January 3, 2011

Dear Friends of Montezuma Castle and Tuzigoot National Monuments,

On behalf of the planning team, I am pleased to announce that the *Montezuma Castle and Tuzigoot National Monuments General Management Plan* (GMP) has been approved for implementation with the signing of the “Finding of No Significant Impact” by the National Park Service’s Intermountain Regional Director.

A copy of the “Finding of No Significant Impact” is attached. The document provides a summary of the agency’s preferred alternative and why actions proposed in that alternative will not have a significant effect on the human environment. Public comments and suggestions received during the planning effort were considered when developing the preferred alternative. The FONSI also includes an errata sheet that describes minor changes to the text of the GMP based on comments received. These revisions do not result in substantial changes to the preferred alternative or require additional environmental analysis.

This “Finding of No Significant Impact” and the environmental assessment constitute the record of the environmental impact analysis and decision-making process for the GMP which will provide the overall management direction for the park.

Thank you for your participation in this important planning effort and your interest in the future of Montezuma Castle and Tuzigoot National Monuments.

Sincerely,

Kathy M. Davis  
Superintendent
