

Rehabilitation of the Information Desk at the Fredericksburg Battlefield Visitor Center
Photos

Fredericksburg Battlefield Visitor Center (former Fredericksburg Museum and Administration Building)

1935 Plan showing original layout of the office that became the information desk area

Proposed Rehabilitation of the Information Desk Area – sections in orange to be removed

The information desk at the Fredericksburg Visitor Center, in its current configuration. The temporary desk addition is to the left. Behind it is the portion of the desk that the park proposes removing.

The portion of the desk that the park proposes removing, thus opening the area. Note the small door, through which a staff member in a wheelchair could not pass.

That portion of the original wall above the existing desk opening will be left, thereby allowing the original plan and space to be read.

The storage cabinets and drawers behind the north wall portion of the desk will be removed.

New storage cabinets will be built along the east wall. The freestanding telephone desk will be removed.

The freestanding desk extension will remain, as it is of a height to be accessible for visitors and staff in wheelchairs.
