The Big Picture for Wildlife

- Over 1/3 of North America's native birds need conservation action.
- In California, there are over 350 special status vertebrates.

Global and Local Threats

- Air and Water Pollution
- Development
- Landscape-scale Habitat Changes
- Loss of Migratory Corridors
- Climate Change
- War
- Road Kill
- Habitat Degradation
- Intro. of Disease & Non-natives.

Objectives for Keeping Wildlife Wild...

Park-wide Considerations:

- 100% Proper Storage of Human Food and Trash
- Continuation of Peregrine-Climber Partnership

Considerations for Human-Use Areas:

- Avoidance of Riparian Areas and Unique Habitats
- Avoidance of Movement Corridors
- Consideration of the Gray Areas of Impact Documentation
- Consideration of the Wildlife Assemblage when Assessing Disturbance
