

## Adaptive Management

### What is it?

Adaptive management is a decision process that promotes flexible decision making that can be adjusted in the face of uncertainties as outcomes from management actions and other events become better understood. Adaptive management does not represent an end in itself, rather a means to more effective decisions and enhanced benefits for park resources and visitor experiences (DOI 2008).

Garden Creek canyoneering

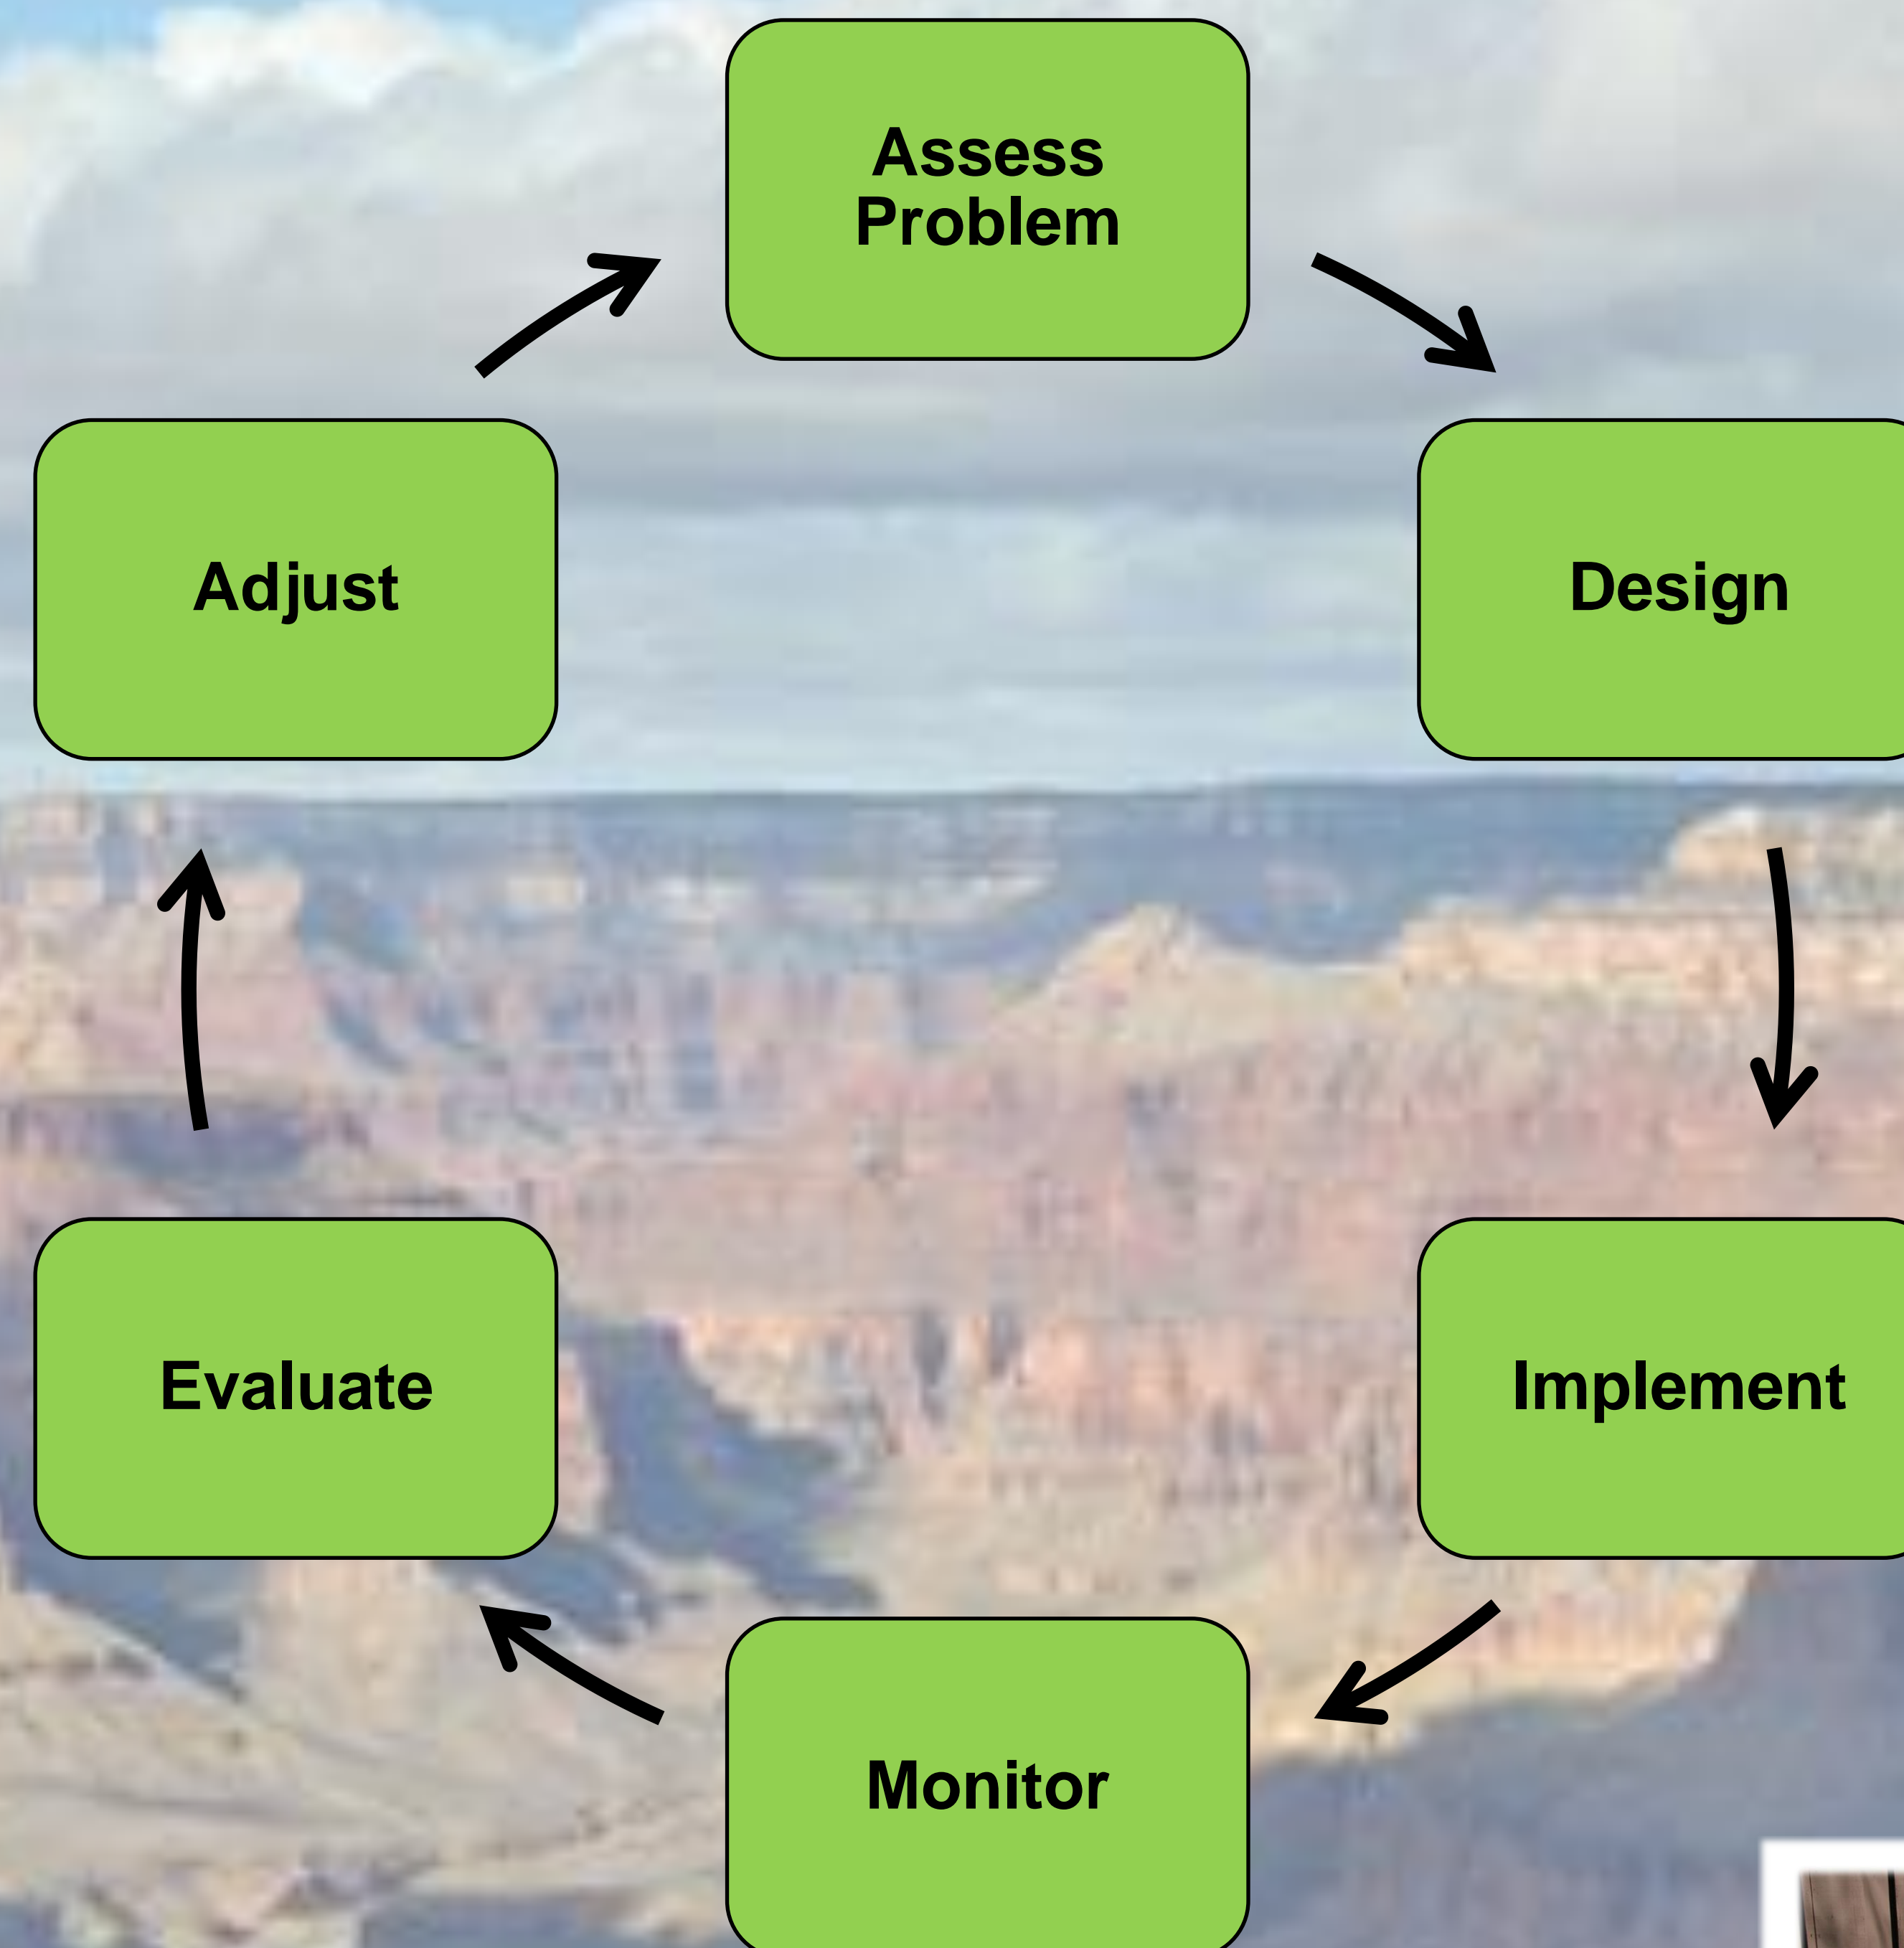

Rim to rim running

Extended day hiking

Tuweep day use

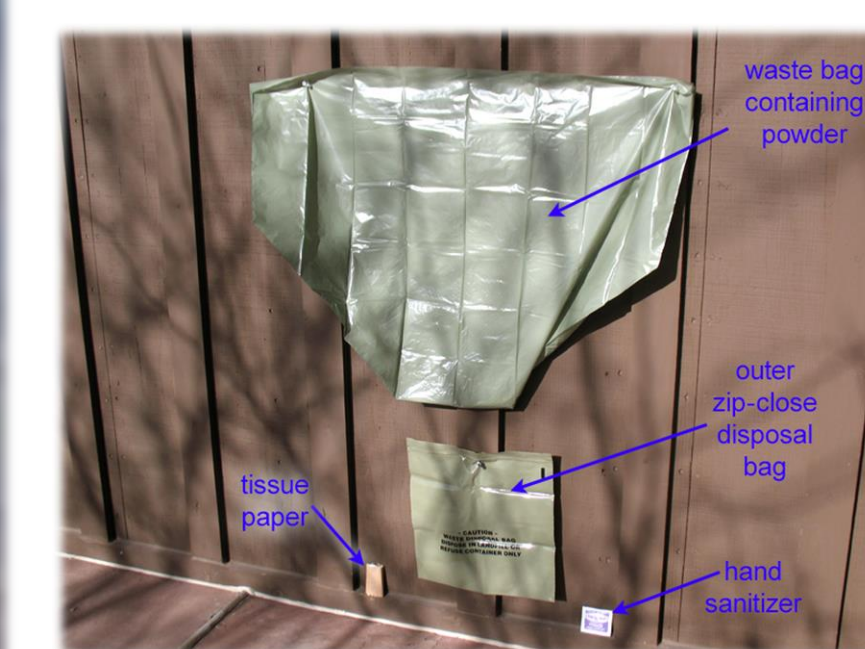

### What does it apply to?

- Climbing
- Canyoneering
- Extended day hiking and running (rim to rim)
- Tuweep day use
- Use area management
- Human waste management
- River-assisted backcountry travel (RABT)

(some elements change by individual action)

River-assisted backcountry travel

Wag bag

Backcountry toilet
