

Rehabilitate Vegetative Screening Around 15th New Jersey Monument at Salem Church
Photos

View looking northwest at the 15th New Jersey Monument. Note line of pines in the background screening adjacent commercial development. Trees would be cut close to the ground and then the stumps ground. New plantings would consist of green hawthorns in front of or mixed with evergreen material in a semi-circular configuration.

View looking northeast at the 15th New Jersey Monument. Note line of pines and sweetgums in the background screening adjacent commercial development. Trees would be cut close to the ground and then the stumps ground. New plantings would consist of green hawthorns in front of or mixed with evergreen material in a semi-circular configuration.

View looking north behind the 15th New Jersey Monument. Trees would be cut close to the ground and then the stumps ground. New plantings would consist of green hawthorns in front of or mixed with evergreen material in a semi-circular configuration.

View looking south along Heatherstone Drive (Route 694). Trees would be cut close to the ground and then the stumps ground. New plantings would consist of green hawthorns in front of or mixed with evergreen material in a semi-circular configuration. A gap of approximately six feet would be left here for access by NPS maintenance vehicles.
