Dear Mr. Chaney,

I have a personal and professional interest in the future management of Great Sand Dunes. On the personal side, my family and I have visited Sand Dunes almost every year since the mid-1950's in all seasons except the dead of winter. We have hiked the trails, climbed the dunes and backpacked to the backcountry. The scenery, wildlife and unique ecology are unparalleled in Colorado, the west and perhaps the world.

On the professional side, my organization the Upper Arkansas and South Platte Project is concerned with protecting and preserving biodiversity, wild lands and connecting habitat linkages in our watersheds and beyond. Our Wild Connections Conservation Plan includes recommendations for additions to the Sangre de Cristo Wilderness and Research Natural Areas in the San Isabel National Forest, and we support proposals on the west side of the range that will contribute to the protection of Wilderness. We are interested in helping create the largest possible core reserves, connected by wildlife linkages, to accommodate wide-ranging animals, protect biodiversity and provide appropriate low intensity back country recreation.

The proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness is a future oriented measure that will significantly expand the current protection on the Sangre de Cristo range. I fully support this Wilderness designation.

In addition, Wilderness designation will help protect the park's oldest archaeological sites, its endemic species, overall wildlife habitat and the natural cyclical processes that are needed to maintain the dunes themselves. In an era of increasing recreation that is dependent on motors, it is necessary to set aside large areas where people, both today and in the future, can experience solitude, quiet, self-reliance and the nurture of spirit that comes best by getting into a wild area. And if we are to preserve our important native species, especially larger mammals and rare and endangered species, we must have areas that provide habitat for their entire life history needs, security from human caused impacts, and linkages for seasonal migrations and dispersal of young animals. Great Sand Dunes today is one of the best managed parks to accommodate a modest level of developed camping. an expansive level of backcountry experiences, and, with the adjacent National Forests and Nature Conservancy lands, an impressive array of ecosystems and wildlife habitat - adding additional Wilderness will enhance this feature.

In addition:

I strongly urge the addition of sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary. Wilderness-quality lands surrounding Medano Ranch, excluding ranch buildings, the administrative access road and the Closed Basin water Project facilities, should also be added to the plan's proposed Wilderness areas. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands.

One of the more endearing aspects of camping at Sand Dunes is the absence of electrical and water hookups at individual campsites. I strongly urge that this style of campground be maintained! For those who need such services, commercial enterprises outside the park are available and can grow to accommodate increased requests. In addition, the concentration of visitor services in current locations is desirable, and the back country should be reserved for foot and horse travel. Roads and parking lots within the park should be kept at an absolute minimum for safety and reasonable access. Any new motorized access should be located outside the park on existing roads through cooperative agreements with other governmental agencies and relevant entities. ;Trails and visitor use should be directed away from sensitive riparian zones, and if jeep use is to be continued on the Medano Pass road, cooperative work with the National Forest may be needed to reduce the impact of stream crossings. In general, motorized and mechanized travel is entirely inappropriate for the back country, and of course would be prohibited in the Wilderness area. Restricted access to the park's archaeological sites is imperative and archaeological surveys on all park lands should be conducted as soon as possible. It is important to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Finally, I want to commend your staff on the excellent interpretive programs at the visitor center, on hikes, and at the amphitheatre. For many people, this exposure to good science, the value of wilderness, and the unique features of Sand Dunes, is an experience they will treasure for years. I have always appreciated the professionalism, tempered by adjusting to the audience, of your staff.

Thank you for this opportunity to comment.

Sincerely,

Jean C. Smith

Dear Superintendent Chaney:

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the

northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Cara Anderson

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
National Park Service
11500 Highway 150
Mosca, CO 81146
E-mail: Grsa_superintendent@nps.gov

Dear Superintendent Chaney:

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future

generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest

corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative

agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

We Visit the Sand Dunes a minimum of four times a year. The trip from Superior takes about four hours, a day trip literally. Those visits are a highlight of our travels, an experience that we wish many could have. Please do all that you can to preserve this wonder of God's

Nature!

Thank you for considering my comments.

Sincerely,

Dick Marin
1770 Morrison Ct.
Superior, Co. 80027

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I am a Colorado resident, and I and my family have spent several
days a year for the past few years camping, hiking,
photographing, wildlife watching, and sand castle building at
the Great Sand Dunes National Park. We have greatly enjoyed our
visits there because of the variety of habitats that are so
close together, because much of it is a big sand box for the
kids to play in, and, importantly, because it is a place to get
away from many of the sights, sounds and influences of
civilization while enjoying the unique ecosystems found there.

Protecting the Park's wilderness character should be a strong,
key component of your management plan.

So I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to the Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and astonishing and varied range of landforms and species.

But the Oark Service can -- and should -- do better than its current proposal. I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness lands. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots, if such structures are necessary at all.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry. There are plenty of roads and trails to drive on in the Valley, and plenty of motorized access to public lands in the vicinity. Part of the great pleasure of being in the Park and Preserve is cresting a dune and looking out over the sea of sand and forest beyond and wondering what it would be like over there. Your Plan should protect that sense of wildness and wonder.

Protecting the Park's wilderness character will not harm the economy of the local communities. On summer weekends, it is already nearly impossible to get a hotel room in Alamosa/Monte Vista (we know - we've tried!) and a key reason tourists come to the Valley is to go to the Great Sand Dunes. Protecting wilderness character will ensure that the resource that helps draw visitors to the Valley is protected long into the future.

I strongly support protecting the park's sensitive archaeological sites (including by limiting access to such sites, if necessary) and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

E.B. Zukoski

Dear Superintendent Chaney:

I think the preferred alternative to add nearly 51,000
acres of wilderness to Great Sand Dunes National Park
and Preserve in the proposed draft management plan is
a good start. It is important to protect the park's
oldest archaeological sites and its native species.
Protecting the area responsible for renewal process
for the very dunes for which the park is named is
important. Wilderness protection will also help keep
this unique area as natural as possible for future
generations.

Even though this is a good start, there is more that should be done. I ask that you add sand sheet lands in the northwest corner of the park to your wilderness proposal. I understand that only one gravel road separates the sand sheet land from other deserving wilderness. It is important that wilderness protection be given to this area since you propose this area as a backcountry access zone. Please recommend wilderness protection for lands not directly for access infrastructure, such as roads parking lots, and keep these to a minimum.

Also deserving of additional wilderness protection are wilderness-quality lands that surround the Medano Ranch. The sabhka, a fundamental park resource, is not adequately included as wilderness. I understand that where existing roads and structures and access roads cannot be included in wilderness areas but other parts should be.

As much as possible, please minimize roads and parking lots within the park and locate new motorized access outside the park, primarily on existing roads to protect the character of the park. Please direct trails and visitor use away from sensitive riparian habitats, such as the Deadman Creek corridor. I very much believe that motorized and mechanized travel will degrade the park's backcountry and the experience of other visitors to the park and as such should be limited.

Restricting access to the park's sensitive archaeological sites only makes sense. I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible to understand the national trust placed in their care. Protecting these treasures for future generations is a major part of the parks mission.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions. The lands cannot be fully protected without this.

Thank you for considering my comments.

Sincerely,

Thomas Asprey

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimise roads and parking lots within the park and try to locate new motorised access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorised and mechanised travel are inappropriate in the park's backcountry.

I very much favour restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

"For I was hungry and you gave me no food; I was thirsty and you gave me no drink; I was a stranger, and you did not take me in, naked and you did not clothe me, sick and in prison and you did not visit me. Then they also will answer him, saying, 'Lord, when did we see you hungry or thirsty or a stranger or naked or sick or in prison, and did not minister to you?' Then will he answer them, saying, 'Assuredly, I say to you, inasmuch as you did not do it to one of the least of these, you did not do it to me.'" (Matthew 25:42-45)

Contained within every evil(greedy profiteering republican) act are the seeds of its own destruction. Adhere to the teachings of Jesus, as contained in The Urantia Book, or else suffer the consequences. It IS that simple. TRUTH has been spoken to power, Peace will prevail. Buck Fush!

SUPPORT U.S. TROOPS, AND GLOBAL PEACE AND ECONOMIC STABILITY, AS WELL AS ECOLOGICAL SUSTAINABILITY... IMPEACH BUSH AND CHENEY NOW!

Sincerely,

Lawrence Smith, BA

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

Howdy, I grew up in Colorado and visited the great sand dunes
national monument when I was a kid. At that time, I wasn't
particularly interested in the area surrounding the dunes. I
wanted to go play in the big sandbox. However, I couldn't help
noticing the fragility of the ecosystem where the campground was
located. These arid environment ecosystems are easily damaged
and very slow to recover.

Damage can occur in the blink of an eye, during fire suppression
by Forest Service crews, when a lazy seasonal employee prefers
to drive rather than walk, etc.. Wilderness protection sets
clear boundaries and clear rules, protecting fragile areas. I
commend the park service for developing a preferred alternative

that includes protection of 51,000 ac of wilderness in the park. However, I would encourage you to provide this protection to more of the parks acres, places that should be protected from the damage that motorized vehicles can do.

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary. My wife and I have visited over 30 national parks and many other monuments, recreation areas, etc., and we have never said about any park, "Gee, this park is big enough." As we drive to most parks, we see how sprawl often abuts the very edge of many parks (e.g., Gatlinburg and Great Smokey Mountains NP, etc.) and realize an ounce of prevention is worth a pound of cure. What looks like unwanted land now might by a developer's dream ten years hence.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible. Rest assured I will be writing my congressman Paul Ryan to be in favor of funding of these and other park endeavors.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Matthew Courchane

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

As I former Colorado resident, I realized that the Great Sand Dunes was one of the nation's real treasures and was delighted to learn that it was to become a National Park. I have told many people (even new Colorado residents) about its charms and after visting there they have become enamored of this very special place. The San Luis Valley has a very fragile ecosystem and must be preserved with a complete plan, not just patchwork of protecting the obviously attractive areas.

Thank you for considering my comments.

Sincerely,

Jeremy Winick

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I recently visited Great Sand Dunes National Park. My visit
included a week in the back country doing volunteer trail repair
and interior fence removal. This is a beautiful and peaceful
area.

I therefore commend the proposal in your draft management plan
where the preferred alternative to add nearly 51,000 acres of
wilderness to Great Sand Dunes National Park and Preserve.
Wilderness will help protect the park's oldest archaeological
sites, its endemic species and the renewal process for the very
dunes for which the park is named. Wilderness will also help
ensure that future generations may continue to enjoy the park's
solitude, quiet, and quite astonishing range of landforms and

species.

These are increasing important as vast tracts of the Inter Mountain West are being developed at an astonishing rate.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. (That gravel road is mostly sand or rock.) Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry except for critical Park maintenance.

Please keep me informed and involved in your planning process.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Paul Luehrmann

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I believe that our National Parks system deserves strong protection and full-funding. While I know that federal funding can be difficult to secure, one thing we should not sacrifice due to lack of funds is the protection of our national treasures for generations to come. Not only our natural areas, but also the cultural and anthropological treasures within.

In order to maintain the needed level of protection, I favor restricted access to the sensitive archaeological sites in the Great Sand Dunes National Park and Preserve. In order to aid in that protection, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible. Also of importance is protection from energy exploration, which can lead to irreversible environmental degradation. Because of the risk of this type of exploration and exploitation, I strongly urge you to expedite the purchase of subsurface mineral

rights to protect the park from energy-related intrusions.

Overall I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

But protection should not stop at the dunes, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

To the greatest extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Roads are clearly not a necessary part of a true backcountry area, they often increase illegal access as well. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please recognize that motorized and mechanized travel are inappropriate in the park's backcountry.

Finally, I request that you also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

Thank you for considering my comments and adding them to your records.

Sincerely,

Marin Kress

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

As a former interpretive ranger at fire island national
seashore, I can relate to the plight of the National Parks-
overvisited, underfunded. Encroachment of agricultural,
suburban, and urban areas threatens to swallow up other
locations that should be protected on their own or as
extensions to existing parklands.

For these and many other reasons, I commend the proposal in
your draft management plan's preferred alternative to add nearly
51,000 acres of wilderness to Great Sand Dunes National Park and
Preserve. Wilderness will help protect the park's oldest
archaeological sites, its endemic species and the renewal
process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may

continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.
I look forward to your reply on this important issue.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

First, let me tell you how much my daughter and I enjoyed our
overnight visit to the Great Sand Dunes two summers ago--in
spite of the bear that broke into our car looking for food. We
loved our visit which combined with the St. Luis Valley offered
a wonderful contrast to life in Denver.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future

generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I have traveled this country from coast to coast since 1960 as a young family man. From mountains to prairie to desert expanses, the United States is blessed with the magnificent geologic wonders of any nation.

Because of that, I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and

species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

We are so lucky to have people who care for the wonders of our nation enough to fight for saving this for our future.

Thank you for considering my comments.

Sincerely,

Nathan Booker

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

However, I urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. As you know, only one gravel road separates them from other deserving wilderness and since you are proposing that this area become a

backcountry access zone, wilderness protection is even more important. Therefore, please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Wilderness protection is also needed for lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is under-represented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

In addition, to the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Trails and visitor use should be directed away from sensitive riparian zones - such as the Deadman Creek corridor. I'm sure you are well aware of the ability of the average human being - perhaps unknowingly at times - to destroy whatever is in sight! And from seeing what has taken place in many areas during the last 30 years, I definitely believe that motorized and mechanized travel are decidedly inappropriate in the park's backcountry.

I also favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments. Please do all you can to protect wilderness and wildlife, and peace and quiet.

Sincerely,

Margaret Adams

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments, and while they are contained in a form letter, they are by no means less sincere than if I had written my own letter. Thank you for your hard work and for keeping as much of this Great Sand Dunes area natural so that my great grandchildren can enjoy it as much or more than the people who visit today.

Sincerely,

paula karlberg

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I have not yet been to the Sand Dunes in southern Colorado, but
I plan to visit. I'm sure there are many other first-time
visitors making plans - not to mention the coming generations.
Let's do what we can to make sure it is still there, in the best
condition we can leave it. Therefore ...

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,

and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I fell in love with the Great Sand Dunes as soon as I saw them,
and I hope you will include the following suggestions in your
plans to protect the area. The place is a national treasure! And
the remainder of this letter expresses my family's concerns far
better than I could. I commend the proposal in your draft
management plan's preferred alternative to add nearly 51,000
acres of wilderness to Great Sand Dunes National Park and
Preserve. Wilderness will help protect the park's oldest
archaeological sites, its endemic species and the renewal
process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's endemic species, its oldest archaeological sites, and the renewal process for the very dunes for which the park is named. More importantly, these many plants and animals have evolved to exist especially in these dunes. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species. In addition, people cannot exist without the animals and plants, the entire ecosystem, that made them to start with, so we'd better take care of it.

The addition was a good start, but I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Kirsten Speer

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

Nine years ago, on a recommendation from friends, my family
drove south through Denver and continued on to the Great Sand
Dunes to camp and explore the park. It was a unique and
fantastic experience we'll never forget.
I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great

Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions. "Split estates" are wreaking havoc in this part of Wyoming.

Thank you for considering my comments.

Sincerely,

E. Heyward

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I absolutely love this area of the country and want to ensure
that we protect this beauty for current and future generations.
I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve.

Wilderness protection is essential to ensuring that some of the
few remaining wild areas in the US will stay intact. It will
help protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. I'VE BEEN THERE,IT'S A
GREAT PLACE. READ AND DO WHAT'S IN THE NEXT PARAGRAPH TO KEEP IT
A GREAT PLACE WORTH VISITING AGAIN.PLEASE DON'T FOLLOW OUR
FEARLESS LEADERS POLICY OF SCORCH AND BURN EVERYTHING WILD
BECAUSE HE TOOK ALL THAT SPECIAL INTEREST MONEY. Wilderness will
help protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

Please forgive the (mostly) form letter, I wanted to make sure I
was able to add my voice to the chorus in time. This is a
fragile, beautiful and unique area, and if we don't save it now
it will never be seen again.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

As a former resident of Colorado, I have had the privilege and
the pleasure of visiting the Great Sand Dunes that lie,
improbably, in the middle of the Rocky Mountains. I am therefore
very interested in the fate of this unique ecosystem.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Kathleen Kelley

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

As someone originally from Colorado, I do so hope that you
continue to act in accordance with preserving as much of this
sacred wilderness and fragile environments possible.
Thank you for considering my comments.

In 'Lakech - I am another yourself.
Peace and Love.

Sincerely,

Aron Clark

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I endorse the following message - and would like to add my own.
We need to protect our wild spaces and fragile national
ecosystems, for both this and future generations.

"to commend the proposal in your draft management plan's
preferred alternative to add nearly 51,000 acres of wilderness
to Great Sand Dunes National Park and Preserve. Wilderness will
help protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions."

Thank you for considering my comments.

Sincerely,

Kendall Brown

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

Thank you in advance for considering my input on this matter. I
have spent many wonderful days at the Great Sand Dunes including
a very memorable experience of watching a full moon rise over
the Sangres from the Dunes. I commend the proposal in your draft
management plan's preferred alternative to add nearly 51,000
acres of wilderness to Great Sand Dunes National Park and
Preserve. Wilderness will help protect the park's oldest
archaeological sites, its endemic species and the renewal
process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

The Great Sand Dunes Nat Park is one of the most unique places
in America. I have been there & want to spend more time there in
the future. Please keep it & its archaeological areas protected
for all time.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

Because our planet is in serious trouble, I commend the proposal
in your draft management plan's preferred alternative to add
nearly 51,000 acres of wilderness to Great Sand Dunes National
Park and Preserve. Wilderness will help protect the park's
oldest archaeological sites, its endemic species and the renewal

process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal. We

must save every already protected area and reach out to the unprotected areas. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

You have the power to make a difference.
Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I am a landowner within 6 miles of the national park boundary. I
wish very much to see the natural environment of the park and
its greater ecosystem preserved to the greatest extent possible.

Please go forward with your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Eli Feldman

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

The Great Sand Dunes holds special memories for me. My family vacationed there when I was a young girl, and I fell in love with this beautiful place. Please help keep it special to future generations.

Sincerely,

Donna Urban

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

Please don't let a precious piece of natural history and early
human history be destroyed by greed.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species, and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that present and future Americans will continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone. Please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road, and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry. This nation already has enough roads. Great Sand Dunes should be one of those special places where we got to get away from the noise of motors.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Mike Mullarkey

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

The Great Sand Dunes are unique, beautiful and a wonderful place
to visit. I have been there many times and recommend it to
friends visiting Colorado.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I am a lifetime visitor to the Great Sand Dunes, and a land management professional, so I'm very pleased to hear that your proposed alternative in the draft management plan is as extensive as it is. On the whole, I commend you on the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. I also concur heartily with the Wilderness Society's additional recommendations which need to be addressed - these are pointed out below.

Wilderness is one of the key elements for a viable future for this planet -and as you well know, we are rapidly approaching a tipping point in retaining wilderness all over the planet.

Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very

dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Susan Ross

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I have visited the great Sand Dunes area often and I commend the
proposal in your draft management plan's preferred alternative
to add nearly 51,000 acres of wilderness to Great Sand Dunes
National Park and Preserve. Wilderness will help protect the
park's oldest archaeological sites, its endemic species and the
renewal process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments. Even though I live in Texas I love this ara and want to see it protected for generations to come.

Sincerely,

Cathy Nordstrom

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

And please help conserve resources by responding to this and
other public comment via email rather than written letter.
Thank you for considering my comments.

Sincerely,

Andrew Bishop

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I read this letter before signing it. I love this park, I come
to it virtually every year with my family. Please consider the
stronger protections listed below. Thanks

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments, please protect our
wilderness from the ones who would sell to "destroy for
development and gross pollution" under the pretense of bush fee-
good policys.

Sincerely,

Sarah Taft

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I write to commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

In addition to the areas already proposed for protection, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. These sand sheets are a vital portion of the system for renewal of the sand

dunes already protected. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in support of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Henry Bennett

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I REMEMBER MY FIRST VISIT TO THE GREAT SAND DUNES - WHAT AN
INCREDIBLE SIGHT! WHAT AN EXPERIENCE. OF COURSE I WANT TO
PROTECT THE ENTIRE AREA.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named.

Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

As a citizen very concerned with the protection and maintenance
of our national parks, I commend the proposal in your draft
management plan's preferred alternative to add nearly 51,000
acres of wilderness to Great Sand Dunes National Park and
Preserve. Wilderness will help protect the park's oldest
archaeological sites, its endemic species and the renewal
process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.

Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Catherine Carpenter

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I have enjoyed my visit to the Sand Dunes in my back yard and
hope to return there soon.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in

the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions. THERE ARE ALREADY TOO MANY INTRUSIONS ON THE PEOPLE AND THE LAND OF THIS COUNTRY.

Thank you for considering my comments.

Sincerely,

K. R. Pence

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve.

I loved my visit to the Sand Dunes and would advocate for any
protection. Wilderness will help protect the park's oldest
archaeological sites, its endemic species and the renewal
process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in

the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I grew up in Colorado. My grandparents had a ranch near Alamosa.
They worked that land until they died.

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in

the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

Last summer, my husband and I were fortunate to visit the Great Sand Dunes National Park and were amazed. I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named.

Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in

the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150

Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments. (Although this is a Wilderness Society form letter, it expresses my thoughts far better than I can.)

Sincerely,

Robert Abrams

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

KEEP IT SIMPLE, WITHOUT LAYERS OF CONTRACTORS AND PROTECT
IT!!!!!!!!!!!!!!

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in

the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Sarah Barber

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I am writing in regard to the Great Sand Dunes draft management
plan.

I wish to commend the proposal in your draft management plan's
preferred alternative to add nearly 51,000 acres of wilderness
to Great Sand Dunes National Park and Preserve. Wilderness will
help protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.

Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Ann I. Aurelio

Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Veronika-Talks-w-Butterflies Griffin

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I have climbed these dunes and they are fantastsic. So, I
commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

In terms of wilderness preservation, it is always a case of more
is better, yes?

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in

the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Karlene Gunter

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Robin Sotire

Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Michael Dimen

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

cheryl lewis

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Gernot and Ava Heinrichsdorff

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Sandra Almand

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Lynne Weisskirk

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

William Spangenberg

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Ellen Brinks

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal.

Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Carol Silverthorn

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park

resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Susan Marie Frontczak

Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Marah Fogler

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Courtney DuBois

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Teri Gibson

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150

Mosca, CO 81146

Dear Superintendent Chaney,

As an informed and concerned citizen, I commend the proposal in
your draft management plan's preferred alternative to add nearly
51,000 acres of wilderness to Great Sand Dunes National Park and
Preserve. Wilderness will help protect the park's oldest
archaeological sites, its endemic species and the renewal
process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.

Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Philip Lipari

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

John Swigart, Jr.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Melinda Rankins

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Patricia McKelvie

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Deborah Taggert

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and

unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Mark Garfinkel

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments.

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Richard Hjort

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

PS - Although, due to lack of time, I am signing on to a preformulated letter, I would like to add the following: I really appreciate everything the Park Service does to help save our fragile planet from exploitation that despoils and endangers the one heavenly body capable of sustaining life. I hope this letter and others give you the courage to do even more to prevent irreversible damage to precious lands, including the Sabhka.

Sincerely,

Deborah Stucklen

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments.

Sincerely,

melissa hatfield

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Valerie Berlin

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

John Stifler

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

asiel norton

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Lloyd J. Hebert, Jr.

Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park

Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Michael Kauffman

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Angela Di Berardino

Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

As a person who grew up in Colorado, I commend the proposal in
your draft management plan's preferred alternative to add nearly
51,000 acres of wilderness to Great Sand Dunes National Park and
Preserve. Wilderness will help protect the park's oldest
archaeological sites, its endemic species and the renewal
process for the very dunes for which the park is named.
Wilderness will also help ensure that future generations may
continue to enjoy the park's solitude, quiet, and quite
astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park

resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Karen Lasher

11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments.

Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Yahanna Faith-Smith

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Dr. Daniel V. Eck

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

margarida maccormick

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Stephanie Jackson

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Steven Aderhold

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.

Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Terea Reichmuth

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

John Sutherland

Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Jean Washburn

Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Stephanie Wippel

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and

unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Melissa Judge

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Toni Tolerico

Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Jennifer Brown

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside

the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Marilin Engelman

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Christi Porch

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments.

Sincerely,

vivian sabelhaus

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:

please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Emily Leuning

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Christopher Lyons

the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

William Mitchell

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for

access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive

archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Allyson de Groat

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

William Nobles

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,
and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

mary jo nagy

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, my family and I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes

increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Charles Ferris

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150

Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

David Boltz

Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Jim Hunt

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

David Dunkleberger

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Jennifer Preuss

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Raymon Carlson

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Christina Gleason

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Matthew Cozzi

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park

resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Marcia Merithew

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Jane Sunshine

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

D. M. Cartledge, Ph.D.

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

John Barfield

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Chris Casper

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Kevin Farrell

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Ashleigh Reynolds

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred
alternative to add nearly 51,000 acres of wilderness to Great
Sand Dunes National Park and Preserve. Wilderness will help
protect the park's oldest archaeological sites, its endemic
species and the renewal process for the very dunes for which the
park is named. Wilderness will also help ensure that future
generations may continue to enjoy the park's solitude, quiet,

and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in
the northwest corner of the park to your wilderness proposal.
Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Alex/Gladys/ Bernyk

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I support the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to ADD SAND SHEET LANDS IN THE NORTHEAST CORNER OF THE PARK to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

PLEASE ALSO PROPOSE WILDERNESS PROTECTION for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please MIMINIZE ROADS AND PARKING LOTS
within the park and try to LOCATE NEW AUTOMOBILE ACCESS OUTSIDE
THE PARK, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor RESTRICTED ACCESS TO THE PARK'S ARCHAEOLOGICAL
SITES, and, in aid of that, I urge the Park Service to conduct
archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to EXPEDITE THE PURCHASE OF
SUBSURFACE MINERAL RIGHTS to protect the park from
energy-related exploitation.

Thank you for considering my comments.

Sincerely,

John B Pearce Sr

11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve

11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving

wilderness. Wilderness protection becomes increasingly important given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Chris Kmotorka

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Lindsay Gearhart

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Thomas Jones

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

George J. Feigenbaum

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Christina Babst

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone:
please recommend wilderness protection for lands not slated for
access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality
lands surrounding Medano Ranch. The sabhka, a fundamental park
resource, is underrepresented in the wilderness proposal, and
unimproved two-track roads should not disqualify these lands
(those not occupied by ranch buildings, the administrative
access road and Closed Basin Water Project facilities) from
wilderness protection.

To the extent possible, please minimize roads and parking lots
within the park and try to locate new motorized access outside
the park, primarily on existing roads, through cooperative
agreements with other governmental agencies and relevant
entities. Please direct trails and visitor use away from
sensitive riparian zones, such as the Deadman Creek corridor,
and please note that I very much believe that motorized and
mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive
archaeological sites and, in aid of that, I urge the Park
Service to conduct archaeological surveys on all park lands as
soon as possible.

Finally, I strongly urge you to expedite the purchase of
subsurface mineral rights to protect the park from
energy-related intrusions.

Thank you for considering my comments.

Sincerely,

christopher schroeer-heiermann

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Maarit Leppala

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Summer Watkins-Wagner

Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

E. Grant

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Sarah Kaplan

Superintendent Steve Chaney
Great Sand Dunes National Park and Preserve
11500 Highway 150
Mosca, CO 81146

Dear Superintendent Chaney,

I commend the proposal in your draft management plan's preferred alternative to add nearly 51,000 acres of wilderness to Great Sand Dunes National Park and Preserve. Wilderness will help protect the park's oldest archaeological sites, its endemic species and the renewal process for the very dunes for which the park is named. Wilderness will also help ensure that future generations may continue to enjoy the park's solitude, quiet, and quite astonishing range of landforms and species.

Having said that, I strongly urge you to add sand sheet lands in the northwest corner of the park to your wilderness proposal. Only one gravel road separates them from other deserving wilderness. Wilderness protection becomes increasingly important

given that you propose this area as a backcountry access zone: please recommend wilderness protection for lands not slated for access roads and parking lots if such structures are necessary.

Please also propose wilderness protection for wilderness-quality lands surrounding Medano Ranch. The sabhka, a fundamental park resource, is underrepresented in the wilderness proposal, and unimproved two-track roads should not disqualify these lands (those not occupied by ranch buildings, the administrative access road and Closed Basin Water Project facilities) from wilderness protection.

To the extent possible, please minimize roads and parking lots within the park and try to locate new motorized access outside the park, primarily on existing roads, through cooperative agreements with other governmental agencies and relevant entities. Please direct trails and visitor use away from sensitive riparian zones, such as the Deadman Creek corridor, and please note that I very much believe that motorized and mechanized travel are inappropriate in the park's backcountry.

I very much favor restricted access to the park's sensitive archaeological sites and, in aid of that, I urge the Park Service to conduct archaeological surveys on all park lands as soon as possible.

Finally, I strongly urge you to expedite the purchase of subsurface mineral rights to protect the park from energy-related intrusions.

Thank you for considering my comments.

Sincerely,

Nancy Peterson
