EXPERIENCE YOUR AMERICA™

National Park Service
U.S. Department of the Interior

The purpose of Lake Clark National Park and Preserve is to protect a region of dynamic geologic and ecological processes that create scenic mountain landscapes, unaltered watersheds supporting Bristol Bay red salmon, and habitats for wilderness dependent populations of fish and wildlife, vital to 10,000 years of human history.

The National Park Service cares for the special places saved by the American people so that all may experience our heritage.

Dear Friends and Interested Parties,

The NPS is considering a request from an in-holder in the Silver Salmon Area of Lake Clark National Park. The request is for in-holders to be permitted to use an OHV on about 50 yards of a previously existing OHV trail to better access fishing along the river and to support educational programs (see map). This trail section is not currently included in the 2011 compatibility determination allowing the issuance of a permit for ORV use by Silver Salmon Creek landowners on 3.4 miles of existing ORV trails.

The NPS has authority to issue permits for ORV use on existing ORV trails located in areas upon a finding that such ORV use would be compatible with the purposes and values for which the area was established under 43 CFR 36(g)(2).

The NPS is accepting comments on the request for access through the Planning, Environment, and Public Comment (PEPC) website at <http://parkplanning.nps.gov/SilverSalmonCreekAccess2016> through Wednesday, March 31st, 2016.

Margaret L. Goodro

*Superintendent
Lake Clark National Park and Preserve*
