### A. PROJECT INFORMATION

**Title:** South Entrance Interim Traffic Safety Improvements

**Location:** South Entrance, Mariposa County, California

**Project Manager:** Shawnie MacFarlane, Project Management, Yosemite National Park

### B. PROJECT DESCRIPTION AND BACKGROUND

This project entails adding temporary traffic safety improvements to the South Entrance Station. Thirteen ten-foot sections of K-rail would be installed within the road prism, for traffic entering and exiting the park, and would be secured in place by using 3/4" rebar driven approximately two feet into the previously disturbed paved surface. New striping would be on paved road surfaces leading up to the middle kiosk, separating traffic into two lanes. Two new signs would be installed, one directional sign and one sign indicating the narrow exit lane width. Placement of each sign would require digging a 1' diameter by 3' deep hole. Removable channelizers would be installed at the entrance lanes between the kiosks and the "T" intersection in an effort to prevent vehicles from crossing lanes.

### A. DESCRIPTION OF UNDERTAKING

**Title:** South Entrance Temporary Traffic Safety Improvements

**Project Location and Area of Potential Effect:**

Wawona, Mariposa County, California

South Entrance Station Historic District

**Project Manager:** Shawnie MacFarlane, Project Management, Yosemite National Park

**Project Description:**

This project entails adding temporary traffic safety improvements to South Entrance Station. Thirteen ten-foot sections of K-rail will be installed within the road prism, for traffic entering and exiting the park, and will be secured in place by using 3/4" rebar approximately 2 feet into the previously disturbed paved surface. Stripping will be on paved road surface leading up to the middle kiosk, separating traffic into two lanes. Signage will entail two signs, one directional sign and one sign indicating the narrow exit lane width. These signs will require placement in the soil and will displace a 4"x4" section approximately 3 feet in depth. Removable channelizers will be installed at the entrance lanes between the kiosks and the tee intersection in an effort to prevent vehicles from crossing lanes.
