Location: Wawona, Mariposa County, California

Project Manager: Glen Rothell, Project Management, Yosemite National Park

B. PROJECT DESCRIPTION AND BACKGROUND

This project will remove the chlorine gas used at this facility. The contractor will have a storage area within the treatment plant perimeter fencing. The existing chlorinator, sulfunator, six (6) liquid chlorine lines, sulfur dioxide tanks, sulfur dioxide and chlorine tank scales will be removed from the existing building. A temporary hypochlorite feed system will be installed, tested and be fully functional during the duration of construction and will only be decommissioned after the new system is tested and commissioned. The temporary disinfection system will be confined to the interior of the wastewater treatment plant. Structural modifications will include a concrete pad 3' X 3' X 4" to support a 100 gallon sodium ascorbate tank and a similar round pad 12' in diameter to support a 1100 gallon liquid chlorine tank. New double doors will be installed and the east wall will be cored for piping. Hypochlorite metering pumps will also be installed in addition to an eyewash and emergency shower station. All of the demolition and new construction will take place within the interior of the non-historic existing building.
