

National Park Service (NPS) – Golden Gate National Recreation Area

Map of Park Sites in 2023 Public Electric Vehicle (EV) Charging Fee Proposal

The proposed public EV charging fee rate for all sites in the proposal is \$0.40 per kilowatt hour with a \$2 per hour surcharge after 4 hours (to discourage idling).

Free NPS-owned public EV chargers are currently available at Stinson Beach, East Crissy Field, and Fort Mason as of May 2023. These EV chargers have historically been supported by philanthropic partners. NPS plans to install additional EV chargers at other sites included in this fee proposal within the next 18 months (subject to change).
