### Memorandum

**To:** Kerstin Henry, Project Manager, Yosemite National Park

**From:** Superintendent, Yosemite National Park

**Subject:** NEPA and NHPA Clearance: 2008-108 Merced River Plan Implementation: Wawona Swinging Bridge Vault Toilet Installation (23231)

The Executive Leadership Team has reviewed the proposed project and completed its environmental assessment documentation, and we have determined the following:

- There will not be any effect on threatened, endangered, or rare species and/or their critical habitat.
- There will be no adverse effect on historical, cultural, or archeological resources.
- There will not be serious or long-term undesirable environmental or visual effects.

The subject proposed project, therefore, is now cleared for all NEPA and NHPA compliance requirements as presented above. Project plans and specifications are approved and construction and/or project implementation can commence.

For the proposed project actions to be within compliance requirements during construction and/or project implementation, the following mitigations must be adhered to:

- Maintain agreed location on west end of disturbed parking area.
- All ground disturbing activities will occur to the west of the large pine trees located in the center of the parking lot and within the disturbed footprint.

**Recommendations for Conditions or Stipulations:** None

For complete compliance information see PEPC Project 23231.

## Categorical Exclusion Form

**Project:** 2008-105 Merced River Plan Implementation: Wawona Swinging Bridge Vault Toilet Installation

**PEPC Project Number:** 23231

**Project Description:**

This project, tiered from the Merced River Plan, includes placement of a pre-fabricated vault toilet in the parking area at the Wawona Swinging Bridge. The Double Cascadian is a double unit vault toilet that has a footprint of 11 feet 11 inches by 14 feet 4 inches and is 12 feet high at the peak, and is placed on a concrete waste vault that is 14 feet 4 inches by 11 feet 11 inches and is 4 feet 4 inches deep.

The unit will be placed to minimize site work and site disturbance; no utility work will be necessary. Excavation to approximately 5 feet in depth will be necessary for placement of the waste vault; the excavation footprint should not exceed approximately 15 feet by 20 feet. Site grading will include only minimal dressing of the grade in the direct vicinity of the unit to facilitate proper drainage and accessibility after placement of the unit. No other work is anticipated.

**Project Locations:**

Mariposa County, CA

**Mitigations:**

- Maintain agreed location on west end of disturbed parking area.
- All ground disturbing activities will occur to the west of the large pine trees located in the center of the parking lot and within the disturbed footprint.

**Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):**

C.18 Construction of minor structures, including small improved parking lots, in previously disturbed or developed areas.

**On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances (e.g. all boxes in the ESF are marked "no") or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.**
