For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: I live near Washington, DC and am an active member of the National Parks and Conservation Association, where I chair the Mid-Atlantic Council.

I regularly visit our national parks, and last month spent a week visiting the Big Island of Hawaii. The highlights of that trip included watching the sunset after a hike from the Mauna Kea Information Station (a state park) and a visit to Hawaii Volcanoes National Park, where we hiked the Kilauea Iki Trail from the Crater Rim Trail through Kilauea Iki Trail. During that hike, we heard the roar of helicopters while on the trail, which disturbed the fascinating and beautiful, peaceful walk.

National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: I write as one who has visited both Hawaii Volcanoes and Haleakala National Parks to state my opposition to continuing air tours over these parks. Our national parks are places I and others visit to appreciate scenery and history, watch wildlife, and enjoy interpretative activities. I also welcome the natural quiet of these parks and do not appreciate having it disrupted by helicopters or other aircraft overhead.

In both parks, commercial air tours have been shattering the natural sounds I come to enjoy. Air tours conflict with users of hiking trails and visitor centers and diminish the overall park experience for visitors.

Studies have found that noise generated by air tours severely impacts wildlife, including birds that are indigenous to Hawaii. Both parks are home to over 50 endangered and threatened species, many of which only live on these islands.

National parks offer respite from the hustle and sounds of our everyday lives. They are places where we can appreciate nature and learn about our culture. Noisy air tours should not be allowed to disrupt visitor experiences and disturb wildlife. The National Park Service says that Alternative 2 to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala.

That is what I want. We should not settle for anything less than the "greatest protection" for our parks.

Thank you for the opportunity to comment.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the
"greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation - not be disturbed and deafened by air tours. (Can only imagine how much more disturbed the wildlife is!) Air tours should be prohibited over national parks and especially over Hawaii Volcanoes and Haleakala National Parks, both of which I have visited and treasured.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

I believe in the near future tour companies will be in a position to offer air tours in much quieter air taxi drones. For the present we need the soothing sounds of nature in special places without helicopters drowning it out.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Correspondence: Ugly Americans, or people who think that their wealth entitles them to be deplorable in their misbehaviors, are great at making people and places around them less scenic or fragrant for the rest of us. They have to show off their ugliness to "own" people who they accuse of being antifa. National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience. Even if oligarchs or greedy deplorables from around the world participate in providing or using air tours, the idea is ugly.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

What about the fossil fuels required to power air tours? Tours of Nature need not add to air and water pollution!

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours “offers the greatest protection of visitor use and experience” in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the “greatest protection” for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours “offers the greatest protection of visitor use and experience” in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the “greatest protection” for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National

Park Service says the choice (Alternative 2) to eliminate air tours “offers the greatest protection of visitor use and experience” in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the “greatest protection” for our parks.

Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National

Correspondence: American tourists are highly self-indulgent, asking for services that cater to them despite their effect on the areas they are visitingair tours of national parks, for example.

Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks. A visit to a national park should mean escaping the hustle and bustle of our everyday lives, appreciating nature, and learning about our culture.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours “offers the greatest protection of visitor use and experience” in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the “greatest protection” for our parks.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Hawaii is home to many threatened and endangered species of plants & animals and we should do our utmost to protect them. It makes me sad to know that many people are going along with the culture of hate which says that it is okay to kill and injure animals, plants and their environment.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience. Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands. We go to national parks to escape the noisy

intrusiveness of our everyday lives to appreciate nature and learn about our culture. Air tours should not be allowed to ruin visitor experiences and harm wildlife. In addition, air tours carry human life risk as well, referencing the helicopter crash in December 2019 that killed an entire family.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

The primary purpose of NPS is to protect our national environmental and cultural treasures. Selecting Alternative 2 is the only proper action for this agency.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Just as air boats are prohibited in the Everglades so should air tours be prohibited in the airspace of Hawaiian national parks. Thank you!

Correspondence: Over the past ten years commercial helicopter flight in HVNP has increased, and with it subsequent noise pollution. Alternative one (do nothing) is obviously not in alignment with Park, ecosystem, cultural and native practices and residential values. The remaining alternatives listed are 2 (no commercial air tours, excluding flight 5000' and above and 1/2 mile out of ATMP area) and 3 (commercial air tour designation along the coast the Pu'u'O'o flight circle, Kahuku/Pohue, plus flight 5000' and above and 1/2 mile out of ATMP). Alternative 3 raises issues already elicited: concerns for avian welfare, cultural practices (native shoreline fishing/gathering), impacting honu'ea, honu and monk seal habitat, and maintaining solitude wilderness environments. The Pu'u'O'o flight area would allow circling. The area of Nāpau and the Kipuka in Kamoamoa mauka which spans over 45 acres of native thick forest is a large canopy for birds. I recently hiked to this Kipuka a few days ago. From there the residential village of Kalapana can be seen, which would also be negatively impacted by commercial flight in this area.

No commercial activity is allowed in the backcountry or wilderness areas of Hawaii Volcanoes National Park.

Why is air space excluded? What is the positive impact of continuing to allow commercial air flight? Continuing to allow flight puts increased pressure on the Park to manage it appropriately.

There are many areas (specifically backcountry and wilderness areas) of HVNP that already need attention. Please Keep what's left of Wild Hawaii Wild. No commercial air tours.

Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: I write to comment on the draft Hawaii Volcanoes National Park Air Tour Management Plan ("ATMP") and related Environmental Assessment which NPS has published for public comment. In January of this year, my wife and I for the first time in our lives visited the Big Island of Hawaii and spent time at Hawaii Volcanoes National Park. We drove the Crater Rim Drive, stopping to see the active Kilauea Crater from overlooks. We drove the Chain of Craters Road and marveled at the lava beds resulting from successive eruptions, extending the land out into what was once ocean.

In addition, we hiked the Kilauea Iki Trail, which the NPS ranger at the visitor center told us was one of the "top five" hikes in the entire National Park System. This very popular hike begins by taking the visitor through lush tropical forests, and at overlooks from the trail one has the opportunity to stand and gaze at the huge crater far below and the steep cliffs surrounding the crater. The NPS trail guide we purchased states:

As you hike the trail today, listen to the soothing forest sounds--birds singing, insects buzzing and trees blowing in the wind.

We then descended to the black rock Kilauea Iki Crater floor. We learned from the NPS trail guide that this rock was a "lava lake" created by cooling lava resulting from a 1959 eruption. The trail then takes the hiker across that lava lake in an otherworldly experience, climbing over broken lava and around vents. Our guide book describes the experience:

The crater floor is quiet and peaceful. . . . Sounds bounce around the crater in an unpredictable way. You may hear the crunching of footsteps when no one is nearby. . . . Its amazing to stand in this near-dead crater and to see and hear the profusion of life all around you just beyond the field of Pele's destruction.

This Park, like Haleakala National Park which we visited years ago (hiking there into the crater as well), provides opportunities for visitors to have unique experiences they can have almost nowhere else on earth. Visitors like me and my wife travel long distances to have these experiences and probably will not return. Those experiences are marred by the noise of helicopter overflights. That noise interferes with the ability to enjoy the peaceful forest sounds or the otherworldly crater floor hike.

I urge NPS to adopt Alternative 2 and eliminate air tours for the protection of the visitor experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

Correspondence: Aloha, Madame Superintendent

I read with great pleasure the draft Air Tour Management Plan for Hawaii Volcanoes National Park.

I appreciate the writers' careful attention to the clearly articulated purposes of the Park and the adverse impact of air tour scenic flights that have caused serious degradation of the ambient acoustic environment, particularly in the designated Wilderness Areas. I also appreciate the careful articulation of air tour flight corridors and schedules that would mitigate most of the annoying impacts of overhead helicopters. With admiration for those writers who propose mitigation actions, I respectfully suggest that this Air Tour Management Plan consider a complete prohibition of commercial scenic tours, simply because none of the three alternative proposed routes and none of the proposed schedule restrictions will satisfactorily mitigate the disruptive effects of overflights by helicopters. As a nearby resident of the National Park I frequently walk along the several trails that are also destinations for scenic tour aircraft. I usually am obliged to select trails and schedules that avoid the nearly ubiquitous overflights. The annoyances and dislike of scenic tour aircraft reflect my personal opinions articulated below.

I perceive the following flaws in the draft ATMP:

1. Ambient 35 decibel acoustic level are easily disrupted by helicopters in most adjacent permitted zones where the stand-off distance specifies a 1-mile or less.

2. Sec 3.8, the "Quiet Technology" standard for certain aircraft is nowhere in the ATMP specified in such manner as could be challenged or verified. The draft ATMP implies that certain aircraft would be equipped with devices that would mitigate the sound of motors and rotor blades, yet such technologies are not articulated here. Similarly the "Fly Neighborly" flight behavior referred to by operators and pilots has never been satisfactorily defined or demonstrated.

3. The ATMP often refers to a forested landscape as being especially sensitive to native animals, such as birds, yet the writers fail to recognize that other sensitive native species might be impacted if such are not in a forested habitat.

4. Sec 4.1 (Aircraft Monitoring Technology) identifies the normal identification characteristics for aircraft but fails to specify a unique identifying feature such as a LEGIBLE numeric or alpha character that can be recognized and read by a person who is on the ground below the aircraft.

Therefore, I respectfully recommend a NO SCENIC AIRCRAFT TOUR option in this otherwise splendid draft ATMP. Scenic tours in Hawaii Volcanoes National Park are a relatively recent activity, as in most other parks. Helicopters have become popular methods of entertainment, as seen in cinema and television, as well as in industrial and technical activities. However scenic air tours in national parks are directly contrary to the solitary and natural conditions normally protected by national park officials. The conflicting government mandates that guide operations in national parks and less protected public places create a confrontational relationship between agencies that are supposed to serve the public interest. This ATMP should clearly articulate this conflict. This ATMP draft document should clearly state a resolution that would serve both the purposes of the Federal Aviation Administration as well as the National Park Service. Scenic air tour overflights by helicopters or fixed-wing aircraft must be prohibited in order to properly protect national park tranquility.

Respectfully,

Daniel Taylor

Former Chief of Resources Management, Hawaii Volcanoes National Park (Ret)

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: The meeting on June 7th was very well done. Appreciate the information provided and the opportunity to comment.

Overall the plan is much needed. We often are in the park on a walk on Sundays and the annoying drone of the helicopters flying to and from the volcano area is terrible. Other times when we are at my wife's property in the Volcano area, the constant noise from the tour helicopters is very annoying. Sometimes they fly low and that needs to stop.

My concern is that with the new flight regulations there will be more traffic in the area of our residence. Now we deal with the Hilo helicopter companies flying through our area on the way to volcano and back to Hilo. Will there be more traffic with these companies flying alternative routes to get near the park area without violating the limits to be set?

Would like to see the scope of the plan enhanced to minimize flights over this part of the island also.

Thank you

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

For once do something for nature while we can still save it.

Thank you for doing the right thing by stopping the air tours which just put money in people's pockets - doing nothing to save our natural resources.

Correspondence: National parks are places I go to appreciate scenery, watch wildlife, and interpret history. Air tours should be prohibited or greatly restricted over Hawaii Volcanoes and Haleakala National Parks.

At both parks, commercial air tours shatter the natural sounds that visitors come to enjoy and can be just as disruptive as small drones which are rightfully prohibited. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

National parks are a refuge to escape the hustle and bustle of our everyday lives, to protect and appreciate nature, and to learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: This plan would be a huge improvement for all of the people in the park. I love walking the trails in the park and really enjoy listening to the native birds like the Apapane, Amakihi, and Omao. It's a shame to have the birds singing drowned out by the sound of helicopter noise. Helicopter noise greatly diminishes the wilderness experience for everyone on the ground in the park so that a very small number of people who fit into a helicopter can have a view. It would be great if the helicopters also had a more limited amount of time that they were allowed to fly over the park. I think everyone who visits and pays fees to enter the park will appreciate the new plan.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened speciesmany only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday livesto appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National

Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: HAWAII VOLCANOES NATIONAL PARK DRAFT ATMP COMMENTS

Below are comments from our Hawaii Congressional Representative Ed Case:

"Every day our beautiful national parks, especially Hawai'i Volcanoes and Haleakala, are being deeply disrupted and degraded by tour helicopter/small aircraft overflights. The National Park Service (NPS) and Federal Aviation Administration (FAA) have issued draft Air Tour Management Plans for our Hawai'i parks which would reduce but not eliminate this disruption. These overflights are fundamentally incompatible with our national parks and should not be allowed."

I agree, tour aircraft and their impacts have no place in Hawaii Volcanoes National Park, the adopted ATMP for the Park should be NO FLY.

For 24 years IOA tour aircraft have had unlimited use of the Park which was 24 years of negative impacts which not only negatively impacted the Park but those Park visitors on the ground trying to enjoy the Park as National Parks are supposed to be enjoyed.

The ATMP proposed routes will not protect the Park from those negative impacts.

The proposed draft ATMP offshore route is not as protecting as the FAA mandated urban Long Island Offshore Route that the FAA implemented in 2008.

The FAA has the responsibility and authority to protect those on the ground from aircraft noise, as they did on urban Long Island, NY.

FAA Offshore Route Rule:

https://www.faa.gov/regulations_policies/rulemaking/media/NYNShoreHelicopterFinalRule.pdf

In addition, § 44715(a), provides that to "relieve and protect the public health and welfare from aircraft noise," the Administrator of the FAA, "as he deems necessary, shall prescribe * * * (ii) regulations to control and abate aircraft noise * * *"

Court order upholding Offshore Rule: <https://caselaw.findlaw.com/court/us-dc-circuit/1638545.html>

Under the plain text of § 40103, the FAA has authority to "prescribe air traffic regulations . [to] protect[] individuals and property on the ground." 49 U.S.C. § 40103(b)(2). This is exactly what the FAA did here. Responding to the noise complaints of Long Island residents, the FAA prescribed new air traffic regulations with the purpose of protecting these residents' use and enjoyment of their property.

It is beyond clear that the FAA has the responsibility and authority to protect those on the ground from aircraft noise, as they did on urban Long Island, NY.

As the FAA mandated an offshore route for urban Long Island, NY, so should the FAA also mandate an equally one mile offshore route at an altitude of 2500 feet offshore route rule for Hawaii Volcanoes with NO FLY over the Park itself.

Furthermore, the tour copter operators have argued that not being allowed to overfly the Park they would fly over the neighboring communities/homes.

HAI Slams Parks Air Tour Plans for--- Hawaii

the proposed routes now move air tour operations over communities

The Hawaiian Islands deserve and need an offshore route more so than Long Island, since in Hawaii the tour aircraft operations are year around and the number of annual operations are much higher and since the airports in Hawaii where the tour aircraft fly from have direct access to open water offshore routes.

The FAA must exercise their responsibility and authority to protect the people on the ground in Hawaii from tour copter noise nuisance pollution.

Correspondence: National parks are places I go to appreciate scenery and history, watch wildlife, and enjoy interpretation. Air tours should be prohibited over Hawaii Volcanoes and Haleakala National Parks.

For both parks, commercial air tours have been shattering the natural sounds that visitors come to enjoy. Air tours are in direct conflict with hiking trails, visitor centers, and the wilderness experience.

Noise generated by air tours severely impacts wildlife, including birds that only live in Hawaii. Both parks are home to over 50 endangered and threatened species many only live on these islands.

We go to national parks to escape the hustle and bustle of our everyday lives to appreciate nature and learn about our culture. Noisy air tours should not be allowed to ruin visitor experiences and harm wildlife. The National Park Service says the choice (Alternative 2) to eliminate air tours "offers the greatest protection of visitor use and experience" in Hawaii Volcanoes and Haleakala. We shouldn't pick anything less than the "greatest protection" for our parks.

Correspondence: Aloha,
Mahalo for allowing me to comment on this draft proposal.

As a 40-year resident of Puna, 22 of those years of living in Volcano, please allow these comments to serve as one person's experience with helicopter noise and its impacts. I urge the powers that be to please consider the noise impact of the amount of helicopter traffic that you are discussing. Constant helicopter noise is disruptive to our community at large, disruptive for animals and disruptive for sensitive individuals who are suffering from PTSD and other anxiety disorders. We have only to look at this past week's eruption and the heightened amount of air traffic over the caldera and the surrounding neighborhoods to get a preview of what the daily noise might be like when factoring in multiple daily flights. Several days this past week the helicopter noise started at 9am and continued unabated until late afternoon. Many people in the community have been discussing how intrusive and stressful it has been.

It is important to note that I fully support reasonable monitoring by air of the eruption; it is a necessary and vital component to gathering data about Kilauea. What I adamantly object to is the seeming priority given to the proposed barrage of tourist flights. They make huge profits while we suffer. This is not fair, reasonable or appropriate and does not foster good long-term relations between HVNP and the surrounding community who deeply cherish both the serenity of Volcano and the splendor of our National Park.

If there is to be tourist helicopter traffic over the caldera I urge you to give primary consideration to this peaceful rural community and severely limit the days and hours of operation for those types of flights. Please be pono and considerate of us residents as you continue your discussions regarding the issue.

Respectfully submitted,
Gayle Chavez

Correspondence: 11 June 2023

Welina mai,

I write to say that I DO NOT CONCUR with the findings of the ATMP for Hawai'i Volcanoes National Park (HAVO). The impacts of the preferred alternative are greater than what is described in the EA.

I was born and raised on the Island of Hawai'i, and during my 72 years have seen the proliferation of technologies, some good, some bad. One of the worst is commercial, recreational helicopter tours. I retired after a career at HAVO. During my 50 year association with the park and its many unique resources, I've watched a marked decline in the experiences of visitors. Today they are driven by social media, by the need to post photos and information essentially saying "Look! I was here!!!", then moving quickly to their next destination. Any connection to place seems irrelevant to those folks.
