Public Webinar 12/12/2018 12 – 1 pm PST

**Yosemite National Park** 

## NPS Staff Introductions:

- Ninette Daniele, Compliance Specialist Main Presenter
- Randal Corral, Project Manager Panelist
- Madelyn Ruffner, Chief of Environmental Planning & Compliance Panelist

# Agenda

- Introduction
- Project Purpose
- Environmental Assessment & Proposed Actions
- Public Comment Period
- Project Schedule and Next Steps
- Questions or Comments

# Terminology

- Welcome center / welcome center complex
- Comfort Station = public restroom
- Mather District Office / law enforcement / emergency services
- EA= Environmental Assessment

**BIG OAK FLAT SITE AERIAL** 

- Entrance welcomes over 1 million visitors annually
  - Complex serves over 500,000 visitors per year
  - The welcome center complex houses many programs and visitor facilities, including:
    - Interpretation & general information
    - Campground reservations & information
    - Wilderness permits & information
    - A small retail sales operation
    - Law enforcement offices
    - A comfort station (public restroom)
    - Trash disposal, drinking fountain

# Purpose and Need

- Enhance visitor experience
  - Provide a sense of arrival with informational resources for clear orientation and wayfinding
  - Provide adequate comfort station facilities
- Improve operational efficiency at the welcome center complex
- Provide functional and modern utilities
- Improve safety by addressing vehicle-pedestrian conflict

\*Project will not alter entrance station operations or kiosks

Photo: The existing Big Oak Flat Welcome Center Complex showing the parking area and buildings

### **Environmental Assessment**

- Analysis of environmental impacts posed by proposed actions for compliance with the National Environmental Policy Act
- The EA analyzes both an action alternatives & no action alternative
- Impact topics include: > vegetation

> visitor use and experience

#### Background

- Public scoping meeting & formal scoping period May 2018
- Comments received focused on improvement of staff operational space, increasing visitor information, and improving efficient delivery of services
- Comments regarding entrance operation, cellular service, and bus transport were considered out of the projects scope, but noted the future
- Construction of an Emergency Services/Law Enforcement facility will now be a separate project due to the need for additional scoping / studies

### **Environmental Assessment**

No Action Alternative: Existing Conditions

#### Park programs remain located in disjunct, undersized, and ineffectively organized, modular buildings

Photo: The existing Big Oak Flat Information Station / Mather District Office (modular building) with visitors on the crowded deck

- Delivery of "face-to-face" visitor service hampered by a lack of space
- Inadequate counter space for conversations with visitors or use of map displays
- Visitor confusion continues
- Continued congestion and lines
- Visitor information & Mather District Office building remains (1,080 sq. ft.)
- Campgrounds Reservation Office trailer remains (570 sq. ft.)

### **Environmental Assessment**

No Action Alternative: Existing Conditions

Photo: The existing staff space for wilderness and interpretation services at the Big Oak Flat Information Station / Mather District Office

- Continued inadequate office space and work stations for staff
- No meeting space for staff; staff travel to distant places in the park for meetings
- Inadequate staff break-room and restroom facilities remain

Photo: The existing counter space for wilderness and interpretation public services at the Big Oak Flat Information Station / Mather District Office

### **Environmental Assessment**

#### No Action Alternative: Existing Conditions

#### Outdoor space remains the same, no plaza is constructed.

- Decks sever circulation and create awkward, compartmentalized spaces
- One informational board houses scant informational and wayfinding materials

Photo: The existing welcome center complex outdoor space.

### **Environmental Assessment**

No Action Alternative: Existing Conditions

No change to existing comfort station (public restroom) and individual septic system

Photo: The existing comfort station with a line of Visitors waiting to use the restroom.

- Existing comfort station remains (627 sq. ft., built in 1966)
- 3 stalls for women, 3 stalls for men (no dedicated family or unisex bathroom)
- Water fountain & spigot (no bottle filling station)
- Lines continue during heavy visitation
- Unpleasant smells continue
- Aging facilities and septic systems will increasingly require emergency repair

### **Environmental Assessment**

No Action Alternative: Existing Conditions

# Parking area remains the same; no dedicated staff parking is constructed.

Photo: The existing parking area during high visitation

- Parking area provides 22 parking spaces, shared between park staff and visitors
- No crossing paths are added
- Congestion continues
- Vehicle-pedestrian conflict continues

#### **Summary of the No Action Alternative:**

- or services continue to be
- Operations continue in existing facilities; visitor services continue to be impacted
- No changes to parking lot; staff parking would not be added; congestion & vehicle-pedestrian conflict continue
- Comfort station would not be expanded; lines & odors continue
- Aging septic system treats waste; emergency repairs are made as needed
- Mounting maintenance costs; infrastructure deterioration

### **Environmental Assessment**

**Proposed Action Alternative:** 

Unify park programs into an efficient Welcome Center building, replacing the existing modular facilities

Schematic design rendering of the proposed Big Oak Flat Welcome Center building

- Improve delivery of interpretation, wilderness permits, campgrounds reservations, and retail sales services
- Provide adequate counter space for conversations with visitors
- Provide clear orientation and wayfinding to park programs
- Decrease congestion and lines
- Roughly 2,200-2,500 square feet

### **Environmental Assessment**

Proposed Action Alternative:

Improve efficiency of operations by constructing a Welcome Center, with adequate and innovatively designed staff spaces

Schematic design rendering of the proposed Big Oak Flat Welcome Center building

- Adequate office space and work stations for staff
- Meeting space for staff
- Dedicated staff break-room and restroom facilities
- Temporarily re-locate the Mather District Office (law enforcement)

### **Environmental Assessment**

#### **Proposed Action Alternative:**

Construct a plaza to improve visitor experience, circulation, and wayfinding

Schematic design rendering of the proposed plaza

- Raised plaza (~5,000-7,000 sq. ft.) between the welcome center and the comfort station
- Would house informational and wayfinding panels and materials
- Map layout table, some seating, shelter, and packing spaces
- Provides flexible space to be used by NPS staff for "pop-up" educational exhibits or programs

### **Environmental Assessment**

#### Proposed Action Alternative:

Construct a new, adequately sized comfort station (public restroom), connected to the Hodgdon community septic system

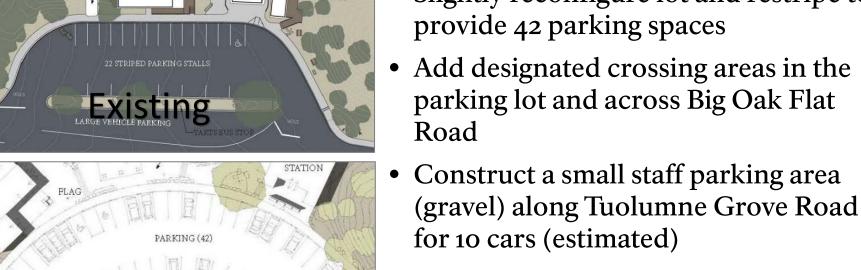

Schematic design rendering of the proposed comfort station

- 1,000 sq.ft. comfort station
- 9 stalls for women
- 4 stalls and 3 urinals for men
- 1 unisex, family restroom
- Water bottle filling station
- Gravity sewer (~ 2,500 linear feet) along Tuolumne Grove Road
- Decommission existing individual septic system/leach field

### **Environmental Assessment**

**Proposed Action Alternative:** 

Re-organize the existing parking area to increase safety and decrease congestion, and construct a small staff parking area

No change to YARTS bus stops, no change to commercial bus management

#### Slightly reconfigure lot and restripe to provide 42 parking spaces

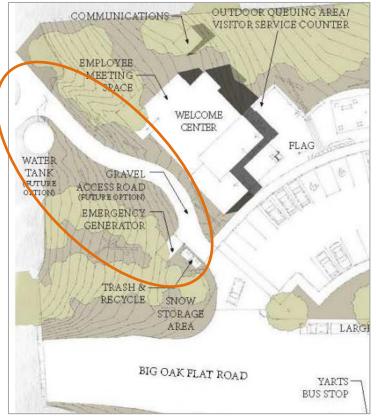

Add designated crossing areas in the parking lot and across Big Oak Flat Road

### **Environmental Assessment**

#### **Proposed Action Alternative:**

# Option for a water tank and access road, for potential installation at a later date

- ~250,000 gallon water tank
- Could provide increased volume for fire protection activities (existing plans meet all fire protection code requirements)
- Construct an access road to the water tank from the welcome center
- An option for construction at a later time, should the park want to augment the fire suppression system

#### Summary of the Proposed Action Alternative:

- Unify services into one welcome center building and construct a plaza
- Construct an adequately sized comfort station (public restroom)
- Improve parking lot, add safe crossing, and construct a small staff lot
- Install a sewer line to convey sewage to the Hodgdon septic system
- Option to install a water tank & access road at a later date

# Schedule and Next Steps:

- Public Comment Period Closes: December 20, 2018
- Decision Document: January 2019
- Construction anticipated to start: October 2019
  - Welcome Center Complex closure for up to two visitor seasons
  - Temporary re-location of visitor services; interim restrooms
  - Issuance of wilderness permits from an interim location
  - Limited impacts to traffic along Tuolumne Grove road
  - Temporary relocation of Law Enforcement Office ~ 5 years
- Aiming for project completion by Spring 2021
- Possible installation of a water tank and access road at a later date
- Future project building a law enforcement/emergency services facility
