

Alternative 4 – New Building

Alternative 4 locates the bakery in a new building adjacent to the historic Guard House. Similar to Alternates 2 and 3, a retail space is located in the front of the historic building (#1), a seating area is housed in the historic jail cell space (#2), and the bakery is in a new structure (#3). Storage and support spaces for the bakery are provided as utilizing the basement for these functions is no longer viable.

This scheme meets the *Guidelines for New Additions* in much the same manner as Alternate 2 and 3. The new structure is set back from the front elevation giving greater prominence to the historic building; however, with its size now very similar to the historic building, it will still tend to compete with the historic Guard House.

As in Alternate 3, the vocabulary of two overlapping structures on a site is not consistent with the context of the historic Parade Ground.
