Interior gutters on the Fredericksburg Battlefield Visitor Center. The visible temporary downspouts will be removed, and new exterior gutters and downspouts installed.

Four exterior gutters will be installed- two on the front of the two wings and two on the sides of the central portion – identified by red arrows. Two downspouts will be installed on the front of the building – one on each wing – identified by the blue arrows.

Four exterior gutters will be installed- two on the back of the two wings and two on the sides of the central portion – identified by red arrows. Two downspouts will be installed on the front of the building – one on each wing – identified by the blue arrows.

Downspouts will be undergrounded into existing storm water catch basins behind the building
