

List of Properties and Buildings Included in the Historic Properties Management Plan (HPMP)

Properties that are included in the HPMP meet the following criteria:

- Are listed, eligible, or potentially eligible for listing in the National Register of Historic Places
- Are older than 45 years

The list on the following pages groups buildings by property. A “property” can include multiple buildings. The “Eligibility” column states the current or proposed status of National Register listing. Properties can be:

- **Listed** on the National Register of Historic Places
- **Contributing** to a historic district that is listed on the National Register of Historic Places. A **contributing** building is one whose historical integrity or architectural characteristics enhance the significance of the historic district.
- **Eligible** for listing on the National Register of Historic Places. A Determination of Eligibility has been completed and the State Historic Preservation Office (SHPO) has concurred with the National Park Service’s recommendation that the property/building is eligible. *Please note: as of this writing, the National Park Service is awaiting SHPO concurrence on several of the properties. Until concurrence is received (or not), this list of eligible properties is considered “draft.”*
- **Not Eligible** for listing on the National Register of Historic Places. A Determination of Eligibility has been completed and the State Historic Preservation Office has concurred with the National Park Service’s recommendation that the property/building is not historic and therefore not eligible for listing. *Please note: as of this writing, the National Park Service is awaiting SHPO concurrence on several of the properties. Until concurrence is received (or not), this list of ineligible properties is considered “draft.”*
- **Not Evaluated** in the HPMP. Buildings within a historic property that are less than 45 years old and therefore were not evaluated in the HPMP.
