

## VISITOR CENTER EXPANSION PROJECT MAPS PROPOSED AREAS FOR PHASE I ARCHEOLOGICAL STUDY

The map(s) of the proposed project should be drawn approximately to scale and show the project area, construction staging areas, specific areas of soil disturbance, surrounding vegetation, landmarks, and the surrounding physical features (trees, building, rocks, roads, trails, etc.).

**Map 1:** Area Proposed for Project – Archeological trenching is proposed within the red areas of this map: Southern side of Visitor Center, East side of Visitor Center behind existing Restrooms, and Atrium Area located in the center of the Visitor Center.

**Map 2:** Area Proposed for Project (Detail) – Southern side of Visitor Center (approximately 67 feet by 48 feet), East side of Visitor Center (approximately 39 feet by 22 feet) and Atrium Area of Visitor Center (a test pit through the existing concrete that is approximately 4 feet by 4 feet). Specific testing locations are identified in RED.

**PHOTOGRAPHS:**

Photograph(s) for the proposal should exhibit the area prior to project implementation, show the entire project, be suitable for compliance documentation, and should be relatable to the project map. Use as many photographs as necessary to adequately describe and evaluate the project.

**Photo 1:** Area on south side of Visitor Center (approximately 67 feet by 48 feet). Approximate boundary of assessment is identified in red.

**Photo 2:** Area on east side of Visitor Center behind exiting Restrooms (approximately 39 feet by 22 feet). Approximate boundary of assessment is identified in red.

***Photo 3:*** Location of test pit in Visitor Center Atrium Area (approximately 4 feet by 4 feet).
