RE: Lake Cell Communications Tower Infrastructure (WYSHPO File #0612BAB008)

Dear Ms. Hopkins:

After further design and planning, Yellowstone National Park proposes to permit the construction of a utility equipment building that will house the electronic control equipment necessary for the operation of the telecommunications equipment located on the Lake Cell Communications tower. The equipment building footprint will be 26 feet by 12 feet and will be surrounded by a 6-foot tall chain link fence (elevation schematic enclosed). As noted in our previous correspondence on this undertaking, the area has been inventoried for archeological resources, and none are present. The equipment building will not be visible from any historic districts in the area, including the Grand Loop Road.

The park has determined that no historic properties will be affected by the construction of this equipment building and fencing, and we request your concurrence with this determination. If you have any questions regarding this project, please call Tobin Roop, Branch Chief of Cultural Resources, at (307) 344-2224, or Bret DeYoung, Branch Chief of Telecommunications, at (307) 344-2070.

Sincerely,

Daniel N. Wenk
Superintendent
