

Existing Vault Toilet at the Log Yard Campground (10/24/07)

Ozark National Scenic Riverways proposes to replace the existing deteriorating wood vault toilet with a new CXT pre-cast Tioga vault unit. The new vault toilet will be installed to the west of the existing toilet—placement as shown above. The old vault will be pumped, filled with clean gravel and capped with concrete, then topped with fill and reseeded. Visitors currently park on the lawn area which has become rutted and eroded. The parking areas (as shown), will be hardened and compacted with crushed rock to better accommodate vehicles. There will be five standard spaces plus one handicapped space.
