

Point Reyes National Seashore

PORE-INTERIM LEASE-2215

This Interim Lease is made and entered into by and between the United States Department of the Interior, National Park Service, Point Reyes National Seashore ("Lessor") and Betty Nunes, Tim Nunes, Jacqueline Hemelt and William Nunes ("Lessee"). These Lessees have been approved by the National Park Service as Lessees to AGRI-8530-1000-9002.

This Interim Lease incorporates by reference and hereby extends the rents, terms, and conditions of the attached Lease/Permit(s) AGRI-8530-1000-9002 except as amended, revised or otherwise modified below. By executing this Interim Lease, Lessees expressly agree that they are bound by and will comply with the rents, terms and conditions of the attached Lease/Permit(s) as modified by this Interim Lease.

Modified Lease Terms

Exhibit B is revised by replacing it with the **Exhibit B** (dated October 11, 2022) attached to this Interim Lease and incorporated herein by reference.

A new **Exhibit E** (dated October 11, 2022) is added to AGRI-8530-1000-9002 and is attached to this Interim Lease and incorporated herein by reference.

Article 1.15 is revised to reference current ranch maps:

"Premises" shall mean the lands and improvements at 26450 Sir Francis Drake Boulevard, Point Reyes Station CA 94956 consisting of approximately 596 acres of land and improvements as shown on Exhibits A and B.

Article 4.2 is revised as follows to clarify that BMPs are now referred to as Management Activities:

Lessee's authorized use of the premises is subject to Lessee's implementation of Best Management Practices (BMP's) designed to preserve the integrity of park resources. Best Management Practices (i.e., Management Activities) for typical ranch operations are found in Appendix F of the General Management Plan Amendment, dated September 2020 (GMPA).

Article 4.7 is revised to reflect the Biological Opinions that are now in effect:

Operations under this Lease are subject to the conditions outlined in the U.S. Fish and Wildlife Service (USFWS) Biological Opinion for the General Management Plan Amendment, dated June 4, 2021, and the National Marine Fisheries Service Biological Opinion for the General Management Plan Amendment dated March 18, 2021, and to the related reporting requirements in section 4.8. All of these documents are available upon the Lessee's request.

Consistent with the revisions to Article 4.7, a new Article 4.8 is added to the Lease:

- 4.8.1. *For the US Fish and Wildlife Service Biological Opinion, Lessee shall report to NPS by November 1 of each year the following:*
- A. *individual Management Activity projects under GMPA Appendix F conducted over the past calendar year on the Premises;*
 - B. *pertinent information concerning the success of meeting Avoidance and Minimization Measures for Management Activities taken on the Premises*
 - C. *an explanation of failure to meet such measures, if any;*
 - D. *any incidental take of federally listed species under this Biological Opinion for that given year; and*
 - E. *the condition of all stock ponds on the Premises.*
- 4.8.2. *For the National Marine Fisheries Service Biological Opinion, Lessee shall report to NPS by November 1 of each year the following:*
- A. *for fencing: the dates of monitoring and extent of repairs conducted to maintain riparian fencing identified in Exhibit B; linear feet monitored; linear feet of an*
 - B. *occurrences of breaching or disrepair; date(s) that breaching or disrepair was discovered; and specific dates actions were taken to repair riparian fencing;*
 - C. *a brief description of any ranch infrastructure activities (i.e., Management Activities from GMPA Appendix F) implemented on the Premises;*
 - D. *a summary of vegetation management, required NRCS Conservation Practice Standards, and mitigation measures that apply to any implemented Management Activities; and*
 - E. *identification of any roads that have signs of persistent erosion.*

Article 5.1 is revised to read:

The Term of this Lease (Term) shall be for a period of two (2) years, commencing on September 15, 2022 (“Commencement Date”) and expiring on September 14, 2024 (“Expiration Date”), or on such earlier date as provided for in this Lease.

Article 5.3 is revised to read:

Issuance of future leases will be in accordance with the GMPA Record of Decision, dated September 13, 2021.

Article 6.3 is revised to read:

The annual rent under this Lease is payable in advance on a monthly basis. Lessor will aggregate payments for leases assigned to this operator and issue a single monthly bill based on 1/12 of the annual total rent.

Article 8, paragraph 1 and 2 revised to read:

The average annual stocking rate for a Holstein dairy operation is 356 animals inclusive of a maximum of 250 milk/dry, an average of 100 pastured heifers (80 AU) and a maximum of 6 bulls. Lessor has also considered information provided by the Lessee indicating that they operate primarily with Jersey cows which is a smaller breed than Holstein. Based on information provided by lessee, the NPS concurs that Jersey milk

and dry cows are smaller than Holstein cows, to be calculated at an equivalent of 0.7 Holstein based on forage intake, manure production, etc. Additionally, Jersey cow heifers are identified at 0.6 Animal Unit Equivalent (AUE) and Holstein cow heifers are identified at 0.6-0.8 AUE. As such, for a 100% Jersey cow operation, the NPS authorizes up to 489 Jersey cows, including a maximum of 350 milk/dry cows, an average of 133 pastured heifers, and a maximum of 6 bulls.

Currently the Lessee has indicated a 60/40% split, with 60% of the herd being Jersey cows, and 40% being either a Jersey/Holstein hybrid, or fully Holstein. The NPS does not have information regarding forage intake, manure production etc. for the Jersey/Holstein hybrid so they are assumed to be equivalent to a regular Holstein. For operations at a 60/40 mix, the NPS authorizes 432 animals, including a maximum of 314 milk/dry cows, an average of 112 pastured heifers, and a maximum of 6 bulls.

Lessee shall provide monthly actual stocking information by pasture, species (Jersey, Holstein, hybrid etc.), and class of animal (milk/dry, pastured heifer, bull, confined young stock) to Lessor by the 15th of the following month. Lessee shall provide NPS with copies of Dry Matter Intake forms and other pasture utilization information submitted as part of the organic certification. The raising of other livestock is prohibited except for a limited number of livestock raised as an accessory use, which is defined as animals raised for personal, non-commercial, non-diversification uses. Any livestock not authorized by NPS in writing as an accessory use must be removed from the Premises by December 31, 2022.

Article 10 is revised to align vegetation-related Management Activities with the mitigation measures adopted in the GMPA Record of Decision:

Lessee may not remove tree(s) or vegetation unless expressly approved in writing by the Lessor. Lessee shall provide specific plans to the Lessor for desired tree(s) and vegetation removal during the annual meeting or in writing during the term of this Lease. Lessee shall conduct any vegetation Management Activities consistent with the mitigations listed in Appendix F of the GMPA and in consultation with the Park Range Manager.

The first and second sentences in Article 15.1 are revised to read:

Lessee's operation is enrolled under Tier 2 of Order No. R2-2016-0031, General Waste Discharge Requirements for Confined Animal Facilities within the San Francisco Bay Region (Order 2016-0031). Lessee shall provide Lessor with copies of all compliance documents and reports that are required by or submitted to the Regional Board as required under this Order.

The first paragraph of Article 15.2 is revised to include a requirement that Lessee provide NPS with copies of documents submitted to the Regional Water Quality Control Board (RWQCB):

Potential sources of nonpoint source pollution associated with this Lease include soil erosion and animal waste. Lessee shall comply with all Applicable Laws regarding nonpoint source pollution (including the protection of beneficial uses of waters as

designated by the State of California). Lessee shall conduct all water quality monitoring and reporting required by the RWQCB and shall submit copies of those reports to NPS within 10 days of their submittal to the RWQCB. Further, Lessee's use and occupancy of the Premises shall be designed to minimize, to the greatest extent feasible, nonpoint source pollution within National Park Service boundaries and on adjacent lands.

Article 15.3 replaces the second paragraph of Article 15.2 and clarifies that BMPs are now referred to as Management Activities:

Lessee shall be responsible for implementing water quality related Best Management Practices identified in consultation with NPS to preserve the integrity of park resources. Water quality Best Management Practices (i.e., Management Activities) for typical ranch operations are found in the GMPA Appendix F.

A new Article 15.4 is added:

Lessee shall conduct land application of solid and liquid waste consistent with Regional Water Quality Control Board requirements. Manure and Nutrient Management activities shall be implemented consistent with GMPA Appendix F. Authorized land application areas are identified in Exhibit E. Specific portions of authorized land application areas require additional consultation by the Lessee with NPS prior to conducting land application Exhibit E.

IN WITNESS WHEREOF, the Superintendent, Point Reyes National Seashore, acting on behalf of the United States, in the exercise of the delegated authority from the Secretary, as Lessor, and Lessee have executed this Interim Lease by proper persons thereunto duly authorized.
