet Unit from those present.

Comments included:

Sue Dana (Village of Calumet):

1. Why are there areas highlighted in the NHL that are outside of the Village boundary?
2. Why doesn't the core story include Sixth Street?
This is misleading to people who are not familiar with the area.
3. In regards to reconstructing Agassiz Park, losing residents is a concern. How can residents be relocated within the Village?
4. In regards to Fourth Street, the grocery store has requested to widen the street so that it is easier for customers to locate and arrive to the store. A boulevard was in the original plans but didn't get built because of snowplowing issues. There will probably be more traffic on Fourth Street due to the new Visitor Center. Problem with cohesive plan is because there are many property owners on the west side of Fourth Street. Revisit proposals to incorporate into CLR.
5. Transportation plan. Street car line reconstructed back to the Depot and where it was. GMP plan to include Street Car. (Not GMP? Inserted somewhere as an appendix).
 - a. A discussion about this topic included Ideas about rubber tire trolley. Street car track on Oak, Sixth Street, and out to Osceola #13. Tourist attraction? Yes. Residents use it? Not so much. Not sure who would operate the street car. Interpretive opportunity or alternative service without so much investment and infrastructure.
 - b. NPS will provide a copy of the alternative transportation study to the project team.
6. Brick and pressed concrete in the downtown area. Does CLR address this? BW: we are in the process of deciding which areas need to be addressed, and at what level of detail.
7. Sue: Brick under asphalt. Pulled up asphalt and brick was fine. Would like to see original brick remain. When this cannot happen, Replace with same kind. Should areas of pressed concrete be eventually replaced with historic brick or concrete? Replace asphalt with type of pavement that was there historically.

Paul Lehto:

1. Would really like to see the Mineral Collection be moved to the Warehouse No. 1 and would need 60-80 feet of the building.
2. In regards to Red Jacket Road is it primarily owned by the Park. Three other owners not including NPS on Red Jacket Road. Wouldn't be upset if he saw the Township building removed.
3. Thinks that Osceola #13 is a great resource and would like to see it preserved/used.

Tom Tikkanen:

1. Diverse opinions about Fourth Street.
2. Calumet is a walkable community.
3. Supports that the apartment buildings will reach their economic life.
4. Make park center of family life and have band shell. Interested in meeting with project representatives to discuss.
5. What is happening in the area south of Red Jacket Road, north of Sixth Street Extension and along Mine Street? BW—will remain industrial

1
2 **Figure C- 4: 15 June 2011 Public Meeting Notes, page 2 of 4**

7 March 2012
Page 3 of 4

James ?:

1. Drainage problem at piece of land at south side of Red Jacket road and west of Armory Street. Retaining wall to keep water from running into church. What about putting in a garden? No draining on north side of Red Jacket Road. Catch basin needs to be replaced. (NPS owns land)

Chris Green:

1. Will report address bodies of water in the Unit? This includes the wetland in the southwestern portion of the Unit. Calumet Lake is outside of the Unit, but adjacent.
2. Recreation or industrial use/sewer system? What information is there regarding the activities that have happened on Calumet Lake. Thoughts about water in the future? Right now is breeds mosquitos. Some but very little fish in Swedetown. Lake it like swamp.
3. Sue Dana indicated that Paul Lehto has plans for changes around Calumet Lake, including adding a recreational trail around the lake.

Mike and Angie Campbell:

1. Live in Centennial Heights. Love Calumet Lake and Lions Park. Lions Park trails around the entire lake. How could trail be connected to town from Jefferson?

Design Concept: Others suggested that the two bodies of water could be linked with walking and jogging trails. Consider extending the parallel/divided trail system further to achieve this concept (keeping the ATV/snowmobile trail, adding a vegetative/topographic buffer, and adding a jogging/bike trail.

Bill Rosemurgy:

2. Does the CLR address the other 8 months of the year when there is snow? Where are the snow piles going to go? On the gravel in the rendering? Winter is the dominant season.
3. Steve DeLong speaks about the importance of balancing the spikes of visitors in summer.
4. Bill asks about the Depot in the winter. Brenda comments that these ideas are guidance and not the end result. What is feasible? What are opportunities for multiple seasons?
5. Bill asks what is the lifetime of the plan? Answer is that the plan will be reexamined in 20 years.

Brenda Williams:

Expresses gap in thoughts and plans that have been already thought through (GMP)
Steve DeLong:
Facilitate community interaction.

Question regarding if there will be a draft available for the public. Public review draft will be issued end of November.

Sue Dana: Plans and new perspectives. Need to have dialogue about how to go about existing plans.

General Comments:

1. No Arizona designers – There is snow!
2. Is there a copy of the presentation to share with others? A discussion ensued identifying the need to have more community engagement in the project. NPS/project team will come up with a plan to reach out to the community in small group meetings to gather information and ideas to

1
2 **Figure C- 5: 15 June 2011 Public Meeting Notes, page 3 of 4**

7 March 2012
Page 4 of 4

- incorporate into the project process. Efforts will be made to engage the community in developing a holistic vision for the Calumet Unit.
3. Mike Pflaum: the process of implementing the recommendations in a plan like this one can be very slow, but incremental changes will add up over time. Having the CLR to guide how the landscape is treated will help in obtaining funding as it becomes available.
 4. The CLR can endorse other plans and this will help the community to be successful in seeking funding for projects.
 5. Steve DeLong is the main contact person for the project. He will pass information along to the project team.

Email received after meeting:
John Sullivan
<jshs907@yahoo.com>

Steve,
A few tidbits:
Brenda presented a picture she said was a 1910 shot of Fifth street and she said the street appeared to be dirt. Fifth St was paved with 6" of concrete and a brick wearing surface in 1905. The HOUSING LOCATION MAP with several pictures had one picture labeled "Seventh St from Elm to Pine", it was Sixth St. I liked the idea of removing the Family Housing from Aggazi Park to restore some of the Park and relocate the folks by dispersing them into existing Historic community housing. Sue Dana's concern about loss of revenue due to loss of population, however can be overcome by the relocation and the positives from the Park rehab project.
Paul Lehto has a trail concept plan that goes from Swedetown to Calumet Lake using the former railroad grades. The LEHTO RECREATIONAL TRAIL.

I enjoyed the meeting and the concepts presented.
John S

Subject Calumet Township Stakeholders Meeting

Quinn Evans Architects has been contracted by the National Park Service to prepare a cultural landscape report (CLR) for the Calumet Unit of Keweenaw National Historical Park (NHP). Cultural landscape reports provide park managers with an understanding of the history, evolution, and historical significance of historic landscapes. A CLR fosters informed and thoughtful management and preservation of these properties, and recommends future treatment of a historic landscape.

Because Keweenaw National Historical Park is a partnership park wherein the majority of the land is owned by local entities, it is imperative to include the local stakeholders in this planning process. In order to develop landscape treatment recommendations that are valuable to the community, a series of stakeholder "focus group" meetings and a second public meeting will be conducted in Calumet during the first full week of December 2011. The public meeting will be held on 8 December 2011. The first public meeting was conducted in June 2011.

A stakeholder meeting focused on issues related to Calumet Township has been scheduled for Monday, December 5th, from 8:00am until 9:45am, at the Township Office on Red Jacket Road. Representatives from the following local organizations are being invited to this meeting: Calumet Township, Calumet Township Historic District Commission, and Calumet Township Planning Commission.

As a representative of one of these groups, your participation will be of great value to the planning process. The meeting is intended as a chance for the planning team to learn from the local community about your plans and ideas for the future of Calumet. I have prepared a preliminary itinerary for the meeting:

- 8:00am Initiate meeting & introductions
- 8:10am Brief introduction to the CLR project
(What has been done so far, and what the next steps are.)
- 8:20am Discussion focused on your planning efforts and ideas that have been undertaken related to the CLR study area.
- 9:15am I will explain the DRAFT design concepts that have been developed for the areas of interest to your group. Your responses to these concepts will be recorded and any ideas you have to improve the designs will be incorporated into the alternative treatment plans, when appropriate.
- 9:45am Adjourn

I will be prepared to share information about the history of the landscape, as well as about possible treatment recommendations for other focus areas, with each group, if this is desired.

WASHINGTON, DC
ANN ARBOR, MI
DETROIT, MI
MADISON, WI
WWW.QUINNEVANS.COM

2

Based on the feedback we received in June, we have developed a list of sites that will be addressed in the treatment section of the CLR. Of those, several have been selected to be discussed during the Calumet Township stakeholder meeting, including:

LANDSCAPE DESIGN CONCEPTS

1. Osceola No.13
2. South Mine Street Corridor
3. Red Jacket Road Corridor (including Calumet Coliseum and Township office)
4. Sixth Street Extension
5. Calumet Railroad / Recreational Corridor

Other design concepts that may be presented in the report include those for the sites within the Village of Calumet Historic District, the Italian Hall site, and Agassiz Park. In addition, the report may provide general recommendations for historic housing locations within the Calumet Unit and a Core Visitor experience interpretive route through the landscape.

In preparation for this meeting, please let me know if there are any previous planning documents or efforts that should be incorporated into the planning process prior to the meeting.

Thank you for your interest in this project.

National Park Service
U.S. Department of the Interior

Keweenaw National Historical Park

**Calumet Cultural Landscape Report
Public Open House and Presentation**
Thursday, December 8, 2011
Park Headquarters
25970 Red Jacket Road, Calumet

Cultural landscape reports provide park managers with an understanding of the history, evolution, and historical significance of historic landscapes. They inform thoughtful management and preservation of these properties and recommend future landscape treatment.

Keweenaw National Historical Park is developing a cultural landscape report for the Calumet Unit. The National Park Service will host a public open house and presentation to gather input and provide information related to the project.

**4:00 p.m. - 6:15 p.m.
Public Open House**

Material related to the Cultural Landscape Report will be displayed for viewing at your own pace. Project team members will be available to discuss issues related to the project one-on-one. Please come learn about the project and share your ideas, suggestion, and concerns related to the future of the Calumet Unit.

Landscapes addressed in the report include:
Calumet Historic District Sites
Italian Hall Site
Red Jacket Road Corridor
Agassiz Park
Osceola No. 13
Mine Street Corridor
Railroad Grade / Recreational Corridor

**6:15 p.m. - 7:00 p.m.
Presentation**

An overview of the history and analysis of the significant cultural landscapes related to the Calumet Unit will be presented - followed by an introduction to the preliminary landscape design concepts being considered for sites related to the Calumet Unit.

For more information about this open house and presentation, or the Calumet Cultural Landscape Report, please contact Keweenaw National Historical Park at (906) 483-3022 or visit on the web at www.nps.gov/kewe
