Categorical Exclusion Form

Project: Alley Spring Sewer System Rehab

PEPC Project Number: 32563

Project Description:

The Alley Spring sewer collection system is being repaired and rehabilitated to bring it back to safe operating conditions. After inspections that included video monitoring equipment, components of the system have been identified for work. See attached MWR produced Project Details and System Drawings for specifics. The work will be the replacement of existing components in the same footprint. This system was reviewed under the Park's GMP/DCP of 1981, see attached DCP map for Alley Spring Campground. No historic structures will be affected.

Project Locations:

Location

County:	Shannon County	State:	MO
District:		Section:	
Geo.		Other:	
Marker:			

Mitigation(s):

- A change in any line repair from either pipe bursting or relining, to open trench requires additional consultation with the park's archeologist.

Describe the category used to exclude action from further NEPA analysis and indicate the number of the category (see Section 3-4 of DO-12):

C.15 Installation of underground utilities in previously disturbed areas having stable soils, or in an existing utility right-of-way.

On the basis of the environmental impact information in the statutory compliance file, with which I am familiar, I am categorically excluding the described project from further NEPA analysis. No exceptional circumstances (e.g. all boxes in the ESF are marked "no") or conditions in Section 3-6 apply, and the action is fully described in Section 3-4 of DO-12.
