Subject: FW: Supplement Request for Vibe Operations

Dusty,

Kerr-McGee Oil and Gas Onshore LP would like to supplement their original Plan of Operations for the Kountze 3D Cable-Only Seismic Survey within the Big Sandy Creek Corridor, Lance Rosier, Turkey Creek, and Village Creek Corridor Units of the Big Thicket National Preserve (approved on September 5, 2006) to include Vibroseis operations on Little Rock Road within the Lance Rosier Unit of the Preserve. Vibroseis operations would require the temporary shut down of Little Rock Road for a period of approximately five (5) hours. A Hardin County Sheriff's deputy would be present during this period of time to direct traffic, and a third party monitor would be present during operations to ensure compliance with permit conditions and document any impacts to Preserve resources.

Kerr-McGee has agreed to offset operations 200 feet away from the Mitchell homestead. In addition, Kerr-McGee would re-grade Little Rock Road after operations are completed.

Please let me know if you have any questions or need additional information to process this request.

Have a great day!
