Subject We support the addition of the Umbrella Creek parcel to Olympic National Park

Dear Mr. Hill,

We strongly encourage adding the 240 acre parcel on Umbrella Creek to the Olympic National Park lands. This parcel includes important Sockeye Salmon habitat, and is included as part of the Ozette land acquisition in the 2008 General Management Plan.

Please support adding the Umbrella Creek parcel to Olympic National Park, the first expansion of ONP lands in 20 years!

Thank you,

Subject Umbrella Bay Transfer Comment

Attn: Wayne Hill  
National Park Service - Columbia Cascades Lands Resources Program Center  
168 South Jackson Street  
Seattle, WA 98104

RE: Boundary Revision Proposed for Olympic National Park at Umbrella Creek

Dear Mr. Hill:

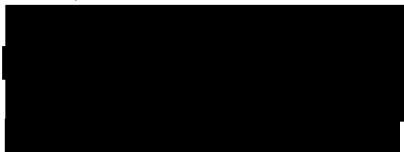

Thanks for the opportunity to comment on the proposed boundary revision for Olympic National Park.

I'm writing today in support of the proposed land transfer at Umbrella Bay north of Lake Ozette. My support is due to the critical sockeye habitat this addition will provide. In addition, the former owner had decided the property did not fit within its long-term timberland objectives as it was isolated and had environmental constraints. They listed it for sale in 6 parcels. To avert the threat of conversion of these properties to residential development, Cascade Land Conservancy borrowed funds to purchase and temporarily hold the land between the lake and the Hoko-Ozette Highway. The property makes sense as an addition to the Olympic National Park and is consistent with Olympic National Parks's 2008 general management plan. This piece is an obvious habitat conservation addition to the park. As previously mentioned, this expansion is a critical piece toward efforts to increase the population of threatened Ozette sockeye salmon recovery. The property identified for transfer supports critical habitat along

Umbrella Creek and spawning and rearing ground for Sockeye, a species that is fighting for survival due to habitat loss and stock depletion. Addition to the park for permanent protection is beneficial to this federally listed species.

Please move forward in the effort to acquire this property as an addition to Olympic National Park. In addition, please include me on any future communications on this topic.

Best,

Wayne Hill/Seattle/NPS

Subject Umbrella Creek

Dear Wayne Hill,

I support Olympic National Park acquiring 240 acres of critical Ozette sockeye salmon habitat on Umbrella Creek at Lake Ozette.

This is the first of some 12,000 acres of potential willing-seller park additions identified in the Park's General Management Plan as well as critical habitat for one of the Park's most threatened fish stocks.

What a great idea it is to purchase this habitat.

Sincerely,

[REDACTED]

Subject Umbrella Creek addition, Olympic National Park

Dear Mr Hill, I write concerning a forthcoming decision on the acquisition of land enclosing the Umbrella Creek, which as you know is sockeye habitat that is vital to the recovery of of the Ozette sockeye population. With the land currently owned by a willing seller which purchased the land with the intent that it be added to the park when circumstances allowed, and the obligation of the NPS to support the recovery of endangered populations, it is clear that the Park Service should acquire the land in question. There will doubtless be opposition to adding acreage to the park on the part of hunters, for example, but the importance of preserving the salmon habitat is surely an overriding factor.

Subject Umbrella Creek

Wayne,

I am an avid fan of Olympic National Park, and frequent visitor to the Coastal section, Olympic Range, and Lake Ozette. My family and I have traveled by foot or Kayak over hundreds of miles in the area.

The transition of private property along Lake Ozette to the park should be a high priority. This would facilitate better use of the lake for non-motorized camping access and make progress toward returning the lake to healthy salmon habitat.

Thanks for your attention to this matter.

Feel free to contact me for other information.

Cordially,

Seattle, WA 98104  
Email: [wayne\\_hill@nps.gov](mailto:wayne_hill@nps.gov)

I strongly support the acquisition of the Umbrella Creek parcel from the Cascade Land Conservancy, a willing seller.

While there are many reasons to add this property to the Park one of the most important is that this purchase will protect this land from very damaging residential and or recreational development. It is land that fits well with the purposes of the Park as it contains some of the most important fish habitat in the Lake Ozette drainage and will greatly enhance the recovery of the Lake Ozette Sockeye. The property was identified as a top priority for acquisition in the Lake Ozette Sockeye Recovery Plan, released by NOAA in 2009. This acquisition also fits very well with the Park's General Management Plan.

Sincerely yours,

RE: Support for Umbrella Creek acquisition opportunity

Dear Mr. Hill:

As a frequent visitor to Olympic National Park, an aquatic scientist who has done research in the Park, and an individual who participated in public workshops associated with the development of the General Management Plan, I write in support of the proposed acquisition of key parcels along Umbrella Creek that have been purchased by a willing seller by Cascade Land Conservancy for transfer to the Park.

As you know the Recovery Plan for Lake Ozette Sockeye clearly states that a comprehensive approach that includes habitat protection is needed to promote species recovery and this acquisition will support the goals of the recovery plan. It is also consistent with the final recommendations in the Park's General Management Plan that went through an extensive public process.

I urge Olympic National Park to move this project forward and consider other opportunities consistent with the recommendation in the Ozette Preferred Alternative in the General Management Plan.

Sincerely,

Re: Comment on Umbrella Creek Land Acquisition

Mr. Hill,

I realize I am late with this letter but i hope that you will still consider my comments in this matter. I encourage the National Park Service to proceed with this important land acquisition. As you know, this is the first opportunity for a willing-seller acquisition within the areas identified in Olympic National Park's 2008 General Management Plan FEIS (GMP), which received full NEPA review and extensive public comment. In fact, many aspects of this 240-acre parcel make it an exemplary willing-seller acquisition. This is a great model for the NPS service to use in the future and this one will set the tone.

The parcel was originally offered for sale for private residential or recreational development. It was purchased in good faith by the Cascade Lands Conservancy with the expectation that it would be acquired by the NPS as funds became available. And it meets the qualifications outlined in in the GMP for willing-seller acquisition.

The parcel is strategically important for protecting a federally threatened national park resource, the Ozette sockeye. NOAA's Ozette sockeye recovery plan identified Umbrella Creek as a priority one habitat for sockeye spawning. Umbrella Creek also offers the best chance in the Ozette watershed for a sockeye stream restoration , which could eventually lead to restored habitat for delta spawning. Other fish species would benefit from this acquisition as well. It's worth noting that Lake Ozette and the Ozette River host the greatest fish diversity of any watershed in Olympic National Park, and all salmon stocks there are currently in decline, primarily due to incompatible land uses in the surrounding watershed.

Thank you for your consideration.

Subject Umbrella Creek in Olympic National Park

Dear Wayne,

I am sending this email in support for the addition of Umbrella Creek to Olympic National Park. Our Olympic National Park has not had additional parcels given to it in over 20 years. Yes, local people will always have their share of concerns, but we need to think of where our National Parks needs are today so that we have them for future generations.

Right now we have an excellent opportunity to expand the Olympic National Park! It is almost a perfect storm! How often do we have a willing-seller addition which has not only been identified as part of the Olympic National Park General Management Plan but also has received extensive public review? We have to think about the fact that this land was purchased by the Cascade Land Conservancy to save it from future residential/recreational development. It was given for the very purpose of annexation to the park when funds became available!

A major responsibility of the National Park System is to preserve and protect not only our parks environment, but all the living species in it. Our National Parks have been imperative in providing the world with not only beautiful parks in which to explore and enjoy, but also experiences and species which can be found nowhere else. Umbrella Creek was identified as a top-priority stream for the Endangered Species Act listing the Ozette sockeye as a growing concern. The Ozette Lake watershed has the highest fish diversity in Olympic National Park and all fish populations in the watershed are in decline. This land acquisition to the park would greatly assist in protecting the Ozette sockeye.

The current times in which we are living are tough on everyone for many reasons. Yet the acquisition of Umbrella Creek to Olympic National Park would be a shining light in Washington's otherwise current dismal state. It may go unnoticed by the masses now, but future generations will both applaud and appreciate it. I have long admired the state of Oregon for designating their state coastal beaches and parks system during the conflicting times of the Vietnam War. If the funding is there, let's be bold.

Thank you for reading through my concerns.

Sincerely,

[REDACTED]

I'm writing to urge NPS to acquire the Umbrella Creek parcel.

The fact that Umbrella Creek is a priority habitat for threatened Lake Ozette sockeye, and the very real threat of residential development make this a high priority for acquisition. Plus, there's a willing seller. Given ONP's responsibility to recover listed threatened and endangered species within its jurisdiction, this acquisition would be an important step toward recovery of Ozette sockeye.

Regards,

Subject Olympic National Park expansion near Ozette

Dear Mr Hill,

This email is in support of the proposed Umbrella Creek addition to Olympic National Park. As a native to the Pacific Northwest, whose life was shaped by the land, water, and wildlife here, I strongly voice my desire that Olympic National Park acquire the proposed Umbrella Creek addition.

Living next to Olympic National Park, and experiencing the beauty and grandeur of Lake Ozette, along with its surrounding forests and tributaries, has been inspiring, invigorating, and rejuvenating to me all my life and to countless others. As time goes on, our unique natural heritage, including our salmon runs, pristine waters, and old-growth ecosystems are becoming more valuable and their conservation more necessary as development expands and global environmental impacts increase.

The Umbrella Creek addition is important to me and valuable to the public for several reasons: Umbrella Creek was identified as a top priority stream for listed salmon in the Lake Ozette by NOAA, the area of the proposed addition has already been identified as appropriate for expansion in the NPS General Management Plan, which received extensive public review, and the parcel was purchased by the Cascade Land Conservancy to save it from residential/recreational development with the understanding that it would be transferred to Olympic National Park when funds became available.

In addition, please consider that the Ozette Lake watershed has the highest fish diversity in Olympic National Park and all fish populations in the watershed are in decline. It is the park's responsibility to recover listed threatened and endangered species within its jurisdiction. Clearly, the proposed acquisition would be an important step toward recovery of Ozette sockeye.

Finally, it's worth nothing that this opportunity is based on a willing-seller acquisition, which means that the current owners want this land to be held in the public trust. While there may be opposition to Park expansion, the benefits to the public at the local, regional, and national levels far outweigh the costs to those who seek to convert this land for economic gain or want another playground for power sports or other activities which spoil the lands natural qualities.

Thank you for your time and consideration.

Sincerely,

Mr. Wayne Hill  
National Park Service  
Seattle Land Office

Subject:  
Umbrella Creek addition to Olympic National Park.

As it is the responsibility of Olympic National Park to recover Threatened and endangered species in its jurisdiction and since NOAA has identified Ozette Sockeye as a top priority endangered species with Umbrella Creek as a prime stream for Sockeye recovery it seems a paramount acquisition for the Park.

Umbrella Creek may be acquired, with a minimum of problems, from Cascade Land Conservancy which is holding the proposed acquisition for the National Park Service to fund it.

Sincerely,  
Long time Olympic Peninsula residents

Subject Favoring Umbrella Creek acquisition

Mr. Hill,

I'm writing in support of the NPS's willing-seller acquisition of the 240 acre Cascade Land Conservancy parcel at Lake Ozette. This area on Umbrella Creek contains important habitat for the threatened Ozette sockeye salmon. Its acquisition is in keeping with the NPS's mission to recover threatened and endangered species, and the area is also within the Ozette park addition identified in Olympic's 2008 General Management Plan. Failure to acquire this parcel would be a sadly failed opportunity to strengthen the ecological integrity of Olympic National Park.

I hope ONP will continue to acquire important park additions whenever possible on a willing seller basis.

Regards,

I support the Olympic National Park in acquiring the 240 acres of critical Ozette sockeye salmon habitat on Umbrella Creek at Lake Ozette. The land was purchased from a timber company by the Cascade Land Conservancy to save it from residential development. The parcel is a priority habitat for threatened Lake Ozette sockeye, and with the Park's purchase of this land, we can help ensure that Umbrella Creek is restored and help the recovery of sockeye on the peninsula. I thank you for making sure that there is adequate time to allow for the public to get involved and comment. Let us work to ensure a better environment for our future generations. Thank you.

Subject Support Umbrella Creek Park Addition

I want you to know that I support the Olympic National Park in acquiring the 240 acres of critical Ozette sockeye salmon habitat on Umbrella Creek at Lake Ozette.

I have been visiting the Lake Ozette unit of ONP annually for 20+ years and am familiar with the periodic monitoring of the lake for health of the sockeye run. Acquisition of this parcel will be of great value in increasing the long term chances of sockeye survival in this lake. As a past contract employee for Cascadia Land Conservancy, I know they only purchase lands of significant habitat value and have the unique ability to acquire at-risk-for development land quickly which deserves long-term stewardship protection.

I thank you for making sure that there is adequate time to allow for the public to get involved and comment. Let us work to ensure a better environment for our future generations. Sincerely,
