

PROPOSED ACTION: MASWIK SOUTH

- Demolish six existing lodging buildings and demolish or relocate one utility building at Maswik South.
- Reconfigure the Maswik South site to accommodate the proposed layout, improve vehicular and pedestrian circulation, and provide additional parking.
- Improve aging infrastructure, such as roads, parking, and sidewalks.
- Construct a new road connecting Maswik South and the Maswik Laundry Building.
- Construct four new buildings within the existing site footprint. The buildings would provide up to 120 guest rooms, increasing the number of rooms by 30.
- The additional 30 rooms would contain kitchenettes, a lodging type currently not available elsewhere in the park.
- Buildings would be designed to LEED Gold standards or equivalent.
