

Realign and repave for more efficient parking and safer egress and ingress.  
Install a visual separation to delineate the parking lot from CA-190.  
Install a stop sign and paint a stop bar at the exit to avoid driver confusion.

Rehabilitate the Comfort Station interior with historic replica features and make accessible.  
Connect to the solar power system.

Provide minor improvements at the rustic campground and picnic area, including installation of a trash enclosure, replacement of the existing picnic tables, and improvements to the trail that connects to the Comfort Station.

Install visitor information signs along CA-190 at the approach to Emigrant Junction in both directions.  
Install signs, beacons, and other speed control features to warn drivers of a historic district and pedestrians.

Rehabilitate the Ranger Station interior and modify the entrance for accessibility.  
Install a solar power system with the array on the roof of the Ranger Station or free-standing outside the historic district boundary.

Install two trailer pads behind the Ranger Station for volunteer sites.  
Connect to the solar power system.
