

September 15, 2009

Sportsmen backed the acquisition of the addition lands when the government took it over and we were promised it would be used for recreational purposes. Before that I used to spend a lot of time with Wayne Davidson at his WD Ranch and held many boy scout activities there. I am in favor of the Florida WildlifeCommission's views on how this land should be managed and utilized. Please return it to the sportsmen so that our children and grandchildres can have the same rich experience that I did for so many years.
