NATIONAL PARK SERVICE Yosemite National Park P.O. Box 577 Yosemite, California 95389

# Memorandum

To: Brian Mattos, Project Manager, Facilities Management, Yosemite National Park

From: Superintendent, Yosemite National Park

Subject: Notice to Proceed, 2007-009 Parkwide 2007 Forestry Work Plan

Your proposed project is an action that has been determined to result in no measurable environmental effects. It is therefore categorically excluded from further National Environmental Policy Act analysis under Categorical Exclusion: DO12 3.4 E (3) - Removal of individual members of a non-threatened/endangered species or populations of pests and exotic plants that pose an imminent danger to visitors or an immediate threat to park resources.

Necessary compliance coordination has been completed regarding the National Historic Preservation Act, the Wilderness Act, the Wild and Scenic Rivers Act, and the Endangered Species Act, as applicable. This project clearance is valid providing that you adhere to any conditions that may be stipulated in the enclosed *Categorical Exclusion Form* and associated documents when implementing this project.

#### A. PROJECT INFORMATION

**Title:** Parkwide 2007 Forestry Work Plan

Location: Parkwide, Mariposa, Tuolumne, and Madera Counties, California **Project Manager:** Brian Mattos, Facilities Management, Yosemite National Park

#### **B.** COMPLIANCE DETERMINATION

This project is an action that has been determined to result in no measurable environmental effects. It is therefore categorically excluded from further National Environmental Policy Act (NEPA) analysis under Categorical Exclusion: DO12 3.4 E (3) - Removal of individual members of a nonthreatened/endangered species or populations of pests and exotic plants that pose an imminent danger to visitors or an immediate threat to park resources.

Necessary compliance coordination has been completed regarding the National Historic Preservation Act, the Wilderness Act, the Wild and Scenic Rivers Act, and the Endangered Species Act, as applicable. Environmental impacts will be negligible or less when the project is implemented with the conditions stipulated under **Project Mitigations and Conditions** in **Section I** at the end of the attached Environmental Screening Form.

Additional supporting information for this determination and the stipulated conditions can be found in the following attachments (when checked):

igtimes Environmental Screening Form

#### A. PROJECT INFORMATION

Title: Parkwide 2007 Forestry Work Plan

Location: Parkwide, Mariposa, Tuolumne, and Madera Counties, California **Project Manager:** Brian Mattos, Facilities Management, Yosemite National Park

# B. PROJECT DESCRIPTION AND BACKGROUND

The National Park Service has superior knowledge of tree hazards and has a duty to inspect developed facilities and make them safe [from tree hazards] or provide warnings (Middaugh vs. U.S.). Pacific West Region Directive PWR-062 has been temporarily/partially suspended while conflicts between rating systems used by parks in California and Washington are resolved, but it also requires that tree hazard conditions be detected and abated or mitigated regularly. The Forestry Worker Supervisors, Park Forester, and contractors systematically inspect intensively managed areas for tree hazards, prescribe tree hazard mitigation or abatement for trees with outwardly visible defects, and implement mitigation or abatement as soon as reasonably practicable, often concurrently. Supervisors evaluate pruning, topping, and removal options that might preserve important habitat or cultural landscape components prior to takedown. Comprehensive tree hazard management also requires warning visitors and residents that trees within Yosemite may fail. Seasonal warnings had been provided in the Yosemite Guide, and alternative media/methods are needed to warn visitors, workers, and residents of tree risks.

Park forestry staff conduct surveillance and rating or review and approve or negitiate work prescribed by aborists contracted by concessioners or utility companies. Park forestry staff determine whether woody debris can be recycled in place, and if not, whether disposal should be through government channels (including administrative use) or by contract. Contractors may perform some pruning, takedown, removal, and rehabilitation with close administration by designated Contracting Officer's Representatives. Park forestry staff review scheduled work locations and consult other park program managers to avoid adverse impacts to sensitive park resources. Areas that are closed seasonally are generally worked prior to public opening. Nuisance or other approved non-hazard tree work will be scheduled as prioritized tree hazard workload allows. Park forestry staff consult with cultural resource specialists prior to significant work on trees in cultural landscapes, key vista areas, or in archeological sites or traditional gathering areas to avoid adverse effects. Spill prevention and response plans have been prepared to avoid pollution by petroleum products. Job Hazard Analysis reports and Material Safety Data Sheets have been compiled. Wetlands and other sensitive ecological resources are avoided when possible or resource specialists are consulted.

For tree work within the bed and banks of US Waters or a designated Wild and Scenic River, park forestry staff will obtain additional consultation, and possibly additional compliance documentation may be required. Groups of more than three trees in the Merced Wild and Scenic River Corridor trigger consultations per CE 2001-148 (as amended). Off-highway equipment shall be cleaned and inspected prior to entry, and may require cleaning between work sites. Best Management Practices including Forest Practice Rules guide tree work. Work in the Yosemite Wilderness or Potential Wilderness Additions beyond routine tree hazard mitigation trigger Minimum Requirement Analysis. Since the Park Forester has been attending the monthly open house and meeting with the Sierra Club and Central Sierra Environmental Resource Center representatives, no controversy over tree hazard management or timber sales has arisen.

Compliance Tracking Number: 2007-017

Timber sales in recent years removed an average of 2,275 tons of logs from roadsides which were sawn into boards, and 200 tons of logs were transported to park firewood yards. Logs were also provided for bridge repairs and for historic preservation projects.

# C. ASSESSMENT OF POTENTIAL RESOURCE EFFECTS

	e any impacts possible on the following ources?	Yes	No	N/A	Data Needed to Determine/Notes
1.	Geologic resources: soils, bedrock, streambeds, etc		$\boxtimes$		
2.	From geohazards		$\boxtimes$		
3.	Air quality	$\boxtimes$			Negligible: temporary air emissions during forestry work.
4.	Soundscapes	$\boxtimes$			Negligible: temporary noises during forestry work.
5.	Water quality or quantity		$\boxtimes$		
6.	Stream flow characteristics	$\boxtimes$			Mitigated: groups of three trees or more will trigger consultation with natural resources staff.
7.	Marine or estuarine resources			$\boxtimes$	
8.	Floodplains or wetlands				Mitigated: wetlands are avoided when possible; if project areas include wetlands, consultation with resource specialists is required.
9.	Land use, including occupancy, income, values, ownership, type of use		$\boxtimes$		
10.	Rare or unusual vegetation – old growth timber, riparian, alpine				
11.	Species of special concern (plant or animal; state or federal listed or proposed for listing) or their habitat		$\boxtimes$		
12.	Unique ecosystems, biosphere reserves, World Heritage Sites	$\boxtimes$			Yosemite National Park is a World Heritage site; no historic properties would be adversely affected by implementing this project; see Section F, National Historic Preservation Act Checklist, below.
13.	Unique or important wildlife or wildlife habitat		$\boxtimes$		
	Unique or important fish or fish habitat		$\boxtimes$		
15.	Introduce or promote non-native species (plant or animal)	$\boxtimes$			Negligible; see Condition 2, Section D. Mandatory Criteria, below.
16.	Recreation resources, including supply, demand, visitation, activities, etc.		$\boxtimes$		
17.	Visitor experience, aesthetic resources		$\boxtimes$		
	Cultural resources including cultural landscapes, ethnographic resources	$\boxtimes$			The assessment of effect is "No Adverse Effect;" see the attached XXX.
	Socioeconomics, including employment, occupation, income changes, tax base, infrastructure		$\boxtimes$		
20.	Minority and low income populations, ethnography, size, migration patterns, etc.		$\boxtimes$		
21.	Energy resources		$\boxtimes$		
	Other agency or tribal land use plans or policies		$\boxtimes$		
23.	Resource, including energy, conservation potential		$\boxtimes$		
24.	Urban quality, gateway communities, etc.		$\boxtimes$		
25.	Long-term management of resources or land/resource productivity	$\boxtimes$			Inspection of tree hazards in intensively managed areas is an important aspect of the park's long-term management of resources.
26	Other important environment resources (e.g. geothermal, paleontological resources)?				
	nments, Mitigations and Conditions:				
1.	None				

# **Compliance Tracking Number: 2007-017**

# D. MANDATORY CRITERIA

Have material adverse effects on public health or safety	If	implemented, would the proposed action:	Yes	No	N/A	Data Needed to Determine/Notes
historic or cultural resources; park, recreation, or refuge lands; wilderness areas; wild or senic rivers; national natural landmarks; sole or principal drinking water aquifers; prince farmlands, wellands; floodplains; or ecologically significant or critical areas; including those listed on the National Register of Natural Landmarks?  3. Have highly uncertain and potentially significant environmental effects or involve unique or unknown environmental effects?  5. Establish a precedent for future actions with potentially significant environmental effects?  6. Be directly related to other actions with individually insignificant, but cumulatively significant environmental effects?  7. Have adverse effects on properties listed or eligible for listing on the National Register of Historic Places?  8. Have adverse effects on species listed or proposed to be listed on the List of Endangerd or Threatened Rypices or have adverse effects on secies listed or proposed to be listed on the List of Endangerd or Threatened Rypices or have adverse effects on designated Critical Habitat for these species?  9. Require compliance with Executive Order 11988 (Floodplain Management). Executive Order 11980 (Protection of Wetlands), or the Fish and Wildlife Coordination Act?  10. Threaten to violate a federal, state, local, or tribal law or requirement imposed for the protection of the sites by Indian religious practitiones or adversely affect the physical integrity of such sacred sites (EO 130007)?  13. Restrict access to and ceremonial use of Indian sacred sites by Indian religious practitiones or adversely affect the physical integrity of such sacred sites (EO 130007)?  14. Contribute to the introduction, continued existence, or spread of non-native invasive species or actions that may promote the introduction, continued existence, or spread of non-native invasive species (EO 13112)?	1.	Have material adverse effects on public health or safety?		$\boxtimes$		Mitigated; see Condition 1, below.
3. Have highly controversial environmental effects?  4. Have highly uncertain and potentially significant environmental effects or involve unique or unknown environmental effects or involve unique or unknown environmental risks?  5. Establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects?  6. Be directly related to other actions with individually insignificant, unvironmental effects?  7. Have adverse effects on properties listed or eligible for listing on the National Register of Historic Places?  8. Have adverse effects on sepcies listed or proposed to be listed on the List of Endangered or Threatened Species or have adverse effects on designated Critical Habitat for these species?  9. Require compliance with Executive Order 11988 (Floodplain Management, Executive Order 11990 (Protection of Wetlands), or the Fish and Wildlife Coordination Act?  10. Threaten to violate a federal, state, local, or tribal law or requirement imposed for the protection of the environment?  11. Involve unresolved conflicts concerning alternative uses of available resources (NEPA sec. 102(2)(E)?  12. Have a disproportionate, significant adverse effect on low-income or minority populations (EO 12898)?  13. Restrict access to and ceremonial use of Indian sacred sites by Indian religious practitioners or adversely affect the physical integrity of such sacred sites (EO 130007)?  14. Contribute to the introduction, continued existence, or spread of foderally listed noxious weeds (Federal Noxious Weed Control Act)?  15. Contribute to the introduction, growth or expansion of the range of non-native invasive species (GI (SI 3112)?  16. Require a permit from a federal, state, or local agency to represent the physical of non-native invasive species (GI (SI 3112)?  17. Have the potential to be controversial because of disagreement over possible environmental effects?  18. Have the potential to be controversial because of disagreement over possible envir	2.	historic or cultural resources; park, recreation, or refuge lands; wilderness areas; wild or scenic rivers; national natural landmarks; sole or principal drinking water aquifers; prime farmlands; wetlands; floodplains; or ecologically significant or critical areas, including those				
4. Have highly uncertain and potentially significant environmental rifects or involve unique or unknown environmental rifects or involve unique or unknown environmental rifects?  5. Establish a precedent for future actions with properties of decision in principle about future actions with good represent a decision in principle about future actions with midvidually insignificant, but cumulatively significant, environmental effects?  6. Be directly related to other actions with individually insignificant, but cumulatively significant, environmental effects?  7. Have adverse effects on properties listed or eligible for listing on the National Register of Historic Places?  7. Have adverse effects on species listed or proposed to be listed on the List of Endangered or Threatened Species or have adverse effects on designated Critical Habitat for these species?  9. Require compliance with Executive Order 11990 (Protection of Wetlands), or the Fish and Wildlife Coordination Act?  10. Threaten to violate a federal, state, local, or tribal law or requirement imposed for the protection of the environment imposed for the protection of the environment on low-income or minority populations (Ec 12898)?  11. Involve unresolved conflicts concerning alternative uses of available resources (NEPA sec. 1022/EE)?  12. Have a disproportionate, significant adverse effect on low-income or minority populations (EC 12898)?  13. Restrict access to and exeremonial use of Indian sacred sistes by Indian religious practitioners or adversely affect the physical integrity of such sacred sistes (EC 130007)?  14. Contribute to the introduction, continued existence, or spread of hom-native invasive species of actions that may promote the introduction, growth or expansion of the range of non-native invasive species (EG 13112)?  15. Contribute to the introduction, continued existence, or spread of non-native invasive species (EG 13112)?  16. #### I. NEPA Analysis and Approval Conditions

When implemented as detailed in the project description and following all Project Mitigations and Conditions listed below, this project meets the terms and conditions of a categorical exclusion to NEPA.

### **Applicable Categorical Exclusion:**

DO12 3.4 E (3) - Removal of individual members of a non-threatened/endangered species or populations of pests and exotic plants that pose an imminent danger to visitors or an immediate threat to park resources.

#### **Project Mitigations and Conditions:**

- 1. Develop and submit a Safety Plan to the park Safety Officer (Roger Farmer, 209-379-1079) for review and approval before beginning any project work or contractor work.
- 2. Ensure that all equipment and materials brought into the park are free of non-native, invasive plants and animals, and noxious weeds. All staff working on site shall be informed of and follow best management practices for preventing the introduction and spread of non-native, invasive species as described in Division 1 Specifications, Section 1355.

This project has been reviewed in accordance with the above criteria and it has been determined that the project will result in no or minimal environmental effects. Therefore, it is categorically excluded from further environmental review required under the National Environmental Policy Act. Additionally, the necessary compliance coordination has been completed with regard to the National Historic Preservation Act, the Wilderness Act, the Wild and Scenic Rivers Act, and the Endangered Species Act.

#### A. DESCRIPTION OF UNDERTAKING

Title: Parkwide Forestry Work Plan

**Project Location and Area of Potential Effect:** 

Parkwide, Mariposa, Tuolumne, and Madera Counties, California

Variable throughout park

Project Manager: Brian Mattos, Facilities Management, Yosemite National Park

Project Description: The National Park Service has superior knowledge of tree hazards and has a duty to inspect developed facilities and make them safe [from tree hazards] or provide warnings (Middaugh vs. U.S.). Pacific West Region Directive PWR-062 has been temporarily/partially suspended while conflicts between rating systems used by parks in California and Washington are resolved, but it also requires that tree hazard conditions be detected and abated or mitigated regularly. The Forestry Worker Supervisors, Park Forester, and contractors systematically inspect intensively managed areas for tree hazards, prescribe tree hazard mitigation or abatement for trees with outwardly visible defects, and implement mitigation or abatement as soon as reasonably practicable, often concurrently. Supervisors evaluate pruning, topping, and removal options that might preserve important habitat or cultural landscape components prior to takedown. Comprehensive tree hazard management also requires warning visitors and residents that trees within Yosemite may fail. Seasonal warnings had been provided in the Yosemite Guide, and alternative media/methods are needed to warn visitors, workers, and residents of tree risks.

Park forestry staff conduct surveillance and rating or review and approve or negitiate work prescribed by aborists contracted by concessioners or utility companies. Park forestry staff determine whether woody debris can be recycled in place, and if not, whether disposal should be through government channels (including administrative use) or by contract. Contractors may perform some pruning, takedown, removal, and rehabilitation with close administration by designated Contracting Officer's Representatives. Park forestry staff review scheduled work locations and consult other park program managers to avoid adverse impacts to sensitive park resources. Areas that are closed seasonally are generally worked prior to public opening. Nuisance or other approved non-hazard tree work will be scheduled as prioritized tree hazard workload allows. Park forestry staff consult with cultural resource specialists prior to significant work on trees in cultural landscapes, key vista areas, or in archeological sites or traditional gathering areas to avoid adverse effects. Spill prevention and response plans have been prepared to avoid pollution by petroleum products. Job Hazard Analysis reports and Material Safety Data Sheets have been compiled. Wetlands and other sensitive ecological resources are avoided when possible or resource specialists are consulted. For tree work within the bed and banks of US Waters or a designated Wild and Scenic River, park forestry staff will obtain additional consultation, and possibly additional compliance documentation may be required. Groups of more than three trees in the Merced Wild and Scenic River Corridor trigger consultations per CE 2001-148 (as amended). Off-highway equipment shall be cleaned and inspected prior to entry, and may require cleaning between work sites. Best Management Practices including Forest Practice Rules guide tree work. Work in the Yosemite Wilderness or Potential Wilderness Additions beyond routine tree

hazard mitigation trigger Minimum Requirement Analysis. Since the Park Forester has been attending the monthly open house and meeting with the Sierra Club and Central Sierra Environmental Resource Center representatives, no controversy over tree hazard management or timber sales has arisen. Timber sales in recent years removed an average of 2,275 tons of logs from roadsides which were sawn into boards, and 200 tons of logs were transported to park firewood yards. Logs were also provided for bridge repairs and for historic preservation projects.
