III. Comments

We invite comments concerning this information collection on:

- Whether or not the collection of information is necessary, including whether or not the information will have practical utility;
- The accuracy of our estimate of the burden for this collection of information;
- Ways to enhance the quality, utility, and clarity of the information to be collected; and
- Ways to minimize the burden of the collection of information on respondents.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this IC. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: February 15, 2013.

Madonna L. Baucum,
Information Collection Clearance Officer,
National Park Service.

Notice of Intent To Prepare an Environmental Impact Statement for the Wilderness Stewardship Plan, Olympic National Park, Clallam, Grays Harbor, Jefferson and Mason County, WA

AGENCY: National Park Service, Interior.
ACTION: Notice of Intent.

SUMMARY: In accordance with § 102(2)(C) of the National Environmental Policy Act of 1969 (Pub. L. 91-190) Olympic National Park is initiating the conservation planning and environmental impact analysis process required to inform consideration of alternative strategies for the future management of the Olympic Wilderness. In November 1988, Congress designated about 95% (876,669 acres) of park lands as the Olympic Wilderness. Through this planning process a Wilderness Stewardship Plan (WSP) and Environmental Impact Statement (EIS) will be developed to provide guidance and direction to meet the requirements of the Wilderness Act of 1964 and 2006 NPS Management Policies, as well as to implement actions identified in the park's 2008 General Management Plan (GMP). This process will include identifying and analyzing a range of alternatives for achieving wilderness stewardship objectives and conducting wilderness eligibility studies for areas identified in the GMP Record of Decision (2008). The WSP will identify standards, conditions, and thresholds to preserve wilderness character, protect cultural and natural resources, and

adhere to legally mandated management and preservation requirements.

DATES: All comments must be postmarked or transmitted not later than April 23, 2013.

SUPPLEMENTARY INFORMATION: When Olympic National Park approved the Record of Decision for the GMP/Final EIS in August 2008 (the approved GMP is available at <http://parkplanning.nps.gov/documentsList.cfm?projectID=10233>), the final plan provided broad direction for wilderness stewardship at the park, with the overarching vision to ensure that the park's wilderness resources and character are valued, enjoyed, protected, preserved, and restored for the benefit of current and future generations. The GMP committed to development of a detailed WSP for specific management actions for wilderness based on the desired conditions and strategies prescribed in the GMP. Accordingly, the WSP will provide detailed guidance on a variety of topics including, but not limited to: wildlife management, cultural resource management, trail maintenance, trail bridges, and other necessary infrastructure in wilderness, day use and overnight use in wilderness, wilderness permitting, use of campfires, proper food storage, human waste management, stock use, group and party size, camping and camp areas, ecological restoration and rehabilitation in wilderness, scientific research activities, and commercial services.

To inform development of the WSP, the park will host a series of public scoping meetings, which are expected to occur in Clallam, Jefferson, Grays Harbor, Kitsap, and Mason Counties, and the greater Seattle area during January through March 2013. Confirmed

details on dates, times, and locations of these meetings will be published in a newsletter, announced via local and regional newspapers, and posted online on the wilderness plan Web site <http://parkplanning.nps.gov/olywild>. The purpose of the public scoping meetings is to obtain pertinent environmental information, as well as to identify park stakeholder issues and concerns that should be addressed in the WSP. After the public scoping period is complete and the NPS has reviewed and considered all comments, a scoping report will be prepared and posted on the wilderness plan Web site; also, printed copies may be obtained by contacting the park (see contact information below).

Following the scoping phase, the wilderness planning team will develop preliminary alternatives for wilderness stewardship. The preliminary range of alternatives will be released for public review and comment prior to the park's determination or development of the agency-preferred alternative. Notification of the opportunity to review and comment on the preliminary alternatives will be published in local and regional newspapers, announced via direct mailings from the park, and posted online at the wilderness plan Web site.

Following the preliminary alternatives outreach effort, the park will undertake preparation of the Draft EIS. The complete range of stewardship alternatives (including a "no action" baseline alternative) will be identified and analyzed, potential environmental consequences of each alternative (and appropriate conservation and mitigation strategies) will be assessed, and both the "environmentally preferred" course of action and "agency preferred" alternative will be identified.

The status of the overall EIS process will be updated periodically on the wilderness plan Web site. If you would like to be added to the project mailing list, you may mail or fax your request to the address or number noted above. Please indicate if you prefer to receive a printed or compact disk copy of the Draft EIS when it is released, or if you only wish to receive a notice that the document is available for review on the wilderness plan Web site.

How to Provide Scoping Comments: To ensure your information is fully considered, please provide your response either electronically at the wilderness plan Web site <http://parkplanning.nps.gov/olywild>, or you may mail or fax your written comments to Superintendent Sarah Creachbaum, Olympic National Park, Attn: Wilderness Stewardship Plan, 600 East

Park Ave., Port Angeles, WA 98362, Fax (360) 565-3015. Written comments may also be hand-delivered at any of the public scoping meetings. Comments in any format (written or electronic) submitted by an individual or organization on behalf of another individual or organization will not be accepted.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that your personal identifying information be withheld from public review, the NPS cannot guarantee that we would be able to do so.

Decision Process: After the analysis of all responses and information received during the scoping period, a Draft EIS will be prepared (at this time, release of the document is expected to occur during Winter 2014). Subsequently, a Final EIS will be prepared after consideration of all comments received. Thereafter, but not sooner than 30 days after the release of the Final EIS, a Record of Decision will be prepared. Because this is a delegated EIS, the official responsible for final approval of the WSP/EIS is the Regional Director, Pacific West Region. Thereafter, the official responsible for implementation of the approved wilderness plan is the Superintendent, Olympic National Park.

Dated: February 7, 2013.

Christine S. Lehnertz,

Regional Director, Pacific West Region.

Winter Use Plan, Supplemental Environmental Impact Statement, Yellowstone National Park

AGENCY: National Park Service, Interior.

ACTION: Notice of Availability.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C), the National Park Service (NPS) announces the availability of a Final Supplemental Environmental Impact Statement (SEIS) for a Winter Use Plan for Yellowstone National Park, located in Idaho, Montana and Wyoming.

DATES: The National Park Service will execute a Record of Decision no sooner than 30 days following publication by the Environmental Protection Agency of the Notice of Availability of the Final Supplemental Environmental Impact Statement.

ADDRESSES: Information will be available for public review and comment online at <http://parkplanning.nps.gov/YELL> (click on the link to the 2012 Supplemental Winter Use Plan EIS), and at Yellowstone National Park headquarters, Mammoth Hot Springs, WY.

FOR FURTHER INFORMATION CONTACT: Wade Vagias, P.O. Box 168, Yellowstone National Park, WY 82190, telephone (307) 344-2035.

SUPPLEMENTARY INFORMATION: The Final SEIS supplements the 2011 Final Winter Use Plan/EIS. Four alternatives are considered in the SEIS. Alternative 1, the no-action alternative, would not permit public over-snow vehicle (OSV) use in Yellowstone but would allow for approved non-motorized use to continue. Alternative 1 has been identified as the environmentally preferable alternative. Alternative 2 would manage OSV use at the same levels as the interim regulations in place from the 2009/2010 winter season through the 2012/2013 winter season (318 best available technology (BAT) snowmobiles and 78 snowcoaches per day). Sylvan Pass would remain open. Alternative 3 would initially allow for the same level of use as alternative 2 (318 BAT snowmobiles and 78 snowcoaches per day), but would transition to snowcoaches only over a three-year period beginning in the 2017/2018 winter season. Upon complete transition, there would be 0 snowmobiles and up to 120 snowcoaches per day in the park, and Sylvan Pass would be closed.

Alternative 4 is the NPS preferred alternative. This alternative would manage OSV use by transportation events. A total of 110 transportation events would be allowed in the park each day. A transportation event would initially equal one snowcoach or one group of snowmobiles (average of 7 snowmobiles per group, averaged over the winter use season; groups could not exceed a maximum of 10 snowmobiles). Operators would decide whether to use their daily allocation of transportation events for snowmobiles or snowcoaches, but no more than 50 daily transportation events could come from snowmobiles. OSV use would continue to be 100 percent guided, with four transportation events per day (one per gate) of up to
