

# Commercial Opportunities

The winter and shoulder seasons present a variety of opportunities for commercial operators to provide visitor services including guided activities, food service, and gear rental. Services that require a stationary facility, like food service or gear rental, are most appropriately provided in the entrance area.

The Winter and Shoulder Season Plan discusses the possibility of increased guiding opportunities for snowshoeing, skiing, and mushing in the designated wilderness near the Denali Park Road corridor. This will be assessed with an Extent Necessary Determination in fall/winter 2019.

Decisions about access to the Denali Park Road will affect the types of commercial opportunities available, especially in the shoulder season.

The Winter and Shoulder Season Plan discusses ideas that could change the total amount of vehicle traffic on the Park Road, the types of vehicles allowed on the road, when commercial access to the road is available, and the distances that different types of vehicles are allowed to travel.
